PART I. FINANCIAL INFORMATION

ITEM 1. BUSINESS

General

Heritage Financial Corporation (the "Company" or "Heritage") is a bank holding company that was incorporated in the State of Washington in August 1997. We were organized for the purpose of acquiring all of the capital stock of Heritage Savings Bank upon our reorganization from the mutual holding company form of organization to the stock holding company form of organization. Effective September 1, 2004, Heritage Savings Bank switched its charter from a state chartered savings bank to a state chartered commercial bank and changed its legal name from Heritage Savings Bank to Heritage Bank (the "Bank"). The Company acquired Central Valley Bank in March 1999 and changed its charter from a nationally chartered commercial bank to a state chartered commercial bank effective September 1, 2005. In 1998, the Company acquired North Pacific Bank. In June 2006, the Company completed the acquisition of Western Washington Bancorp and its wholly owned subsidiary, Washington State Bank, N.A., at which time Washington State Bank, N.A. was merged into Heritage Bank.

Effective July 30, 2010, Heritage Bank entered into a definitive agreement with the Federal Deposit Insurance Corporation (the "FDIC"), pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Cowlitz Bank, a Washington state-chartered commercial bank headquartered in Longview, Washington (the "Cowlitz Acquisition"). The Cowlitz Acquisition included nine branches of Cowlitz Bank, including its division Bay Bank, which opened as branches of Heritage Bank on August 2, 2010. The acquisition also included the Trust Services Division of Cowlitz Bank. In 2013, the Company consolidated three of these branches into existing Heritage Bank branches. Effective November 5, 2010, Heritage Bank entered into a definitive agreement with the FDIC, pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Pierce Commercial Bank, a Washington state-chartered commercial bank headquartered in Tacoma, Washington (the "Pierce Acquisition"). The Pierce Acquisition included one branch, which opened as a branch of Heritage Bank on November 8, 2010.

On September 14, 2012, the Company announced that it had entered into a definitive agreement along with Heritage Bank, to acquire Northwest Commercial Bank ("NCB"), a full service commercial bank headquartered in Lakewood, Washington that operated two branch locations in Washington State (the "NCB Acquisition"). The NCB Acquisition was completed on January 9, 2013, at which time NCB was merged with and into Heritage Bank. The Lakewood branch was subsequently consolidated with an existing Heritage Bank branch in 2013.

On March 11, 2013, the Company entered into a definitive agreement to acquire Valley Community Bancshares, Inc. ("Valley" or "Valley Community Bancshares") and its wholly-owned subsidiary, Valley Bank, both headquartered in Puyallup, Washington (the "Valley Acquisition") and its eight branches. The Valley Acquisition was completed on July 15, 2013. Subsequently, four of these branches were consolidated into existing Heritage Bank branches as of December 31, 2013.

On April 8, 2013, the Company announced the proposed merger of its two wholly-owned bank subsidiaries Central Valley Bank and Heritage Bank, with Central Valley Bank merging into Heritage Bank (the "Central Valley Merger"). The common control merger was completed on June 19, 2013. Central Valley Bank now operates as a division of Heritage Bank.

On October 23, 2013, the Company, the Bank, Washington Banking Company ("Washington Banking") and its wholly owned subsidiary bank, Whidbey Island Bank ("Whidbey"), jointly announced the signing of a definitive merger agreement pursuant to which Heritage and Washington Banking entered into a strategic merger with Washington Banking merging into Heritage (the "Washington Banking Merger"). Washington Banking branches adopted the Heritage Bank name in all markets, with the exception of six branches in Whidbey Island markets which continue to operate using the Whidbey Island Bank name. The Washington Banking Merger was completed on May 1, 2014. For additional information on the merger and acquisitions completed during the years ended December 31, 2014 and 2013, see Note (2) Business Combinations of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

We are primarily engaged in the business of planning, directing, and coordinating the business activities of our wholly owned subsidiary, Heritage Bank. The deposits of the Bank are insured by the FDIC. Heritage Bank is headquartered in Olympia, Washington and conducts business in its 63 branch offices located in Washington and the greater Portland, Oregon area.

Our business consists primarily of lending and deposit relationships with small businesses and their owners in our market areas, and attracting deposits from the general public. We also make real estate construction and land development loans and consumer loans. The Bank also originates for sale or investment purposes one-to-four family

Table of Contents

residential loans on residential properties located primarily in western and central Washington State and the greater Portland, Oregon area.

Market Areas

We offer financial services to meet the needs of the communities we serve through our community-oriented financial institutions. Headquartered in Olympia, Thurston County, Washington, we conduct business through Heritage Bank and its 63 branch offices located along the I-5 corridor throughout Washington and the greater Portland, Oregon area. We additionally have offices located in eastern Washington, primarily in Yakima County.

Lending Activities

General. Lending activities are conducted through Heritage Bank. Our focus is on commercial business lending. We also originate consumer loans, real estate construction and land development loans and one-to-four family residential loans. Our loans are originated under policies that are reviewed and approved annually by our Board of Directors. In addition, we have established internal lending guidelines that are updated as needed. These policies and guidelines address underwriting standards, structure and rate considerations, and compliance with laws, regulations and internal lending limits. We conduct post-approval reviews on selected loans and routinely perform internal loan reviews of our loan portfolio to check for credit quality, proper documentation and compliance with laws and regulations.

The Company has acquired loans through mergers and acquisitions, which are designated as "purchased" loans. Prior to August 2015, certain purchased loans were covered under FDIC shared-loss agreements and were identified as "covered". The Company and the FDIC terminated the FDIC shared-loss agreements effective August 4, 2015. For additional information, see Note (6) FDIC Indemnification Asset of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

Commercial and industrial loans totaled \$596.7 million, or 24.8% of total loans, as of December 31, 2015, and \$570.5 million, or 25.3% of total loans, as of December 31, 2014. Owner-occupied commercial real estate loans totaled \$629.2 million, or 26.2%, of total loan, as of December 31, 2015 and \$595.0 million, or 26.4% of total loans, as of December 31, 2014, and non-owner occupied commercial real estate loans totaled \$697.4 million, or 29.0% of total loans, as of December 31, 2015 and \$643.6 million, or 28.6% of total loans, as of December 31, 2014. One-to-four family residential loans totaled \$72.5 million, or 3.0% of total loans, at December 31, 2015, and \$69.5 million, or 3.1% of total loans, at December 31, 2014. Real estate construction and land development loans totaled \$107.1 million, or 4.5% of total loans, at December 31, 2015, and \$114.1 million, or 5.1% of total loans, at December 31, 2014. Consumer loans totaled \$298.2 million, or 12.4% of total loans, as of December 31, 2015, and \$259.3 million, or 11.5% of total loans, as of December 31, 2014.

Total	\$276,536	\$467,080	\$1,286,782	\$2,030,398
Fixed rate loans, due after 1 year		\$259,411	\$323,957	\$583,368
Variable or adjustable rate loans, due after 1 year		207,669	962,825	\$1,170,494
Total		\$467,080	\$1,286,782	\$1,753,862

Commercial Business Lending

We offer different types of commercial business loans, including lines of credit, term equipment financing and term owner-occupied and non-owner occupied commercial real estate loans. We also originate loans that are guaranteed by the Small Business Administration (“SBA”), for which Heritage Bank is a “preferred lender.” Before extending credit to a business, we review and analyze the borrower’s management ability, financial history, including cash flow of the borrower and all guarantors, and the liquidation value of the collateral. Emphasis is placed on having a comprehensive understanding of the borrower’s global cash flow and performing necessary financial due diligence.

At December 31, 2015 we had \$1.92 billion, or 80.0%, of our total loans receivable in commercial business loans with an average outstanding loan balance of approximately \$374,000 at December 31, 2015, excluding loans with no outstanding balance.

We originate commercial real estate loans within our primary market areas with a preference for loans secured by owner-occupied properties. Our underwriting standards require that commercial real estate loans not exceed 75% of the lower of appraised value at origination or cost of the underlying collateral. Cash flow coverage to debt servicing requirements is generally a minimum of 1.15 times for five or more family residential loans and 1.25 times for other commercial real estate loans. Cash flow coverage is calculated using an “underwriting” interest rate that is higher than the note rate.

Commercial real estate loans typically involve a greater degree of risk than one-to-four family residential loans.

Payments on loans secured by commercial real estate properties are dependent on successful operation and management of the properties and repayment of these loans may be affected by adverse conditions in the real estate market or the economy. We seek to minimize these risks by determining the financial condition of the borrower, the quality and value of the collateral, and the management of the property securing the loan. We also generally obtain personal guarantees from the owners of the collateral after a thorough review of personal financial statements. In addition, we review our commercial real estate loan portfolio annually for performance of individual loans, and stress-test loans for potential changes in interest rates, occupancy, and collateral values.

See “Item 1A. Risk Factors—Our loan portfolio is concentrated in loans with a higher risk of loss—Repayment of our commercial business loans, consisting of commercial and industrial loans as well as owner-occupied and non-owner occupied commercial real estate loans, is often dependent on the cash flows of the borrower, which may be unpredictable, and the collateral securing these loans may fluctuate in value.” See also “Item 1A. Risk Factors—Our loan portfolio is concentrated in loans with a higher risk of loss—Our non-owner occupied commercial real estate loans, which includes five or more family residential real estate loans, involve higher principal amounts than other loans and repayment of these loans may be dependent on factors outside our control or the control of our borrowers.”

One-to-Four Family Residential Loans, Originations and Sales

The majority of our one-to-four family residential loans are secured by single-family residences located in our primary market areas. Our underwriting standards require that one-to-four family residential loans generally are owner-occupied and do not exceed 80% of the lower of appraised value at origination or cost of the underlying

collateral. Terms typically range from 15 to 30 years.

6

Table of Contents

As part of our asset/liability management strategy, we typically sell a significant portion of our one-to-four family residential loans in the secondary market. See “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Asset/Liability Management.” We discontinued this strategy in the second quarter of 2013 through the second quarter of 2014, and reinstated the strategy following the completion of the Washington Banking Merger.

We typically sell the servicing of the sold one-to-four family residential loans, or the collection of principal and interest payments, to other financial institutions. We did not service any of these sold loans as of or for the years ended December 31, 2015 or 2014.

The following table presents summary information concerning the origination and sale of our one-to-four family residential loans and the gains from the sale of loans.

	Years Ended December 31,				
	2015	2014	2013	2012	2011
	(In thousands)				
One-to-four family residential loans:					
Originated (1)	\$164,974	\$75,500	\$18,867	\$35,730	\$23,865
Sold	132,365	55,997	8,460	21,187	15,888
Gains on sales of loans, net (2)	3,150	1,080	142	295	285

(1)Includes loans originated for our loan portfolio or for sale in the secondary market.

(2)Excludes net gains on sales of SBA loans.

Real Estate Construction and Land Development

We originate one-to-four family residential construction loans for the construction of custom homes (where the home buyer is the borrower). We also provide financing to builders for the construction of pre-sold homes and, in selected cases, to builders for the construction of speculative residential property. Because of the higher risks present in the residential construction industry, our lending to builders is limited to those who have demonstrated a favorable record of performance and who are building in markets that management understands.

We further endeavor to limit our construction lending risk through adherence to strict underwriting guidelines and procedures. Speculative construction loans are short term in nature and have a variable rate of interest. We require builders to have tangible equity in each construction project and have prompt and thorough documentation of all draw requests, and we inspect the project prior to paying any draw requests.

See “Item 1A. Risk Factors—Our loan portfolio is concentrated in loans with a higher risk of loss—Our real estate construction and land development loans are based upon estimates of costs and the related value associated with the completed project. These estimates may be inaccurate.”

Consumer

At December 31, 2015, we had \$298.2 million of consumer loans. We originate consumer loans and lines of credit that are both secured and unsecured. The majority of our consumer loans are for relatively small amounts disbursed among many individual borrowers.

As a result of the Washington Banking Merger, we currently originate indirect consumer loans. These loans are for new and used automobile and recreational vehicles that are originated indirectly by selected dealers located in our market areas. We have limited our indirect loans purchased primarily to dealerships that are established and well known in their market areas and to applicants that are not classified as sub-prime.

Commitments and Contingent Liabilities

In the ordinary course of business, we enter into various types of transactions that include commitments to extend credit that are not included in our Consolidated Financial Statements. We apply the same credit standards to these commitments as we use in all our lending activities and have included these commitments in our lending risk evaluations. Our exposure to credit loss under commitments to extend credit is represented by the amount of these commitments.

Table of Contents

The following table presents outstanding commitments to extend credit, including letters of credit, at the dates indicated:

	December 31, 2015	December 31, 2014
	(In thousands)	
Commercial business:		
Commercial and industrial	\$350,227	\$288,930
Owner-occupied commercial real estate	2,220	2,648
Non-owner occupied commercial real estate	11,168	20,240
Total commercial business	363,615	311,818
Real estate construction and land development:		
One-to-four family residential	21,778	24,028
Five or more family residential and commercial properties	52,772	32,653
Total real estate construction and land development	74,550	56,681
Consumer	134,313	122,633
Total outstanding commitments	\$572,478	\$491,132

Delinquencies and Nonperforming Assets

Delinquency Procedures. Delinquencies in the commercial business loan portfolio are handled by the assigned loan officer. Loan officers are responsible for collecting loans they originate or which are assigned to them. We send a borrower a delinquency notice 15 days after the due date when the borrower fails to make a required payment on a loan. If the delinquency is not brought current, additional delinquency notices are mailed at 30 and 45 days for commercial loans. Additional written and oral contacts are made with the borrower between 60 and 90 days after the due date.

If a real estate loan payment is past due for 45 days or more, the collection manager may perform a review of the condition of the property. Depending on the nature of the loan and the type of collateral securing the loan, we may negotiate and accept a modified payment program with the borrower, accept a voluntary deed in lieu of foreclosure or, when considered necessary, begin foreclosure proceedings. If foreclosed on, real property is generally sold at a public sale and we may bid on the property to protect our interest. A decision as to whether and when to begin foreclosure proceedings is based on such factors as the amount of the outstanding loan relative to the value of the property securing the original indebtedness, the extent of the delinquency, and the borrower's ability and willingness to cooperate in resolving the delinquency.

Real estate acquired by us in partial or full satisfaction of a loan obligation is classified as other real estate owned until it is sold. When property is acquired, it is recorded at the estimated fair value (less costs to sell) at the date of acquisition, not to exceed net realizable value, and any resulting write-down is charged to the allowance for loan losses. Upon acquisition, all costs incurred in maintaining the property are expensed. Costs relating to the development and improvement of the property, however, are capitalized to the extent of the property's net realizable value. If the estimated realizable value of the other real estate owned property declines after the acquisition date, the adjustment to the value is charged to other real estate owned expense, net.

Classification of Loans. Federal regulations require that the Bank periodically evaluates the risks inherent in its loan portfolio. In addition, the Division of Banks of the Washington State Department of Financial Institutions ("Division") and the FDIC have the authority to identify problem loans and, if appropriate, require them to be reclassified. There are three classifications for problem loans: Substandard, Doubtful, and Loss. Substandard loans have one or more defined weaknesses and are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Doubtful loans have the weaknesses of Substandard loans, with additional characteristics that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions, and values questionable. There is a high probability of some loss in loans classified as Doubtful. A loan classified as Loss is considered uncollectible and of such little value that continuance as a loan of the institution is not warranted. If a loan or a portion of the loan is classified as Loss, the institution must charge-off this amount. We also have loans we classify as Watch and Other Assets Especially Mentioned ("OAEM"). Loans classified as Watch are

performing assets but have elements of risk that require more monitoring than other performing loans. Loans classified as OAEM are assets that continue to perform but have shown deterioration in credit quality and require closer monitoring.

The Bank routinely tests its problem loans for potential impairment. A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to

Table of Contents

the original contractual terms of the loan agreement. Problem loans that may be impaired are identified using the Bank's normal loan review procedures, which include post-approval reviews, monthly reviews by credit administration of criticized loan reports, scheduled internal reviews, underwriting during extensions and renewals and the analysis of information routinely received on a borrower's financial performance.

Impairment is measured using the present value of expected future cash flows, discounted at the loan's effective interest rate, unless the loan is collateral dependent, in which case impairment is measured using the fair value of the collateral after deducting appropriate collateral disposition costs. Furthermore, when it is practically expedient, impairment is measured by the fair market price of the loan.

Subsequent to an initial measure of impairment, if there is a significant change in the amount or timing of a loan's expected future cash flows or a change in the value of collateral or market price of a loan, based on new information received, the impairment is recalculated. However, the net carrying value of a loan never exceeds the recorded investment in the loan.

Nonperforming Assets. Nonperforming assets consist of nonaccrual loans and other real estate owned. The following table provides information about our nonaccrual loans and other real estate owned for the indicated dates. The following table also includes information regarding our performing troubled-debt restructured ("TDR") loans for the indicated dates. The performing TDR loans are not considered nonperforming assets as they continue to accrue interest despite being considered impaired due to the restructured status.

Edgar Filing: HERITAGE FINANCIAL CORP /WA/ - Form 10-K

At December 31, 2015, 2014, 2013, 2012 and 2011, \$6.3 million, \$7.3 million, \$2.6 million, \$9.3 million and \$11.7 million of nonaccrual loans were considered TDR loans, respectively.

(2) At December 31, 2015, 2014, 2013, 2012 and 2011, \$1.1 million, \$1.6 million, \$1.7 million, \$1.2 million and \$1.8 million of nonaccrual loans were guaranteed by government agencies, respectively.

Table of Contents

(3) Excludes purchased credit impaired ("PCI") loans. There were no accruing loans past due 90 days or more that were guaranteed by government agencies at December 31, 2015, 2014, and 2013. There were accruing loans past due 90 days or more of \$6,000 and \$92,000 guaranteed by government agencies at December 31, 2012 and 2011, respectively.

(4) At December 31, 2015, 2014, 2013, 2012 and 2011, \$1.2 million, \$2.0 million, \$1.8 million, \$2.9 million and \$2.8 million of potential problem loans were guaranteed by government agencies, respectively.

(5) At December 31, 2015, 2014, 2013 and 2012, \$449,000, \$751,000, \$1.2 million and \$965,000 of performing TDR loans were guaranteed by government agencies. There were no performing TDR loans guaranteed by government agencies at December 31, 2011.

Nonaccrual Loans. Our Consolidated Financial Statements are prepared on the accrual basis of accounting, including the recognition of interest income on our loan portfolio, unless a loan is placed on nonaccrual status. Loans are considered to be impaired and are placed on nonaccrual status when there are serious doubts about the collectability of principal or interest. Our policy is to place a loan on nonaccrual status when the loan becomes past due for 90 days or more, is less than fully collateralized, and is not in the process of collection. Payments received on nonaccrual loans generally are applied first to principal and then to interest only after all principal has been collected. Nonaccrual loans decreased \$1.9 million to \$9.7 million, or 0.40% of loans receivable, net, at December 31, 2015 from \$11.6 million, or 0.51% of loans receivable, net, at December 31, 2014 due to the loan resolution efforts of our credit department. During the year ended December 31, 2015, approximately \$5.6 million in net principal payments were received on nonaccrual loans and \$236,000 of nonaccrual loans were transferred back to accrual status. We also recorded \$1.1 million in net charge-offs of nonaccrual loans. The decrease in total nonaccrual loans at December 31, 2015 was partially offset by \$5.0 million in additions to nonperforming loans, of which \$1.1 million were previously performing TDR loans that were transferred to nonaccrual status.

Nonperforming assets decreased \$3.2 million to \$11.7 million, or 0.32% of total assets, at December 31, 2015 from \$14.9 million, or 0.43% of total assets, at December 31, 2014 due to the decrease in nonperforming loans discussed above as well as an overall decrease in other real estate owned. Other real estate owned decreased \$1.3 million, or 39.8%, to \$2.0 million at December 31, 2015 from \$3.4 million at December 31, 2014 due primarily to dispositions of \$3.6 million, which were offset partially by additions of \$2.8 million during the year ended December 31, 2015. Performing TDR loans as of December 31, 2015 and December 31, 2014 were \$20.7 million and \$18.7 million, respectively. The \$2.0 million increase in performing TDR loans during the year ended December 31, 2015 was primarily due to \$6.1 million of loans restructured during the year ended December 31, 2015, offset partially by \$3.0 million of net principal reductions and \$1.1 million in TDR loans transferred to nonaccrual status.

Troubled Debt Restructured Loans. A TDR loan is a restructuring in which the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to a borrower that it would not otherwise consider. The majority of the Bank's TDR loans are a result of granting extensions to troubled credits which have already been adversely classified. We grant such extensions to reassess the borrower's financial status and develop a plan for repayment. Certain modifications also include interest rate reductions, which is the second most prevalent concession. The interest rate reductions can be for a period of time or over the remainder of the life of the loan. We may also bifurcate troubled credits into a "good" loan and a "bad" loan, whereas the good loan continues to accrue under the modified terms. We perform bifurcations to limit potential losses. The remainder of the Bank's TDRs are the result of converting revolving lines of credits to amortizing loans, changing amortizing loans to interest-only loans with balloon payments, or re-amortizing the loan over a longer period of time. These modifications would all be considered a concession for a borrower that could not obtain financing outside of the Bank. We do not forgive principal for a majority of our TDRs, but in those situations where principal is forgiven, the entire amount of such principal forgiveness is immediately charged off to the extent not done so prior to the modification. We sometimes delay the timing on the repayment of a portion of principal (principal forbearance) and charge-off the amount of forbearance if that amount is not considered fully collectible. We also consider insignificant delays in payments when determining if a loan should be classified as a TDR.

TDRs are considered impaired and are separately measured for impairment under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 310-10-35, whether on accrual or nonaccrual status. At December 31, 2015 and December 31, 2014, the balance of performing TDR loans was \$20.7 million and \$18.7 million, respectively. The related allowance for loan losses on the performing TDR loans was \$2.1 million as of December 31, 2015 and \$1.9 million as of December 31, 2014. At December 31, 2015, nonperforming TDR loans were \$6.3 million and had a related allowance for loan losses of \$679,000. At December 31, 2014, nonperforming TDR loans of \$7.3 million had a related allowance for loan losses of \$1.0 million.

A loan may have the TDR classification removed if (a) the restructured interest rate was greater than or equal to the interest rate of a new loan with comparable risk at the time of the restructure, and (b) the loan is no longer

Table of Contents

impaired based on the terms of the restructured agreement. The Bank's policy is that the borrower must demonstrate six consecutive monthly payments in accordance with the modified loan terms before it can be reviewed for removal of TDR classification under the second criteria. However, the loan must be reported as a TDR in at least one of the Company's Annual Reports on Form 10-K. Once a loan has been classified as a TDR, it will continue to be an impaired loan until paid off or charged-off, even if the loan subsequently is no longer a TDR.

Potential Problem Loans. Potential problem loans are those loans that are currently accruing interest and are not considered impaired, but which we are monitoring because the financial information of the borrower causes us concerns as to their ability to comply with their loan repayment terms. Loans that are past due 90 days or more and still accruing interest are considered potential problem loans if they are both well-secured and in the process of collection. Potential problem loans decreased \$52.6 million, or 32.3%, to \$110.4 million at December 31, 2015 from \$162.9 million at December 31, 2014 primarily due to loan payments.

Analysis of Allowance for Loan Losses

Management maintains an allowance for loan losses ("ALL") to provide for estimated probable credit losses inherent in the loan portfolio that have been incurred as of the reporting date. The adequacy of the ALL is monitored through our ongoing quarterly loan quality assessments.

We assess the estimated credit losses inherent in our loan portfolio by considering a number of elements including:

• Historical loss experience in a number of homogeneous segments of the loan portfolio;

• Balance of potential problem loans in the loan portfolio;

• The impact of environmental factors, including:

Levels of and trends in delinquencies and impaired loans;

Levels of and trends in charge-offs and recoveries;

Trends in volume and terms of loans;

Effects of changes in risk selection and underwriting standards, and other changes in lending policies, procedures and practices;

Experience, ability, and depth of lending management and other relevant staff;

National and local economic trends and conditions;

Other external factors such as competition, legal, and regulatory requirements;

Effects of changes in credit concentrations; and

Other factors

We calculate an appropriate ALL for the loans in our loan portfolio by applying historical loss factors for homogeneous classes of the portfolio, adjusted for changes to the above-noted environmental factors. We may record specific provisions for impaired loans, including loans on nonaccrual status and TDR loans, after a careful analysis of each loan's credit and collateral factors. Our analysis of an appropriate ALL combines the provisions made for our non-impaired loans and the specific provisions made for each impaired loan.

While we believe we use the best information available to determine the allowance for loan losses, results of operations could be significantly affected if circumstances differ substantially from the assumptions used in determining the allowance. A decline in local and national economic conditions, or other factors, could result in a material increase in the allowance for loan losses and may adversely affect the Company's financial condition and results of operations. In addition, the determination of the amount of the allowance for loan losses is subject to review by bank regulators, as part of their routine examination process, which may result in the establishment of additional allowance allocations based upon their judgment of information available to them at the time of their examination.

Table of Contents

The following table provides information regarding changes in our allowance for loan losses at and for the indicated years:

	At or For the Years Ended December 31,				
	2015	2014	2013	2012	2011
	(Dollars in thousands)

(1) Represents the percent of loans receivable by loan category to total gross loans receivable.

Investment Activities

At December 31, 2015, our investment securities portfolio totaled \$811.9 million, which consisted entirely of securities available for sale. This compares with a total portfolio of \$778.7 million at December 31, 2014, which was comprised of \$742.8 million of securities available for sale and \$35.8 million of securities held to maturity. During the year ended December, 31, 2015, the Company transferred investment securities held to maturity with amortized cost of \$29.4 million to available for sale to more effectively manage the investment securities portfolio. The \$33.2 million, or 4.3%, increase in our investment securities portfolio in fiscal 2015 is attributable primarily to \$290.5 million of purchases of investment securities, offset partially by \$124.6 million in payments, maturities and calls of investment securities available for sale and \$116.3 million in sales of investment securities available for sale. The composition of the investment portfolio by type of security, at each respective date, is presented in Note (3) Investment Securities of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

Our investment policy is established by the Board of Directors and monitored by the Audit and Finance Committee of the Board of Directors. It is designed primarily to provide and maintain liquidity, generate a favorable return on investments without incurring undue interest rate and credit risk, and complements the Bank's lending activities. The policy dictates the criteria for classifying securities as either available for sale or held to maturity. The policy permits investment in various types of liquid assets permissible under applicable regulations, which include U.S. Treasury obligations, U.S. Government agency obligations, some certificates of deposit of insured banks, mortgage backed and mortgage related securities, corporate notes, municipal bonds, and federal funds. Investment in non-investment grade bonds and stripped mortgage backed securities is not permitted under the policy.

Table of Contents

The following table provides information regarding our investment securities available for sale at the dates indicated.

The Bank is a member of the Federal Home Loan Bank (“FHLB”) of Des Moines following the voluntary merger of the FHLB of Seattle with and into FHLB of Des Moines effective May 31, 2015. The FHLB of Des Moines is one of 11 regional FHLBs that administer the home financing credit function of savings institutions. Each FHLB serves as a reserve or central bank for its member financial institutions within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. It makes loans or advances to members in accordance with policies and procedures, established by the Board of Directors of the FHLB, which are subject to the oversight of the Federal Housing Finance Board (“FHFA”).

For membership purposes, the Bank is required to maintain an investment in the stock of the FHLB of Des Moines in an amount equal to 0.12% of the Bank's assets as calculated on an annual basis. At December 31, 2015 the Bank had an investment in FHLB stock carried at a cost basis (par value) of \$4.1 million. In addition to the FHLB stock required for membership, the Bank must purchase activity stock equal to 4.0% of all outstanding borrowing balances. The activity stock is automatically redeemed in amounts equal to the FHLB advance balances as they are repaid.

Based on the Company's evaluation of the underlying investment, including the long-term nature of the investment, the liquidity position of the FHLB of Des Moines, and the Company's intent and ability to hold the investment for a period of time sufficient to recover the par value, the Company did not recognize an other-than-temporary impairment loss on its FHLB stock during the years ended December 31, 2015, 2014 and 2013. Despite no impairment having been recorded during the indicated fiscal years, any deterioration in the FHLB of Des Moines' financial position may result in future impairment losses.

Deposit Activities and Other Sources of Funds

General. Our primary sources of funds are deposits, loan repayments and borrowings. Scheduled loan repayments are a relatively stable source of funds, while deposits and unscheduled loan prepayments, which are influenced significantly by general interest rate levels, interest rates available on other investments, competition, economic conditions and other factors, are not. Customer deposits remain an important source of funding, but these balances have been influenced in the past by adverse market conditions in the industry and may be affected by future developments such as interest rate fluctuations and new competitive pressures. In addition to customer deposits, management may utilize brokered deposits on an as-needed basis.

Borrowings may also be used on a short-term basis to compensate for reductions in other sources of funds (such as deposit inflows at less than projected levels). Borrowings may also be used on a longer-term basis to support expanded lending activities and match the maturity of repricing intervals of assets. In addition, the Company utilizes repurchase agreements as a supplement to other funding sources.

During the year ended December 31, 2015, non-maturity deposits (total deposits less certificate of deposit accounts) increased by \$307.0 million, or 12.9%, to \$2.69 billion from \$2.38 billion at December 31, 2014. The increase was primarily a result of an increase in negotiable order of withdrawal ("NOW") account deposits of \$124.5 million, or

15.7%, to \$917.9 million at December 31, 2015 from \$793.4 million at December 31, 2014 and a \$96.0 million, or 26.8%, increase in savings deposits to \$453.8 million at December 31, 2015 from \$357.8 million at December 31,

Table of Contents

2014. The percentage of non-maturity deposits to total deposits increased to 86.5% at December 31, 2015 compared to 81.9% at December 31, 2014. As a result of this increase, the certificate of deposit ("CD") accounts to total deposits decreased to 13.5% at December 31, 2015 from 18.1% at December 31, 2014. CDs decreased \$105.1 million, or 20.0%, to \$420.3 million at December 31, 2015 from \$525.4 million at December 31, 2014.

Deposit Activities. We offer a variety of deposit accounts designed to attract both short-term and long-term deposits. These accounts include noninterest demand accounts, NOW accounts, money market accounts, savings accounts and CDs. These accounts, with the exception of noninterest demand accounts, generally earn interest at rates established by management based on competitive market factors and management's desire to increase or decrease certain types or maturities of deposits. The major categories of deposit accounts are described below.

Noninterest Demand Deposits. Noninterest demand deposits are noninterest bearing and may be charged service fees based on activity and balances.

NOW Accounts. NOW accounts are interest bearing and may be charged service fees based on activity and balances. NOW accounts pay interest, but require a higher minimum balance to avoid service charges.

Money Market Accounts. Money market accounts pay a variable interest rate that is tiered depending on the balance maintained in the account. Minimum opening balances vary.

Savings Accounts. We offer savings accounts that allow for unlimited deposits and withdrawals, provided that a \$300 minimum balance is maintained.

CDs. We offer several types of CDs with maturities ranging from three months to five years, which require a minimum deposit of \$2,500. Negotiable CDs are offered in amounts of \$100,000 or more for terms of 30 days to five years.

The following table provides the balances outstanding for each major category of deposits at the dates indicated:

	December 31, 2015		December 31, 2014		December 31, 2013		
	Amount	Percent	Amount	Percent	Amount	Percent

The following table shows the amount and maturity of certificates of deposit of \$100,000 or more:

	December 31, 2015 (In thousands)
Remaining maturity:	
Three months or less	\$42,749
Over three months through twelve months	92,018
Over twelve months through three years	71,390
Over three years	200
Total	\$206,357

Borrowings. Deposits are the primary source of funds for our lending and investment activities and our general business purposes. We rely upon advances from the FHLB to supplement our supply of lendable funds and meet deposit withdrawal requirements. The FHLB of Des Moines serves as one of our secondary sources of liquidity. Advances from the FHLB of Des Moines are typically secured by our first lien one-to-four family residential loans, commercial real estate loans and stock issued by the FHLB, which is owned by us. At December 31, 2015, the Bank maintained an uncommitted credit facility with the FHLB of Des Moines of \$626.9 million and an uncommitted credit facility with the Federal Reserve Bank of San Francisco of \$51.9 million, of which there were no advances or borrowings outstanding. The Bank also maintains advance lines with Wells Fargo Bank, US Bank, TIB and Pacific Coast Bankers' Bank to purchase federal funds of up to \$90.0 million as of December 31, 2015. At December 31, 2015 we had securities sold under agreement to repurchase of \$23.2 million which were secured by investment securities available for sale.

The FHLB functions provide credit for member financial institutions. As a member, we are required to own capital stock in the FHLB and are authorized to apply for advances on the security of such stock and certain of our mortgage loans and other assets (principally securities which are obligations of, or guaranteed by, the United States) provided certain standards related to creditworthiness have been met. Advances are made pursuant to several different programs. Each credit program has its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based on a percentage of an institution's assets or on the FHLB's assessment of the institution's creditworthiness. Under its current credit policies, the FHLB of Des Moines limits advances to 35% of the Bank's assets.

During the year ended December 31, 2015, the Company had an average balance of \$1.8 million in FHLB advances. There were no FHLB advances during the year ended December 31, 2014 other than to test the facilities. There were no FHLB advances outstanding as of December 31, 2015 and 2014. There were no federal funds purchased during the

years ended December 31, 2015 and 2014.

Supervision and Regulation

We are subject to extensive Federal and Washington State legislation, regulation, and supervision. These laws and regulations are primarily intended to protect depositors, the FDIC and shareholders. The laws and regulations affecting banks and bank holding companies have changed significantly particularly in connection with the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank Act”). Among other changes, the Dodd-Frank Act established the Consumer Protection Financial Bureau (“CFPB”) as an independent bureau of the Board of Governors of the Federal Reserve System (“Federal Reserve”). The CFPB assumed responsibility for the implementation of the federal financial consumer protection and fair lending laws and regulations and has authority to impose new requirements. See “—Other Regulatory Developments—The Dodd-Frank Act” herein for a discussion of this legislation. Any change in applicable laws, regulations, or regulatory policies may have a material effect on our business, operations, and prospects. We cannot predict the nature or the extent of the effects on our business and earnings that any fiscal or monetary policies or new Federal or State legislation may have in the future.

The following is a summary discussion of certain laws and regulations applicable to Heritage Financial and Heritage Bank which is qualified in its entirety by reference to the actual laws and regulations.

Heritage Financial. As a registered bank holding company with the Federal Reserve, we are subject to comprehensive regulation and supervision under the Bank Holding Company Act of 1956, as amended. This regulation and supervision is generally intended to ensure that we limit our activities to those allowed by law and that we operate in a safe and sound manner without endangering the financial health of Heritage Bank. As a bank holding company supervised by the Federal Reserve, we are required to file annual and periodic reports with the Federal Reserve and provide additional information as the Federal Reserve may require. The Federal Reserve may examine us, and any of our subsidiaries, and assess us for the cost of such examination.

The Federal Reserve has extensive enforcement authority over bank holding companies, including the ability to assess civil money penalties and to issue cease and desist or removal orders. The Federal Reserve may also order termination of non-banking activities by non-banking subsidiaries of bank holding companies, or divestiture of ownership and control of a non-banking subsidiary by a bank holding company. Some violations may also result in criminal penalties.

Federal Reserve policy provides that a bank holding company is required to serve as a source of financial and managerial strength to its subsidiary banks and may not conduct its operations in an unsafe or unsound manner. Federal Reserve policy further provides that in its capacity as a source of strength to its subsidiary banks, a bank holding company should have the ability to provide financial assistance to its subsidiary banks during periods of financial distress. A bank holding company’s failure to meet its obligation to serve as a source of strength to its subsidiary banks is generally considered by the Federal Reserve to be an unsafe and unsound banking practice or a violation of the Federal Reserve’s regulations or both. The Dodd-Frank Act also codified the "source of strength" doctrine by adopting a statutory provision requiring, among other things, that bank holding companies serve as a source of financial strength to their subsidiary banks

Under the prompt corrective action provisions of the Federal Deposit Insurance Act ("FDIA"), a bank holding company with an undercapitalized subsidiary bank must guarantee, within limitations, the capital restoration plan that is required to be implemented of its undercapitalized subsidiary bank. If an undercapitalized subsidiary bank fails to file an acceptable capital restoration plan or fails to implement an accepted plan the Federal Reserve may prohibit the bank holding company or its undercapitalized subsidiary bank from, among other restrictions, paying any dividend or making any other form of capital distribution without the prior approval of the Federal Reserve. In addition, the Federal Reserve policy provides that a bank holding company may pay cash dividends only to the extent that the company’s net income for the past year is sufficient to cover both the cash dividend and a rate of earnings retention that is consistent with the company’s capital needs, asset quality and overall financial condition. In addition, under Washington corporate law, companies generally may not pay dividends if after that payment the company would not be able to pay its liabilities as they become due in the usual course of business, or its total assets would be less than its total liabilities.

We, and any subsidiaries which we may control, are considered “affiliates” within the meaning of the Federal Reserve Act, and transactions between our bank subsidiary and affiliates are subject to numerous restrictions. With some exceptions, we and our subsidiaries are prohibited from tying the provision of various products or services, such as extensions of credit, to other products or services offered by us, or our affiliates.

Bank regulations require bank holding companies and banks to maintain a minimum “leverage” ratio of core capital to adjusted quarterly average total assets of at least 4%. In addition, banking regulators have adopted risk-based capital guidelines under which risk percentages are assigned to various categories of assets and off-balance sheet items to calculate a risk-adjusted capital ratio. Tier 1 capital generally consists of common stockholders’ equity (which does not include unrealized gains and losses on investment securities available for sale), less goodwill and

Table of Contents

certain identifiable intangible assets. Tier 2 capital includes Tier 1 capital plus the allowance for loan losses and subordinated debt, both subject to some limitations. Regulatory risk-based capital guidelines require Tier 1 capital of 6% of risk-adjusted assets and minimum total capital ratio (combined Tier 1 and Tier 2) of 8% of risk-adjusted assets. In July 2013, the Federal Reserve and the FDIC approved a new rule that substantially amended the regulatory risk-based capital rules to implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act.

For additional information, see “—Capital Adequacy” below.

Subsidiary Bank. Heritage Bank is a Washington-chartered commercial bank, the deposits of which are insured by the FDIC. Heritage Bank is subject to regulation by the FDIC and the Division.

Applicable Federal and State statutes and regulations which govern a bank’s operations relate to minimum capital requirements, required reserves against deposits, investments, loans, legal lending limits, mergers and consolidation, borrowings, issuance of securities, payment of dividends, establishment of branches, and other aspects of its operations, among other things. The Division and the FDIC also have authority to prohibit banks under their supervision from engaging in what they consider to be unsafe and unsound practices.

The Bank is required to file periodic reports with the FDIC and the Division, and is subject to periodic examinations and evaluations by those regulatory authorities. Based upon these evaluations, the regulators may revalue the assets of an institution and require that it establish specific reserves to compensate for the differences between the determined value and the book value of such assets. These examinations must be conducted every 12 months, with the exception that well-capitalized banks may be examined every 18 months. The FDIC and the Division may each accept the results of an examination by the other in lieu of conducting an independent examination.

Dividends paid by the Bank provide substantially all of our cash flow. Applicable Federal and Washington State regulations restrict capital distributions by the Bank, including dividends. Such restrictions are tied to the institution’s capital levels after giving effect to such distributions. For an additional discussion of restrictions on the payment of dividends, see “Item 5. Market for the Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities” herein.

Capital Adequacy. The Federal Reserve and FDIC have issued substantially similar risk-based and leverage capital guidelines applicable to bank holding companies and banks. In addition, these regulatory agencies may from time to time require that a bank holding company or bank maintain capital above the minimum levels, based on its financial condition or actual or anticipated growth.

Effective January 1, 2015 (with some changes transitioned into full effectiveness over two to four years), the Company and the Bank became subject to new capital regulations adopted by the Federal Reserve and the FDIC, which create a new required ratio for common equity Tier 1 (“CET1”) capital, increase the minimum leverage and Tier 1 capital ratios, change the risk-weightings of certain assets for purposes of the risk-based capital ratios, create an additional capital conservation buffer over the required capital ratios, and change what qualifies as capital for purposes of meeting the capital requirements. These regulations implement the regulatory capital reforms required by the Dodd-Frank Act and the “Basel III” requirements.

Under the new capital regulations, the minimum capital ratios are: (1) a CET1 capital ratio of 4.5% of risk-weighted assets; (2) a Tier 1 capital ratio of 6.0% of risk-weighted assets; (3) a total risk-based capital ratio of 8.0% of risk-weighted assets; and (4) a leverage ratio (the ratio of Tier 1 capital to average total adjusted assets) of 4.0%. CET1 generally consists of common stock; retained earnings; accumulated other comprehensive income (“AOCI”) unless an institution elects to exclude AOCI from regulatory capital; and certain minority interests; all subject to applicable regulatory adjustments and deductions. Tier 1 capital generally consists of CET1 and noncumulative perpetual preferred stock. Tier 2 capital generally consists of other preferred stock and subordinated debt meeting certain conditions plus an amount of the allowance for loan and lease losses up to 1.25% of assets. Total capital is the sum of Tier 1 and Tier 2 capital.

In addition to the minimum CET1, Tier 1, leverage ratio and total capital ratios, the Company and the Bank must maintain a capital conservation buffer consisting of additional CET1 capital greater than 2.5% of risk-weighted assets above the required minimum levels in order to avoid limitations on paying dividends, repurchasing shares, and paying

discretionary bonuses. The new capital conservation buffer requirement is to be phased in beginning on January 1, 2016 when a buffer greater than 0.625% of risk-weighted assets will be required, which amount will increase each year until the buffer requirement is fully implemented on January 1, 2019.

To be considered "well capitalized," a bank holding company must have, on a consolidated basis, a total risk-based capital ratio of 10.0% or greater and a Tier 1 risk-based capital ratio of 6.0% or greater and must not be subject to an individual order, directive or agreement under which the Federal Reserve requires it to maintain a specific capital level. To be consider "well capitalized," a depository institution must have a Tier 1 risk-based capital ratio of at least

Table of Contents

8%, a total risk-based capital ratio of at least 10%, a CET1 capital ratio of at least 5% and a leverage ratio of at least 5% and not be subject to an individualized order, directive or agreement under which its primary federal banking regulator requires it to maintain a specific capital level. As of December 31, 2015, the Company and the Bank met the requirements to be "well capitalized" and the fully phased-in capital conservation buffer requirement.

The FDIC may impose additional restrictions on institutions that are undercapitalized and generally is authorized to reclassify an institution into a lower capital category and impose the restrictions applicable to such category if the institution is engaged in unsafe or unsound practices or is in an unsafe or unsound condition. An institution is deemed "well capitalized" if it has at least a 6.5% CET1 capital ratio, a 5.0% Tier 1 capital ratio, a 8.0% Tier 1 risk-based capital ratio and 10.0% total risk-based capital ratio. At December 31, 2015, the Bank's current capital levels exceed the required capital amounts to be considered "well capitalized."

For a complete description of the Company's and the Bank's required and actual capital levels as of December 31, 2015, see Note (22) Regulatory Capital Requirements of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

Prompt Corrective Action. Federal statutes establish a supervisory framework for FDIC-insured institutions based on five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. An institution's category depends upon where its capital levels are in relation to relevant capital measures. The well capitalized category is described above. An institution that is not well capitalized is subject to certain restrictions on brokered deposits, including restrictions on the rates it can offer on its deposits generally. To be considered adequately capitalized, an institution must have the minimum capital ratios described above. Any institution which is neither well capitalized nor adequately capitalized is considered undercapitalized.

Undercapitalized institutions are subject to certain prompt corrective action requirements, regulatory controls and restrictions which become more extensive as an institution becomes more severely undercapitalized. Failure by Heritage Bank to comply with applicable capital requirements would, if unremedied, result in progressively more severe restrictions on its activities and lead to enforcement actions, including, but not limited to, the issuance of a capital directive to ensure the maintenance of required capital levels and, ultimately, the appointment of the FDIC as receiver or conservator. Banking regulators will take prompt corrective action with respect to depository institutions that do not meet minimum capital requirements. Additionally, approval of any regulatory application filed for their review may be dependent on compliance with capital requirements.

As of December 31, 2015, the Bank met the requirements to be classified as "well capitalized." See Note (22) Regulatory Capital Requirements of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

Deposit Insurance and Other FDIC Programs. The deposits of the Bank are insured up to applicable limits by the Deposit Insurance Fund ("DIF"), which is administered by the FDIC. The FDIC is an independent federal agency that insures the deposits, up to applicable limits, of depository institutions. As insurer of the Bank's deposits, the FDIC has supervisory and enforcement authority over Heritage Bank and this insurance is backed by the full faith and credit of the United States government. As insurer, the FDIC imposes deposit insurance premiums and is authorized to conduct examinations of and to require reporting by institutions insured by the FDIC. It also may prohibit any FDIC-insured institution from engaging in any activity determined by regulation or order to pose a serious risk to the institution and the DIF. The FDIC also has the authority to initiate enforcement actions and may terminate the deposit insurance if it determines that an institution has engaged in unsafe or unsound practices or is in an unsafe or unsound condition.

The Dodd-Frank Act requires the FDIC's deposit insurance assessments to be based on assets instead of deposits. The FDIC issued rules under which the assessment base for a bank is equal to its total average consolidated assets less average tangible capital. The FDIC assessment rates range from approximately five basis points to 35 basis points, depending on applicable adjustments for unsecured debt issued by an institution and brokered deposits (and to further adjustment for institutions that hold unsecured debt of other FDIC-insured institutions), until such time as the FDIC's reserve ratio equals 1.15%. Once the FDIC's reserve ratio reaches 1.15% and the reserve ratio for the immediately prior assessment period is less than 2.0%, the applicable assessment rates may range from three basis points to 30 basis points (subject to adjustments as described above). If the reserve ratio for the prior assessment period is equal to,

or greater than 2.0% and less than 2.5%, the assessment rates may range from two basis points to 28 basis points and if the prior assessment period is greater than 2.5%, the assessment rates may range from one basis point to 25 basis points (in each case subject to adjustments as described above). No institution may pay a dividend if it is in default on its federal deposit insurance assessment.

Other Regulatory Developments. Significant federal banking legislation has been enacted in recent years. The following summarizes some of the recent significant federal banking legislation.

Table of Contents

The Dodd-Frank Act: The Dodd-Frank-Act imposes new restrictions and an expanded framework of regulatory oversight for financial institutions, including depository institutions and implements new capital regulations that we are subject to and that are discussed above under “- Capital Adequacy.”

The federal banking and securities regulators have issued final rules to implement Section 619 of the Dodd-Frank Act (the “Volcker Rule”) pursuant to the Dodd-Frank Act. Generally, subject to a transition period and certain exceptions, the Volcker Rule restricts insured depository institutions and their affiliated companies from engaging in short-term proprietary trading of certain securities, investing in funds with collateral comprised of less than 100% loans that are not registered with the Securities and Exchange Commission (“SEC”) and from engaging in hedging activities that do not hedge a specific identified risk. After the transition period, the Volcker Rule prohibitions and restrictions will apply to banking entities, including the Company, unless an exception applies. We are continuously reviewing our investment portfolio to determine if changes to our investment strategies may be required in order to comply with the various provisions of the Volcker Rule regulations.

In addition, among other changes, the Dodd-Frank Act requires public companies, like us, to (i) provide their shareholders with a non-binding vote (a) at least once every three years on the compensation paid to executive officers and (b) at least once every six years on whether they should have a “say on pay” vote every one, two or three years; (ii) have a separate, non-binding shareholder vote regarding golden parachutes for named executive officers when a shareholder vote takes place on mergers, acquisitions, dispositions or other transactions that would trigger the parachute payments; (iii) provide disclosure in annual proxy materials concerning the relationship between the executive compensation paid and the financial performance of the issuer; and (iv) amend Item 402 of Regulation S-K to require companies to disclose the ratio of the Chief Executive Officer's annual total compensation to the median annual total compensation of all other employees.

Sarbanes-Oxley Act. As a public company that files periodic reports with the SEC, under the Securities Exchange Act of 1934, Heritage is subject to the Sarbanes-Oxley Act of 2002, which addresses, among other issues, corporate governance, auditing and accounting, executive compensation and enhanced and timely disclosure of corporate information.

The Sarbanes-Oxley Act represents significant federal involvement in matters traditionally left to state regulatory systems, such as the regulation of the accounting profession, and to state corporate law, such as the relationship between a board of directors and management and between a board of directors and its committees. Our policies and procedures have been updated to comply with the requirements of the Sarbanes-Oxley Act.

Website Access to Company Reports

We post publicly available reports required to be filed with the SEC on our website, www.HF-WA.com, as soon as reasonably practicable after filing such reports with the SEC. The required reports are available free of charge through our website.

Code of Ethics

We have adopted a Code of Ethics that applies to our principal executive officer, principal financial officer and controller. We have posted the text of our Code of Ethics at www.HF-WA.com in the section titled Investor Information: Corporate Governance. Any waivers of the code of ethics will be publicly disclosed to shareholders.

Competition

We compete for loans and deposits with other commercial banks, credit unions, mortgage bankers, and other institutions in the scope and type of services offered, interest rates paid on deposits, pricing of loans, and number and locations of branches, among other things. Many of our competitors have substantially greater resources than we do. Particularly in times of high or rising interest rates, we also face significant competition for investors' funds from short-term money market securities and other corporate and government securities.

We compete for loans principally through the range and quality of the services we provide, interest rates and loan fees, and the locations of our Bank's branches. We actively solicit deposit-related clients and compete for deposits by offering depositors a variety of savings accounts, checking accounts, cash management and other services.

Employees

We had 717 full-time equivalent employees at December 31, 2015. We believe that employees play a vital role in the success of a service company. Employees are provided with a variety of benefits such as medical, vision, dental and life insurance, a retirement plan, and paid vacations and sick leave. None of our employees are covered by a collective bargaining agreement.

Table of Contents

Executive Officers

The following table sets forth certain information with respect to the executive officers of the Company at December 31, 2015.

Name	Age as of December 31, 2015	Position	Has Served the Company or Heritage Bank Since
Brian L. Vance	61	President and Chief Executive Officer of Heritage; Chief Executive Officer of Heritage Bank	1996
Jeffrey J. Deuel	57	Executive Vice President of Heritage; President and Chief Operating Officer of Heritage Bank	2010
Donald J. Hinson	54	Executive Vice President and Chief Financial Officer of Heritage and Heritage Bank	2005
David A. Spurling	62	Executive Vice President and Chief Credit Officer of Heritage and Heritage Bank	1999
Bryan McDonald (1)	44	Executive Vice President and Chief Lending Officer of Heritage Bank	2014

(1) Former executive officer of Washington Banking Company.

The business experience of each executive officer is set forth below.

Brian L. Vance is the President and Chief Executive Officer of Heritage and Chief Executive Officer of Heritage Bank as well as a director of Heritage. Mr. Vance was appointed President and Chief Executive Officer of Heritage and Heritage Bank in 2006. In 2003, Mr. Vance was appointed President and Chief Executive Officer of Heritage Bank and in 1998, Mr. Vance was named President and Chief Operating Officer of Heritage Bank. Mr. Vance joined Heritage Bank in 1996 as its Executive Vice President and Chief Credit Officer. Prior to joining Heritage Bank, Mr. Vance was employed for 24 years with West One Bank, a bank with offices in Idaho, Utah, Oregon and Washington. Prior to leaving West One, he was Senior Vice President and Regional Manager of Banking Operations for the south Puget Sound region.

Jeffrey J. Deuel was promoted to President and Chief Operating Officer of Heritage Bank and Executive Vice President of Heritage in September 2012. In November 2010, Mr. Deuel was named Executive Vice President and Chief Operating Officer of Heritage Bank and Executive Vice President of the Company. Mr. Deuel joined Heritage Bank in February 2010 as Executive Vice President. Mr. Deuel came to the Company with 28 years of banking experience and most recently held the position of Executive Vice President Commercial Operations with JPMorgan Chase, formerly Washington Mutual. Prior to joining Washington Mutual, Mr. Deuel was based in Philadelphia where he worked for Bank United, First Union Bank, CoreStates Bank, and First Pennsylvania Bank. During his career Mr. Deuel held a variety of leadership positions in commercial banking including lending, retail and support services, corporate strategies, credit administration, and portfolio management. He earned his Bachelor's degree at Gettysburg College.

Donald J. Hinson became Executive Vice President and Chief Financial Officer of Heritage and Heritage Bank in September 2012. In 2007, Mr. Hinson was appointed the Senior Vice President and Chief Financial Officer of Heritage and Heritage Bank. Mr. Hinson joined Heritage Bank in 2005 as Vice President and Controller. Prior to that, he served in the banking audit practice of local and national accounting firms of Knight, Vale and Gregory and RSM McGladrey from 1994 to 2005. Mr. Hinson holds a Bachelors of Science degree in Accounting from Central Washington University and is a licensed Certified Public Accountant.

David A. Spurling became Executive Vice President and Chief Credit Officer of Heritage and Heritage Bank in January 2014. Prior to that, he was the Senior Vice President and Chief Credit Officer of Heritage Bank beginning in

2007. Mr. Spurling joined Heritage Bank in 2001 as a commercial lender, followed by a role as a commercial team leader. He began his banking career as a middle market lender at Seafirst Bank, followed by positions as a commercial lender at Bank of America in Small Business Banking and as a regional manager for Bank of America's government-guaranteed lending division. Mr. Spurling holds a Master's Degree in Business Administration from the University of Washington and is Credit Risk Certified by the Risk Management Association.

Table of Contents

Bryan McDonald became Executive Vice President and Chief Lending Officer of Heritage Bank upon completion of the Washington Banking Merger effective on May 1, 2014. Prior to that, Mr. McDonald had served as President and Chief Executive Officer of Whidbey Island Bank since January 1, 2012. Mr. McDonald joined Whidbey Island Bank in 2006 as Commercial Banking Manager and he served as Senior Vice President and Chief Operating Officer of Whidbey Island Bank from April 1, 2010 until his promotion to Executive Vice President on August 26, 2010. Mr. McDonald has been serving in the banking industry since 1994, including in regional commercial lending management roles since 1996 for Washington Mutual and Peoples Bank. Mr. McDonald holds a Bachelor's and Master's Degree in Business Administration from Washington State University.

ITEM 1A. RISK FACTORS

We assume and manage a certain degree of risk in order to conduct our business strategy. The following provides a discussion of certain risks that management believes are specific to our business. This discussion should not be viewed as an all inclusive list or in any particular order.

Our strategy of pursuing acquisitions and de novo branching exposes us to financial and operational risks that could adversely affect us.

We are pursuing a strategy of supplementing organic growth by acquiring other financial institutions or their businesses that we believe will help us fulfill our strategic objectives and enhance our earnings. There are risks associated with this strategy, however, including the following:

we may be exposed to potential asset quality issues or unknown or contingent liabilities of the banks, businesses, assets and liabilities we acquire. If these issues or liabilities exceed our estimates, our results of operations and financial condition may be materially negatively affected;

prices at which acquisitions can be made fluctuate with market conditions. We have experienced times during which acquisitions could not be made in specific markets at prices we considered acceptable and expect that we may continue to experience this condition in the future;

the acquisition of other entities generally requires integration of systems, procedures and personnel of the acquired entity into our company to make the transaction economically successful. This integration process is complicated and time consuming and can also be disruptive to the customers of the acquired business. If the integration process is not conducted successfully and with minimal effect on the acquired business and its customers, we may not realize the anticipated economic benefits of an acquisition within the expected time frame, and we may lose customers or employees of the acquired business. We may also experience greater than anticipated customer losses even if the integration process is successful. These risks are present in our completed FDIC-assisted transactions involving our assumption of deposits and the acquisition of the assets of Cowlitz Bank and Pierce Commercial Bank in July 2010 and November 2010, respectively; in the completed open-bank acquisitions of NCB and Valley Community Bancshares in January 2013 and July 2013, respectively, and in the merger of Washington Banking Company in May 2014;

to finance an acquisition, we may borrow funds, thereby increasing our leverage and diminishing our liquidity, or raise additional capital, which could dilute the interests of our existing shareholders;

since 2006, we completed six acquisition or mergers, including one acquisition in 2006, two acquisitions during 2010, two acquisitions during 2013 and one merger in 2014 that enhanced our rate of growth. We may not be able to continue to sustain our past rate of growth or to grow at all in the future;

we expect our net income will increase following our acquisitions, however, we also expect our general and administrative expenses and consequently our efficiency ratios will also increase. Ultimately, we would expect our efficiency ratio to improve; however, if we are not successful in our integration process, this may not occur, and our acquisitions or branching activities may not be accretive to earnings in the short or long-term; and

to the extent our costs of an acquisition exceed the fair value of the net assets acquired, the acquisition will generate goodwill. As discussed below under “-If the goodwill we have recorded in connection with acquisitions become impaired, our earnings and capital could be reduced,” we are required to assess our goodwill for impairment at least annually, and any goodwill impairment charge could have a material adverse effect on our results of operations and

financial condition.

23

Table of Contents

Our business strategy includes significant growth plans, and our financial condition and results of operations could be negatively affected if we are not successful in executing this strategy or if we fail to grow or manage our growth effectively.

We intend to pursue a significant growth strategy for our business. We regularly evaluate potential acquisitions and expansion opportunities. If appropriate opportunities present themselves, we expect to engage in selected acquisitions of financial institutions in the future, including branch acquisitions, or other business growth initiatives or undertakings. There can be no assurance that we will successfully identify appropriate opportunities, that we will be able to negotiate or finance such activities or that such activities, if undertaken, will be successful.

Our growth initiatives may require us to recruit experienced personnel to assist in such initiatives, which will increase our compensation costs. In addition, the failure to identify and retain such personnel would place significant limitations on our ability to successfully execute our growth strategy. To the extent we expand our lending beyond our current market areas, we also could incur additional risk related to those new market areas. We may not be able to expand our market presence in our existing market areas or successfully enter new markets.

If we do not successfully execute our acquisition growth plan, it could adversely affect our business, financial condition, results of operations, reputation and growth prospects. In addition, if we were to conclude that the value of an acquired business had decreased and that the related goodwill had been impaired, that conclusion would result in an impairment of goodwill charge to us, which would adversely affect our results of operations. While we believe we have the executive management resources and internal systems in place to successfully manage our future growth, there can be no assurance that suitable growth opportunities will be available or that we will successfully manage our growth. See “-If the goodwill we have recorded in connection with acquisitions becomes impaired, our earnings and capital could be reduced” and “-Our strategy of pursuing acquisitions and de novo branching exposes us to financial and operational risks that could adversely affect us” for additional risks related to our acquisition strategy.

The required accounting treatment of purchased credit impaired loans we acquire through acquisitions could result in higher net interest margins and interest income in current periods and lower net interest margins and interest income in future periods.

Under generally accepted accounting principles ("GAAP"), we are required to record purchased credit impaired loans acquired through acquisitions at fair value, which may differ from the outstanding balance of such loans. Estimating the fair value of such loans requires management to make estimates based on available information and facts and circumstances on the acquisition date. Actual performance could differ from management's initial estimates. If these loans outperform our original fair value estimates, the difference between our original estimate and the actual performance of the loan (the "discount") is accreted into net interest income. This accretable yield may change due to changes in expected timing and amount of future cash flows. The yields on our loans could decline as our acquired loan portfolio pays down or matures, and we expect downward pressure on our interest income to the extent that the runoff on our acquired loan portfolio is not replaced with comparable high-yielding loans. This could result in higher net interest margins and interest income in current periods and lower net interest rate margins and lower interest income in future periods.

We operate in a highly regulated environment and may be adversely affected by changes in federal and state laws and regulations that increase our costs of operations.

The financial services industry is extensively regulated. We are subject to extensive examination, supervision and comprehensive regulation by the Federal Reserve and Heritage Bank is subject to examination, supervision and comprehensive regulation by the FDIC and the Division. The Federal Reserve, FDIC and Division govern the activities in which we may engage, primarily for the protection of depositors and the Deposit Insurance Fund. These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the ability to impose requirements for additional capital, restrictions on operations, the reclassification of assets, and the determination of the adequacy of the allowance for loan losses and level of deposit insurance premiums assessed. In addition, these bank regulators also have the ability to impose additional conditions in the approval of merger and acquisition transactions.

As discussed under “Item 1. Business - Supervision and Regulation - Capital Adequacy” of this Form 10-K, the Dodd-Frank Act has significantly changed the bank regulatory structure and will affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting and implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years. It is difficult at this time to predict when or how any new standards will ultimately be applied to us or what specific impact the Dodd-Frank Act and the yet to be written implementing rules

Table of Contents

and regulations will have on community banks. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our noninterest expense.

We may face increased compliance costs and uncertainty in residential mortgage lending as a result of the adoption of consumer protection regulations by the Consumer Financial Protection Bureau.

The Dodd Frank Act created a new Consumer Financial Protection Bureau (“CFPB”) with broad powers to supervise and enforce consumer protection laws. The CFPB has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The CFPB has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Financial institutions such as Heritage Bank with less than \$10 billion in assets will continue to be examined for compliance with the consumer laws by their primary bank regulators but are subject to the rules of the CFPB.

In January 2013, the CFPB issued several final regulations and changes to certain consumer protections under existing laws. These final rules, most of the provisions of which (including the qualified mortgage) became effective January 10, 2014, generally prohibit creditors from extending mortgage loans without regard for the consumer’s ability to repay and add restrictions and requirements to mortgage origination and servicing practices. In addition, these rules limit prepayment penalties and require the creditor to retain evidence of compliance with the ability-to-repay requirement for three years. Compliance with these rules will likely increase our overall regulatory compliance costs and may require changes to our underwriting practices with respect to mortgage loans. Moreover, these rules may adversely affect the volume of mortgage loans that we underwrite and may subject us to increased potential liabilities related to such residential loan origination activities.

Our loan portfolio is concentrated in loans with a higher risk of loss.

Repayment of our commercial business loans, consisting of commercial and industrial loans as well as owner-occupied and non-owner occupied commercial real estate loans, is often dependent on the cash flows of the borrower, which may be unpredictable, and the collateral securing these loans may fluctuate in value. We offer different types of commercial loans to a variety of businesses with a focus on real estate related industries and businesses in agricultural, healthcare, legal, and other professions. The types of commercial loans offered are business lines of credit, term equipment financing and term real estate loans. We also originate loans that are guaranteed by the Small Business Administration, or SBA, and are a “preferred lender” of the SBA. Commercial business lending involves risks that are different from those associated with real estate lending. Real estate lending is generally considered to be collateral based lending with loan amounts established on predetermined loan to collateral values and liquidation of the underlying real estate collateral being viewed as the primary source of repayment in the event of borrower default. Our commercial business loans are primarily made based on our assessment of the cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. The borrower’s cash flow may be unpredictable, and collateral securing these loans may fluctuate in value. Although commercial business loans are often collateralized by equipment, inventory, accounts receivable or other business assets, the liquidation of collateral in the event of default is often an insufficient source of repayment because accounts receivable may be uncollectible and inventories may be obsolete or of limited use, among other things. Accordingly, the repayment of commercial business loans depends primarily on the cash flow and creditworthiness of the borrower and secondarily on the underlying collateral provided by the borrower. In addition, as part of our commercial business lending activities, we originate agricultural loans. Payments on agricultural loans are typically dependent on the profitable operation or management of the related farm property. The success of the farm may be affected by many factors outside the control of the borrower, including adverse weather conditions that prevent the planting of a crop or limit crop yields, declines in market prices for agricultural products and the impact of government regulations. In addition, many farms are dependent on a limited number of key individuals whose injury or death may significantly affect the successful operation of the farm. If the cash flow from a farming operation is diminished, the borrower’s ability to repay the loan may be impaired.

At December 31, 2015, our commercial business loans (consisting of commercial and industrial loans, owner-occupied commercial real estate loans and non-owner occupied commercial real estate loans) totaled \$1.92

billion, or approximately 80.0% of our total loan portfolio. Approximately \$7.1 million, or 0.4%, of our total commercial business loans were nonperforming at December 31, 2015. The majority of the nonperforming commercial business loans were commercial and industrial loans.

Our non-owner occupied commercial real estate loans, which includes five or more family residential real estate loans, involve higher principal amounts than other loans and repayment of these loans may be dependent on factors outside our control or the control of our borrowers. We originate commercial and five or more family residential real estate loans for individuals and businesses for various purposes, which are secured by commercial properties. These loans typically involve higher principal amounts than other types of loans, and repayment is dependent upon income generated, or expected to be generated, by the property securing the loan in amounts sufficient to cover

Table of Contents

operating expenses and debt service, which may be adversely affected by changes in the economy or local market conditions. For example, if the cash flow from the borrower's project is reduced as a result of leases not being obtained or renewed, the borrower's ability to repay the loan may be impaired.

Commercial and five or more family residential real estate loans also expose us to greater credit risk than loans secured by residential real estate because the collateral securing these loans typically cannot be sold as easily as residential real estate. In addition, many of our commercial and five or more family residential real estate loans are not fully amortizing and contain large balloon payments upon maturity. Such balloon payments may require the borrower to either sell or refinance the underlying property in order to make the payment, which may increase the risk of default or non-payment. If we foreclose on a commercial and five or more family residential real estate loan, our holding period for the collateral typically is longer than for one-to-four family residential loans because there are fewer potential purchasers of the collateral. Additionally, commercial and five or more family residential real estate loans generally have relatively large balances to single borrowers or related groups of borrowers. Accordingly, if we make any errors in judgment regarding the collectability of our commercial and five or more family residential real estate loans, any resulting charge-offs may be larger on a per loan basis than those incurred with our residential or consumer loan portfolios.

As of December 31, 2015, our non-owner occupied commercial real estate loans totaled \$697.4 million, or 29.0% of our total loan portfolio. There were no nonperforming non-owner occupied commercial real estate loans at December 31, 2015.

Our real estate construction and land development loans are based upon estimates of costs and the related value associated with the completed project. These estimates may be inaccurate. Construction lending can involve a higher level of risk than other types of lending because funds are advanced partially based upon the value of the project, which is uncertain prior to the project's completion. Because of the uncertainties inherent in estimating construction costs as well as the market value of a completed project and the effects of governmental regulation of real property, our estimates with regards to the total funds required to complete a project and the related loan-to-value ratio may vary from actual results. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project and the ability of the borrower to sell or lease the property or refinance the indebtedness. If our estimate of the value of a project at completion proves to be overstated, it may have inadequate security for repayment of the loan and may incur a loss.

As of December 31, 2015, our real estate construction and land development loans totaled \$107.1 million, or 4.5% of our total loan portfolio. Of these loans, \$51.8 million, or 2.2% of our total loan portfolio, were one-to-four family residential construction related and \$55.3 million, or 2.3% of our total loan portfolio, were five or more family residential and commercial property construction related. Approximately \$2.4 million, or 2.3%, of our total construction and land development loans were nonperforming at December 31, 2015.

Our allowance for loan losses may prove to be insufficient to absorb losses in our loan portfolio.

Lending money is a substantial part of our business. Every loan carries a certain risk that it will not be repaid in accordance with its terms or that any underlying collateral will not be sufficient to assure repayment. This risk is affected by, among other things:

- the cash flow of the borrower, guarantors and/or the project being financed;
- the changes and uncertainties as to the future value of the collateral, in the case of a collateralized loan;
- the character and creditworthiness of a particular borrower or guarantor;
- changes in economic and industry conditions; and
- the duration of the loan.

We maintain an allowance for loan losses, which is a reserve established through a provision for loan losses charged against earnings, which we believe is appropriate to absorb probable incurred losses in our loan portfolio. The amount of this allowance is determined by our management through a periodic comprehensive review and consideration of several factors, including, but not limited to:

- our general reserve, based on our historical default and loss experience;
-

our specific reserve, based on our evaluation of impaired loans and their underlying collateral or discounted cash flows; and

- current macroeconomic factors, regulatory requirements and management's expectation of future events.

The determination of the appropriate level of the allowance for loan losses inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which may undergo material changes. Deterioration in economic conditions affecting borrowers, new information regarding

Table of Contents

existing loans, identification of additional problem loans and other factors, both within and outside of our control, may require an increase in the allowance for loan losses. If current conditions in the housing and real estate markets weaken, we expect we will experience increased delinquencies and credit losses. In addition, bank regulatory agencies periodically review our allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further loan charge-offs, based on their judgments about information available to them at the time of their examination. In addition, if charge-offs in future periods exceed the allowance for loan losses we will need additional provisions to increase the allowance for loan losses. Any increases in the allowance for loan losses will result in a decrease in net income and possibly capital, and may have a material adverse effect on our financial condition and results of operations.

If our allowance for loan losses is not adequate, we may be required to make further increases in our provision for loan losses and charge-off additional loans, which could adversely affect our results of operations and our capital. For the year ended December 31, 2015 we recorded a provision for loan losses of \$4.4 million compared to \$4.6 million for the year ended December 31, 2014. We recorded net charge-offs of loans of \$2.4 million for the year ended December 31, 2015 compared to \$5.7 million for the year ended December 31, 2014. At December 31, 2015 our total nonperforming loans were \$9.7 million, or 0.40% of loans receivable, net, compared to \$11.6 million or 0.51% of loans receivable, net, at December 31, 2014. Generally, our nonperforming loans reflect operating difficulties of individual borrowers, which may be the result of current economic conditions. If economic conditions deteriorate, we expect that we could experience significantly higher delinquencies and loan charge-offs. As a result, we may be required to make further increases in our provision for loan losses in the future, which could adversely affect our financial condition and results of operations, perhaps materially.

General economic conditions tend to impact loan segments at varying degrees. Our commercial and industrial loan portfolio, which contained 52.7% of our nonaccrual loans at December 31, 2015, generally has the largest percentage of nonperforming loans as the borrowers are primarily business owners whose business results are influenced by deteriorating economic conditions. Slower sales and excess inventory in the housing market has been the primary cause of deterioration in our one-to-four family residential real estate construction and land development loans, which contained 25.0% of our nonaccrual loans at December 31, 2015.

The current economic condition in the market areas we serve may adversely impact our earnings and could increase the credit risk associated with our loan portfolio.

Substantially all of our loans are to businesses and individuals in the states of Washington and Oregon. A decline in the economies of our primary market areas of the Pacific Northwest in which we operate could have a material adverse effect on our business, financial condition, results of operations and prospects.

While real estate values and unemployment rates have improved, a deterioration in economic conditions in our market areas of the Pacific Northwest could result in the following consequences, any of which could have a materially adverse impact on our business, financial condition and results of operations:

- loan delinquencies, problem assets and foreclosures may increase;
- the sale of foreclosed assets may be slow;
- an increase in our provision for loan losses;
- demand for our products and services may decline, possibly resulting in a decrease in our total loans;
- collateral for loans made may decline further in value, exposing us to increased risk of loss on existing loans;
- the net worth and liquidity of loan guarantors may decline, impairing their ability to honor commitments to us; and
- the amount of our deposits may decrease and the composition of our deposits may be adversely affected.

If the goodwill we have recorded in connection with acquisitions becomes impaired, our earnings and capital could be reduced.

Accounting standards require that we account for acquisitions using the purchase method of accounting. Under purchase accounting, if the purchase price of an acquired company exceeds the fair value of its net assets, the excess is carried on the acquirer's balance sheet as goodwill. In accordance with generally accepted accounting principles, our

goodwill is evaluated for impairment on an annual basis or more frequently if events or circumstances indicate that a potential impairment exists. The evaluation is based on a variety of factors, including the quoted price of our common stock, market prices of common stock of other banking organizations, common stock trading multiples, discounted

Table of Contents

cash flows, and data from comparable acquisitions. At December 31, 2015, we had goodwill with a carrying amount of \$119.0 million.

Declines in our stock price or a prolonged weakness in the operating environment of the financial services industry may result in a future impairment charge. Any such impairment charge could have a material adverse effect on our operating results and financial condition.

Fluctuating interest rates can adversely affect our profitability.

Our profitability is dependent to a large extent upon net interest income, which is the difference (or “spread”) between the interest earned on loans, securities and other interest earning assets and the interest paid on deposits, borrowings, and other interest bearing liabilities. Because of the differences in maturities and repricing characteristics of our interest earning assets and interest bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest earning assets and interest paid on interest bearing liabilities. We principally manage interest rate risk by managing our volume and mix of our earning assets and funding liabilities. Thus, in a changing interest rate environment, we may not be able to manage this risk effectively. Accordingly, fluctuations in interest rates could adversely affect our interest rate spread, and, in turn, our profitability.

During the past several years it has been the policy of the Federal Reserve to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a result, market rates on the loans we have originated and the yields on securities we have purchased have been at lower levels than available prior to 2008. As a general matter, our interest bearing liabilities reprice or mature more quickly than our interest earning assets, which has been one factor contributing to the increase in our interest rate spread as interest rates decreased. However, our ability to lower our interest expense will be limited at these interest rate levels while the average yield on our interest earning assets may continue to decrease. The Federal Reserve raised short-term interest rates in December 2015 from a quarter to one-half of percent as a result of moderate improvements in the economy, particularly in improvements in the unemployment rate. The increase is relatively small and, thus, we expect our net interest income may be adversely affected and may decrease, which may have an adverse effect on our profitability. Although management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on our results of operations, any substantial, unexpected or prolonged change in market interest rates could have a material adverse effect on our financial condition and results of operations. Also, our interest rate risk modeling techniques and assumptions likely may not fully predict or capture the impact of actual interest rate changes on our balance sheet.

Decreased volumes and lower gains on sales of mortgage loans sold could adversely impact our noninterest income. We originate and sell one-to-four family residential loans. Our mortgage banking income is a significant portion of our noninterest income. We generate gains on the sale of one-to-four family residential loans pursuant to programs currently offered by Freddie Mac and other secondary market purchasers. Any future changes in their purchase programs, our eligibility to participate in such programs, the criteria for loans to be accepted or laws that significantly affect the activity of such entities could, in turn, materially adversely affect our results of operations. Further, in a rising or higher interest rate environment, our originations of mortgage loans may decrease, resulting in fewer loans that are available to be sold to investors. This would result in a decrease in mortgage banking revenues and a corresponding decrease in noninterest income. In addition, our results of operations are affected by the amount of noninterest expense associated with mortgage banking activities, such as salaries and employee benefits, occupancy, equipment and data processing expense and other operating costs. During periods of reduced loan demand, our results of operations may be adversely affected to the extent that we are unable to reduce expenses commensurate with the decline in loan originations.

The tightening of available liquidity could limit our ability to replace deposits and fund loan demand, which could adversely affect our earnings and capital levels.

A tightening of the credit markets and the inability to obtain adequate funding to replace deposits and fund continued loan growth may negatively affect asset growth and, consequently, our earnings capability and capital levels. In addition to any deposit growth, maturity of investment securities and loan payments, we rely from time to time on advances from the FHLB of Des Moines, and certain other wholesale funding sources to fund loans and replace

deposits. In the event of a further downturn in the economy, these additional funding sources could be negatively affected which could limit the funds available to us. Our liquidity position could be significantly constrained if we were unable to access funds from the FHLB of Des Moines or other wholesale funding sources.

Table of Contents

Our growth or future losses may require us to raise additional capital in the future, but that capital may not be available when it is needed or the cost of that capital may be very high; further, the resulting dilution of our equity may adversely affect the market price of our common stock.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. At some point we may need to raise additional capital to support our continued internal growth and growth through acquisitions. Our ability to raise additional capital, however, will depend on conditions in the capital markets at that time, which are outside our control, and on our financial condition and performance. If we are able to raise capital it may not be on terms that are acceptable to us. If we cannot raise additional capital when needed, our ability to further expand our operations through internal growth and acquisitions could be materially impaired and our financial condition and liquidity could be materially and adversely affected. Accordingly, we cannot make assurances that we will be able to raise additional capital when needed.

We are not restricted from issuing additional common stock or preferred stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common stock or preferred stock or any substantially similar securities. The market price of our common stock could decline as a result of sales of a large number of shares of common stock or preferred stock or similar securities in the market or from the perception that such sales could occur.

Our Board of Directors is authorized generally to cause us to issue additional common stock, as well as series of preferred stock, without any action on the part of our shareholders except as may be required under the listing requirements of the NASDAQ Stock Market. In addition, our Board has the power, without shareholder approval, to set the terms of any such series of preferred stock that may be issued, including voting rights, dividend rights and preferences over the common stock with respect to dividends or upon the liquidation, dissolution or winding-up of our business and other terms.

In addition, if we issue preferred stock in the future that has a preference over the common stock with respect to the payment of dividends or upon liquidation, dissolution or winding-up, or if we issue preferred stock with voting rights that dilute the voting power of the common stock, the rights of holders of the common stock or the market price of the common stock could be adversely affected.

We are subject to certain risks in connection with our use of technology.

Our security measures may not be sufficient to mitigate the risk of a cyber-attack. Communications and information systems are essential to the conduct of our business, as we use such systems to manage our customer relationships, our general ledger and virtually all other aspects of our business. Our operations rely on the secure processing, storage, and transmission of confidential and other information in our computer systems and networks. Although we take protective measures and endeavor to modify them as circumstances warrant, the security of our computer systems, software, and networks may be vulnerable to breaches, unauthorized access, misuse, computer viruses, or other malicious code and cyber-attacks that could have a security impact. If one or more of these events occur, this could jeopardize our or our customers' confidential and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations or the operations of our customers or counterparties. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us. We could also suffer significant reputational damage.

Security breaches in our internet banking activities could further expose us to possible liability and damage our reputation. Any compromise of our security also could deter customers from using our internet banking services that involve the transmission of confidential information. We rely on standard internet security systems to provide the security and authentication necessary to effect secure transmission of data. These precautions may not protect our systems from compromises or breaches of our security measures and could result in significant legal liability and significant damage to our reputation and our business.

Our security measures may not protect us from system failures or interruptions. While we have established policies and procedures to prevent or limit the impact of systems failures and interruptions, there can be no assurance that such

events will not occur or that they will be adequately addressed if they do. In addition, we outsource certain aspects of our data processing and other operational functions to certain third-party providers. If our third-party providers encounter difficulties, or if we have difficulty in communicating with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely impacted. Threats to information security also exist in the processing of customer information through various other vendors and their personnel.

The occurrence of any failures or interruptions may require us to identify alternative sources of such services, and we cannot assure you that we could negotiate terms that are as favorable to us or could obtain services with

Table of Contents

similar functionality as found in our existing systems without the need to expend substantial resources, if at all. Further, the occurrence of any systems failure or interruption could damage our reputation and result in a loss of customers and business, could subject us to additional regulatory scrutiny, or could expose us to legal liability. Any of these occurrences could have a material adverse effect on our financial condition and results of operations.

Our business may be adversely affected by an increasing prevalence of fraud and other financial crimes.

Our loans to businesses and individuals and our deposit relationships and related transactions are subject to exposure to the risk of loss due to fraud and other financial crimes. Nationally, reported incidents of fraud and other financial crimes have increased. We have also experienced losses due to apparent fraud and other financial crimes; albeit insignificant. While we have policies and procedures designed to prevent such losses, there can be no assurance that such losses will not occur.

Changes in accounting standards may affect how we record and report our performance.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. From time to time there are changes in the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be difficult to predict and can materially impact how we report and record our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in a retrospective adjustment to prior financial statements.

We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects.

Competition for qualified employees and personnel in the banking industry is intense and there are a limited number of qualified persons with knowledge of, and experience in, the community banking industry where we conduct our business. The process of recruiting personnel with the combination of skills and attributes required to carry out our strategies is often lengthy. Our success depends to a significant degree upon our ability to attract and retain qualified management, loan origination, finance, administrative, marketing and technical personnel and upon the continued contributions of our management and personnel. In particular, our success has been and continues to be highly dependent upon the abilities of key executives, including our President and Chief Executive Officer, Mr. Brian L. Vance, and certain other employees. The loss of key personnel could adversely affect our ability to successfully conduct our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved staff comments from the Securities and Exchange Commission ("SEC") as it relates to the Company's financial information as reported on Form 10-K.

ITEM 2. PROPERTIES

Our executive offices and the main office of Heritage Bank are located in approximately 22,000 square feet of the headquarters building and adjacent office space and main branch office which are owned by Heritage Bank and located in downtown Olympia. The Company's branch network at December 31, 2015 is comprised of 67 branches located throughout Washington and Oregon. The number of branches per county, as well as occupancy type, is detailed in the following table.

Table of Contents

County	State	Number of Branches	Occupancy Type	
			Owned	Leased
Clark	WA	2	1	1
Cowlitz	WA	2	2	—
Island	WA	6	5	1
Kittitas	WA	1	1	—
King	WA	10	3	7
Mason	WA	1	1	—
Multnomah	OR	1	—	1
Pierce	WA	13	8	5
San Juan	WA	1	—	1
Skagit	WA	4	3	1
Snohomish	WA	12	6	6
Thurston	WA	5	3	2
Whatcom	WA	4	3	1
Yakima	WA	5	5	—
Total		67	41	26

One Island County branch, one Thurston County branch and the branch in Kittitas County have land leases, which are not included in the leased section above as the building is owned.

In addition, as part of the Company's strategic initiatives, certain measures were taken to transform the Company's branching system subsequent to December 31, 2015. Three branches operating at December 31, 2015 were closed subsequent to year end and consolidated into existing Heritage Bank branches. Two of the three closed branch properties were leased and one branch was owned. The Company additionally consolidated two branches in the Metro markets into business banking centers on upper floor commercial office space, creating strong partnerships between retail, commercial and cash management teams. As of filing date of this Form 10-K, all branch transformations were complete with the exception of one Metro market consolidation which is anticipated to be completed in April 2016. For additional information concerning our premises and equipment and lease obligations, see Notes (8) and (15), respectively, of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

ITEM 3. LEGAL PROCEEDINGS

Heritage and Heritage Bank, are not a party to any material pending legal proceedings other than ordinary routine litigation incidental to the business of the Bank as of December 31, 2015. The matter described below was resolved during the year ended December 31, 2015.

On April 4, 2014, Washington Banking, its directors and Heritage entered into and documented an agreement in principle among Washington Banking, its directors, Heritage and the plaintiffs for the settlement of the putative shareholder class action lawsuit captioned In Re Washington Banking Company Shareholder Litigation, Lead Case No. 13-2-38689-5 SEA, pending before the Superior Court of the State of Washington in and for King County (the "Action"). The Action alleges that Washington Banking's directors breached their fiduciary duties to Washington Banking and its shareholders in connection with the transactions contemplated by the Agreement and Plan of Merger, dated October 23, 2013 (the "Merger Agreement"), under which Washington Banking and Heritage combined their organizations in a strategic combination, with Washington Banking merging with and into Heritage. The Action also alleges, among other things, that Heritage aided and abetted the alleged breaches of fiduciary duties by Washington Banking's directors and that the public disclosures concerning the Washington Banking Merger are misleading in various respects.

On December 15, 2014, the Court entered an order preliminarily approving the settlement of the consolidated litigation and ordering Washington Banking to provide notice of the proposed settlement to those persons who held

Washington Banking shares during the purported class period.

On February 27, 2015, the Court held a hearing to consider whether the settlement was fair and reasonable to the class members and, if so, to approve the settlement and to consider plaintiffs' counsel's application for an award

Table of Contents

of attorneys' fees and costs from Washington Banking. At the hearing, the Court approved the settlement and entered a Final Judgment and Order of Dismissal with Prejudice awarding plaintiffs' counsel fees and expenses totaling \$450,000 and terminating the litigation.

The settlement of the Action did not affect the Washington Banking Merger consideration paid to Washington Banking's shareholders in connection with the completion of the Washington Banking Merger on May 1, 2014. Washington Banking, its directors and Heritage took the position that the Action was without merit and denied any wrongdoing of any kind. Washington Banking, its directors and Heritage entered into the settlement solely to eliminate the costs, risks, burden, distraction and expense of further litigation and to put the claims that were or could have been asserted to rest. Nothing in the stipulation of settlement or any public filing, including this Annual Report on Form 10-K, shall be deemed an admission of the legal necessity of filing or the materiality under applicable laws of any of the additional information contained herein or in any public filing associated with the settlement of the Action.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable

PART II

ITEM MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS
5. AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the NASDAQ Global Select Market under the symbol HFWA. At December 31, 2015, we had approximately 1,534 shareholders of record (not including the number of persons or entities holding stock in nominee or street name through various brokerage firms) and 29,975,439 outstanding shares of common stock. This total does not reflect the number of persons or entities who hold stock in nominee or "street" name through various brokerage firms. The last reported sales price on February 19, 2016 was \$17.31 per share. The following table provides sales information per share of our common stock as reported on the NASDAQ Global Select Market for the indicated quarters.

	2015 Quarter ended,			
	March 31	June 30	September 30	December 31
High	\$17.16	\$17.99	\$19.30	\$19.70
Low	\$15.52	\$16.76	\$17.22	\$18.08

For the interim period subsequent to the 2015 fiscal year through the last reported sales price on February 19, 2016, the high and low sales information price per share of our common stock as reported on the NASDAQ Global Selected Market was \$18.68 and \$16.54, respectively.

	2014 Quarter ended,			
	March 31	June 30	September 30	December 31
High	\$18.48	\$17.86	\$16.96	\$17.97
Low	\$16.18	\$15.44	\$15.59	\$15.80

Quarterly, the Company reviews the potential payment of cash dividends to common shareholders. The timing and amount of cash dividends paid on our common stock depends on the Company's earnings, capital requirements, financial condition and other relevant factors.

Table of Contents

The dividend activities for the years ended December 31, 2015 and 2014 and subsequent through the date of this filing are listed below:

Declared	Cash Dividend per Share	Record Date	Paid	
January 29, 2014	\$0.08	February 10, 2014	February 24, 2014	
March 27, 2014	\$0.08	April 8, 2014	April 23, 2014	
July 24, 2014	\$0.09	August 7, 2014	August 21, 2014	
October 23, 2014	\$0.09	November 6, 2014	November 20, 2014	
November 11, 2014	\$0.16	December 2, 2014	December 12, 2014	*
January 28, 2015	\$0.10	February 10, 2015	February 24, 2015	
April 22, 2015	\$0.11	May 7, 2015	May 21, 2015	
July 22, 2015	\$0.11	August 6, 2015	August 20, 2015	
October 21, 2015	\$0.11	November 4, 2015	November 18, 2015	
October 21, 2015	\$0.10	November 4, 2015	November 18, 2015	*
January 27, 2016	\$0.11	February 10, 2016	February 24, 2016	

* Denotes special dividend.

The primary source for dividends paid to our shareholders is dividends paid to us from Heritage Bank. There are regulatory restrictions on the ability of our subsidiary bank to pay dividends. Under federal regulations, the dollar amount of dividends the Bank may pay depends upon its capital position and recent net income. Generally, if an institution satisfies its regulatory capital requirements, it may make dividend payments up to the limits prescribed under state law and FDIC regulations. However, an institution that has converted to a stock form of ownership, as Heritage Bank has done, may not declare or pay a dividend on, or repurchase any of, its common stock if the effect thereof would cause the regulatory capital of the institution to be reduced below the amount required for the liquidation account which was established in connection with the mutual stock conversion.

As a bank holding company, our ability to pay dividends is subject to the guidelines of the Federal Reserve regarding capital adequacy and dividends. The Federal Reserve's policy is that a bank holding company should pay cash dividends only to the extent that its net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the holding company's capital needs, asset quality and overall financial condition, and that it is inappropriate for a bank holding company experiencing serious financial problems to borrow funds to pay dividends. Under Washington law, we are prohibited from paying a dividend if, after making such dividend payment, we would be unable to pay our debts as they become due in the usual course of business, or if our total liabilities, plus the amount that would be needed, in the event we were to be dissolved at the time of the dividend payment, to satisfy preferential rights on dissolution of holders of preferred stock ranking senior in right of payment to the capital stock on which the applicable distribution is to be made exceed our total assets.

The Company has had various stock repurchase programs since March 1999. On October 23, 2014, the Company's Board of Directors authorized the repurchase of up to 5% of the Company's outstanding common shares, or approximately 1,513,000 shares, under the eleventh stock repurchase plan. At December 31, 2015, the shares remaining to be purchased was approximately 1,071,000. The number, timing and price of shares repurchased will depend on business and market conditions, and other factors, including opportunities to deploy the Company's capital. The Company's tenth stock repurchase plan was approved by the Board of Directors on August 30, 2012 and authorized the repurchase of up to 5% of the Company's outstanding shares of common stock, or approximately 757,000 shares. All of the share under tenth stock repurchase plan were purchased except for 52,025 shares which will remain unpurchased as the eleventh plan supersedes the tenth stock repurchase program.

Table of Contents

The following table provides total repurchased shares and average share prices under the applicable plans and years:

	Years Ended December 31,			Plan Total
	2015	2014	2013	
Tenth Plan				
Repurchased shares	—	108,075	544,000	704,975
Stock repurchase average share price	\$—	\$16.88	\$15.88	\$15.85
Eleventh Plan				
Repurchased shares	441,966	—	—	441,966
Stock repurchase average share price	\$16.64	\$—	\$—	\$16.64

During the years ended December 31, 2015, 2014 and 2013, the Company repurchased 22,300, 48,304 and 13,138 shares at an average price of \$17.09, \$16.53 and \$14.29 to pay withholding taxes on the vesting of restricted stock that vested during the years ended December 31, 2015, 2014 and 2013, respectively, which are not considered repurchased as part of the applicable repurchase plans.

The following table sets forth information about the Company's purchases of its outstanding common stock during the quarter ended December 31, 2015.

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share(1)	Cumulative Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October 1, 2015— October 31, 2015	265	\$18.71	7,755,389	1,073,034
November 1, 2015—November 30, 2015	—	—	7,755,389	1,073,034
December 1, 2015—December 31, 2015	37	18.47	7,755,389	1,073,034
Total	302	\$18.68	7,755,389	1,073,034

(1) Common shares repurchased by the Company between October 1, 2015 and December 31, 2015 represent shares of restricted stock that were canceled to pay withholding taxes.

The information regarding the Company's equity compensation plan is contained under "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" of this Form 10-K and is incorporated by reference herein.

Stock Performance Graph

The chart shown below depicts total return to stockholders during the period beginning December 31, 2010 and ending December 31, 2015. Total return includes appreciation or depreciation in market value of the Company's common stock as well as actual cash and stock dividends paid to common stockholders. Indices shown below, for comparison purposes only, are the Total Return Index for the NASDAQ Stock Market (U.S. Companies), which is a broad nationally recognized index of stock performance by publicly traded companies and the NASDAQ Bank Index, which is an index that contains securities of NASDAQ-listed companies classified according to the Industry Classification Benchmark as banks. The chart assumes that the value of the investment in Heritage's common stock and each of the three indices was \$100 on December 31, 2010, and that all dividends were reinvested in Heritage common stock.

Table of Contents

Index	Years Ended December 31,					
	2010	2011	2012	2013	2014	2015
Heritage Financial Corporation	\$ 100.00	\$93.18	\$115.30	\$137.98	\$145.90	\$161.40
NASDAQ Composite	100.00	99.21	116.82	163.75	188.03	201.40
NASDAQ Bank	100.00	89.50	106.23	150.55	157.95	171.92

ITEM 6. SELECTED FINANCIAL DATA

The following tables set forth certain information concerning our consolidated financial position and results of operations at and for the dates indicated and have been derived from our audited Consolidated Financial Statements. The information below is qualified in its entirety by the detailed information included elsewhere herein and should be read along with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Item 8. Financial Statements and Supplementary Data.”

Matters affecting comparability in the five-year summary detailed below include the Valley and NCB Acquisitions in 2013, and the Washington Banking Merger in 2014. See Note (2) Business Combinations in "Item 8. Financial Statements and Supplementary Data" discussing the fiscal 2014 and 2013 mergers and acquisitions.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is intended to assist in understanding the financial condition and results of operations of the Company. The information contained in this section should be read with the December 31, 2015 audited Consolidated Financial Statements and Notes to those consolidated financial statements included in this Form 10-K.

This Form 10-K may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements often include the words "believes," "expects," "anticipates," "estimates," "forecasts," "intends," "plans," "targets," "potentially," "probably," "projects," "outlook" or similar expressions or future or conditional verbs such as "may," "will," "should," "would" and "could." These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from the results

anticipated, including:

37

Table of Contents

our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we have acquired, including those from Cowlitz Bank, Pierce Commercial Bank, Northwest Commercial Bank, Valley Community Bancshares and Washington Banking Company, or may in the future acquire, into our operations and our ability to realize related revenue synergies and cost savings within expected time frames or at all, and any goodwill charges related thereto and costs or difficulties relating to integration matters, including but not limited to customer and employee retention, which might be greater than expected;

the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs and changes in our allowance for loan losses and provision for loan losses that may be impacted by deterioration in the housing and commercial real estate markets, which may lead to increased losses and non-performing assets in our loan portfolio, and may result in our allowance for loan losses not being adequate to cover actual losses, and require us to increase our allowance for loan losses and increase our provision for loan losses;

changes in general economic conditions, either nationally or in our market areas;

changes in the levels of general interest rates, and the relative differences between short and long term interest rates, deposit interest rates, our net interest margin and funding sources;

risks related to acquiring assets in or entering markets in which we have not previously operated and may not be familiar;

fluctuations in the demand for loans, the number of unsold homes and other properties and fluctuations in real estate values in our market areas;

results of examinations of us by the bank regulators, including the possibility that any such regulatory authority may, among other things, require us to increase our allowance for loan losses, write-down assets, change our regulatory capital position or affect our ability to borrow funds or maintain or increase deposits, which could adversely affect our liquidity and earnings;

legislative or regulatory changes that adversely affect our business including but not limited to, the Dodd-Frank Act and implementing regulations, changes in regulatory policies and principles, or the interpretation of regulatory capital or other rules as a result of Basel III;

our ability to control operating costs and expenses;

increases in premiums for deposit insurance;

the use of estimates in determining fair value of certain of our assets, which estimates may prove to be incorrect and result in significant declines in valuation;

difficulties in reducing risk associated with the loans on our consolidated statement of financial condition;

staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our workforce and potential associated charges;

failure or security breach of computer systems on which we depend;

our ability to retain key members of our senior management team;

costs and effects of litigation, including settlements and judgments;

our ability to implement our growth strategies;

increased competitive pressures among financial service companies;

changes in consumer spending, borrowing and savings habits;

the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions;

adverse changes in the securities markets;

inability of key third-party providers to perform their obligations to us;

changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the FASB, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; and

other economic, competitive, governmental, regulatory, and technological factors affecting our operations, pricing, products and services and the other risks described elsewhere in this Form 10-K.

Some of these and other factors are discussed in this Form 10-K under the caption “Item 1A. Risk Factors” and elsewhere in this Form 10-K. Such developments could have a material adverse impact on our business, financial

position and results of operations.

Any forward-looking statements are based upon management's beliefs and assumptions at the time they are made. We undertake no obligation to publicly update or revise any forward-looking statements included in this Form 10-K or to update the reasons why actual results could differ from those contained in such statements, whether as a

38

Table of Contents

result of new information, future events or otherwise. In light of these risks, uncertainties and assumptions, you should not put undue reliance on any forward-looking statements discussed in this Form 10-K.

Critical Accounting Policies

The Company's Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Companies may apply certain critical accounting policies requiring management to make subjective or complex judgments, often as a result of the need to estimate the effect of matters that are inherently uncertain.

The Company considers its most critical accounting estimates to be the allowance for loan losses, estimations of expected cash flows related to purchased credit impaired loans, business combinations, other than temporary impairments in the market value of investments and consideration of potential impairment of goodwill.

Allowance for Loan Losses. The allowance for loan losses is established through a provision for loan losses charged against earnings. The balance of the allowance for loan losses is maintained at the amount management believes will be appropriate to absorb probable incurred losses in the loan portfolio at the balance sheet date. The allowance for loan losses is determined by applying estimated loss factors to the credit exposure from outstanding loans.

We assess the estimated credit losses inherent in our loan portfolio by considering a number of elements including:

- historical loss experience in the loan portfolio;

- balance of potential problem loans in the loan portfolio;

- impact of environmental factors, including:

 - levels of and trends in delinquencies and impaired loans;

 - levels of and trends in charge-offs and recoveries;

 - trends in volume and terms of loans

 - effects of changes in risk selection and underwriting standards, and other changes in lending policies, procedures and practices;

 - experience, ability, and depth of lending management and other relevant staff;

 - national and local economic trends and conditions;

 - other external factors such as competition, legal, and regulatory;

 - effects of changes in credit concentrations; and

 - other factors

We calculate an allowance for our loan portfolio based on an appropriate percentage loss factor that is calculated based on the above-noted elements and trends. We may record specific provisions for each impaired loan after a careful analysis of that loan's credit and collateral factors. Our analysis of an allowance combines the provisions made for our non-impaired loans and the specific provisions made for each impaired loan.

While we believe we use the best information available to determine the allowance for loan losses, our results of operations could be significantly affected if circumstances differ substantially from the assumptions used in determining the allowance. A decline in national and local economic conditions, or other factors, could result in a material increase in the allowance for loan losses and may adversely affect the Company's financial condition and results of operations. In addition, the determination of the amount of the allowance for loan losses is subject to review by bank regulators, as part of their routine examination process, which may result in the establishment of additional allowance for loan losses based upon their judgment of information available to them at the time of their examination. For additional information regarding the allowance for loan losses, its relation to the provision for loan losses, risk related to asset quality and lending activity, see "—Results of Operations for the Years Ended December 31, 2015 and 2014—Provision for Loan Losses" below, "Item 1. Business—Analysis of Allowance for Loan Losses" as well as Note (5) Allowance for Loan Losses of the Notes to Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data."

Estimated Expected Cash Flows related to Purchased Credit Impaired ("PCI") Loans. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. In situations where such PCI loans have similar risk characteristics, loans may be aggregated into

pools to estimate cash flows. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation.

The cash flows expected over the life of the PCI loan or pool are estimated using an internal cash flow model that projects cash flows and calculates the carrying values of the pools, book yields, effective interest income and

Table of Contents

impairment, if any, based on pool level events. Assumptions as to default rates, loss severity and prepayment speeds are utilized to calculate the expected cash flows.

Expected cash flows at the acquisition date in excess of the fair value of loans are considered to be accretable yield, which is recognized as interest income over the life of the loan or pool using a level yield method if the timing and amounts of the future cash flows of the pool are reasonably estimable. Subsequent to the acquisition date, any increases in cash flow over those expected at purchase date in excess of fair value are recorded as interest income prospectively. Any subsequent decreases in cash flow over those expected at purchase date are recognized by recording an allowance for loan losses. Any disposals of loans, including sales of loans, payments in full or foreclosures result in the removal of the loan from the loan pool at the carrying amount.

Business Combinations. The Company applies the acquisition method of accounting for business combinations. Under the acquisition method, the acquiring entity in a business combination recognizes all of the identifiable assets acquired and liabilities assumed at their acquisition date fair values. Management utilizes prevailing valuation techniques appropriate for the asset or liability being measured in determining these fair values. Any excess of the purchase price over amounts allocated to assets acquired, including identifiable intangible assets, and liabilities assumed is recorded as goodwill. Where amounts allocated to assets acquired and liabilities assumed is greater than the purchase price, a bargain purchase gain is recognized. Acquisition-related costs are expensed as incurred unless they are directly attributable to the issuance of the Company's common stock in a business combination.

Other-Than-Temporary Impairments in the Market Value of Investments. Unrealized losses on investment securities available for sale and held to maturity are evaluated at least quarterly to determine whether declines in value should be considered "other than temporary" and therefore be subject to immediate loss recognition in income. Although these evaluations involve significant judgment, an unrealized loss in the fair value of a debt security is generally deemed to be temporary when the fair value of the security is below the carrying value primarily due to changes in interest rates, there has not been significant deterioration in the financial condition of the issuer, and it is not more likely than not that the Company will be required to sell the security before the anticipated recovery of its remaining carrying value. An unrealized loss in the value of an equity security is generally considered temporary when the fair value of the security is below the carrying value primarily due to current market conditions and not deterioration in the financial condition of the issuer and it is not more likely than not that the Company will be required to sell the security before the anticipated recovery of its remaining carrying value. Other factors that may be considered in determining whether a decline in the value of either a debt or an equity security is "other than temporary" include ratings by recognized rating agencies; actions of commercial banks or other lenders relative to the continued extension of credit facilities to the issuer of the security; the financial condition, capital strength and near-term prospects of the issuer and recommendations of investment advisors or market analysts. Therefore, continued deterioration of market conditions could result in additional impairment losses recognized within the investment portfolio.

Goodwill. Goodwill represents the excess of the purchase price over the fair value of net assets acquired in the merger with Washington Banking Company and the acquisitions of Valley Community Bancshares, Western Washington Bancorp and North Pacific Bank. The Company's goodwill is assigned to Heritage Bank and is evaluated for impairment at the Heritage Bank level (reporting unit). Goodwill is not amortized, but is reviewed for impairment annually and between annual tests if an event occurs or circumstances change that might indicate the Company's recorded value is more than its implied value. Such indicators may include, among others: a significant adverse change in legal factors or in the general business climate; significant decline in the Company's stock price and market capitalization; unanticipated competition; and an adverse action or assessment by a regulator. Any adverse changes in these factors could have a significant impact on the recoverability of goodwill and could have a material impact on the Company's Consolidated Financial Statements.

When required, the goodwill impairment test involves a two-step process. The first test for goodwill impairment is done by comparing the reporting unit's aggregate fair value to its carrying value. Absent other indicators of impairment, if the aggregate fair value exceeds the carrying value, goodwill is not considered impaired and no additional analysis is necessary. If the carrying value of the reporting unit were to exceed the aggregate fair value, a second test would be performed to measure the amount of impairment loss, if any. To measure any impairment loss

the implied fair value would be determined in the same manner as if the reporting unit were being acquired in a business combination. If the implied fair value of goodwill is less than the recorded goodwill an impairment charge would be recorded for the difference.

During 2011, ASU 2011-08 Intangibles—Goodwill and Other (Topic 350) was issued. Under the ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. In other words, before the first step of the existing guidance, the entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that the fair value of goodwill is less than carrying value. The qualitative assessment includes

Table of Contents

adverse events or circumstances identified that could negatively affect the reporting unit's fair value as well as positive and mitigating events. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step process is unnecessary. While the Company adopted the ASU in 2011, for the year ended December 31, 2015, the Company completed step one of the two-step process and concluded that the reporting unit's fair value was greater than its carrying value and there was no impairment of goodwill.

Our Strategy

Our primary objective is to be a well-capitalized, profitable community banking organization, with balanced growth while emphasizing lending and deposit relationships with small and medium size businesses along with their owners and the general public. We consider ourselves to be an innovative team providing financial services focusing on the success of our customers. Our stated mission is: "We are committed to being the leading community bank in the Pacific Northwest by continuously improving: Customer Satisfaction, Employee Empowerment, Community Investment and Shareholder Value." We will seek to achieve our objective through the following strategies:

Expand geographically as opportunities present themselves. We are committed to continuing the controlled expansion of our franchise through strategic acquisitions designed to increase our market share and enhance franchise value. We believe that consolidation across the community bank landscape will continue to take place and further believe that, with our capital and liquidity positions, our approach to credit management and extensive acquisition experience, we are well positioned to take advantage of acquisitions or other business opportunities in our market areas. In markets where we wish to enter or expand our business, we will also consider opening de novo branches. In the past, we have successfully integrated acquired institutions and opened de novo branches. We will continue to be disciplined and opportunistic as it pertains to future acquisitions and de novo branching focusing on the Pacific Northwest markets we know and understand.

Focus on Asset Quality. A strong credit culture is a high priority for us. We have a well-developed credit approval structure that has enabled us to maintain a standard of asset quality that we believe is conservative while at the same time maintaining our lending objectives. We will continue to focus on loan types and markets that we know well and where we have a historical record of success. We focus on loan relationships that are well diversified in both size and industry types. With respect to commercial business lending, which is our predominant lending activity, we view ourselves as cash-flow lenders obtaining additional support from realistic collateral values, personal guarantees and secondary sources of repayment. We have a problem loan resolution process that is focused on quick detection and feasible solutions. We seek to maintain strong internal controls and subject our loans to periodic internal loan reviews.

Maintain Strong Balance Sheet. In addition to our focus on underwriting, we believe that the strength of our balance sheet has allowed us to endure the economic downturn experienced by the Pacific Northwest more successfully than many of our competitors. As of December 31, 2015, the ratio of our allowance for loan losses to loans receivable, net was 1.24% and the ratio of the allowance for loan losses to nonperforming loans was 307.67%. Our liquidity position is also strong, with \$126.6 million in cash and cash equivalents as of December 31, 2015. As of December 31, 2015, the regulatory capital ratios of our subsidiary bank was well in excess of the levels required for "well-capitalized" status, and our consolidated common equity tier 1 capital to risk-weighted assets, total risk-based capital, Tier 1 risk-based capital and leverage capital ratios were 12.0%, 13.7%, 12.7% and 10.4%, respectively.

Deposit Growth. Our strategic focus is to continuously grow deposits with emphasis on total relationship banking with our business and retail customers. We continue to seek to increase our market share in the communities we serve by providing exceptional customer service, focusing on relationship development with local businesses and strategic branch expansion. Our primary focus is to maintain a high level of non-maturity deposits to internally fund our loan growth with a low reliance on maturity (certificate) deposits. At December 31, 2015, as a percentage of our total deposits, non-maturity deposits were 86.5%. We maintain state-of-the-art technology-based products, including on-line personal financial management, business cash management, and business remote deposit products that enable us to compete effectively with banks of all sizes. Our retail management team is well-seasoned and has strong ties to the communities we serve with a strong focus on relationship building and customer service.

Emphasize business relationships with a focus on commercial lending. We will continue to provide primarily commercial business, commercial real estate and residential construction loans with an emphasis on owner occupied commercial real estate and commercial business lending, and the deposit balances that accompany these relationships. Our seasoned lending staff has extensive knowledge and can add value through a focused advisory role that we believe strengthens our customer relationships and develops loyalty. We currently have and will seek to maintain a diversified portfolio of lending relationships without concentrations in any industry.

Table of Contents

Recruit and retain highly competent personnel to execute our strategies. Our compensation and staff development programs are aligned with our strategies to grow our loans and core deposits while maintaining our focus on asset quality. Our incentive systems are designed to achieve balanced high quality asset growth while maintaining appropriate mechanisms to reduce or eliminate incentive payments when appropriate. Our equity compensation programs and retirement benefits are designed to build and encourage employee ownership at all levels of the Company and we align employee performance objectives with corporate growth strategies and shareholder value. We have a strong corporate culture, which is supported by our commitment to internal development and promotion from within as well as the retention of management and officers in key roles.

Financial Overview

Heritage Financial Corporation is a bank holding company which primarily engages in the business activities of our wholly owned subsidiary, Heritage Bank. We provide financial services to our local communities with an ongoing strategic focus on our commercial banking relationships, market expansion and asset quality.

Five year analysis:

The Company has focused on expanding its business over the past several years. In 2010, the Company completed two FDIC-assisted transactions for the acquisition of Cowlitz Bank in July 2010 and Pierce Commercial Bank in November 2010. In 2013, the Company completed two open-bank acquisitions of Northwest Commercial Bank in January 2013 and Valley Community Bancshares in July 2013. In May 2014, the Company completed the merger with Washington Banking Company. These acquisitions and mergers, together with organic growth of the business, has significantly increased the Company's net assets.

During the period from December 31, 2011 through December 31, 2015 our total assets have increased \$2.28 billion, or 166.7%, to \$3.65 billion as of December 31, 2015 from \$1.37 billion at December 31, 2011. The total loans receivable, net of allowance for loan losses grew \$1.37 billion, or 136.2%, to \$2.37 billion as of December 31, 2015 from \$1.00 billion at December 31, 2011. Our emphasis in growing our commercial business loan portfolio, in addition to mergers and acquisitions, resulted in an increase in commercial business loans of \$1.07 billion, or 126.4%, since December 31, 2011. Loan increases are also attributable to the Washington Banking Merger and the acquisitions of Valley and Northwest Commercial Bank, and our emphasis on increasing lending in our market areas.

Deposits increased \$1.97 billion, or 173.6%, to \$3.11 billion at December 31, 2015 from \$1.14 billion at December 31, 2011. From December 31, 2011 to December 31, 2015, non-maturity deposits (total deposits less certificate of deposit accounts) increased \$1.88 billion, or 233.3% to \$2.69 billion at December 31, 2015. The percentage of certificate of deposit accounts to total deposits decreased to 13.5% at December 31, 2015 from 29.0% at December 31, 2011.

Stockholders' equity has increased by \$267.5 million, or 132.1%, to \$470.0 million at December 31, 2015 from \$202.5 million at December 31, 2011 due primarily to a combination of earnings and issuances of common stock, partially offset by repurchases of common stock and declaration of cash dividends. Our net income increased by \$31.0 million, or 475.2%, to \$37.5 million for the year ended December 31, 2015 from \$6.5 million for the year ended December 31, 2011 due primarily to growth in the Company primarily through acquisitions and mergers, which net assets generated an increase in net interest income of \$62.1 million to \$129.6 million for the year ended December 31, 2015 from \$67.5 million during the year ended December 31, 2011. The increase in net income was also a result of a \$10.1 million decrease in the provision for loan losses to \$4.4 million for the year ended December 31, 2015 from \$14.4 million for the year ended December 31, 2011 and a \$26.5 million increase in noninterest income to \$32.3 million for the year ended December 31, 2015 compared to \$5.7 million for the year ended December 31, 2011. The increase in net income was partially offset by a \$56.5 million increase in noninterest expense to \$106.2 million for the year ended December 31, 2015 from \$49.7 million for the year ended December 31, 2011 as a result of the growth of the Company.

Current year analysis:

The Company's total assets increased \$193.0 million, or 5.6%, to \$3.65 billion at December 31, 2015 from \$3.46 billion at December 31, 2014.

Investment securities available for sale increased \$69.0 million to \$811.9 million at December 31, 2015 from \$742.8 million at December 31, 2014. The 9.3% increase was due primarily to \$290.5 million investment purchases and the transfer of all investment securities previously classified as held to maturity to the available for sale classification. The amortized cost of the securities that were transferred to available for sale totaled \$29.4 million. The increase was partially offset by \$124.6 million of maturities, calls and payments and \$116.3 million in proceeds from sales of investment securities available for sale during the year ended December 31, 2015.

Table of Contents

Loans receivable, net of allowance for loan losses, increased \$148.9 million, or 6.7%, to \$2.37 billion at December 31, 2015 from \$2.22 billion at December 31, 2014. The increase in loans receivable was primarily in the non-owner occupied commercial real estate loan class which increased \$53.8 million, or 8.4%, during fiscal year 2015 and consumer loans which increased \$38.9 million, or 15.0%, during 2015.

Total deposits increased \$202.2 million, or 6.9%, to \$3.11 billion at December 31, 2015 from \$2.91 billion at December 31, 2014. Non-maturity deposits as a percentage of total deposits increased to 86.5% at December 31, 2015 from 81.9% at December 31, 2014. The increase in this ratio was primarily due to a \$124.5 million, or 15.7%, increase in NOW accounts to \$917.9 million at December 31, 2015 and a \$96.0 million, or 26.8%, increase in savings accounts to \$453.8 million at December 31, 2015. The increase in deposits was offset partially by a \$105.1 million, or 20.0%, decrease in certificates of deposit to \$420.3 million at December 31, 2015.

Total stockholders' equity increased \$15.5 million, or 3.4%, to \$470.0 million at December 31, 2015 from \$454.5 million at December 31, 2014. This increase was primarily due to net income of \$37.5 million, partially offset by cash dividends in the amount of \$15.9 million and repurchase of common stock of \$7.7 million.

Our core profitability depends primarily on our net interest income, which is the difference between the income we receive on our loan and investment portfolios, and our cost of funds, which consists of interest paid on deposits and borrowed funds. Like most financial institutions, our interest income and cost of funds are affected significantly by general economic conditions, particularly changes in market interest rates and government policies.

Changes in net interest income result from changes in volume, net interest spread, and net interest margin. Volume refers to the average dollar amounts of interest earning assets and interest bearing liabilities. Net interest spread refers to the difference between the average yield on interest earning assets and the average cost of interest bearing liabilities. Net interest margin refers to net interest income divided by average interest earning assets and is influenced by the level and relative mix of interest earning assets and interest bearing and noninterest bearing liabilities.

The following table provides relevant net interest income information for selected periods. The average daily loan balances presented in the table are net of allowances for loan losses. Nonaccrual loans have been included in the tables as loans carrying a zero yield. Yields on tax-exempt securities and loans have not been presented on a tax-equivalent basis.

Results of Operations for the Years Ended December 31, 2015 and 2014

Earnings Summary. Net income of \$1.25 per diluted common share was recorded for the year ended December 31, 2015 compared to \$0.82 per diluted common share for the year ended December 31, 2014. Net income for the year ended December 31, 2015 was \$37.5 million compared to net income of \$21.0 million for the same period in 2014. The \$16.5 million, or 78.4%, increase was primarily the result of a \$14.6 million increase in interest income and a \$15.8 million increase in noninterest income, partially offset by a \$6.8 million increase in noninterest expense, a \$6.9 million increase in income tax expense, and a \$439,000 increase in interest expense. The Company's efficiency ratio decreased to 65.6% for the year ended December 31, 2015 from 75.3% for the year ended December 31, 2014 primarily due to net interest income increases related to the mergers and acquisitions as well as increased operating efficiencies which did not increase noninterest expenses to the same extent.

Net Interest Income. Net interest income increased \$14.2 million, or 12.3%, to \$129.6 million for the year ended December 31, 2015 compared to \$115.4 million for the previous year. The increase in net interest income was due primarily to a full fiscal year of operations attributable to the Washington Banking Merger, and the results of the positive effects of the discount accretion on the acquired loan portfolios for the year ended December 31, 2015. The increase in net interest income is also due to an increase in average interest earning assets, again substantially attributable to the Washington Banking Merger. The increase in net interest income was partially offset by the decrease in the net interest margins due primarily to lower contractual loan note rates in the current lending environment. Net interest income as a percentage of average interest earning assets (net interest margin) for the year ended December 31, 2015 decreased 42 basis points to 4.11% from 4.53% for the previous year. Our net interest spread for the year ended December 31, 2015 decreased 41 basis points to 4.04% from 4.45% for the prior year.

Total interest income increased \$14.6 million, or 12.1%, to \$135.7 million for the year ended December 31, 2015, from \$121.1 million for the year ended December 31, 2014. The increase in interest income was due primarily to the effects of the Washington Banking Merger, offset partially by lower yields on interest earning assets and a

Table of Contents

decrease in accretion of discounts on acquired loans. During the years ended December 31, 2015 and 2014, the Company recorded approximately \$10.3 million and \$14.3 million, respectively, of discount accretion into interest income that related to the acquired loans. This income was incremental to the acquired loans' contractual interest income. The balance of average interest earning assets (including nonaccrual loans) increased \$599.7 million, or 23.5%, to \$3.15 billion for the year ended December 31, 2015 from \$2.55 billion for the year ended December 31, 2014. The majority of this increase in interest earning assets was a result of the realization of the Washington Banking Merger for a full fiscal year. The Company acquired in the Washington Banking Merger fair values at the May 1, 2014 merger date of \$458.3 million in investment securities, \$1.00 billion in loans and \$7.1 million of FHLB stock. The yield on interest earning assets decreased 44 basis points to 4.31% for the year ended December 31, 2015 from 4.75% for the year ended December 31, 2014. The decrease in the yield on interest earning assets for the year ended December 31, 2015 reflects the decreased loan yields due primarily to lower contractual note rates as well as a decrease of the effects of the overall discount accretion on all the acquired loan portfolios. The effect of discount accretion on net interest margin for the year ended December 31, 2015 and December 31, 2014 is as follows:

	Years Ended December 31,			
	2015		2014	
Net interest margin, excluding incremental accretion on purchased loans (1)	3.78	%	3.97	%
Impact on net interest margin from incremental accretion on purchased loans (1)	0.33		0.56	
Net interest margin	4.11	%	4.53	%

(1) The incremental accretion income represents the amount of income recorded on the purchased loans in excess of the contractual stated interest rate in the individual loan notes. This income results from the discount established at the time these loan portfolios were acquired and modified quarterly for PCI loans as a result of cash flow re-estimation.

The yield on interest earning assets was reduced by nonaccruing loans. Nonaccrual loans totaled \$9.7 million at December 31, 2015 compared to \$11.6 million at December 31, 2014.

Interest income on taxable and nontaxable investment securities increased \$3.6 million, or 34.9%, to \$13.8 million for the year ended December 31, 2015 from \$10.2 million for the year ended December 31, 2014 due primarily to an increase in the average investment securities as a result of the Washington Banking Merger and an increase in yields on nontaxable investments securities, offset by lower yields earned on the taxable investment securities in 2015 as a result of declining interest rates. The changes in average balances and interest income on other interest earning assets had minimal impact on net interest margins for the years ended December 31, 2015 and 2014.

Total interest expense increased by \$439,000, or 7.7%, to \$6.1 million for the year ended December 31, 2015 from \$5.7 million for the year ended December 31, 2014. The increase in interest expense was due to an increase in the average deposit balance, primarily as a result of the deposits acquired in the Washington Banking Merger which had a fair value at the acquisition date of \$1.43 billion. The effects of the increase in the average deposit balance was offset by lower rates paid on interest bearing deposits, reflecting the relatively low interest rate environment. The average rate paid on interest bearing deposits decreased to 0.23% for the year ended December 31, 2015 from 0.28% for the year ended December 31, 2014. The Company also acquired junior subordinated debentures in the Washington Banking Merger with a fair value of \$18.9 million at the merger date. The average rate paid on these liabilities, including accretion of discount from purchase accounting fair value adjustment, during 2015 was 4.29% compared to 3.59% during 2014. Total average interest bearing liabilities increased by \$422.2 million, or 22.6%, to \$2.29 billion for the year ended December 31, 2015 from \$1.87 billion for the year ended December 31, 2014 and the average rate was 0.27% and 0.30%, respectively.

Provision for Loan Losses. The provision for loan losses decreased \$222,000, or 4.8%, to \$4.4 million for the year ended December 31, 2015 from \$4.6 million for the year ended December 31, 2014. The Bank has established a comprehensive methodology for determining the allowance for loan losses and related provision for loan losses. On a quarterly basis, the Bank performs an analysis taking into consideration pertinent factors underlying the quality of the loan portfolio. These factors include changes in the amount and composition of the loan portfolio, historical loss experience for various loan classes, changes in economic conditions, delinquency rates, a detailed analysis of

individual loans on nonaccrual status, and other factors to determine the level of the allowance for loan losses and the related provision for loan losses. The decrease in provision expense was due primarily to the resolution of nonperforming loans and a decrease in net charge-offs during the year ended December 31, 2015 compared to the prior year, offset partially by an increase in the volume of loans. The Bank had net charge-offs on loans of \$2.4 million for the year ended December 31, 2015 compared to \$5.7 million for the year ended December 31, 2014. The ratio of net charge-offs to average total loans outstanding was 0.10% for the year ended December 31, 2015 and 0.30% for the year

Table of Contents

ended December 31, 2014. Total gross loans receivable at December 31, 2015 and 2014 were \$2.40 billion and \$2.25 billion, respectively.

As shown in the table below, the general allowance as a percentage of gross loans, excluding PCI and impaired loans, was 0.76% and 0.71% at December 31, 2015 and 2014, respectively. The increase in the percentage during the noted periods is due primarily to an increase in the volume of loans, a change in the historical loss factors and change in the mix of loans. The general allowance also increased during the year ended December 31, 2015 as a result of the mergers and acquisitions, since the acquired Non-PCI loans were recorded at a net discount at the merger date and, accordingly, no allowance for loan losses was initially recorded for the acquired loans. As the remaining discounts are accreted into income, the Company may determine a provision for loan losses is necessary which may increase the allowance for loan losses. The remaining discount for these acquired Non-PCI loans was \$9.4 million and \$14.2 million at December 31, 2015 and 2014, respectively.

The following table outlines the allowance for loan losses and related outstanding loan balances on loans at December 31, 2015 and 2014:

	December 31, 2015	December 31, 2014	
	(Dollars in thousands)		
General Valuation Allowance:			
Allowance for loan losses	\$ 17,354	\$ 15,016	
Gross loans, excluding PCI and impaired loans	2,283,832	2,102,512	
Percentage	0.76	% 0.71	%
PCI Allowance:			
Allowance for loan losses	\$9,084	\$9,055	
Gross PCI loans	86,919	119,271	
Percentage	10.45	% 7.59	%
Specific Valuation Allowance:			
Allowance for loan losses	\$3,308	\$3,658	
Gross impaired loans	30,362	30,231	
Percentage	10.90	% 12.10	%
Total Allowance for Loan Losses:			
Allowance for loan losses	\$29,746	\$27,729	
Gross loans receivable	2,401,113	2,252,014	
Percentage	1.24	% 1.23	%

The allowance for loan losses increased by \$2.0 million, or 7.3%, to \$29.7 million at December 31, 2015 from \$27.7 million at December 31, 2014. As of December 31, 2015, the Bank identified \$9.7 million of nonperforming loans and \$20.7 million of performing TDR loans for a total of \$30.4 million of impaired loans. Of these impaired loans, \$6.0 million have no allowances for loan losses as their estimated collateral value or discounted expected cash flow is equal to or exceeds their carrying costs. The remaining \$24.3 million have related allowances for loan losses totaling \$3.3 million. Based on the comprehensive methodology, management deemed the allowance for loan losses of \$29.7 million at December 31, 2015 (1.24% of loans receivable, net and 307.67% of nonperforming loans) appropriate to provide for probable incurred losses based on an evaluation of known and inherent risks in the loan portfolio at that date.

While the Bank believes it has established its existing allowance for loan losses in accordance with GAAP, there can be no assurance that regulators, in reviewing the Bank's loan portfolios, will not request the Bank to increase its allowance for loan losses. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is appropriate or that increased provisions will not be necessary should the quality of the loans deteriorate. Any material increase in the allowance for

loan losses would adversely affect the Company's financial condition and results of operations. For additional information, see "Item 1. Business—Analysis of Allowance for Loan Losses."

Table of Contents

Noninterest Income. Total noninterest income increased \$15.8 million, or 96.0%, to \$32.3 million for the year ended December 31, 2015 compared to \$16.5 million for the prior year. The components of noninterest income and the changes from prior year are as follows:

	Years Ended December 31,		Change 2015 vs. 2014	Percentage Change	
	2015	2014			
	(Dollars in thousands)				
Service charges and other fees	\$14,179	\$11,143	\$3,036	27.2	%
Merchant Visa income, net	513	1,076	(563)	(52.3))
Change in FDIC indemnification asset	(497)	(2,543)	2,046	(80.5))
Gain on sale of investment securities, net	1,516	287	1,229	428.2	
Gain on sale of loans, net	4,683	1,518	3,165	208.5	
Gain on termination of FDIC shared-loss agreements	1,747	—	1,747	100.0	
Gain on sale of Merchant Visa portfolio	2,198	—	2,198	100.0	
Other income	7,929	4,986	2,943	59.0	
Total noninterest income	\$32,268	\$16,467	\$15,801	96.0	%

Service charges and other fees increased \$3.0 million, or 27.2%, to \$14.2 million for the year ended December 31, 2015 from \$11.1 million for the year ended December 31, 2014 primarily as a result of deposit accounts acquired in the Washington Banking Merger earning service charges for a full fiscal year in 2015 as compared to eight months in 2014. See "Item 1. Business - Deposit Activities and Other Sources of Funds" for additional information. Total deposits increased \$202.0 million, or 6.9% to \$3.11 billion at December 31, 2015 from \$2.91 billion at December 31, 2014.

The change in FDIC indemnification asset includes amortization of the FDIC indemnification asset and increases/decreases to the FDIC indemnification asset as a result of changes in projected remaining cash flows of the related loans. The balance of the indemnification asset at December 31, 2014 was \$1.1 million. During the year ended December 31, 2015, the Company's three FDIC shared-loss agreements were all in the fifth year after which the majority of the covered loans would no longer have shared-loss coverage. The forthcoming change in the coverage resulted in accelerated amortization and change in the FDIC indemnification asset during the year ended December 31, 2014. On August 5, 2015, the Company and the FDIC entered into a termination agreement which effectively eliminated the shared-loss agreements. The Company recorded a \$1.7 million pre-tax gain on the termination of the shared-loss agreements. For additional information see Note (6) FDIC Indemnification Asset. There was no FDIC indemnification asset at December 31, 2015.

Gain on sale of investment securities, net, increased \$1.2 million, or 428.2%, to \$1.5 million for the year ended December 31, 2015 from \$287,000 for the year ended December 31, 2014 as a result of the Company's efforts of managing more effectively its investment portfolio. While the Company's proceeds of sales of investment securities available for sale decreased to \$116.3 million during the year ended December 31, 2015 as compared to \$157.0 million during the year ended December 31, 2014, the strategic sales of certain investments resulted in an increase of net gains on sales during the year ended December 31, 2015. The increase in gain on sales of investment securities, net was partially offset by the sale of the Company's entire portfolio of private residential collateralized mortgage obligations during the year ended December 31, 2015 with a carrying value of \$1.1 million, all of which were formerly classified as held-to-maturity. Since these securities were acquired, they had been downgraded below the Company's acceptable investment grades. The Company recorded a realized loss of \$125,000 on this sale.

Gain on sale of loans, net, increased \$3.2 million, or 208.5%, to \$4.7 million for the year ended December 31, 2015 from \$1.5 million for the year ended December 31, 2014 as a result of the Bank resuming mortgage banking operations in conjunction with the Washington Banking Merger. The Bank had ceased mortgage banking operations in the second quarter of 2013 and resumed these operations on the May 1, 2014 effective date of the merger as Washington Banking had a strong operational presence in mortgage banking operations.

Other income increased \$2.9 million, or 59.0%, to \$7.9 million for the year ended December 31, 2015 from \$5.0 million for the year ended December 31, 2014, partially as a result of earnings on the bank-owned life insurance ("BOLI") which increased to \$1.4 million for the year ended December 31, 2015 compared to \$455,000 for the prior year. The BOLI income increase was the result of a full fiscal year of the BOLI acquired in the Washington Banking Merger as well as the purchase of \$25.0 million of additional BOLI during the year ended December 31, 2015. The

Table of Contents

Company also recorded an additional \$214,000 of recoveries on legacy Washington Banking loans which were fully charged-off prior to the merger date during the year ended December 31, 2015 as compared to 2014.

Noninterest Expense. Noninterest expense increased \$6.8 million, or 6.9%, to \$106.2 million for the year ended December 31, 2015 compared to \$99.4 million for the year ended December 31, 2014.

The following table presents the key components of noninterest expense and the changes from prior year:

	Years Ended December 31,		Change 2015 vs. 2014	Percentage Change	Company Initiatives (1)
	2015	2014			
	(Dollars in thousands)				
Compensation and employee benefits	\$58,134	\$52,634	\$5,500	10.4	% \$1,522
Occupancy and equipment	15,846	13,406	2,440	18.2	602
Data processing	7,700	9,243	(1,543)	(16.7)) 3,038
Marketing	3,066	2,502	564	22.5	140
Professional services	3,536	6,185	(2,649)	(42.8)) 3,751
State and local taxes	2,378	1,976	402	20.3	—
Impairment loss on investment securities, net	—	45	(45)	(100.0)) —
Federal deposit insurance premium	2,046	1,718	328	19.1	—
Other real estate owned, net	1,007	638	369	57.8	—
Amortization of intangible assets	2,100	1,920	180	9.4	—
Other expense	10,395	9,112	1,283	14.1	535
Total noninterest expense	\$106,208	\$99,379	\$6,829	6.9	% \$9,588

(1) Balances represent the cost of Company initiatives for the year ended December 31, 2014 as discussed in detail below. There were no related costs for the year ended December 31, 2015.

The increase in total noninterest expense for the year ended December 31, 2015 was due primarily to the full fiscal year of expenses related to the Washington Banking Merger which was effective May 1, 2014. The increase in expense is related primarily to compensation and employee benefits which increased \$5.5 million, or 10.4%, to \$58.1 million for the year ended December 31, 2015 as compared to \$52.6 million for the prior year. The increase in compensation and employee benefits as a result of a full year of costs was partially offset by a decrease in staffing levels. The average full time equivalent was 766 and 782 during the years ended December 31, 2015 and 2014, respectively. Occupancy and equipment costs increased during the year ended December 31, 2015 by \$2.4 million, or 18.2%, to \$15.8 million from \$13.4 million as the branching network increased to 67 as of December 31, 2015 from 36 branches prior to the Washington Banking Merger. The Company has 26 bank branch leases and three land leases at December 31, 2015.

As part of the Company's strategic initiatives, certain measures were taken to transform the Company's branching system subsequent to December 31, 2015. Three branches operating at December 31, 2015 were closed subsequent to year-end and consolidated into existing Heritage Bank branches. The Company additionally consolidated two branches in the Metro markets into business banking centers on upper floor commercial office space, creating strong partnerships between retail, commercial and cash management teams. As of filing date of this Form 10-K, all branch transformations were complete with the exception of one Metro market consolidation which is anticipated to be completed in April 2016. The branch transformations will reduce the occupancy and equipment expense in future periods.

This increase in noninterest expense during year ended December 31, 2015 was offset by the specific costs of \$9.6 million recognized during the year ended December 31, 2014 identified in the table above as Company Initiatives. These initiative costs include the Washington Banking Merger totaling \$9.1 million, the Valley Acquisition totaling \$443,000, a core system conversion totaling \$40,000, and the consolidation of existing branches totaling \$11,000. These merger and acquisitions are discussed in Notes (1) and (2) of the Notes to Consolidated Financial Statements in

"Item. 8 Financial Statements and Supplementary Data". These costs include identifiable costs paid to third party providers as well as any retention bonuses or severance payments made in conjunction with these initiatives. The amounts do not include costs of additional staffing required to be maintained or utilized during a period of time in order to complete the initiatives.

Table of Contents

The types of expenses associated with the significant Company Initiatives expense categories in the table above are summarized as follows:

- Compensation and employee benefits expense consisted substantially of retention bonus and severances packages paid to transition employees.

- Occupancy and equipment expense consisted primarily of lease termination costs.

- Data processing expense consisted of costs relating to the Company's core system conversion as well as data conversions of the Whidbey Island Bank information to the Heritage core system.

- Professional services expense related to fees paid to: (1) financial advisors for the Washington Banking Merger, and (2) attorney, accountant and consultant fees related to merger and acquisitions.

Other expense increased \$1.3 million, or 14.1%, to \$10.4 million for the year ended December 31, 2015 from \$9.1 million for the year ended December 31, 2014. Other expense includes, but is not limited to, items such as courier services, phone costs, travel expenses, investor relations, and certain employee-related costs such as travel and meals. The increases in other expense are primarily as a result of the Washington Banking Merger and the general increase due to the growth of the Company during the year ended December 31, 2015 which is demonstrated by the increase in total assets to \$3.65 billion at December 31, 2015 from \$3.46 billion at December 31, 2014.

The efficiency ratio for the year ended December 31, 2015 was 65.6% compared to 75.3% for the prior year. The efficiency ratio consists of noninterest expense divided by the sum of net interest income before provision for loan losses plus noninterest income. The decrease in the ratio for the year ended December 31, 2015 was primarily related to the increase in net interest income related to mergers and acquisitions as described above which outpaced the increase in the noninterest expense as described above. The Company gained such efficiencies based on the merged company as a result of the reduction of duplicate operating contracts and decrease in staffing levels.

Income Tax Expense. The provision for income taxes increased by \$6.9 million to an expense of \$13.8 million for the year ended December 31, 2015 from an expense of \$6.9 million for the year ended December 31, 2014. The Company's effective income tax rate was 26.9% for the year ended December 31, 2015 compared to 24.7% for the same period in 2014. The increase in the Company's effective income tax rate from the prior year was primarily due to tax-exempt income being a lower percentage of pre-tax income in 2015 (4.8%) than it was in 2014 (5.7%).

Results of Operations for the Years Ended December 31, 2014 and 2013

Earnings Summary. Net income applicable to common shareholders of \$0.82 per diluted common share was recorded for the year ended December 31, 2014 compared to \$0.61 per diluted common share for the year ended December 31, 2013. Net income for the year ended December 31, 2014 was \$21.0 million compared to net income of \$9.6 million for the same period in 2013. The \$11.4 million increase was primarily the result of a \$49.7 million increase in interest income and a \$6.8 million increase in noninterest income, partially offset by a \$39.9 million increase in noninterest expense, a \$2.3 million increase in income tax expense, a \$2.0 million increase in interest expense and a \$922,000 increase in the provision for loan losses. The Company's efficiency ratio decreased to 75.3% for the year ended December 31, 2014 from 76.9% for the year ended December 31, 2013 primarily due to net interest income increases related to the mergers and acquisitions as well as operating efficiencies gained by the Company which did not increase noninterest expenses by the same extent.

Net Interest Income. Net interest income increased \$47.7 million, or 70.5%, to \$115.4 million for the year ended December 31, 2014 compared to \$67.7 million for the previous year. The increase in net interest income was due primarily to increases in average interest earning assets, substantially attributable to the Washington Banking Merger, and the results of the positive effects of the discount accretion on the acquired loan portfolios for the year ended December 31, 2014. The increase in net interest income was partially offset by the decrease in the net interest margins due primarily to lower contractual loan note rates in the current lending environment. Net interest income as a percentage of average interest earning assets (net interest margin) for the year ended December 31, 2014 decreased 27 basis points to 4.53% from 4.80% for the previous year. Our net interest spread for the year ended December 31, 2014 decreased 24 basis points to 4.45% from 4.69% for the prior year.

Total interest income increased \$49.7 million, or 69.5%, to \$121.1 million for the year ended December 31, 2014, from \$71.4 million for the year ended December 31, 2013. The increase in interest income was due primarily to the

effects of the Washington Banking Merger and the positive effects of the accretable discount, offset partially by lower yields on interest earning assets. During the year ended December 31, 2014, the Company recorded approximately \$10.8 million of discount accretion into interest income that related to the Washington Banking Merger. This income was incremental to the acquired loans' contractual interest income. The balance of average interest earning assets (including nonaccrual loans) increased \$1.14 billion, or 80.8%, to \$2.55 billion for the year ended December 31, 2014 from \$1.41 billion for the year ended December 31, 2013. The majority of this increase in interest earning assets was a result of the Washington Banking Merger. The Company acquired fair value at the May 1, 2014

Table of Contents

merger date of \$458.3 million in investment securities, \$896.0 million in noncovered loans, \$107.1 million in loans previously classified as covered loans and \$7.1 million of FHLB stock.

The yield on interest earning assets decreased 31 basis points to 4.75% for the year ended December 31, 2014 from 5.06% for the year ended December 31, 2013. The decrease in the yield on interest earning assets for the year ended December 31, 2014 reflects the decreased loan yields due primarily to lower contractual note rates, offset partially by the effects of the overall discount accretion on all the acquired loan portfolios. The effect of discount accretion on net interest margin for the year ended December 31, 2014 and December 31, 2013 is as follows:

	Years Ended December 31,		
	2014	2013	
Net interest margin, excluding incremental accretion on purchased loans (1)	3.97	% 4.32	%
Impact on net interest margin from incremental accretion on purchased loans (1)	0.56	0.48	
Net interest margin	4.53	% 4.80	%

(1) The incremental accretion income represents the amount of income recorded on the purchased loans in excess of the contractual stated interest rate in the individual loan notes. This income results from the discount established at the time these loan portfolios were acquired and modified quarterly for PCI loans as a result of cash flow re-estimation.

The yield on interest earning assets was reduced by nonaccruing loans. For both the years ended December 31, 2014 and December 31, 2013, nonaccruing loans reduced the yield on interest earning assets by approximately five basis points. Nonaccrual noncovered loans totaled \$7.5 million at December 31, 2014 compared to \$7.7 million at December 31, 2013.

Interest income on taxable and nontaxable investment securities increased \$6.8 million to \$10.2 million for the year ended December 31, 2014 from \$3.5 million for the year ended December 31, 2013 due primarily to an increase in the average investment securities as a result of the Washington Banking Merger and an increase in yields on taxable investments securities, offset by lower yields earned on the nontaxable investment securities in 2014 as a result of declining interest rates. The changes in average balances and interest income on other interest earning had minimal impact on net interest margins for the years ended December 31, 2014 and 2013.

Total interest expense increased by \$2.0 million, or 52.6%, to \$5.7 million for the year ended December 31, 2014 from \$3.7 million for the year ended December 31, 2013. The increase in interest expense was due to an increase in the average deposit balance, primarily as a result of the deposits acquired in the Washington Banking Merger which had a fair value at the acquisition date of \$1.43 billion. The effects of the increase in the average deposit balance was offset by lower rates paid on interest bearing deposits, reflecting the relatively low interest rate environment. The average rate paid on interest bearing deposits decreased to 0.28% for the year ended December 31, 2014 from 0.37% for the year ended December 31, 2013. The Company also acquired junior subordinated debentures in the Washington Banking Merger with a fair value of \$18.9 million at the merger date. The average rate paid on these liabilities during 2014 was 3.59%. Total average interest bearing liabilities increased by \$855.3 million, or 84.5%, to \$1.87 billion for the year ended December 31, 2014 from \$1.01 billion for the year ended December 31, 2013 and the average rate was 0.30% and 0.37%, respectively.

Provision for Loan Losses. The provision for loan losses increased \$922,000, or 25.1%, to \$4.6 million for the year ended December 31, 2014 from \$3.7 million for the year ended December 31, 2013. The increase in provision expense was due primarily to the resolution of nonperforming loans and the increase in volume of loans, offset partially by an improvement in the economy and a decrease in net charge-offs during the year ended December 31, 2014 compared the prior year.

The Bank had net charge-offs on loans of \$5.7 million for the year ended December 31, 2014 compared to \$3.4 million for the year ended December 31, 2013. The ratio of net charge-offs to average loans receivable was 0.30% for the year ended December 31, 2014 and 0.31% for the year ended December 31, 2013. Total gross loan receivables at December 31, 2014 and 2013 were \$2.25 billion and \$1.23 billion, respectively. The general allowance (excluding impaired and PCI loans) as a percentage of related loans was 0.71% and 1.29% at December 31, 2014 and 2013, respectively. The decrease in the percentage during the noted periods is due primarily to the Washington Banking

Merger, since the acquired loans were recorded at a net discount at the merger date and, accordingly, no allowance for loan losses was initially recorded for the acquired loans. The remaining discount for these acquired loans at December 31, 2014 was deemed sufficient to absorb probable incurred losses in the loan portfolio thereby reducing the need for an additional general valuation allowance.

Table of Contents

The following table outlines the allowance for loan losses and related loan balances at December 31, 2014 and 2013:

	December 31, 2014	December 31, 2013	
	(Dollars in thousands)		
General Valuation Allowance:			
Allowance for loan losses, excluding PCI and impaired loans	\$ 15,016	\$ 14,483	
Gross loan balance, excluding PCI and impaired loans	2,102,512	1,125,610	
Percentage	0.71	% 1.29	%
PCI:			
Allowance for loan losses	\$9,055	\$9,642	
Gross noncovered loan balance of non-impaired loans	119,271	74,893	
Percentage	7.59	% 12.87	%
Specific Valuation Allowance:			
Allowance for loan losses on impaired loans	\$3,658	\$4,699	
Gross loan balance of impaired loans	30,231	34,087	
Percentage	12.10	% 13.79	%
Total Allowance for Loan Losses:			
Allowance for loan losses	\$27,729	\$28,824	
Gross loan balance	2,252,014	1,234,590	
Percentage	1.23	% 2.33	%

The allowance for loan losses decreased by \$1.1 million, or 3.8%, to \$27.7 million at December 31, 2014 from \$28.8 million at December 31, 2013. As of December 31, 2014, the Bank identified \$11.5 million of nonperforming loans and \$18.7 million of performing TDR loans for a total of \$30.2 million of impaired loans. Of these impaired loans, \$8.5 million have no allowances for loan losses as their estimated collateral value or expected cash flow is equal to or exceeds their carrying costs. The remaining \$21.7 million have related allowances for loan losses totaling \$3.7 million. Based on the comprehensive methodology, management deemed the allowance for loan losses of \$27.7 million at December 31, 2014 (1.23% of loans receivable, net and 239.62% of nonperforming loans) appropriate to provide for probable incurred losses based on an evaluation of known and inherent risks in the loan portfolio at that date.

The provision for loan losses increased \$922,000, or 25.1%, to \$4.6 million for the year ended December 31, 2014 compared to \$3.7 million for the year ended December 31, 2013. The increase in provision for loan losses recorded for the year ended December 31, 2014 was primarily a result of loans acquired in the Washington Banking Merger which had \$646,000 of provision expense recorded during the year ended December 31, 2014. The provision expense was necessary based on loan events that occurred after the May 1, 2014 merger date which caused the estimated loss on the loan to increase from original expectations. There was also the default of two large borrowers from the Cowlitz Acquisition which caused \$915,000 in provision expense during the year ended December 31, 2014. The impact of these events was partially offset by the general improvements in the remaining PCI loans' expected cash flows in addition to the change in mix and volume of non-acquired loans. The Bank recorded net charge-offs of \$5.7 million for the year ended December 31, 2014 as compared to \$3.4 million for the year ended December 31, 2013.

Table of Contents

Noninterest Income. Total noninterest income increased \$6.8 million, or 70.6%, to \$16.5 million for the year ended December 31, 2014 compared to \$9.7 million for the prior year. The components of the noninterest income for the year ended December 31, 2014 and the changes from prior year are as follows:

	Years Ended December 31,		Change 2014 vs. 2013	Percentage Change	
	2014	2013			
	(Dollars in thousands)				
Bargain purchase gain on bank acquisition	\$—	\$399	\$(399)	100.0	%
Service charges and other fees	11,143	5,936	5,207	87.7	
Merchant Visa income, net	1,076	862	214	24.8	
Change in FDIC indemnification asset	(2,543)	(181)	(2,362)	(1,305.0))
Gain on sale of investment securities, net	287	—	287	100.0	
Gain on sale of loans, net	1,518	142	1,376	969.0	
Other income	4,986	2,493	2,493	100.0	
Total noninterest income	\$16,467	\$9,651	\$6,816	70.6	%

The \$2.4 million decrease change in FDIC indemnification asset was primarily due to a \$2.2 million decrease in the loan (recapture) impairment and a \$204,000 increase in amortization expense to \$1.5 million for the year ended December 31, 2014 compared to \$1.3 million for the year ended December 31, 2013. The Company recorded loan recaptures during the fourth quarter of 2014 due to the revised estimated loss projections given the 2015 expiration date of certain shared-loss agreements. While the Bank believed additional losses may be incurred on the assets, the timing of those losses will not likely occur before the expiration dates. The increase in the amortization expense was primarily due to the overall improvements of the covered loans because less loss is anticipated than prior period estimates. The balance of the indemnification asset at December 31, 2014 was \$1.1 million compared to \$4.4 million at December 31, 2013.

Service charges and other fees increased \$5.2 million, or 87.7%, to \$11.1 million for the year ended December 31, 2014 from \$5.9 million for the year ended December 31, 2013 primarily as a result of an increase in the deposit accounts acquired in the Washington Banking Merger. See "Item 1. Business - Deposit Activities and Other Sources of Funds" for additional information. Total deposits increased \$1.51 billion, or 107.7% to \$2.91 billion at December 31, 2014 from \$1.40 billion at December 31, 2013.

Gain on sale of loans, net increased \$1.4 million, or 969.0%, to \$1.5 million for the year ended December 31, 2014 from \$142,000 for the year ended December 31, 2013 as a result of the Bank resuming mortgage banking operations. Other income increased \$2.5 million, or 100.0%, to \$5.0 million for the year ended December 31, 2014 from \$2.5 million for the year ended December 31, 2013 partially due to recoveries on legacy Washington Banking loans which were fully charged-off prior to the merger date. The Bank had estimated that there would be no such recoveries for fair value purposes, but the recovery efforts of the credit department have exceeded anticipated results. Other income also increased by \$390,000 in 2014 as a result of earnings on the BOLI from the \$32.5 million of BOLI acquired on May 1, 2014 in the Washington Banking Merger. The increase in other income for 2014 was partially offset by a gain on sale of a bank branch of \$596,000 recorded during the year ended December 31, 2013.

The bargain purchase gain on bank acquisition of \$399,000 for the year ended December 31, 2013 was the result of the NCB Acquisition in January 2013. See Note (2) Business Combinations of the Notes to Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" for additional information on the NCB Acquisition.

Table of Contents

Noninterest Expense. Noninterest expense increased \$39.9 million or 67.0% to \$99.4 million for the year ended December 31, 2014 compared to \$59.5 million for the year ended December 31, 2013.

The following table presents the key components of noninterest expense for the year ended December 31, 2014 and the changes from prior year:

	Years Ended December 31,		Change 2014 vs. 2013	Percentage Change	
	2014	2013			
	(Dollars in thousands)				
Compensation and employee benefits	\$52,634	\$31,612	\$21,022	66.5	%
Occupancy and equipment	13,406	9,724	3,682	37.9	
Data processing	9,243	4,806	4,437	92.3	
Marketing	2,502	1,598	904	56.6	
Professional services	6,185	3,936	2,249	57.1	
State and local taxes	1,976	1,150	826	71.8

Total noninterest expense	\$99,379	\$59,515	\$39,864	67.0	%

The increase in total noninterest expense for the year ended December 31, 2014 was due primarily to the Washington Banking Merger and additional ongoing operating costs from mergers and acquisitions as well as specific costs identified in the Company Initiatives table below. The core system conversion occurred in fourth quarter of 2013 whereby, after 18 years of using FiServ's Total Plus core system, the Company converted to FiServ's DNA platform which provides a variety of efficiencies in all operation areas of the Bank. The consolidation of existing branches also occurred in the fourth quarter of 2013 with the Company consolidating three Heritage branch locations to nearby branches. The table below includes each of the Company's major initiatives as well as the direct costs associated with the initiatives for the years ended December 31, 2014 and 2013. The amounts include identifiable costs paid to third party providers as well as any retention bonuses or severance payment made in conjunction with these initiatives. The amounts do not include costs of additional staffing required to be maintained or utilized during a period of time in order to complete the initiatives.

	Years Ended December 31,	
	2014	2013
	(In thousands)	
Company Initiatives:		
NCB Acquisition	\$—	\$794
CVB Merger	—	220
Valley Acquisition	443	2,118
Core system conversion	40	842
Consolidation of existing branches	11	238
Washington Banking Merger	9,094	890
Total	\$9,588	\$5,102

Table of Contents

The following table further segregates the Company initiative costs by financial statement caption.

Expense Caption:	Years Ended December 31,	
	2014	2013
	(In thousands)	
Compensation and employee benefits	\$ 1,522	\$475
Occupancy and equipment	602	1,328
Data processing	3,038	1,291
Marketing	140	34
Professional services	3,751	1,876
Other expense	535	98
Total	\$9,588	\$5,102

The types of expenses associated with the significant expense categories in the table above are summarized as follows:

• Compensation and employee benefits expense consisted substantially of retention bonus and severances packages paid to transition employees.

• Occupancy and equipment expense consisted primarily of lease termination costs.

• Data processing expense consisted of costs relating to the Company's core system conversion as well as data conversions of the NCB, Valley Bank and Whidbey Island Bank information to the Heritage core system.

• Professional services expense related to fees paid to: (1) financial advisors for the NCB Acquisition, Valley Acquisition and Washington Banking Merger, (2) attorney, accountant and consultant fees related to mergers and acquisitions, and (3) consultant fees relating to the Company's core system conversion.

Other expense increased \$4.3 million, or 89.9%, to \$9.1 million for the year ended December 31, 2014 from \$4.8 million for the year ended December 31, 2013. Other expense includes, but is not limited to, items such as courier services, phone costs, travel expenses, investor relations, and certain employee-related costs such as travel and meals. The increases in other expense are primarily as a result of the Washington Banking Merger and the general increase due to the growth of the Company during the year ended December 31, 2014 which is demonstrated by the increase in total assets to \$3.46 billion at December 31, 2014 from \$1.66 billion at December 31, 2013.

The efficiency ratio for the year ended December 31, 2014 was 75.3% compared to 76.9% for the same period in the prior year. The decrease in the ratio for the year ended December 31, 2014 was primarily related to the increase in net interest income related to mergers and acquisitions as described above which outpaced the increase in the noninterest expense as described above.

Income Tax Expense. The provision for income taxes increased by \$2.3 million to an expense of \$6.9 million for the year ended December 31, 2014 from an expense of \$4.6 million for the year ended December 31, 2013. The Company's effective income tax rate was 24.7% for the year ended December 31, 2014 compared to 32.4% for the same period in 2013. The decrease in the Company's effective income tax rate from the prior year was primarily due to higher levels of tax-exempt income in 2014, \$812,000 in federal tax credits from new market tax credit partnerships and a \$728,000 income tax benefit related to the reversal of a liability previously recognized in conjunction with the Washington Banking Merger.

Liquidity and Capital Resources

Our primary sources of funds are customer and local government deposits, loan principal and interest payments, loan sales, interest earned on and proceeds from sales and maturities of investment securities. These funds, together with retained earnings, equity and other borrowed funds, are used to make loans, acquire investment securities and other assets, and fund continuing operations. While maturities and scheduled amortization of loans are a predictable source of funds, deposit flows and loan prepayments are greatly influenced by the level of interest rates, economic conditions, and competition.

We must maintain an adequate level of liquidity to ensure the availability of sufficient funds to fund loan originations and deposit withdrawals, satisfy other financial commitments, and fund operations. We generally maintain sufficient

cash and investments to meet short-term liquidity needs. At December 31, 2015, cash and cash equivalents

55

Table of Contents

totaled \$126.6 million, or 3.5% of total assets. Other interest earning deposits totaled \$6.7 million at December 31, 2015. These assets are easily converted to liquidity. Investment securities available for sale totaled \$811.9 million at December 31, 2015, of which \$246.5 million were pledged to secure public deposits, borrowing arrangements or repurchase agreements. Management considers unpledged investment securities available for sale to be a viable source of liquidity. The fair value of investment securities available for sale that were not pledged to secure public deposits, borrowing arrangements or repurchase agreements totaled \$565.4 million, or 15.5% of total assets at December 31, 2015. The fair value of investment securities available for sale with maturities of one year or less amounted to \$8.0 million, or 0.2% of total assets. At December 31, 2015, the Bank maintained credit facilities with the FHLB of Des Moines for \$626.9 million and credit facilities with the Federal Reserve Bank of San Francisco for \$51.9 million, of which there were no borrowings outstanding as of December 31, 2015. The Bank also maintains advance lines with Wells Fargo Bank, US Bank, TIB and Pacific Coast Bankers' Bank to purchase federal funds totaling \$90.0 million as of December 31, 2015. As of December 31, 2015, there were no overnight federal funds purchased.

During 2015 total assets increased \$193.0 million, or 5.6%, to \$3.65 billion at December 31, 2015 from \$3.46 billion at December 31, 2014. The increase was primarily due to a \$148.9 million, or 6.7%, increase in total loans receivable, net. The asset balances at December 31, 2015 and 2014 and the changes in those balances are included in the following table:

	December 31, 2015	December 31, 2014	Change 2015 vs. 2014	Percent Change 2015 vs. 2014	
	(Dollars in thousands)

Total assets	\$3,650,792	\$3,457,750	\$193,042	5.6	%

Our strategy has been to acquire core deposits (which we define to include all deposits except public funds, brokered CDs and other wholesale deposits) from our retail accounts, acquire noninterest bearing demand deposits from our commercial customers and use our available borrowing capacity to fund growth in assets. We anticipate that we will continue to rely on the same sources of funds in the future and use those funds primarily to make loans and purchase investment securities.

Stockholders' equity was \$470.0 million at December 31, 2015 and \$454.5 million at December 31, 2014. During the year ended December 31, 2015, we recognized net income of \$37.5 million, paid common stock dividends of \$15.9 million, recorded \$819,000 in other comprehensive loss, repurchased \$7.7 million in common stock, recorded restricted stock compensation expense, including excess tax benefits, totaling \$1.7 million and realized the effects of exercising stock options totaling \$765,000.

The Company and the Bank are subject to various regulatory capital requirements as prescribed by the Federal Reserve and by the FDIC, respectively. As of December 31, 2015, the Company and the Bank were classified as "well capitalized" institutions under the criteria established by these banking regulators.

Quarterly, the Company reviews the potential payment of cash dividends to common shareholders. The timing and amount of cash dividends paid on our common stock depends on the Company's earnings, capital requirements,

56

Table of Contents

financial condition and other relevant factors. Dividends on common stock from the Company depend substantially upon receipt of dividends from the Bank, which is the Company's predominant sources of income. On January 27, 2016, the Company's Board of Directors declared a dividend of \$0.11 per share which was paid on February 24, 2016 to shareholders of record as of February 10, 2016.

Contractual Obligations

The following table provides the amounts due under specified contractual obligations for the periods indicated as of December 31, 2015:

	December 31, 2015					Total
	Up to 1 year	Over 1-3 years	Over 3-5 years	More than 5 years	Other (1)	
	(In thousands)					
Contractual payments by period:						
Deposits	\$279,302	\$105,842	\$35,101	\$88	\$2,687,954	\$3,108,287
Junior subordinated debentures	—	—	—	25,000	—	25,000
Operating leases	3,503	6,079	4,124	3,414	—	17,120
Total contractual obligations	\$282,805	\$111,921	\$39,225	\$28,502	\$2,687,954	\$3,150,407

(1) Represents interest bearing and noninterest bearing checking, money market and checking accounts which can generally be withdrawn on demand and thereby have an undefined maturity.

Asset/Liability Management

Our primary financial objective is to achieve long-term profitability while controlling our exposure to fluctuations in market interest rates. To accomplish this objective, we have formulated an interest rate risk management policy that attempts to manage the mismatch between asset and liability maturities while maintaining an acceptable interest rate sensitivity position. The principal strategies which we employ to control our interest rate sensitivity are: originating certain commercial business loans and real estate construction and land development loans at variable interest rates repricing for terms generally one year or less; and offering noninterest bearing demand deposit accounts to businesses and individuals. The longer-term objective is to increase the proportion of noninterest bearing demand deposits, low-rate interest bearing demand deposits, money market accounts, and savings deposits relative to certificates of deposit to reduce our overall cost of funds.

Our asset and liability management strategies have resulted in a negative 0-3 month "gap" of 275.4% and a negative over 3-12 month "gap" of 4.0% as of December 31, 2015. These "gaps" measure the difference between the dollar amount of our interest earning assets and interest bearing liabilities that mature or reprice within the designated period (three months and over 3-12 months) as a percentage of total interest earning assets, based on certain estimates and assumptions as discussed below. We believe that the implementation of our operating strategies has reduced the potential effects of changes in market interest rates on our results of operations. The negative gap for the 0-3 month period indicates that decreases in market interest rates may favorably affect our results over that period.

The following table provides the estimated maturity or repricing and the resulting interest rate sensitivity gap of our interest earning assets and interest bearing liabilities at December 31, 2015. We used certain assumptions in presenting this data so the amounts may not be consistent with other financial information prepared in accordance with generally accepted accounting principles. The amounts in the tables also could be significantly affected by external factors, such as changes in prepayment assumptions, early withdrawal of deposits and competition.

Table of Contents

assets

Cumulative interest rate sensitivity gap	\$(1,502,070)	\$(1,509,422)	\$(378,034)	\$594,022	\$906,675
Cumulative interest rate sensitivity gap, as a percentage of total interest earning assets	(45.7)%	(45.9)%	(11.5)%	18.1 %	27.6 %

(1) Excludes deferred loan costs (fees), net and allowance for loan losses.

(2) Interest earning investment securities with no stated maturity date are included in 0-3 months as prices may adjust immediately.

(3) Adjustable-rate liabilities are included in the period in which interest rates are next scheduled to adjust rather than in the period they are due to mature. Although regular savings, demand, NOW, and money market deposit accounts are subject to immediate withdrawal, based on historical experience management considers a substantial amount of such accounts to be core deposits having significantly longer maturities.

Certain shortcomings are inherent in the method of analysis presented in the foregoing table. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on some types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market interest rates. Additionally, some assets, such as adjustable rate mortgages, have features, which restrict changes in the interest rates of those assets both on a short-term basis and over the lives of such assets. Further, if a change in market interest rates occurs, prepayment and early withdrawal levels could deviate significantly from those assumed in calculating the tables. Finally, the ability of many borrowers to service their adjustable rate debt may decrease if market interest rates increase substantially.

Table of Contents

Impact of Inflation and Changing Prices

Inflation affects our operations by increasing operating costs and indirectly by affecting the operations and cash flow of our customers. Unlike most industrial companies, virtually all the assets and liabilities of a financial institution are monetary in nature. As a result, changes in interest rates generally have a more significant impact on a financial institution's performance than the effects of general levels of inflation. Although interest rates do not necessarily move in the same direction or the same extent as the prices of goods and services, increases in inflation generally have resulted in increased interest rates.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to interest rate risk through our lending and deposit gathering activities. For a discussion of how this exposure is managed and the nature of changes in our interest rate risk profile during the past year, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Asset/Liability Management." Neither we, nor the Bank, maintain a trading account for any class of financial instrument, nor do we, or the Bank, engage in hedging activities or purchase high risk derivative instruments. Moreover, neither we, nor the Bank, are subject to foreign currency exchange rate risk or commodity price risk.

The table below provides information about our financial instruments that are sensitive to changes in interest rates as of December 31, 2015. The table presents principal cash flows and related weighted average interest rates by expected maturity dates. The expected maturity is the contractual maturity or earlier call date of the instrument. The data in this table may not be consistent with the amounts in the preceding table, which represents amounts by the estimated repricing date or maturity date, whichever occurs sooner.

Table of Contents

By Expected Maturity Date Year Ended December 31, 2015

(1) Balances represent carrying value, and excludes investment securities with no stated maturity.

(2) Excludes deferred loan costs (fees), net and allowance for loan losses.

The contractual interest rate of the junior subordinated debentures was 2.17% at December 31, 2015. The weighted (3) average interest rate includes the effects of the discount accretion for the Washington Banking Merger purchase accounting adjustment.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Heritage Financial Corporation and Subsidiaries
Olympia, Washington

We have audited the accompanying consolidated statements of financial condition of Heritage Financial Corporation and subsidiaries (the “Company”) as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2015. We also have audited the Company’s internal control over financial reporting as of December 31, 2015, based on criteria established in the 2013 Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for

Table of Contents

its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Heritage Financial Corporation and subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2015 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in the 2013 Internal Control – Integrated Framework issued by COSO.

HERITAGE FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the Years Ended December 31, 2015, 2014 and 2013

(1) Description of Business, Basis of Presentation, Significant Accounting Policies and Recently Issued Accounting Pronouncements

(a) Description of Business

Heritage Financial Corporation ("Heritage" or the "Company") is a bank holding company that was incorporated in the State of Washington in August 1997. The Company is primarily engaged in the business of planning, directing and coordinating the business activities of its wholly-owned subsidiary, Heritage Bank (the "Bank"). The Bank is a Washington-chartered commercial bank and its deposits are insured by the FDIC. The Bank is headquartered in Olympia, Washington and conducts business from its 67 branch offices as of December 31, 2015 located throughout Washington State and the greater Portland, Oregon area. The Bank's business consists primarily of commercial lending and deposit relationships with small businesses and their owners in its market areas and attracting deposits from the general public. The Bank also makes real estate construction and land development loans and consumer loans and originates first mortgage loans on residential properties primarily located in its market area.

The Company has expanded its footprint through mergers and acquisitions. The largest of these transactions was the strategic merger with Washington Banking Company ("Washington Banking") and its wholly owned subsidiary bank, Whidbey Island Bank ("Whidbey"). Effective May 1, 2014, Washington Banking merged with and into Heritage and Whidbey merged with and into Heritage Bank and this transaction is referred to herein as the "Washington Banking Merger". In connection with the Washington Banking Merger, Heritage also acquired as a subsidiary the Washington Banking Master Trust, a Delaware statutory business trust ("Master Trust"). Pursuant to the merger agreement, Heritage assumed the performance and observance of the covenants to be performed by Washington Banking under an indenture relating to \$25.0 million in trust preferred securities issued in 2007 and the due and punctual payment of the principal of and premium and interest on such trust preferred securities. For additional information, see Note (11) Junior Subordinated Debentures.

(b) Basis of Presentation

The accounting and reporting policies of the Company and its subsidiaries conform to U.S. Generally Accepted Accounting Principles ("GAAP"). In preparing the Consolidated Financial Statements management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting periods. Actual results could differ from these estimates.

The accompanying Consolidated Financial Statements include the accounts of the Company and its wholly owned subsidiary, the Bank. All significant intercompany balances and transactions among the Company and the Bank have been eliminated in consolidation.

For financial reporting purposes, the Company's investment in the Master Trust is accounted for under the equity method and is included in prepaid expenses and other assets on the Company's Consolidated Statements of Financial Condition. The junior subordinated debentures issued and guaranteed by the Company and held by the Master Trust are reflected as liabilities on the Company's Consolidated Statements of Financial Condition.

Certain prior year amounts have been reclassified to conform to the current year's presentation. Specifically, the Company has eliminated the classification of "noncovered" and "covered" loans from the Consolidated Financial Statements based on the termination of the FDIC shared-loss agreements during the year ended December 31, 2015. For more information on the termination agreement, see Note (6) FDIC Indemnification Asset. Accordingly, all loans receivable previously reported as "noncovered" and those previously reported as "covered" by FDIC shared-loss agreements have been combined and reclassified as "loans receivable" for all periods presented. Reclassifications had no effect on the prior years' net income or stockholders' equity.

Table of Contents

(c) Significant Accounting Policies

Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents includes cash on hand and in banks, interest earning deposits with original maturities of 90 days or less, and federal funds sold. Net cash flows are reported for customer loan and deposit transactions, other interest bearing deposits, federal funds sold and repurchase agreements.

Investment Securities

The Company identifies investments as held to maturity or available for sale at the time of acquisition. Securities are classified as held to maturity when the Company has the ability and positive intent to hold them to maturity. Securities classified as available for sale are available for future liquidity requirements and may be sold prior to maturity. During the year ended December 31, 2015, the Company transferred all of its investment securities classified as held to maturity to available for sale. See Note (3) Investment Securities for additional information.

Investment securities held to maturity were recorded at amortized cost. Securities available for sale are carried at fair value. Interest income includes amortization of purchase premiums or accretion of purchase discounts using the interest method. Unrealized gains and losses on securities available for sale are generally excluded from earnings and are reported in other comprehensive income (loss), net of related income taxes. Realized gains and losses on sale of investment securities are computed on the specific identification method. Transfers of securities between the available for sale and held to maturity categories are accounted for at fair value.

Management evaluates securities for other-than-temporary impairment (“OTTI”) on at least a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Although these evaluations involve significant judgment, an unrealized loss in the fair value of a debt security is generally deemed to be temporary when the fair value of the security is below the carrying value primarily due to changes in interest rates, there has not been significant deterioration in the financial condition of the issuer, and it is not more likely than not that the Company will be required to, nor does it have the intent to sell the security before the anticipated recovery of its remaining carrying value. If any of these criteria is not met, the impairment is split into two components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement and 2) OTTI related to other factors, which is recognized in other comprehensive income (loss). The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. If any of these criteria are not met, the entire difference between amortized cost and fair value is recognized as impairment through earnings, and a new cost basis is established for the security. Continued deterioration of market conditions could result in additional impairment losses recognized within the investment portfolio.

Other factors that may be considered in determining whether a decline in the value of either a debt or an equity security is “other than temporary” include ratings by recognized rating agencies; actions of commercial banks or other lenders relative to the continued extension of credit facilities to the issuer of the security; the financial condition, capital strength and near-term prospects of the issuer and recommendations of investment advisors or market analysts.

Loans Held for Sale

Mortgage loans held for sale are carried at the lower of amortized cost or fair value by loan type. Any loan that management does not have the intent and ability to hold for the foreseeable future or until maturity or payoff is classified as held for sale at the time of origination, purchase or securitization, or when such decision is made.

Unrealized losses on such loans are recorded as a valuation allowance and included in income.

Loans Receivable and Loan Commitments

Loans receivable include loans originated by the Bank as well as loans acquired in business combinations. Loans acquired in a business combination are designated as “purchased” loans. These loans are recorded at their fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date.

Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“FASB ASC”) 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. These loans are identified as purchased credit impaired (“PCI”) loans. In situations where such loans

have similar risk characteristics, loans may be aggregated into pools to estimate cash flows. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. Expected cash flows at the acquisition date in excess of the fair value of loans are considered to be accretable yield, which is recognized as interest income over the life of the loan or pool using a level yield method if the timing and amount of the future cash flows of the loan or pool is reasonably estimable.

Table of Contents

The cash flows expected over the life of the PCI loan or pool are estimated quarterly using an internal cash flow model that projects cash flows and calculates the carrying values of the loans or pools, book yields, effective interest income and impairment, if any, based on loan or pool level events. Assumptions as to default rates, loss severity and prepayment speeds are utilized to calculate the expected cash flows. To the extent actual or projected cash flows are less than previously estimated, additional provisions for loan losses on the purchased loan portfolios will be recognized immediately into earnings. To the extent actual or projected cash flows are more than previously estimated, the increase in cash flows is recognized immediately as a recapture of provision for loan losses up to the amount of any provision previously recognized for that loan or pool, if any, then prospectively recognized in interest income as a yield adjustment. Any disposals of a loan in a pool, including sale of a loan, payment in full or foreclosure results in the removal of the loan from the loan pool at the carrying amount.

Loans accounted for under FASB ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, PCI loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income may be recognized on a cash basis or all cash payments may be accounted for as a reduction of the principal amount outstanding.

Loans purchased that are not accounted for under FASB ASC 310-30 are accounted for under FASB ASC 310-20, Receivables—Nonrefundable fees and Other Costs. These loans are identified as non-PCI loans, and are initially recorded at their fair value, which is estimated using an internal cash flow model and assumptions similar to the FASB ASC 310-30 loans. The difference between the estimated fair value and the unpaid principal balance at acquisition date is recognized as interest income over the life of the loan using an effective interest method for non-revolving credits or a straight-line method, which approximates the effective interest method, for revolving credits. Any unrecognized discount for a loan that is subsequently repaid will be recognized immediately into income.

Loans are generally recorded at the unpaid principal balance, net of premiums, unearned discounts and net deferred loan origination fees and costs. The premiums and unearned discounts may include values determined in purchase accounting. Interest on loans is calculated using the simple interest method based on the daily balance of the principal amount outstanding and is credited to income as earned. Loans are considered past due or delinquent when principal or interest payments are past due 30 days or more.

Covered Loans:

Purchased loans subject to FDIC shared-loss agreements were historically identified as “covered” on the Consolidated Financial Statements. The FDIC shared-loss agreements were terminated during the year ended December 31, 2015 and as such the covered designation was removed. For further information see Note (6) FDIC Indemnification Asset. The covered loans included the majority of loans from the Company's acquisition of Cowlitz Bank and certain loans from the Washington Banking Merger, which included loans from Washington Banking's acquisitions of City Bank and North County Bank. The same accounting principles that apply to loans receivable applied to covered loans receivable, with the added benefit of shared-loss agreements.

Nonaccrual Loans:

Loans on which the accrual of interest has been discontinued are designated as nonaccrual loans. Delinquent loans may remain on accrual status between 30 days and 89 days past due. The accrual of interest is generally discontinued at the time the loan is 90 days delinquent unless the credit is well secured and in the process of collection. Loans are placed on nonaccrual at an earlier date if collection of the contractual principal or interest is doubtful. All interest accrued but not collected on loans deemed nonaccrual during the period is reversed against interest income in that period. The interest payments received on nonaccrual loans are generally accounted for on the cost-recovery method whereby the interest payment is applied to the principal balances. Loans may be returned to accrual status when improvements in credit quality eliminate the doubt as to the full collectability of both interest and principal and a period of sustained performance has occurred. Substantially all loans that are nonaccrual are also considered impaired. Income recognition on impaired loans conforms to that used on nonaccrual loans.

Loans are charged-off if collection of the contractual principal or interest as scheduled in the loan agreement is doubtful. The Company's policies for placing loans on nonaccrual status, recording payments received on nonaccrual loans, resuming accrual of interest, determining past due or delinquency status and charging off uncollectible loans generally do not differ by loan segments or classes. However, credit card loans and other consumer loans are typically charged-off no later than 180 days past due.

70

Table of Contents

Impaired Loans:

A loan is considered impaired when, based on current information and events, it is probable the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrowers, including length of the delay, the reasons for the delay, the borrower's prior payment record, and the amounts of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient the loan's observable market price or the fair value of the collateral (less cost to sell) if the loan is collateral dependent. Income recognition on impaired loans conforms to that used on nonaccrual loans.

Troubled Debt Restructures:

A troubled debt restructured loan ("TDR") is a restructuring in which the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to a borrower that it would not otherwise consider. These concessions may include changes of the interest rate, forbearance of the outstanding principal or accrued interest, extension of the maturity date, delay in the timing of the regular payment, or any other actions intended to minimize potential losses. The Bank does not forgive principal for a majority of its TDRs, but in those situations where principal is forgiven, the entire amount of such principal forgiveness is immediately charged off to the extent not done so prior to the modification. The Bank also considers insignificant delays in payments when determining if a loan should be classified as a TDR.

The Company has implemented more stringent definitions of concessions and impairment measures for PCI loans which are not in pools as these loans have known credit deteriorations and are generally accreting income at a lower discounted rate as compared to the contractual note rate based on the guidance of FASB ASC 310-30. Modifications of PCI loans which are not in pools are considered TDRs if they result in a decrease in expected cash flows when compared to the pre-modification expected cash flows, without any other changes to the agreement to consider. A loan that has been placed on nonaccrual status that is subsequently restructured will usually remain on nonaccrual status until the borrower is able to demonstrate repayment performance in compliance with the restructured terms for a sustained period, typically for six months. A restructured loan may return to accrual status sooner based on other significant events or mitigating circumstances. A loan that has not been placed on nonaccrual status may be restructured and such loan may remain on accrual status after such restructuring. In these circumstances, the borrower has made payments before the restructuring and is expected to continue to perform after the restructuring. Generally, this type of restructuring involves a reduction in the loan interest rate and/or a change to interest-only payments for a period of time. The restructured loan is considered impaired despite the accrual status and a specific valuation allowance, if any, is calculated in the manner previously described.

A TDR is considered defaulted if, during the 12-month period after the restructure, the loan has not performed in accordance to the restructured terms. Defaults include loans whose payments are 90 days or more past due and loans whose revised maturity date passed and no further modifications will be granted for that borrower.

A loan may subsequently be excluded from the TDR disclosures if: (i) the restructured interest rate was greater than or equal to the interest rate of a new loan with comparable risk at the time of the restructure, and (ii) the loan is no longer impaired based on the terms of the restructured agreement. The Bank's policy is that the borrower must demonstrate a sustained period, typically six consecutive months, of payments in accordance with the modified loan before it can be reviewed for removal from the TDR disclosure under the second criteria. However, the loan must be reported as a TDR in at least one annual report on Form 10-K. Once a loan has been classified as a TDR, it will continue to be disclosed as an impaired loan until paid off or charged-off, even if the loan subsequently is no longer disclosed as a TDR.

Unfunded Loan Commitments:

Unfunded loan commitments are generally related to the unused portion of the total commitment of a loan or providing credit facilities to clients of the Bank and are not actively traded financial instruments. These unfunded commitments are disclosed as financial instruments with off-balance sheet risk in Note (15) Commitments and Contingencies and Note (19) Fair Value in the Notes to Consolidated Financial Statements.

Table of Contents

Loan Fees and Costs

Loan origination fees and certain direct origination costs are deferred and amortized as an adjustment of the yields of the loans over their contractual lives, adjusted for prepayment of the loans, using the effective interest method or the straight-line method, when the straight-line method approximates the effective interest method. In the event loans are sold, the unamortized net deferred loan origination fees or costs are recognized as a component of the gains or losses on the sales of loans.

Allowance for Loan Losses

Allowance for Loan Losses:

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance for loan losses on loans designated as non-PCI loans is similar to the methodology described below except that for non-PCI loans, the remaining unaccreted discounts resulting from the fair value adjustments recorded at the time the loans were purchased are additionally factored into the allowance methodology. The allowance for loan losses on PCI loans is described in the "Allowance for Loan Losses on Purchased Credit Impaired Loans" section below. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses from risks inherent in the loan portfolio. The Company's allowance for loan losses methodology includes allowance allocations calculated in accordance with FASB ASC 310, Receivables and allowance allocations calculated in accordance with FASB ASC 450, Contingencies. Accordingly, the methodology is based on historical loss experience by type of credit and internal risk grade, specific homogeneous risk pools and specific loss allocations, with adjustments for current events and conditions. The Company's process for determining the appropriate level of the allowance for loan losses is designed to account for credit deterioration as it occurs. The provision for loan losses reflects loan quality trends, including the levels of and trends related to nonaccrual loans, past due loans, potential problem loans, criticized loans and net charge-offs or recoveries, among other factors. The provision for loan losses also reflects all actions taken on all loans for a particular period. Therefore, the amount of the provision reflects not only the necessary increases in the allowance for loan losses related to newly identified criticized loans, but it also reflects actions taken related to other loans including, among other things, any necessary increases or decreases in specific valuation allowances for impaired loans or loan pools. Losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The level of the allowance reflects management's continuing evaluation of known and inherent risks in the loan portfolio. Portions of the allowance may be allocated for specific credits; however, the entire allowance is available for any credit that, in management's judgment, should be charged off.

Loans which management determines are impaired are individually evaluated for impairment, and specific valuation allowances are recorded, if any, on these loans based on the methodology previously described. Loans that are determined not to meet management's definition of impaired are collectively evaluated for impairment based on (i) historical loss factors determined in accordance with FASB ASC 450 based on historical loan loss experience for similar loans with similar characteristics and trends; and (ii) environmental loss factors that reflect the impact of current conditions, as determined in accordance with FASB ASC 450 based on general economic conditions and other qualitative risk factors both internal and external to the Company. The historical loss factors and environmental loss factors are combined and multiplied against the outstanding principal balances of loans in pools of similar loans with similar characteristics.

The Company evaluates specific loans for credit quality indicators and performs regular analysis and evaluation of problem loans. Loans are classified based on an internal credit risk grading process that evaluates, among other things: (i) the obligor's ability to repay; (ii) the underlying collateral, if any; and (iii) the economic environment and industry in which the borrower operates. This analysis is performed at the loan officer level for all loans. When a loan is performing but has an assigned risk grade other than pass, the loan officer analyzes the loan to determine an appropriate monitoring and collection strategy. When a loan is nonperforming or has been classified as a nonaccrual loan, a member from the special assets department will analyze the loan to determine if it is impaired. If the loan is considered impaired, the special assets department will evaluate the need for a specific valuation allowance on the

loan. Specific valuation allowances are determined by analyzing the borrower's ability to repay amounts owed, collateral deficiencies and economic conditions affecting the borrower's industry, among other things. Historical loss factors are calculated based on the historical loss experience and recovery experience of specific classes of loans. The Company calculates historical loss ratios for the classes of loans based on the proportion of actual charge-offs and recoveries experienced to the total loans in the pool for a rolling twelve quarter average.

Table of Contents

Environmental loss factors are based on general economic conditions and other qualitative risk factors both internal and external to the Company. In general, such valuation allowances are determined by evaluating, among other things: (i) levels of and trends in delinquencies and impaired loans; (ii) levels of and trends in charge-offs and recoveries; (iii) trends in volume and terms of loans (iv) effects of changes in risk selection and underwriting standards, and other changes in lending policies, procedures, and practices; (v) experience, ability, and depth of lending management and other relevant staff; (vi) national and local economic trends and conditions; (vii) other external factors such as competition, legal, and regulatory; (viii) effects of changes in credit concentrations, and (ix) other factors.

Management evaluates the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis. Each component is determined to be on a scale of risk. The results are then utilized in a matrix to determine an appropriate environmental loss factor for each class of loan. An additional environmental factor is added after the calculated matrix factor if the specific loan is risk graded worse than a rating of "watch".

The allowance for loan losses evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available. While management utilizes its best judgment and information available to recognize losses on loans, future additions to the allowance may be necessary based on declines in local and national economic conditions. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to make adjustments to the allowance based on their judgments about information available to them at the time of their examinations. The Company believes the allowance for loan losses is appropriate given all of the above considerations.

Allowance for Loan Losses on Purchased Credit Impaired Loans:

The PCI loans acquired in the Company's mergers and acquisitions are subject to the Company's internal and external credit review. Under the accounting guidance of FASB ASC 310-30, the allowance for loan losses on PCI loans is measured at each financial reporting period, or measurement date, based on expected cash flows. If and when credit deterioration, or decreases in expected cash flows initially estimated, occurs subsequent to the acquisition date, a provision for loan losses will be charged to earnings as of the measurement date. Prior to the termination of the FDIC shared-loss agreements, a provision for loan losses on PCI loans was charged to earnings for the full amount without regard to the FDIC shared-loss agreements, and the portion of the loss reimbursable from the FDIC was recorded in noninterest income and increased the FDIC indemnification asset.

Allowance for Losses on Unfunded Commitments:

The Bank is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the disbursed amounts recognized in the Consolidated Statements of Financial Condition. The Company has a policy in which it evaluates the risk on a quarterly basis, and provides for an allowance for credit losses, as necessary. The methodology is similar to the allowance for loan losses, and includes an estimate of the probability of drawdown of the loan commitment. Based on its analysis, the Company has recorded an allowance for off-balance sheet financial instruments of \$170,000 as of both December 31, 2015 and 2014. This allowance is reported within accrued expenses and other liabilities on the Company's Consolidated Statements of Financial Condition.

Mortgage Banking Operations

Prior to the second quarter of 2013 and since the second quarter 2014, the Company sells one-to-four family residential loans on a servicing released basis and recognizes a cash gain or loss. A cash gain or loss is recognized to the extent that the sales proceeds of the loans sold differ from the net book value at the time of sale. Income from one-to-four family residential loans brokered to other lenders is recognized into income on date of loan closing. Commitments to sell one-to-four family residential loans are made primarily during the period between the taking of the loan application and the closing of the loan. The timing of making these sale commitments is dependent upon the timing of the borrower's election to lock-in the mortgage interest rate and fees prior to loan closing. Most of these sale commitments are made on a best-efforts basis whereby the Bank is only obligated to sell the loan if the loan is approved and closed by the Bank. Commitments to fund one-to-four family residential loans (interest rate locks) to be

sold into the secondary market and forward commitments for the future delivery of these loans are accounted for as free standing derivatives. Fair values of these mortgage derivatives are estimated based on changes in mortgage interest rates between the date the interest on the loan was locked and the balance sheet date. The Company enters into forward commitments for the future delivery of one-to-four family residential loans when interest rate locks are entered into, in order to hedge the interest rate risk resulting from its commitments to fund the loans. Changes in the fair values of these derivatives are included in other income. The fair value of these derivative instruments was not significant at December 31, 2015 and 2014.

Table of Contents

FDIC Indemnification Asset

The FDIC indemnification asset represented the present value of the estimated losses on loans to be reimbursed by the FDIC. The termination of the FDIC shared-loss agreements during the year ended December 31, 2015 eliminated this asset. See Note (6) FDIC Indemnification Asset for further information on the termination agreement.

The FDIC indemnification asset was measured at estimated fair value at acquisition dates on the same basis as the loans. The present value was calculated using the shorter of the shared-loss agreement terms or the life of the loan. Under the terms of the FDIC shared-loss agreements, the FDIC absorbed 80% of losses and received 80% of loss recoveries for the loans during the terms of the agreements. Certain shared-loss agreements had loss minimums or tranches which reduced the shared-loss percentages during the coverage period. The FDIC indemnification asset was reduced as losses were recognized on loans and shared-loss payments were received from the FDIC. Since the FDIC indemnification asset was initially recorded at estimated fair value using a discount rate, a portion of the discount was accreted into noninterest income during each reporting period.

The FDIC indemnification asset was evaluated quarterly. Realized losses in excess of prior estimates immediately increased the FDIC indemnification asset by a credit to noninterest income. Conversely, if realized losses were less than prior estimates, the FDIC indemnification asset was reduced by a charge to noninterest income on a prospective basis, and any change in value was limited to the contractual terms of the shared-loss agreements.

Other Real Estate and Other Assets Owned

Other real estate acquired by the Company in satisfaction of debt is held for sale and recorded at fair value at time of foreclosure. When property is acquired, it is recorded at the estimated fair value (less the costs to sell) at the date of acquisition, not to exceed net realizable value, and any resulting write-down is charged to the allowance for loan losses. After acquisition, all costs incurred in maintaining the property are expensed. Costs relating to the development and improvement of the property, however, are capitalized to the extent of the property's net realizable value.

Premises and Equipment

Premises and equipment, including leasehold improvements, are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets or the lease period, whichever is shorter. The estimated useful lives used to compute depreciation and amortization for buildings and building improvements is 15 to 39 years; and for furniture, fixtures and equipment is three to seven years. The Company reviews buildings, leasehold improvements and equipment for impairment whenever events or changes in the circumstances indicate that the undiscounted cash flows for the property are less than its carrying value. If identified, an impairment loss is recognized through a charge to earnings based on the fair value of the property.

Bank Owned Life Insurance

The Company has bank owned life insurance ("BOLI"), of which \$32.5 million was acquired in the Washington Banking Merger at May 1, 2014. These policies insure the lives of certain current or former Bank officers or former Whidbey officers, and name the Bank as beneficiary. Noninterest income is generated tax-free (subject to certain limitations) from the increase in the policies' underlying investments made by the insurance company. The Bank utilizes BOLI to partially offset costs associated with employee compensation and benefit programs with the earnings on the BOLI. The Company records BOLI at the amount that can be realized under the insurance contract at the statement of financial condition date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Other Intangible Assets

The other intangible assets represents the core deposit intangible ("CDI") acquired in business combinations. The fair value of the CDI stemming from any given business combination is based on the present value of the expected cost savings attributable to the core deposit funding, relative to an alternative source of funding. The CDI is amortized over an estimated useful life which approximates the existing deposit relationships acquired on an accelerated method. The Company evaluates such identifiable intangibles for impairment when an indication of impairment exists.

Goodwill

The Company's goodwill represents the excess of the purchase price over the fair value of net assets acquired in acquisitions. In accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Update

("ASU" or "Update") 2011-08 Intangibles – Goodwill and Other (Topic 350), an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. In other words, before the first step of the existing guidance, the entity has the option to first assess

Table of Contents

qualitative factors to determine whether the existence of events or circumstances leads to a determination that the fair value of goodwill is less than carrying value. The qualitative assessment includes adverse events or circumstances identified that could negatively affect the reporting units' fair value as well as positive and mitigating events. Such indicators may include, among others: a significant change in legal factors or in the general business climate; significant change in the Company's stock price and market capitalization; unanticipated competition; and an action or assessment by a regulator. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step process is unnecessary. The entity has the option to bypass the qualitative assessment step for any reporting unit in any period and proceed directly to the first step of the two-step process. The entity can resume performing the qualitative assessment in any subsequent period.

The first step of the goodwill impairment test is performed, when considered necessary, by comparing the reporting unit's aggregate fair value to its carrying value. Absent other indicators of impairment, if the aggregate fair value exceeds the carrying value, goodwill is not considered impaired and no additional analysis is necessary. If the carrying value of the reporting unit were to exceed the aggregate fair value, a second step would be performed to measure the amount of impairment loss, if any. To measure any impairment loss the implied fair value would be determined in the same manner as if the reporting unit were being acquired in a business combination. If the implied fair value of goodwill is less than the recorded goodwill, an impairment charge would be recorded for the difference.

Income Taxes

The Company and the Bank file a United States consolidated federal income tax return and an Oregon State income tax return. Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates applicable to taxable income in the periods in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. A valuation allowance, if needed, reduces deferred tax assets to the amounts expected to be realized. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded.

The Company's policy is to recognize interest and penalties on unrecognized tax benefits in "income taxes" in the Consolidated Statements of Income as the amounts are generally insignificant each year.

Stock-Based Compensation

The Company maintains a number of stock-based incentive programs, which are discussed in more detail in Note (20) Stock-Based Compensation. Compensation cost is recognized for stock options and restricted stock awards issued to employees and directors, based on the fair value of these awards at the date of grant. The Company did not grant stock option awards for the years ended December 31, 2015, 2014 or 2013, other than the options granted in 2014 as part of the Washington Banking Merger. The fair value of stock options granted would be estimated on the date of grant using the Black-Scholes-Merton option pricing model. The market price of the Company's common stock at the date of grant is used for the restricted stock awards. Compensation cost is recognized over the requisite service period, generally defined as the vesting period, on a straight-line basis.

Deferred Compensation Plans

The Company has adopted a Deferred Compensation Plan and has entered into arrangements with certain executive officers. Under the Plan, participants are permitted to elect to defer compensation and the Company has the discretion to make additional contributions to the Plan on behalf of any participant based on a number of factors. Such discretionary contributions are generally approved by the Compensation Committee of the Company's Board of Directors. The notional account balances of participants under the Plan earn interest on an annual basis. The applicable interest rate is the Moody's Seasoned Aaa Corporate Bond Yield as of January 1 of each year. Generally, a

participant's account is payable upon the earliest of the participant's separation from service with the Company, the participant's death or disability, or a specified date that is elected by the participant in accordance with applicable rules of the Internal Revenue Code. The Company's obligation to make payments under the Plan is a general obligation of the Company and is to be paid from the Company's general assets. As such, participants are general unsecured creditors of the Company with respect to their participation under the Plan. The Company records a liability within accrued expenses and other liabilities on the Consolidated Statements of Financial Condition and records compensation expense in a

75

Table of Contents

systematic and rationale manner. Since the amounts earned are generally based on the Company's annual performance, the Company records deferred compensation expense each year for an amount calculated based on that year's financial performance.

Earnings per Share

The two-class method is used in the calculation of basic and diluted earnings per common share. Basic earnings per common share is net income allocated to common shareholders divided by the weighted average number of common shares outstanding during the period. All outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities for this calculation. Dividends and undistributed earnings allocated to participating securities are excluded from net income allocated to common shareholders and participating securities are excluded from weighted average common shares outstanding. Diluted earnings per common share includes the dilutive effect of additional potential common shares issuable under stock options. Earnings and dividends per share are restated for all stock splits and stock dividends through the date of issuance of the financial statements.

Derivative Financial Instruments

The Company utilizes interest rate swaps to facilitate the needs of its customers. The Company enters into interest rate swaps that are not designated as hedging instruments. These derivative contracts relate to transactions in which the Company enters into an interest rate swap with a customer while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each swap transaction, the Company agrees to pay interest to the customer on a notional amount at a variable interest rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, the Company agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the Company's customer to effectively convert a variable rate loan to a fixed rate. Because the Company acts as an intermediary for its customer, changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Company's results of operations.

The fair value of derivative positions outstanding is included in prepaid expenses and other assets and accrued expenses and other liabilities in the Company's Consolidated Statements of Financial Condition, and the net change in each of these financial statement line items is included in the Consolidated Statements of Cash Flows. For non-hedging derivative instruments, gains and losses due to changes in fair value and all cash flows are included in other income and other expense in the Company's Consolidated Statements of Income.

Operating Segments

While the Company's chief decision-makers monitor the revenue streams of the various products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Operating segments are aggregated into one as operating results for all segments are similar. Accordingly, all of the financial service operations are considered by management to be aggregated in one reportable operating segment.

(d) Recently Issued Accounting Pronouncements

FASB ASU 2014-09, Revenue from Contracts with Customers, was issued in May 2014. Under this Update, FASB created a new Topic 606 which is in response to a joint initiative of FASB and the International Accounting Standards Board to clarify the principles for recognizing revenue and to develop a common revenue standard for U.S. GAAP and international financial reporting standards that would:

Remove inconsistencies and weaknesses in revenue requirements.

Provide a more robust framework for addressing revenue issues.

Improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets.

Provide more useful information to users of financial statements through improved disclosure requirements.

Simplify the preparation of financial statements by reducing the number of requirements to which an entity must refer.

The Update is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is not permitted. The Company is currently evaluating the impact that

this Update will have on its Consolidated Financial Statements.

76

Table of Contents

FASB ASU 2014-11, Transfers and Servicing: Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures, was issued in June 2014. This Update aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements, such as secured borrowings. The guidance eliminates sale accounting and supersedes the guidance under which a transfer of a financial asset and a contemporaneous repurchase financing could be accounted for on a combined basis as a forward agreement. The Update requires new and expanded disclosures that are effective for interim or annual reporting periods beginning after December 15, 2014, with certain requirements applicable for periods beginning after March 31, 2015. The adoption of this Update did not have a material impact on the Company's Consolidated Financial Statements.

FASB ASU 2014-17, Business Combinations (Topic 805): Pushdown Accounting, was issued in November 2014. The amendments in this Update apply to the separate financial statements of an acquired entity and its subsidiaries that are a business or nonprofit activity (either public or nonpublic) upon the occurrence of an event in which an acquirer (an individual or an entity) obtains control of the acquired entity. An acquired entity may elect the option to apply pushdown accounting in the reporting period in which the change-in-control event occurs. If pushdown accounting is not applied in the reporting period in which the change-in-control event occurs, an acquired entity will have the option to elect to apply pushdown accounting in a subsequent reporting period to the acquired entity's most recent change-in-control event. The amendments in this Update are effective on November 18, 2014. After the effective date, an acquired entity can make an election to apply the guidance to future change-in-control events or to its most recent change-in-control event. This ASU did not have a material impact on the Company's Consolidated Financial Statements.

FASB ASU 2015-16, Business Combinations (Topic 805), was issued in September 2015. Topic 805 requires that an acquirer retrospectively adjust provisional amounts recognized in a business combination, during the measurement period. To simplify the accounting for adjustments made to provisional amounts, the Update requires that the acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amount is determined. The acquirer is required to also record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. In addition, an entity is required to present separately on the face of the income statement or disclose in the notes to the financial statements the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. The Update did not have an impact on the Company's Consolidated Financial Statements as of December 31, 2015.

FASB ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10), was issued in January 2016, to enhance the reporting model for financial instruments to provide users of financial statements with more decision-useful information. This Update contains several provisions, including but not limited to 1) require equity investments, with certain exceptions, to be measured at fair value with changes in fair value recognized in net income; 2) simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; 3) eliminated the requirement to disclose the method(s) and significant assumptions used to estimate fair value ; and 4) require separate presentation of financial assets and liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements. The Update is effective for public entities for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently evaluating the impact that this Update will have on its Consolidated Financial Statements.

FASB ASU 2016-02, Leases (Topic 842), was issued in February 2016, to increase transparency and comparability of leases among organizations and to disclose key information about leasing arrangements. The main difference between previous GAAP and Topic 842 is the lessees' recognition of lease assets and lease liabilities on the balance sheet for those leases classified as operating leases under previous GAAP, and the classification of all cash payments within operating activities in the statement of cash flows. There continues to be differentiation between finance leases and

operating leases. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The Update is effective for public entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently evaluating the impact that this Update will have on its Consolidated Financial Statements.

Table of Contents

(2) Business Combinations

There were no acquisitions or mergers completed during the year ended December 31, 2015. During the year ended December 31, 2014, the Company completed the merger of Washington Banking Company, referred to as the "Washington Banking Merger". During the year ended December 31, 2013, the Company completed the acquisitions of Northwest Commercial Bank and Valley Community Bancshares Inc., jointly referred to as the "NCB and Valley Acquisitions." During the year ended December 31, 2013, the Company also completed the merger of its wholly-owned bank subsidiary Central Valley Bank with and into Heritage Bank. The merger of Central Valley Bank with and into Heritage Bank was a common control merger which had no accounting impact on the consolidated Company.

Washington Banking Merger

On October 23, 2013, the Company, along with the Bank, and Washington Banking and its wholly owned subsidiary bank, Whidbey, jointly announced the signing of a merger agreement for the Washington Banking Merger. The Washington Banking Merger was effective on May 1, 2014. Pursuant to the terms of the Washington Banking Merger, Washington Banking branches adopted the Heritage Bank name in all markets, with the exception of six branches in the Whidbey Island markets which have continued to operate using the Whidbey Island Bank name. The primary reasons for the merger were to expand the Company's geographic footprint consistent with its ongoing growth strategy and to achieve operational scale and realize efficiencies of a larger combined organization.

Under the terms of the merger agreement, Washington Banking shareholders received 0.89000 shares of Heritage common stock and \$2.75 in cash for each share of Washington Banking common stock. The terms of the merger agreement also stipulated immediate vesting of the Washington Banking options and restricted stock awards units. At April 30, 2014, the number of Washington Banking common shares outstanding was 15,587,154. The closing price of Heritage common stock was \$16.16 as of April 30, 2014. The total consideration transferred by the Company in conjunction with the Washington Banking Merger was \$269.6 million and the total number of Heritage shares of common stock issued were 14,000,178. The Company also incurred \$489,000 in capitalized stock issuance costs. The total consideration transferred in the Washington Banking Merger consisted of the following:

	Washington Banking (In thousands)
Consideration transferred	
Cash paid (1)	\$42,895
Fair value of common shares issued (2)	224,151
Fair value of restricted stock unit awards (3)	2,092
Fair value of common stock options	481
Total consideration transferred	\$269,619

(1) Includes \$3,000 of cash paid due to fractional shares and \$27,000 of cash paid to dissenters.

(2) Total of 13,870,716 shares issued. Excludes 1,686 shares held by dissenting shareholders and paid in cash and 165 fractional shares paid in cash.

(3) Total number of converted shares was 129,462. Fair value includes 26,783 shares which were forfeited by the Washington Banking shareholders to pay applicable taxes, totaling fair value of \$433,000.

The Washington Banking Merger resulted in \$89.7 million of goodwill. This goodwill is not deductible for tax purposes. The transaction qualified as a tax-free reorganization for U.S. federal income tax purposes and Washington Banking shareholders did not recognize any taxable gain or loss in connection with the share exchange and the stock consideration received.

The Company did not incur any merger-related costs during the year ended December 31, 2015. During the years ended December 31, 2014 and 2013, the Company incurred Washington Banking Merger-related costs (including system conversion costs) of approximately \$9.1 million and \$890,000, respectively.

Valley Community Bancshares

On March 11, 2013, the Company entered into a definitive agreement to acquire Valley Community Bancshares ("Valley") and its wholly-owned subsidiary, Valley Bank, both headquartered in Puyallup, Washington. The Valley Acquisition was completed on July 15, 2013.

Pursuant to the terms of the merger agreement, the shareholders of Valley common stock received \$19.50 per share in cash and 1.3611 shares of Heritage common stock per Valley share. The merger consideration for Valley consisted of cash and stock, with \$22.0 million paid in cash by the Company and 1,533,267 shares of the Company's

Table of Contents

common stock being issued with fair value of \$24.2 million. The Company also recognized \$157,000 in capitalized costs related to the issuance of its securities.

The Valley Acquisition resulted in \$16.4 million of goodwill. This goodwill is not deductible for tax purposes. During the year ended December 31, 2015, the Company did not incur any Valley Acquisition-related costs. During the years ended December 31, 2014 and 2013, the Company incurred Valley Acquisition-related costs (including system conversion costs) of approximately \$443,000 and \$2.1 million, respectively.

Northwest Commercial Bank

On September 14, 2012, the Company and Heritage Bank entered into a definitive agreement to acquire Northwest Commercial Bank ("NCB") headquartered in Lakewood, Washington. NCB was a full service commercial bank that operated two branch locations in Lakewood and Auburn, Washington. Prior to the closing of the transaction, NCB redeemed its outstanding preferred stock of approximately \$2.0 million issued to the U.S. Department of Treasury in connection with its participation in the Troubled Asset Relief Program Capital Purchase Plan. The NCB Acquisition was completed on January 9, 2013 with the merger of NCB with and into Heritage Bank.

In connection with the NCB Acquisition, the Company paid cash consideration of \$3.0 million, or \$5.50 per NCB share, to NCB shareholders on January 9, 2013. In addition, pursuant to the merger agreement, the NCB shareholders had the ability to potentially receive an additional cash payment based on an earn-out structure from the sale of a NCB asset included in "other real estate owned." This contingent payment was factored into the NCB liabilities assumed by Heritage Bank as of the January 9, 2013 acquisition date. This asset was sold by Heritage Bank in June 2013, and the \$491,000 of proceeds from the sale were paid to the NCB shareholders in July 2013. The payment of these proceeds did not impact the recorded bargain purchase gain on bank acquisition of \$399,000.

During the years ended December 31, 2015 and 2014, the Company did not incur any NCB Acquisition-related costs. During the year ended December 31, 2013, the Company incurred NCB Acquisition-related costs (including system conversion costs) of approximately \$794,000.

Business Combination Accounting

The above mentioned merger and acquisitions constitute business acquisitions as defined by FASB ASC 805, Business Combinations. FASB ASC 805 establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired and the liabilities assumed. Heritage was considered the acquirer in the merger and acquisitions. Accordingly, the preliminary estimates of fair values of the acquired banks' assets, including the identifiable intangible assets, and the assumed liabilities in the merger and acquisitions were measured and recorded as of the respective effective dates.

Table of Contents

The fair value estimates of the assets acquired and liabilities assumed in the Washington Banking Merger were as follows:

	Washington Banking (In thousands)
Assets	
Cash and cash equivalents	\$74,947
Investment securities available for sale	458,312
Loans held for sale	3,923
Loans receivable	895,978
Loans receivable, covered at merger date	107,050
FDIC indemnification asset	7,174
Other real estate owned (\$5,122 covered by FDIC shared-loss agreements at May 1, 2014 merger date)	7,121
Premises and equipment	31,776
Federal Home Loan Bank stock	7,064
Bank owned life insurance	32,519
Accrued Interest Receivable	4,943
Other intangible assets	11,194
Prepaid expenses and other assets	14,852
Total assets acquired	1,656,853
Liabilities	
Deposits	1,433,894
Junior subordinated debentures	18,937
Accrued expenses and other liabilities	24,067
Total liabilities assumed	1,476,898
Net assets acquired	\$179,955

A summary of the net assets purchased, the fair value adjustments and resulting goodwill recognized from the Washington Banking Merger are presented in the following table. Goodwill on mergers represents the excess of the consideration transferred over the estimated fair value of the net assets acquired and liabilities assumed.

	Washington Banking (In thousands)	
Cost basis of net assets on merger date	\$181,782	
Less: Consideration transferred	(269,619))
Fair value adjustments:		
Loans held for sale	86	
Loans receivable	(12,811))
Loans receivable, covered at merger date	6,384	
FDIC indemnification asset	357	
Other real estate owned	387	
Premises and equipment	(1,540))
Other intangible assets	10,216	
Prepaid expenses and other assets	(6,416))
Deposits	(1,737))
Junior subordinated debentures	6,837	
Accrued expenses and other liabilities	(3,590))
Goodwill recognized	\$(89,664))

Table of Contents

The operating results of the Company for the years ended December 31, 2015, 2014 and 2013 include the operating results produced by the net assets acquired in the merger and acquisitions since the respective effective dates.

Disclosure of the amount of revenue and net income (excluding acquisition-related costs) of Washington Banking, Valley and NCB since the effective dates included in the Company's Consolidated Statements of Income is impracticable due to the integration of the operations and accounting for the merger and acquisitions.

The Company considered the pro forma requirements of FASB ASC 805 and deemed it not necessary to provide pro forma financial statements as required under the standard for the NCB and Valley Acquisitions as they were not material to the Company. The Company believes that the historical NCB and Valley operating results are not considered of enough significance to be meaningful to the Company's results of operations.

The Company also considered the pro forma requirements of FASB ASC 805 and deemed it necessary for the Washington Banking Merger. The following table presents certain pro forma information, for illustrative purposes only, for the years ended December 31, 2014 and 2013 as if the Washington Banking Merger had occurred on January 1, 2013. The estimated pro forma information combines the historical results of Washington Banking with the Company's consolidated historical results and includes certain adjustments reflecting the estimated impact of certain fair value adjustments for the respective periods. The pro forma information is not indicative of what would have occurred had the Washington Banking Merger occurred on January 1, 2013. In particular, no adjustments have been made to eliminate the impact of the Washington Banking loans previously accounted for under ASC 310-30 that may have been necessary if these loans had been recorded at fair value at January 1, 2014. The pro forma information also does not consider any changes to the provision for loan losses resulting from recorded loans at fair value.

Additionally, Heritage expects to achieve further operating savings and other business synergies, including interest income growth, as a result of the Washington Banking Merger which are not reflected in the pro forma amounts in the following table. As a result, actual amounts will differ from the pro forma information presented.

	Pro Forma for the Years Ended December 31,	
	2014	2013
	(In thousands, except per share amounts)	
Net interest income	\$144,470	\$147,267
Net income	\$35,758	\$30,718
Basic earnings per common share	\$1.19	\$1.04
Diluted earnings per common share	\$1.18	\$1.04

(3) Investment Securities

The Company's investment policy is designed primarily to provide and maintain liquidity, generate a favorable return on assets without incurring undue interest rate and credit risk, and complement the Bank's lending activities. Securities are classified as either available for sale or held to maturity when acquired.

During the quarter ended December 31, 2015, the Company transferred all of its investment securities classified as held to maturity to available for sale. Based on the changes in the current rate environment, management made this change in an effort to manage more effectively the investment portfolio, including subsequently selling securities that were formerly classified as held to maturity. The amortized cost of the securities that were transferred totaled \$29.4 million and the pre-tax net unrealized gain related to these securities totaled \$952,000 on the date of the transfer. As a result of the transfer and subsequent sales, the Company believes its held to maturity classification process has been compromised and careful evaluation and analysis will be required going forward in determining when circumstances are suitable for management to assert with a great degree of credibility that it has the intent and ability to hold investments to maturity.

Table of Contents

(a) Securities by Type and Maturity

The amortized cost, gross unrealized gains, gross unrealized losses and fair values of investment securities available for sale at the dates indicated were as follows:

	Securities Available for Sale			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(In thousands)			
December 31, 2015				
U.S. Treasury and U.S. Government-sponsored agencies	\$35,618	\$145	\$(186)) \$35,577
Municipal securities	216,352	4,826	(185)) 220,993
Mortgage backed securities and collateralized mortgage obligations-residential:				
U.S. Government-sponsored agencies	546,654	2,092	(2,614)) 546,132
Corporate obligations	9,252	—	(139)) 9,113
Mutual funds and other equities	45	9	—	54
Total	\$807,921	\$7,072	\$(3,124)) \$811,869

December 31, 2014

U.S. Treasury and U.S. Government-sponsored agencies	\$21,414	\$44	\$(31)) \$21,427
Municipal securities	170,082	3,139	(184)) 173,037
Mortgage backed securities and collateralized mortgage obligations-residential:				
U.S. Government-sponsored agencies	539,859	4,015	(1,475)) 542,399
Corporate obligations	4,034	—	(24)) 4,010
Mutual funds and other equities	1,956	17	—	1,973
Total	\$737,345	\$7,215	\$(1,714)) \$742,846

Due to the transfer of the held to maturity investments discussed above, there were no amortized costs, gross unrecognized gains, gross unrecognized losses or fair values of investment securities held to maturity at December 31, 2015. These balances at December 31, 2014 were as follows:

	Securities Held to Maturity			
	Amortized Cost	Gross Unrecognized Gains	Gross Unrecognized Losses	Fair Value
	(In thousands)			
December 31, 2014				
U.S. Treasury and U.S. Government-sponsored agencies	\$1,591	\$167	\$—) \$1,758
Municipal securities	22,486	643	(11)) 23,118
Mortgage backed securities and collateralized mortgage obligations-residential:

Private residential collateralized mortgage obligations	871	75	(104)) 842
Total	\$35,814	\$1,249	\$(189)) \$36,874

There were no securities classified as trading at December 31, 2015 or December 31, 2014.

Table of Contents

The amortized cost and fair value of securities at December 31, 2015, by contractual maturity, are set forth below. Actual maturities may differ from contractual maturities because certain borrowers have the right to call or prepay obligations with or without call or prepayment penalties.

	Securities Available for Sale	
	Amortized Cost	Fair Value
	(In thousands)	
Due in one year or less	\$7,905	\$7,952
Due after one year through three years	43,713	43,969
Due after three years through five years	59,295	59,911
Due after five years through ten years	213,007	214,058
Due after ten years	483,956	485,925
Investment securities with no stated maturities	45	54
Total	\$807,921	\$811,869

(b) Unrealized Losses and Other-Than-Temporary Impairments

The following table shows the gross unrealized losses and fair value of the Company's investment securities available for sale that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that the individual securities have been in continuous unrealized loss positions as of December 31, 2015 and December 31, 2014:

	Securities Available for Sale					
	Less than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(In thousands)					
December 31, 2015						
U.S. Treasury and U.S. Government-sponsored agencies	\$30,381	\$(186)	\$—	\$—	\$30,381	\$(186)

Corporate obligations	2,119	(24)	—	—	2,119	(24)
Total	\$213,832	\$(1,714)	\$—	\$—	\$213,832	\$(1,714)

Table of Contents

The Company has evaluated these investment securities available for sale and has determined that the decline in their value is temporary. The unrealized losses are primarily due to increases in market interest rates and larger spreads in the market for mortgage-related products. The fair value of these securities is expected to recover as the securities approach their maturity date and/or as the pricing spreads narrow on mortgage-related securities. The Company has the ability and intent to hold the investments until recovery of the securities' amortized cost which may be the maturity date of the securities.

During the year ended December 31, 2015, the Company sold its entire portfolio of private residential collateralized mortgage obligations with a carrying value of \$1.1 million, all of which were formerly classified as held-to-maturity. Since acquisition these securities had been downgraded below the Company's acceptable investment grades. As of result of these downgrades and the effects of Basel III on the risk-weighting of sub-investment grade securities, the Company's intent to hold these securities changed and management elected to divest of its interest in the downgraded securities. The Company recorded a realized pre-tax loss of \$125,000 on this sale.

The following table shows the gross unrealized losses and fair value of the Company's investment securities held to maturity, aggregated by investment category and length of time that the individual securities have been in continuous unrealized loss positions as of as of December 31, 2014:

	Securities Held to Maturity				Total	
	Less than 12 Months	Unrecognized Losses	12 Months or Longer	Unrecognized Losses	Fair Value	Unrecognized Losses
December 31, 2014						
Municipal securities	\$2,196	\$(11)	\$—	\$—	\$2,196	\$(11)
Mortgage backed securities and collateralized mortgage obligations-residential:						
U.S. Government-sponsored agencies	2,553	(74)	—	—	2,553	(74)
Private residential collateralized mortgage obligations	558	(104)	—	—	558	(104)
Total	\$5,307	\$(189)	\$—	\$—	\$5,307	\$(189)

Prior to the sale of the held to maturity securities noted above, to analyze the unrealized losses, the Company estimated expected future cash flows of the private residential collateralized mortgage obligations by estimating the expected future cash flows of the underlying collateral and applying those collateral cash flows, together with any credit enhancements such as subordinated interests owned by third parties, to the security. The expected future cash flows of the underlying collateral are determined using the remaining contractual cash flows adjusted for future expected credit losses (which considers current delinquencies and nonperforming assets, future expected default rates and collateral value by vintage and geographic region) and prepayments. The expected cash flows of the security are then discounted at the interest rate used to recognize interest income on the security to arrive at a present value amount. The average prepayment rate and average discount rate used in the valuation of the present value as of December 31, 2014 were 6.0% and 9.4%, respectively.

For the year ended December 31, 2015, there were no securities determined to be other-than-temporarily impaired and the Company recorded no unrealized losses for other-than-temporary impairment for the year ended December 31, 2015 in earnings or other comprehensive income. In comparison, for the year ended December 31, 2014, there were four private residential collateralized mortgage obligations determined to be other-than-temporarily impaired. All unrealized losses for other-than-temporary impairment for the year ended December 31, 2014 were deemed to be credit related, and the Company recorded the impairment in earnings.

Table of Contents

The following table summarizes activity for the years ended December 31, 2014 and 2013 related to the amount of other-than-temporary impairments on held to maturity securities. There were no initial or subsequent impairments recorded during the year ended December 31, 2015.

	Life-to-Date Gross Other-Than-Temporary Impairments (1)	Life-to-Date Other-Than-Temporary Impairments Included in Other Comprehensive Income	Life-to-Date Net Other-Than-Temporary Impairments Included in Earnings
	(In thousands)		
December 31, 2012	\$2,565	\$1,152	\$1,413
Subsequent impairments	38	—	38
December 31, 2013	2,603	1,152	1,451
Subsequent impairments	45	—	45
December 31, 2014	\$2,648	\$1,152	\$1,496

(1) Life-to-date gross other-than-temporary impairments disclosed in this table are not reflective of subsequent recoveries, if any. As of December 31, 2015, the Company had no securities with other-than-temporary impairments because all such securities were sold prior to December 31, 2015.

(c) Pledged Securities

The following table summarizes the amortized cost and fair value of available for sale and previously classified as held to maturity securities that are pledged as collateral for the following obligations at December 31, 2015 and December 31, 2014:

	December 31, 2015		December 31, 2014	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(In thousands)			
Washington and Oregon state to secure public deposits	\$212,325	\$215,284	\$150,507	\$153,785
Federal Reserve Bank of San Francisco and FHLB to secure borrowing arrangements	506	506	4,430	4,460
Repurchase agreements	28,500	28,503	43,676	44,457
Other securities pledged	2,125	2,160	14,828	14,922
Total	\$243,456	\$246,453	\$213,441	\$217,624

At December 31, 2015 and December 31, 2014, the total carrying value of pledged securities was \$246.5 million and \$216.7 million, respectively.

(4) Loans Receivable

The Company originates loans in the ordinary course of business and has also acquired loans through FDIC-assisted and open bank transactions. Disclosures related to the Company's recorded investment in loans receivable generally exclude accrued interest receivable and net deferred loan origination fees and costs because they are insignificant. Loans acquired in a business combination may be further classified as "purchased" loans. Loans purchased with evidence of credit deterioration since origination for which it is probable that not all contractually required payments will be collected are accounted for under FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. These loans are identified as "purchased credit impaired" ("PCI") loans. Loans purchased that are not accounted for under FASB ASC 310-30 are accounted for under FASB ASC 310-20, Receivables—Nonrefundable Fees and Other Costs and are referred to as "non-PCI" loans.

(a) Loan Origination/Risk Management

The Company categorizes loans in one of the four segments of the total loan portfolio: commercial business, one-to-four family residential, real estate construction and land development and consumer. Within these segments are classes of loans for which management monitors and assesses credit risk in the loan portfolios. The Company has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. Management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management with frequent reports related to loan production, loan quality,

85

Table of Contents

concentrations of credit, loan delinquencies, and nonperforming and potential problem loans. The Company also conducts internal loan reviews and validates the credit risk assessment on a periodic basis and presents the results of these reviews to management. The loan review process complements and reinforces the risk identification and assessment decisions made by loan officers and credit personnel, as well as the Company's policies and procedures. A discussion of the risk characteristics of each loan portfolio segment is as follows:

Commercial Business:

There are three significant classes of loans in the commercial portfolio segment: commercial and industrial loans, owner-occupied commercial real estate and non-owner occupied commercial real estate. The owner and non-owner occupied commercial real estate are both considered commercial real estate loans. As the commercial and industrial loans carry different risk characteristics than the commercial real estate loans, they are discussed separately below. Commercial and industrial. Commercial and industrial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial and industrial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may include a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate. The Company originates commercial real estate loans within its primary market areas. These loans are subject to underwriting standards and processes similar to commercial and industrial loans, in addition to those of real estate loans. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate involves more risk than other classes of loans in that the lending typically involves higher loan principal amounts, and payments on loans secured by real estate properties are dependent on successful operation and management of the properties. Repayment of these loans may be more adversely affected by conditions in the real estate market or the economy. Owner-occupied commercial real estate loans are generally of lower credit risk than non-owner occupied commercial real estate loans as the borrowers' businesses are likely dependent on the properties.

One-to-Four Family Residential:

The majority of the Company's one-to-four family residential loans are secured by single-family residences located in its primary market areas. The Company's underwriting standards require that single-family portfolio loans generally are owner-occupied and do not exceed 80% of the lower of appraised value at origination or cost of the underlying collateral. Terms of maturity typically range from 15 to 30 years. Historically, the Company sold most single-family loans in the secondary market and retained a smaller portion in its loan portfolio. From the second quarter of 2013 until May 1, 2014, the Company only originated single-family loans for its loan portfolio. As a result of the Washington Banking Merger, since May 1, 2014 the Company is originating and selling a majority of its single-family mortgages.

Real Estate Construction and Land Development:

The Company originates construction loans for one-to-four family residential and for five or more family residential and commercial properties. The one-to-four family residential construction loans generally include construction of custom homes whereby the home buyer is the borrower. The Company also provides financing to builders for the construction of pre-sold homes and, in selected cases, to builders for the construction of speculative residential property. Substantially all construction loans are short-term in nature and priced with variable rates of interest. Construction lending can involve a higher level of risk than other types of lending because funds are advanced partially based upon the value of the project, which is uncertain prior to the project's completion. Because of the uncertainties inherent in estimating construction costs as well as the market value of a completed project and the effects of governmental regulation of real property, the Company's estimates with regard to the total funds required to complete a project and the related loan-to-value ratio may vary from actual results. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project and the ability of the borrower to sell or lease the property or refinance the indebtedness. If the Company's

estimate of the value of a project at completion proves to be overstated, it may have inadequate security for repayment of the loan and may incur a loss if the borrower does not repay the loan. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from the Company until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being dependent upon successful completion of the construction project, interest rate changes, government regulation of

86

Table of Contents

real property, general economic conditions and the availability of long-term financing.

Consumer:

The Company originates consumer loans and lines of credit that are both secured and unsecured. The underwriting process for these loans ensures a qualifying primary and secondary source of repayment. Underwriting standards for home equity loans are significantly influenced by statutory requirements, which include, but are not limited to, a maximum loan-to-value percentage of 80%, collection remedies, the number of such loans a borrower can have at one time and documentation requirements. To monitor and manage consumer loan risk, policies and procedures are developed and modified, as needed. The majority of consumer loans are for relatively small amounts disbursed among many individual borrowers which reduces the credit risk for this type of loan. To further reduce the risk, trend reports are reviewed by management on a regular basis.

As a result of the Washington Banking Merger, the Company is originating indirect consumer loans. These loans are for new and used automobile and recreational vehicles that are originated indirectly by selected dealers located in the Company's market areas. The Company has limited its purchase of indirect loans primarily to dealerships that are established and well known in their market areas and to applicants that are not classified as sub-prime.

Loans receivable at December 31, 2015 and December 31, 2014 consisted of the following portfolio segments and classes:

	December 31, 2015 (In thousands)	December 31, 2014
Commercial business:		
Commercial and industrial	\$596,726	\$570,453
Owner-occupied commercial real estate	629,207	594,986
Non-owner occupied commercial real estate	697,388	643,636
Total commercial business	1,923,321	1,809,075
One-to-four family residential	72,548	69,530
Real estate construction and land development:		
One-to-four family residential	51,752	49,195
Five or more family residential and commercial properties	55,325	64,920
Total real estate construction and land development	107,077	114,115
Consumer	298,167	259,294
Gross loans receivable	2,401,113	2,252,014
Net deferred loan costs (fees)	929	(937)
Loans receivable, net	2,402,042	2,251,077
Allowance for loan losses	(29,746)	(27,729)
Total loans receivable, net	\$2,372,296	\$2,223,348

(b) Concentrations of Credit

Most of the Company's lending activity occurs within Washington State, and to a lesser extent Oregon. The Company's primary market areas are concentrated along the I-5 corridor from Whatcom County to Clark County in Washington State and Multnomah County in Oregon, as well as other contiguous markets. The Washington Banking Merger allowed the expansion of the Company's market area north of Seattle, Washington to the Canadian border. The majority of the Company's loan portfolio consists of (in order of balances at December 31, 2015) non-owner occupied commercial real estate, owner-occupied commercial real estate and commercial and industrial. As of December 31, 2015 and 2014, there were no concentrations of loans related to any single industry in excess of 10% of the Company's total loans.

Table of Contents

(c) Credit Quality Indicators

As part of the on-going monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators including trends related to (i) the risk grade of the loans, (ii) the level of classified loans, (iii) net charge-offs, (iv) nonperforming loans, and (v) the general economic conditions of the United States of America, and specifically the states of Washington and Oregon. The Company utilizes a risk grading matrix to assign a risk grade to each of its loans. Loans are graded on a scale of 0 to 10. A description of the general characteristics of the risk grades is as follows:

Grades 0 to 5: These grades are considered "pass grade" and include loans with negligible to above average but acceptable risk. These borrowers generally have strong to acceptable capital levels and consistent earnings and debt service capacity. Loans with the higher grades within the "pass" category may include borrowers who are experiencing unusual operating difficulties, but have acceptable payment performance to date. Increased monitoring of financials and/or collateral may be appropriate. Loans with this grade show no immediate loss exposure.

Grade 6: This grade includes "Watch" loans and is considered a "pass grade". The grade is intended to be utilized on a temporary basis for pass grade borrowers where a potentially significant risk-modifying action is anticipated in the near term.

Grade 7: This grade includes "Other Assets Especially Mentioned" ("OAEM") loans in accordance with regulatory guidelines, and is intended to highlight loans with elevated risks. Loans with this grade show signs of deteriorating profits and capital, and the borrower might not be strong enough to sustain a major setback. The borrower is typically higher than normally leveraged, and outside support might be modest and likely illiquid. The loan is at risk of further decline unless active measures are taken to correct the situation.

Grade 8: This grade includes "Substandard" loans in accordance with regulatory guidelines, which the Company has determined have a high credit risk. These loans also have well-defined weaknesses which make payment default or principal exposure likely, but not yet certain. The borrower may have shown serious negative trends in financial ratios and performance. Such loans may be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. Loans with this grade can be placed on accrual or nonaccrual status based on the Company's accrual policy.

Grade 9: This grade includes "Doubtful" loans in accordance with regulatory guidelines, and the Company has determined these loans to have excessive credit risk. Such loans are placed on nonaccrual status and may be dependent upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. Additionally, these loans generally have a specific valuation allowance or have been partially charged-off for the amount considered uncollectible.

Grade 10: This grade includes "Loss" loans in accordance with regulatory guidelines, and the Company has determined these loans have the highest risk of loss. Such loans are charged-off or charged-down when payment is acknowledged to be uncertain or when the timing or value of payments cannot be determined. "Loss" is not intended to imply that the loan or some portion of it will never be paid, nor does it in any way imply that there has been a forgiveness of debt. Numerical loan grades for loans are established at the origination of the loan. Loan grades are reviewed on a quarterly basis, or more frequently if necessary, by the credit department. The Bank follows the FDIC's Uniform Retail Credit Classification and Account Management Policy for subsequent classification in the event of payment delinquencies or default. Typically, an individual loan grade will not be changed from the prior period unless there is a specific indication of credit deterioration or improvement. Credit deterioration is evidenced by delinquency, direct communications with the borrower, or other borrower information that becomes known to management. Credit improvements are evidenced by known facts regarding the borrower or the collateral property.

The loan grades relate to the likelihood of losses in that the higher the grade, the greater the loss potential. Loans with a pass grade may have some estimated inherent losses, but to a lesser extent than the other loan grades. The OAEM loan grade is transitory in that the Company is waiting on additional information to determine the likelihood and extent of the potential loss. The likelihood of loss for OAEM graded loans, however, is greater than Watch graded loans because there has been measurable credit deterioration. Loans with a Substandard grade are generally loans for which the Company has individually analyzed for potential impairment. For Doubtful and Loss graded loans, the

Company is almost certain of the losses, and the unpaid principal balances are generally charged-off to the realizable value.

88

Table of Contents

The following tables present the balance of the loans receivable by credit quality indicator as of December 31, 2015 and December 31, 2014.

	December 31, 2015				Total
	Pass	OAEM	Substandard	Doubtful	
	(In thousands)				
Commercial business:					
Commercial and industrial	\$563,002	\$8,093	\$25,333	\$298	\$596,726

Gross loans receivable	\$2,063,071	\$64,921	\$121,111	\$2,911	\$2,252,014

Potential problem loans are loans classified as OAEM or worse that are currently accruing interest and are not considered impaired, but which management is monitoring because the financial information of the borrower causes concern as to their ability to meet their loan repayment terms. Potential problem loans also include PCI loans as these loans continue to accrete loan discounts established at acquisition based on the guidance of ASC 310-30. Potential

problem loans as of December 31, 2015 and December 31, 2014 were \$110.4 million and \$162.9 million, respectively. The balance of potential problem loans guaranteed by a governmental agency, which guarantee reduces the Company's credit exposure, was \$1.2 million and \$2.0 million as of December 31, 2015 and December 31, 2014, respectively.

Table of Contents

(d) Nonaccrual Loans

Nonaccrual loans, segregated by segments and classes of loans, were as follows as of December 31, 2015 and December 31, 2014:

	December 31, 2015	December 31, 2014
	(In thousands)	
Commercial business:		
Commercial and industrial	\$5,095	\$5,784
Owner-occupied commercial real estate	2,027	2,295
Non-owner occupied commercial real estate	—	517
Total commercial business	7,122	8,596
One-to-four family residential	38	—
Real estate construction and land development:		
One-to-four family residential	2,414	2,831
Total real estate construction and land development	2,414	2,831
Consumer	94	145
Nonaccrual loans	\$9,668	\$11,572

The Company had \$1.1 million and \$1.6 million of nonaccrual loans guaranteed by governmental agencies at December 31, 2015 and December 31, 2014, respectively.

PCI loans are not included in the nonaccrual loan table above because these loans are accounted for under ASC 310-30, which provides that accretable yield is calculated based on a loan's expected cash flow even if the loan is not performing under its contractual terms.

(e) Past due loans

The Company performs an aging analysis of past due loans using the categories of 30-89 days past due and 90 or more days past due. This policy is consistent with regulatory reporting requirements.

The balances of past due loans, segregated by segments and classes of loans, as of December 31, 2015 and December 31, 2014 were as follows:

	December 31, 2015			Current	Total
	30-89 Days	90 Days or Greater	Total Past Due		
	(In thousands)				
Commercial business:					
Commercial and industrial	\$2,900	\$2,679	\$5,579	\$591,147	\$596,726

The Company had governmental guarantees of \$1.5 million and \$2.4 million related to the impaired loan balances at December 31, 2015 and December 31, 2014, respectively.

The average recorded investment of impaired loans for the years ended December 31, 2015, 2014 and 2013 are set forth in the following table.

	Years Ended December 31,		
	2015	2014	2013
	(In thousands)		
Commercial business:			
Commercial and industrial	\$9,781	\$14,367	\$14,112
Owner-occupied commercial real estate	4,346	3,582	2,638
Non-owner occupied commercial real estate	9,257	7,915	7,897
Total commercial business	23,384	25,864	24,647
One-to-four family residential	257	604	1,339
Real estate construction and land development:			
One-to-four family residential	3,841	5,452	4,237
Five or more family residential and commercial properties	2,008	2,154	2,839

Consumer	171	786	274
Total	\$29,661	\$34,860	\$33,336

For the years ended December 31, 2015, 2014 and 2013 no interest income was recognized subsequent to a loan's classification as nonaccrual. For the years ended December 31, 2015, 2014 and 2013, the Bank recorded \$780,000, \$1.2 million and \$1.1 million, respectively, of interest income related to performing TDR loans.

Table of Contents

(g) Troubled Debt Restructured Loans

A troubled debt restructured loan is a restructuring in which the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. TDRs are considered impaired and are separately measured for impairment under FASB ASC 310-10-35, whether on accrual ("performing") or nonaccrual ("nonperforming") status.

The Company has implemented more stringent definitions of concessions and impairment measures for PCI loans which are not in pools as these loans have known credit deteriorations and are generally accreting income at a lower discounted rate as compared to the contractual note rate based on the guidance of FASB ASC 310-30. At December 31, 2014, the Company reported \$10.4 million of PCI loans as TDR loans. After further review of the Bank's modified definitions, these loans were no longer considered to have concessions and they were removed from TDR status during the year ended December 31, 2015. The balances as reported in the Annual Report on Form 10-K for the year ended December 31, 2014 has been updated in this filing to exclude these balances for comparative purposes.

The majority of the Bank's TDR loans are a result of granting extensions of maturity on troubled credits which have already been adversely classified. The Bank grants such extensions to reassess the borrower's financial status and to develop a plan for repayment. Certain modifications with extensions also include interest rate reductions, which is the second most prevalent concession. Certain TDRs were additionally re-amortized over a longer period of time. The Bank additionally advanced funds to a troubled speculative home builder to complete established projects. These modifications would all be considered a concession for a borrower that could not obtain similar financing terms from another source other than from the Bank.

The financial effects of each modification will vary based on the specific restructure. For the majority of the Bank's TDRs, the loans were interest-only with a balloon payment at maturity. If the interest rate is not adjusted and the modified terms are consistent with other similar credits being offered, the Bank may not experience any loss associated with the restructure. If, however, the restructure involves forbearance agreements or interest rate modifications, the Bank may not collect all the principal and interest based on the original contractual terms. The Bank estimates the necessary allowance for loan losses on TDRs using the same guidance as used for other impaired loans.

The recorded investment balance and related allowance for loan losses of performing and nonaccrual TDR loans as of December 31, 2015 and December 31, 2014 were as follows:

	December 31, 2015		December 31, 2014	
	Performing TDRs	Nonaccrual TDRs	Performing TDRs	Nonaccrual TDRs
	(In thousands)			
TDR loans	\$20,695	\$6,301	\$18,659	\$7,256
Allowance for loan losses on TDR loans	2,069	679	1,908	1,035

The unfunded commitment to borrowers related to TDRs was \$551,000 and \$1.8 million at December 31, 2015 and December 31, 2014, respectively.

Table of Contents

Loans that were modified as TDRs during the years ended December 31, 2015, 2014 and 2013 are set forth in the following table:

	Years Ended December 31,		2014		2013	
	2015	Outstanding	Number of	Outstanding	Number of	Outstanding
	Number of	Principal	Contracts	Principal	Contracts	Principal
	Contracts	Balance	(1)	Balance	(1)	Balance
	(1)	(1)(2)	(1)	(1)(2)	(1)	(1)(2)
	(Dollars in thousands)					
Commercial business:						
Commercial and industrial	25	\$6,312	33	\$8,166	36	\$10,362
Owner-occupied commercial real estate	4	1,311	3	1,063	5	537
Non-owner occupied commercial real estate	4	7,496	3	6,548	2	192
Total commercial business	33	15,119	39	15,777	43	11,091
One-to-four family residential	—	—	—	—	1	252
Real estate construction and land development:						
One-to-four family residential	4	2,291	10	3,553	24	3,639
Five or more family residential and commercial properties	—	—	—	—	1	2,404
Total real estate construction and land development	4	2,291	10	3,553	25	6,043
Consumer	1	37	2	101	3	141
Total modified loans	38	\$17,447	51	\$19,431	72	\$17,527

- (1) Number of contracts and outstanding principal balance represent loans which have balances as of period end as certain loans may have been paid-off or charged-off during the years ended December 31, 2015, 2014 and 2013. Includes subsequent payments after modifications and reflects the balance as of period end. As the Bank did not forgive any principal or interest balance as part of the loan modification, the Bank's recorded investment in each loan at the date of modification (pre-modification) did not change as a result of the modification (post-modification), except when the modification was the initial advance on a one-to-four family residential real estate construction and land development loan under a master guidance line. There were no advances on these types of loans during the year ended December 31, 2015. During the year ended December 31, 2014, the Company's initial advance at the time of modification on these construction loans totaled \$45,000 and the total commitment amount was \$190,000 and the outstanding principal balance at December 31, 2014 was \$188,000. During the year ended December 31, 2013, the Company's initial advance at the time of modification on these construction loans totaled \$1.1 million and the total commitment amount was \$4.3 million and the outstanding principal balance at December 31, 2013 was \$3.4 million.

Of the 38 loans modified during the year ended December 31, 2015, 18 loans with a total outstanding principal balance of \$7.0 million had no prior modifications. The remaining loans included in the table above for the year ended December 31, 2015 were previously reported as TDRs. The Bank typically grants shorter extension periods to continually monitor the troubled credits despite the fact that the extended date might not be the date the Bank expects the cash flow. The Company does not consider these modifications a subsequent default of a TDR as new loan terms, specifically maturity dates, were granted. The potential losses related to these loans would have been considered in the period the loan was first reported as a TDR and adjusted, as necessary, in the current periods based on more recent information. The related specific valuation allowance at December 31, 2015 for loans that were modified as TDRs during the year ended December 31, 2015 was \$1.7 million.

Of the 51 loans modified during the year ended December 31, 2014, 17 loans with a total outstanding principal balance of \$4.7 million had no prior modifications. Of the 72 loans modified during the year ended December 31, 2013, 17 loans with a total outstanding principal balance of \$5.5 million were previously reported as TDRs as of December 31, 2012. Similar to the year ended December 31, 2015 discussion above, the majority of the modifications in prior periods was the result of the Bank granting shorter extension periods to continually monitor the troubled credits, which resulted in TDR classification. The related specific valuation allowance for loans that were modified as TDRs during the years ended December 31, 2014 and 2013 was \$1.8 million and \$2.8 million, respectively. A significant portion of the loans modified during the year ended December 31, 2013 (24 loans totaling \$3.4 million at December 31, 2013) relate to a speculative construction home builder. As the builder completes and sells

Table of Contents

the units, the Bank will advance funds for the construction of another unit. The builder's loans for each separate unit were considered TDR loans. The Bank closely monitors the activity of this borrower for potential losses.

The loans modified during the previous twelve months ended December 31, 2015, 2014 and 2013 that subsequently defaulted during the years ended December 31, 2015, 2014 and 2013 are included in the following table:

	Years Ended December 31,		2014		2013	
	2015	Outstanding	Number of	Outstanding	Number of	Outstanding
	Number of	Principal	Contracts	Principal	Contracts	Principal
	Contracts	Balance		Balance		Balance
	(Dollars in thousands)					
Commercial business:						
Commercial and industrial	2	\$1,755	—	\$—	3	\$918
Non-owner occupied commercial real estate	—	—	1	75	—	—
Total commercial business	2	1755	1	75	3	918
Total	2	\$1,755	1	\$75	3	\$918

There was one commercial and industrial loan totaling \$1.7 million at December 31, 2015 that was modified during the previous twelve months and subsequently defaulted because the borrower did not make specific curtailment, or additional, payments on the loan during the year. The borrower was 30-89 days past due as of December 31, 2015. The other loan included in the above table that defaulted during the year ended December 31, 2015 and the one loan that defaulted during the year ended December 31, 2014 both defaulted because they were past their modified maturity dates, and the borrowers have not repaid the credits. The Bank does not intend to extend the maturities. The three loans that defaulted during the year ended December 31, 2013 defaulted as the loans were greater than 90 days past due at December 31, 2013. The Bank had a specific valuation allowance at December 31, 2015, 2014 and 2013 related to the credits which defaulted during the related year ends of \$191,000, \$4,000 and \$63,000, respectively.

(h) Purchased Credit Impaired Loans

The Company acquired loans and designated them as PCI loans, which are accounted for under FASB ASC 310-30, in the Washington Banking Merger on May 1, 2014 and in previously completed acquisitions, including the FDIC-assisted acquisitions of Cowlitz Bank ("Cowlitz") and Pierce Commercial Bank ("Pierce") on July 30, 2010 and November 8, 2010, respectively, and the acquisitions of NCB on January 9, 2013 and Valley on July 15, 2013.

Table of Contents

The following table reflects the outstanding principal balance and recorded investment at December 31, 2015 and December 31, 2014 of the PCI loans:

	December 31, 2015		December 31, 2014	
	Outstanding Principal (In thousands)	Recorded Investment	Outstanding Principal	Recorded Investment
Commercial business:				
Commercial and industrial	\$20,110	\$16,986	\$31,779	\$25,174
Owner-occupied commercial real estate	25,237	22,826	41,236	36,874
Non-owner occupied commercial real estate	30,178	27,261	33,291	31,442
Total commercial business	75,525	67,073	106,306	93,490
One-to-four family residential	5,707	5,392	6,106	5,713
Real estate construction and land development:				
One-to-four family residential	6,904	4,121	8,559	5,531
Five or more family residential and commercial properties	3,071	3,207	4,861	4,765
Total real estate construction and land development	9,975	7,328	13,420	10,296
Consumer	6,720	7,126	8,928	9,772
Gross PCI loans	\$97,927	\$86,919	\$134,760	\$119,271

On the acquisition dates, the amount by which the undiscounted expected cash flows of the PCI loans exceeded the estimated fair value of the loan is the “accretable yield”. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the PCI loans.

The following table summarizes the accretable yield on the PCI loans for the years ended December 31, 2015, 2014 and 2013.

	Years Ended December 31,		
	2015	2014	2013
	(In thousands)		
Balance at the beginning of the year	\$21,092	\$17,249	\$21,638
Accretion	(6,993)) (8,054) (8,612
Disposal and other	(3,111)) (4,981) (5,220
Change in accretable yield (1)	6,604	16,878	9,443
Balance at the end of the year	\$17,592	\$21,092	\$17,249

(1) Includes accretable yield of PCI loans at acquisition dates.

The following table summarizes the contractual cash flows, expected cash flows, non-accretable yield and accretable yield of the PCI loans on the May 1, 2014 merger date for the Washington Banking Merger. As there were no business combinations during the year ended December 31, 2015, there are no values to disclose.

	Washington Banking (In thousands)
Contractual cash flow	\$147,223
Expected cash flow	111,286
Non-accretable yield	\$35,937
Expected cash flow	\$111,286
Fair value	97,580
Accretable yield	\$13,706

Table of Contents

(i) Related Party Loans

In the ordinary course of business, the Company has granted loans to certain directors, executive officers and their affiliates (collectively referred to as “related parties”).

Activity in related party loans for the years ended December 31, 2015, 2014 and 2013 was as follows (in thousands):

	Years Ended or As of December 31, (in thousands)	
Balance outstanding at December 31, 2012	\$ 11,442	
Principal additions	—	
Elimination of outstanding loan balance due to change in related party status	(3,045)
Principal reductions	(923)
Balance outstanding at December 31, 2013	7,474	
Principal additions	23	
Addition of outstanding loan balance due to change in related party status	1,858	
Principal reductions	(191)
Balance outstanding at December 31, 2014	9,164	
Principal additions	12,189	
Principal reductions	(578)
Balance outstanding at December 31, 2015	\$ 20,775	

The Company had \$603,000 and \$543,000 of unfunded commitments to related parties as of December 31, 2015 and 2014, respectively. The Company did not have any borrowings from related parties at December 31, 2015 or 2014.

(j) Mortgage Banking Activities and SBA Loan Sales

The Bank originates certain one-to-four family residential loans to be sold on the secondary market. These loans are presented as loans held for sale. The Bank ceased these mortgage banking activities in the second quarter of 2013, and resumed activities again in the second quarter of 2014 in connection with the Washington Banking Merger. The Bank does not retain servicing on loans sold in the secondary market. Details of certain mortgage banking activities are as follows:

	Years Ended or As of December 31, 2015	2014
	(In thousands)	
Loans held for sale at lower of cost or market	\$ 7,682	\$ 5,582
One-to-four family residential loans sold during the year	132,149	55,997
Commitments to sell mortgage loans	16,741	10,625
Commitments to fund mortgage loans (at interest rates approximating market rates):		
Fixed rate	\$ 11,884	\$ 8,467
Variable or adjustable rate	4,857	2,158

The fair value of freestanding derivatives related to the commitments to fund mortgage loans and sell at locked interest rates were not significant at December 31, 2015 or 2014.

Table of Contents

The Company may chose to sell the conditionally guaranteed portion of certain loans guaranteed by the Small Business Administration or the U.S. Department of Agriculture (collectively referred to as "SBA loans") and retain a participating interest in the unguaranteed portion of the loans and the servicing of the loans. The retained unguaranteed portions of these loans are carried at cost net of discounts related to accounting for the sold and retained portions of the loans using the allocation of their carrying amounts based on their relative fair values. SBA loans are sold with servicing retained. Details of certain SBA loans serviced are as follows:

	December 31, 2015	December 31, 2014
	(In thousands)	
SBA loans serviced for others with participating interest (1)	\$43,771	\$31,009
SBA loans serviced for others with no participating interest	—	—

Represents the gross balances of the loans at year end. The participations owned by the Bank totaled \$10.1 million (1) and \$7.4 million, respectively, at December 31, 2015 and 2014 and are included in the balances of total loans receivable, net on the Company's Consolidated Statements of Financial Condition.

There was \$392,000, \$260,000 and \$106,000 of servicing fee income and fees from SBA loans serviced for others for the years ended December 31, 2015, 2014 and 2013, respectively. Servicing fee income is reported in other income on the Company's Consolidated Statements of Income.

(5) Allowance for Loan Losses

The allowance for loan losses is maintained at a level deemed appropriate by management to provide for probable incurred credit losses in the loan portfolio. The methodology for calculating the allowance for loan losses is completed on loans originated by the Bank and on loans purchased in mergers and acquisitions. The FDIC shared-loss agreements terminated on August 4, 2015. Prior to their termination, when a credit deterioration occurred subsequent to the acquisition on loan that was covered by the FDIC shared-loss agreements, a provision for loan losses was charged to earnings for the full amount of the impairment, without regard to the coverage of the FDIC shared-loss agreements.

A summary of the changes in the allowance for loan losses during the years ended December 31, 2015, 2014 and 2013 is as follows:

	Years Ended December 31,		
	2015	2014	2013
	(In thousands)		
Balance at the beginning of the year	\$27,729	\$28,824	\$28,594
Charge-offs	(3,482) (6,597) (4,371
Recoveries of loans previously charged-off	1,127	908	929
Provision for loan losses	4,372	4,594	3,672
Balance at the end of the year	\$29,746	\$27,729	\$28,824

Table of Contents

The following table details the activity in the allowance for loan losses disaggregated by segment and class for the year ended December 31, 2015:

	Balance at Beginning of Year (In thousands)	Charge-offs	Recoveries	Provision for Loan Losses	Balance at End of Year
Year Ended December 31, 2015					
Commercial business:					
Commercial and industrial	\$10,553	\$(1,488)	\$476	\$431	\$9,972
Owner-occupied commercial real estate	4,095	—	—	473	4,568
Non-owner occupied commercial real estate	5,538	(188)	—	2,174	7,524
Total commercial business	20,186	(1,676)	476	3,078	22,064
One-to-four family residential	1,200	—	13	(56)	1,157
Real estate construction and land development:					
One-to-four family residential	1,786	(106)	100	(722)	1,058
Five or more family residential and commercial properties	972	—	—	(159)	813
Total real estate construction and land development	2,758	(106)	100	(881)	1,871
Consumer	2,769	(1,700)	538	2,702	4,309
Unallocated	816	—	—	(471)	345
Total	\$27,729	\$(3,482)	\$1,127	\$4,372	\$29,746
