**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2010

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

**For the transition period from _____ to _____
Commission File Number: 00-30747**

PACWEST BANCORP

(Exact name of registrant as specified in its charter)

DELAWARE
(State or other jurisdiction of
incorporation or organization)

**401 West "A" Street
San Diego, California**
(Address of principal executive offices)

33-0885320
(I.R.S. Employer
Identification Number)

92101
(Zip Code)

(619) 233-5588
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: PACWEST BANCORP - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a
smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 29, 2010 there were 35,306,235 shares of the registrant's common stock outstanding, excluding 1,424,574 shares of unvested restricted stock.

Table of Contents

NOTE 1 BASIS OF PRESENTATION

PacWest Bancorp is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as a holding company for our banking subsidiary, Pacific Western Bank, which we refer to as Pacific Western or the Bank. When we say "we", "our" or the "Company", we mean the Company on a consolidated basis with the Bank. When we refer to "PacWest" or to the holding company, we are referring to the parent company on a stand-alone basis.

We have completed 21 acquisitions since May 2000. See Notes 2 and 3 for more information about our acquisitions.

(a) Basis of Presentation

The accounting and reporting policies of the Company are in accordance with U.S. generally accepted accounting principles, which we refer to as GAAP. All significant intercompany balances and transactions have been eliminated.

Our financial statements reflect all adjustments that are, in the opinion of management, necessary to present a fair statement of the results for the interim periods presented. Certain information and note disclosures normally included in consolidated financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The interim operating results are not necessarily indicative of operating results for the full year.

(b) Use of Estimates

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period to prepare these consolidated financial statements in conformity with GAAP. Actual results could differ from those estimates. Material estimates subject to change in the near term include, among other items, the allowances for credit losses, the carrying value of other real estate owned, the carrying value of intangible assets, the carrying value of the FDIC loss sharing asset and the realization of deferred tax assets.

As described in Note 2 below, Pacific Western acquired assets and assumed liabilities of the former Affinity Bank ("Affinity") in an FDIC-assisted transaction, which we refer to as the Affinity acquisition. The acquired assets and assumed liabilities were measured at estimated fair value. Management made significant estimates and exercised significant judgment in estimating fair values and accounting for the acquisition of Affinity.

(c) Reclassifications

Certain prior year amounts have been reclassified to conform to the current year's presentation.

NOTE 2 ACQUISITIONS

Business Combinations are accounted for under the acquisition method of accounting in accordance with ASC 805, *Business Combinations*. Results of operations of an acquired business are included in the statement of earnings from the date of acquisition. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred. We adopted this guidance as of January 1, 2009 and applied it to the Affinity acquisition.

Table of Contents**NOTE 2 ACQUISITIONS (Continued)**

For acquisitions completed prior to January 1, 2009, the estimated merger-related charges associated with each acquisition were recorded as a liability at closing when the related purchase price was allocated. For each acquisition, we developed an integration plan for the Company that addressed, among other things, requirements for staffing, systems platforms, branch locations and other facilities. The remaining merger-related liability totals \$1.1 million at March 31, 2010 and represents the estimated lease payments, net of estimated sublease income, for the remaining life of leases for abandoned space.

Federally Assisted Acquisition of Affinity Bank

On August 28, 2009, Pacific Western Bank acquired certain assets and assumed certain liabilities of Affinity from the Federal Deposit Insurance Corporation ("FDIC") in an FDIC-assisted transaction. We entered into a loss sharing agreement with the FDIC, whereby the FDIC will cover a substantial portion of any future losses on loans, other real estate owned and certain investment securities. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date. Affinity was a full service commercial bank headquartered in Ventura, California that operated 10 branch locations in California. We made this acquisition to expand our presence in California.

The assets acquired and liabilities assumed have been accounted for under the acquisition method of accounting (formerly the purchase method). The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the August 28, 2009 acquisition date.

Unaudited Pro Forma Results of Operations

The following table presents our unaudited pro forma results of operations for the periods presented as if the Affinity acquisition had been completed on January 1, 2009. The unaudited pro forma results of operations include the historical accounts of the Company and Affinity and pro forma adjustments as may be required, including the amortization of intangibles with definite lives and the amortization or accretion of any premiums or discounts arising from fair value adjustments for assets acquired and liabilities assumed. The unaudited pro forma information is intended for informational purposes only and is not necessarily indicative of our future operating results or operating results that would have occurred had these acquisitions been completed at the beginning of 2009. No assumptions have been applied to the pro forma results of operations regarding possible revenue enhancements, expense efficiencies or asset dispositions.

	For the Quarter Ended March 31, 2009 (Dollars in thousands, except per share data)	
Revenues (net interest income plus noninterest income)	\$	135,245
Net earnings	\$	42,449
Net income per share:		
Basic	\$	1.38
Diluted	\$	1.38

Table of Contents**NOTE 3 OTHER INTANGIBLE ASSETS**

Our intangible assets with definite lives are core deposit intangibles, or CDI, and customer relationship intangibles, or CRI. These intangible assets are amortized over their useful lives to their estimated residual values and reviewed for impairment at least quarterly. If the recoverable amount of the intangible asset is determined to be less than its carrying value, we would then measure the amount of impairment based on an estimate of the intangible asset's fair value at that time. If the fair value is below the carrying value, the intangible asset is reduced to such fair value and impairment is recognized as noninterest expense in the financial statements.

The following table presents the changes in CDI and CRI and the related accumulated amortization for the periods indicated:

	Quarters Ended		
	3/31/10	12/31/09	3/31/09
(Dollars in thousands)			
Gross amount of CDI and CRI:			
Balance at the beginning and end of the period	\$ 75,911	\$ 75,911	\$ 72,990
Accumulated amortization:			
Balance at the beginning of the period	(42,615)	(40,260)	(33,068)
Amortization	(2,424)	(2,355)	(2,247)
Balance at the end of the period	(45,039)	(42,615)	(35,315)
Net CDI and CRI at the end of the period	\$ 30,872	\$ 33,296	\$ 37,675

The aggregate amortization expense related to the intangible assets is expected to be \$9.5 million for 2010. The estimated aggregate amortization expense related to these intangible assets for each of the subsequent four years is \$8.0 million, \$5.7 million, \$4.1 million, and \$2.6 million.

NOTE 4 INVESTMENT SECURITIES AND FHLB STOCK

The amortized cost, gross unrealized gains and losses and fair value of securities available-for-sale as of March 31, 2010 are presented in the table below. Other securities include an investment in overnight money market funds at a financial institution. The private label collateralized mortgage obligations were acquired in the Affinity acquisition and are covered by the FDIC loss sharing agreement. See Note 9 for information on fair value measurements and methodology.

	Amortized cost	March 31, 2010		Fair value
		Gross unrealized gains	Gross unrealized losses	
(Dollars in thousands)				
Government-sponsored entity debt securities	\$ 16,150	\$ 53	\$ 109	\$ 16,094
Municipal securities	7,878	448		8,326
Residential mortgage-backed securities:				
Government and government-sponsored entity pass through	287,999	4,835	427	292,407
Government and government-sponsored entity collateralized mortgage obligations	71,428	465	2,828	69,065
Covered private label collateralized mortgage obligations	51,564	2,269	2,772	51,061
Other securities	2,288			2,288
Total	\$ 437,307	\$ 8,070	\$ 6,136	\$ 439,241

Table of Contents**NOTE 4 INVESTMENT SECURITIES AND FHLB STOCK (Continued)**

Mortgage-backed securities have contractual terms to maturity and require periodic payments to reduce principal. In addition, expected maturities may differ from contractual maturities because obligors and/or issuers may have the right to call or prepay obligations with or without call or prepayment penalties. The contractual maturity distribution of our securities portfolio based on amortized cost and fair value as of March 31, 2010, is shown below.

	Maturity distribution as of March 31, 2010	
	Amortized cost	Fair value
	(Dollars in thousands)	
Due in one year or less	\$ 2,289	\$ 2,289
Due after one year through five years	14,210	14,866
Due after five years through ten years	57,298	57,948
Due after ten years	363,510	364,138
Total	\$ 437,307	\$ 439,241

At March 31, 2010, the fair value of debt securities and residential mortgage-backed debt securities issued by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) was approximately \$288.7 million. We do not own any equity securities issued by Fannie Mae or Freddie Mac.

As of March 31, 2010 securities available-for-sale with a fair value of \$156.3 million were pledged as collateral for borrowings, public deposits and other purposes as required by various statutes and agreements.

At March 31, 2010 none of the securities in our investment portfolio had been in a continuous unrealized loss position for 12 months or longer. The following table presents the fair value and unrealized losses on securities that are in an unrealized loss position for less than 12 months and considered temporarily impaired as of March 31, 2010.

Descriptions of securities	Impairment Period of Less than 12 months	
	Unrealized	
	Fair Value	Losses
(Dollars in thousands)		
Government-sponsored entity debt securities	\$ 9,891	\$ 109
Residential mortgage-backed securities:		
Government and government-sponsored entity pass through	79,771	427
Government and government-sponsored entity collateralized mortgage obligations	39,324	2,828
Covered private label collateralized mortgage obligations	7,258	2,772
Total	\$ 136,244	\$ 6,136

FHLB Stock. The Company has a \$50.4 million investment in Federal Home Loan Bank of San Francisco (FHLB) stock. The FHLB stock is carried at cost at March 31, 2010. In January 2009, the FHLB announced it suspended excess FHLB stock redemptions and dividend payments. Since then, the FHLB has paid two cash dividends, though at a rate less than that paid in the past. We evaluated the carrying value of our FHLB stock investment at March 31, 2010 and determined it was not impaired. Our evaluation considered the long-term nature of the investment, the liquidity position of

Table of Contents**NOTE 4 INVESTMENT SECURITIES AND FHLB STOCK (Continued)**

the FHLB, the actions being taken by the FHLB to address its regulatory situation, and our intent and ability to hold this investment for a period of time sufficient to recover our recorded investment.

NOTE 5 COVERED LOANS, ALLOWANCE FOR LOSS ON COVERED LOANS, AND COVERED OTHER REAL ESTATE OWNED

We refer to the loans acquired in the Affinity acquisition as "covered loans" as we will be reimbursed for a substantial portion of any future losses on them under the terms of the FDIC loss sharing agreement. At the August 28, 2009 acquisition date, we estimated the fair value of the Affinity loan portfolio at \$675.6 million which represents the expected cash flows from the portfolio discounted at a market-based rate. The carrying values of the covered loans were as follows at March 31, 2010 and December 31, 2009.

	March 31, 2010	December 31, 2009
	(In thousands)	
Covered loans, gross	\$ 714,473	\$ 742,535
Discount	(90,790)	(102,849)
Covered loans, net of discount	623,683	639,686
Less allowance for loan losses	32,014	18,000
Covered loans, net	\$ 591,669	\$ 621,686

The covered loans acquired in the Affinity transaction are subject to our internal and external credit review. If and when credit deterioration occurs a provision for credit losses for covered loans will be charged to earnings for the full amount without regard to the FDIC loss sharing agreement. The portion of the estimated loss reimbursable from the FDIC is recorded in noninterest income and increases the FDIC loss sharing asset. During the first quarter of 2010 we recorded a provision for credit losses of \$20.7 million on the covered loan portfolio; such provision represents credit deterioration since the acquisition date based on decreases in expected cash flows on certain covered loans measured as of March 31, 2010 compared to acquisition date expected cash flows. We recorded \$16.6 million in noninterest income to reflect the FDIC's share of this estimated loss.

At the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the "accretable yield". The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans. The following table summarizes the changes therein for the three months ended March 31, 2010:

	Carrying Amount of Loans	Accretable Yield
	(In thousands)	
Balance as of January 1, 2010	\$ 621,686	\$ (226,446)
Accretion	11,169	11,169
Payments received	(20,456)	
Decrease in expected cash flows		18,608
Provision for loan losses	(20,700)	
Balance as of March 31, 2010	\$ 591,699	\$ (196,669)

Table of Contents**NOTE 5 COVERED LOANS, ALLOWANCE FOR LOSS ON COVERED LOANS, AND COVERED OTHER REAL ESTATE OWNED (Continued)*****Covered Other Real Estate Owned***

Other real estate owned covered under loss sharing agreements with the FDIC is recorded at fair value and is also carried exclusive of the FDIC loss sharing asset. Subsequent decreases in fair value estimates for covered other real estate owned result in a reduction of the covered other real estate owned carrying amounts and an increase in the FDIC loss sharing asset for the reimbursable portion. The following table summarizes covered OREO by property type at March 31, 2010:

Property Type	As of March 31, 2010 (Dollars in thousands)	
Improved residential land	\$	7,554
Commercial real estate		8,725
Multi-family		6,279
Single family residence		2,845
Total	\$	25,403

The following table summarizes the activity related to the covered OREO for the three months ended March 31, 2010:

	As of March 31, 2010 (Dollars in thousands)	
Balance as of January 1, 2010	\$	27,688
Additions		1,776
Loss provisions and fair value adjustments		(2,144)
Reductions related to sales		(1,917)
Balance as of March 31, 2010	\$	25,403

The components of covered OREO expense for the three months ended March 31, 2010 is as follows:

	As of March 31, 2010 (Dollars in thousands)	
Maintenance costs	\$	125
Provision for losses		2,144
(Gain) loss on sale		(101)
	\$	2,168

NOTE 6 FDIC LOSS SHARING ASSET

The FDIC loss sharing asset was initially recorded at fair value which represents the present value of the estimated cash payments from the FDIC for future losses on covered assets. The ultimate collectability of this asset is dependent upon the performance of the underlying covered assets, the

Table of Contents**NOTE 6 FDIC LOSS SHARING ASSET (Continued)**

passage of time and claims paid by the FDIC. The changes in the FDIC loss sharing asset for the three months ended March 31, 2010 are as follows:

	(In thousands)
Balance as of January 1, 2010	\$ 112,817
FDIC share of additional losses	18,278
Cash payments received from the FDIC	(41,848)
Net accretion	(2,107)
Balance as of March 31, 2010	\$ 87,140

NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS*Borrowings*

The following table summarizes our FHLB advances by their maturity dates outstanding at March 31, 2010:

Maturity Date	Amount	Contract Rate	Next Date Callable by FHLB
	(Dollars in thousands)		
8/23/2010	\$ 20,000	4.90%	N/A ^(b)
12/29/2010	25,000	4.23%	N/A ^{(a)(b)}
9/8/2011	20,000	4.67%	N/A ^{(a)(b)}
1/11/2013	50,000	2.71%	7/11/2010 ^(a)
9/9/2013	20,000	4.63%	N/A ^{(a)(b)}
8/25/2014	20,000	4.26%	N/A ^{(a)(b)}
9/23/2014	20,000	3.51%	N/A ^{(a)(b)}
12/11/2017	200,000	3.16%	6/11/2010 ^(a)
1/11/2018	25,000	2.61%	7/11/2010 ^(a)
Unamortized premium ^(c)	6,550		
Total	\$ 406,550		

(a) Quarterly thereafter.

(b) FHLB advances assumed in the Affinity acquisition and prepaid in April 2010. A net prepayment penalty of \$726,000 was charged to earnings at that time.

(c) This amount represents the fair value adjustment on assumed Affinity FHLB advances.

Table of Contents

NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS (Continued)

The FHLB advances outstanding at March 31, 2010, are both term and callable advances. The maturities shown are the contractual maturities for all advances. The callable advances have all passed their initial call dates and are currently callable on a quarterly basis by the FHLB. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates are higher than the advances' stated rates on the call dates. We may repay the advances at any time with a prepayment penalty. Our aggregate remaining borrowing capacity under the FHLB secured lines of credit was \$864.5 million at March 31, 2010. Additionally, the Bank had secured borrowing capacity from the Federal Reserve discount window of \$366.0 million at March 31, 2010. The Bank also maintains unsecured lines of credit of \$117.0 million with correspondent banks for the purchase of overnight funds; these lines are subject to availability of funds.

Subordinated Debentures

The Company had an aggregate of \$129.8 million subordinated debentures outstanding at March 31, 2010. These subordinated debentures were issued in seven separate series. Each issuance has a maturity of thirty years from its date of issue. The subordinated debentures were issued to trusts established by us or entities we have acquired, which in turn issued trust preferred securities, which total \$123.0 million at March 31, 2010. With the exception of Trust I and Trust CI, the subordinated debentures are callable at par, only by the issuer, five years from the date of issuance, subject to certain exceptions. We were permitted to call the debentures in the first five years if the prepayment election relates to one of the following three events: (i) a change in the tax treatment of the debentures stemming from a change in the IRS laws; (ii) a change in the regulatory treatment of the underlying trust preferred securities as Tier 1 capital; and (iii) a requirement to register the underlying trust as a registered investment company. However, redemption in the first five years is subject to a prepayment penalty. Trust I and Trust CI may not be called for 10 years from the date of issuance unless one of the three events described above has occurred and then a prepayment penalty applies. In addition, there is a prepayment penalty if either of these debentures is called 10 to 20 years from the date of their issuance and they may be called at par after 20 years. The proceeds of the subordinated debentures we originated were used primarily to fund several of our acquisitions and to augment regulatory capital. Interest payments made by the Company on subordinated debentures are considered dividend payments by the Federal Reserve Bank. As such, notification to the Federal Reserve Bank is required prior to our intent to pay such interest during any period in which our quarterly net earnings are not sufficient to fund the interest due. Should the FRB object to payment of interest on the subordinated debentures we would not be able to make the payments until approval is received or we no longer need to provide notice under applicable regulations.

Edgar Filing: PACWEST BANCORP - Form 10-Q

NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS (Continued)

The following table summarizes the terms of each issuance of the subordinated debentures outstanding at March 31, 2010:

Series	Date issued	Amount	Maturity	Earliest Call Date by Company without Penalty ⁽¹⁾	Fixed or Variable Rate	Rate Index	Current Rate ⁽²⁾	Next Reset Date
(Dollars in thousands)								
Trust CI	3/23/2000	\$ 10,310	3/8/2030	3/8/2020	Fixed	N/A	11.00%	N/A
Trust I	9/7/2000	8,248	9/7/2030	9/7/2020	Fixed	N/A	10.60%	N/A
Trust V	8/15/2003	10,310	9/17/2033	N/A	Variable	3 month LIBOR + 3.10	3.36%	6/15/2010
Trust VI	9/3/2003	10,310	9/15/2033	N/A	Variable	3 month LIBOR + 3.05	3.31%	6/11/2010
Trust CII	9/17/2003	5,155	9/17/2033	N/A	Variable	3 month LIBOR + 2.95	3.21%	6/15/2010
Trust VII	2/5/2004	61,856	4/23/2034	N/A	Variable	3 month LIBOR + 2.75	3.09%	7/28/2010
Trust CIII	8/15/2005	20,619	9/15/2035	9/15/2010	Fixed ⁽³⁾	N/A	5.85%	9/15/2010
Unamortized premium ⁽⁴⁾		2,942						
Total		\$ 129,750						

(1) As described above, certain issuances may be called earlier without penalty upon the occurrence of certain events.

(2) As of April 28, 2010; excludes debt issuance costs.

(3) Interest rate is fixed until 9/15/2010 and then is variable at a rate of 3-month LIBOR + 1.69%.

(4) This amount represents the fair value adjustment on assumed trusts.

As previously mentioned, the subordinated debentures were issued to trusts established by us, or entities we acquired, which in turn issued \$123.0 million of trust preferred securities. These securities are currently included in our Tier I capital for purposes of determining the Company's Tier I and total risk-based capital ratios. The Board of Governors of the Federal Reserve System, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Although this modification was scheduled to be effective on March 31, 2009, the Federal Reserve postponed the effective date to March 31, 2011. At that time, the Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity less certain intangibles, including goodwill, core deposit intangibles and customer relationship intangibles, net of any related deferred income tax liability. The regulations currently in effect through December 31, 2010, limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for permitted intangibles. We have determined that our Tier I capital ratios would remain above the well-capitalized level had the modification of the capital regulations been in effect at March 31, 2010. We expect that our Tier I capital ratios will be at or above the existing well-capitalized levels on March 31, 2011, the first date on which the modified capital regulations must be applied.

Brokered Deposits

Brokered deposits totaled \$168.7 million at March 31, 2010 and are included in the interest-bearing deposits balance on the accompanying consolidated balance sheet. Such amount includes (a) \$62.8 million of customer deposits that were subsequently participated with other FDIC-insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our customers' deposits, (b) \$104.4 million of wholesale CDs, and

Table of Contents

NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS (Continued)

(c) \$1.5 million of brokered deposits acquired in the Security Pacific Bank (SPB) deposit acquisition. Such amounts exclude \$2.4 million of money desk CDs acquired in SPB deposit and Affinity Bank acquisitions.

NOTE 8 COMMITMENTS AND CONTINGENCES

Lending Commitments

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to extend credit amounting to \$732.4 million and \$790.6 million were outstanding at March 31, 2010 and December 31, 2009.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Most guarantees expire within one year from the date of issuance. The Company generally requires collateral or other security to support financial instruments with credit risk. Standby letters of credit amounting to \$30.3 million and \$31.2 million were outstanding at March 31, 2010 and December 31, 2009.

The Company has investments in low income housing project partnerships which provide the Company income tax credits and in several small business investment companies. As of March 31, 2010 the Company had commitments to contribute capital to these entities totaling \$177,000.

Legal Matters

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. The ultimate outcome and amount of liability, if any, with respect to these legal actions to which we are currently a party cannot presently be ascertained with certainty. In the opinion of management, based upon information currently available to us, any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

NOTE 9 FAIR VALUE MEASUREMENTS

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value including a three-level valuation hierarchy, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement

Table of Contents**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

date reflecting assumptions that a market participant would use when pricing an asset or liability. The hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: Observable inputs other than Level 1, including quoted prices for similar assets and liabilities in active markets, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data, either directly or indirectly, for substantially the full term of the financial instrument. This category generally includes U.S. government and agency securities.

Level 3: Inputs to a valuation methodology that are unobservable, supported by little or no market activity, and significant to the fair value measurement. These valuation methodologies generally include pricing models, discounted cash flow models, or a determination of fair value that requires significant management judgment or estimation. This category also includes observable inputs from a pricing service not corroborated by observable market data, such as pricing covered private label CMOs.

We use fair value to measure certain assets on a recurring basis, primarily securities available for sale; we have no liabilities being measured at fair value. For assets and liabilities measured at the lower of cost or fair value, the fair value measurement criteria may or may not be met during a reporting period and such measurements are therefore considered "nonrecurring" for purposes of disclosing our fair value measurements. Fair value is used on a nonrecurring basis to adjust carrying values for impaired loans and other real estate owned and also to record impairment on certain assets, such as goodwill, core deposit intangibles and other long-lived assets.

The following tables present information on the assets measured and recorded at fair value on a recurring and nonrecurring basis at and for the quarter ended March 31, 2010.

	Balance as of March 31, 2010	Fair Value Measurement Using		
		Quoted Prices in Active Markets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
(Dollars in thousands)				
Measured on a Recurring Basis				
Securities available-for-sale:

Subordinated debentures	129,750	132,050	129,798	146,413

Table of Contents

NOTE 9 FAIR VALUE MEASUREMENTS (Continued)

The following is a description of the valuation methodologies used to measure our assets recorded at fair value (under ASC Topic 820) and for estimating fair value for financial instruments not recorded at fair value (under ASC Topic 825).

Cash and Due from Banks and Federal Funds Sold. The carrying amount is assumed to be the fair value because of the liquidity of these instruments.

Interest-bearing Deposits in Financial Institutions. The carrying amount is assumed to be the fair value given the short-term nature of these deposits.

FHLB stock. The fair value of FHLB stock is based on our recorded investment. In January 2009, the FHLB announced it suspended excess FHLB stock redemptions and dividend payments. Since the announcement, the FHLB has paid two dividends, though at a reduced rate when compared to prior dividends. As a result of these actions, we evaluated the carrying value of our FHLB stock investment. Based on the FHLB's most recent publicly available financial results, its capital position and its bond ratings, we concluded such investment was not impaired at either March 31, 2010 or December 31, 2009.

Securities available-for-sale. Securities available-for-sale are measured and carried at fair value on a recurring basis. Unrealized gains and losses on available-for-sale securities are reported as a component of accumulated other comprehensive income in the consolidated balance sheets. Also see note 4 for further information on unrealized gains and losses on securities available-for-sale.

In determining the fair value of the securities categorized as Level 2, we obtain a report from a nationally recognized broker-dealer detailing the fair value of each investment security we hold as of each reporting date. The broker-dealer uses observable market information to value our fixed income securities, with the primary source being a nationally recognized pricing service. The fair value of the municipal securities is based on a proprietary model maintained by the broker-dealer. We review the market prices provided by the broker-dealer for our securities for reasonableness based on our understanding of the marketplace and we consider any credit issues related to the bonds. As we have not made any adjustments to the market quotes provided to us and they are based on observable market data, they have been categorized as Level 2 within the fair value hierarchy.

Our covered private label collateralized mortgage obligation securities, which we refer to as private label CMOs, are categorized as Level 3 due in part to the inactive market for such securities. There is a wide range of prices quoted for private label CMOs among independent third party pricing services and this range reflects the significant judgment being exercised over the assumptions and variables that determine the pricing of such securities. We consider this subjectivity to be a significant unobservable input and have concluded the private label CMOs should be categorized as a Level 3 measured asset. While the private label CMOs may be based on significant unobservable inputs, our fair value was based on prices provided to us by a nationally recognized pricing service which we also use to determine the fair value of the majority of our securities portfolio. We determined the reasonableness of the fair values by reviewing assumptions at the individual security level about prepayment, default expectations, estimated severity loss factors, projected cash flows and estimated collateral performance, all of which are not directly observable in the market.

Non-covered loans. As non-covered loans are not measured at fair value, the following discussion relates to estimating the fair value disclosures under ASC Topic 825. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type and further segmented into fixed and adjustable rate interest terms and by credit risk categories. The fair value estimates do not take into consideration the value of the loan portfolio in the event the loans are sold

Table of Contents**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

outside the parameters of normal operating activities. The fair value of performing fixed rate loans is estimated by discounting scheduled cash flows through the estimated maturity using estimated market prepayment speeds and estimated market discount rates that reflect the credit and interest rate risk inherent in the loans. The estimated market discount rates used for performing fixed rate loans are the Company's current offering rates for comparable instruments with similar terms. The fair value of performing adjustable rate loans is estimated by discounting scheduled cash flows through the next repricing date. As these loans reprice frequently at market rates and the credit risk is not considered to be greater than normal, the market value is typically close to the carrying amount of these loans.

Non-covered impaired loans. Non-covered impaired loans are measured and recorded at fair value on a non-recurring basis. All of our non-covered nonaccrual loans and restructured loans are considered impaired and are reviewed individually for the amount of impairment, if any. Most of our loans are collateral dependent and, accordingly, we measure impaired loans based on the estimated fair value of such collateral. The fair value of each loan's collateral is generally based on estimated market prices from an independently prepared appraisal, which is then adjusted for the cost related to liquidating such collateral; such valuation inputs result in a nonrecurring fair value measurement that is categorized as a Level 2 measurement. When adjustments are made to an appraised value to reflect various factors such as the age of the appraisal or known changes in the market or the collateral, such valuation inputs are considered unobservable and the fair value measurement is categorized as a Level 3 measurement. The impaired loans categorized as Level 3 also include unsecured loans and other secured loans whose fair values are based significantly on unobservable inputs such as the strength of a guarantor, including an SBA government guarantee, cash flows discounted at the effective loan rate, and management's judgment. The loan balances shown in the above tables represent those nonaccrual and restructured loans for which impairment was recognized during 2010. The amounts shown as losses represent, for the loan balances shown, the impairment recognized during 2010. Of the \$99.9 million of nonaccrual loans at March 31, 2010, loans totaling \$18.1 million were written down to their fair values through charge-offs in 2010.

Covered loans. Covered loans were measured at estimated fair value on the date of acquisition. Thereafter, the fair value of covered loans is measured using the same methodology as that for non-covered loans. The above discussion for non-covered loans and non-covered impaired loans is applicable to covered loans following their acquisition date.

Other real estate owned. The fair value of foreclosed real estate, both non-covered and covered, is generally based on estimated market prices from independently prepared current appraisals or negotiated sales prices with potential buyers; such valuation inputs result in a fair value measurement that is categorized as a Level 2 measurement on a nonrecurring basis. As a matter of policy, appraisals are required annually and may be updated more frequently as circumstances require in the opinion of management. With the deterioration of real estate values during this economic downturn, appraisals have been obtained more regularly and as a result our Level 2 measurement is based on appraisals that are generally less than 9 months old. When a current appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value as a result of known changes in the market or the collateral and there is no observable market price, such valuation inputs result in a fair value measurement that is categorized as a Level 3 measurement. To the extent a negotiated sales price or reduced listing price represents a significant discount to an observable market price, such valuation input would result in a fair value measurement that is also considered a Level 3 measurement. The OREO losses shown above are write-downs based on either a recent appraisal obtained after foreclosure or an accepted purchase offer by an independent third party received after foreclosure.

Table of Contents**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

SBA servicing asset. In accordance with ASC Topic 860, *Accounting for Servicing of Financial Assets*, the SBA servicing asset, included in other assets in the balance sheet, is carried at its implied fair value of \$1.9 million. The fair value of the servicing asset is estimated by discounting future cash flows using market-based discount rates and prepayment speeds. The discount rate is based on the current US Treasury yield curve, as published by the Department of the Treasury, plus a spread for the marketplace risk associated with these assets. We utilize estimated prepayment vectors using SBA prepayment information provided by Bloomberg for pools of similar assets to determine the timing of the cash flows. These nonrecurring valuation inputs are considered to be Level 3 inputs.

FDIC loss sharing asset. The FDIC loss sharing asset was measured at estimated fair value on the date of acquisition. The fair value was determined by discounting estimated future cash flows using the long-term risk free rate plus a premium. Subsequent additions to the asset are valued at par as it is anticipated that these amounts will be shortly received.

Deposits. Deposits are carried at historical cost. The fair value of deposits with no stated maturity, such as noninterest bearing demand deposits, savings and checking accounts, is equal to the amount payable on demand as of the balance sheet date. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. No value has been separately assigned to the Company's long-term relationships with its deposit customers, such as a core deposit intangible.

Borrowings. Borrowings are carried at amortized cost. The fair value of adjustable rate borrowings is estimated to be the carrying amount because rates paid are the same as rates currently offered for borrowings with similar remaining maturities and characteristics. The fair value of fixed rate borrowings is calculated by discounting scheduled cash flows through the estimated maturity or call dates using estimated market discount rates that reflect current rates offered for borrowings with similar remaining maturities and characteristics.

Subordinated debentures. Subordinated debentures are carried at amortized cost. In accordance with ASC Topic 825, the fair value of the subordinated debentures is based on the discounted value of contractual cash flows for fixed rate securities. The discount rate is estimated using the rates currently offered for similar securities of similar maturity. The fair value of subordinated debentures with variable rates is deemed to be the carrying value.

Commitments to extend credit and standby letters of credit. The majority of our commitments to extend credit carry current market interest rates if converted to loans. Because these commitments are generally unassignable by either the borrower or us, they only have value to the borrower and us. The estimated fair value approximates the recorded deferred fee amounts and is excluded from the table above because it is not material.

Limitations

Fair value estimates are made at a specific point in time and are based on relevant market information and information about the financial instrument. These estimates do not reflect income taxes or any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a portion of the Company's financial instruments, fair value estimates are based on what management believes to be conservative judgments regarding expected future cash flows, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimated fair values are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Since the

Table of Contents**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

fair values have been estimated as of March 31, 2010, the amounts that will actually be realized or paid at settlement or maturity of the instruments could be significantly different.

NOTE 10 NET EARNINGS (LOSS) PER SHARE

The following is a summary of the calculation of basic and diluted net earnings (loss) per share for the periods indicated:

	Quarter Ended		
	3/31/10	12/31/09	3/31/09
(In thousands except per share data)			
Basic earnings (loss) per share			
Net earnings (loss)	\$ (60,533)	\$ (7,780)	\$ 1,445
Less: earnings allocated to unvested restricted stock ^(a)	(8)	(5)	(227)
Net earnings (loss) allocated to common shares	\$ (60,541)	\$ (7,785)	\$ 1,218
Total weighted-average basic shares and unvested restricted stock outstanding	35,607.8	35,018.4	31,782.4
Less: weighted-average unvested restricted stock outstanding	(1,245.7)	(1,130.5)	(1,287.2)
Total weighted-average basic shares outstanding	34,362.1	33,887.9	30,495.2
Basic earnings (loss) per share	\$ (1.76)	\$ (0.23)	\$ 0.04
Diluted earnings (loss) per share			
Net earnings (loss) allocated to common shares	\$ (60,541)	\$ (7,785)	\$ 1,218
Total weighted-average basic shares and unvested restricted stock outstanding	35,607.8	35,018.4	31,782.4
Add: stock options and warrants outstanding			0.5
Less: weighted-average unvested restricted stock outstanding	(1,245.7)	(1,130.5)	(1,287.2)
Total weighted-average diluted shares outstanding	34,362.1	33,887.9	30,495.7
Diluted earnings (loss) per share	\$ (1.76)	\$ (0.23)	\$ 0.04

(a) Represents cash dividends paid to holders of unvested restricted stock, net of estimated forfeitures, plus undistributed earnings amounts available to holders of unvested restricted stock, if any.

On January 1, 2009, the *Earnings per Share* topic of the Codification under the section regarding *Special Issues Affecting Basic and Diluted EPS* (ASC 260-10-45) became effective for us. This pronouncement clarified that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities and are included in the two-class method of determining basic and diluted earnings per shares. All our unvested restricted stock participates with our common stockholders in dividends. Application of the new standard results in a reduction of net earnings available to common stockholders and lower earnings per share when compared to the previous requirements.

NOTE 11 STOCK COMPENSATION PLANS***Restricted Stock***

At March 31, 2010, there were outstanding 904,574 shares of unvested time-based restricted common stock and 520,000 shares of unvested performance-based restricted common stock. The

Table of Contents

NOTE 11 STOCK COMPENSATION PLANS (Continued)

awarded shares of time-based restricted common stock vest over a service period of three to five years from date of the grant. The awarded shares of performance-based restricted common stock vest in full on the date the Compensation, Nominating and Governance, or CNG, Committee of the Board of Directors, as Administrator of the Company's 2003 Stock Incentive Plan, or the 2003 Plan, determines that the Company achieved certain financial goals established by the CNG Committee as set forth in the grant documents. Both time-based and performance-based restricted common stock vest immediately upon a change in control of the Company as defined in the 2003 Plan and upon death of the employee.

Compensation expense related to awards of restricted stock is based on the fair value of the underlying stock on the award date and is recognized over the vesting period using the straight-line method. The vesting of performance-based restricted stock awards and recognition of related compensation expense may occur over a shorter vesting period if financial performance targets are achieved earlier than anticipated. In 2007, the amortization of certain performance-based restricted stock awards was suspended. In 2008 we concluded it was improbable that the financial targets would be met for the performance-based stock awards and we reversed the accumulated amortization on those awards. If and when the attainment of such performance targets is deemed probable in future periods, a catch-up adjustment will be recorded and amortization of such performance-based restricted stock will begin again. The total amount of unrecognized compensation expense related to the performance-based restricted stock for which amortization was suspended totaled \$27.7 million at March 31, 2010. The unvested performance-based restricted stock awarded in 2006 expires in 2013. The unvested performance-based restricted stock awarded in 2007 and 2008 expires in 2017. Restricted stock amortization totaled \$2.3 million and \$2.2 million for the quarters ended March 31, 2010, and 2009. Such amounts are included in compensation expense in the accompanying consolidated statements of earnings.

The Company's 2003 Plan permits stock based compensation awards to officers, directors, key employees and consultants. The 2003 Plan authorizes grants of stock-based compensation instruments to purchase or issue up to 5,000,000 shares of authorized but unissued Company common stock, subject to adjustments provided by the 2003 Plan. As of April 29, 2010, there were 1,190,568 shares available for grant under the 2003 Plan.

NOTE 12 RECENT ACCOUNTING PRONOUNCEMENTS

FASB ASC 810 Consolidation ("ASC 810") became effective for us on January 1, 2010, and was amended to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC 810 was effective January 1, 2010 and did not have an impact on our financial statements.

FASB ASC 860 Transfers and Servicing ("ASC 860") was amended to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. The new authoritative accounting guidance eliminates the concept of a "qualifying special-purpose entity" and changes the requirements for derecognizing financial assets. The new authoritative accounting guidance also requires additional disclosures about

Table of Contents

NOTE 12 RECENT ACCOUNTING PRONOUNCEMENTS (Continued)

all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. The new authoritative accounting guidance under ASC 860 was effective January 1, 2010 and did not have an impact on our financial statements.

In January 2010, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") 2010-06, "*Improving Disclosures about Fair Value Measurements*". ASU 2010-06 requires additional disclosures about fair value measurements including transfers in and out of Levels 1 and 2 and a higher level of disaggregation for the different types of financial instruments. For the reconciliation of Level 3 fair value measurements, information about purchases, sales, issuances and settlements are presented separately. This standard is effective for interim and annual reporting periods beginning after December 15, 2009 with the exception of revised Level 3 disclosure requirements which are effective for interim and annual reporting periods beginning after December 15, 2010. Comparative disclosures are not required in the year of adoption. We adopted the provisions of the standard on January 1, 2010, which did not have a material impact on our financial statements

NOTE 13 COMMON STOCK

On December 22, 2009, PacWest Bancorp filed a registration statement with the SEC to offer to sell, from time to time, shares of common stock, preferred stock, and other equity linked securities for an aggregate initial offering price of up to \$350.0 million. The registration statement was declared effective on January 8, 2010. Proceeds from the offering are anticipated to be used to fund future acquisitions of banks and financial institutions and for general corporate purposes.

On March 1, 2010 holders of 1,348,040 warrants to acquire PacWest Bancorp common stock exercised such warrants for net proceeds of \$26.6 million. The warrants, which had a strike price of \$20.20 per share, represented 99% of the 1,361,656 six-month warrants issued in August 2009. An additional 1,361,657 million warrants issued in August 2009 with a strike price of \$20.20 remain outstanding, of which 1,348,040 expire on August 27, 2010 and 13,617 expire on August 30, 2010.

NOTE 14 SUBSEQUENT EVENTS

We have evaluated events that have occurred subsequent to March 31, 2010 and have concluded there are no subsequent events that would require recognition in the accompanying consolidated financial statements.

On April 21, 2010, we prepaid \$125.0 million of our outstanding FHLB advances. See note 7.

Table of Contents

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Information

This Quarterly Report on Form 10-Q contains certain forward-looking information about the Company and its subsidiaries, which statements are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are forward-looking statements. Such statements involve inherent risks and uncertainties, many of which are difficult to predict and are generally beyond the control of the Company. We caution readers that a number of important factors could cause actual results to differ materially from those expressed in, implied or projected by, such forward-looking statements. Risks and uncertainties include, but are not limited to:

lower than expected revenues;

credit quality deterioration or pronounced and sustained reduction in real estate market values could cause an increase in the allowance for credit losses and a reduction in earnings;

increased competitive pressure among depository institutions;

the Company's ability to complete future acquisitions and to successfully integrate such acquired entities or achieve expected benefits, synergies and/or operating efficiencies within expected time-frames or at all;

the possibility that personnel changes will not proceed as planned;

the cost of additional capital is more than expected;

a change in the interest rate environment reduces interest margins;

asset/liability repricing risks and liquidity risks;

pending legal matters may take longer or cost more to resolve or may be resolved adversely to the Company;

general economic conditions, either nationally or in the market areas in which the Company does or anticipates doing business, are less favorable than expected;

environmental conditions, including natural disasters, may disrupt our business, impede our operations, negatively impact the values of collateral securing the Company's loans or impair the ability of our borrowers to support their debt obligations;

the economic and regulatory effects of the continuing war on terrorism and other events of war, including the conflicts in Iraq, Afghanistan, and neighboring countries;

legislative or regulatory requirements or changes adversely affecting the Company's business;

changes in the securities markets; and

regulatory approvals for any capital activities cannot be obtained on the terms expected or on the anticipated schedule.

If any of these risks or uncertainties materializes, or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. The Company assumes no obligation to update such forward-looking statements.

Table of Contents

Overview

We are a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as the holding company for our subsidiary bank, Pacific Western Bank, which we refer to as Pacific Western or the Bank.

Pacific Western is a full-service community bank offering a broad range of banking products and services including: accepting time and demand deposits; originating loans, including commercial, real estate construction, SBA-guaranteed, consumer, and international loans; and providing other business-oriented products. Our operations are primarily located in Southern California and the Bank focuses on conducting business with small to medium-sized businesses and the owners and employees of those businesses in our marketplace. Through our asset-based lending operation we also operate in Arizona, Northern California, the Pacific Northwest, and Texas. At March 31, 2010, our assets totaled \$5.2 billion, of which total loans totaled \$3.9 billion, of which \$591.7 million are covered loans. At that date, the loan portfolio was broken down as follows: approximately 70% were real estate mortgage loans, 20% were commercial loans, 10% were real estate construction loans, and less than 1% were consumer and other loans. These percentages include some foreign loans, primarily to individuals or entities with business in Mexico, representing 1% of total non-covered loans. Our portfolio's value and credit quality is affected in large part by real estate trends in Southern California, which have been negative over the last several quarters.

Pacific Western competes actively for deposits, and emphasizes solicitation of noninterest-bearing deposits. In managing the top line of our business, we focus on quality loan growth and loan yield, deposit cost, and net interest margin, as net interest income, on a year-to-date basis, accounts for 73% of our net revenues (net interest income plus noninterest income).

Key Performance Indicators

Among other factors, our operating results depend generally on the following:

The Level of Our Net Interest Income

Net interest income is the excess of interest earned on our interest-earning assets over the interest paid on our interest-bearing liabilities. The low market interest rate environment that continued during 2009 and 2010 has reduced our net interest margin relative to our historical performance. Our balance sheet structure resulted in the yield on our earning assets decreasing more rapidly and significantly than the cost of our funding sources during 2009 compared to prior years. However, for the first quarter of 2010 our net interest margin expanded compared to the prior quarter and the first quarter of 2009 due to lowering the cost of our funding sources more significantly than the yield on our earning assets. Nonetheless, a sustained low interest rate environment combined with tight marketplace liquidity and low loan growth may lower both our net interest income and net interest margin going forward.

Our primary interest-earning asset is loans. Our primary interest-bearing liabilities include deposits, borrowings, and subordinated debentures. We attribute our high net interest margin to our loan-to-deposit ratio which was well over 100% for the last 4 years and a high level of noninterest-bearing deposits. While our deposit balances will fluctuate depending on deposit holders' perceptions of alternative yields available in the market, we attempt to minimize these variances by attracting a high percentage of noninterest-bearing deposits, which have no expectation of yield. At March 31, 2010, approximately 33% of our total deposits were noninterest-bearing.

The disruptions in the financial credit and liquidity markets have resulted in increased competition from financial institutions seeking to maintain liquidity. In addition to deposits, we have borrowing capacity under various credit lines which we use for liquidity needs such as funding loan demand, managing deposit flows and interim acquisition financing. This borrowing capacity is relatively flexible and has become one of the least expensive sources of funds. However, our borrowing lines are

Table of Contents

considered a secondary source of liquidity as we serve our local markets and customers with our deposit products.

Loan Growth

We generally seek new lending opportunities in the \$500,000 to \$10 million range, try to limit loan maturities for commercial loans to one year, for construction loans up to 18 months, and for commercial real estate loans up to ten years, and to price lending products so as to preserve our interest spread and net interest margin. We sometimes encounter strong competition in pursuing lending opportunities such that potential borrowers obtain loans elsewhere at lower rates than those we offer. We have continued to reduce our exposure to residential construction and foreign loans, including limiting the amount of new loans in these categories. Our ability to make new loans is dependent on economic factors in our market area, borrower qualifications, competition, and liquidity, among other items. Considering the current state of the economy in Southern California and the competition among banks for liquidity, loan growth was not a focus area for us in 2009 and we expect the same for 2010.

The Magnitude of Credit Losses

We stress credit quality in originating and monitoring the loans we make and measure our success by the levels of our nonperforming assets, net charge-offs and allowance for credit losses. Our allowance for credit losses is the sum of our allowance for loan losses and our reserve for unfunded loan commitments and relates only to our non-covered loans. Provisions for credit losses are charged to operations as and when needed for both on and off balance sheet credit exposure. Loans which are deemed uncollectible are charged off and deducted from the allowance for loan losses. Recoveries on loans previously charged off are added to the allowance for loan losses. During the three months ended March 31, 2010, we made a provision for credit losses totaling \$133.2 million composed of \$112.5 million on non-covered loans and \$20.7 million on covered loans. The provision for credit losses on the non-covered portfolio resulted mostly from the charge-offs from the classified loan sale and other actions to promptly identify and resolve problem credits. Additionally, based on our reserve methodology, the level of classified and non-accrual loans, usage trends of unfunded loan commitments, general market conditions, and portfolio risk concentrations, among other factors, contributed to our provision for credit losses. The provision for credit losses on the covered loan portfolio reflects an increase in the covered loan allowance for credit losses resulting from credit deterioration since the acquisition date.

We regularly review our loans to determine whether there has been any deterioration in credit quality stemming from economic conditions or other factors which may affect collectability of our loans. Changes in economic conditions, such as inflation, unemployment, increases in the general level of interest rates, declines in real estate values and negative conditions in borrowers' businesses, could negatively impact our customers and cause us to adversely classify loans and increase portfolio loss factors. An increase in classified loans generally results in increased provisions for credit losses. Any deterioration in the real estate market may lead to increased provisions for credit losses because of our concentration in real estate loans.

The Level of Our Noninterest Expense

Our noninterest expense includes fixed and controllable overhead, the major components of which are compensation, occupancy, insurance and assessments, data processing, professional fees and communications expense. We measure success in controlling such costs through monitoring of the efficiency ratio. We calculate the efficiency ratio by dividing noninterest expense by net revenues (the sum of net interest income plus noninterest income). Accordingly, a lower percentage reflects lower

Table of Contents

operating expenses relative to net revenue. The consolidated operating efficiency ratios have been as follows:

Quarterly Period	Ratio
First quarter of 2010	63.8%
Fourth quarter 2009	53.7%
Third quarter 2009	37.1%
Second quarter 2009	85.5%
First quarter 2009	71.0%

The increase in the efficiency ratio for the first quarter of 2010 compared to the fourth quarter of 2009 was due mostly to lower net interest income and higher OREO costs. The gain from the Affinity acquisition reduced the third quarter of 2009 efficiency ratio by 4,840 basis points from 85.5% to 37.1%. The general increase in efficiency ratios over the last several quarters is caused mostly by lower interest income. Interest income levels have been negatively affected by slow loan growth and low market interest rates.

Critical Accounting Policies

The Company's accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. The Company has identified several policies as being critical because they require management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These policies relate to the allowances for credit losses and the carrying values of intangible assets and deferred income tax assets. For further information, refer to our Annual Report on Form 10-K for the year ended December 31, 2009.

Results of Operations*Earnings Performance*

Certain discussion in this Form 10-Q contains non-GAAP financial disclosures for tangible capital. The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. Tangible common equity is a non-GAAP financial measure used by investors, analysts, and bank regulatory agencies. Tangible common equity includes total equity, less any preferred equity, goodwill and intangible assets. The methodology of determining tangible common equity may differ among companies. Management reviews tangible common equity along with other measures of capital adequacy on a regular basis and has included this non-GAAP financial information, and the corresponding reconciliation to total equity, because of current interest in such information on the part of market participants.

These non-GAAP financial measures are presented for supplemental informational purposes only for understanding the Company's operating results and should not be considered a substitute for financial information presented in accordance with United States generally accepted accounting principles (GAAP). The following table presents performance ratios in accordance with GAAP and a reconciliation of the non-GAAP financial measurements to the GAAP financial measurements.

Edgar Filing: PACWEST BANCORP - Form 10-Q

30

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

First quarter of 2010 compared to fourth quarter of 2009

The net loss for the first quarter of 2010 of \$60.5 million, or \$1.76 per diluted share, compared to the net loss of \$7.8 million, or \$0.23 per diluted share, for the fourth quarter of 2009. The first quarter included a loss on the Company's sale of \$323.6 million of classified loans in February 2010 for \$200.6 million in cash. Additionally the first quarter of 2010 was impacted significantly by other credit-related costs.

First quarter of 2010 compared to the first quarter of 2009

The net loss of \$60.5 million, or \$1.76 per diluted share, for the quarter ended March 31, 2010 compared to net earnings of \$1.4 million, or \$0.04 per diluted share, for the quarter ended March 31, 2009. The decrease in net earnings is due mainly to the first quarter of 2010 classified loan sale along with higher credit and OREO costs.

Net Interest Income. Net interest income, which is our principal source of revenue, represents the difference between interest earned on assets and interest paid on liabilities. Net interest margin is net interest income expressed as a percentage of average interest-earning assets. Net interest income is affected by changes in both interest rates and the volume of average interest-earning assets and interest-bearing liabilities. The following table presents, for the periods indicated, the distribution of average assets, liabilities and stockholders' equity, as well as interest income and yields earned on average interest-earning assets and interest expense and costs on average interest-bearing liabilities:

	Quarter Ended								
	March 31, 2010			December 31, 2009			March 31, 2009

(a) Includes nonaccrual loans and loan fees.

(b) Yields on loans and securities have not been adjusted to a tax-equivalent basis because the impact is not material.

Table of Contents

First quarter of 2010 compared to fourth quarter of 2009

Net interest income totaled \$58.0 million for the first quarter of 2010 compared to \$62.3 million for the fourth quarter of 2009. The \$4.3 million net decrease is due mostly to lower loan balances resulting from the classified loan sale. Deposit interest expense declined \$586,000 due mostly to lower offering rates on money market accounts. Borrowing costs decreased \$1.7 million due mainly to lower average balances.

Our net interest margin for the first quarter of 2010 was 4.90%, an increase of 11 basis points from the 4.79% posted for the fourth quarter of 2009. The yield on average loans was 6.27% for the first quarter of 2010 compared to 6.29% for the prior quarter. Net reversals of interest income on nonaccrual loans negatively impacted the first quarter's net interest margin and loan yield by 8 basis points. The cost of interest bearing deposits declined 5 basis points to 1.01% and all-in deposit cost declined 4 basis points to 0.68%; such declines resulted from rate reductions on money market deposits, downward repricing of higher-rate acquired deposits, and higher average demand deposits.

First quarter of 2010 compared to the first quarter of 2009

The \$9.3 million increase in net interest income for the first quarter of 2010 compared to the same quarter of 2009 was mainly a result of higher interest-earning assets and lower deposit and borrowing costs. Interest income increased \$5.5 million for the first quarter of 2010 over the same quarter of 2009 due to loan and investment balances added from the Affinity acquisition. Interest expense decreased \$3.7 million for the first quarter of 2010 compared to the same quarter of 2009 due to lower rates on all interest-bearing liabilities.

Our net interest margin for the first quarter of 2010 increased 19 basis points when compared to the first quarter of 2009. This increase is due primarily to lower costs on interest-bearing liabilities as a result of the decline in market interest rates.

Provision for Credit Losses. The amount of the provision for credit losses in a reporting period is a charge against earnings in that reporting period. The provisions for credit losses are based on our reserve methodology and reflect our judgments about the adequacy of the allowance for loan losses and the reserve for unfunded loan commitments. In determining the amount of the provision, we consider certain quantitative and qualitative factors including our historical loan loss experience, the volume and type of lending we conduct, the results of our credit review process, the level and trends of classified, criticized, past due and nonaccrued loans, regulatory policies, usage trends of unfunded loan commitments, portfolio concentrations, general economic conditions, underlying collateral values, off-balance sheet exposures, and other factors regarding collectability and impairment. To the extent we experience, for example, increased levels of documentation deficiencies, adverse changes in collateral values, or negative changes in economic and business conditions which adversely affect our borrowers, our classified loans may increase. Increases in our classified loans generally result in provisions for credit losses.

We made provisions for credit losses totaling \$133.2 million during the first quarter of 2010 compared to \$52.9 million for the fourth quarter of 2009 and \$14.0 million for the first quarter of 2009. The first quarter 2010 provision for credit losses was composed of a \$112.9 million addition to the allowance for loan losses on the non-covered loan portfolio, a \$20.7 million addition to the covered loan allowance for credit losses and a \$345,000 reduction to the reserve for unfunded loan commitments. The 2009 provision for credit losses was composed of a \$14.0 million addition to the allowance for loan losses.

Net non-covered loans charged-off in 2010 increased by \$139.3 million to \$145.4 million when compared to 2009. Net charge-offs on non-covered loans included \$123 million related to the classified loan sale completed during the quarter and \$22 million in other non-covered loan charge-offs; this

Table of Contents

compares to total net charge-offs of \$31.2 million in the fourth quarter of 2009. These charge-off levels reflect the aggressive actions we are taking to promptly identify and resolve problem credits. The commercial real estate loan segment of the loan portfolio continues to be under stress from the current economic conditions. A protracted economic down cycle will increase the stress on this portion of the loan portfolio and we may continue to experience increased levels of charge-offs and provisions.

The allowance for credit losses on the non-covered portfolio totaled \$91.4 million at March 31, 2010, and represented 2.81% of the non-covered loan balances at that date compared to 3.35% at December 31, 2009. The lower coverage ratio of 2.81%, when compared to December 31, 2009, reflects an improved credit risk profile with lower non-covered nonaccrual and adversely classified loans as a result of the classified loan sale.

The \$20.7 million provision for credit losses on the covered portfolio reflects credit deterioration on covered loans. This provision was based on a March 31, 2010 analysis of acquired loans, which indicated a decrease in expected cash flows from previous estimates. Under the terms of the FDIC loss sharing agreement, the FDIC absorbs 80% of the losses reflected by the provision. As a result, \$16.6 million is included in the non-interest income caption "Increase in FDIC loss sharing asset" and represents 80% of the credit loss provision for covered loans.

Increased provisions for credit losses may be required in the future based on loan and unfunded commitment growth, the effect changes in economic conditions, such as inflation, unemployment, market interest rate levels, and real estate values may have on the ability of our borrowers to repay their loans, and other negative conditions specific to our borrowers' businesses. See further discussion in *Allowance for Credit Losses on Non-Covered Loans* and *Allowance for Credit Losses on Covered Loans* contained herein.

Noninterest Income. The following table summarizes noninterest income by category for the periods indicated:

	March 31, 2010	December 31, 2009	Quarter Ended September 30, 2009	June 30, 2009	March 31, 2009
(Dollars in thousands)					
Service charges and fees on deposit accounts	\$ 2,729	\$ 2,890	\$ 2,960	\$ 3,009	\$ 3,149
Other commissions and fees	1,790	1,799	1,721	1,746	1,685
Increase in cash surrender value of life insurance	398	375	371	394	439
Increase in FDIC loss sharing asset	16,172	16,314			
Gain from Affinity acquisition			66,989		
Other income	180	450	584	224	808
Total noninterest income	\$ 21,269	\$ 21,828	\$ 72,625	\$ 5,373	\$ 6,081

First quarter of 2010 compared to fourth quarter of 2009

Noninterest income for the first quarter of 2010 totaled \$21.3 million compared to \$21.8 million for the fourth quarter of 2009. First quarter noninterest income includes FDIC loss sharing income of \$16.2 million compared to \$16.3 million recorded in the prior quarter. First quarter FDIC loss sharing income includes (a) \$18.3 million representing the FDIC's share of losses from credit deterioration on covered loans and covered OREO occurring subsequent to the Affinity acquisition date and (b) a \$2.1 million reduction for other covered loan activity. The loss sharing income represents the FDIC's 80% share of the current period's credit loss provision on covered loans and write-downs on covered OREO under the terms of the loss sharing agreement.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

First quarter of 2010 compared to first quarter of 2009

The \$15.2 million increase in noninterest income for the first quarter of 2010 compared to the same quarter of 2009 is due mostly to the FDIC loss sharing income of \$16.2 million.

Noninterest Expense. The following table summarizes noninterest expense by category for the periods indicated:

	Quarter Ended				
	March 31, 2010	December 31, 2009	September 30, 2009	June 30, 2009	March 31, 2009
	(Dollars in thousands)				
Compensation	\$ 19,411	\$ 20,320	\$ 20,128	\$ 18,394	\$ 19,331
Occupancy	6,958	7,100	6,435	6,462	6,386
Data processing	1,969	1,831	1,810	1,677	1,628

Reorganization and lease charges					1,215
Other	3,455	3,329	2,842	3,130	2,625
Total noninterest expense	\$ 50,570	\$ 45,213	\$ 47,091	\$ 47,931	\$ 38,969
Efficiency ratio	63.8%	53.7%	37.1%	85.5%	71.0%

First quarter of 2010 compared to fourth quarter of 2009

Noninterest expense totaled \$50.6 million for the first quarter of 2010 compared to \$45.2 million for the fourth quarter of 2009. The \$5.4 million increase was caused mostly by a \$5.7 million increase in OREO costs. The first quarter OREO expenses include carrying value write-downs of \$10.5 million, holding costs of \$1.1 million, and net realized gains on sales of \$1.0 million. The write-downs include \$8.3 million on non-covered OREO and \$2.2 million on covered OREO. Such write-downs are due to lower OREO valuations based on either new appraisals or reduced listing prices as part of our ongoing marketing efforts. Compensation costs decreased \$909,000 due to lower discretionary compensation accruals offset by higher restricted stock amortization expense. Insurance and assessments increased \$448,000 due to higher deposit insurance premiums that went into effect at the beginning of 2010.

Noninterest expense includes amortization of time-based and performance-based restricted stock, which is included in compensation, and intangible asset amortization. Amortization of restricted stock totaled \$2.3 million for the fourth quarter of 2010 compared to \$1.9 million for the fourth quarter of 2009. Amortization expense for restricted stock awards is estimated to be \$8.4 million for 2010. Intangible asset amortization totaled \$2.4 million for the first quarter of 2010 and is estimated to be \$9.5 million for 2010. The 2010 estimates of both restricted stock award expense and intangible asset amortization are subject to change.

First quarter of 2010 compared to first quarter of 2009

Noninterest expense increased \$11.6 million for first quarter of 2010 when compared to the same period of 2009. The increase in noninterest expense is due to higher OREO costs of \$9.6 million, higher insurance costs of \$676,000 and higher occupancy costs of \$653,000. The higher OREO expenses are due to those costs mention above. The higher insurance costs relate entirely to higher FDIC

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

deposit insurance premiums, including the cost to participate in the Temporary Liquidity Guarantee Program. Occupancy costs increased due to additional branches from the Affinity acquisition.

Income Taxes. The effective tax rate for the first quarter of 2010 was 42.1% compared to 44.3% for the fourth quarter of 2009. Recurring tax credits, non deductible expenses and the magnitude of pretax losses influence the effective rate; combined, these items increased the effective rate for the fourth quarter of 2009 compared to the first quarter of 2010. The Company's blended Federal and State statutory rate is 42.0%.

Balance Sheet Analysis

Non-Covered Loans. Gross non-covered loans total \$3.3 billion at March 31, 2010. Our loan portfolio's value and credit quality is affected in large part by real estate trends in Southern California which have been negative for the last several quarters. The real estate construction category includes commercial real estate loans totaling \$180.2 million and residential real estate construction loans totaling \$104.1 million, of which \$100.9 million is nonowner occupied. See also Balance Sheet Analysis *Credit Quality* for further information on nonowner occupied residential construction loan exposure. The real estate mortgage loan category includes loans secured by commercial real estate totaling \$1.9 billion and loans secured by residential real estate totaling \$259.8 million.

At March 31, 2010, the non-covered SBA loan portfolio totaled \$135.3 million and was composed of \$98.9 million in SBA 504 loans and \$36.4 million in SBA 7(a) and Express loans. The SBA 504 loans are secured by first trust deeds on owner-occupied commercial real estate with loan-to-value ratios of generally 50% or less at the time of origination. SBA 7(a) loans are secured by borrowers' real estate and/or business assets and are covered by an SBA guarantee of up to 85% of the loan amount. The SBA 504 loans are included in the real estate mortgage category and the SBA 7(a) and Express loans are included in the commercial category.

The following table presents the balance of each major category of non-covered loans at the dates indicated:

	At March 31, 2010		At December 31, 2009		At March 31, 2009	
	Amount	% of total	Amount	% of total	Amount	% of total
(Dollars in thousands)						
Loan Category:						
Domestic:						
Commercial	\$ 720,105	22%	\$ 781,003	21%	\$ 779,971	20%
Real estate, construction	284,274	9	440,286	12	583,709	15
Real estate, mortgage	2,197,295	67	2,423,712	65	2,482,790	63
Consumer	28,804	1	32,138	1	38,615	1

Gross loans	3,258,889	100%	3,713,382	100%	3,932,166	100%
Less: unearned income	(5,055)		(5,999)		(7,881)	
Less: allowance for loan losses	(86,163)		(118,717)		(71,361)	
Total net loans	\$ 3,167,671		\$ 3,588,666		\$ 3,852,924	

(a) Amount is less than 1%.

Non-covered loans, net of unearned income, decreased \$454 million during the first quarter of 2010 due mostly to the classified loan sale. On February 23, 2010 we completed the sale of 61 non-covered adversely classified loans totaling \$323.6 million, which included \$107.6 million of

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

nonaccrual loans, to an institutional buyer for \$200.6 million in cash. The sale was on a servicing-released basis and without recourse to Pacific Western Bank. Declines in the non-covered portfolio continue as a result of weakened economic conditions which have caused higher levels of charge-offs, lower demand for new loans, and fewer acceptable lending opportunities.

The following table presents our non-covered real estate mortgage loan portfolio:

Loan Category	At March 31, 2010		
	Balance	Number of Loans	Average Loan Balance
(Dollars in thousands)			
Commercial real estate mortgage:			
Owner-occupied	\$ 278,189	385	\$ 723
Retail	396,721	227	1,748
Office buildings	314,682	247	1,274

Table of Contents

The above loans are subject to a loss sharing agreement with the FDIC under which we will be reimbursed for a substantial portion of any future losses on them. Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses on covered assets exceeding \$234 million. The loss sharing arrangement for non-residential and residential loans is in effect for 5 years and 10 years, respectively, from the August 28, 2009 acquisition date and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date.

Allowance for Credit Losses on Non-Covered Loans. The allowance for credit losses on non-covered loans is the combination of the allowance for loan losses and the reserve for unfunded loan commitments. The allowance for credit losses on non-covered loans relates only to loans which are not subject the loss sharing agreement with the FDIC. The allowance for loan losses is reported as a reduction of outstanding loan balances and the reserve for unfunded loan commitments is included within other liabilities. Generally, as loans are funded they are included in our reserve methodology for the allowance for loan losses and the amount of the commitment reserve applicable to such funded loans is relieved from the reserve for unfunded loan commitments. At March 31, 2009, the allowance for credit losses on non-covered loans totaled \$91.4 million and was comprised of the allowance for loan losses of \$86.2 million and the reserve for unfunded loan commitments of \$5.2 million. The following discussion is for non-covered loans and the allowance for credit losses thereon. Refer to "Allowance for Credit Losses on Covered Loans" for the policy on covered loans.

The provision for credit losses increased substantially from the amounts recognized in the fourth quarter of 2009. Such increase was due to the classified loan sale. The allowance for credit losses at March 31, 2010 decreased since year end due to the improved credit risk profile as the classified loan sale substantially reduced non-covered nonaccrual and adversely classified loans when compared to December 31, 2009.

An allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio and other extensions of credit at the balance sheet date. The allowance is based upon a continuing review of the portfolio, past loan loss experience, current economic conditions which may affect the borrowers' ability to pay, and the underlying collateral value of the loans. Loans which are deemed to be uncollectible are charged off and deducted from the allowance. The provision for loan losses and recoveries on loans previously charged off are added to the allowance.

The methodology we use to estimate the amount of our allowance for credit losses is based on both objective and subjective criteria. While some criteria are formula driven, other criteria are subjective inputs included to capture environmental and general economic risk elements which may trigger losses in the loan portfolio, and to account for the varying levels of credit quality in the loan portfolios of the entities we have acquired that have not yet been captured in our objective loss factors.

Specifically, our allowance methodology contains four elements: (a) amounts based on specific evaluations of impaired loans; (b) amounts of estimated losses on several pools of loans categorized by type; (c) amounts of estimated losses for loans adversely classified based on our loan review process; and (d) amounts for environmental and general economic factors that indicate probable losses were incurred but were not captured through the other elements of our allowance process.

Impaired loans are identified at each reporting date based on certain criteria and individually reviewed for impairment. A loan is considered impaired when it is probable that a creditor will be unable to collect all amounts due according to the original contractual terms of the loan agreement. We measure impairment of a loan based upon the fair value of the loan's collateral if the loan is collateral dependent or the present value of cash flows, discounted at the loan's effective interest rate, if the loan is not collateralized. The impairment amount on a collateral dependent loan is charged-off

Table of Contents

to the allowance and the impairment amount on a loan that is not collateral dependent is set up as a specific reserve. Increased charge-offs generally result in increased provisions for credit losses.

Our loan portfolio, excluding impaired loans which are evaluated individually, is categorized into several pools for purposes of determining allowance amounts by loan pool. The loan pools we currently evaluate are: commercial real estate construction, residential real estate construction, SBA real estate, hospitality real estate, real estate other, commercial collateralized, commercial unsecured, SBA commercial, consumer, foreign, asset-based, and factoring. Within these loan pools, we then evaluate loans not adversely classified, which we refer to as "pass" credits, separately from adversely classified loans. The adversely classified loans are further grouped into three credit risk rating categories: special mention, substandard and doubtful. The allowance amounts for pass rated loans and those loans adversely classified, which are not reviewed individually, are determined using historical loss rates developed through migration analysis. The migration analysis is updated quarterly based on historic losses and movement of loans between ratings. As a result of this migration analysis and its quarterly updating, the increases we experienced in both charge-offs and adverse classifications resulted in increased loss factors.

Finally, in order to ensure our allowance methodology is incorporating recent trends and economic conditions, we apply environmental and general economic factors to our allowance methodology including: credit concentrations; delinquency trends; economic and business conditions; external factors such as fuel and building materials prices, the effects of adverse weather and hostilities; the quality of lending management and staff; lending policies and procedures; loss and recovery trends; nature and volume of the portfolio; nonaccrual and problem loan trends; usage trends of unfunded commitments; quality of loan review; and other adjustments for items not covered by other factors.

We recognize the determination of the allowance for loan losses is sensitive to the assigned credit risk ratings and inherent loss rates at any given point in time. Therefore, we perform sensitivity analyses to provide insight regarding the impact adverse changes in credit risk ratings may have on our allowance for loan losses. The sensitivity analyses has inherent limitations and is based on various assumptions as of a point in time and, accordingly, it is not necessarily representative of the impact loan risk rating changes may have on the allowance for loan losses. At March 31, 2010, in the event that 1 percent of our non-covered loans were downgraded one credit risk rating category for each category (e.g., 1% of the "pass" category moved to the "special mention" category, 1% of the "special mention" category moved to "substandard" category, and 1% of the "substandard" category moved to the "doubtful" category within our current allowance methodology), the allowance for loan losses would have increased by approximately \$2.9 million. In the event that 5% of our non-covered loans were downgraded one credit risk category, the allowance for loan losses would increase by approximately \$14.7 million. Given current processes employed by the Company, management believes the credit risk ratings and inherent loss rates currently assigned are appropriate. It is possible that others, given the same information, may at any point in time reach different conclusions that could be significant to the Company's financial statements. In addition, current credit risk ratings are subject to change as we continue to review loans within our portfolio and as our borrowers are impacted by economic trends within their market areas.

Management believes that the allowance for loan losses is adequate and appropriate for the known and inherent risks in our non-covered loan portfolio. In making its evaluation, management considers certain quantitative and qualitative factors including the Company's historical loss experience, the volume and type of lending conducted by the Company, the results of our credit review process, the amounts of classified, criticized and nonperforming assets, regulatory policies, general economic conditions, underlying collateral values, and other factors regarding collectability and impairment. To the extent we experience, for example, increased levels of documentation deficiencies, adverse changes in collateral values, or negative changes in economic and business conditions which adversely affect our borrowers, our classified loans may increase. Higher levels of classified loans generally result in higher allowances for loan losses.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

Management also believes that the reserve for unfunded loan commitments is adequate. In making this determination, we use the same methodology for the reserve for unfunded loan commitments as we do for the allowance for loan losses and consider the same quantitative and qualitative factors, as well as an estimate of the probability of advances of the commitments correlated to their credit risk rating.

The following table presents the changes in our allowance for credit losses for the periods indicated:

	Quarter Ended March 31, 2010	As of or for the		Quarter Ended March 31, 2009
		Quarter Ended December 31, 2009	Year Ended December 31, 2009	
	(Dollars in thousands)			
Balance at beginning of period	\$ 124,278	\$ 120,586	\$ 68,790	\$ 68,790
Provision for credit losses	112,527	34,900	141,900	14,000
Net charge-offs	(145,426)	(31,208)	(86,412)	(6,158)
Balance at end of period	\$ 91,379	\$ 124,278	\$ 124,278	\$ 76,632
Allowance for credit losses to non-covered loans, net of unearned income	2.81%	3.35%	3.35%	1.95%

The lower coverage ratio of 2.81% reflects the improved credit risk profile resulting from the classified loan sale, which substantially reduced non-covered nonaccrual and adversely classified loans when compared to December 31, 2009.

The provisions for credit losses were based on our reserve methodology and considered, among other factors, net charge-offs, the level and trends of classified, criticized, and nonaccrual loans, general market conditions, the level and usage trends of unfunded commitments, and portfolio concentrations.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

The following table presents the changes in our allowance for loan losses for the periods indicated:

	As of or for the			
	Quarter Ended	Quarter Ended	Year Ended	Quarter Ended

Provision for loan losses	112,872	35,350	141,610	14,000
Balance at end of period	\$ 86,163	\$ 118,717	\$ 118,717	\$ 71,361
Net charge-offs excluding charge-offs from classified loan sale	\$ (21,721)	\$ (31,208)	\$ (86,412)	\$ (6,158)
Ratios^(a):				
Allowance for loan losses to loans, net	2.65%	3.20%	3.20%	1.82%
Allowance for loan losses to nonaccrual loans	86.2%	49.4%	49.4%	51.5%
Annualized net charge-offs to average loans	16.81%	3.26%	2.22%	0.63%
Annualized net charge-offs excluding charge-offs from classified loan sale to average loans	2.51%	3.26%	2.22%	0.63%

(a) Ratios apply only to non-covered loans.

Net charge-offs on non-covered loans included \$123 million related to the classified loan sale completed during the quarter and \$22 million in other non-covered loan charge-offs; this compares to total net charge-offs of \$31.2 million in the fourth quarter of 2009. These charge-off levels reflect the aggressive actions we are taking to promptly identify and resolve problem credits. The classified loan sale charge-offs by category are: \$65 million in real estate mortgage; \$54 million in real estate construction; and \$4 million in commercial.

Edgar Filing: PACWEST BANCORP - Form 10-Q

The credit loss provision for the first quarter of 2010 of \$112.5 million is applicable to non-covered loans only and was based on our reserve methodology and considered, among other factors, net charge-offs, the level and trends of classified, criticized, past due and nonaccrual loans, usage trends of unfunded loan commitments, general market conditions and portfolio concentrations.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

Based on information currently available, management believes that the allowance for loan losses is adequate and appropriate for the known and inherent risks in our loan portfolio. In making its evaluation, management considers certain quantitative and qualitative factors including the Company's historical loss experience, the volume and type of lending conducted by the Company, the results of our credit review process, the amounts of classified, criticized and nonperforming assets, regulatory policies, general economic conditions, underlying collateral values, and other factors regarding collectability and impairment.

The following table presents the changes in our reserve for unfunded loan commitments for the periods indicated:

		Quarter Ended March 31, 2010	As of or for the Quarter Ended December 31, 2009	Year Ended December 31, 2009	Quarter Ended March 31, 2009
(Dollars in thousands)					
Balance at beginning of period	\$	5,561	\$ 6,011	\$ 5,271	\$ 5,271
Provision (reversal)		(345)	(450)	290	
Balance at beginning of period	\$	5,216	\$ 5,561	\$ 5,561	\$ 5,271

The decrease in the reserve for unfunded commitments in the first quarter of 2010 reflects lower loan balances.

Allowance for Credit Losses on Covered Loans. The covered loans acquired in the Affinity transaction are subject to our internal and external credit review. If and when credit deterioration occurs subsequent to the August 28, 2009 acquisition date, a provision for credit losses for covered loans will be charged to earnings for the full amount without regard to the FDIC loss sharing agreement. The portion of the loss reimbursable from the FDIC is recorded in noninterest income and increases the FDIC loss sharing asset. During the first quarter of 2010 we recorded a provision for credit losses of \$20.7 million on the covered loan portfolio; such provision represents credit deterioration based on decreases in expected cash flows on certain covered loans measured as of March 31, 2010 compared to previous estimates. We recorded \$16.6 million in noninterest income to reflect the FDIC's share of this estimated loss.

The covered loans acquired in the Affinity transaction are and will continue to be subject to our internal and external credit review. If and when credit deterioration occurs, a provision for credit losses for covered loans will be charged to earnings for the full amount without regard to the FDIC loss sharing agreement. Under the accounting guidance of ASC 310-30 for acquired loans, the allowance for loan losses on covered loans is measured at each financial reporting period, or measurement date, based on expected cash flows. Accordingly, decreases in expected cash flows on the acquired covered loans as of the measurement date compared to those initially estimated are recognized by recording a provision for credit losses on covered loans. The portion of the loss on covered loans reimbursable from the FDIC is recorded in noninterest income and increases the FDIC loss sharing asset.

The following table presents the changes in our allowance for credit losses on covered loans at March 31, 2010:

(Dollars in thousands)	
Balance as of January 1, 2010	\$ 18,000
Provision	20,700
Charge-offs, net	(6,686)
Balance as of March 31, 2010	\$ 32,014

Table of Contents

Covered Nonperforming Assets. Loans accounted for under ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income is not recognized until the timing and amount of future cash flows can be reasonably estimated.

A summary of covered loans that would be considered nonaccrual except for the accounting requirements regarding purchased impaired loans and other real estate owned covered by the loss sharing agreement ("covered nonaccrual loans" and "covered OREO"; collectively, "covered nonperforming assets") at March 31, 2010 follows.

	Covered Nonperforming Assets
	March 31, 2010
	(In thousands)
Covered nonaccrual loans	\$ 157,325
Covered OREO	25,403
Total covered nonperforming assets	\$ 182,728

Loan Portfolio Risk Elements. The negative trends throughout the Southern California economy have affected certain industries and collateral types more than others. Our real estate loan portfolio is predominantly commercial and as such does not expose us to higher risks generally associated with residential mortgage loans such as option ARM, interest-only or subprime mortgage loans. Our portfolio does include mortgage loans on commercial property. Commercial mortgage loan repayments typically do not rely on the sale of the underlying collateral and instead rely on the income producing potential of the collateral as the source of repayment. Ultimately, though, due to the loan amortization period being greater than the contractual loan term, the borrower may be required to refinance the loan, either with us or another lender, or sell the underlying collateral in order to payoff the loan.

We have \$179.5 million of commercial real estate mortgage loans maturing over the next 12 months. In the event we refinance any of these loans because the borrowers are unable to obtain financing elsewhere due to the inability of banks in our market area to make loans, such loans may be considered troubled debt restructurings even though they were performing throughout their terms. Higher levels of troubled debt restructurings may lead to increased classified assets and credit loss provisions.

Credit Quality. Our loan portfolio, including both non-covered and covered loans, continues to experience pressure from economic trends in Southern California. We expect that such pressures will continue for the remainder of 2010.

The non-covered construction loan portfolio decreased \$156.0 million during the first quarter of 2010 to \$284.3 million at the end of March. Within our construction loan portfolio, we reduced our exposure to nonowner-occupied residential construction loans by \$62.6 million during the first quarter of 2010, due mostly to the classified loan sale. There were four nonowner-occupied non-covered residential construction loans totaling approximately \$25.5 million on nonaccrual status at March 31,

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

2010. The details of the non-covered nonowner-occupied residential construction loan portfolio as of the dates indicated follows:

Loan Category	As of March 31, 2010			As of December 31, 2009
	Balance	Number of loans	Average loan balance	Balance
	(Dollars in thousands)			
Residential land acquisition and development	\$ 2,558	4	\$ 640	\$ 33,502
Residential nonowner-occupied single family	20,121	13	1,548	32,209
Unimproved residential land	57,640	29	1,988	58,949
Residential multi-family	20,576	5	4,115	38,825
	\$ 100,895	51	\$ 1,978	\$ 163,485

All non-covered nonaccrual and restructured loans are considered impaired and are evaluated individually for loss exposure. At March 31, 2010 we had \$105.9 million of restructured loans of which \$68.1 million were in compliance with the modified terms and on accrual status with the remainder on nonaccrual status.

The types of non-covered loans included in the nonaccrual category and accruing loans past due between 30 and 89 days as of March 31, 2010 and December 31, 2009 are presented below.

Loan category	Nonaccrual loans ⁽¹⁾				Accruing and over 30 days past due ⁽¹⁾	
	March 31, 2010		December 31, 2009		March 31, 2010	December 31, 2009

Other, including foreign	4.6%	2,618	1.1%	720	187	492
	3.1%	\$ 99,920	6.5%	\$ 240,167	\$ 14,156	\$ 8,493

⁽¹⁾ Excludes covered loans acquired from the Affinity acquisition.

Nonaccrual loans declined \$140.2 million during the first quarter. Approximately \$107.6 million of the decrease was due to the classified loans sale. The remaining net decrease of \$32.6 million is composed of (a) additions of \$18.1 million, (b) reductions, payoffs and returns to

Edgar Filing: PACWEST BANCORP - Form 10-Q

accrual status of \$25.8 million, (c) foreclosures of \$16.1 million, and (d) charge-offs of \$8.8 million. The additions to nonaccrual loans include \$5.0 million in SBA 504 loans, a \$3.8 million real estate commercial loan secured by a hotel, \$4.2 million in secured commercial loans and \$2.0 million in other loans. Reductions include an \$11.6 million paydown on a residential loan secured by an 85 lot in-fill development south of Los Angeles and pay-downs of \$3.3 million on commercial real estate and construction loans. The reduction in nonaccrual loans due to foreclosures was mostly due to a

Table of Contents

\$14.7 million loan secured by a golf course and luxury residences and land in Palm Desert; the golf course was sold during the quarter.

The most significant loans which have remained on nonaccrual status during the first quarter include a loan collateralized by land in Ventura, California totaling \$22.0 million, two loans totaling \$17.0 million secured by shopping malls and two loans totaling \$4.7 million secured by hotels. The hospitality industry is being adversely impacted by the economic downturn. The continued reductions in recreational and business travel have caused declines in occupancy and average daily room rates. At March 31, 2010, we have \$176.3 million of hotel and other hospitality related commercial real estate loans.

Included in the non-covered nonaccrual loans at the end of March are \$26.0 million of SBA related loans representing 26% of total non-covered nonaccrual loans at that date. The SBA 504 loans are secured by first trust deeds on owner-occupied business real estate with loan-to-value ratios of generally 50% or less at the time of origination. SBA 7(a) loans are secured by borrowers' real estate and/or business assets and are covered by an SBA guarantee of up to 85% of the loan amount. The SBA guaranteed portion on the 7(a) and Express loans shown above is \$6.2 million. At March 31, 2010, the SBA loan portfolio totaled \$135.3 million and was composed of \$98.9 million in SBA 504 loans and \$36.4 million in SBA 7(a) and Express loans.

Non-covered nonperforming assets include non-covered nonaccrual loans and non-covered OREO and totaled \$129.6 million at the end of March compared to \$283.4 million at December 31, 2009. The ratio of non-covered nonperforming assets to non-covered loans and non-covered OREO decreased to 3.95% at March 31, 2010 from 7.56% at December 31, 2009. The decrease is due to non-covered nonaccrual loans sold in the classified loan sale.

The activity in non-covered OREO during the first quarter of 2010 included 12 sales for \$21.6 million, write-downs of \$8.3 million and four additions of \$16.3 million. The write-downs were based on new appraisals or negotiated sales prices with buyers. The following table presents the components of OREO by property type as of the dates indicated:

Property Type	Balance as of	
	March 31, 2010	December 31, 2009
	(Dollars in thousands)	
Improved residential land	\$ 5,189	\$ 7,514
Commercial real estate	21,158	28,478
Single family residence	3,296	7,263
Total	\$ 29,643	\$ 43,255

Total interest-bearing	2,765,591	67	2,791,595	68	2,176,932	64
Total deposits	\$ 4,154,237	100%	\$ 4,094,569	100%	\$ 3,400,816	100%

Edgar Filing: PACWEST BANCORP - Form 10-Q

Total deposits increased \$59.7 million during the first quarter. Core deposits, which include noninterest-bearing demand, interest checking, savings and money market deposits, increased \$87 million and totaled \$3.1 billion at March 31, 2010. Brokered and acquired money desk deposits totaled \$108.3 million at March 31, 2010, relatively unchanged from year-end. Noninterest-bearing demand deposits totaled \$1.4 billion and represented 33% of total deposits at March 31, 2010. Deposits by foreign customers, primarily located in Mexico and Canada, totaled \$137.2 million, or approximately 3.3% of total deposits at March 31, 2010.

Table of Contents**Regulatory Matters**

Capital. Actual capital amounts and ratios for the Company and the Bank as of March 31, 2010 are presented in the following table. Regulatory capital requirements limit the amount of deferred tax assets that may be included when determining the amount of regulatory capital. As a result, the Company's and the Bank's regulatory capital was reduced by \$35.5 million and \$22.2 million, respectively, at March 31, 2010. No assurance can be given that the regulatory capital deferred tax asset limitation will not increase in the future.

	Minimum Regulatory Requirements Well Capitalized	Pacific Western	Actual Company Consolidated
Tier 1 leverage capital ratio	5.00%	9.97%	10.47%
Tier 1 risk-based capital ratio	6.00%	13.70%	14.33%
Total risk-based capital	10.00%	14.98%	15.60%
Tangible common equity ratio	N/A	10.25%	8.58%

Subordinated Debentures. The Company issued subordinated debentures to trusts that were established by us or entities we have acquired, which, in turn, issued trust preferred securities, which totaled \$123.0 million at March 31, 2010. Our trust preferred securities are currently included in our Tier I capital for purposes of determining the Company's Tier I and total risk-based capital ratios. The FRB, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Although this modification was scheduled to be effective on March 31, 2009, the Federal Reserve postponed the effective date to March 31, 2011. At that time, the Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity, less goodwill net of any related deferred income tax liability. The regulations currently in effect through December 31, 2010 limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for goodwill. We have determined that our Tier I capital ratios would remain above the well-capitalized level had the modification of the capital regulations been in effect at March 31, 2010. We expect that our Tier I capital ratios will be at or above the existing well capitalized levels on March 31, 2011, the second date on which the modified capital regulations must be applied.

Dividends on Common Stock and Interest on Subordinated Debentures. Notification to the FRB is required prior to our declaring and paying a cash dividend to our stockholders during any period in which our quarterly net earnings are insufficient to fund the dividend amount. Interest payments made by the Company on subordinated debentures are considered dividend payments by the Federal Reserve Bank. As such, notification to the Federal Reserve Bank is required prior to our intent to pay such interest during any period in which our quarterly net earnings are not sufficient to fund the interest due. Should the FRB object to payment of interest on the subordinated debentures we would not be able to make the payments until approval is received or we no longer need to provide notice under applicable regulations.

SHELF REGISTRATION STATEMENT AND SALES OF COMMON STOCK

On December 22, 2009, PacWest Bancorp filed a registration statement with the SEC to offer to sell, from time to time, shares of common stock, preferred stock, and other equity linked securities for an aggregate initial offering price of up to \$350.0 million. The registration statement was declared effective on January 8, 2010. Proceeds from the offering are anticipated to be used to fund future acquisitions of banks and financial institutions and for general corporate purposes.

Table of Contents

On March 1, 2010 holders of 1,348,040 warrants to acquire PacWest Bancorp common stock exercised such warrants for net proceeds of \$26.6 million. The warrants, which had a strike price of \$20.20 per share, represented 99% of the 1,361,656 six-month warrants issued in August 2009. An additional 1,361,657 million warrants issued in August 2009 with a strike price of \$20.20 remain outstanding, of which 1,348,040 expire on August 27, 2010 and 13,617 expire on August 30, 2010.

Liquidity Management

Liquidity. The goals of our liquidity management are to ensure the ability of the Company to meet its financial commitments when contractually due and to respond to other demands for funds such as the ability to meet the cash flow requirements of customers who may be either depositors wanting to withdraw funds or borrowers who may need assurance that sufficient funds will be available to meet their credit needs. We have an Executive Asset/Liability Management Committee, or Executive ALM Committee, which is comprised of members of senior management and responsible for managing balance sheet and off-balance sheet commitments to meet the needs of customers while achieving our financial objectives. Our Executive ALM Committee meets regularly to review funding capacities, current and forecasted loan demand, and investment opportunities.

Historically, the Bank's primary liquidity source has been its core deposit base. Over the last several years the Bank's use of collateralized FHLB advances has increased as one of its sources of affordable and immediately available liquidity. The level of such wholesale funding is monitored based on the Bank's liquidity requirements, and we maintain what we believe to be an acceptable level of this collateralized borrowing capacity. The Bank's secured borrowing capacity with the FHLB was \$1.2 billion, of which \$831.0 million was available as of March 31, 2010. The Bank also maintains a security repurchase line with the FHLB to provide an additional \$33.5 million in secured borrowing capacity, against which there were no borrowings as of March 31, 2010. In addition to the secured borrowing relationship with the FHLB, and to meet short term liquidity needs, the Bank maintains adequate balances in liquid assets, which include cash and due from banks, Federal Funds sold, interest-bearing deposits in other financial institutions, and unpledged investment securities available-for-sale. The Bank also maintains a secured line of credit with the FRB which had a borrowing capacity of \$366.0 million and no amount outstanding at March 31, 2010. In addition to its secured lines of credit, the Bank also maintains unsecured lines of credit, subject to availability, of \$117.0 million with correspondent banks for purchase of overnight funds.

Although we have experienced positive deposit flows for the two quarters, the ongoing disruption in the financial credit and liquidity markets has had the effect of decreasing overall liquidity in the marketplace. In order to manage deposit and other funds flows, we use large denomination time deposits in addition to FHLB advances. At March 31, 2010, the Bank had \$105.9 million of these large denomination time deposits, the availability of which is uncertain and subject to competitive market forces. In addition, we have \$62.8 million of customer deposits that were subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our participating customers' deposits.

To meet short-term liquidity needs, the Bank maintains what we believe are adequate balances in cash, interest-bearing deposits in other financial institutions and investment securities with a maturity or duration of five years or less. Our on balance sheet liquidity ratio, calculated as liquid assets (cash, interest-bearing deposits in financial institutions and unpledged investment securities available-for-sale) as a percent of total deposits, was 19.3% as of March 31, 2010 and 11.2% at December 31, 2009. We built-up the Bank's on balance sheet liquidity in order to have more flexibility during this current economic cycle. Subsequent to March 31, 2010, we used our balance sheet liquidity to repay \$125 million of FHLB advances. Had we repaid these advances on March 31, 2010, our on balance sheet liquidity ratio would have been 16.3%.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

The primary sources of liquidity for the Company, on a stand-alone basis, include dividends from the Bank and our ability to raise capital, issue subordinated debt and secure outside borrowings. The ability of the Company to obtain funds for the payment of dividends to our stockholders and for other cash requirements is largely dependent upon the Bank's earnings. Pacific Western is subject to restrictions under certain federal and state laws and regulations which limit its ability to transfer funds to the Company through intercompany loans, advances or cash dividends. Dividends paid by state banks, such as Pacific Western, are regulated by the DFI under its general supervisory authority as it relates to a bank's capital requirements. A state bank may declare a dividend without the approval of the DFI as long as the total dividends declared in a calendar year do not exceed either the retained earnings or the total of net profits for three previous fiscal years less any dividends paid during such period. During 2010, PacWest received no dividends from the Bank. For the foreseeable future, any dividends from the Bank to the Company require DFI approval.

At March 31, 2010, the Company had, on a stand-alone basis, approximately \$34.9 million in cash on deposit at the Bank. Management believes this amount of cash is sufficient to fund the Company's 2010 cash flow needs.

Contractual Obligations. The known contractual obligations of the Company at March 31, 2010, are as follows:

	At March 31, 2010 and Due					
	Within One Year	One to Three Years	Three to Five Years	After Five Years		Total Total
(Dollars in thousands)						
Short-term debt obligations	\$ 45,000	\$	\$	\$	\$	\$ 45,000
Time deposits	824,090	218,434	2,212			1,044,736
Long-term debt obligations		70,000	60,000	361,300		491,300
Operating lease obligations	15,683	26,690	19,179	18,931		80,483
Other contractual obligations	3,811	1,817				5,628
Total	\$ 888,584	\$ 316,941	\$ 81,391	\$ 380,231	\$	\$ 1,667,147

Time deposits include brokered deposits of \$168.7 million at March 31, 2010. Such amount includes (a) \$62.8 million of customer deposits that were subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our customers' deposits, (b) \$104.4 million of Pacific Western Bank wholesale CDs, and (c) \$1.5 million of brokered deposits acquired in the Security Pacific Bank (SPB) deposit acquisition.

Long term debt obligations include \$275.0 million of callable FHLB advances which may be called by the FHLB on various call dates. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates are higher than the advances' stated rates on the call dates. If the advances are called by the FHLB, there is no prepayment penalty. Should our FHLB advances be called, we would evaluate the funding opportunities available at that time, including new secured FHLB borrowings at the prevailing market rates. As borrowing rates are currently lower than our contract rates, we do not expect our secured FHLB borrowings to be called. Debt obligations are also discussed in Note 7 of Notes to Unaudited Condensed Consolidated Financial Statements contained in "Item 1. Unaudited Consolidated Financial Statements." Operating lease obligations are discussed in the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2009. The other contractual obligations relate to the minimum liability associated with our data and item processing contract with a third-party provider.

We believe that we will be able to meet our contractual obligations as they come due through the maintenance of adequate cash levels. We expect to maintain adequate cash levels through profitability,

Table of Contents

loan and securities repayment and maturity activity, and continued deposit gathering activities. We believe we have in place sufficient borrowing mechanisms for short-term liquidity needs.

Off-Balance Sheet Arrangements

Our obligations also include off-balance sheet arrangements consisting of loan-related commitments, of which only a portion are expected to be funded. At March 31, 2010, our loan-related commitments, including standby letters of credit, totaled \$762.7 million. The commitments which result in a funded loan increase our profitability through net interest income. We manage our overall liquidity taking into consideration funded and unfunded commitments as a percentage of our liquidity sources. Our liquidity sources have been and are expected to be sufficient to meet the cash requirements of our lending activities.

Asset/Liability Management and Interest Rate Sensitivity

Interest Rate Risk. Our market risk arises primarily from credit risk and interest rate risk inherent in our lending and financing activities. To manage our credit risk, we rely on adherence to our underwriting standards and loan policies, internal loan monitoring and periodic credit review as well as our allowance for credit losses methodology, all of which are administered by the Bank's credit administration department and overseen by the Company's Credit Risk Committee. To manage our exposure to changes in interest rates, we perform asset and liability management activities which are governed by guidelines pre-established by our Executive ALM Committee, and approved by our Asset/Liability Management Committee of the Board of Directors, which we refer to as our Board ALCO. Our Executive ALM Committee monitors our compliance with our asset/liability policies. These policies focus on providing sufficient levels of net interest income while considering capital constraints and acceptable levels of interest rate exposure and liquidity.

Market risk sensitive instruments are generally defined as derivatives and other financial instruments, which include investment securities, loans, deposits, and borrowings. At March 31, 2010 we had not used any derivatives to alter our interest rate risk profile or for any other reason. However, both the repricing characteristics of our fixed rate loans and floating rate loans, the significant percentage of noninterest-bearing deposits compared to interest-earning assets, and the callable features in certain borrowings, may influence our interest rate risk profile. Our financial instruments include loans receivable, Federal funds sold, interest-bearing deposits in financial institutions, Federal Home Loan Bank stock, investment securities, deposits, borrowings and subordinated debentures.

We measure our interest rate risk position on at least a quarterly basis using three methods: (i) net interest income simulation analysis; (ii) market value of equity modeling; and (iii) traditional gap analysis. The results of these analyses are reviewed by the Executive ALM Committee and the Board ALCO quarterly. If hypothetical changes to interest rates cause changes to our simulated net present value of equity and/or net interest income outside our pre-established limits, we may adjust our asset and liability mix in an effort to bring our interest rate risk exposure within our established limits.

We evaluated the results of our net interest income simulation and market value of equity models prepared as of March 31, 2010, the results of which are presented below. Our net interest income simulation indicates that our balance sheet is liability sensitive as rising interest rates would result in a decline in our net interest margin. This profile is primarily a result of the increased origination of fixed rate loans and variable rate loans with initial fixed rate terms, which is driven by customer demand for fixed rate products in this low interest rate environment. Our market value of equity model indicates an asset sensitive profile suggesting a sudden sustained increase in rates would result in an increase in our estimated market value of equity. This profile is a result of the assumed floors in the Company's offering rates, which are not expected to increase to the extent of the movement of market interest rates, and the significant value placed on the Company's noninterest-bearing deposits for purposes of this analysis. The divergent profile between the net interest income simulation and market value of

Table of Contents

equity model is a result of the Company's significant level of noninterest-bearing deposits. Static balances of noninterest bearing deposits do not impact the net interest income simulation. However, the value of these deposits increase substantially in the market value of equity model when market rates are assumed to rise. In general, we view the net interest income model results as more relevant to the Company's current operating profile and manage our balance sheet based on this information.

Net interest income simulation. We used a simulation model to measure the estimated changes in net interest income that would result over the next 12 months from immediate and sustained changes in interest rates as of March 31, 2010. This model is an interest rate risk management tool and the results are not necessarily an indication of our future net interest income. This model has inherent limitations and these results are based on a given set of rate changes and assumptions at one point in time. We have assumed no growth in either our interest-sensitive assets or liabilities over the next 12 months; therefore, the results reflect an interest rate shock to a static balance sheet. This analysis calculates the difference between net interest income forecasted using both increasing and declining interest rate scenarios and net interest income forecasted using a base market interest rate derived from the U.S. Treasury yield curve at March 31, 2010. In order to arrive at the base case, we extend our balance sheet at March 31, 2010 one year and reprice any assets and liabilities that would contractually reprice or mature during that period using the products' pricing as of March 31, 2010. Based on such repricings, we calculate an estimated net interest income and net interest margin.

The repricing relationship for each of our assets and liabilities includes many assumptions. For example, many of our assets are floating rate loans, which are assumed to reprice to the same extent as the change in market rates according to their contracted index except for floating rate loans tied to our base lending rate which are assumed to reprice upward only after the first 75 basis point increase in market rates. This assumption is due to the fact that we reduced our base lending rate 100 basis points when the Federal Reserve lowered the Federal Funds benchmark rate by 175 basis points in the fourth quarter of 2008. Some loans and investment vehicles include the opportunity of prepayment (imbedded options) and the simulation model uses national indexes to estimate these prepayments and reinvest these proceeds at current simulated yields. Our deposit products reprice at our discretion and are assumed to reprice more slowly in a rising or declining interest rate environment, usually repricing less than the change in market rates. Also, a callable option feature on certain borrowings will reprice differently in a rising interest rate environment than in a declining interest rate environment. The effects of certain balance sheet attributes, such as fixed-rate loans, floating rate loans that have reached their floors and the volume of noninterest-bearing deposits as a percentage of earning assets, impact our assumptions and consequently the results of our interest rate risk management model. Changes that could vary significantly from our assumptions include loan and deposit growth or contraction, changes in the mix of our earning assets or funding sources, and future asset/liability management decisions, all of which may have significant effects on our net interest income.

The simulation analysis does not account for all factors that impact this analysis, including changes by management to mitigate the impact of interest rate changes or the impact a change in interest rates may have on our credit risk profile, loan prepayment estimates and spread relationships which can change regularly. In addition, the simulation analysis does not make any assumptions regarding loan fee income, which is a component of our net interest income and tends to increase our net interest. In 2010 loan fee income increased our net interest margin by 11 basis points. Management reviews the model assumptions for reasonableness on a quarterly basis.

The following table presents as of March 31, 2010, forecasted net interest income and net interest margin for the next 12 months using a base market interest rate and the estimated change to the base

Table of Contents

scenario given immediate and sustained upward and downward movements in interest rates of 100, 200 and 300 basis points.

Interest rate scenario	Estimated Net Interest Income	Percentage Change From Base	Estimated Net Interest Margin	Estimated Net Interest Margin Change From Base
(Dollars in thousands)				
Up 300 basis points	\$ 225,384	(2.21)%	4.68%	(0.11)%
Up 200 basis points	\$ 221,786	(3.77)%	4.61%	(0.18)%
Up 100 basis points	\$ 221,250	(4.00)%	4.60%	(0.19)%
BASE CASE	\$ 230,475		4.79%	
Down 100 basis points	\$ 226,061	(1.92)%	4.70%	(0.09)%
Down 200 basis points	\$ 225,385	(2.21)%	4.68%	(0.11)%
Down 300 basis points	\$ 222,120	(3.63)%	4.62%	(0.17)%

The net interest income simulation model prepared as of March 31, 2010 suggests our balance sheet is liability sensitive. Liability sensitivity indicates that in a rising interest rate environment, our net interest margin would decrease. Due to the historically low market interest rates as of March 31, 2010 the "down" scenarios are not considered meaningful and excluded from the following discussion. This liability sensitive profile is due to the assumed repricing characteristics of our loans, deposits and borrowings. The Federal Reserve lowered the Federal Funds benchmark rate by 175 basis points during the fourth quarter of 2008 and we reduced our base lending rate 100 basis points. While not lowering our base lending rate may prevent further compression of our net interest margin given the current low interest rate environment, our loans will act like fixed rate instruments until market rates catch up to our loan offering rates. This would have the effect of compressing our net interest margin as approximately \$450.0 million of our loans have interest rates that are tied to our base lending rate and would otherwise be subject to immediate repricing. Accordingly, in the event of a sudden sustained increase in rates we assume the cost of our liabilities would begin to increase immediately while our loans are assumed to reprice upward only after market rates exceed our interest rate floors. In addition \$1.5 billion of our loans have both floating rates and floors and \$1.3 billion of such loans are at their floors. The rates on loans already at their floors would not increase to the same extent as movements in their underlying index rate.

In comparing the March 31, 2010, simulation results to December 31, 2009, we have become less liability sensitive. The decline in our liability sensitivity is due mostly to a \$314.1 million increase in interest-bearing deposits in financial institutions which would experience an immediate increase in yield following a sudden and sustained increase in market rates thereby lowering our liability sensitivity.

Market value of equity. We measure the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities and off-balance sheet items, defined as the market value of equity, using a simulation model. This simulation model assesses the changes in the market value of our interest sensitive financial instruments that would occur in response to an instantaneous and sustained increase or decrease in market interest rates of 100, 200 and 300 basis points. This analysis assigns significant value to our noninterest bearing deposit balances. The projections are by their nature forward looking and therefore inherently uncertain, and include various assumptions regarding cash flows and interest rates. This model is an interest rate risk management tool and the results are not necessarily an indication of our actual future results. Actual results may vary significantly from the results suggested by the market value of equity table. Loan prepayments and deposit attrition, changes in the mix of our earning assets or funding sources, and future asset/liability management decisions, among others, may vary significantly from our assumptions.

The base case is determined by applying various current market discount rates to the estimated cash flows from the different types of assets, liabilities and off-balance sheet items existing at March 31,

Table of Contents

2010. The following table shows the projected change in the market value of equity for the set of rate shocks presented as of March 31, 2010:

Interest rate scenario	Estimated Market Value	Percentage Change	Percentage of	Ratio of
		From Base	total assets	Estimated Market Value to Book Value
(Dollars in thousands)				
Up 300 basis points	\$ 620,932	1.93%	11.9%	130.8%
Up 200 basis points	\$ 647,395	6.28%	12.4%	136.3%
Up 100 basis points	\$ 644,389	5.78%	12.4%	135.7%
BASE CASE	\$ 609,157		11.7%	128.3%
Down 100 basis points	\$ 566,124	(7.06)%	10.9%	119.2%
Down 200 basis points	\$ 511,728	(15.99)%	9.8%	107.8%
Down 300 basis points	\$ 468,376	(23.11)%	9.0%	98.6%

The results of our market value of equity model indicate an asset sensitive interest rate risk profile at March 31, 2010 demonstrated by the increase in the market value of equity in the "up" interest rate scenarios compared to the "base case". Given the historically low market interest rates as of March 31, 2010, the "down" scenarios at March 31, 2010 are not considered meaningful and excluded from the following discussion.

Our asset sensitive position as of March 31, 2010 is due primarily to the composition of our loan portfolio which is not projected to decline in value in a rising rate environment. In this type of analysis, a higher discount rate applied to a loan portfolio will result in a lower loan value. The discount rate used to value our loan portfolio is derived from the expected offering rate for each loan type with a similar term and credit risk profile. In a rising rate environment management does not expect to increase our offering rates to the same extent as market rates and in turn our loans are not projected to lose significant value. Conversely, the discount rates for our liabilities are expected to increase to the same extent as increases in market rates. Therefore our liabilities are expected increase in value as rates rise thereby increasing the estimated market value of equity in the rising rate scenario.

In comparing the March 31, 2010 simulation results to December 31, 2009, our base case estimated market value of equity has increased while our overall profile remains relatively unchanged. The increase in base case estimated market value of equity is a result of a steeper US Treasury yield curve, as compared to December 31, 2010, thereby increasing the estimated value of our core deposits for purposes of this analysis.

Gap analysis. As part of the interest rate management process, we use a gap analysis. A gap analysis provides information about the volume and repricing characteristics and relationship between the amounts of interest-sensitive assets and interest-bearing liabilities at a particular point in time. An effective interest rate strategy attempts to match the volume of interest sensitive assets and interest

Table of Contents

bearing liabilities repricing over different time intervals. The following table illustrates the volume and repricing characteristics of our balance sheet at March 31, 2010 over the indicated time intervals:

Interest Rate Sensitivity						
At March 31, 2010						
Amounts Maturing or Repricing In						
	3 Months Or Less	Over 3 Months to 12 Months	Over 1 Year to 5 Years	Over 5 Years	Non Interest Rate Sensitive	Total
(Dollars in thousands)						
ASSETS						
Cash and deposits in financial institutions	\$ 431,096	\$	\$ 115	\$	\$ 87,510	\$ 518,721
Investment securities	12,527	2,015	14,865	460,263		489,670

Interest earning assets	(3.7)%	(9.1)%	6.2%	34.5%

Table of Contents

All amounts are reported at their contractual maturity or repricing periods, except for \$50.4 million in FHLB stock which is shown as a longer-term investment because of previously announced dividend and stock redemption suspensions. This analysis makes certain assumptions as to interest rate sensitivity of savings and NOW accounts which have no stated maturity and have had very little rate fluctuation in the past three years. Money market accounts are repriced at management's discretion and generally are more rate sensitive.

The preceding table indicates that we had a negative one year cumulative gap of \$399.4 million at March 31, 2010, a decrease of \$323.4 million from the negative gap position of \$722.8 million at December 31, 2009. The decrease in the negative gap is primarily attributable to the decreases in both time deposits and borrowings acquired as a result of the Affinity acquisition and the increase in interest bearing deposit balances from the classified loan sale. This gap position suggests that we are liability sensitive and if rates were to increase, our net interest margin would most likely decrease. Conversely, if rates were to decrease, our net interest margin would most likely increase. The ratio of interest-earning assets to interest-bearing liabilities maturing or repricing within one year at March 31, 2010, is 85.2%. This one year gap position indicates that interest expense is likely to be affected to a greater extent than interest income for any changes in interest rates within one year from March 31, 2010.

Borrowings includes six long term advances totaling \$335.0 million with maturity dates of 2013 or later which contain quarterly call options and may be called by the FHLB on various call dates as detailed in Note 7 of Notes to Unaudited Condensed Consolidated Financial Statements contained in "Item 1. Unaudited Condensed Consolidated Financial Statements." While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates are higher than the advances' stated rates on the call dates. If the advances are called by the FHLB, there is no prepayment penalty. Should our FHLB advances be called, we would evaluate the funding opportunities available at that time, including new secured borrowings from the FHLB at the then market rates. As borrowing rates are currently lower than our contract rates, we do not expect our secured FHLB borrowings to be called. We may repay the advances with a prepayment penalty at any time and did so in April 2010 for three of the advances totaling \$60.0 million.

The gap table has inherent limitations and actual results may vary significantly from the results suggested by the gap table. The gap table assumes a static balance sheet, as does the net interest income simulation, and, accordingly, looks at the repricing of existing assets and liabilities without consideration of new loans and deposits that reflect a more current interest rate environment. Unlike the net interest income simulation, however, the interest rate risk profile of certain deposit products and floating rate loans that have reached their floors cannot be captured effectively in a gap table. Although the table shows the amount of certain assets and liabilities scheduled to reprice in a given time frame, it does not reflect when or to what extent such repricings may actually occur. For example, interest-bearing demand, money market and savings deposits are shown to reprice in the second three months, but we may choose to reprice these deposits more slowly and incorporate only a portion of the movement in market rates based on market conditions at that time. Alternatively, a loan which has reached its floor may not reprice despite a change in market interest rates causing such loan to act like a fixed rate loan regardless of its scheduled repricing date. For example, a loan already at its floor would not reprice if the adjusted rate was less than its floor. The gap table as presented is not able to factor in the flexibility we believe we have in repricing either deposits or the floors on our loans.

We believe the estimated effect of a change in interest rates is better reflected in our net interest income and market value of equity simulations which incorporate many of the factors mentioned.

Table of Contents

ITEM 3. Quantitative and Qualitative Disclosure about Market Risk

Please see the section above titled "Asset/Liability Management and Interest Rate Sensitivity" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" which provides an update to our quantitative and qualitative disclosure about market risk. This analysis should be read in conjunction with text under the caption "Quantitative and Qualitative Disclosure About Market Risk" in our Annual Report on Form 10-K for the year ended December 31, 2009, which text is incorporated herein by reference. Our analysis of market risk and market-sensitive financial information contains forward-looking statements and is subject to the disclosure at the beginning of Item 2 regarding such forward-looking information.

ITEM 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out by the Company's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, these disclosure controls and procedures were effective.

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. Legal Proceedings**

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. Although the ultimate outcome and amount of liability, if any, with respect to these legal actions to which we are currently a party cannot presently be ascertained with certainty, in the opinion of management, based upon information currently available to us, any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

ITEM 1A. Risk Factors

There have been no material changes with respect to the risk factors described in Item 1A. to Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2009, which Item 1A. is incorporated herein by reference.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds**(c) Issuer Repurchases of Common Stock**

The following table presents stock purchases made during the first quarter of 2010:

	Total Shares Purchased ^(a)	Average Price Per Share
January 1 - January 31, 2010		\$
February 1 - February 28, 2010	22,145	19.71
March 1 - March 31, 2010		
Total	22,145	\$ 19.71

(a) Shares repurchased in satisfaction of financial obligations incurred through the vesting of the Company's restricted stock.

ITEM 5. Other Information

On April 30, 2010, PacWest Bancorp (the "Company") renewed its services agreement with Castle Creek Financial LLC ("Castle Creek"). John M. Eggemeyer, Chairman of the Company, is also Chief Executive Officer of Castle Creek.

Pursuant to the terms of the services agreement, the Company and Castle Creek have entered into an exclusive arrangement whereby the Company has agreed to use Castle Creek as its financial advisor for various types of transactions, if it chooses to use a financial advisor, and Castle Creek agrees to provide advisory services to the Company in the Company's market area, including but not limited to the sourcing and evaluation of potential acquisition opportunities, and exclusive presentation of such opportunities to the Company. The term of the services may be cancelled by either party upon thirty days notice. The services agreement provides for the payment of the following fees upon the consummation of certain transactions: (a) 1.0% of the aggregate consideration paid in the event the Company is sold; and (b) in the event of an acquisition of another financial institution by the Company: 1.0% of the aggregate value of the transaction if the aggregate value is \$20 million or less; and if the aggregate value is over \$20 million, \$200,000 plus 0.65% of the amount of the transaction in excess of \$20 million. Castle Creek is also entitled to reimbursement of its reasonable expenses incurred on behalf of the Company. The material terms of the agreement are unchanged from the previous agreement which expired in March 2010.

Edgar Filing: PACWEST BANCORP - Form 10-Q
