## R&D News

Serono reports today the positive outcome of the combination phase of a study evaluating the effect of interferon-beta-1a with ribavirin for the treatment of chronic hepatitis C (HCV) in Asian patients. On January 9, 2006, Serono announced the successful completion of a pivotal Phase III double-blind, placebo-controlled trial of its recombinant human growth hormone (r-hGH) in the treatment of HIV-associated Adipose Redistribution Syndrome (HARS). This trial met all pre-specified primary and major secondary endpoints. Serono plans to submit the file to the FDA in the first half of 2006 and expects that the data will be presented at upcoming scientific meetings.

On January 10, 2006, encouraging preliminary results from a Phase 1b clinical trial of TACI-Ig in rheumatoid arthritis were announced. TACI-Ig appeared to be safe and well tolerated, and clear biologic and clinical responses which appear to correlate with clinical benefit were observed. Full details from this study will be presented at a medical meeting later in the year. In addition, a Phase 1b trial of TACI-Ig in systemic lupus erythematosus is expected to finish mid-2006, and further updates related to TACI-Ig as a potential treatment for B-cell malignancies are anticipated during the second half of 2006.

Basic Earnings per Share are calculated in accordance with IAS 33 - Earnings per Share by dividing the Net Income attributable to equity holders of Sero S.A., (\$100.6 million) for the three months ended December 31, 2005 (2004: \$58.6 million), by the weighted average number of shares outstanding during the period presented. This is 10,180,929 bearer shares (2004: 10,307,628) and 11,013,040 registered shares (2004: 11,013,040). The total weighted average number of bearer shares is 14,586,145 (2004: 14,712,844) for the three months ended December 31, 2005. As each American depositary share represents ownership interest in one fortieth of bearer share, Basic and Diluted Earnings per American depositary share is calculated as one fortieth of the Basic and Diluted Earnings per bearer share.

## Edgar Filing: SERONO S A - Form 6-K

For Diluted Earnings per Share, the weighted average number of bearer shares outstanding is adjusted to assume conversion of all potential dilutive shares arising from outstanding stock options and the convertible bond. Diluted Earnings per Share for the three months ended December 31, 2005 includes the dilutive impact of outstanding stock options that were in the money as well as the conversion of the convertible bond that would result in the issuance of an additional 423,996 bearer shares. The number of bearer shares used to calculate the Diluted Earnings per Share for the three months ended December 31, 2005 was 10,656,766 (2004: 10,327,183).

As each American depositary share represents ownership interest in one fortieth of bearer share, Basic and Diluted (Loss) / Earnings per American depositary share is calculated as one fortieth of the Basic and Diluted (Loss) / Earnings per bearer share.

## Edgar Filing: SERONO S A - Form 6-K

For Diluted (Loss) / Earnings per Share, the weighted average number of bearer shares outstanding is adjusted to assume conversion of all potential dilutive shares arising from outstanding stock options and the convertible bond. The effect of outstanding stock options and the convertible bond are excluded from the calculation of Diluted Loss per Share for the twelve months ended December 31, 2005 as they were anti-dilutive. The number of bearer shares used to calculate the Diluted Earnings per Share for the twelve months ended December 31, 2004 was 10,896,729.

Adjusted net income and adjusted earnings per share are Non-IFRS financial measures and are not and should not be viewed as a substitute for IFRS reported net income and earnings per share. Non-IFRS financial measures are not standardized by IFRS and, therefore, have limits in its usefulness to investors and may not be comparable with the calculation of similar measures for other companies. Adjusted net income and adjusted earnings per share are an alternative view of performance used by management as they exclude those non-recurring, non-operational activities and transactions that are not necessarily relevant to understand the company's operating performance of the company's underlying business for the period.
