The accompanying notes are an integral part of the consolidated financial statements.

STERLING FINANCIAL CORPORATION

Notes to Consolidated Financial Statements

1. Basis of Presentation:

The foregoing unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2003. In the opinion of management, the unaudited interim consolidated financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim periods presented.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of Sterling Financial Corporation's (Sterling's) consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of Sterling's consolidated financial position and results of operations.

2. Other Borrowings:

The components of other borrowings are as follows (in thousands):

	March 31, 2004	December 31, 2003
Term note payable(1)	\$ 22,000	\$ 22,000
Advances on revolving line of credit(2)	0	0
Sterling obligated mandatorily redeemable preferred capital securities of subsidiary trusts holding solely junior subordinated deferrable interest debentures of Sterling(3)	109,282	80,415
Floating Rate Notes Due 2006(4)	30,000	30,000
Other(5)	5,303	5,583
Total	\$ 166,585	\$ 137,998

(1) Sterling has a \$22.0 million variable-rate term note with U.S. Bank, N.A. (U.S. Bank). This note matures on September 17, 2007. Interest accrues at the 30-day London Interbank Offering Rate (LIBOR) plus 2.00% (for a total of 3.10% at March 31, 2004) and is payable monthly. Principal payments are due in annual installments of \$3.0 million each September, with the entire unpaid balance due at maturity. This note is collateralized by a majority of the Common and Preferred Stock of Sterling Savings Bank.

(2) Sterling has a \$5.0 million revolving line of credit with U.S. Bank. This line of credit expires on September 15, 2004. The interest rate is adjustable monthly at the 30-day LIBOR plus 2.00% and is payable monthly. This line of credit is collateralized by a majority of the Common and Preferred Stock of Sterling Savings Bank. At March 31, 2004, no amount was outstanding on this line of credit.

(3) Sterling raises capital from time to time through the formation of trusts (Sterling Capital Trusts), which issue capital securities (Trust Preferred Securities) to investors. Sterling also acquired two trusts in connection with a merger in January 2004. The Sterling Capital Trusts are business trusts in which Sterling owns all of the common equity. The proceeds from the sale of the Trust Preferred Securities are used to purchase junior subordinated deferrable interest debentures (Junior Subordinated Debentures) issued by Sterling. Sterling's obligations under the Junior Subordinated Debentures and related documents, taken together, constitute a full and unconditional guarantee by Sterling of Sterling Capital Trusts' obligations under the Trust Preferred Securities. In accordance with Interpretation No. 46 (Revised), Consolidation of Variable Interest Entities (FIN No. 46R), the trusts are not consolidated and the Trust Preferred Securities and related amounts are treated as debt of Sterling. Although Sterling, as a savings and loan holding company, is not subject to the Federal Reserve capital requirements for bank holding companies, the Trust Preferred Securities have been structured to qualify as Tier 1 capital, subject to certain limitations, if Sterling were to become regulated as a bank holding company. The Junior Subordinated Debentures and related Trust Preferred Securities generally mature 30 years after issuance and are redeemable at the option of Sterling under certain conditions. Interest is paid quarterly or semi-annually. Details of the Trust Preferred Securities are as follows:

Subsidiary Issuer	Issue Date	Maturity Date	Call Date	Mandatorily Redeemable Capital Security	Rate at March 31, 2004	Amount (in Thousands)
Sterling Capital Trust VI	June 2003	Sept 2033	Sept 2008	Floating Rate Capital Securities	4.31% \$	10,310
Sterling Capital Statutory Trust V	May 2003	May 2033	June 2008	Floating Rate Capital Securities	4.36%	20,619
Sterling Capital Trust IV	May 2003	May 2033	May 2008	Floating Rate Preferred Securities	4.27%	10,310
Sterling Capital Trust III	April 2003	April 2033	April 2008	Floating Rate Capital Securities	4.38%	14,433
Klamath First Capital Trust II	April 2002	April 2032	April 2007	Floating Rate Capital Securities	4.92%	13,464
Klamath First Capital Trust I	July 2001	July 2031	June 2006	Floating Rate Capital Securities	4.96%	15,403
Sterling Capital Trust II	July 2001	July 2031	June 2006	10.25% Cumulative Capital Securities	10.25%	24,743
					\$	109,282

(4) Sterling has outstanding \$30.0 million of Floating Rate Notes Due 2006. These notes are unsecured general obligations of Sterling and are subordinated to certain other existing and future indebtedness. Under the terms of the notes, Sterling is limited in the amount of certain long-term debt that it may incur, and the notes restrict Sterling,

under certain circumstances, as to the amount of cash dividends on its preferred or common stock and capital distributions which can be made. At March 31, 2004, Sterling could have incurred approximately \$161.4 million of additional long-term debt. At March 31, 2004, Sterling could have paid up to approximately \$46.8 million in additional dividends. Interest accrues at the 90-day LIBOR plus 2.50% (for a total of 3.61% at March 31, 2004) and is adjustable and payable quarterly. The notes mature in 2006 and may be redeemed under certain conditions.

(5) During 2002, Sterling financed the sale of certain loans to an unrelated party. Since the underlying sold loans were collateral on the loan to the purchaser, this sale was accounted for as a financing. At March 31, 2004, \$5.3 million remained outstanding on the financing.

3. Earnings Per Share:

The following table presents the basic and diluted earnings per share computations including the effect of the 10% stock dividend which is payable on May 28, 2004 to shareholders of record as of May 10, 2004. All per share amounts presented reflect this dividend.

	Three Months Ended March 31,					
	2004		Per Share	2003		Per Share
	Net Income	Weighted Avg. Shares	Amount	Net Income	Weighted Avg. Shares	Amount
Basic computations	\$ 11,984,000	22,354,798	\$ 0.54	\$ 7,783,000	15,081,975	\$ 0.52
Effect of dilutive securities:						
Common stock options	0	597,958	(0.02)	0	355,632	(0.02)
Diluted computations	\$ 11,984,000	22,952,756	\$ 0.52	\$ 7,783,000	15,437,607	\$ 0.50
Antidilutive options not included in diluted earnings per share		11,000			0	

4. Operating Expenses:

The following table details the components of Sterling's total operating expenses:

	Three Months Ended March 31,	
	2004	2003
(Dollars in thousands)		
Employee compensation and benefits	\$ 19,206	\$ 11,958

Goodwill litigation costs	115	250
Merger and acquisition costs	3,913	143
Other	1,313	1,187
Total operating expenses	\$ 37,719	\$ 21,411

5. **Segment Information:**

For purposes of measuring and reporting the financial results, Sterling is divided into the following five business segments:

The Community Banking segment consists of the operations conducted by Sterling's subsidiary, Sterling Savings Bank.

The Residential Mortgage Banking segment originates and sells servicing-retained and servicing-released residential loans through loan production offices in Washington, Oregon, Idaho and Montana primarily through Action Mortgage Company (Action Mortgage).

The Commercial Mortgage Banking segment originates, sells and services commercial real estate loans and participation interests in commercial real estate loans through offices in Washington, Oregon and Arizona primarily through INTERVEST-Mortgage Investment Company.

The Insurance and Retail Brokerage segment markets fixed income and equity products, mutual funds, fixed and variable annuities, insurance and other financial products through sales representatives within the Sterling Savings Bank branch network primarily through Harbor Financial Services, Inc. and The Dime Service Corporation.

The Eliminations and Other segment represents the parent company expenses and intercompany eliminations of revenue and expenses.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

The following table presents certain financial information regarding Sterling's segments and provides a reconciliation to Sterling's consolidated totals for the periods presented:

	As of and for the Three Months Ended March 31, 2004					
	Community Banking	Residential Mortgage Banking	Commercial Mortgage Banking	Retail Brokerage	Other and Eliminations	Total
	(Dollars in thousands)					
Interest income	\$ 69,389	\$ 2,029	\$ 1,747	\$ 1	\$ 225	\$ 73,391

Income before income taxes	\$ 20,663	\$ 628	\$ 975	\$ 207	\$ (4,455)	\$ 18,018
Total assets	\$ 6,127,199	\$ 17,507	\$ 14,109	\$ 1,959	\$ (65,619)	\$ 6,095,155

	As of and for the Three Months Ended March 31, 2003					
	Community Banking	Residential Mortgage Banking	Commercial Mortgage Banking	Retail Brokerage	Other and Eliminations	Total
	(Dollars in thousands)					
Interest income	\$ 48,005	\$ 2,051	\$ 1,429	\$ 0	\$ 0	\$ 51,485
Interest expense	20,817	0	0	0	2,097	22,914
Net interest income (expense)	27,188	2,051	1,429	0	(2,097)	28,571
Provision for loan losses	(2,250)	0	0	0	0	(2,250)
Noninterest income	9,510	2,612	(12)	458	(5,459)	7,109
Noninterest expense	18,467	2,100	743	326	(225)	21,411
Income before income taxes	\$ 15,981	\$ 2,563	\$ 674	\$ 132	\$ (7,331)	\$ 12,019
Total assets	\$ 3,856,870	\$ 16,748	\$ 12,279	\$ 1,215	\$ (65,893)	\$ 3,821,219

6. Stock Options:

As allowed by SFAS No. 123, Accounting for Stock-Based Compensation (SFAS No. 123), Sterling has elected to retain the compensation measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees (APB No. 25), and related interpretations, for stock options. Under APB No. 25, compensation cost is recognized at the measurement date in the amount, if any, that the quoted market price of Sterling's common stock exceeds the option exercise price. The measurement date is the date at which both the number of options and the exercise price for each option are known.

Sterling has chosen not to record compensation expense using fair value measurement provisions in the statement of income. Had compensation cost for Sterling's plans been determined based on the fair value at the grant dates for awards under the plans, Sterling's reported net income and earnings per share would have been changed to the pro forma amounts indicated below:

	Three Months Ended March 31,	
	2004	2003
	(Dollars in thousands, except per share amounts)	
Reported net income	\$ 11,984	\$ 7,783
Add back: Stock-based employee compensation expense, net of related tax effects	0	0
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(1,009)	(548)
Pro forma	\$ 10,975	\$ 7,235
Basic earnings per share:		
Reported earnings per share	\$ 0.54	\$ 0.52
Stock-based employee compensation, fair value	(0.05)	(0.04)
Pro forma earnings per share	\$ 0.49	\$ 0.48
Diluted earnings per share:		
Reported earnings per share	\$ 0.52	\$ 0.50
Stock-based employee compensation, fair value	(0.05)	(0.03)
Pro forma earnings per share	\$ 0.47	\$ 0.47

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions used for grants in the periods above: dividend yield of 0% in each period, expected stock price volatility of 85% to 132% during each period, risk-free interest rates of 2.86% to 6.52% and expected lives of four to ten years, respectively.

7. New Accounting Policies:

In December 2003, the Financial Accounting Standards Board (FASB) issued FIN No. 46R, which provides further guidance on the accounting for variable interest entities. Sterling adopted FIN No. 46R as of December 31, 2003 and Sterling has applied the provisions of FIN No. 46R beginning in the first quarter of 2004 by deconsolidating its subsidiary statutory trusts that issue Trust Preferred Securities to investors. The amounts payable to these trusts continue to be treated as other borrowings. The adoption of FIN No. 46R did not have a material effect on

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Sterling's consolidated financial statements. Sterling's retained interest in its auto loan securitizations and its investments in commercial mortgage-backed securities will not be consolidated since both transaction structures are exempt from the requirements of FIN No. 46 and FIN No. 46R.

In December 2003, the American Institute of Certified Public Accountants issued Statement of Position (SOP) No. 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer. SOP No. 03-3 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans acquired in a transfer if those differences are attributable, at least in part, to credit quality. SOP No. 03-3 is effective for loans acquired in fiscal years beginning after December 15, 2004. Sterling believes the implementation of SOP No. 03-3 will not have a material effect on Sterling's consolidated financial statements.

8. Derivatives and Hedging:

Sterling, through its subsidiary Action Mortgage, enters into interest rate lock commitments (rate locks) to prospective residential mortgage borrowers. Action Mortgage hedges interest rate risk (IRR) by entering into non-binding (best-efforts) forward sales agreements with third parties. In addition, to improve and protect the profit margin on loans sold into the secondary market, Action Mortgage hedges IRR by entering into mandatory forward sales agreements on ABS with third parties.

The risks inherent in such mandatory forward sales agreements include the risk that, if for any reason Action Mortgage does not close and sell the loans in question, it is nonetheless obligated to deliver ABS to the counterparty on the agreed terms. Action Mortgage could incur significant costs in acquiring replacement loans or ABS and such costs could have a material adverse impact on mortgage banking operations in future periods, especially in rising interest rate environments.

Rate locks and forward sales agreements are considered to be derivatives. Sterling has recorded the estimated fair values of forward sales agreements on its balance sheet in either other assets or other liabilities. Changes in the fair values of these derivative instruments are recorded in net gain on sales of mortgage loans in the income statement as the changes occur. The estimated fair value of rate locks was \$(263,000) and the estimated fair value of forward sales agreements was \$51,000 at March 31, 2004.

9. Business Combinations:

On January 2, 2004, Klamath First Bancorp, Inc. (Klamath), an Oregon corporation, was merged with and into Sterling, with Sterling being the surviving corporation in the merger. Klamath's wholly-owned subsidiary, Klamath First Federal Savings and Loan Association, was merged with and into Sterling's wholly-owned subsidiary, Sterling Savings Bank, with Sterling Savings Bank being the surviving institution.

Under the terms of the Klamath merger, each share of Klamath common stock was converted into 0.77 shares of Sterling common stock. The merger was structured as a tax-free reorganization. Sterling issued 5,431,067 shares of common stock in exchange for all of the stock of Klamath. As a result of the merger, Sterling acquired approximately \$988 million in deposits, \$778 million in investments and ABS, \$564 million in loans and \$145 million in capital, while adding approximately 450 employees to its work force. In addition, Sterling added 48 retail branches and significantly increased its deposit market share in Oregon from 0.5% to over 4.0%.

As of the announcement of the merger, the aggregate purchase price was \$145.2 million, including \$5.5 million related to the value of Klamath's vested stock options and \$139.7 million related to the value of Klamath's common stock. The value of the common shares issued by Sterling was \$26.06 per share, which was determined based on the average market closing price of Sterling's common stock five business days prior to and subsequent to the merger announcement date.

With the increase to 134 branches serving Washington, Oregon, Idaho and Montana, Sterling strengthens its position as a leading regional community bank. This merger is consistent with Sterling's strategy to become the leading community bank in the Pacific Northwest region and Sterling's goal of expanding throughout the region. Klamath's strong deposit base complements Sterling's strong asset growth, while the combined branch network and access to capital gives Sterling the opportunity to continue its growth in the region.

The following summarizes the unaudited pro forma results of operations as if the merger with Klamath had occurred on January 1, 2003. Sterling's fiscal year end is December 31 and Klamath's fiscal year end was September 30. Since the merger was completed on January 2, 2004, the information presented below includes Sterling's three months ended March 31, 2003 and Klamath's three months ended December 31, 2002.

	First Three Months of Fiscal Year 2003 (Dollars in thousands, except per share amounts)	
Pro forma interest income	\$	70,914
Pro forma interest expense		30,457
Pro forma net interest income		40,457
Pro forma net income		9,941
Pro forma earnings per share - basic		0.47
Pro forma earnings per share - diluted		0.46

10. Subsequent Event:

Stock Dividend

On April 27, 2004, Sterling announced that the Sterling Board of Directors had declared a 10% stock dividend payable May 28, 2004 to shareholders of record at May 10, 2004. Accordingly, all weighted average shares outstanding and per share amounts have been restated to reflect this common stock dividend.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operation

STERLING FINANCIAL CORPORATION

Comparison of the Three Months Ended March 31, 2004 and 2003

This report contains forward-looking statements. For a discussion about such statements, including the risks and uncertainties inherent therein, see Forward-Looking Statements. Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Consolidated Financial Statements and Notes presented elsewhere in this report and in Sterling's 2003 annual report on Form 10-K.

General

Sterling Financial Corporation (Sterling) is a unitary savings and loan holding company, the significant operating subsidiary of which is Sterling Savings Bank. The principal operating subsidiaries of Sterling Savings Bank are Action Mortgage Company (Action Mortgage), INTERVEST-Mortgage Investment Company (INTERVEST) and Harbor Financial Services, Inc. (Harbor Financial). Sterling Savings Bank commenced operations in 1983 as a Washington State-chartered, federally insured stock savings and loan association headquartered in Spokane, Washington.

Sterling provides personalized, quality financial services to its customers as exemplified by its Hometown Helpful philosophy. Sterling believes that this dedication to personalized service has enabled it to grow both its retail deposit base and its lending portfolio in the Pacific Northwest region. With \$6.10 billion in total assets at March 31, 2004, Sterling attracts Federal Deposit Insurance Corporation (FDIC) insured deposits from the general public through 134 retail branches located in Washington, Oregon, Idaho and Montana. Sterling originates loans through its branch offices, including nine in-store branches, as well as Action Mortgage residential loan production offices in the four-state area and through INTERVEST commercial real estate lending offices in Washington, Oregon and Arizona. Sterling also markets fixed income and equity products, mutual funds, fixed and variable annuities and many other financial products through Harbor Financial and property and casualty insurance coverage in Montana through The Dime Service Corporation, a subsidiary of Sterling Savings Bank.

Sterling continues to enhance its presence as a leading community bank by increasing its commercial real estate, business banking, consumer and construction lending while increasing its retail deposits, particularly transaction accounts. Commercial real estate, business banking, consumer and construction loans generally produce higher yields than residential loans. Management believes that a community bank mix of assets and liabilities will enhance its net interest income (NII) (the difference between the interest earned on loans and investments and the interest paid on liabilities) and will increase other fee income, although there can be no assurance in this regard. Such loans, however, generally involve a higher degree of risk than financing residential real estate. Sterling's revenues are derived primarily from interest earned on loans and asset-backed securities (ABS), fees and service charges and mortgage banking operations. The operations of Sterling Savings Bank, and savings institutions generally, are influenced significantly by general economic conditions and by policies of its primary regulatory authorities, the Office of Thrift Supervision (OTS), the FDIC and the State of Washington Department of Financial Institutions (Washington Supervisor).

Executive Summary and Highlights

Net income for the three months ended March 31, 2004 increased 54% to \$12.0 million, or \$0.52 per diluted share, compared with net income of \$7.8 million, or \$0.50 per diluted share, for last year's comparable period. The increase in earnings primarily reflects continued increases in net interest income (NII) and other income that were primarily due to the recently completed merger with Klamath First Bancorp, Inc. (Klamath).

On January 2, 2004, Sterling completed the merger with Klamath, adding 48 branches located in Oregon and Washington and adding approximately \$1.5 billion in total assets, including approximately \$778 million in investments and approximately \$564 million in loans. The merger had a positive influence on the first quarter performance and resulted in growth in several areas.

Other highlights for the quarter ended March 31 are as follows:

NII increased approximately 60% over the first quarter of 2003.

Fees and service charges increased 93% over the March 2003 quarter.

Loan originations increased 23% over the first quarter of 2003.

Return on average tangible equity was 18.8% compared to 18.2% for the comparable quarter last year. Average tangible equity is equal to average shareholders' equity less average net goodwill and other intangible assets.

Book value per share increased 25% to \$19.07 at March 31, 2004, from \$15.31 at December 31, 2003. Amounts have been adjusted to reflect the 10% stock dividend payable on May 28, 2004.

Company Growth

On January 2, 2004, Klamath was merged with and into Sterling, with Sterling being the surviving corporation in the merger. Klamath's wholly-owned subsidiary, Klamath First Federal Savings and Loan Association, was merged with and into Sterling's wholly-owned subsidiary, Sterling Savings Bank, with Sterling Savings Bank being the surviving institution.

Under the terms of the Klamath merger, each share of Klamath common stock was converted into 0.77 shares of Sterling common stock. Sterling issued 5,431,067 shares of common stock in exchange for all of the stock of Klamath. As a result of the merger, Sterling acquired approximately \$988 million in deposits, \$778 million in investments and ABS, \$564 million in loans and \$145 million in capital, while adding approximately 450 employees to its work force. In addition, Sterling added 48 retail branches and significantly increased its deposit market share in Oregon from 0.5% to over 4.0%. See Note 9 of Notes to Consolidated Financial Statements.

With the increase to 134 branches serving Washington, Oregon, Idaho and Montana, Sterling strengthens its position as a leading regional community bank. This merger is consistent with Sterling's strategy to become the leading community bank in the Pacific Northwest. Klamath's strong deposit base complements Sterling's asset growth strategy, while the combined branch network and access to capital gives Sterling the opportunity to continue its growth in the region.

Sterling intends to continue to pursue an aggressive growth strategy to become the leading community bank in the Pacific Northwest. This strategy may include acquiring other financial businesses or branches thereof or other substantial assets or deposit liabilities. Sterling may not be successful in identifying further acquisition candidates, integrating acquisitions or preventing such acquisitions from having an adverse effect on Sterling. There is significant competition for acquisitions in Sterling's market area and Sterling may not be able to acquire other businesses on attractive terms. Furthermore, the success of Sterling's growth strategy will depend on increasing and maintaining sufficient levels of regulatory capital, obtaining necessary regulatory approvals, generating appropriate growth and the existence of favorable economic and market conditions. There can be no assurance that Sterling will be successful in implementing its growth strategy.

Critical Accounting Policies

The accounting and reporting policies of Sterling conform to accounting principles generally accepted in the United States of America (GAAP) and to general practices within the banking industry. The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Sterling's management has identified the accounting policies described below as those that, due to the

judgments, estimates and assumptions inherent in those policies, are critical to an understanding of Sterling's Consolidated Financial Statements and Management's Discussion and Analysis.

Income Recognition. Sterling recognizes interest income by methods that conform to general accounting practices within the banking industry. In the event management believes collection of all or a portion of contractual interest on a loan has become doubtful, which generally occurs after the loan is 90 days past due, Sterling discontinues the accrual of interest and any previously accrued interest recognized in income deemed uncollectible is reversed. Interest received on nonperforming loans is included in income only if principal recovery is reasonably assured. A nonperforming loan is restored to accrual status when it is brought current, has performed in accordance with contractual terms for a reasonable period of time, and the collectibility of the total contractual principal and interest is no longer in doubt.

Allowance For Loan Losses. In general, determining the amount of the allowance for loan losses requires significant judgment and the use of estimates by management. Sterling maintains an allowance for loan losses to absorb probable losses in the loan portfolio based on a quarterly analysis of the portfolio and expected future losses. This analysis is designed to determine an appropriate level and allocation of the allowance for losses among loan types by considering factors affecting loan losses, including specific losses, levels and trends in impaired and nonperforming loans, historical loan loss experience, current national and local economic conditions, volume, growth and composition of the portfolio, regulatory guidance and other relevant factors. Management monitors the loan portfolio to evaluate the adequacy of the allowance. The allowance can increase or decrease each quarter based upon the results of management's analysis.

The amount of the allowance for the various loan types represents management's estimate of expected losses from existing loans based upon specific allocations for individual lending relationships and historical loss experience for each category of homogeneous loans. The allowance for loan losses related to impaired loans is based on discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. This evaluation requires management to make estimates of the amounts and timing of future cash flows on impaired loans, which consist primarily of non-accrual and restructured loans.

Individual loan reviews are based upon specific quantitative and qualitative criteria, including the size of the loan, loan quality ratings, value of collateral, repayment ability of borrowers, and historical experience factors. The historical experience factors utilized are based upon past loss experience, trends in losses and delinquencies, the growth of loans in particular markets and industries, and known changes in economic conditions in the particular lending markets. Allowances for homogeneous loans (such as residential mortgage loans, personal loans, etc.) are collectively evaluated based upon historical loss experience, trends in losses and delinquencies, growth of loans in particular markets, and known changes in economic conditions in each particular lending market.

There can be no assurance that the allowance for loan losses will be adequate to cover all losses, but management believes the allowance for loan losses was adequate at March 31, 2004. While management uses available information to provide for loan losses, the ultimate collectibility of a substantial portion of the loan portfolio and the need for future additions to the allowance will be based on changes in economic conditions and other relevant factors. A slowdown in economic activity could adversely affect cash flows for both commercial and individual borrowers, as a result of which Sterling could experience increases in nonperforming assets, delinquencies and losses on loans.

Investments and ABS. Assets in the investment and ABS portfolios are initially recorded at cost, which includes any premiums and discounts. Sterling amortizes premiums and discounts as an adjustment to interest income using the level interest yield method over the estimated life of the security. The cost of investment securities sold, and any resulting gain or loss, is based on the specific identification method.

Management determines the appropriate classification of investment securities at the time of purchase. Held-to-maturity securities are those securities that Sterling has the positive intent and ability to hold to maturity and are recorded at amortized cost. Available-for-sale securities are those securities that would be available to be sold in

the future in response to Sterling's liquidity needs, changes in market interest rates, and asset-liability management strategies, among others. Available-for-sale securities are reported at fair value, with unrealized holding gains and losses reported in shareholders' equity as a separate component of other comprehensive income, net of applicable deferred income taxes.

Management evaluates investment securities for other than temporary declines in fair value on a quarterly basis. If the fair value of investment securities falls below their amortized cost and the decline is deemed to be other than temporary, the securities will be written down to current market value and the write down will be deducted from earnings under realized losses. There were no investment securities which management identified to be other-than-temporarily impaired for the three months ended March 31, 2004. Charges to income could occur in future periods due to a change in management's intent to hold the investments to maturity, a change in management's assessment of credit risk, or a change in regulatory or accounting requirements.

Goodwill and Other Intangible Assets. Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Sterling's goodwill relates to value inherent in the banking business and the value is dependent upon Sterling's ability to provide quality, cost effective services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is generated by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

Sterling performed the annual test of its goodwill assets as of June 30, 2003, and concluded that the recorded value of goodwill was not impaired. There are many assumptions and estimates underlying the determination of impairment. Another estimate using different, but still reasonable, assumptions could produce a significantly different result. Additionally, future events could cause management to conclude that Sterling's goodwill is impaired, which would result in Sterling recording an impairment loss. Any resulting impairment loss could have a material adverse impact on Sterling's financial condition and results of operations.

Other intangible assets consisting of core-deposit intangibles with definite lives are amortized over the estimated life of the acquired depositor relationships (generally eight to ten years).

Real Estate Owned. Property acquired through foreclosure of defaulted mortgage loans is carried at the lower of cost or fair value less estimated costs to sell. Development and improvement costs relating to the property are capitalized to the extent they are deemed to be recoverable.

An allowance for losses on real estate owned is designed to include amounts for estimated losses as a result of impairment in value of the real property after repossession. Sterling reviews its real estate owned for impairment in value whenever events or circumstances indicate that the carrying value of the property may not be recoverable. In performing the review, if expected future undiscounted cash flow from the use of the property or the fair value, less selling costs, from the disposition of the property is less than its carrying value, an impairment loss is recognized. As a result of changes in the real estate markets in which these properties are located, it is reasonably possible that the carrying values could be reduced in the near term.

Results of Operations

Overview. Sterling recorded net income of \$12.0 million, or \$0.52 per diluted share, for the three months ended March 31, 2004, compared with net income of \$7.8 million, or \$0.50 per diluted share, for the three months ended March 31, 2003. The increase in net income reflects an increase in NII and other income.

The annualized return on average assets (ROA) was 0.81% and 0.86% for the three months ended March 31, 2004 and 2003, respectively. The annualized return on average equity (ROE) was 12.0% and 14.5% for the three months ended March 31, 2004 and 2003, respectively. The decreases in ROA primarily reflected a higher balance of average assets relative to last year s comparable period. The decrease in ROE was primarily due

to the increase in shareholder's equity. The lower yielding assets acquired from Klamath also decreased Sterling's ROA and ROE.

Net Interest Income. The most significant component of earnings for a financial institution typically is NII, which is the difference between interest income, primarily from loan, ABS and investment portfolios, and interest expense, primarily on deposits and borrowings. During the three months ended March 31, 2004 and 2003, NII was \$45.7 million and \$28.6 million, respectively, an increase of approximately 60%. The increase in NII during the three months ended March 31, 2004, compared to the same period in 2003, was primarily due to the increases in average loan and ABS volumes following the Klamath merger and a decrease in the cost of deposits and borrowings.

Changes in NII result from changes in volume, net interest spread and net interest margin. Volume refers to the dollar level of interest-earning assets and interest-bearing liabilities. Net interest spread refers to the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Net interest margin refers to NII divided by total interest-earning assets and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

Average interest-earning assets for the three months ended March 31, 2004 and 2003 were \$5.51 billion and \$3.45 billion, respectively. Average loans increased by \$1.07 billion, while average investments and ABS increased by \$989.1 million over the 2003 amounts. Net interest spread during these periods was 3.31% and 3.32%, respectively. The net interest margin for the three months ended March 31, 2004 and 2003 was 3.33% and 3.36%, respectively. The decrease in these ratios reflects the decline in the yield on certain loans and investments. This decline was partially offset by a lower cost of deposits. In addition, Sterling acquired lower-yielding loans and securities from Klamath that impacted the ratios during the current quarter.

Provision for Losses on Loans. Management's policy is to establish valuation allowances for estimated losses by charging corresponding provisions against income. The evaluation of the adequacy of specific and general valuation allowances is an ongoing process. This process includes information derived from many factors including historical loss trends, trends in classified assets, trends in delinquency and nonaccrual loans, trends in portfolio volume, diversification as to type of loan, size of individual credit exposure, current and anticipated economic conditions, loan policies, collection policies and effectiveness, quality of credit personnel, effectiveness of policies, procedures and practices, and recent loss experience of peer banking institutions.

Sterling recorded provisions for losses on loans of \$2.9 million and \$2.3 million for the three months ended March 31, 2004 and 2003, respectively. The current provision reflects the analysis and assessment of the relevant factors mentioned in the preceding paragraph. Management anticipates that its provisions for losses on loans will continue to increase, reflecting Sterling's strategic direction of originating more commercial real estate, construction, business banking and consumer loans which have a somewhat higher loss profile than the traditional thrift institution mix of loans.

The following table summarizes loan loss allowance activity for the periods indicated.

At March 31, 2004, Sterling's total classified assets were \$93.3 million, compared with \$73.3 million at March 31, 2003. Nonperforming assets were \$31.9 million at March 31, 2004, compared with \$28.2 million at March 31, 2003. The increases in classified and nonperforming assets primarily relate to the delinquency of certain large loans. Sterling does not anticipate significant losses in these classified assets, although there can be no assurances in this regard. During the period, the loan delinquency ratio decreased to 0.83% of total loans compared to 0.90% of total loans at March 31, 2003. Sterling's loan charge-off ratio showed a slight increase during the last quarter but remained at a modest level. The annualized level of charge-offs to average loans was 0.17% for the first quarter, up from 0.14% at December 31, 2003, and up from 0.07% at March 31, 2003. The increase in the ratio was primarily due to charge-offs on two commercial real estate loans.

Other Income. Other income was \$12.9 million and \$7.1 million for the three months ended March 31, 2004 and 2003, respectively. The increase for the three months ended March 31, 2004, compared with the three months ended March 31, 2003, was primarily due to an increase in fees and service charges.

Fees and service charge income increased by 93% to \$8.3 million for the three months ended March 31, 2004 from \$4.3 million for the same period last year. This increase was primarily due to an increase in the number of transaction accounts, fees for new overdraft protection services and a 10% growth in outstanding transaction deposits. Sterling had nearly 146,000 transaction accounts at March 31, 2004, an increase of almost 63,000 accounts from March 31, 2003. Most of this increase was from accounts acquired in the Klamath merger.

The following table summarizes loan originations and sales of loans and serviced mortgage loans for the periods indicated.

	Three Months Ended March 31,	
	2004	2003
(Dollars in millions)		
Originations of one- to four-family permanent mortgage loans	\$ 70.7	\$ 132.3
Sales of residential loans	27.3	98.2
Principal balances of residential loans serviced for others	380.3	216.3
Principal balances of commercial real estate loans serviced for others	138.0	172.3

Mortgage banking operations income was \$1.2 million and \$2.2 million, respectively, for the three months ended March 31, 2004 and 2003, respectively. The decrease primarily reflected an industry wide slow-down in refinance activity over the last several months.

During the quarter ended March 31, 2004, Sterling sold \$274.2 million in investments and ABS, compared with \$215.3 million for the quarter ended March 31, 2003. Sterling recognized a net gain of \$2.5 million and \$1.4 million for the three months ended March 31, 2004 and 2003, respectively. The increase in net gains on sales of investments and ABS for the period compared to the prior year's comparable period primarily reflected the realization of gains due to positive market fluctuations.

Operating Expenses. Operating expenses were \$37.7 million and \$21.4 million for the three months ended March 31, 2004 and 2003, respectively. The higher level of operating expenses was primarily due to increases in personnel,

occupancy and advertising expenses and merger and acquisition costs.

Employee compensation and benefits were \$19.2 million and \$12.0 million for the three months ended March 31, 2004 and 2003, respectively. Full-time equivalent employees have increased year-over-year to 1,533 full-time equivalents at March 31, 2004, an increase of 503 full-time equivalents. Nearly two-thirds of this year-over-year increase can be attributed to the personnel acquired in the recent merger.

Occupancy and equipment expenses were \$5.2 million and \$3.5 million for the three months ended March 31, 2004 and 2003, respectively. The increase for the period reflected higher costs related to additional occupied space and additional staff equipment costs associated with Sterling's acquisition of 48 additional branch properties, including nine in-store branches, as a result of the Klamath merger.

Advertising expenses were \$1.9 million and \$0.4 million for the three months ended March 31, 2004 and 2003, respectively. The increase for the period reflected higher advertising costs associated with the expanded branch network and the addition of new television and radio ads.

Merger and acquisition costs were \$3.9 million and \$0.1 million for the three months ended March 31, 2004 and 2003, respectively. The increase in merger and acquisition costs resulted from the Klamath merger and included \$1.0 million in occupancy related costs and \$814,000 of data processing costs, which related to maintaining dual operations for a period of time until operations were consolidated in mid February 2004.

Income Tax Provision. Sterling recorded federal and state income tax provisions of \$6.0 million and \$4.2 million for the three months ended March 31, 2004 and 2003, respectively. The effective tax rates for these periods were approximately 34% and 35%, respectively. The decrease in the effective tax rate compared to the March 31, 2003 period was primarily due to the effect of tax credits for investments in certain low income housing developments.

Financial Position

Assets. At March 31, 2004, Sterling's assets were \$6.10 billion, up 43% from \$4.28 billion at December 31, 2003. For a discussion of the impact of the Klamath merger on Sterling's consolidated total assets, see Company Growth.

Investments and ABS. Sterling's investment and ABS portfolio at March 31, 2004 was \$2.02 billion, an increase of \$944.6 million from the December 31, 2003 balance of \$1.07 billion. The increase was primarily due to approximately \$778 million of investments and ABS acquired from Klamath.

Loans Receivable. At March 31, 2004, net loans receivable were \$3.58 billion, up \$669.2 million from \$2.91 billion at December 31, 2003. The increase was primarily due to \$564 million of loans acquired from Klamath, as well as increased loan originations during the most recent quarter. During the three months ended March 31, 2004, total loan originations were \$590.0 million compared with \$479.9 million for the prior year's comparable period. The year-over-year increase in loan originations was influenced by strong community banking loan originations, particularly in the business banking, commercial real estate and consumer lending areas. This increase was partially offset by a decrease in residential real estate loan originations.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

The following table sets forth the composition of Sterling's loan portfolio at the dates indicated. Loan balances exclude deferred loan origination costs and fees or allowances for loan losses.

	March 31, 2004		December 31, 2003	
	Amount	%	Amount	%
	(Dollars in thousands)			
Residential real estate	\$ 587,303	16.2	\$ 407,999	13.8
Multifamily real estate	168,126	4.6	167,220	5.7
Commercial real estate	519,258	14.3	463,191	15.7
Real estate construction	579,683	16.0	552,965	18.7
Consumer - direct	458,647	12.6	309,931	10.5
Consumer - indirect	101,150	2.8	99,697	3.4
Business, private and corporate banking	1,213,183	33.5	948,304	32.2
Gross loans receivable	3,627,350	100.0	2,949,307	100.0
Net deferred origination fees	(8,111)		(7,276)	
Allowance for losses on loans	(43,629)		(35,605)	
Loans receivable, net	\$ 3,575,610		\$ 2,906,426	
Weighted average yield at end of period	5.68%		5.71%	

The following table sets forth Sterling's loan originations for the period indicated.

	Three Months Ended March 31,		% Change
	2004	2003	
	(Dollars in thousands)		
Residential real estate	\$ 70,729	\$ 132,288	(46.5)
Multifamily real estate	15,337	13,365	14.8
Commercial real estate	60,760	37,099	63.8
Real estate construction	175,512	129,154	35.9
Consumer - direct	68,132	32,308	110.9
Consumer - indirect	12,907	14,268	(9.5)
Business and private banking	143,353	74,586	92.2
Corporate banking	43,240	46,850	(7.7)
Total loans originated	\$ 589,970	\$ 479,918	22.9

BOLI. Bank-owned life insurance (BOLI) increased to \$90.6 million at March 31, 2004 from \$73.1 million at December 31, 2003. The increase was primarily due to the \$16.3 million in BOLI acquired in the Klamath merger. Sterling maintains BOLI to fund employee benefit costs. Through the purchase of BOLI, Sterling becomes the beneficiary of life insurance policies on certain individuals who consent to the issuance of the policies.

Goodwill and Other Intangible Assets. Goodwill and other intangible assets increased to \$149.8 million at March 31, 2004 and \$48.0 million at December 31, 2003. Sterling recorded \$83.2 million in goodwill and \$19.2 million in other intangible assets in connection with the business combination with Klamath.

Deposits. Total deposits increased \$1.03 billion to \$3.49 billion at March 31, 2004 from \$2.46 billion at December 31, 2003, primarily due to the acquisition of \$987.9 million in deposits from Klamath. See Company Growth.

The following table sets forth the composition of Sterling's deposits at the dates indicated.

	March 31, 2004		December 31, 2003	
	Amount	%	Amount	%
(Dollars in thousands)				
Noninterest checking	\$ 501,022	14.4	\$ 306,456	12.5
NOW checking	419,201	12.0	301,197	12.3
Savings and money market	1,062,260	30.4	663,858	27.0
Time deposits	1,509,679	43.2	1,183,565	48.2
Total deposits	\$ 3,492,162	100.0	\$ 2,455,076	100.0
Annualized cost of deposits		1.42%		1.58%

Borrowings. Deposit accounts are Sterling's primary source of funds. Sterling does, however, rely upon advances from the Federal Home Loan Bank of Seattle (FHLB Seattle), reverse repurchase agreements and other borrowings to supplement its funding and to meet deposit withdrawal requirements. At March 31, 2004, the total of such borrowings was \$2.11 billion compared with \$1.53 billion at December 31, 2003. See Liquidity and Capital Resources.

Asset and Liability Management

The results of operations for financial institutions may be materially and adversely affected by changes in prevailing economic conditions, including rapid changes in interest rates, declines in real estate market values and the monetary and fiscal policies of the federal government. Like all financial institutions, Sterling's NII and the net present value of assets, liabilities and off-balance sheet contracts (NPV), or estimated fair value, are subject to fluctuations in interest rates. For example, some of Sterling's adjustable rate mortgages are indexed to the one-year or five-year U.S. Treasury index or periodic fixed-rate 30-day London Interbank Offering Rate (LIBOR) and swaps curves. When interest-earning assets such as loans are funded by interest-bearing liabilities such as deposits, FHLB Seattle advances and other borrowings, a changing interest rate environment may have a dramatic effect on Sterling's earnings. Currently, Sterling's interest-bearing liabilities mature or reprice more frequently, or on different terms, than do its interest-earning assets. The fact that liabilities mature or reprice more frequently on average than assets may be beneficial in times of decreasing interest rates; however, such an asset/liability structure may result in declining NII during periods of rising interest rates.

Additionally, the extent to which borrowers prepay loans is affected by prevailing interest rates. When interest rates increase, borrowers are less likely to prepay loans; whereas when interest rates decrease, borrowers are more likely to prepay loans. Prepayments may affect the levels of loans retained in an institution's portfolio as well as its NII.

Sterling maintains an asset and liability management program intended to manage NII through interest rate cycles and to protect its NPV by controlling its exposure to changing interest rates. Sterling uses a simulation model designed to measure the sensitivity of NII and NPV to changes in interest rates. This simulation model is designed to enable Sterling to generate a forecast of NII and NPV given various interest rate

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

forecasts and alternative strategies. The model is also designed to measure the anticipated impact that prepayment risk, basis risk, customer maturity preferences, volumes of new business and changes in the relationship between long-term and short-term interest rates have on the performance of Sterling. The model calculates the present value of assets, liabilities, off-balance sheet financial instruments, and equity at current interest rates and at hypothetical higher and lower interest rates at various intervals. The present value of each major category of financial instruments is calculated using estimated cash flows based on weighted-average contractual rates and terms, then discounted at the estimated current market interest rate for similar financial instruments. The present value of longer term fixed-rate financial instruments is more difficult to estimate because such instruments are susceptible to changes in market interest rates. Present value

estimates of adjustable-rate financial instruments are more reliable since they represent the difference between the contractual and discounted rates until the next interest rate repricing date.

The calculations of present value have certain shortcomings. The discount rates utilized for loans, investments and ABS are based on estimated nationwide market interest rate levels for similar loans and securities, with prepayment assumptions based on historical experience and market forecasts. The unique characteristics of Sterling's loans and ABS may not necessarily parallel those in the model. The discount rates utilized for deposits and borrowings are based upon available alternative types and sources of funds which are not necessarily indicative of the market value of deposits and FHLB Seattle advances since such deposits and advances are unique to and have certain price and customer relationship advantages for depository institutions. The present values are determined based on the discounted cash flows over the remaining estimated lives of the financial instruments on the assumption that the resulting cash flows are reinvested in financial instruments with virtually identical terms.

The total measurement of Sterling's exposure to interest rate risk (IRR) as presented in the following table may not be representative of the actual values which might result from a higher or lower interest rate environment. A higher or lower interest rate environment most likely will result in different investment and borrowing strategies by Sterling designed to further mitigate the effect on the value of and the net earnings generated from Sterling's net assets from any change in interest rates.

Sterling is continuing to pursue strategies to manage the level of its IRR while increasing its NII and NPV: a) through the origination and retention of variable-rate consumer, business banking, construction and commercial real estate loans, which generally have higher yields than residential permanent loans; b) by the sale of certain long-term fixed-rate loans and investments; and c) by increasing the level of its core deposits, which are generally a lower-cost funding source than wholesale borrowings. There can be no assurance that Sterling will be successful implementing any of these strategies or that, if these strategies are implemented, they will have the intended effect of reducing IRR or increasing NII and NPV.

The following table presents Sterling's estimates of changes in NPV for the periods indicated. The results indicate the potential effects of instantaneous, parallel shifts in the market yield curve. These calculations are highly subjective and technical and are relative measurements of IRR which do not necessarily reflect any expected rate movement.

Change in Interest Rate in Basis Points (Rate Shock)	At March 31, 2004			At December 31, 2003		
	NPV	Ratio of NPV to the Present Value of Total Assets	Change in NPV	NPV	Ratio of NPV to the Present Value of Total Assets	Change in NPV
			(Dollars in thousands)			
+300	\$ 297,850	5.04%	(30.2)	\$ 232,820	5.10%	(23.3)
+200	336,285	5.61	(21.2)	260,054	5.66	(14.3)
+100	377,954	6.21	(11.5)	285,298	6.09	(6.0)
Static	426,848	6.91	0.0	303,395	6.44	0.0
-100	340,642	5.53	(20.2)	270,817	5.19	(10.8)
-200	N/A(1)	N/A(1)	N/A(1)	N/A(1)	N/A(1)	N/A(1)
-300	N/A(1)	N/A(1)	N/A(1)	N/A(1)	N/A(1)	N/A(1)

- (1) In low interest rate environments, the calculations are not relatively meaningful.

Sterling also uses gap analysis, a traditional analytical tool designed to measure the difference between the amount of interest-earning assets and the amount of interest-bearing liabilities expected to mature or reprice in a given period. Sterling calculated its one-year cumulative gap position to be a

negative 10.2% and a negative 6.1% at March 31, 2004 and December 31, 2003, respectively. Sterling calculated its three-year gap position to be a negative 4.6% and a negative 1.0% at March 31, 2004 and December 31, 2003, respectively. The change in both gap positions was primarily due to the duration of interest-earning assets and interest-bearing liabilities acquired from the merger with Klamath. Management attempts to maintain Sterling's gap position between positive 10% and negative 25%. At March 31, 2004, Sterling's gap positions were within limits established by its Board of Directors. Management is pursuing strategies to increase its NII without significantly increasing its cumulative gap positions in future periods. There can be no assurance that Sterling will be successful implementing these strategies or that, if these strategies are implemented, they will have the intended effect of increasing its NII. See Results of Operations *Net Interest Income* and Capital.

Liquidity and Capital Resources

As a financial institution, Sterling's primary sources of funds are investing and financing activities, including the collection of loan principal and interest payments. Financing activities consist primarily of customer deposits, advances from FHLB Seattle and other borrowings. Deposits increased 42% to \$3.49 billion at March 31, 2004 from \$2.46 billion at December 31, 2003, primarily due to the acquisition of \$987.9 million in deposits from Klamath and to additional increases in transaction deposits.

Sterling Savings Bank actively manages its liquidity in an effort to maintain an adequate margin over the level necessary to support expected and potential loan fundings and deposit withdrawals. This is balanced with the need to maximize yield on alternative investments. The liquidity ratio may vary from time to time, depending on economic conditions, deposit fluctuations and loan funding needs.

During the three months ended March 31, 2004, cash used in investing activities consisted primarily of the amounts used to fund loans and purchase investments and ABS. Sterling acquired \$44.7 million of cash and cash equivalents as a result of the Klamath merger. During this period, net cash provided by financing activities was \$239.8 million, which consisted primarily of \$201.5 million in additional reverse repurchase agreements used to supplement other funding sources.

Sterling Savings Bank's credit line with FHLB Seattle provides for borrowings up to a percentage of its total assets, subject to collateralization requirements. At March 31, 2004, this credit line represented a total borrowing capacity of \$2.16 billion, of which \$263.5 million was available. Sterling Savings Bank also borrows funds under reverse repurchase agreements pursuant to which it sells investments (generally U.S. agency securities and ABS) under an agreement to buy them back at a specified price at a later date. These agreements to repurchase are deemed to be borrowings collateralized by the investments and ABS sold. Sterling Savings Bank uses these borrowings to supplement deposit gathering for funding the origination of loans. At March 31, 2004, Sterling Savings Bank had \$564.6 million in outstanding borrowings under reverse repurchase agreements and had securities available for additional secured borrowings of approximately \$369.4 million. The use of reverse repurchase agreements may expose Sterling to certain risks not associated with other borrowings, including IRR and the possibility that additional collateral may have to be provided if the market value of the pledged collateral declines.

Sterling, on a parent company-only basis, had cash and other resources of approximately \$31.0 million and a revolving line of credit from U.S. Bank of \$5.0 million at March 31, 2004 with no funds drawn on this line of credit. This line of credit as well as a \$22.0 million term note are secured by a majority of the Common and Preferred Stock of Sterling Savings Bank. See Note 2 of Notes to Consolidated Financial Statements.

At March 31, 2004 and 2003, Sterling had an investment of \$110.1 million in the Preferred Stock of Sterling Savings Bank. At March 31, 2004 and 2003, Sterling had an investment in the Common Stock of Sterling Savings Bank of \$295.0 million and \$132.6 million, respectively.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Sterling received cash dividends on Sterling Savings Bank Preferred Stock of \$968,000 during the three months ended March 31, 2004. These resources were sufficient to meet the operating needs of Sterling, including interest expense on its long-term debt. Sterling Savings Bank's ability to pay dividends is limited by its earnings, financial condition and capital requirements, as well as rules and regulations imposed by the OTS. See Note 2 of Notes to Consolidated Financial Statements.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

The following table represents Sterling's on-and-off balance sheet aggregate contractual obligations to make future payments as of March 31, 2004.

	Total	Payments Due by Period			
		Less than 1 year	1 to 3 years	Over 3 to 5 years	More than 5 years
(Dollars in thousands)					
Long-term debt(1)	\$ 158,000	\$ 3,000	\$ 36,000	\$ 6,000	\$ 113,000
Capital lease obligations	0	0	0	0	0
Operating leases	14,340	2,320	6,879	2,648	2,493
Purchase obligations(2)	1,630	1,630	0	0	0
Other long-term liabilities reflected on the registrant's balance sheet under GAAP	0	0	0	0	0
Total	\$ 173,970	\$ 6,950	\$ 42,879	\$ 8,648	\$ 115,493

- (1) Excludes interest payments. See Note 2 of Notes to Consolidated Financial Statements.
- (2) Excludes recurring accounts payable amounts due in the second quarter of 2004.

Sterling, in the conduct of ordinary business operations routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for the early termination of the contracts. Sterling is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Management does not believe that these off-balance sheet arrangements have a material current effect on Sterling's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources but there is no assurance that such arrangements will not have a future effect.

Sterling, through its subsidiary Action Mortgage, enters into interest rate lock commitments (rate locks) with prospective residential mortgage borrowers. Action Mortgage hedges IRR by entering into non-binding (best-efforts) forward sales agreements with third parties. In addition, to improve and protect the profit margin on loans sold into the secondary market, Action Mortgage hedges IRR by entering into mandatory forward sales agreements on ABS with third parties.

The risks inherent in such mandatory forward sales agreements include the risk that, if for any reason Action Mortgage does not close and sell the loans in question, it is nonetheless obligated to deliver ABS to the counterparty on the agreed terms. Action Mortgage could incur significant costs in acquiring replacement loans or ABS and such costs could have a material adverse impact on mortgage banking operations in future periods, especially in rising interest rate environments.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Rate locks and forward sales agreements are considered to be derivatives. Sterling has recorded the estimated fair values of forward sales agreements on its balance sheet in either other assets or other liabilities. Changes in the fair values of these derivative instruments are recorded in net gain on sales of mortgage loans in the income statement as the changes occur. The estimated fair value of rate locks was \$(263,000) and the estimated fair value of forward sales agreements was \$51,000 at March 31, 2004.

Capital

Sterling's total shareholders' equity was \$430.3 million at March 31, 2004 compared with \$250.3 million at December 31, 2003. The increase in total shareholders' equity was primarily due to the issuance of shares and the increase in net income in connection with the Klamath merger. Sterling acquired approximately \$145 million of capital in connection with the Klamath merger. Shareholders' equity was 7.1% of total assets at March 31, 2004 compared with 5.9% at December 31, 2003.

Sterling has outstanding various series of capital securities (Trust Preferred Securities) issued to investors. The Trust Preferred Securities are treated as debt of Sterling. Although Sterling, as a savings and loan holding company, is not subject to the Federal Reserve capital requirements for bank holding companies, the Trust Preferred Securities have been structured to qualify as Tier 1 capital, subject to certain limitations, if Sterling were to become regulated as a bank holding company. For a complete description, see Note 2 of Notes to Consolidated Financial Statements.

Sterling has a variable-rate term note with U.S. Bank with a balance of \$22.0 million outstanding at March 31, 2004. This note matures on September 17, 2007. Interest accrues at the 30-day LIBOR plus 2.00% and is payable monthly. Sterling also has a \$5.0 million revolving line of credit with U.S. Bank. This line of credit expires on September 15, 2004. The interest rate is adjustable monthly at the 30-day LIBOR plus 2.00% and is payable monthly. At March 31, 2004, no amounts were outstanding on the line of credit. The term note and line of credit are collateralized by a majority of the Common and Preferred Stock of Sterling Savings Bank. See Note 2 of Notes to Consolidated Financial Statements.

Sterling's \$30.0 million of Floating Rate Notes Due 2006 were designed to be treated as Tier 2 capital, subject to certain limitations, if Sterling were to become regulated as a bank holding company. See Note 2 of Notes to Consolidated Financial Statements.

At March 31, 2004, Sterling had an unrealized gain of \$4.8 million, net of related income taxes, on investments and ABS classified as available for sale. At December 31, 2003, Sterling had an unrealized loss of \$15.2 million, net of related income taxes, on investments and ABS classified as available for sale. The change since December 31, 2003 primarily reflects a decrease in the average yield of certain long-term ABS. Fluctuations in prevailing interest rates continue to cause volatility in this component of accumulated comprehensive income or loss in shareholders' equity and may continue to do so in future periods.

Sterling Savings Bank is required by applicable regulations to maintain certain minimum capital levels with respect to core (Tier 1) capital, core (Tier 1) risk-based capital and total risk-based capital. Sterling Savings Bank will endeavor to enhance its capital resources and regulatory capital ratios through the retention of earnings and the management of the level and mix of assets, although there can be no assurance in this regard. At March 31, 2004, Sterling Savings Bank exceeded all such regulatory capital requirements and was well-capitalized pursuant to OTS regulations.

The following tables set forth Sterling Savings Bank's core (Tier 1) capital, core (Tier 1) risk-based capital and total risk-based capital positions as reported on the quarterly Thrift Financial Report at March 31, 2004.

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

	Minimum Capital Requirements		Well-Capitalized Requirements		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)					
Total risk-based capital (to risk-weighted assets)	\$ 319,352	8.00%	\$ 399,190	10.00%	\$ 434,517	10.88%
Core (Tier 1) risk-based capital (to risk-weighted assets)	159,676	4.00	239,514	6.00	394,796	9.87
Core (Tier 1) capital (to adjusted assets)	236,983	4.00	296,229	5.00	394,796	6.66

Goodwill Litigation

In contracts made in connection with Sterling Savings Bank's acquisition of three insolvent savings institutions between 1985 and 1988, the U.S. government agreed that Sterling could use \$38.0 million of supervisory goodwill associated with the acquisitions to help meet its regulatory capital requirements. In 1989, Congress enacted the Financial Institutions Reform Recovery and Enforcement Act which provided, among other things, that savings institutions such as Sterling Savings Bank were no longer permitted to include supervisory goodwill in their regulatory capital. Consequently, Sterling Savings Bank was required to discontinue use of its supervisory goodwill in calculating its capital ratios, which resulted in Sterling Savings Bank's failing to comply with its minimum regulatory capital requirements from 1989 through 1991.

In May 1990, Sterling sued the U.S. Government with respect to the loss of the goodwill treatment and other matters relating to Sterling's past acquisitions of troubled thrift institutions (the Goodwill Litigation). In the Goodwill Litigation, Sterling seeks damages for, among other things, breach of contract and for deprivation of property without just compensation.

In September 2002, the U.S. Court of Federal Claims granted Sterling Savings Bank's motion for summary judgment as to liability on its contract claim, holding that the United States government owed contractual obligations to Sterling with respect to its acquisition of three failing regional thrifts during the 1980's and had breached its contracts with Sterling. Sterling is waiting for a trial date to be set to determine what amount, if any, the government must pay in damages for its breach. The timing and ultimate outcome of the Goodwill Litigation cannot be predicted with certainty. Because of the effort required to bring the case to conclusion, Sterling likely will continue to incur legal expenses at recent levels over the next one to two years.

New Accounting Policies

In December 2003, the Financial Accounting Standards Board (FASB) issued Interpretation No. 46 (Revised), Consolidation of Variable Interest Entities (FIN No. 46R), which provides further guidance on the accounting for variable interest entities. Sterling adopted FIN No. 46R as of December 31, 2003 and Sterling has applied the provisions of FIN No. 46R beginning in the first quarter of 2004 by deconsolidating its subsidiary statutory trusts that issue Trust Preferred Securities to investors. The amounts payable to these trusts continue to be treated as other borrowings. The adoption of FIN No. 46R did not have a material effect on Sterling's consolidated financial statements. Sterling's retained interest in its auto loan securitizations and its investments in commercial mortgage-backed securities will not be consolidated since both transaction structures are exempt from the requirements of FIN No. 46 and FIN No. 46R.

In December 2003, the American Institute of Certified Public Accountants issued Statement of Position (SOP) No. 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer. SOP No. 03-3 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans acquired in a transfer if those differences are attributable, at least in part, to credit quality. SOP No. 03-3 is effective for loans acquired in fiscal years beginning after December 15, 2004. Sterling believes the implementation of SOP No. 03-3 will not have a material effect on Sterling's consolidated financial statements.

Regulation and Compliance

Edgar Filing: STERLING FINANCIAL CORP /WA/ - Form 10-Q

Sterling is subject to many laws and regulations applicable to banking activities. As a thrift holding company, Sterling is subject to comprehensive examination and regulation by the OTS. Sterling Savings Bank, as a Washington State-chartered savings association, is subject to comprehensive regulation and examination by the Washington Supervisor as its chartering authority, the OTS as its primary federal regulator, and by the FDIC, which administers the Savings Association Insurance Fund, which insures Sterling Savings Bank's deposits to the maximum extent permitted by law. Sterling Savings Bank is a member of FHLB Seattle, which is one of the twelve regional banks which comprise the FHLB System. Sterling Savings Bank is further subject to regulations of the

Board of Governors of the Federal Reserve System governing reserves required to be maintained against deposits and certain other matters.

Forward-Looking Statements

From time to time, Sterling and its senior managers have made and will make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may be contained in this report and in other documents that Sterling files with the Securities and Exchange Commission. Such statements may also be made by Sterling and its senior managers in oral or written presentations to analysts, investors, the media and others. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. Also, forward-looking statements can generally be identified by words such as may, could, should, would, believe, anticipate, estimate, seek, expect, intend, plan and similar expressions.

Forward-looking statements provide our expectations or predictions of future conditions, events or results. They are not guarantees of future performance. By their nature, forward-looking statements are subject to risks and uncertainties. These statements speak only as of the date they are made. We do not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements were made. There are a number of factors, many of which are beyond our control, that could cause actual conditions, events or results to differ significantly from those described in the forward-looking statements. These factors, some of which are discussed elsewhere in this report, include:

the strength of the United States economy in general and the strength of the local economies in which Sterling conducts its operations;

the effects of inflation, interest rate levels and market and monetary fluctuations;

trade, monetary and fiscal policies and laws, including interest rate policies of the federal government;

applicable laws and regulations and legislative or regulatory changes;

the timely development and acceptance of new products and services of Sterling;

the willingness of customers to substitute competitors' products and services for Sterling's products and services;

Sterling's success in gaining regulatory approvals, when required;

technological and management changes;

growth and acquisition strategies;

lower-than-expected revenue or cost savings or other issues in connection with mergers and acquisitions;

changes in consumer spending and saving habits; and

Sterling's success at managing the risks involved in the foregoing.

Item 3 - Quantitative and Qualitative Disclosures About Market Risk

For a discussion of Sterling's market risks, see Management's Discussion and Analysis - Asset and Liability Management.

Item 4 - Controls and Procedures

Disclosure Controls and Procedures

Sterling's management, with the participation of Sterling's principal executive officer and principal financial officer, has evaluated the effectiveness of Sterling's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on such evaluation, Sterling's principal executive officer and principal financial officer have concluded that, as of the end of such period, Sterling's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by Sterling in the reports that it files or submits under the Exchange Act.

Changes in Internal Control Over Financial Reporting

There were no changes in Sterling's internal control over financial reporting that occurred during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, Sterling's internal control over financial reporting.

PART II - Other Information

Item 1 - Legal Proceedings

Periodically various claims and lawsuits are brought against Sterling and its subsidiaries, such as claims to enforce liens, condemnation proceedings involving properties on which Sterling holds security interests, claims involving the making and servicing of real property loans and other issues incidental to Sterling's business. No material loss is expected from any of such pending claims or lawsuits.

Item 2 - Changes in Securities and Use of Proceeds

Not applicable.

Item 3 - Defaults Upon Senior Securities

Not applicable.

Item 4 - Submission of Matters to a Vote of Security Holders

Not applicable.

Item 5 - Other Information

Not applicable.

Item 6 - Exhibits and Reports on Form 8-K

(a)	Exhibit No.	Exhibit
	3.1	Restated Articles of Incorporation of Sterling. Filed as Exhibit 3.1 to Sterling's report on Form 10-Q dated May 15, 2003 and incorporated by reference herein.
	3.2	Amended and Restated Bylaws of Sterling. Filed as Exhibit 3.3 to Sterling's Registration Statement on Form S-4 dated December 9, 2002 and incorporated by reference herein.
	4.1	Reference is made to Exhibits 3.1 and 3.2.
	4.2	Sterling has outstanding certain long-term debt. None of such debt exceeds ten percent of Sterling's total assets; therefore, copies of the constituent instruments defining the rights of the holders of such debt are not included as exhibits. Copies of instruments with respect to such long-term debt will be furnished to the Securities and Exchange Commission upon request.
	31.1	Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. Filed herewith.
	31.2	Certification of Principal Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. Filed herewith.
	32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. Filed herewith.
	32.2	Certification of Principal Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. Filed herewith.

(b) Reports on Form 8-K. During the quarter ended March 31, 2004, there were four reports filed on Form 8-K.

On January 2, 2004, Sterling filed a report on Form 8-K containing a press release dated January 2, 2004 announcing the completion of the merger between Sterling and Klamath First Bancorp, Inc.

On January 16, 2004, Sterling filed a report on Form 8-K containing Pro Forma Financial information and other information regarding the merger between Sterling and Klamath.

On January 27, 2004, Sterling filed a report on Form 8-K containing a press release announcing results of operations for the fourth quarter of 2003.

On January 28, 2004, Sterling filed a report on Form 8-K containing a press release announcing the appointment of two directors to Sterling's board of directors, the appointment of two directors to the board of directors of Sterling's subsidiary, Sterling Savings Bank and the resignation of two directors from the Sterling board.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
