Schedule of Investments (Continued)

March 31, 2014 (Unaudited)

The Company utilizes various methods to measure the fair value of most of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of input are:

Level 1 – Unadjusted quoted prices in active markets for identical assets and liabilities that the Company has the ability to access.

Level 2 – Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Company's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Investments in securities traded on national securities exchanges are valued at the last reported sales price on the last day of the reporting period. Securities traded on the over the counter market and listed securities for which no sale was reported on that date are valued at the mean between the last reported bid and ask prices.

The following tables summarize the inputs used as of March 31, 2014 for the Corporation's assets and liabilities measured at fair value:

| Assets * | Level 1 | Level 2 | Level 3 | Total |
|----------------------------------|--------------|---------|-------------|--------------|
| Common Stocks | \$40,895,570 | \$ — | \$— | \$40,895,570 |
| Preferred Stocks | 1,717,749 | — | — | 1,717,749 |
| Investment in Operating Division | — | — | 3,348,704 | 3,348,704 |
| Total | \$42,613,319 | \$ — | \$3,348,704 | \$45,962,023 |

| Liabilities | Level 1 | Level 2 | Level 3 | Total |
|----------------------|--------------|---------|---------|--------------|
| Margin Loans | \$18,691,361 | \$ — | \$— | \$18,691,361 |
| Call and Put Options | \$1,325,096 | \$ — | \$— | \$1,325,096 |

The Company's Level 3 assets consist of its investment in its Operating Division. Since its inception, the Operating Division has not generated significant revenue and has incurred substantial operating losses. Due to these substantial losses, the Operating Division has been completely dependent on funding from the Company to sustain its operations.

As such, the Company has determined that the value of the Operating Division approximates the net book value of certain property and equipment reduced by the remaining mortgage balance on such property and equipment. The property and equipment consist of land, buildings and laboratory equipment located in Oak Ridge, Tennessee.
