-

Item 2.05 Costs Associated with Exit or Disposal Activities

On October 28, 2013, Vishay Intertechnology, Inc. (the "Company") announced various cost reduction programs as part of its continuous efforts to improve efficiency and operating performance.

MOSFETs Segment Program

The project for the MOSFETs segment will extend over a period of approximately two years. The manufacture of wafers for certain critical products will be transferred into a more cost-efficient fab. As a consequence, certain other wafer manufacturing currently occurring in-house will be transferred to third-party foundries.

The total cash costs associated with the MOSFETs initiatives, principally severance, are expected to be approximately \$10 million.

Voluntary Separation / Retirement Program

A voluntary separation / early retirement program will be offered to employees worldwide who are eligible because they will have met job classification, age, and/or years-of-service criteria as of October 31, 2013. The program benefits vary by country and job classification, but generally offer a cash loyalty bonus.

The Company estimates that total costs associated with the voluntary separation / early retirement program will be approximately \$13 million, based on the expected acceptance rate.

Diodes Segment Programs

Two other smaller cost reduction programs relate to the transfer of production of certain products within its Diodes segment, which will be implemented in the course of 2014. Both programs are connected to production moves, in order to take advantage of lower labor costs in one program and from the consolidation of manufacturing locations in the other. The total cash costs associated with these production transfers are expected to be approximately \$3 million.

The Company's estimates of the costs related to its cost reduction programs and anticipated annual savings represent its current best estimates. However, such estimates are preliminary and subject to change as the Company implements these programs.

On October 28, 2013, the Company issued a press release regarding these programs, a copy of which is attached hereto as Exhibit 99.1 and is incorporated herein by reference.
