ANSYS, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS September 30, 2014 (Unaudited)

1. Organization

ANSYS, Inc. (hereafter the "Company" or "ANSYS") develops and globally markets engineering simulation software and technologies widely used by engineers, designers, researchers and students across a broad spectrum of industries and academia, including aerospace, automotive, manufacturing, electronics, biomedical, energy and defense. As defined by the accounting guidance, the Company operates as three segments. However, the Company determined that its three operating segments are sufficiently similar and should be aggregated under the criteria provided in the related accounting guidance.

Given the integrated approach to the multi-discipline problem-solving needs of the Company's customers, a single sale of software may contain components from multiple product areas and include combined technologies. The Company also has a multi-year product and integration strategy that will result in new, combined products or changes to or discontinuation of the historical product offerings. As a result, it is impracticable for the Company to provide accurate historical or current reporting among its various product lines.

2. Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared by ANSYS in accordance with accounting principles generally accepted in the United States for interim financial information for commercial and industrial companies and the instructions to the Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the accompanying statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. The accompanying condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements (and notes thereto) included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The condensed consolidated December 31, 2013 balance sheet included in the most recent Annual Report on Form 10-K. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements have been included, and all adjustments are of a normal and recurring nature. Operating results for the three and nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for any future period.

The noncontrolling interest position of an acquired subsidiary is reported as a separate component of consolidated equity from the equity attributable to ANSYS stockholders as of September 30, 2014. The noncontrolling interest in the Company's net income was not significant to the consolidated results for the period presented and therefore has been included as a component of other expense, net in the condensed consolidated statements of income. Cash and Cash Equivalents

Cash and cash equivalents consist primarily of highly liquid investments such as deposits held at major banks and money market mutual funds. Cash equivalents are carried at cost, which approximates fair value. The Company's cash and cash equivalent balances comprise the following:

	September 30, 2014		December 31, 2013	
(in thousands, except percentages)	Amount	Amount % of Total		% of Total
Cash accounts	\$447,892	54.8	\$439,348	59.2
Money market mutual funds	368,913	45.2	303,138	40.8
Total	\$816,805		\$742,486	

The Company's money market mutual fund balances are held in various funds of a single issuer as of September 30, 2014 and December 31, 2013, respectively.

3. Acquisitions

SpaceClaim Corporation

On April 30, 2014, the Company completed the acquisition of SpaceClaim Corporation ("SpaceClaim"), a leading provider of 3-D modeling technology. Under the terms of the agreement, ANSYS acquired SpaceClaim for a purchase price of \$84.9 million, which was paid almost entirely in cash, plus retention vehicles and an adjustment for working capital.

SpaceClaim's software provides customers with a powerful and intuitive 3-D direct modeling solution to author new concepts and then leverage the power of simulation to rapidly iterate on these designs to drive innovation. The broad appeal of the SpaceClaim technology can help the Company deliver simulation tools to any engineer in any industry. The complementary combination is expected to accelerate development of new and innovative products to the marketplace while lowering design and engineering costs for customers.

The operating results of SpaceClaim have been included in the Company's condensed consolidated financial statements from April 30, 2014, the date of acquisition. The operating results of the acquired business were not material to the Company's consolidated results of operations during the period from April 30, 2014 to September 30, 2014.

The assets and liabilities of SpaceClaim have been recorded based upon management's estimates of their fair market values as of the acquisition date. The following tables summarize the fair value of consideration transferred and the preliminary fair values of identified assets acquired and liabilities assumed at the acquisition date:

Fair Value of Consideration Transferred:

(in thousands)		
Cash	\$84,843	
ANSYS replacement stock options	68	
Total consideration transferred at fair value	\$84,911	
Recognized Amounts of Identifiable Assets Acquired and Liabilities Assumed:		
(in thousands)		
Cash	\$723	
Accounts receivable and other tangible assets	1,857	
Developed technology (10-year life)	15,800	
Customer relationships (6-year life)	9,400	
Trade name (6-year life)	1,300	
Contract backlog (6-year life)	550	
Non-compete agreement (2-year life)	300	
Net deferred tax assets	5,257	
Accounts payable and other liabilities	(1,925)
Deferred revenue	(700)
Total identifiable net assets	\$32,562	
Goodwill	\$52,349	
The goodwill which is not tax-deductible is attributed to intangible assets that do not	t qualify for separate reco	ognition

The goodwill, which is not tax-deductible, is attributed to intangible assets that do not qualify for separate recognition, including the assembled workforce of the acquired business and the synergies expected to arise as a result of the acquisition of SpaceClaim.

The fair values of the assets acquired and liabilities assumed are based on preliminary calculations and the estimates and assumptions for these items are subject to change as additional information about what was known and knowable at the acquisition date is obtained during the measurement period (up to one year from the acquisition date). During the period since the SpaceClaim acquisition date, the Company increased the fair value of deferred revenue from \$0.5 million to \$0.7 million and increased the fair values of net deferred tax assets from \$4.1 million to \$5.3 million, with the offset recorded as a \$1.0 million decrease to goodwill. These adjustments were based on refinements to assumptions used in the preliminary valuation of deferred revenue and information about what was known and knowable as of the acquisition date in the calculation of the net deferred tax assets.

Pro forma results of operations have not been presented as the effects of the SpaceClaim business combination were not material to the Company's consolidated results of operations.

In valuing deferred revenue on the SpaceClaim balance sheet as of the acquisition date, the Company applied the fair value provisions applicable to the accounting for business combinations. Acquired deferred revenue with a historical carrying value of \$3.3 million was ascribed a fair value of \$0.7 million on the opening balance sheet. As a result, the Company's post-acquisition revenue will be less than the sum of what would have otherwise been reported by ANSYS and SpaceClaim absent the acquisition. The impact on reported revenue for the three and nine months ended September 30, 2014 was \$0.8 million and \$1.4 million, respectively. The expected impact on reported revenue is \$0.6 million for the quarter ending December 31, 2014 and \$0.6 million for the year ending December 31, 2015. Reaction Design

On January 3, 2014, the Company completed the acquisition of Reaction Design, a leading developer of chemistry simulation software. Under the terms of the agreement, ANSYS acquired Reaction Design for a purchase price of \$19.1 million in cash. Reaction Design's solutions enable transportation manufacturers and energy companies to rapidly achieve their clean technology goals by automating the analysis of chemical processes via computer simulation and modeling solutions.

The operating results of Reaction Design have been included in the Company's condensed consolidated financial statements since the date of acquisition, January 3, 2014. The total consideration transferred was allocated to the assets and liabilities of Reaction Design based on management's estimates of the fair values of the assets acquired and the liabilities assumed. The allocation included \$7.0 million to identifiable intangible assets, including core technology, customer lists and trade names, to be amortized over periods between two and eleven years, and \$8.6 million to goodwill, which is not tax-deductible. The fair values of the assets acquired and liabilities assumed are based on preliminary calculations and the estimates and assumptions for these items are subject to change as additional information about what was known and knowable at the acquisition date is obtained and assessed during the measurement period (up to one year from the acquisition date). During the period since the Reaction Design acquisition date, the Company decreased the fair values of identifiable finite-lived intangible assets from \$9.2 million to \$7.0 million and increased the fair values of net deferred tax assets from \$2.3 million to \$2.6 million, with the offset recorded as an increase to goodwill of \$1.3 million and a reduction in noncontrolling interest of \$0.6 million. These adjustments were based on refinements to assumptions used in the preliminary valuation of intangible assets and information about what was known and knowable as of the acquisition date in the calculation of the net deferred tax assets. The operating results of Reaction Design are not material to the condensed consolidated financial statements. In valuing deferred revenue on the Reaction Design balance sheet as of the acquisition date, the Company applied the fair value provisions applicable to the accounting for business combinations. Acquired deferred revenue with a historical carrying value of \$2.3 million was ascribed no fair value on the opening balance sheet. As a result, the Company's post-acquisition revenue will be less than the sum of what would have otherwise been reported by ANSYS and Reaction Design absent the acquisition. The impact on reported revenue for the three and nine months ended September 30, 2014 was \$0.4 million and \$1.8 million, respectively. The expected impact on reported revenue is \$0.3 million for the quarter ending December 31, 2014 and \$0.3 million for the year ending December 31, 2015.

EVEN - Evolutionary Engineering AG

On April 2, 2013, the Company acquired EVEN - Evolutionary Engineering AG ("EVEN"), a leading provider of composite analysis and optimization technology. Under the terms of the agreement, ANSYS acquired EVEN for a purchase price of \$8.1 million, which consisted of \$4.5 million in cash and an estimated \$3.6 million of contingent consideration based on EVEN's achievement of certain technical milestones during the three years following the acquisition date. The Company made its first contingent payment totaling \$1.6 million in March 2014. The total consideration transferred was allocated to the assets and liabilities of EVEN based on management's estimates of the fair values of the assets acquired and the liabilities assumed. The allocation included \$2.6 million to identifiable intangible assets, including customer lists and core technology, to be amortized over a period of five years, and \$5.9 million to goodwill, which is not tax-deductible. The fair values of the assets acquired and liabilities assumed are based on management's estimates of their fair values as of the acquisition date.

4. Other Receivables and Current Assets

The Company's other receivables and current assets comprise the following balances:

(in thousands)	September 30,	December 31,
(in thousands)	2014	2013
Receivables related to unrecognized revenue	\$103,892	\$140,051
Income taxes receivable, including overpayments and refunds	24,391	42,357
Prepaid expenses and other current assets	19,786	18,326
Total other receivables and current assets	\$148,069	\$200,734
Receivables for unrecognized revenue represent the current portion of annual lease li	censes and softw	are maintenance

that has not yet been recognized as revenue.

5. Earnings Per Share

Basic earnings per share ("EPS") amounts are computed by dividing earnings by the weighted average number of common shares outstanding during the period. Diluted EPS amounts assume the issuance of common stock for all potentially dilutive equivalents outstanding. To the extent stock options are anti-dilutive, they are excluded from the calculation of diluted EPS.

The details of basic and diluted EPS are as follows:

	Three Months Ended		Nine Months E	nded
('n (herren le errent men el en lete)	September 30,	September 30,	September 30,	September 30,
(in thousands, except per share data)	2014	2013	2014	2013
Net income	\$65,479	\$62,430	\$185,057	\$169,398
Weighted average shares outstanding – basic	91,875	92,541	92,224	92,770
Dilutive effect of stock plans	2,030	2,724	2,173	2,387
Weighted average shares outstanding – diluted	93,905	95,265	94,397	95,157
Basic earnings per share	\$0.71	\$0.67	\$2.01	\$1.83
Diluted earnings per share	\$0.70	\$0.66	\$1.96	\$1.78
Anti-dilutive options	237	1,148	877	1,145

6. Goodwill and Intangible Assets

The Company's intangible assets and estimated useful lives are classified as follows:

	September 30), 2014	December 31,	, 2013
(in thousands)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets:				
Developed software and core technologies (3 – 11 years)	\$322,093	\$(221,502)	\$300,493	\$(203,236)
Customer lists and contract backlog (3 – 15 years)	240,310	(132,331)	237,173	(119,368)
Trade names $(2 - 10 \text{ years})$	114,593	(60,073)	102,651	(50,990)
Non-compete agreement (2 years)	300	(33)		_
Total	\$677,296	\$(413,939)	\$640,317	\$(373,594)
Unamortized intangible assets:				
Trade names	\$14,157		\$24,667	
The decrease in unamortized trade names in the table above	was due to the	movement of c	ertain trade na	mes to

The decrease in unamortized trade names in the table above was due to the movement of certain trade names to amortized intangible assets. Amortization expense for the intangible assets reflected above was \$16.3 million and \$14.8 million for the three months ended September 30, 2014 and 2013, respectively. Amortization expense for the intangible assets reflected above was \$45.6 million and \$46.4 million for the nine months ended September 30, 2014 and 2013, respectively.

As of September 30, 2014, estimated future amortization expense for the intangible assets reflected above is as follows:

(in thousands)			
Remainder of 2014		\$15,526	
2015		57,069	
2016		47,697	
2017		44,172	
2018		30,566	
2019		16,781	
Thereafter		51,546	
Total intangible assets subject to amortization		263,357	
Indefinite-lived trade names		14,157

During the first quarter of 2014, the Company completed the annual impairment test for goodwill and indefinite-lived intangible assets and determined that these assets had not been impaired as of the test date, January 1, 2014. No events or circumstances changed during the nine months ended September 30, 2014 that would indicate that the fair values of the Company's reporting units or indefinite-lived intangible assets are below their carrying amounts.

)

7. Fair Value Measurement

The valuation hierarchy for disclosure of assets and liabilities reported at fair value prioritizes the inputs for such valuations into three broad levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument; or

Level 3: unobservable inputs based on the Company's own assumptions used to measure assets and liabilities at fair value.

A financial asset's or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following tables provide the assets and liabilities carried at fair value and measured on a recurring basis:

Fair Value Measurements at Reporting Date Using:

		Date Using.			
(in thousands)	September 30, 2014	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets					
Cash equivalents	\$368,913	\$368,913	\$ —	\$—	
Short-term investments	\$665	\$—	\$ 665	\$—	
Liabilities					
Contingent consideration	\$(2,653)	\$—	\$ —	\$(2,653)
(in thousands)	December 31, 2013	Fair Value Meas Date Using: Quoted Prices in Active Markets (Level 1)	Inputs	Significant Unobservable Inputs	
Assets		. ,	(Level 2)	(Level 3)	
Cash equivalents	\$303,138	\$303,138	\$	\$	
Short-term investments	\$500,150 \$500	\$	\$ 500	\$	
Liabilities	φ.500	φ	ψ 500	φ	
	¢(7,200)	¢	¢	¢ (7.280	`
Contingent consideration	\$(7,389) \$(704)	ው መ	ф —	\$(7,389 \$(704)
Deferred compensation	\$(704)	هــــــــــــــــــــــــــــــــــــ	\$ —	\$(704	J

The cash equivalents in the preceding tables represent money market mutual funds.

The short-term investments in the preceding tables represent deposits held by certain foreign subsidiaries of the Company. The deposits have fixed interest rates with maturity dates ranging from three months to one year. The contingent consideration in the tables above represents potential future payments related to the EVEN and Apache Design, Inc. ("Apache") acquisitions in accordance with the respective agreements. The deferred compensation in the table above is attributable to a retention agreement for a key member of Apache management, and was accounted for outside of that business combination. The net present value calculations for the contingent consideration and deferred compensation include significant unobservable inputs in the assumption that all remaining payments will be made, and therefore the liabilities were classified as Level 3 in the fair value hierarchy.

The following tables present the changes in the Company's Level 3 liabilities that are measured at fair value on a recurring basis during the three and nine months ended September 30, 2014 and 2013:

	Fair Value Measurement Using		
	Significant Unobservable Inputs		
(in they can de)	Contingent Deferred		
(in thousands)	Consideration Compensation		
Balance as of January 1, 2014	\$7,389 \$704		
Contingent payment	(1,578) —		
Interest expense and foreign exchange activity included in earnings	164 3		
Balance as of March 31, 2014	\$5,975 \$707		
Interest expense and foreign exchange activity included in earnings	87 4		
Balance as of June 30, 2014	\$6,062 \$711		
Contingent payments	(3,288) (712)		
Interest expense and foreign exchange activity included in earnings	(121) 1		
Balance as of September 30, 2014	\$2,653 \$—		

The final payment related to the retention of a key member of Apache management was paid in the third quarter of 2014. As a result of making this final payment, the Company no longer has a deferred compensation liability at September 30, 2014.

	Fair Value Measurement Using				
	Significant Unobservable Input				
(in thousands)	Contingent	Deferred			
(in thousands)	Consideration	Compensation			
Balance as of January 1, 2013	\$6,436	\$1,394			
Interest expense included in earnings	31	6			
Balance as of March 31, 2013	\$6,467	\$1,400			
EVEN contingent consideration	3,597	—			
Interest expense and foreign exchange activity included in earnings	134	7			
Balance as of June 30, 2013	\$10,198	\$1,407			
Contingent payments	(3,288) (712)			
Interest expense and foreign exchange activity included in earnings	295	5			
Balance as of September 30, 2013	\$7,205	\$700			
	.1 1.5				

The carrying values of cash, accounts receivable, accounts payable, accrued expenses, other accrued liabilities and short-term obligations approximate their fair values because of their short-term nature.

8. Geographic Information

Revenue to external customers is attributed to individual countries based upon the location of the customer. Revenue by geographic area is as follows:

	Three Months Ended		Nine Months Ended	
(in thousands)	September 30,	September 30,	September 30,	September 30,
(in thousands)	2014	2013	2014	2013
United States	\$81,833	\$72,671	\$233,612	\$214,342
Japan	25,823	25,835	82,543	81,538
Germany	23,835	23,892	73,337	68,905

Diluted earnings per share	\$(0.08)	\$(0.07)	\$(0.21)	\$(0.19)	

10. Stock Repurchase Program

In February 2014, the Company's Board of Directors increased the authorization for the repurchase of shares from the remaining 1.5 million shares under its then existing authorization to 3.0 million shares. Under the Company's stock repurchase program, the Company repurchased 1,431,503 shares during the nine months ended September 30, 2014 at an average price per share of \$75.87, for a total cost of \$108.6 million. During the nine months ended September 30, 2013, the Company repurchased 988,000 shares at an average price per share of \$74.35, for a total cost of \$73.5 million. As of September 30, 2014, approximately 1.6 million shares remained authorized for repurchase under the program. In November 2014, the Company's Board of Directors increased the authorization from the remaining 1.6 million shares to 5.0 million shares.

11. Contingencies and Commitments

The Company is subject to various investigations, claims and legal proceedings that arise in the ordinary course of business, including alleged infringement of intellectual property rights, commercial disputes, labor and employment matters, tax audits and other matters. In the opinion of the Company, the resolution of pending matters is not expected to have a material, adverse effect on the Company's consolidated results of operations, cash flows or financial position. However, each of these matters is subject to various uncertainties and it is possible that an unfavorable resolution of one or more of these proceedings could materially affect the Company's results of operations, cash flows or financial position.

An Indian subsidiary of the Company received a formal inquiry after a service tax audit was held in 2011. The Company could incur tax charges and related liabilities, including those related to the service tax audit case, of approximately \$6 million. The service tax issues raised in the Company's notice are very similar to the case, M/s Microsoft Corporation (I) (P) Ltd. Vs Commissioner of Service Tax, New Delhi, wherein the Delhi Customs, Excise

and Service Tax Appellate Tribunal (CESTAT) has passed a favorable ruling. The Company can provide no assurances on whether the Microsoft case's favorable ruling will be

challenged in higher courts nor on the impact that the present Microsoft case's decision will have on the Company's audit case. The Company is uncertain as to when the service tax audit will be completed.

The Company sells software licenses and services to its customers under proprietary software license agreements. Each license agreement contains the relevant terms of the contractual arrangement with the customer, and generally includes certain provisions for indemnifying the customer against losses, expenses and liabilities from damages that are incurred by or awarded against the customer in the event the Company's software or services are found to infringe upon a patent, copyright or other proprietary right of a third party. To date, the Company has not had to reimburse any of its customers for any losses related to these indemnification provisions and no material claims asserted under these indemnification provisions are outstanding as of September 30, 2014. For several reasons, including the lack of prior material indemnification claims, the Company cannot determine the maximum amount of potential future payments, if any, related to such indemnification provisions.

12. Sale-Leaseback Arrangement

On September 14, 2012, the Company entered into a lease agreement for 186,000 square feet of rentable space located in an office facility in Canonsburg, Pennsylvania, which will serve as the Company's new headquarters. The lease was effective as of September 14, 2012, but because the leased premises were under construction, the Company is not obligated to pay rent until three months following the date that the leased premises were delivered to ANSYS, which occurred on October 1, 2014. The term of the lease is 183 months, beginning on October 1, 2014. The lease agreement terms provide that the Company is responsible for paying the cost of certain tenant improvements that exceed an allowance to be paid by the landlord. There is no cap to the Company's obligation in excess of the landlord allowance, and the improvements do not meet the definition of "normal tenant improvements" as defined in the accounting guidance. As a result, the Company is considered the owner of the building during the construction period and the lease is subject to sale-leaseback treatment.

As of September 30, 2014, the Company has recorded a \$32.0 million construction-in-progress asset and a corresponding liability for construction debt funded by the lessor on its condensed consolidated balance sheet. The building was completed and delivered to the Company on October 1, 2014. The sale-leaseback treatment of the lease during the construction period did not have any impact on the Company's results of operations or cash flows.

13.New Accounting Guidance

Revenue from contracts with customers: In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (ASU 2014-09). ASU 2014-09 supersedes most current revenue recognition guidance, including industry-specific guidance. Previous guidance requires an entity to recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed or determinable, and collectibility is reasonably assured. Under the new guidance, an entity is required to evaluate revenue recognition by identifying a contract with a customer, identifying the performance obligations in the contract, determining the transaction price, allocating the transaction price to the performance obligations in the contract and recognizing revenue when (or as) the entity satisfies a performance obligation. This guidance will be effective for annual periods beginning after December 15, 2016, including interim periods within that reporting period. Entities have the option of using a full retrospective, cumulative effect or modified approach to adopt the guidance. This update will impact the timing and amounts of revenue recognized. The Company is currently evaluating the effect that implementation of this update will have on its financial results upon adoption.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

ANSYS, Inc.

Canonsburg, Pennsylvania

We have reviewed the accompanying condensed consolidated balance sheet of ANSYS, Inc. and subsidiaries (the "Company") as of September 30, 2014, and the related condensed consolidated statements of income and comprehensive income for the three-month and nine-month periods ended September 30, 2014 and 2013, and of cash flows for the nine-month periods ended September 30, 2014, and 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of ANSYS, Inc. and subsidiaries as of December 31, 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 27, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ Deloitte & Touche LLP Pittsburgh, Pennsylvania November 5, 2014

Item 2.Management's Discussion and Analysis of Financial Condition and Results of Operations Overview:

ANSYS, Inc.'s results for the three months ended September 30, 2014 reflect growth in revenue of 10.0%, operating income of 11.2% and diluted earnings per share of 6.1% as compared to the three months ended September 30, 2013. The Company's results for the nine months ended September 30, 2014 reflect growth in revenue of 9.0%, operating income of 10.4% and diluted earnings per share of 10.1% as compared to the nine months ended September 30, 2013. The Company experienced higher revenue in 2014 from growth in both license and maintenance revenue. The increase in revenue was partially offset by increased operating expenses, including higher salaries and additional operating expenses related to the Company's 2014 acquisitions.

The Company's non-GAAP results for the three months ended September 30, 2014 reflect increases in revenue of 10.3%, operating income of 11.5% and diluted earnings per share of 7.2% as compared to the three months ended September 30, 2013. The Company's non-GAAP results for the nine months ended September 30, 2014 reflect increases in revenue of 9.0%, operating income of 8.1% and diluted earnings per share of 8.7% as compared to the nine months ended September 30, 2013. The non-GAAP results exclude the income statement effects of acquisition accounting adjustments to deferred revenue, stock-based compensation, acquisition-related amortization of intangible assets and transaction costs related to business combinations. For further disclosure regarding non-GAAP results, see the section titled "Non-GAAP Results" immediately preceding the section titled "Liquidity and Capital Resources". The Company's financial position includes \$817.5 million in cash and short-term investments, and working capital of \$667.7 million as of September 30, 2014.

Under the Company's stock repurchase program, the Company repurchased 1,431,503 shares during the nine months ended September 30, 2014 at an average price per share of \$75.87, for a total cost of \$108.6 million.

On April 30, 2014, the Company completed the acquisition of SpaceClaim, a leading provider of 3-D modeling technology. Under the terms of the agreement, ANSYS acquired SpaceClaim for a purchase price of \$84.9 million, which was paid almost entirely in cash, plus retention vehicles and an adjustment for working capital. The operating results of SpaceClaim are included in the Company's consolidated financial statements from the date of acquisition. On January 3, 2014, the Company completed the acquisition of Reaction Design, a leading developer of chemistry simulation software. Under the terms of the agreement, ANSYS acquired Reaction Design for a purchase price of \$19.1 million in cash. The operating results of Reaction Design are included in the Company's consolidated financial statements from the date of acquisition statements from the date of acquisition.

ANSYS develops and globally markets engineering simulation software and services widely used by engineers, designers, researchers and students across a broad spectrum of industries and academia, including aerospace, automotive, manufacturing, electronics, biomedical, energy and defense. Headquartered south of Pittsburgh, Pennsylvania, the Company employed approximately 2,690 people as of September 30, 2014 and focuses on the development of open and flexible solutions that enable users to analyze designs directly on the desktop, providing a common platform for fast, efficient and cost-conscious product development, from design concept to final-stage testing and validation. The Company distributes its suite of simulation technologies through a global network of independent channel partners and direct sales offices in strategic, global locations. It is the Company's intention to continue to maintain this hybrid sales and distribution model.

The Company licenses its technology to businesses, educational institutions and governmental agencies. Growth in the Company's revenue is affected by the strength of global economies, general business conditions, currency exchange rate fluctuations, customer budgetary constraints and the competitive position of the Company's products. The Company believes that the features, functionality and integrated multiphysics capabilities of its software products are as strong as they have ever been. However, the software business is generally characterized by long sales cycles. These long sales cycles increase the difficulty of predicting sales for any particular quarter. The Company makes many operational and strategic decisions based upon short- and long-term sales forecasts that are impacted not only by these long sales cycles but by current global economic conditions. As a result, the Company believes that its overall performance is best measured by fiscal year results rather than by quarterly results.

The Company's management considers the competition and price pressure that it faces in the short- and long-term by focusing on expanding the breadth, depth, ease of use and quality of the technologies, features, functionality and

Edgar Filing: ANSYS INC - Form 10-Q

integrated multiphysics capabilities of its software products as compared to its competitors; investing in research and development to develop new and innovative products and increase the capabilities of its existing products; supplying new products and services; focusing on customer needs, training, consulting and support; and enhancing its distribution channels. From time to time, the Company also considers acquisitions to supplement its global engineering talent, product offerings and distribution channels.

Geographic Trends:

In North America, revenue grew 12% and 8% for the three and nine months ended September 30, 2014, respectively. The growth rates were positively impacted by several large deals in the third quarter of 2014 that had strong new business components. The Company experienced strength in the electronics, semiconductor, aerospace and defense, automotive and energy markets. In the electronics and semiconductor areas, customers are continuing to invent power-efficient systems that deliver more performance per watt. High-tech companies are developing mobile electronics, relying on wireless communication systems to connect with the Internet and cellular base stations. To provide reliable connectivity, engineers need to design dependable communication systems that can support multiple standards, such as Bluetooth, Wi-Fi and LTE. The Company's Chip-Package-System ("CPS") design methodology is helping engineering teams achieve these objectives by enabling high-tech companies to model, simulate, analyze and verify complete electronics systems. With extended operations in the Middle East, the defense sector continues to focus on affordability and looks to the Company as an enterprise-wide, single vendor with comprehensive capabilities. This was evidenced by a large, multi-year, North America-wide, full physics portfolio agreement at a major defense contractor. The space sector was also very active in the third quarter with NASA announcing the award of the International Space Station taxi contract to Boeing and SpaceX, where the Company is strongly positioned and working closely with the booming commercial space sector. The sales pipelines are continuing to build as a result of ongoing customer engagement activities in North America.

Europe, which continued to be the geography with the most challenging economic environment, delivered 6% reported and 5% constant currency revenue growth for the three months ended September 30, 2014, and 9% reported and 6% constant currency revenue growth for the nine months ended September 30, 2014. While the Company experienced improved growth in France, the United Kingdom, Italy, Spain and the Nordic countries, the Company's largest market in Europe, Germany, had an adverse impact on Europe's overall growth in the third quarter as a result of the ongoing volatility and geopolitical issues, combined with a cautious customer spending environment. Europe's new business performance also continues to be negatively impacted by continued weakness in Russia and certain elements of the indirect channel. From an industry perspective, the Company experienced growth in the turbomachinery, automotive and energy industries.

Similar to the first half of 2014, the results in the Company's General International Area ("GIA") continued to demonstrate measurable progress. These results are the direct outcome of management changes, the Company's continued investments in expanding channel capacity and go-to-market strategies, and a focus on sales execution. Overall, the region delivered constant currency revenue growth of 14% and 13% for the three and nine months ended September 30, 2014, respectively. Korea, China, India and Taiwan showed relative strength, and Japan delivered constant currency revenue growth of 6% and 9% for the three and nine months ended September 30, 2014, respectively. Brazil also showed signs of improvement in the third quarter of 2014. During the third quarter, the Company continued to make progress on internal sales and marketing initiatives and focused on customer engagement and pipeline-building activities throughout the region. From an industry perspective, the Company experienced notable growth in the electronics and semiconductor industries. As consumer demand bounces back, the consumer electronics companies are investing in research and development with a clear focus on smart products. The following discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and notes thereto for the three and nine months ended September 30, 2014, and with the Company's audited consolidated financial statements and notes thereto for the year ended December 31, 2013 filed on the Annual Report on Form 10-K with the Securities and Exchange Commission. The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's condensed consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, the Company evaluates its estimates, including those related to fair value of stock awards, bad debts, contract revenue, valuation of goodwill, valuation of intangible assets, contingent consideration, deferred compensation, income taxes, uncertain tax positions, tax valuation reserves, useful lives for depreciation and amortization, and contingencies and litigation. The Company bases its estimates on historical experience, market experience, estimated future cash flows

Edgar Filing: ANSYS INC - Form 10-Q

and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, but not limited to, the following statements, as well as statements that contain such words as "anticipates," "intends," "believes," "plans" and other similar expressions:

The Company's expectations regarding the accelerated development of new and innovative products to the marketplace while lowering design and engineering costs for customers as a result of the SpaceClaim and Reaction Design acquisitions.

The Company's estimates regarding the expected impact on reported revenue related to the acquisition accounting treatment of deferred revenue.

The Company's estimation that it is probable that all remaining payments will be made for contingent consideration related to the EVEN acquisition.

•The Company's assessment of the ultimate liabilities arising from various investigations, claims and legal proceedings. •The Company's intentions regarding its hybrid sales and distribution model.

The Company's statement regarding the strength of the features, functionality and integrated multiphysics capabilities of its software products.

The Company's belief that its overall performance is best measured by fiscal year results rather than by quarterly results.

The Company's expectation that it will continue to make targeted investments in its global sales and marketing organization and its global business infrastructure to enhance sales and services activities and to support its worldwide sales distribution and marketing strategies, and the business in general.

The Company's intentions related to investments in research and development, particularly as it relates to expanding the ease of use and capabilities of its flagship products and other products within its broad portfolio of simulation software, evolution of its ANSYS[®] Workbench[™] latform, HPC capabilities, immersive user interface, robust design and ongoing integration of acquired technology.

The Company's intention to repatriate previously taxed earnings and to reinvest all other earnings of its non-U.S. subsidiaries.

The Company's plans related to future capital spending.

The sufficiency of existing cash and cash equivalent balances to meet future working capital and capital expenditure requirements.

The Company's expectations regarding its share repurchase activity over the next two quarters and intentions to enter into a Rule 10b5-1 trading plan during the fourth quarter of 2014 to facilitate the execution of the repurchases. The Company's belief that the best uses of its excess cash are to invest in the business and to repurchase stock in order to both offset dilution and return capital to stockholders in excess of its requirements with the goal of increasing stockholder value.

•The Company's intentions related to investments in complementary companies, products, services and technologies. •The Company's statement regarding increased exposure to volatility of foreign exchange rates.

Forward-looking statements should not be unduly relied upon because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the Company's control. The Company's actual results could differ materially from those set forth in forward-looking statements. Certain factors, among others, that might cause such a difference include risks and uncertainties disclosed in the Company's most recent Annual Report on Form 10-K, Part I, Item 1A. Information regarding new risk factors or material changes to these risk factors have been included within Part II, Item 1A of this Quarterly Report on Form 10-Q.

Results of Operations

Three Months Ended September 30, 2014 Compared to Three Months Ended September 30, 2013 Revenue:

Three Months Ended Septemb 30,		Ended September	Change	
(in thousands, except percentages)	2014	2013	Amount	%
Revenue:				
Lease licenses	\$80,530	\$74,267	\$6,263	8.4
Perpetual licenses	59,435	54,918	4,517	8.2
Software licenses	139,965	129,185	10,780	8.3
Maintenance	88,562	77,985	10,577	13.6
Service	5,473	5,488	(15) (0.3)
Maintenance and service	94,035	83,473	10,562	12.7
Total revenue	\$234,000	\$212,658	\$21,342	10.0

The Company's revenue in the quarter ended September 30, 2014 increased 10.0% as compared to the quarter ended September 30, 2013. The growth was partially influenced by the Company's continued investment in its global sales, support and marketing organizations. Revenue from lease licenses increased 8.4% as compared to the quarter ended September 30, 2013 due primarily to growth in lease license revenue from Apache and electronics products. Perpetual license revenue, which is derived primarily from new sales during the quarter, increased 8.2% as compared to the prior-year quarter due primarily to growth in perpetual license revenue of electronics products. Annual maintenance contracts that were sold with new perpetual licenses, along with maintenance contracts sold with new perpetual licenses in previous quarters, contributed to maintenance revenue growth of 13.6%.

With respect to revenue, on average for the quarter ended September 30, 2014, the U.S. Dollar was approximately 0.1% weaker, when measured against the Company's primary foreign currencies, than for the quarter ended September 30, 2013. The net overall weakening resulted in increased revenue of \$0.1 million during the quarter ended September 30, 2014, as compared with the same quarter of 2013. The impact on revenue was primarily driven by \$0.7 million, \$0.5 million and \$0.4 million of favorable impact due to a strengthening British Pound, Euro and Korean Won, respectively, partially offset by \$1.5 million of adverse impact due to a weakening Japanese Yen. The impact of foreign currency fluctuations on operating income was not material for the quarter ended September 30, 2014. A substantial portion of the Company's license and maintenance revenue is derived from annual lease and maintenance contracts. These contracts are generally renewed on an annual basis and typically have a high rate of customer renewal. In addition to the recurring revenue base associated with these contracts, a majority of customers purchasing new perpetual licenses also purchase related annual maintenance contracts. As a result of the significant recurring revenue base, the Company's license and maintenance revenue growth rate in any period does not necessarily correlate to the growth rate of new license and maintenance contracts sold during that period. To the extent the rate of customer renewal for lease and maintenance contracts is high, incremental lease contracts, and maintenance contracts sold with new perpetual licenses, will result in license and maintenance revenue growth. Conversely, if the rate of renewal for these contracts is adversely affected by economic or other factors, the Company's license and maintenance growth will be adversely affected over the term that the revenue for those contracts would have otherwise been recognized. International and domestic revenues, as a percentage of total revenue, were 65.0% and 35.0%, respectively, during the quarter ended September 30, 2014, and 65.8% and 34.2%, respectively, during the quarter ended September 30, 2013. The Company derived 24.8% and 25.9% of its total revenue through the indirect sales channel for the guarters ended September 30, 2014 and 2013, respectively.

In valuing deferred revenue on the balance sheets of the Company's recent acquisitions as of their respective acquisition dates, the Company applied the fair value provisions applicable to the accounting for business combinations, resulting in a reduction of deferred revenue as compared to its historical carrying amount. As a result, the Company's post-acquisition revenue will be less than the sum of what would have otherwise been reported by ANSYS and its subsidiaries absent the acquisitions. The impacts on reported revenue were \$1.5 million and \$0.8 million for the quarters ended September 30, 2014 and 2013, respectively. The expected impact on reported revenue is

\$1.1 million and \$0.9 million for the quarter ending December 31, 2014 and for the year ending December 31, 2015, respectively.

Deferred Revenue and Backlog:

Deferred revenue consists of billings made or payments received in advance of revenue recognition from lease license and maintenance agreements. The deferred revenue on the Company's condensed consolidated balance sheets does not represent the total value of annual or multi-year, noncancellable lease license and maintenance agreements. The Company's backlog represents installment billings for periods beyond the current quarterly billing cycle and customer orders received but not processed. The Company's deferred revenue and backlog as of September 30, 2014 and December 31, 2013 consist of the following:

	Balance at September 30, 2014				
(in thousands)	Total	Current	Long-Term		
Deferred revenue	\$314,318	\$301,026	\$13,292		
Backlog	119,143	46,213	72,930		
Total	\$433,461	\$347,239	\$86,222		
	Balance at December 31, 2013				
(in thousands)	Total	Current	Long-Term		
Deferred revenue	\$317,730	\$309,775	\$7,955		
Backlog	91,786	33,446	58,340		
Total	\$409,516	\$343,221	\$66,295		

Revenue associated with deferred revenue and backlog that is expected to be recognized in the subsequent twelve months is classified as current in the table above.

Cost of Sales and Gross Profit:

Software Licenses: The increase in cost of software licenses was primarily due to the following:

Increased third-party royalties of \$0.3 million.

SpaceClaim-related cost of software licenses of \$0.2 million.

Increased stock-based compensation expense of \$0.2 million.

Increased salaries of \$0.2 million, primarily due to an increase in headcount.

Amortization: The increase in amortization expense was primarily due to an increase in amortization of trade names. Maintenance and Service: The increase in maintenance and service costs was primarily due to increased salaries of \$0.7 million.

The improvement in gross profit was a result of the increase in revenue offset by a smaller increase in related cost of sales.

Operating Expenses:

	Three Months Ended September 30,					
	2014		2013		Change	
(in thousands, except percentages)	Amount	% of Revenue	Amount	% of Revenue	Amount	%
Operating expenses:						
Selling, general and administrative	\$58,172	24.9	\$51,345	24.1	\$6,827	13.3
Research and development	41,033	17.5	38,882	18.3	2,151	5.5
Amortization	6,793	2.9	5,625	2.6	1,168	20.8
Total operating expenses	\$105,998	45.3	\$95,852	45.1	\$10,146	10.6

Selling, General and Administrative: The increase in selling, general and administrative costs was primarily due to the following:

Increased salaries and other headcount-related costs, including incentive compensation, of \$2.7 million, primarily due to an increase in headcount.

- SpaceClaim-related selling, general and administrative expenses of \$1.4
- million.

Increased third-party commissions of \$0.6 million.

- Reaction Design-related selling, general and administrative expenses of \$0.6
- million.

The Company anticipates that it will continue to make targeted investments in its global sales and marketing organization and its global business infrastructure to enhance sales and services activities and to support its worldwide sales distribution and marketing strategies, and the business in general.

Research and Development: The increase in research and development costs was primarily due to the following: Decreased incentive compensation of \$1.6 million.

Increased salaries of \$1.5 million.

SpaceClaim-related research and development expenses of \$0.8 million.

Increased stock-based compensation expense of \$0.6 million.

Reaction Design-related research and development expenses of \$0.6

• million.

The Company has traditionally invested significant resources in research and development activities and intends to continue to make investments in this area, particularly as it relates to expanding the ease of use and capabilities of its flagship products and other products within its broad portfolio of simulation software, evolution of its ANSYS[®] Workbench^T platform, expanding its HPC capabilities, immersive user interface, robust design and ongoing integration of acquired technology.

Amortization: The increase in amortization expense was primarily due to a net increase in amortization of acquired customer lists and contract backlog.

Interest Expense: The Company's interest expense consists of the following:

	Three Months	Ended	
(in thousands)	September 30	, September 30,	
(in thousands)	2014	2013	
Discounted obligations	\$(139) \$(186)	
Term loan		(22))	
Amortization of debt financing costs	_	(4)	
Other	(10) (14)	
Total interest expense	\$(149) \$(226)	
Other Expense, net: The Company's other expense consists of the following:			
	Three Months Ended		
(in thousands)	September 30, September 3		
(III tilousailus)	2014	2013	
Foreign currency losses, net	\$(487) \$(379)

Other income, net	53	22	
Total other expense, net	\$(395) \$(357)	
	11 11	1 C	

Income Tax Provision: The Company recorded income tax expense of \$25.4 million and had income before income taxes of \$90.9 million for the quarter ended September 30, 2014. During the quarter ended September 30, 2013, the Company recorded income tax expense of \$19.3 million and had income before income taxes of \$81.7 million. The effective tax rates were 28.0% and 23.6% for the third quarters of 2014 and 2013, respectively.

When compared to the federal and state combined statutory rate, these rates were favorably impacted by lower statutory tax rates in many of the Company's foreign jurisdictions, the domestic manufacturing deduction and legal entity restructuring activities. The 2014 rate benefited from the reversal of uncertain tax positions in various jurisdictions. The 2013 rate benefited from incremental tax benefits associated with legal entity restructuring and cash repatriation activities in India.

Net Income: The Company's net income in the third quarter of 2014 was \$65.5 million as compared to net income of \$62.4 million in the third quarter of 2013. Diluted earnings per share was \$0.70 in the third quarter of 2014 and \$0.66 in the third quarter of 2013. The weighted average shares used in computing diluted earnings per share were 93.9 million and 95.3 million in the third quarters of 2014 and 2013, respectively.
