MINUTES OF THE 233rd MEETING OF THE BOARD OF DIRECTORS OF TELEFÔNICA BRASIL S.A.

Accordingly, after studies were carried out, it was deemed necessary to rationalize and simplify the structure of Telefônica's wholly-owned subsidiaries and controlled companies, by integrating and rationalizing their related and/or complementary activities, in such manner as to allow, at the end of the corporate reorganization process involving such companies, concentration of the activities into only two operating companies, one of them being the Company (to concentrate the provision of telecommunication services) and the other being TData (to concentrate other economic activities than telecommunication services, including Value-Added Services, as defined in art. 61 of the General Telecommunications Law). This segregation of activities is necessary because the Company is prevented, by law, from providing other than telecommunication services.

The Chairman also explained that concentrating the provision of telecommunication services into one sole legal entity will enable convergence, allowing a consolidated and confluent offer of telecommunication services and simplified offer of service packages, with consequent reduction in administrative and operating costs, and standardization and rationalization of the Companies' operations.

The Chairman further explained that the corporate organization sought herein, involving the Company's wholly-owned subsidiaries and controlled companies, was submitted to the National Telecommunications Agency – ANATEL for review and prior approval, having been approved under the terms of Act no. 3043, dated May 27, 2013, published in the Federal Official Gazette on May 29, 2013 ("Consent Act").

Finally, the Chairman pointed out that the matter had been previously reviewed by the Audit and Control Committee and by the Statutory Audit Council of the Company.

After the presentation was completed, the following documents were made available to the Directors:

general terms and conditions of the transaction sought herein, the justifications thereof, and the criteria for appraisal of the shares and of the assets to be merged into the Company. As explained and provided for in the TData Protocol, the merger of the spun-off net assets shall not result in increase of the capital stock of the Company, given that the net equity of the spun-off company, a wholly-owned subsidiary of the Company, is already reflected in the Company's equity, for which reason, no will be no exchange ratio of the shares held by TData's non-controlling shareholders for shares in the Company. 4.11. confirm, *ad referendum* to the general meeting of the Company to be held for deciding about the matter, the appointment by the Executive Officers of the expert evaluation firm Ernst & Young Terco Auditores Independentes S.S., for appraisal of TST's net equity to be merged into the Company;

The Directors found that the above described mergers of companies and of net assets, as contemplated herein, shall not result in an increase of the capital stock of the Company, nor in the issuance of new shares by the Company, in such manner that the Corporate Reorganization shall not give rise to any change whatsoever in the equity interests currently held by the shareholders in the Company. Therefore, there will be no exchange of shares held by non-controlling shareholders of the spun-off company for shares in the surviving company shall be considered, given that the Company is or shall be, at the time of the merger of the assets and/or companies, as the case may be, the sole shareholder of the companies to be spun-off/merged. No right to withdrawal shall be applicable as well. Accordingly, no appraisal report of the net equity at market price shall be required to be prepared for calculation of the exchange ratio of shares held by non-controlling shareholders, as set forth in article 264 of the LSA and in article 2, §1, VI, of CVM Instruction no. 319/99, as per recent opinions already provided by the CVM for inquiries submitted with regard to similar reorganization processes and as mentioned in CVM Resolution no. 559, dated 11/18/2008.
