Overstock.com, Inc.
Notes to Unaudited Consolidated Financial Statements

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared by Overstock.com, Inc. (the Company) pursuant to the rules and regulations of the Securities and Exchange Commission regarding interim financial reporting. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements and should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the audited annual consolidated financial statements and related notes thereto included in the Annual Report on Form 10-K for the year ended December 31, 2005. The accompanying unaudited consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, which are, in the opinion of management, necessary for a fair statement of results for the interim periods presented. Preparing financial statements requires management to make estimates and assumptions that affect the amounts that are reported in the consolidated financial statements and accompanying disclosures. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may be different from the estimates. The results of operations for the three and nine months ended September 30, 2006 are not necessarily indicative of the results to be expected for any future period or the full fiscal year.

2. ACCOUNTING POLICIES

Principles of consolidation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. The consolidated financial statements also include the accounts of a variable interest entity for which the Company is the primary beneficiary (see Note 13). All significant intercompany account balances and transactions have been eliminated in consolidation.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Internal-Use Software and Website Development

Included in fixed assets is the capitalized cost of internal-use software and website development, including software used to upgrade and enhance websites and processes supporting the business of the Company. As required by Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, the Company capitalizes costs incurred during the application development stage of internal-use software and amortize these costs over the estimated useful life of three years. Costs incurred related to design or maintenance of internal-use software are expensed as incurred.

During the third quarters of 2005 and 2006, the Company capitalized \$11.4 million and \$7.3 million, respectively, of costs associated with internal-use software and website development, which are partially offset by amortization of previously capitalized amounts of \$1.1 million and \$3.6 million for those respective periods. During the nine months ended September 30, 2005 and 2006, the Company capitalized \$25.4 million and \$19.3 million, respectively, of costs associated with internal-use software and website development, which are partially offset by amortization of previously capitalized amounts of \$1.6 million and \$9.9 million for those respective periods.

Advertising expense

The Company recognizes advertising expenses in accordance with SOP 93-7 *Reporting on Advertising Costs*. As such, the Company expenses the costs of producing advertisements at the time production occurs or the first time the advertising takes place, and expenses the cost of communicating advertising in the period during which the advertising space or airtime is used. Internet advertising expenses are recognized as incurred based on the terms of the individual agreements, which are generally: 1) during the period customers are acquired; or 2) based on the number of clicks generated during a given period over the term of the contract. Advertising expense included in sales and marketing expenses totaled \$17.2 million and \$17.1 million during the three months ended September 30, 2005 and 2006, respectively. For the nine months ended September 30, 2005 and 2006, advertising expense totaled \$47.7 million and \$41.1 million, respectively.

Stock-based Compensation

As of January 1, 2006, we adopted SFAS 123(R) *Share-based Payment - an Amendment of FASB Statements No 123 and 95*, which requires the Company to measure compensation expense for all outstanding unvested share-based awards at fair value and

recognize compensation expense over the service period for awards expected to vest. The estimation of stock awards that will ultimately vest requires judgment, and to the extent actual results differ from estimates, such amounts will be recorded as an adjustment in the period estimates are revised. Management considers many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results may differ substantially from these estimates (see Note 7).

Recent accounting pronouncements

In March 2006, the Emerging Issue Task Force reached a consensus on Issue No. 06-03 How Taxes Collected from Customers and Remitted to Government Authorities Should be Presented in the Income Statement (That Is, Gross versus Net Presentation) (EITF No. 06-03). The Company is required to adopt the provisions of EITF No. 06-03 beginning its fiscal year 2007. The Company does not expect the provisions of EITF No. 06-03 to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109, (FIN 48). FIN 48 prescribes a comprehensive model for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that it has taken or expects to take on a tax return. FIN 48 is effective for the Company on January 1, 2007. Management is currently evaluating the impact of this interpretation and does not expect the adoption of FIN 48 to have a material impact on the Company's consolidated financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 was issued to provide interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The provisions of SAB 108 are effective for the Company for its December 31, 2006 year-end. Management does not expect the adoption of SAB 108 to have a material impact on the Company's consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of this standard apply to other accounting pronouncements that require or permit fair value measurements. SFAS 157 becomes effective for the Company on January 1, 2008. Upon adoption, the provisions of SFAS 157 are to be applied prospectively with limited exceptions. Management does not expect the adoption of SFAS 157 to have a material impact on the Company's consolidated financial statements.

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation. The effect of these reclassifications had no impact on net income, total assets, total liabilities, or stockholders' equity.

3. MARKETABLE SECURITIES

During the first quarter of 2005, the Company purchased \$49.9 million of Foreign Corporate Securities (Foreign Notes) which were scheduled to mature in November 2006. The Foreign Notes did not have a stated interest rate, but were structured to return the entire principal amount and a conditional coupon if held to maturity. The conditional coupon would provide a rate of return dependent on the performance of a basket of eight Asian currencies against the U.S. dollar. If the Company redeemed the Foreign Notes prior to maturity, the Company would not realize the full amount of its initial investment.

Under SFAS No. 133, the Foreign Notes are considered to be derivative financial instruments and were marked-to-market quarterly. Any unrealized gain or loss related to the changes in value of the conditional coupon was recorded in the income statement as a component of interest income or expense. Any unrealized gain or loss related to the changes in the value of the Foreign Notes is recorded as a component of accumulated other comprehensive income (loss).

The Company purchased the Foreign Notes to manage its foreign currency risks related to the strengthening of Asian currencies compared to the U.S. dollar, which would reduce the inventory purchasing power of the Company in Asia. However, the Company determined that the Foreign Notes did not qualify as hedging derivative instruments. Nevertheless, management believes that such instruments are useful in managing the Company's associated risk.

On April 26, 2006, the Company sold the Foreign Notes for \$49.5 million resulting in a gain on the bond instrument of \$1.9 million, which the Company recognized in the second quarter of 2006 as a component of interest income. The Company had previously recorded \$2.4 million of

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

accumulated unrealized losses as a component of interest income over the period the bonds had been held.

The Company had pledged its Foreign Notes as collateral for a \$30.0 million revolving line of credit (see Note 9). Subsequent to the sale of the Foreign Notes, the borrowings under the Amended Credit Agreement (see Note 9) are now collateralized by cash balances held at Wells Fargo Bank, National Association.

4. OTHER COMPREHENSIVE LOSS

The Company follows SFAS No. 130, *Reporting Comprehensive Income*. This Statement establishes requirements for reporting comprehensive income and its components. The Company's comprehensive loss is as follows (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2005	2006	2005	2006
Net loss	\$ (12,402)	\$ (24,502)	\$ (18,635)	\$ (56,151)
Net unrealized gain (loss) on marketable securities	312		(169)	
Unrealized gain on Foreign Notes	660		660	740
Reclassification adjustment for gains included in net loss				(1,868)
Foreign currency translation adjustment	137	40	111	11
Comprehensive loss	\$ (11,293)	\$ (24,462)	\$ (18,033)	\$ (57,268)

5. EARNINGS (LOSS) PER SHARE

In accordance with SFAS 128 Earnings per share, basic earnings (loss) per share is computed by dividing net income (loss) attributable to common shares by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is computed by dividing net income (loss) attributable to common shares for the period by the weighted average number of common and potential common shares outstanding during the period. Potential common shares, composed of incremental common shares issuable upon the exercise of stock options, warrants and convertible senior notes, are included in the calculation of diluted net loss per share to the extent such shares are dilutive. The following table sets forth the computation of basic and diluted earnings (loss) per share for the periods indicated (in thousands, except per share amounts):

	Three months ended		Nine months ended	
	September 30, 2005	2006	September 30, 2005	2006
Net loss attributable to common shares	\$ (12,449)	\$ (24,535)	\$ (18,775)	\$ (56,250)
Weighted average common shares outstanding basic	18,844	20,600	19,468	20,052
Effective of dilutive securities:				
Employee stock options and warrants				
Convertible senior notes				
Weighted average common shares outstanding diluted	18,844	20,600	19,468	20,052
Earnings (loss) per common share basic:	\$ (0.66)	\$ (1.19)	\$ (0.96)	\$ (2.81)
Earnings (loss) per common share diluted:	\$ (0.66)	\$ (1.19)	\$ (0.96)	\$ (2.81)

The stock options, warrants and convertible senior notes outstanding were not included in the computation of diluted earnings per share because to do so would have been antidilutive. The number of shares of stock options outstanding at September 30, 2005 and 2006 was 1,342,000 shares and 1,093,000 shares, respectively. No warrants were outstanding at September 30, 2005 and 2006. As of September 30, 2006, the Company had \$77.0 million of convertible senior notes outstanding, which could potentially convert into 1,010,000 shares of common stock in the aggregate.

6. BUSINESS SEGMENTS

Segment information has been prepared in accordance with SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. Segments were determined based on products and services provided by each segment. There were no inter-segment sales or transfers during the three or nine months ended September 30, 2005 or 2006. The Company evaluates the performance of its segments and allocates resources to them based primarily on gross profit. The table below summarizes information about reportable segments for the three and nine months ended September 30, 2005 and 2006 (in thousands):

	Three months ended September 30,			Nine months ended September 30,		
	Direct	Fulfillment partner	Consolidated	Direct	Fulfillment partner	Consolidated
2005						
Revenue	\$ 68,449	\$ 100,874	\$ 169,323	\$ 196,397	\$ 289,445	\$ 485,842

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

Other income (expense), net	(643)	(656)
Net loss	\$ (24,502)	\$ (56,151)

The direct segment includes revenues, direct costs, and allocations associated with sales fulfilled from our warehouses. Costs

8

for this segment include product costs, inbound and outbound freight, warehousing and fulfillment costs, credit card fees and customer service costs.

The fulfillment partner segment includes revenues, direct costs and cost allocations associated with the Company's third party fulfillment partner sales and are earned from selling the merchandise of third parties over the Company's Websites. The costs for this segment include product costs, warehousing and fulfillment costs, credit card fees and customer service costs.

Assets have not been allocated between the segments for management purposes, and as such, they are not presented here.

For the three and nine months ended September 30, 2005 and 2006, over 99% of sales were made to customers in the United States of America. No individual geographical area within the U.S accounted for more than 10% of net sales in any of the periods presented. At December 31, 2005 and September 30, 2006, all of the Company's fixed assets were located in the United States of America.

7. STOCK-BASED COMPENSATION

Periods prior to the adoption of SFAS 123(R)

Prior to January 1, 2006, the Company accounted for stock-based awards under the intrinsic value method, which followed the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employee*, and related interpretations. The intrinsic value method of accounting resulted in compensation expense for stock options to the extent option exercise prices were set below market prices on the date of grant. Also, to the extent stock awards were forfeited prior to vesting, any previously recognized expense was reversed as an offset to operating expenses in the period of forfeiture.

The following table illustrates the effects on net loss and net loss per share as if the Company had applied the fair value recognition provisions of SFAS 123, *Accounting for Stock Based Compensation*, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure* to options granted under the Company's stock-based compensation plans prior to the adoption. For purposes of this pro forma disclosure, the value of the options was estimated using the Black-Scholes-Merton (BSM) option-pricing formula and amortized on a straight-line basis over the respective vesting periods of the awards. Disclosures for the three and nine months ended September 30, 2006 are not presented because stock-based payments were accounted for under SFAS 123(R)'s fair value method during this period.

	Three months ended September 30, 2005	Nine months ended September 30, 2005
Net loss, as reported	\$ (12,402)	\$ (18,635)
Add: Stock-based employee compensation, as reported	(8)	65
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(1,033)	(2,948)
Pro forma net loss - SFAS 123 fair value adjusted	\$ (13,443)	\$ (21,518)
Net loss per common share		
Basic and diluted - as reported	\$ (0.66)	\$ (0.96)
Basic and diluted - pro forma	\$ (0.72)	\$ (1.11)

Adoption of SFAS 123(R)

As of January 1, 2006, the Company adopted SFAS No. 123(R) using the modified prospective method, which requires measurement of compensation cost for all stock-based awards at fair value on date of grant and recognition of compensation over the service period for awards expected to vest. The fair value of stock options is determined using the BSM valuation model, which is consistent with our valuation techniques previously utilized for options in footnote disclosures required under SFAS No. 123. Such value is recognized as expense over the service period, net of estimated forfeitures, using the straight-line method under SFAS 123(R).

The adoption of SFAS 123(R) did not result in a cumulative benefit from accounting change, which reflects the net cumulative impact of estimating future forfeitures in the determination of period expense, rather than recording forfeitures when they occur as previously permitted, as

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

we did not have unvested employee stock awards for which compensation expense was recognized prior to adoption of SFAS No. 123(R).

Prior to the adoption of SFAS 123(R), cash retained as a result of tax deductions relating to stock-based compensation was presented in operating cash flows, along with other tax cash flows, in accordance with the provisions of the Emerging Issues Task Force (EITF) Issue No. 00-15, *Classification in the Statement of Cash Flows of the Income Tax Benefit Received by a Company upon Exercise of a Nonqualified Employee Stock Option*. SFAS 123(R) supersedes EITF 00-15, amends SFAS 95, *Statement of Cash*

Flows, and requires tax benefits relating to excess stock-based compensation deductions to be prospectively presented in the statement of cash flows as financing cash inflows. As of the adoption of SFAS 123(R), we had fully reserved against any tax benefits resulting from stock-based compensation deductions in excess of amounts reported for financial reporting purposes.

On March 29, 2005, the SEC published Staff Accounting Bulletin (SAB) No. 107, which provides the Staff's views on a variety of matters relating to stock-based payments. SAB 107 requires stock-based compensation be classified in the same expense line items as cash compensation. The Company has reclassified stock-based compensation from prior periods to correspond to current period presentation within the same operating expense line items as cash compensation paid to employees.

The application of SFAS 123(R) had the following effect on the three and nine months ended September 30, 2006 reported amounts relative to amounts that would have been reported using the intrinsic value method under previous accounting (in thousands, except per share amounts):

SFAS 123(R) Adjustments	Three months ended September 30, 2006	Nine months ended September 30, 2006
Operating loss	\$ (1,119)	\$ (3,088)
Net loss	\$ (1,119)	\$ (3,088)
Net loss per common share – basic and diluted	\$ (0.05)	\$ (0.15)

Valuation Assumptions for Stock Options

During the third quarter of 2006, 8,500 options were granted to employees with an estimated total grant-date fair value of \$75,000. Of this amount, the Company estimated that the stock-based compensation for the awards not expected to vest was \$20,000. During the three and nine months ended September 30, 2006, the Company recorded stock-based compensation related to stock options of \$1.1 million and \$3.0 million, respectively.

The fair value for each stock option granted during the three months ended September 30, 2005 and 2006 was estimated at the date of grant using the BSM option-pricing model, assuming no dividends and the following assumptions.

	Three months ended September 30,	
	2005	2006
Average risk-free interest rate	4.03 %	4.60 %
Average expected life (in years)	4.0	3.5
Volatility	76.4 %	65.6 %

Expected Volatility: The fair value of stock based payments were valued using a volatility factor based on the Company's historical stock prices.

Expected Term: The Company's expected term represents the period that the Company's stock-based awards are expected to be outstanding and was determined based on historical experience of similar awards, giving consideration to the contractual terms and vesting provisions of the stock-based awards.

Expected Dividend: The Company has not paid any dividends and does not anticipate paying dividends in the foreseeable future.

Risk-Free Interest Rate: The Company bases the risk-free interest rate used on the implied yield currently available on U.S. Treasury zero-coupon issues with remaining term equivalent to the expected term of the options.

Estimated Pre-vesting Forfeitures: When estimating forfeitures, the Company considers voluntary and involuntary termination behavior.

Stock Option Activity

The Company's board of directors adopted the Amended and Restated 1999 Stock Option Plan, the 2002 Stock Option Plan and the 2005 Equity Incentive Plan (collectively, the Plans), in May 1999, April 2002, and April 2005 respectively. Under these Plans, the Board of Directors may issue incentive stock options to employees and directors of the Company and non-qualified stock options to consultants of the Company. Options granted under these Plans generally expire at the end of five years and vest in accordance with a vesting schedule determined by the Company's Board of Directors, usually over four years from the grant date. As of the initial public offering, the Amended and Restated 1999 Stock Option Plan was terminated, and as of April 2005 the 2002 Stock Option Plan was terminated (except with regard to outstanding options). Future shares will be granted under the 2005 Equity Incentive Plan. As of September 30, 2006, 1,068,001 shares are available for future grants under the 2005 Equity Incentive Plan. The Company settles stock option exercises with newly issued common shares.

The following is a summary of stock option activity (in thousands, except per share data):

	Shares	Weighted Average Exercise Price
Outstanding January 1, 2006	1,299	\$ 18.09
Granted	172	22.86
Exercised	(238)	9.68
Forfeited	(140)	28.33
Outstanding September 30, 2006	1,093	19.36
Options exercisable September 30, 2006	685	\$ 15.35

The following table summarizes information about stock options as of September 30, 2006 (in thousands, except per share data):

Options Outstanding					Options Exercisable			
		Weighted Average Exercise Price	Weighted Average Remaining Contract Life	Aggregate Intrinsic Value		Weighted Average Exercise Price	Weighted Average Remaining Contract Life	Aggregate Intrinsic Value
Range of Exercise Prices	Shares				Shares			
\$2.00-\$4.99	61	\$ 4.69	0.96	\$ 850	60	\$ 4.69	0.95	\$ 832
\$5.00-\$6.99	182	5.07	0.33	2,450	182	5.07	0.33	2,450
\$7.00-\$11.99	66	10.65	0.94	519	60	10.86	0.88	460
\$12.00-\$17.99	205	13.47	1.90	1,042	146	13.35	1.73	760
\$18.00-\$58.30	579	28.47	3.27	0	237	28.29	2.66	0
	1,093	19.36	2.25	4,861	685	15.35	1.54	4,502

Total compensation costs related to nonvested awards was approximately \$7.2 million as of September 30, 2006. These nonvested awards are expected to be exercised over the weighted average period of 3.45 years.

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, based on the Company's average stock price of \$18.55 during the quarter ended September 30, 2006, which would have been received by the option holders had all option holders exercised their options as of that date. The total number of in-the-money options exercisable as of September 30, 2006 was 448,000.

The weighted average exercise price of options granted during the three months ended September 30, 2006 was \$17.42 per share. The total fair value of the shares vested during the three months ended September 30, 2006 was \$696,000. The total intrinsic value of options exercised during the three month period ended September 30, 2006 was \$534,000. The total cash received from employees as a result of employee stock option exercises during the three months ended September 30, 2006 was approximately \$806,000. In connection with these exercises, there was no tax benefit realized by the Company due to the Company's current loss position.

8. PERFORMANCE SHARE PLAN

In January 2006, the Board and Compensation Committee adopted the Overstock.com Performance Share Plan, and approved grants to executive officers and certain employees of the Company. The Performance Share Plan provides for a three-year period for the measurement of the Company's attainment of the performance goal described in the form of grant, but at the Company's sole option the Company may make a payment of estimated amounts payable to a plan participant after two years.

The performance goal is measured by growth in economic value, as defined in the plan. The amount of payments due to participants under the plan will be a function of the then current market price of a share of the Company's common stock, multiplied by a percentage dependent on the extent to which the performance goal has been attained, which will be between 0% and 200%. If the growth in economic value is 10% compounded annually or less, the percentage will be 0%. If the growth in economic value is 25% compounded annually, the percentage will be 100%. If the growth in economic value is 40% compounded annually or more, the percentage will be 200%. If the percentage growth is between these percentages, the payment percentage will be determined on the basis of straight line interpolation. Amounts payable under the plan will be

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

payable in cash. During interim and annual periods prior to the completion of the three-year measurement period, the Company records compensation expense based upon the period-end stock price and estimates regarding the ultimate growth in economic value that is expected to occur. These estimates include assumed future growth rates in revenues, gross margins and other factors. If the Company were to use different assumptions, the estimated compensation charges could be significantly different.

Approximately \$100,000 related to a reversal of compensation expense under the plan has been included as a reduction in general and administrative expenses for the quarter ended September 30, 2006, resulting in a total of \$800,000 of performance share plan compensation expense for the nine months then ended. As of September 30, 2006, the Company has accrued \$800,000 in total

compensation expense under the plan.

9. BORROWINGS

\$30.0 million Amended Credit Agreement

On October 18, 2005, the Company entered into a sixth amendment to a credit agreement (*Amended Credit Agreement*) with Wells Fargo Bank, National Association. The Amended Credit Agreement provides a revolving line of credit to the Company of up to \$30.0 million which the Company uses primarily to obtain letters of credit to support inventory purchases. The Amended Credit Agreement expires on December 31, 2007, however, the Company has an option to renew the Amended Credit Agreement annually. Interest on borrowings is payable monthly and accrued at either (i) 1.35% above LIBOR in effect on the first day of an applicable fixed rate term, or (ii) at a fluctuating rate per annum determined by the bank to be one half a percent (0.50%) above daily LIBOR in effect on each business day a change in daily LIBOR is announced by the bank. Unpaid principal, together with accrued and unpaid interest is due on the maturity date. The Amended Credit Agreement requires the Company to comply with certain covenants, including restrictions on mergers, business combinations or transfer of assets. The Company was in compliance with these covenants at September 30, 2006.

At September 30, 2006, borrowings and outstanding letters of credit under the Amended Credit Agreement are collateralized by cash balances held at Wells Fargo Bank, National Association.

At September 30, 2006, no amounts were outstanding under the Amended Credit Agreement, and Letters of Credit totaling \$9.5 million were issued on behalf of the Company.

\$40.0 million WFRF Agreement

On December 12, 2005, the Company entered into a Loan and Security Agreement (the *WFRF Agreement*) with Wells Fargo Retail Finance, LLC and related security agreements and other agreements described in the WFRF Agreement.

The WFRF Agreement provides for advances to the Company and for the issuance of letters of credit for its account of up to an aggregate maximum of \$40.0 million. The Company has the right to increase the aggregate maximum amount available under the facility to up to \$50.0 million during the first two years of the facility. The amount actually available to the Company may be less and may vary from time to time, depending on, among other factors, the amount of its eligible inventory and receivables. The Company's obligations under the WFRF Agreement and all related agreements are collateralized by all or substantially all of the Company's and its subsidiaries' assets. The Company's obligations under the WFRF Agreement are cross-collateralized with its assets pledged under its \$30.0 million credit facility with Wells Fargo Bank, National Association. The term of the WFRF Agreement is three years, expiring on December 12, 2008. The WFRF Agreement contains standard default provisions.

Advances under the WFRF Agreement bear interest at either (a) the rate announced, from time to time, within Wells Fargo Bank, National Association at its principal office in San Francisco as its prime rate or (b) a rate based on LIBOR plus a varying percentage between 1.25% and 1.75%; however, the annual interest rate on advances under the WFRF Agreement will be at least 3.50%. The WFRF Agreement includes affirmative covenants as well as negative covenants that prohibit a variety of actions without the lender's approval, including covenants that limit the Company's ability to (a) incur or guarantee debt, (b) create liens, (c) enter into any merger, recapitalization or similar transaction or purchase all or substantially all of the assets or stock of another person, (d) sell assets, (e) change its name or the name of any of its subsidiaries, (f) make certain changes to its business, (g) optionally prepay, acquire or refinance indebtedness, (h) consign inventory, (i) pay dividends on, or purchase, acquire or redeem shares of, its capital stock, (j) change its method of accounting, (k) make investments, (l) enter into transactions with affiliates, or (m) store any of its inventory or equipment with third parties. The Company was in compliance with these covenants as of September 30, 2006. At September 30, 2006, no amounts were outstanding under the WFRF Agreement.

Capital leases

The Company leases certain software and computer equipment under three non-cancelable capital leases that expire at various dates through 2008. Software and equipment relating to the capital leases totaled \$15.4 million and \$19.8 million at December 31, 2005 and September 30, 2006, respectively, with accumulated amortization of \$10.1 million and \$10.5 million at those respective dates. Depreciation of assets recorded under capital leases was \$1.5 and \$1.8 million for the three months ended September 30, 2005 and 2006, respectively and \$2.5 million and \$5.1 million for the nine months ended September 30, 2005 and 2006, respectively.

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

Future minimum lease payments under capital leases are as follows (in thousands):

Twelve months ending September 30,	
2007	\$ 6,186
2008	3,960
2009	
Total minimum lease payments	10,146
Less: amount representing interest	(905)
Present value of capital lease obligations	9,241
Less: current portion	(5,361)
Capital lease obligations, non-current	\$ 3,880

12

10. 3.75% CONVERTIBLE SENIOR NOTES

In November 2004, the Company completed an offering of \$120.0 million of 3.75% Convertible Senior Notes (the "Senior Notes"). Proceeds to the Company were \$116.2 million, net of \$3.8 million of initial purchaser's discount and debt issuance costs. The discount and debt issuance costs are being amortized using the straight-line method which approximates the interest method. During the three months ended September 30, 2005 and 2006, the Company recorded amortization of discount and debt issuance costs related to this offering totaling \$179,000 and \$139,000. Amortization of discount and debt issuance costs for the nine months ended September 30, 2005 and 2006 totaled \$602,000 and \$417,000, respectively. Interest on the Senior Notes is payable semi-annually on June 1 and December 1 of each year. The Senior Notes mature on December 1, 2011 and are unsecured and rank equally in right of payment with all existing and future unsecured, unsubordinated debt and senior in right of payment to any existing and future subordinated indebtedness.

The Senior Notes are convertible at any time prior to maturity into the Company's common stock at the option of the note holders at a conversion price of \$76.23 per share or, approximately 1,010,000 shares in aggregate (subject to adjustment in certain events, including stock splits, dividends and other distributions and certain repurchases of the Company's stock, as well as certain fundamental changes in the ownership of the Company). Beginning December 1, 2009, the Company has the right to redeem the Senior Notes, in whole or in part, for cash at 100% of the principal amount plus accrued and unpaid interest. Upon the occurrence of a fundamental change (including the acquisition of a majority interest in the Company, certain changes in the Company's board of directors or the termination of trading of the Company's stock) meeting certain conditions, holders of the Senior Notes may require the Company to repurchase for cash all or part of their notes at 100% of the principal amount plus accrued and unpaid interest.

The indenture governing the Senior Notes requires the Company to comply with certain affirmative covenants, including making principal and interest payments when due, maintaining our corporate existence and properties, and paying taxes and other claims in a timely manner. The Company was in compliance with these covenants at September 30, 2006.

In June and November 2005, the Company retired \$33.0 million and \$10.0 million of the Senior Notes for \$27.9 million and \$7.8 million in cash for each respective retirement. As a result of the note retirements in June and November, the Company recognized gains of \$4.2 million and \$2.0 million, net of the associated unamortized discount of \$1.2 million during the quarters ended June 30, 2005 and December 31, 2005, respectively. As of September 30, 2006, \$77.0 million of the Senior Notes remained outstanding.

11. COMMITMENTS AND CONTINGENCIES***Commitments***

The Company began leasing approximately 154,000 rentable square feet for a term of ten years beginning July 2005. In February 2005, the Company and Old Mill Corporate Center III, LLC (the "Lessor") entered into a Tenant Improvement Agreement (the "OMIII Agreement") relating to the office building. The OMIII Agreement required the Company to provide either a cash deposit or a letter of credit in the amount of \$500,000 to the Lessor to provide funds for the removal of the improvements upon the termination of the lease. The Company's bank issued a letter of credit for \$500,000 to the Lessor on behalf of the Company.

The Company leases 480,000 square feet for its warehouse facilities in Utah under operating leases which expire in August 2012.

In June 2005, the Company entered into a non-cancelable operating lease for certain computer equipment expiring in April 2008. It is expected that such leases will be renewed by exercising purchase options or replaced by leases of other computer equipment. In June 2006, the Company entered into a non-cancelable operating lease for certain computer equipment expiring in June 2008. It is expected that such leases will be renewed by exercising purchase options or replaced by leases of other computer equipment.

Minimum future payments under these leases are as follows (in thousands):

Twelve months ended September 30,	
2007	\$ 12,057
2008	9,311
2009	8,242
2010	8,302
2011	9,988
Thereafter	29,582

\$ 77,482

13

Rental expense for operating leases totaled \$1.7 million and \$4.3 million for the quarters ended September 30, 2005 and 2006, respectively. For the nine months ended September 30, 2005 and 2006, rental expense totaled \$3.7 and \$7.3 million, respectively.

Redeemable Common Stock

The estimated amount of redeemable common stock is based solely on the statutes of limitations of the various states in which stockholders may have rescission rights and may not reflect the actual results. The stock is not redeemable by its terms. The Company does not have any unconditional purchase obligations, other long-term obligations, guarantees, standby repurchase obligations or other commercial commitments. These rescission rights, if any, fully expired prior to the end of the third quarter, leaving no outstanding redeemable common stock as of September 30, 2006.

Legal Proceedings

From time to time, we receive claims of and become subject to consumer protection, employment, intellectual property and other commercial litigation related to the conduct of our business. Such litigation could be costly and time consuming and could divert our management and key personnel from our business operations. The uncertainty of litigation increases these risks. In connection with such litigation, we may be subject to significant damages or equitable remedies relating to the operation of our business and the sale of products on our websites. Any such litigation may materially harm our business, prospects, results of operations, financial condition or cash flows. However, we do not currently believe that any of our outstanding litigation will have a material adverse effect on our financial statements.

In December 2003, we received a letter from Furnace Brook claiming that certain of our business practices and our website infringe a single patent owned by Furnace Brook. After diligent efforts to show that we do not infringe the patent and Furnace Brook's continual demands that we enter into licensing arrangements with respect to the asserted patent, on August 12, 2005, we filed a complaint in the United States District Court of Utah, Central Division, seeking declaratory judgment that we do not infringe any valid claim of the Furnace Brook patent. Furnace Brook filed a motion to dismiss our complaint for lack of personal jurisdiction over Furnace Brook in Utah. On October 31, 2005, the United States District Court of Utah, Central Division, issued a decision to dismiss our complaint for lack of personal jurisdiction over Furnace Brook. On December 14, 2005, we filed an appeal of the Utah decision with the United States Court of Appeals for the Federal Circuit. On August 18, 2006, the United States Court of Appeals for the Federal Circuit denied the company's appeal. On August 18, 2005, shortly after we filed the complaint in Utah, Furnace Brook filed a complaint in the United States District Court for the Southern District of New York, alleging that certain of our business practices and our website infringe a single patent owned by Furnace Brook. On September 9, 2005, we filed an answer denying the material allegations in Furnace Brook's claims. On September 27, 2006, the United States District Court for the Southern District of New York issued a memorandum and order, Markman Hearing, which substantially adopted the company's interpretation of the Furnace Brook patent. We filed motions for summary judgment relating to the litigation and on October 6, 2006, the United States District Court for the Southern District of New York heard oral argument on those motions and on October 30, 2006, the United States District Court for the Southern District of New York granted summary judgment in favor of us, ruling that we do not infringe the Furnace Brook patent as a matter of law. The court's decision ends all claims by Furnace Brook against us, unless Furnace Brook appeals the decision. If Furnace Brook appeals, we will prosecute the appeal vigorously.

On August 11, 2005, along with a shareholder plaintiff, we filed a complaint against Gradient Analytics, Inc.; Rocker Partners, LP; Rocker Management, LLC; Rocker Offshore Management Company, Inc. and their respective principals. We, along with a second shareholder plaintiff, filed the complaint in the Superior Court of California, County of Marin. On October 12, 2005, we filed an amended complaint against the same entities alleging libel, intentional interference with prospective economic advantage and violations of California's unfair business practices act. On March 7, 2006, the court denied the defendants' demurrers to and motions to strike the amended complaint. The defendants each filed a motion to appeal the court's decision, we responded and the California Attorney General submitted an amicus brief supporting our view; the court has ruled that this appeal stays discovery in the case. The California Court of Appeals informed the parties that it is ready to rule on the appeal without oral argument; the defendants, however, have requested oral argument. We intend to pursue this action vigorously.

On May 9, 2006 the Company received a notice of an investigation and subpoena from the Securities and Exchange Commission, Salt Lake City District Office. The subpoena requests a broad range of documents, including, among other documents, all documents relating to the Company's accounting policies, the Company's targets, projections or estimates related to financial performance, the Company's recent restatement of its financial statements, the filing of its complaint against Gradient Analytics, Inc., the development and implementation of certain new technology systems and disclosures of progress and problems with those systems, communications with and regarding investment analysts, communications regarding shareholders who did not receive the Company's proxy statement in April 2006, communications with certain shareholders, and communications regarding short selling, naked short selling, purchases and sales of Company stock, obtaining paper certificates, and stock loan or borrow of Company shares. The Company has responded to the subpoena.

12. INDEMNIFICATIONS AND GUARANTEES

During its normal course of business, the Company has made certain indemnities, commitments, and guarantees under which it may be required to make payments in relation to certain transactions. These indemnities include, but are not limited to, indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease, and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of the State of Delaware. The duration of these indemnities, commitments, and guarantees varies, and in certain cases, is indefinite. In addition, the majority of these indemnities, commitments, and guarantees do not provide for any limitation of the maximum potential future payments the Company could be obligated to make. As such, the Company is unable to estimate with any reasonableness its potential exposure under these items. The Company has not recorded any liability for these indemnities, commitments, and guarantees in the accompanying consolidated balance sheets. The Company does, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is both probable and reasonably estimable. The Company carries specific and general liability insurance policies that the Company believes would, in most circumstances, provide some, if not total coverage for any claims arising from these indemnifications.

13. VARIABLE INTEREST ENTITY

In August 2004, the Company entered into an agreement which allows the Company to lend up to \$10.0 million to an entity for the purpose of buying diamonds and other jewelry, primarily to supply a new category within our jewelry store which allows customers purchasing diamond rings to select both a specific diamond and ring setting. In November 2004, the Company loaned the entity \$8.4 million. The promissory note bears interest at 3.75% per annum. In addition, the Company receives fifty percent (50%) of any profits of the entity. Interest on the loan is due and payable quarterly on the fifteenth day of February, May, August and November, commencing on November 15, 2004 until the due date of November 30, 2006, on which all principal and interest accrued and unpaid thereon, shall be due and payable. The promissory note is collateralized by all of the assets of the entity.

The Company has a ten year option to purchase (Purchase Option) 50% of the ownership and voting interest of the entity. The exercise price of the Purchase Option is the sum of (a) one thousand dollars, and (b) \$3.0 million, which may be paid, at the Company's election, in cash or by the forgiveness of \$3.0 million of the entity's indebtedness to the Company.

The entity was evaluated in accordance with FASB Interpretation No. 46 Revised, *Consolidation of Variable Interest Entities* an Interpretation of ARB No. 51, and it was determined to be a variable interest entity for which the Company was determined to be the primary beneficiary. As such, the financial statements of the entity are consolidated into the financial statements of the Company.

The carrying amount and classification of the consolidated assets that are collateral for the entity's obligations include (in thousands):

	September 30, 2006
Cash	\$ 67
Accounts receivable	453
Inventory	6,157
Prepaid expenses	11
Property and equipment	186
	\$ 6,874

During the first quarter of 2006, the Company removed the functionality for its customers to design jewelry from its Website, and therefore the entity plans to sell its inventory through other sales channels. During the second quarter of 2006, the Company received \$1.0 million from the entity to pay down a portion of the promissory note.

14. STOCK OFFERINGS

On May 1, 2006, the Company sold approximately 1,042,000 shares of common stock for an aggregate price of \$25.0 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

In addition to historical information, this Quarterly Report on Form 10-Q contains forward-looking statements. These statements relate to our, and in some cases our customers or other third parties', future plans, objectives, expectations, intentions and financial performance and the assumptions that underlie these statements. These forward-looking statements include, but are not limited to, statements regarding the following: our beliefs and expectations regarding the seasonality of our direct and fulfillment partner revenue; our beliefs regarding the sufficiency of our capital resources; planned distribution and order fulfillment capabilities; our beliefs, intentions and expectations regarding improvements of our order processing systems and capabilities; our intentions regarding the development of enhanced technologies and features; our intentions regarding the expansion of our customer service capabilities; our belief and intentions regarding improvements to our general and administrative functions; our beliefs and intentions regarding enhancements to our sales and marketing activities; our beliefs regarding the potential for growth in our customer base;

our beliefs and intentions regarding our expansion into new markets, including international markets; our beliefs and intentions about entering into agreements to provide products and services to retail chains and other businesses; our belief regarding potential development of new Websites; our beliefs, intentions and expectations regarding promotion of new or complimentary product and sales formats; our belief, intentions and expectations regarding the expansion of our product and service offerings; our beliefs and intentions regarding expanding our market presence through relationships with third parties; our beliefs regarding the pursuit of complimentary businesses and technologies; our beliefs regarding the adequacy of our insurance coverage; our beliefs, intentions and expectations regarding litigation matters and legal proceedings, our defenses to such matters and our contesting of such matters; our beliefs and expectations regarding our existing cash and cash equivalents, cash requirements and sufficiency of capital; and our beliefs and expectations regarding interest rate risk, our investment activities and the effect of changes in interest rates.

These forward-looking statements are subject to risks and uncertainties that could cause actual results and events to differ materially. For a detailed discussion of these risks and uncertainties please see Item 1A Risk Factors and the description of risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2005. These forward-looking statements speak only as of the date of this report and, except as required by law, we undertake no obligation to update forward-looking statements to reflect events or circumstances occurring after the date of this report.

Overview

We are an online closeout retailer offering discount brand name merchandise, including bed-and-bath goods, home décor, kitchenware, watches, jewelry, electronics and computers, sporting goods, apparel, designer accessories and travel services, among other products. We also sell books, magazines, CDs, DVDs, videocassettes and video games (BMVG), and we operate as part of our Website an online auction site a marketplace for the buying and selling of goods between our customers.

Our company, based in Salt Lake City, Utah, was founded in 1997, and we launched our first Website through which customers could purchase products in March 1999. Our Websites offer our customers an opportunity to shop for bargains conveniently, while offering our suppliers an alternative inventory liquidation distribution channel. We continually add new, limited inventory products to our Websites in order to create an atmosphere that encourages customers to visit frequently and purchase products before our inventory sells out. We offer approximately 52,000 products under multiple shopping tabs on our main website, plus approximately 607,000 media products on our BMVG tab.

Closeout merchandise is typically available in inconsistent quantities and prices and often is only available to consumers after it has been purchased and resold by disparate liquidation wholesalers. We believe that the traditional liquidation market is therefore characterized by fragmented supply and fragmented demand. We utilize the Internet to aggregate both supply and demand and create a more efficient market for liquidation merchandise. Our objective is to provide a one-stop destination for discount shopping for products and services proven to be successfully sold through the Internet.

Our Business

Overstock utilizes the Internet to create a more efficient market for liquidation merchandise. We provide consumers and businesses with quick and convenient access to high-quality, brand-name merchandise at discount prices. Our shopping business includes both a direct business and a fulfillment partner business. During the three and nine months ended September 30, 2006, no single customer accounted for more than 1% of our total revenue. Products from our direct segment and fulfillment partner segment are available to both consumers and businesses through our Wholesale bulk purchase program.

Direct business

Our direct business includes sales made to individual consumers and businesses, which are fulfilled from our warehouses in Salt Lake City, Utah or our outsourced warehouses located in Plainfield, Indiana. During the three months ended September 30, 2006, we fulfilled approximately 30% of all orders through our warehouses. Our warehouses generally ship between 12,000 and 14,000 orders per day, and up to approximately 34,000 orders per day during peak periods, using overlapping daily shifts.

Fulfillment partner business

For our fulfillment partner business, we sell merchandise of other retailers, cataloguers or manufacturers (fulfillment partners) through our Website. We are considered to be the primary obligor for the majority of these sales transactions, and we assume the risk of loss on the returned items. As a consequence, we record revenue from the majority of these sales transactions involving our fulfillment partners (excluding travel

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

products) on a gross basis. Our use of the term “partner” or “fulfillment partner” does not mean that we have formed any legal partnerships with any of our fulfillment partners. We currently have fulfillment partner relationships with approximately 490 third parties which post approximately 43,000 non-BMVG products, as well as most of the BMVG products and a portion of our current travel offerings, on our Websites.

Our revenue from sales on our shopping site from both the direct and fulfillment partner businesses is recorded net of returns, coupons and other discounts. Our returns policy for products other than those sold in our Electronics and Computers department provides for a \$4.95 restocking fee and the provision that we will accept product returns initiated within thirty days after the shipment date. We charge a 15% restocking fee (instead of the \$4.95 restocking fee) on all items returned for non-defective reasons from the Electronics and Computers department.

Unless otherwise indicated or required by the context, the discussion herein of our financial statements, accounting policies and related matters, pertains to our shopping sites (Shopping and BMVG) and not necessarily to our auction or travel tabs on our Websites.

Wholesale business

In August 2004, we merged our B2B site (www.overstockb2b.com) into our B2C site, and opened a Club O Gold membership program (into which our B2B customers were grandfathered). During 2005, we integrated this program into our Wholesale tab. For this tab, we have added a number of suppliers specific to various industry verticals, such as florist supplies, restaurant supplies, and office supplies.

Travel business

We operate a discount travel department as part of our Website. We use fulfillment partners to supply the travel products and services (flights, hotels, rental cars, etc.). We currently offer air, hotel and car reservation services as well as ski, cruise and vacation packages.

On July 1, 2005, we acquired all the outstanding capital stock of Ski West, Inc. (Ski West), an on-line travel company whose proprietary technology provides easy consumer access to a large, fragmented, hard-to-find inventory of lodging, vacation, cruise and transportation bargains. The travel products are primarily in popular ski areas in the U.S. and Canada, with more recent expansion into the Caribbean and Mexico, as well as cruises. We paid an aggregate of \$25.1 million (including \$111,000 of capitalized acquisition related expenses) for Ski West, and we may be subject to additional earn-out payments (based on a percentage of operating profits for each of the four calendar years beginning with 2006 as follows: 50%, 33.3%, 20%, and 10%, respectively), subject to reduction under certain circumstances, pursuant to a Stock Purchase Agreement dated June 24, 2005, as amended to date, among us, Ski West, and all of the former shareholders of Ski West.

Effective upon the closing, Ski West became our wholly-owned subsidiary, and we integrated the Ski West travel offerings with our existing travel offerings and changed its name to OTravel.com, Inc. OTravel.com generates merchant hotel revenues, which are billed to customers and recognized on a net basis at the time of booking since all transactions are nonrefundable and generally noncancelable and OTravel.com has no significant post-delivery obligations. A reserve for chargebacks and cancellations is recorded at the time of the transaction based on historical experience.

All other revenues are considered agency revenues, and are derived from airline ticket transactions, certain hotel transactions as well as cruise and car rental reservations. Agency revenues are recognized on a net basis on air transactions when the reservation is made and secured by a credit card. A cancellation allowance is recognized on these revenues based on historical experience. OTravel.com recognizes agency revenues on hotel reservations, cruise and car rental reservations, either on an accrual basis for payments from a commission clearinghouse or on receipt of commissions from an individual supplier. Revenue from our travel business is included in the fulfillment partner segment, as it is not significant enough to separate out as its own segment.

Auctions business

We operate an online auction service as part of our Website. Our auction tab allows sellers to list items for sale, buyers to bid on items of interest, and users to browse through listed items online. For these sales we record only our listing fees and commissions for items sold as revenue. From time to time, we also sell items returned from our shopping site on our auction site, and for these sales, we record the revenue on a gross basis. Revenue from our auction business is included in the fulfillment partner segment, as it is not significant enough to segregate as its own segment.

Cost of goods sold

Cost of goods sold consists of the cost of the product, as well as inbound and outbound freight, warehousing and fulfillment costs (including payroll and related expenses), credit card fees, customer service costs and stock-based compensation.

Operating expenses

Sales and marketing expenses consist primarily of advertising, public relations and promotional expenditures, as well as payroll and related expenses for personnel engaged in marketing and selling activities. Advertising expense is the largest component of our sales and marketing expenses and is primarily attributable to expenditures related to online marketing activities and offline national radio and television advertising. For the three months ended September 30, 2005 and 2006, our advertising expenses totaled approximately \$17.2 million and \$17.1 million, respectively, representing 96% for both periods, respectively, of sales and marketing expenses. For the nine months ended September 30, 2005

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

and 2006, our advertising expenses totaled approximately \$47.7 million and \$41.1 million, respectively, representing 97% and 95%, respectively, of sales and marketing expenses for those respective periods.

Technology expenses consist of wages and benefits for technology personnel, rent, utilities, connectivity charges, as well as support and maintenance and depreciation and amortization related to software and computer equipment.

General and administrative expenses consist of wages and benefits for executive, legal, accounting, merchandising and administrative personnel, rent and utilities, travel and entertainment, depreciation and amortization of intangible assets and other general corporate expenses.

We have recorded no provision or benefit for federal and state income taxes as we have incurred net operating losses since inception. We have provided a full valuation allowance on the net deferred tax assets, consisting primarily of net operating loss carryforwards, because of uncertainty regarding their realizability.

Both direct and fulfillment partner revenues are seasonal, with revenues historically being the highest in the fourth quarter, reflecting higher consumer holiday spending. We anticipate this will continue in the foreseeable future.

Executive Commentary

This executive commentary is intended to provide investors with a view of our business through the eyes of our management. As an executive commentary, it necessarily focuses on selected aspects of our business. This executive commentary is intended as a supplement to, but not a substitute for, the more detailed discussion of our business included elsewhere herein. Investors are cautioned to read our entire Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as our interim and audited financial statements, and the discussion of our business and risk factors and other information included elsewhere in this report. This executive commentary includes forward-looking statements, and investors are cautioned to read the Special Note Regarding Forward-Looking Statements included elsewhere in this report.

Commentary Sales growth and conversion rates. Although growth had already slowed significantly over the first six months of this year, for the first time in our history, quarterly revenue decreased compared to the corresponding period of the prior year. In addition, early fourth quarter revenue continued to lag slightly behind last year's revenue. The primary cause was a decrease in website conversion rate defined as the percentage of visitors to the website who make a purchase. The areas of our business that most directly affect conversion rate, including personalization of the website, customer retention, e-mail marketing, site design and layout are the responsibility of our internal marketing department. Within each of these areas, we have identified and made progress on several initiatives that we believe can improve conversion. We have also outsourced to third-party providers certain aspects of the functionality on the website, including the engine that provides product recommendations to customers visiting product pages and the gift center that we expect to go live during the fourth quarter. We believe that it will take until mid-2007 to fully implement these initiatives.

For the first nine months of the year, sales growth decreased more than we had anticipated. While decreased conversion rates particularly affected third quarter sales, we believe the decrease in the first nine months of 2006 was primarily the result of the system issues we experienced while implementing a new ERP system in the third and fourth quarters of 2005. We believe that our infrastructure upgrades in 2005 resulted in an unsatisfactory experience for some of our customers, which in turn affected both repeat and new customer sales in 2006.

Commentary Decrease in direct gross margins in 2006. Gross margins in our direct business have decreased to 10.6% over the first nine months of 2006, down from 14.0% over the same period in 2005. This is primarily the result of lowering prices to our customers in an effort to reduce inventory levels. Over the past year, we have reduced combined inventory and prepaid inventory from \$111 million to \$72 million, a decrease of 35%, while overall direct sales are up slightly over last year. In an effort to reduce the overall SKU (stock keeping unit) count on our website and to refine our product selection to categories that turn faster and have higher profitability, we are reducing our overall inventory levels. We believe that we can run the direct business with less inventory than we have in the past, while filling in product selection using fulfillment partners, rather than acquiring the inventory and committing our own capital. We expect to continue to implement price reductions on inventory in an effort to reduce inventory below \$50 million by the end of the year, and therefore expect to see continued pressure on direct gross margins through the fourth quarter. However, as a result of these efforts, we believe that we should see a significant improvement in direct gross margins beginning in the first quarter of 2007.

Commentary Marketing. Our intent in 2006 was to keep marketing expense as a percent of sales at approximately 7%, and we had accomplished this over the first six months of the year. However, we entered the third quarter with our systems and processes running smoothly, and our customer satisfaction ratings back to where they had been previous to the system issues we experienced at the end of 2005. As a result, we increased both online and offline marketing expenditures in an effort to create sales momentum going into the fourth quarter. However, we did not see a corresponding increase in sales, primarily as a result of the drop in visitor conversion rates.

We believe that our marketing expenditures were also less efficient due to overall increases in online marketing rates, as well as the expiration of marketing agreements we had with several large portals, including MSN, Yahoo and AOL, which are either no longer available or are too expensive to justify. In an effort to offset this, we have internally developed a search engine optimization tool that we believe will help us manage keyword purchases more efficiently. In addition, we increased our television and radio expenditures in the third quarter, and while our overall brand awareness continues to increase, this has not yet translated into additional sales.

As a result, we now intend to direct the majority of our marketing dollars to areas that we believe will directly improve conversion. However, while our goal is to get marketing expense back to the 7 percent of sales range, our contractual obligations will make it difficult for us to accomplish this in the fourth quarter.

Commentary Technology and G&A costs. We have made significant investments in our infrastructure over the past two years, and have built capacity into our systems that we believe will support a billion dollar business. However, as we have pointed out previously, the infrastructure improvements were expensive, and to obtain the full benefits of those improvements, we will need to increase revenues. Although G&A expenses are up over 40%, and technology expenses are more than double what they were in 2005, we now believe that costs in both of these areas are stabilizing.

Commentary Balance sheet items. Our cash balance was \$39 million at the end of the quarter, and we had an additional \$32 million available under our inventory-based credit facility at September 30, 2006. As we plan to reduce inventory to less than \$50 million at the end of the year (versus \$93 million at the end of 2005), we anticipate that it may require less capital to run the current business in 2007. However, whether we will need to raise additional capital will depend on, among other things, our revenues, gross margins, product sales mix, and expenses.

The balance of our Management's Discussion and Analysis of Financial Condition and Results of Operations provides further information about the matters discussed above and other important matters affecting our business.

Critical Accounting Policies and Estimates

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Our critical accounting policies are as follows:

- revenue recognition;
- estimating valuation allowances and accrued liabilities, specifically, the reserve for returns, the allowance for doubtful accounts and the reserve for obsolete and damaged inventory;
- internal use software;
- accounting for income taxes;
- valuation of long-lived and intangible assets and goodwill; and
- stock based compensation and performance share plan.

Revenue recognition. We derive our revenue from four sources: (i) direct revenue, which consists of merchandise sales made to consumers and businesses that are fulfilled from our warehouse; (ii) fulfillment partner revenue, which consists of revenue from the sale of merchandise shipped by fulfillment partners directly to consumers and other businesses, as well as fee revenue collected from the products listed and sold through the auction tab of our Website; and (iii) merchant hotel revenues; and (iv) commission revenue from our auctions and agency travel operations. All sources of revenue are recorded net of returns, coupons redeemed by customers, and other discounts. Revenues from our auction and travel services were not material in the third quarters of 2005 and 2006 and therefore are included in fulfillment partner revenue.

We record revenue from the majority of these sales transactions involving our fulfillment partners (excluding auction and travel products) on a gross basis. Similar to our direct revenue segment, fulfillment partner products are available to both consumers and businesses.

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

For sales transactions, we comply with the provisions of Staff Accounting Bulletin 104 Revenue Recognition , which states that revenue should be recognized when the following revenue recognition criteria are met: (1) persuasive evidence of an arrangement exists; (2) the product has been shipped or the service provided and the customer takes ownership and assumes the risk of loss; (3) the selling price is fixed or determinable; and (4) collection of the resulting receivable is reasonably assured. We generally require payment by credit card at the point of sale. Amounts received prior to when we ship the goods or provide the services to customers are recorded as deferred revenue. In addition, amounts received in advance for gift cards, Club O memberships and marketing royalties related to our co-branded credit card program are recorded as deferred revenue and recognized in the period earned.

Accounting for merchant and agency revenues for our Travel subsidiary. The determination of gross versus net presentation is based principally on the company's consideration of Staff Accounting Bulletin No. 101 Revenue Recognition in Financial Statements and Emerging Issues Task Force Issue No. 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent, including the weighing of the relevant qualitative factors regarding our status as the primary obligor, and the extent of pricing latitude and inventory risk. The method of merchant revenue presentation by us does not impact operating profit, net income, or cash flows, but rather revenues and cost of sales.

The principal factor in determining gross versus net presentation was the consideration of who is the primary obligor in the relationship with the customer. Our Travel business provides extensive customer service and support for its customers; however, the supplier hotel is principally liable to its merchant hotel customers in all situations where the customer does not receive the hotel services booked through OTravel.com. In this case, OTravel.com provides customer service support to help resolve issues, even though such customer support could typically involve issues for which OTravel.com is not principally liable.

OTravel.com generates both merchant hotel revenues and agency air, hotel, car and cruise revenues. Merchant hotel revenues

are recognized as net revenue at the time of booking since all transactions are billed directly to customers, are nonrefundable and generally non-cancelable, and require no significant post-delivery obligations for OTravel.com. A reserve for charge-backs and cancellations is recorded at the time of the transaction based on historical experience.

Agency revenues are derived from airline ticket transactions, certain hotel transactions as well as cruise and car rental reservations. Agency revenues are recognized on a net basis on air transactions when the reservation is made and secured by a credit card. A cancellation allowance is recognized on these revenues based on historical experience. OTravel.com recognizes agency revenues on hotel reservations, cruise and car rental reservations, either on an accrual basis for payments from a commission clearinghouse or on receipt of commissions from an individual supplier.

Reserve for returns, allowance for doubtful accounts and the reserve for obsolete and damaged inventory. Our management must make estimates of potential future product returns related to current period revenue. Management analyzes historical returns, current economic trends and changes in customer demand and acceptance of our products when evaluating the adequacy of the sales returns reserve and other allowances in any accounting period. The reserve for returns was \$5.6 million and \$1.8 million as of December 31, 2005 and September 30, 2006, respectively.

From time to time, we may grant credit to certain of our business customers on normal credit terms. We perform ongoing credit evaluations of our customers' financial condition and maintain an allowance for doubtful accounts receivable based upon our historical collection experience and expected collectibility of all accounts receivable. We maintained an allowance for doubtful accounts receivable of \$1.2 million and \$1.7 million as of December 31, 2005 and September 30, 2006, respectively.

We write down our inventory for estimated obsolescence or damage equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required. Once established, the original cost of the inventory less the related inventory reserve represents the new cost basis of such products. Reversal of these reserves is recognized only when the related inventory has been sold or scrapped. As of September 30, 2006, our inventory balance was \$68.8 million, net of allowance for obsolescence or damaged inventory of \$4.5 million. At December 31, 2005, our inventory balance was \$93.3 million, net of reserve for obsolescence or damaged inventory of \$5.2 million.

Internal-Use Software and Website Development. Included in fixed assets is the capitalized cost of internal-use software and website development, including software used to upgrade and enhance our websites and processes supporting our business. As required by Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, we capitalize costs incurred during the application development stage of internal-use software and amortize these costs over the estimated useful life of three years. Costs incurred related to design or maintenance of internal-use software are expensed as incurred.

During the third quarters of 2005 and 2006, we capitalized \$11.4 million and \$7.3 million, respectively, of costs associated with internal-use software and website development, which are partially offset by amortization of previously capitalized amounts of \$1.1 million and \$3.6 million for those respective periods. During the nine months ended September 30, 2005 and 2006, we capitalized \$25.4 million and \$19.3 million, respectively, of costs associated with internal-use software and website development, which are partially offset by amortization of previously capitalized amounts of \$1.6 million and \$9.9 million for those respective periods.

Accounting for income taxes. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. As of December 31, 2005 and September 30, 2006, we have recorded a full valuation allowance of \$36.6 million and \$58.0 million, respectively, against our net deferred tax asset balance due to uncertainties related to our deferred tax assets as a result of our history of operating losses. The valuation allowance is based on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred tax assets will be recoverable. In the event that actual results differ from these estimates or we adjust these estimates in future periods, we may need to change the valuation allowance, which could materially impact our financial position and results of operations.

Valuation of long-lived and intangible assets and goodwill. Under SFAS 142, *Goodwill and Other Intangible Assets*, goodwill is not amortized, but must be tested for impairment at least annually. Other long-lived assets must also be evaluated for impairment when management believes that an asset has experienced a decline in value that is other than temporary. Future adverse changes in market conditions or poor operating results of underlying investments could result in losses or an inability to recover the carrying value of the asset that may not be reflected in an asset's current carrying value, thereby possibly requiring an impairment charge in the future. Goodwill totaled \$13.2 million as of December 31, 2005 and September 30, 2006. There was no impairment of goodwill or long-lived assets during the three or nine months ended September 30, 2005 and 2006.

Stock-based compensation. As of January 1, 2006, we adopted SFAS 123(R), which requires us to measure compensation cost for all outstanding unvested share-based awards at fair value and recognize compensation over the service period for awards expected to vest. The estimation of stock awards that will ultimately vest requires judgment, and to the extent actual results differ from our estimates, such amounts will be recorded as an adjustment in the period estimates are revised. We consider many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results may differ substantially from these estimates. We have utilized a Black-Scholes-Merton valuation model to estimate the value of stock options

granted to employees. Several of the primary estimates used in measuring stock-based compensation are as follows:

Expected Volatility: The fair value of stock options were valued using a volatility factor based on the Company's historical stock prices.

Expected Term: The Company's expected term represents the period that the Company's stock options are expected to be outstanding and was determined based on historical experience of similar awards, giving consideration to the contractual terms and vesting provisions of the stock-based awards.

Expected Dividend: The Company has not paid any dividends and does not anticipate paying dividends in the foreseeable future.

Risk-Free Interest Rate: The Company bases the risk-free interest rate used on the implied yield currently available on U.S. Treasury zero-coupon issues with remaining term equivalent to the expected term of the options.

Estimated Pre-vesting Forfeitures: When estimating forfeitures, the Company considers voluntary and involuntary termination behavior.

Performance Share Plan. In January 2006 the Board and Compensation Committee adopted the Overstock.com Performance Share Plan, and approved grants to executive officers and certain employees of the Company. The Performance Share Plan provides for a three-year period for the measurement of the Company's attainment of the performance goal described in the form of grant, but at the Company's sole option the Company may make a payment of estimated amounts payable to a plan participant after two years.

The performance goal is measured by growth in economic value, as defined in the plan. The amount of payments due to participants under the plan will be a function of the then current market price of a share of the Company's common stock, multiplied by a percentage dependent on the extent to which the performance goal has been attained, which will be between 0% and 200%. If the growth in economic value is 10% compounded annually or less, the percentage will be 0%. If the growth in economic value is 25% compounded annually, the percentage will be 100%. If the growth in economic value is 40% compounded annually or more, the percentage will be 200%. If the percentage growth is between these percentages, the payment percentage will be determined on the basis of straight line interpolation. Amounts payable under the plan will be payable in cash. During interim and annual periods prior to the completion of the three-year measurement period, we record compensation expense based upon the period-end stock price and estimates regarding the ultimate growth in economic value that is expected to occur. These estimates include assumed future growth rates in revenues, gross margins and other factors. If we were to use different assumptions, the estimated compensation charges could be significantly different.

Approximately \$100,000 related to a reversal of compensation expense under the plan has been included as a reduction in general and administrative expenses for the quarter ended September 30, 2006, resulting in a total of \$800,000 of performance share plan compensation expense for the nine months then ended. As of September 30, 2006, the Company has accrued \$800,000 in total compensation expense under the plan.

Recent Accounting Pronouncements.

In March 2006, the Emerging Issue Task Force reached a consensus on Issue No. 06-03 How Taxes Collected from Customers and Remitted to Government Authorities Should be Presented in the Income Statement (That Is, Gross versus Net Presentation) (EITF No. 06-03). We are required to adopt the provisions of EITF No. 06-03 beginning its fiscal year 2007. We do not expect the provisions of EITF No. 06-03 to have a material impact on our consolidated financial position, results of operations or cash flows.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109, (FIN 48). FIN 48 prescribes a comprehensive model for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that it has taken or expects to take on a tax return. FIN 48 is effective for us on January 1, 2007. We are currently evaluating the impact of this interpretation and do not expect the adoption of FIN 48 to have a material impact on our consolidated

financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 was issued to provide interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The provisions of SAB 108 are effective for us for the December 31, 2006 year-end. We do not expect the adoption of SAB 108 to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of this standard apply to other accounting pronouncements that require or permit fair value measurements. SFAS 157 becomes effective for us on January 1, 2008. Upon adoption, the provisions of SFAS 157 are to be applied prospectively with limited exceptions. We do not expect the adoption of SFAS 157 to have a material impact on our consolidated financial statements.

Results of Operations 2005 compared to 2006

Revenue

Total revenue decreased from \$169.3 million during the third quarter of 2005, to \$158.7 million in 2006, representing a 6% decline

year-over-year. During this same period, direct revenue decreased 17% from \$68.4 million to \$56.6 million, while fulfillment partner revenue increased 1%, from \$100.9 million to \$102.2 million for those respective periods. For the nine months ended September 30, 2005 and 2006, total revenue grew 3%, from \$485.8 million in 2005 to \$498.9 million in 2006. During the same nine-month period, direct revenue grew 4%, from \$196.4 million in 2005 to \$205.0 million in 2006, while fulfillment partner revenue experienced 2% growth, from \$289.4 million in 2005 to \$293.9 million in 2006.

The 6% decrease in total revenue we experienced during the third quarter of 2006 and the 3% growth experienced during the nine months of 2006 was much slower than our historical year over year growth rates have been. We believe that this is primarily the result of the system issues that we experienced during the last few months of 2005 that resulted in a poor shopping experience for some of our customers, leading to slowing growth in the fourth quarter of 2005 and through the first nine months of 2006. In addition, we have experienced some inflation in online marketing rates due to increases in costs-per-click and the expiration of the majority of our agreements with the large portals, which has made both growth and marketing efficiency more difficult. Although our increased marketing efforts in the third quarter drove traffic to the websites, our overall conversion rates declined during the quarter (both sequentially and year-over-year), impacting overall sales.

Gross Margins

Total Gross Margins Total cost of goods sold decreased \$7.0 million or 5%, from \$142.8 million during the quarter ended September 30, 2005 to \$135.8 million during the quarter ended September 30, 2006, resulting in a decrease in gross profits of 14% (from \$26.6 million to \$22.9 million) during the same periods. As a percent of total revenue, cost of goods sold increased from 84% to 86% for those respective periods, resulting in gross margins of 15.7% and 14.5% for the quarters ended September 30, 2005 and 2006, respectively. For the nine months ended September 30, 2005 and 2006, total cost of goods sold was \$411.8 million and \$427.8 million, respectively, an increase of 4%, resulting in gross margins of 15.2% and 14.3% for those respective periods.

Generally, our overall gross margins fluctuate based on several factors, including our product mix of sales; sales volumes mix by our direct business and fulfillment partners; changes in vendor pricing; lowering prices for customers, including competitive pricing and inventory management decisions within the direct business; warehouse management costs; customer service costs; and our discounted shipping offers. Discounted shipping offers reduce shipping revenue, and therefore reduce our gross margins on retail sales.

Direct Gross Margins Gross profits for our direct business decreased 40% from \$9.3 million for the quarter ended September 30, 2005 to \$5.5 million recorded during the same period in 2006. Gross profits as a percentage of direct revenue were 13.6% and 9.8% for the quarters ended September 30, 2005 and 2006, respectively. For the nine months ended September 30, 2005 and 2006, gross profits for our direct business were \$27.4 million and \$21.8 million, a decrease of 20%. The lower gross margins experienced by the direct business are primarily the result of lowering prices to our customers in an effort to reduce inventory levels, and we expect continued markdowns to have a similar effect on gross margins through the fourth quarter. This was partially offset by improvements in variable handling and customer service costs in the second and third quarters. We anticipate additional cost savings in these areas in the fourth quarter now that the improved build-out of our Salt Lake City warehouse and our new customer service application both became operational during the third quarter.

Fulfillment Partner Gross Margins Our fulfillment partner business generated gross profits of \$17.3 million and \$17.4 million for the quarters ended September 30, 2005 and 2006, respectively, an increase of 1%, with 17.1% gross margins in both years. For the nine-month periods, our fulfillment partner business generated gross profits of \$46.6 million in 2005 and \$49.3 million in 2006, representing growth of 6%. Gross margins for those respective periods were 16.1% in 2005 and 16.8% in 2006. The increase in gross profits in the third quarter for our fulfillment partner operations was largely due to improvements in product costs.

Travel and Auctions Gross Margins Fulfillment partner gross margins were augmented by the historically higher gross margins from the Travel and Auctions businesses. The gross profits generated by the travel business this year are primarily a result of merchant hotel revenue related to the operations of Ski West, which we acquired on July 1, 2005. Since revenues from sales in both of these businesses are recorded on a net basis, they result in higher gross margins than our shopping business.

Fulfillment costs

Fulfillment costs include all warehousing costs, including fixed overhead and variable handling costs (excluding packaging costs), as well as credit card fees and customer service costs, all of which we include as costs in calculating gross margins. We believe that some companies in our industry, including some of our competitors, account for fulfillment costs within operating expenses, and therefore exclude fulfillment costs from gross margins. As a result, our gross margins may not be directly comparable to others in our industry.

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

The following table has been included to provide investors additional information regarding our classification of fulfillment costs and gross margins, thus enabling investors to better compare our gross margins with others in our industry:

(in thousands)	Three months ended September 30, 2005				Three months ended September 30, 2006				Nine months ended September 30, 2005				Nine months ended September 30, 2006			
Total revenue	\$	169,323	100	%	\$	158,727	100	%	\$	485,842	100	%	\$	498,901	100	%
Cost of goods sold:																
Product costs, freight costs and other cost of good sold		129,468	76	%		123,446	78	%		375,697	78	%		385,572	77	%
Fulfillment costs		13,290	8	%		12,333	8	%		36,122	7	%		42,225	9	%
Total cost of goods sold		142,758	84	%		135,779	86	%		411,819	85	%		427,797	86	%
Gross profit	\$	26,565	16	%	\$	22,948	14	%	\$	74,023	15	%	\$	71,104	14	%

As displayed in the above table, fulfillment costs during the quarters ended September 30, 2005 and 2006 were \$13.3 million and \$12.3 million, respectively, or 8% and 8% of total revenue for both respective periods. For the nine months ended September 30, 2005 and 2006, fulfillment costs totaled \$36.1 million and \$42.2 million, respectively, representing 7% and 8% of total revenue for those respective periods. Fulfillment costs as a percentage of sales may vary due to several factors, such as our ability to manage costs at our warehouses, significant changes in the number of units received and fulfilled, the extent we utilize third party fulfillment services and warehouses, and our ability to effectively manage customer service costs and credit card fees.

Operating expenses

Sales and marketing. Sales and marketing expenses totaled \$18.0 million and \$17.8 million (1% decrease) for the quarters ended September 30, 2005 and 2006, respectively. For the quarters ended September 30, 2005 and 2006, sales and marketing expenses equaled 11%, respectively, of total revenue. For the nine months ended September 30, 2005 and 2006, sales and marketing expenses totaled \$49.3 million and \$43.2 million (12% decrease), representing 10% and 9% of total revenue for those respective periods.

We direct customers to our Websites primarily through a number of targeted online marketing channels, such as sponsored search, affiliate marketing, portal advertising, e-mail campaigns, and other initiatives. We also utilize channels such as nation-wide television, print and radio advertising campaigns. Our marketing expense is variable and is measured as a percentage of overall sales.

We reduced marketing expenditures in the first and second quarters of 2006 to focus our resources on completing prior year initiatives and improving internal business processes. As most of these projects had been completed and our customer satisfaction ratings had rebounded back to previous year or better levels, we ramped up marketing expenditures in the third quarter, even though we had intended to continue to spend 10-20% less on marketing than we had in the previous year. In particular, we increased our offline marketing expenditures, mostly in cable television and radio. Although our marketing efforts drove additional traffic to the Websites, our overall conversion rates declined during the quarter, and as a result, our overall marketing expenditures were much less efficient (11% of sales) in the third quarter than they had been over the previous six months of 2006 (7.5% of sales). We currently have multiple projects in development that are intended to help improve conversion rates and our overall marketing efficiency.

While costs associated with our discounted shipping promotions are not included in marketing expense (they are accounted for as a reduction of revenue), we consider discounted shipping promotions as an effective marketing tool, and intend to continue to offer them as we deem appropriate.

Sales and marketing expenses also included stock-based compensation related to the adoption of SFAS 123(R) of \$82,000 and \$225,000 during the three and nine months ended September 30, 2006, respectively.

Technology expenses. Technology expenses increased 100%, from \$8.1 million during the quarter ended September 30, 2005 to \$16.3 million during same period in 2006. For the nine-month periods, technology expenses increased 145% from \$18.3 million in 2005 to \$44.9 million in 2006, representing 4% and 9% of total revenue for those respective periods.

We have incurred a stair-step increase in technology costs over the past two years, as we have made significant investments in all of our major systems, with approximately \$61 million of capital expenditures in 2005, and an additional \$24 million through the first nine months of 2006. As a result, technology expenses will more than double for the full year 2006 over 2005. The increases in expense are related primarily to increased depreciation expense, as well as increases in maintenance and support costs, and increased IT personnel, including consultants. With sales growth at only 3% year-to-date, these increased expenses will result in a significant increase in technology expenses as a percent of sales for the full-year 2006. However, at our current growth rates, we believe that our technology costs are now beginning to stabilize. Technology expenses also included stock-based compensation related to the adoption of SFAS 123(R) of \$186,000 and \$513,000 during the three and nine months ended September 30, 2006, respectively.

General and administrative expenses. General and administrative (G&A) expenses increased 27%, from \$10.0 million during the quarter ended September 30, 2005 to \$12.7 million during the same quarter in 2006, representing 6% and 8% of total revenue for each of the respective periods. For the nine-month periods, G&A expenses increased 55%, from \$24.9 million in 2005 to \$38.5 million in 2006, representing 5% and 8% of total revenue for those respective periods.

The increase in G&A expenses in the three and nine months ended September 30, 2006 compared to the same periods in 2005 relates to increases in payroll-related expenses, professional fees, merchandising, legal and finance costs. Also in the third quarter of 2005, we relocated our corporate offices to larger facilities, increasing quarterly rent expense by approximately \$1.0 million. Slowing growth, combined with these increases in G&A expense, will result in a significant increase in G&A expense as a

percent of sales for the full year 2006. However, we believe that our G&A costs are stabilizing, and at current growth rates, we anticipate minimal increases to G&A in 2007.

We incurred stock-based compensation within general and administrative expenses of approximately \$740,000 and \$2.0 million for the three and nine months ended September 30, 2006, respectively.

A large portion of our technology and general and administrative expenses are now non-cash expenses. We estimate that total depreciation and amortization expense will approximate \$32 million in 2006. Therefore, including stock-based compensation, non-cash expenses are estimated to be approximately \$36 million for the year, compared to approximately \$16 million of similar non-cash expenses in 2005.

Non-operating income (expense)

Interest income, interest expense and other income (expense). The primary components of our net interest income, interest expense and other income (expense) are the interest derived from the investment of our excess cash in marketable securities offset by interest expense related to the convertible debt, bank credit lines, letters of credit, capital leases, and other related fees. Additionally, we incurred a large expense during the third quarter of 2005 related to the valuation of the conditional coupon of our foreign bonds. Consequentially, interest income increased from \$1.7 million negative interest income related to the valuation of the conditional coupon of our foreign bonds during the quarter ended September 30, 2005 to \$459,000 during the same quarter in 2006. For the nine months ended September 30, 2005 and 2006, interest income increased from \$150,000 negative interest income to \$3.0 million, respectively, including a \$1.9 million gain recognized in the second quarter of 2006 as a result of selling the foreign bonds.

Under SFAS No. 133, the Foreign Notes were considered to be derivative financial instruments and were marked to market quarterly. Any unrealized gain or loss related to the changes in value of the conditional coupon was recorded in the income statement as a component of interest income or expense. Any unrealized gain or loss related to the changes in the value of the Notes was recorded as a component of other comprehensive income (loss). On April 26, 2006, we sold the Foreign Notes for \$49.5 million, resulting in the gain on the bond instrument of \$1.9 million. See Note 3 Marketable Securities .

Interest expense is largely related to our convertible notes, capital leases and our credit lines. Interest expense decreased slightly from \$1.3 million during the quarter ended September 30, 2005 to \$1.1 million during the same period in 2006. For the nine month periods, interest expense decreased from \$4.2 million to \$3.6 million. The decrease in interest expense is related to the reduction of convertible notes outstanding related to the retirement of \$33.0 million of Senior Notes in June and November of 2005. See Note 10 3.75% Convertible Senior Notes .

Other income for the nine months ended September 30, 2005 relates primarily to the retirement of \$33.0 million of Senior Notes for \$27.9 million, which resulted in a recognized gain of \$4.2 million.

Income taxes

Income taxes. For the quarters ended September 30, 2005 and 2006, we incurred net operating losses, and consequently paid insignificant amounts of federal, state and foreign income taxes. As of December 31, 2005 and September 30, 2006, we had net operating loss carryforwards of approximately \$58.0 million and \$116.8 million, respectively, which may be used to offset future taxable income. An additional \$21.9 million of net operating losses are limited under Internal Revenue Code Section 382 to \$799,000 a year. These net operating loss carryforwards will begin to expire in 2019.

Supplemental Information about Stock-Based Compensation

Periods prior to the adoption of SFAS 123(R)

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

Prior to January 1, 2006, we accounted for stock-based awards under the intrinsic value method, which followed the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. The intrinsic value method of accounting resulted in compensation expense for stock options to the extent option exercise prices were set below market prices on the date of grant. Also, to the extent stock awards were forfeited prior to vesting, the corresponding previously recognized expense was reversed as an offset to operating expenses.

The following table illustrates the effects on net loss and net loss per share as if we had applied the fair value recognition provisions of SFAS 123 to options granted under our stock-based compensation plans prior to the adoption of SFAS 123(R). For purposes of this pro forma disclosure, the value of the options was estimated using the Black-Scholes-Merton (BSM) option-pricing formula and amortized on a straight-line basis over the respective vesting periods of the awards. Disclosures for the three and nine months ended September 30, 2006 are not presented because stock-based payments were accounted for under SFAS 123(R) s fair value method during this period.

	Three months ended September 30, 2005	Nine months ended September 30, 2005
Net loss, as reported	\$ (12,402)	\$ (18,635)
Add: Stock-based employee compensation, as reported	(8)	65
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(1,033)	(2,948)
Pro forma net loss SFAS 123 fair value adjusted	\$ (13,443)	\$ (21,518)
Net loss per common share		
Basic and diluted as reported	\$ (0.66)	\$ (0.96)
Basic and diluted pro forma	\$ (0.72)	\$ (1.11)

Adoption of SFAS 123(R)

As of January 1, 2006, we adopted SFAS No. 123(R) using the modified prospective method, which requires measurement of compensation cost for all stock-based awards at fair value on date of grant and recognition of compensation over the service period for awards expected to vest. The fair value of stock options is determined using the BSM valuation model, which is consistent with our valuation techniques previously utilized for options in footnote disclosures required under SFAS No. 148, *Accounting for Stock Based Compensation*, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*. Such value is recognized as expense over the service period, net of estimated forfeitures, using the straight-line method under SFAS 123(R).

The adoption of SFAS 123(R) did not result in a cumulative benefit from accounting change, which reflects the net cumulative impact of estimating future forfeitures in the determination of period expense, rather than recording forfeitures when they occur as previously permitted, as we did not have unvested employee stock awards for which compensation expense was recognized prior to adoption of SFAS No. 123(R).

On March 29, 2005, the SEC published Staff Accounting Bulletin (SAB) No. 107, which provides the Staff's views on a variety of matters relating to stock-based payments. SAB 107 requires stock-based compensation be classified in the same expense line items as cash compensation. We have reclassified stock-based compensation from prior periods to correspond to current period presentation within the same operating expense line items as cash compensation paid to employees.

The application of SFAS 123(R) had the following effect on the three and nine months ended September 30, 2006 reported amounts relative to amounts that would have been reported using the intrinsic value method under previous accounting (in thousands, except per share amounts):

SFAS 123(R) Adjustments	Three months ended September 30, 2006	Nine months ended September 30, 2006
Operating loss	\$ (1,119)	\$ (3,088)
Net loss	\$ (1,119)	\$ (3,088)
Net loss per common share basic and diluted	\$ (0.05)	\$ (0.15)

Seasonality

Based upon our historical experience, increased revenues typically occur during the fourth quarter because of the holiday retail season. The actual quarterly results for each quarter could differ materially depending upon consumer preferences, availability of product and competition, among other risks and uncertainties. Accordingly, there can be no assurances that seasonal variations will not materially affect our results of operations in the future. The following table reflects our revenues for each of the quarters since 2002 (in thousands):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006	\$ 180,206	\$ 159,968	\$ 158,727	
2005	165,881	150,638	169,323	\$ 317,980

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

2004	82,078	87,792	103,444	221,321
2003	29,164	28,833	57,788	* 123,160
2002	12,067	14,380	23,808	41,529

* Note that total revenue since the third quarter of 2003 reflects the change in our policy in which sales by fulfillment partners are recorded gross instead of net as in prior quarters.

25

Liquidity and Capital Resources

At September 30, 2006, our cash and cash equivalents balance was \$39.4 million. Our operating activities resulted in a net cash outflow of \$19.9 million and a net cash inflow of \$806,000 for the quarters ended September 30, 2005 and 2006, respectively. For the nine months ended September 30, 2005 and 2006, cash outflows from operating activities were \$65.2 million and \$78.1 million, respectively. The primary use of cash and cash equivalents during the nine months ended September 30, 2006 was to fund our operations, including net losses of \$56.2 million (including \$25.7 million of net non-cash activity), as well as changes in prepaid expenses, other long-term assets, accounts payable and accrued liabilities of \$728,000, \$105,000, \$50.7 million and \$26.4 million, respectively. This was offset by the cash provided from a reduction in inventory and prepaid inventory of \$30.1 million as well as collections of accounts receivable of \$104,000. For the nine months ended September 30, 2005, cash outflows was a result of funding our net loss of \$18.6 million (including \$8.4 million of net non-cash activity) for the period and changes in accounts receivable, inventory and prepaid inventory, prepaid expenses, other long-term assets and accounts payable of \$965,000, \$51.9 million, \$5.8 million, \$435,000 and \$17.9 million, respectively. This was offset by the cash provided by changes in accrued liabilities of \$22.0 million.

We have payment terms with our fulfillment partners that extend beyond the amount of time necessary to collect proceeds from our customers. As a result, following our seasonally strong fourth quarter sales, at December 31 of each year, our cash, cash equivalents, marketable securities and accounts payable balances typically reach their highest level (other than as a result of cash flows provided by or used in investing and financing activities). However, our accounts payable balance normally declines during the first three months following year-end, which normally results in a decline in our cash, cash equivalents, and marketable securities balances in the first quarter each year.

Due to the seasonality in our quarterly sales and operating cash flows, we believe the trailing twelve month (TTM) operating cash flow to be a better indication of our true operating cash flow. For the twelve months ending September 30, 2006, the TTM operating cash outflows were \$19.1 million versus \$28.1 million for the TTM ending September 30, 2005. For the TTM ended September 30, 2006, cash outflows resulted from net losses, combined with changes in accounts receivable, other long-term assets, and accrued liabilities of \$4.0 million, \$1.8 million, and \$24.8 million, respectively, offset by a decrease in inventory and prepaid inventory, prepaid expenses and an increase in accounts payable of \$37.9 million, \$93,000 and \$3.7 million, respectively.

Investing activities resulted in cash outflows of \$24.1 million and \$7.8 million for the three months ended September 30, 2005 and 2006, respectively. For the nine-month periods, investing activities resulting in cash outflows of \$47.4 million in 2005 and cash inflows of \$36.9 million in 2006. During the nine months ended September 30, 2006, the cash inflows resulted from the sale of marketable securities of \$56.8 million, including the sale of our foreign notes of \$49.5 million in April, offset by expenditures for property and equipment of \$20.0 million. Cash outflows from investing activities for the nine months ended September 30, 2005 resulted from investments in marketable securities of \$183.5 million, expenditures for property and equipment of \$36.5 million and the acquisition of Ski West, Inc. for \$24.6 million. This was offset by sales of marketable securities of \$196.3 million.

Financing activities resulted in cash inflows of \$15.1 million for the quarter ended September 30, 2005 and cash inflows of \$682,000 for the quarter ended September 30, 2006. For the nine-month periods, financing activities resulted in cash outflows of \$83.6 million in 2005 and cash inflows of \$24.4 million in 2006. The cash inflows in 2006 primarily are the result of cash received from the sale of common stock for \$25.0 million and \$2.3 million from the exercise of employee stock options, offset by payments on capital lease obligations of \$2.8 million. Cash outflows for financing activities in 2005 were primarily from capital lease payments of \$3.2 million and the payments of \$27.9 million to retire our convertible senior notes, \$24.1 million to purchase our common stock, and \$47.5 million to purchase call options to purchase our common stock. These outflows were offset by borrowings of \$4.4 million from our line credit, \$7.9 million related to the settlement of call options for cash and \$6.9 million from the exercise of stock options and warrants.

While we believe that the cash and marketable securities currently on hand, amounts available under our credit facility and expected cash flows from future operations will be sufficient to continue operations for at least the next twelve months, we may require additional financing. However, there can be no assurance that if additional financing is necessary it will be available, or, if available, that such financing can be obtained on satisfactory terms. Failure to generate sufficient revenues, generate profitability or raise additional capital could have a material adverse effect on our ability to continue as a going concern and to achieve our intended business objectives. Any projections of future cash needs and cash flows are subject to substantial uncertainty.

Contractual Obligations and Commitments. The following table summarizes our contractual obligations as of September 30, 2006 and the effect such obligations and commitments are expected to have on our liquidity and cash flow in future periods:

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

Contractual Obligations	Payments Due by Period (in thousands)				
	Total	Less than 1 Year	1-3 Years	4-5 Years	After 5 years
Long-term debt arrangements	\$ 77,000	\$	\$	\$	\$ 77,000
Interest on convertible senior notes	15,160	2,888	5,775	5,775	722
Capital lease obligations	10,146	6,186	3,960

We may be subject to additional earn-out payments related to the acquisition of SkiWest (based on a percentage of operating profits for each of the four calendar years beginning with 2006 as follows: 50%, 33.3%, 20%, and 10%, respectively).

3.75% Convertible Senior Notes

In November 2004, we completed an offering of \$120.0 million of 3.75% Convertible Senior Notes (the "Senior Notes"). Interest on the Senior Notes is payable semi-annually on June 1 and December 1 of each year. The Senior Notes mature on December 1, 2011 and are unsecured and rank equally in right of payment with all existing and future unsecured, unsubordinated debt and senior in right of payment to any existing and future subordinated indebtedness. The Senior Notes are convertible at any time prior to maturity into our common stock at the option of the note holders at a conversion price of \$76.23 per share (subject to adjustment in certain events, including stock splits, dividends and other distributions and certain repurchases of our stock, as well as certain fundamental changes in the ownership of the Company).

Beginning December 1, 2009, we have the right to redeem the Senior Notes, in whole or in part, for cash at 100% of the principal amount plus accrued and unpaid interest. Upon the occurrence of a fundamental change (including the acquisition of a majority interest in the Company, certain changes in the Company's board of directors or the termination of trading of our stock) meeting certain conditions, holders of the Senior Notes may require us to repurchase for cash all or part of their notes at 100% of the principal amount plus accrued and unpaid interest.

In 2005, under the Share Repurchase Program discussed below, we retired \$43.0 million of the Senior Notes for \$35.7 million in cash. As a result of the note retirements, we recognized a gain of \$6.2 million, net of the associated unamortized discount of \$1.2 million for the year ended December 31, 2005. As of September 30, 2006, \$77.0 million of Senior Notes and unamortized debt discount of \$1.8 million remain outstanding.

Lease and Purchase Obligations

The lease obligations include our obligations under a ten-year lease agreement we entered in December 2004 for approximately 154,000 square feet of office space in Salt Lake City. We took possession of the new office space in July of 2005, and terminated our lease obligations under our previous office lease agreements at the same time. The total lease obligation over the ten-year term of the new lease is \$39.6 million, of which approximately \$3.5 million is payable in the next twelve months. In connection with the preparation of the new office space, we have provided a letter of credit for \$500,000 to provide funds for the removal of the improvements upon termination of the new sublease and have also agreed to pay approximately \$2.0 million for leasehold improvements. We paid for the majority of the leasehold improvements during 2005 and paid the remainder in 2006.

The amount of purchase obligations shown is based on assumptions regarding the legal enforceability against us of purchase orders we had outstanding at September 30, 2006. Under different assumptions regarding our rights to cancel our purchase orders or different assumptions regarding the enforceability of the purchase orders under applicable law, the amount of purchase obligations shown in the table above would be less.

Borrowings

\$30.0 million Amended Credit Agreement

On October 18, 2005, the Company entered into a sixth amendment to a credit agreement (the "Amended Credit Agreement") with Wells Fargo Bank, National Association. The Amended Credit Agreement provides a revolving line of credit to the Company of up to \$30.0 million which we use primarily to obtain letters of credit to support inventory purchases. Borrowings and outstanding letters of credit under the credit agreement are collateralized by cash balances

held at Wells Fargo Bank, National Association. The Amended Credit Agreement expires on December 31, 2007, however, we have an option to renew the Amended Credit Agreement annually. Interest on borrowings is payable monthly and accrued at either (i) 1.35% above LIBOR in effect on the first day of an applicable fixed rate term, or (ii) at a fluctuating rate per annum determined by the bank to be one half a percent (0.50%) above daily LIBOR in effect on each business day a change in daily LIBOR is announced by the bank. Unpaid principal, together with accrued and unpaid interest is due on the maturity date.

The Amended Credit Agreement requires us to comply with certain covenants, including restrictions on mergers, business combinations or transfer of assets. We were in compliance with these covenants at September 30, 2006.

At September 30, 2006, no amounts were outstanding under the Amended Credit Agreement, and letters of credit totaling \$9.5 million were issued on our behalf.

\$40.0 million WFRF Agreement

On December 12, 2005, we entered into a Loan and Security Agreement (the "WFRF Agreement") with Wells Fargo Retail Finance, LLC and related security agreements and other agreements described in the WFRF Agreement.

The WFRF Agreement provides for advances to us and for the issuance of letters of credit for its account of up to an aggregate maximum of \$40.0 million. We have the right to increase the aggregate maximum amount available under the facility to up to \$50.0 million during the first two years of the facility. The amount actually available to us may be less and may vary from time to time, depending on, among other factors, the amount of our eligible inventory and receivables. Our obligations under the WFRF Agreement and all related agreements are collateralized by all or substantially all of our and our subsidiaries' assets. Our obligations under the WFRF Agreement are cross-collateralized with our assets pledged under our \$30.0 million credit facility with Wells Fargo Bank, National Association. The term of the WFRF Agreement is three years, expiring on December 12, 2008. The WFRF Agreement contains standard default provisions.

Advances under the WFRF Agreement bear interest at either (a) the rate announced, from time to time, within Wells Fargo Bank, National Association at its principal office in San Francisco as its prime rate or (b) a rate based on LIBOR plus a varying percentage between 1.25% and 1.75%; however, the annual interest rate on advances under the WFRF Agreement will be at least 3.50%. The WFRF Agreement includes affirmative covenants as well as negative covenants that prohibit a variety of actions without the lender's approval, including covenants that limit our ability to (a) incur or guarantee debt, (b) create liens, (c) enter into any merger, recapitalization or similar transaction or purchase all or substantially all of the assets or stock of another person, (d) sell assets, (e) change our name or the name of any of our subsidiaries, (f) make certain changes to our business, (g) optionally prepay, acquire or refinance indebtedness, (h) consign inventory, (i) pay dividends on, or purchase, acquire or redeem shares of, our capital stock, (j) change our method of accounting, (k) make investments, (l) enter into transactions with affiliates, or (m) store any of our inventory or equipment with third parties. We were in compliance with these covenants as of September 30, 2006. At September 30, 2006, no amounts were outstanding under the WFRF Agreement.

Redeemable Common Stock

The estimated amount of redeemable common stock is based solely on the statutes of limitations of the various states in which stockholders may have rescission rights and may not reflect the actual results. The stock is not redeemable by its terms. We do not have any unconditional purchase obligations, other long-term obligations, guarantees, standby repurchase obligations or other commercial commitments. These rescission rights, if any, fully expired prior to the end of the third quarter, leaving no outstanding redeemable common stock as of September 30, 2006.

Share Repurchase Program

During January 2005, our Board of Directors authorized a share repurchase program under which we were authorized to repurchase up to \$50.0 million of our common stock through December 31, 2007. On April 26, 2005, the Board of Directors increased the amount of the share repurchase program to \$100.0 million. Additionally, on June 14, 2005, the Board of Directors authorized an amendment of our three-year share repurchase program to include the repurchase of our Convertible Senior Notes. Under the repurchase program, we repurchased approximately 665,000 shares of our common stock in open market transactions for \$24.1 million during the year ended December 31, 2005. In addition, approximately 1.0 million shares of common stock were acquired as a result of the settlement of \$41.1 million of structured stock repurchase transactions during the year ended December 31, 2005. The purchased call options that did not settle in stock settled in cash totaling \$7.9 million, which we received in July 2005. We also repurchased convertible senior notes having an aggregate principal amount of \$43.0 million. As of September 30, 2006, we have utilized all of the \$100.0 million authorized by the board of directors under the share repurchase program.

Shelf Registration

In April 2005, we filed a registration statement with the Securities and Exchange Commission using a shelf registration or continuous offering process. Under this shelf process, we may, from time to time, sell any or all of the securities described in the prospectus in one or more offerings up to a total dollar amount of \$500.0 million. On May 1, 2006, we issued approximately 1,042,000 shares of common stock for an aggregate price of \$25.0 million.

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

While we believe that the cash and marketable securities currently on hand, amounts available under our credit facility and expected cash flows from future operations will be sufficient to continue operations for at least the next twelve months, we may require additional financing. However, there can be no assurance that if additional financing is necessary it will be available, or, if available, that such financing can be obtained on satisfactory terms. Failure to generate sufficient revenues, generate profitability or raise additional capital could have a material adverse effect on our ability to continue as a going concern and to achieve our intended business objectives. Any projections of future cash needs and cash flows are subject to substantial uncertainty.

Government Regulation

All of our services are subject to federal and state consumer protection laws including laws protecting the privacy of consumer non-public information and regulations prohibiting unfair and deceptive trade practices. In particular, under federal and state financial privacy laws and regulations, we must provide notice to consumers of our policies on sharing non-public information with third parties, must provide advance notice of any changes to our policies and, with limited exceptions, must give consumers the right to prevent sharing of their non-public personal information with unaffiliated third parties. Furthermore, the growth and demand for online commerce could result in more stringent consumer protection laws that impose additional compliance burdens on online companies. These consumer protection laws could result in substantial compliance costs and could interfere with the conduct of our business.

In many states, there is currently great uncertainty whether or how existing laws governing issues such as property ownership, sales and other taxes, libel and personal privacy apply to the Internet and commercial online services. These issues may take years to resolve. In addition, new state tax regulations may subject us to additional state sales and income taxes. New legislation or regulation, the application of laws and regulations from jurisdictions whose laws do not currently apply to our business or the application of existing laws and regulations to the Internet and commercial online services could result in significant additional taxes on our business. These taxes could have an adverse effect on our cash flows and results of operations. Furthermore, there is a possibility that we may be subject to significant fines or other payments for any past failures to comply with these requirements.

Factors that May Affect Future Results

Any investment in our securities involves a high degree of risk. Investors should consider carefully the risks and uncertainties described below, and all other information in this Form 10-Q and in our other filings with the SEC including those we file after we file this Form 10-Q, before deciding whether to purchase or hold our securities. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also become important factors that may harm our business. The occurrence of any of the following risks could harm our business. The trading price of our securities could decline due to any of these risks and uncertainties, and investors may lose part or all of their investment.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our financial instruments consist of cash and cash equivalents, marketable securities, trade accounts and contracts receivable, accounts payable and long-term obligations. We consider investments in highly-liquid instruments purchased with a remaining maturity of 90 days or less at the date of purchase to be cash equivalents. Our exposure to market risk for changes in interest rates relates primarily to our short-term investments and short-term obligations; thus, fluctuations in interest rates would not have a material impact on the fair value of these securities.

At September 30, 2006, we had \$39.4 million in cash and cash equivalents. A hypothetical increase or decrease in interest rates of one hundred basis points would have an estimated impact of approximately \$100,000 on our loss for the quarter ended September 30, 2006, or the fair market value or cash flows of these instruments.

At September 30, 2006, we had \$77.0 million of convertible senior notes outstanding which bear interest at a fixed rate of 3.75%. In addition, at September 30, 2006, we had \$9.5 million in letters of credit outstanding under our credit facilities.

The fair value of the convertible senior notes is sensitive to interest rate changes. Interest rate changes would result in increases or decreases in the fair value of the convertible senior notes, due to differences between market interest rates and rates in effect at the inception of the obligation. Unless we elect to repurchase our convertible senior notes in the open market, changes in the fair value of convertible senior notes have no impact on our cash flows or consolidated financial statements. The estimated fair value of our 3.75% Convertible Senior Notes as of December 31, 2005 and September 30, 2006 was \$54.7 million and \$54.3 million, respectively.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information relating to the Company and its consolidated subsidiaries required to be disclosed in the Company's periodic filings under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported in a timely manner in accordance with the requirements of the Exchange Act,

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer (principal executive officer) and Senior Vice President, Finance (principal financial officer), as appropriate, to allow timely decisions regarding required disclosure. The Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer (principal executive officer) and Senior Vice President, Finance (principal financial officer), of the effectiveness of the design and operation of these disclosure controls and procedures, as such term is defined in Exchange Act Rule 13a-15(e), as of September 30, 2006. Based on this evaluation, the Chief Executive Officer (principal executive officer) and Senior Vice President, Finance (principal financial officer) each concluded that the Company's disclosure controls and procedures were effective as of September 30, 2006.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended September 30, 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we receive claims of and become subject to consumer protection, employment, intellectual property and other commercial litigation related to the conduct of our business. Such litigation could be costly and time consuming and could divert our management and key personnel from our business operations. The uncertainty of litigation increases these risks. In connection with such litigation, we may be subject to significant damages or equitable remedies relating to the operation of our business and the sale of products on our websites. Any such litigation may materially harm our business, prospects, results of operations, financial condition or cash flows. However, we do not currently believe that any of our outstanding litigation will have a material adverse effect on our financial statements.

In December 2003, we received a letter from Furnace Brook claiming that certain of our business practices and our website infringe a single patent owned by Furnace Brook. After diligent efforts to show that we do not infringe the patent and Furnace Brook's continual demands that we enter into licensing arrangements with respect to the asserted patent, on August 12, 2005, we filed a complaint in the United States District Court of Utah, Central Division, seeking declaratory judgment that we do not infringe any valid claim of the Furnace Brook patent. Furnace Brook filed a motion to dismiss our complaint for lack of personal jurisdiction over Furnace Brook in Utah. On October 31, 2005, the United States District Court of Utah, Central Division, issued a decision to dismiss our complaint for lack of personal jurisdiction over Furnace Brook. On December 14, 2005, we filed an appeal of the Utah decision with the United States Court of Appeals for the Federal Circuit. On August 18, 2006, the United States Court of Appeals for the Federal Circuit denied the company's appeal. On August 18, 2005, shortly after we filed the complaint in Utah, Furnace Brook filed a complaint in the United States District Court for the Southern District of New York, alleging that certain of our business practices and our website infringe a single patent owned by Furnace Brook. On September 9, 2005, we filed an answer denying the material allegations in Furnace Brook's claims. On September 27, 2006, the United States District Court for the Southern District of New York issued a memorandum and order, Markman Hearing, which substantially adopted the company's interpretation of the Furnace Brook patent. We filed motions for summary judgment relating to the litigation and on October 6, 2006, the United States District Court for the Southern District of New York heard oral argument on those motions and on October 30, 2006, the United States District Court for the Southern District of New York granted summary judgment in favor of us, ruling that we do not infringe the Furnace Brook patent as a matter of law. The court's decision ends all claims by Furnace Brook against us, unless Furnace Brook appeals the decision. If Furnace Brook appeals, we will prosecute the appeal vigorously.

On August 11, 2005, along with a shareholder plaintiff, we filed a complaint against Gradient Analytics, Inc.; Rocker Partners, LP; Rocker Management, LLC; Rocker Offshore Management Company, Inc. and their respective principals. We, along with a second shareholder plaintiff, filed the complaint in the Superior Court of California, County of Marin. On October 12, 2005, we filed an amended complaint against the same entities alleging libel, intentional interference with prospective economic advantage and violations of California's unfair business practices act. On March 7, 2006, the court denied the defendants' demurrers to and motions to strike the amended complaint. The defendants each filed a motion to appeal the court's decision, we responded, and the California Attorney General submitted an amicus brief supporting our view; the court has ruled that this appeal stays discovery in the case. The California Court of Appeals informed the parties that it is ready to rule on the appeal without oral argument; the defendants, however, have requested oral argument. We intend to pursue this action vigorously.

On May 9, 2006 the Company received a notice of an investigation and subpoena from the Securities and Exchange Commission, Salt Lake City District Office. The subpoena requests a broad range of documents, including, among other documents, all documents relating to the Company's accounting policies, the Company's targets, projections or estimates related to financial performance, the Company's recent restatement of its financial statements, the filing of its complaint against Gradient Analytics, Inc., the development and implementation of certain new technology systems and disclosures of progress and problems with those systems, communications with and regarding investment analysts, communications regarding shareholders who did not receive the Company's proxy statement in April 2006, communications with certain shareholders, and communications regarding short selling, naked short selling, purchases and sales of Company stock, obtaining paper certificates, and stock loan or borrow of Company shares. The Company has responded to the subpoena.

ITEM 1A. RISK FACTORS

These forward-looking statements are subject to risks and uncertainties that could cause actual results and events to differ materially. For a detailed discussion of these risks and uncertainties please see Item 1A Risk Factors and the description of risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2005. These forward-looking statements speak only as of the date of this report and, except as required by law, we undertake no obligation to update forward-looking statements to reflect events or circumstances occurring after the date of this report.

Risks Relating to Overstock

We have a history of significant losses. If we do not achieve profitability, our financial condition and our stock price could suffer.

We have a history of losses and we may continue to incur operating and net losses for the foreseeable future. We incurred net losses attributable to common shares of \$12.4 million and \$24.5 million for the three months ended September 30, 2005 and 2006, respectively, and \$18.8 million and \$56.3 million for the nine months ended September 30, 2005 and 2006, respectively. As of December 31, 2005 and September 30, 2006, our accumulated deficit was \$96.8 million and \$153.1 million, respectively. We will need to generate significant revenues to achieve profitability, and we may not be able to do so. Even if we do achieve profitability, we may not be able to sustain or increase profitability on a quarterly or annual basis in the future. If our revenues grow more slowly than we anticipate, or if our operating expenses exceed our expectations, our financial results would be harmed.

We will continue to incur significant operating expenses and capital expenditures as we:

- enhance our distribution and order fulfillment capabilities;
- further improve our order processing systems and capabilities;
- develop enhanced technologies and features;
- expand our customer service capabilities to better serve our customers' needs;
- expand our product offerings, including our auctions site, our travel site and our custom design jewelry site;
- rent additional warehouse and office space;
- increase our general and administrative functions to support our operations; and
- maintain or increase our sales, branding and marketing activities, including maintaining existing or entering into new online marketing arrangements, and continuing or increasing our national television and radio branding campaigns.

Because we will incur many of these expenses before we receive any revenues from our efforts, our losses may be greater than the losses we would incur if we developed our business more slowly. Further, we base our expenses in large part on our operating plans and future revenue projections. Many of our expenses are fixed in the short term, and we may not be able to quickly reduce spending if our revenues are lower than we project. Therefore, any significant shortfall in revenues would likely harm our business, prospects, operating results and financial condition. In addition, we may find that these efforts are more expensive than we currently anticipate which would further increase our losses. Also, the timing of these expenses may contribute to fluctuations in our quarterly operating results.

If we fail to accurately forecast our expenses and revenues, our business, operating results and financial condition may suffer and the price of our securities may decline.

Our limited operating history and the rapidly evolving nature of our industry make forecasting operating results difficult. We have recently completed several large, complex and expensive infrastructure upgrades in order to increase our ability to handle larger volumes of sales and to develop or increase our ability to perform a variety of analytical procedures relating to our business, and we are continuing the work to upgrade and further expand these and other components of our infrastructure. We have experienced difficulties with the implementation of various aspects to the upgrades of our infrastructure, and have incurred increased expenses as a result of these difficulties. As a result of these expenditures, our ability to quickly reduce spending if our revenues are lower than we project is limited. Therefore, any significant shortfall in the revenues for which we have built and are continuing to build our infrastructure would likely harm our business, prospects, operating results and financial condition and cause our results of operation to fall below the expectations of public market analysts and investors. If this occurs, the price of our securities may decline.

We depend on our relationships with third party fulfillment partners for a large portion of the products that we offer for sale on our Websites. If we fail to maintain these relationships, our business will suffer.

At September 30, 2006, we had fulfillment partner relationships with approximately 490 third parties whose products we offer for sale on our Websites. These products accounted for approximately 82% of the non-BMVG products available. We do not have any long-term agreements with any of these third parties. Our agreements with third parties are terminable at will by either party immediately upon notice. In general, we agree to offer the third parties' products on our Websites and these third parties agree to provide us with information about their products, honor our customer service policies and ship the products directly to the customer. If we do not maintain our existing or build new relationships with third parties on acceptable commercial terms, we may not be able to offer a broad selection of merchandise, and customers may refuse to shop at our Websites. In addition, manufacturers may decide not to offer particular products for sale on the Internet. If we are unable to maintain our existing or build new fulfillment partner relationships or if other product manufacturers refuse to allow their products to be sold via the Internet, our business and prospects would suffer severely.

We are partially dependent on third parties to fulfill a number of our fulfillment, distribution and other retail functions. If such parties are unwilling or unable to continue providing these services, our business could be seriously harmed.

In our fulfillment partner business, although we handle returned merchandise, we continue to rely on third parties to conduct a number of other traditional retail operations with respect to their respective products that we offer for sale on our Websites, including maintaining inventory, preparing merchandise for shipment to individual customers and timely distribution of purchased

merchandise. We have no effective means to ensure that these third parties will continue to perform these services to our satisfaction or on commercially reasonable terms. In addition, because we do not take possession of these third parties' products, we are unable to fulfill these traditional retail operations ourselves. Our customers could become dissatisfied and cancel their orders or decline to make future purchases if these third parties are unable to deliver products on a timely basis. If our customers become dissatisfied with the services provided by these third parties, our reputation and the Overstock.com brand could suffer.

We rely on our relationships with manufacturers, retailers and other suppliers to obtain sufficient quantities of quality merchandise on acceptable terms. If we fail to maintain our supplier relationships on acceptable terms, our sales and profitability could suffer.

To date, we have not entered into contracts with manufacturers or liquidation wholesalers that guarantee the availability of merchandise for a set duration. Our contracts or arrangements with suppliers do not provide for the continuation of particular pricing practices and may be terminated by either party at any time. Our current suppliers may not continue to sell their excess inventory to us on current terms or at all, and we may not be able to establish new supply relationships. For example, it is difficult for us to maintain high levels of product quality and selection because none of the manufacturers, suppliers and liquidation wholesalers from whom we purchase products on a purchase order by purchase order basis have a continuing obligation to provide us with merchandise at historical levels or at all. In most cases, our relationships with our suppliers do not restrict the suppliers from selling their respective excess inventory to other traditional or online merchandise liquidators, which could in turn limit the selection of products available on our Websites. If we are unable to develop and maintain relationships with suppliers that will allow us to obtain sufficient quantities of merchandise on acceptable commercial terms, such inability could harm our business, prospects, results of operation and financial condition.

We depend upon third-party delivery services to deliver our products to our customers on a timely and consistent basis. Deterioration in our relationship with any one of these third parties could decrease our ability to track shipments, cause shipment delays, and increase our shipping costs and the number of damaged products.

We rely upon multiple third parties for the shipment of our products. Because we do not have a written long-term agreement with any of these third parties, we cannot be sure that these relationships will continue on terms favorable to us, if at all. Unexpected increases in shipping costs or delivery times, particularly during the holiday season, could harm our business, prospects, financial condition and results of operations. If our relationships with these third parties are terminated or impaired or if these third parties are unable to deliver products for us, whether through labor shortage, slow down or stoppage, deteriorating financial or business condition, responses to terrorist attacks or for any other reason, we would be required to use alternative carriers for the shipment of products to our customers. In addition, conditions such as adverse weather can prevent any carriers from performing their delivery services, which can have an adverse effect on our customers' satisfaction with us. In any of these circumstances, we may be unable to engage alternative carriers on a timely basis, upon terms favorable to us, or at all. Changing carriers would likely have a negative effect on our business, prospects, operating results and financial condition. Potential adverse consequences include:

- reduced visibility of order status and package tracking;
- delays in order processing and product delivery;
- increased cost of delivery, resulting in reduced gross margins; and
- reduced shipment quality, which may result in damaged products and customer dissatisfaction.

A significant number of merchandise returns could harm our business, financial condition and results of operations.

We allow our customers to return products and, beginning July 1, 2003, we started accepting returns of products sold through our fulfillment partners. We modify our policies relating to returns from time to time, and any policies intended to reduce the number of product returns may result in customer dissatisfaction and fewer return customers. If merchandise returns are significant, our business, prospects, financial condition and results of operations could be harmed.

If the products that we offer on our Websites do not reflect our customers' tastes and preferences, our sales and profit margins would decrease.

Our success depends in part on our ability to offer products that reflect consumers' tastes and preferences. Consumers' tastes are subject to frequent, significant and sometimes unpredictable changes. Because the products that we sell typically consist of manufacturers' and retailers'

excess inventory, we have limited control over the specific products that we are able to offer for sale. If our merchandise fails to satisfy customers' tastes or respond to changes in customer preferences, our sales could suffer and we could be required to mark down unsold inventory which would depress our profit margins. In addition, any failure to offer products in line with customers' preferences could allow our competitors to gain market share. This could have an adverse effect on our business, prospects, results of operations and financial condition.

We face risks relating to our inventory.

We directly purchase some of the merchandise that we sell on our Websites. We assume the inventory damage, theft and obsolescence risks, as well as price erosion risks for products that we purchase directly. These risks are especially significant because some of the merchandise we sell on our Websites are characterized by rapid technological change, obsolescence and price erosion (for

example, computer hardware, software and consumer electronics), and because we sometimes make large purchases of particular types of inventory. In addition, we often do not receive warranties on the merchandise we purchase. Further, beginning July 1, 2003, we started accepting returns of products sold through our fulfillment partners, and we have the risk of reselling the returned products.

In the recent past, we have recorded charges for obsolete inventory and have had to sell certain merchandise at a discount or loss. It is impossible to determine with certainty whether an item will sell for more than the price we pay for it. Because we rely heavily on purchased inventory, our success will depend on our ability to liquidate our inventory rapidly, the ability of our buying staff to purchase inventory at attractive prices relative to its resale value and our ability to manage customer returns and the shrinkage resulting from theft, loss and misrecording of inventory. If we are unsuccessful in any of these areas, we may be forced to sell our inventory at a discount or loss.

We have grown quickly and if we fail to manage our growth, our business will suffer.

We have rapidly and significantly expanded our operations, and anticipate that further significant expansion will be required to address potential growth in our customer base and market opportunities. This expansion has placed, and is expected to continue to place, a significant strain on our management, operational and financial resources. Some of our officers have no prior senior management experience at public companies. Our new employees include a number of key managerial, technical and operations personnel, and we expect to add additional key personnel in the future. To manage the expected growth of our operations and personnel, we will be required to improve existing and implement new transaction-processing, operational and financial systems, procedures and controls, and to expand, train and manage our already growing employee base. If we are unable to manage growth effectively, our business, prospects, financial condition and results of operations will be harmed.

The loss of key personnel or any inability to attract and retain additional personnel could affect our ability to successfully grow our business.

Our performance is substantially dependent on the continued services and on the performance of our senior management and other key personnel, particularly Patrick M. Byrne, our Chief Executive Officer. Our performance also depends on our ability to retain and motivate other officers and key employees. The loss of the services of any of our executive officers or other key employees for any unforeseen reason, including without limitation, illness or call to military service, could harm our business, prospects, financial condition and results of operations. We do not have employment agreements with any of our key personnel and we do not maintain key person life insurance policies. Our future success also depends on our ability to identify, attract, hire, train, retain and motivate other highly-skilled technical, managerial, editorial, merchandising, marketing and customer service personnel. Competition for such personnel is intense, and we cannot assure you that we will be able to successfully attract, assimilate or retain sufficiently qualified personnel. Our failure to retain and attract the necessary technical, managerial, editorial, merchandising, marketing and customer service personnel could harm our revenues, business, prospects, financial condition and results of operations.

We generally pay our senior management, including our executive officers, lower levels of cash compensation than we believe they might be able to earn elsewhere. Our stock option plan and performance share plan are intended to and do help us recruit and retain highly qualified personnel; however, we sometimes have difficulty retaining senior level personnel. If we are unable to retain our senior management with our current compensation structure and incentive plans, we may lose members of senior management and/or be required to modify our compensation structure and/or retention plans.

We may be unable to manage expansion into new business areas which could harm our business operations and reputation.

Our long-term strategic plan involves expansion of our operations to offer additional types of products and services. We cannot assure you that our efforts to expand our business in this manner will succeed. Because we were unable to generate significant traffic for our former B2B site, in the third quarter of 2004, we merged the B2B site into our main website, and opened our Wholesale bulk purchase program. Our failure to succeed in this market or other markets or other product or service offerings may harm our business, prospects, financial condition and results of operation. We cannot assure you that we will be able to expand our operations in a cost-effective or timely manner or that our efforts to expand will be successful. Furthermore, any new business or Website we launch that is not favorably received by consumers could damage our reputation or the Overstock.com brand. We may expand the number of categories of products we carry on our Websites and these and any other expansions of our operations would also require significant additional expenses and development and would strain our management, financial and operational resources. The lack of market acceptance of such efforts or our inability to generate satisfactory revenues from such expanded services or products to offset their cost could harm our business, prospects, financial condition and results of operations.

We may expand our international business, causing our business to become increasingly susceptible to numerous international business risks and challenges that could affect our profitability.

We have begun to expand into international markets, and in the future we may do so more aggressively. International sales and transactions are subject to inherent risks and challenges that could adversely affect our profitability, including:

- the need to develop new supplier and manufacturer relationships;
- the need to comply with additional laws and regulations to the extent applicable;
- unexpected changes in international regulatory requirements and tariffs;
- difficulties in staffing and managing foreign operations;
- longer payment cycles from credit card companies;
- greater difficulty in accounts receivable collection;
- potential adverse tax consequences;
- price controls or other restrictions on foreign currency; and
- difficulties in obtaining export and import licenses.

To the extent we generate international sales and transactions in the future, any negative impact on our international operations could negatively impact our business. In particular, gains and losses on the conversion of foreign payments into United States dollars may contribute to fluctuations in our results of operations and fluctuating exchange rates could cause reduced gross revenues and/or gross margins from non-dollar-denominated international sales.

In order to obtain future revenue growth and achieve and sustain profitability we will have to attract customers on cost-effective terms.

Our success depends on our ability to attract customers on cost-effective terms. We have relationships with online services, search engines, directories and other Websites and e-commerce businesses to provide content, advertising banners and other links that direct customers to our Websites. We rely on these relationships as significant sources of traffic to our Websites and to generate new customers. If we are unable to develop or maintain these relationships on acceptable terms, our ability to attract new customers and our financial condition could be harmed. In addition, certain of our online marketing agreements may require us to pay upfront fees and make other payments prior to the realization of the sales, if any, associated with those payments. Accordingly, if these agreements or similar agreements that we may enter into in the future fail to produce the sales that we anticipate, our results of operations will be adversely affected. We cannot assure you that we will be able to increase our revenues, if at all, in a cost-effective manner. We periodically conduct national television and radio branding and advertising campaigns. Such campaigns are expensive and may not result in the cost effective acquisition of customers.

Further, many of the parties with which we may have online-advertising arrangements could provide advertising services for other online or traditional retailers and merchandise liquidators. As a result, these parties may be reluctant to enter into or maintain relationships with us. Failure to achieve sufficient traffic or generate sufficient revenue from purchases originating from third parties may result in termination of these relationships by these third parties. Without these relationships, our revenues, business, prospects, financial condition and results of operations could suffer.

We may not be able to compete successfully against existing or future competitors.

The online liquidation services market is new, rapidly evolving and intensely competitive. Barriers to entry are minimal, and current and new competitors can launch new Websites at a relatively low cost. Our consumer Website currently competes with:

- liquidation e-tailers such as SmartBargains;
- online retailers with discount departments such as Amazon.com, Inc., eBay, Inc. and Buy.com, Inc.; and
- traditional retailers and liquidators such as Ross Stores, Inc., Walmart Stores, Inc., TJX Companies, Inc., Costco Wholesale Corporation, Target Corporation and Best Buy Co., Inc., which may or may not also have an online presence.

Our Website competes with liquidation brokers and retailers and online marketplaces such as eBay, Inc.

We expect the online liquidation services market to become even more competitive as traditional liquidators and online retailers continue to develop services that compete with our services. In addition, manufacturers and retailers may decide to create their own Websites to sell their own excess inventory and the excess inventory of third parties. Competitive pressures created by any one of our competitors, or by our competitors collectively, could harm our business, prospects, financial condition and results of operations.

Further, as a strategic response to changes in the competitive environment, we may from time to time make certain pricing, service or marketing decisions or acquisitions that could harm our business, prospects, financial condition and results of operations. For example, to the extent that we enter new lines of businesses such as third-party logistics, or discount brick and mortar retail, we would be competing with large established businesses such as APL Logistics, and Ltd., Ross Stores, Inc., respectively. We have recently entered the online auctions business in which we compete with large established businesses including eBay, Inc.

Many of our current and potential competitors described above have longer operating histories, larger customer bases, greater brand recognition and significantly greater financial, marketing and other resources than we do. In addition, online retailers and liquidation e-tailers may be acquired by, receive investments from or enter into other commercial relationships with larger, well-established and well-financed companies. Some of our competitors may be able to secure merchandise from manufacturers on more favorable terms, devote greater resources to marketing and promotional campaigns, adopt more aggressive pricing or inventory availability policies and devote substantially more resources to Website

and systems development than we do. Increased competition may result in reduced operating margins, loss of market share and a diminished brand franchise. We cannot assure you that we will be able to compete successfully against current and future competitors.

Our operating results depend on our Websites, network infrastructure and transaction-processing systems. Capacity constraints or system failures would harm our business, prospects, results of operations and financial condition.

Any system interruptions that result in the unavailability of our Websites or reduced performance of our transaction systems would reduce our transaction volume and the attractiveness of the services that we provide to suppliers and third parties and would

harm our business, prospects, operating results and financial condition.

We use internally developed systems for our Websites and certain aspects of transaction processing, including customer profiling and order verifications. We have experienced periodic systems interruptions due to server failure, which we believe will continue to occur from time to time. If the volume of traffic on our Websites or the number of purchases made by customers substantially increases, we will need to further expand and upgrade our technology, transaction processing systems and network infrastructure. We have experienced and expect to continue to experience temporary capacity constraints due to sharply increased traffic during sales or other promotions and during the holiday shopping season. Capacity constraints can cause unanticipated system disruptions, slower response times, and degradation in levels of customer service, impaired quality and delays in reporting accurate financial information.

Our transaction processing systems and network infrastructure may be unable to accommodate increases in traffic in the future. We may be unable to project accurately the rate or timing of traffic increases or successfully upgrade our systems and infrastructure to accommodate future traffic levels on our Websites. In addition, we may be unable to upgrade and expand our transaction processing systems in an effective and timely manner or to integrate any newly developed or purchased functionality with our existing systems. For example, in the third quarter 2005 we experienced difficulties with our implementation of infrastructure upgrades, which resulted in our inability to upload new products to our website for a period of approximately five weeks. Any such difficulties with our transaction processing systems or other difficulties upgrading, expanding or integrating various aspects of our systems may cause unanticipated system disruptions, slower response times, and degradation in levels of customer service, additional expense, impaired quality and speed of order fulfillment or delays in reporting accurate financial information.

If the facilities where substantially all of our computer and communications hardware is located fail, our business, results of operations and financial condition will be harmed.

Our success, and, in particular, our ability to successfully receive and fulfill orders and provide high-quality customer service, largely depends on the efficient and uninterrupted operation of our computer and communications systems. Substantially all of our computer and communications hardware is located at a single co-location facility in Salt Lake City, Utah, with a partially redundant back-up system located at our corporate headquarters in Salt Lake City. Although we have designed our back-up system in an effort to avoid or minimize service interruptions in the event of a failure of our main facility, our systems and operations are vulnerable to damage or interruption from fire, flood, power loss, telecommunications failure, terrorist attacks, acts of war, break-ins, earthquake and similar events. We do not have a formal disaster recovery plan and our business interruption insurance may be insufficient to compensate us for losses that may occur. Despite the implementation of network security measures, our servers are vulnerable to computer viruses, physical or electronic break-ins and similar disruptions, which could lead to interruptions, delays, loss of critical data or the inability to accept and fulfill customer orders. The occurrence of any of the foregoing risks could harm our business, prospects, financial condition and results of operations.

We may be unable to protect our proprietary technology or keep up with that of our competitors.

Our success depends to a significant degree upon the protection of our software and other proprietary intellectual property rights. We may be unable to deter misappropriation of our proprietary information, detect unauthorized use and take appropriate steps to enforce our intellectual property rights. In addition, our competitors could, without violating our proprietary rights, develop technologies that are as good as or better than our technology.

Our failure to protect our software and other proprietary intellectual property rights or to develop technologies that are as good as our competitors could put us at a disadvantage to our competitors. In addition, the failure of the third parties whose products we offer for sale on our Websites to protect their intellectual property rights, including their domain names, could impair our operations. These failures could harm our business, results of operations and financial condition.

If we do not respond to rapid technological changes, our services could become obsolete and we could lose customers.

To remain competitive, we must continue to enhance and improve the functionality and features of our e-commerce businesses. We may face material delays in introducing new services, products and enhancements. If this happens, our customers may forgo the use of our Websites and use those of our competitors. The Internet and the online commerce industry are rapidly changing. If competitors introduce new products and services using new technologies or if new industry standards and practices emerge, our existing Websites and our proprietary technology and systems may become obsolete. Our failure to respond to technological change or to adequately maintain, upgrade and develop our computer network and the systems used to process customers' orders and payments could harm our business, prospects, financial condition and results of operations.

We may not be able to obtain trademark protection for our marks, which could impede our efforts to build brand identity.

We have filed trademark applications with the Patent and Trademark Office seeking registration of certain service marks and trademarks. There can be no assurance that our applications will be successful or that we will be able to secure significant protection for our service marks or trademarks in the United States or elsewhere as we expand internationally. Our competitors or others could adopt product or service marks similar to our marks, or try to prevent us from using our marks, thereby impeding our ability to build brand identity and possibly leading to customer confusion. Any claim by another party against us or customer confusion related to our

35

trademarks, or our failure to obtain trademark registration, could negatively affect our business.

We may not be able to enforce protection of our intellectual property rights under the laws of other countries.

As we continue to expand internationally, we are subject to risks of doing business internationally as related to our intellectual property, including:

- legal uncertainty regarding liability for the listings and other content provided by our users, including uncertainty as a result of less Internet-friendly legal systems, unique local laws, and lack of clear precedent or applicable law; and
- differing intellectual property laws, which may provide insufficient protection for our intellectual property.

Our business and reputation may be harmed by the listing or sale of pirated, counterfeit or illegal items by third parties, and by intellectual property litigation.

We have received in the past, and we anticipate we will receive in the future, communications alleging that certain items listed or sold through our Websites infringe third-party copyrights, trademarks and trade names or other intellectual property rights or that we have otherwise infringed third parties' past, current or future intellectual property rights. For example, in October 2003, Tiffany (NJ) Inc. and Tiffany and Company filed a complaint against us in the United States District Court for the Southern District of New York alleging that we have distributed counterfeit and otherwise unauthorized Tiffany product in violation of federal copyright and trademark law and related state laws. In addition, in January and February 2005, Tiffany filed additional complaints against us asserting similar claims. We reached a confidential agreement that settled all of these cases and all of the cases were dismissed on July 14, 2006.

We may be unable to prevent third parties from listing unlawful goods, and we may be subject to allegations of civil or criminal liability for unlawful activities carried out by third parties through our Websites. In the future, we may implement measures to protect against these potential liabilities that could require us to spend substantial resources and/or to reduce revenues by discontinuing certain service offerings. Any costs incurred as a result of liability or asserted liability relating to the sale of unlawful goods or the unlawful sale of goods could harm our revenues, business, prospects, financial condition and results of operations.

Resolving litigation or claims regarding patents or other intellectual property, whether meritorious or not, could be costly, time-consuming, cause service delays, divert our management and key personnel from our business operations, require expensive or unwanted changes in our methods of doing business or require us to enter into costly royalty or licensing agreements, if available. As a result, these claims could harm our business.

Negative publicity generated as a result of the foregoing could damage our reputation, harm our business and diminish the value of our brand name.

Gradient Analytics and Rocker Partners, L.P. Litigation

In August 2005 we filed an unfair business practice lawsuit against Gradient Analytics, Rocker Partners, L.P. and others, alleging that the defendants have conspired to denigrate Overstock's business for personal profit. In October 2005 we filed an amended complaint alleging additional causes of action and articulating in greater detail the allegations against the defendants. Overstock's President, Dr. Patrick Byrne, has appeared on nationally syndicated television programs and elsewhere to discuss the litigation. The use of management's time and attention in connection with the litigation and related matters may reduce the time management is able to spend on other aspects of our business, which may have adverse effects on other aspects of our business. To the extent that any such adverse effects exceed any benefits we may realize from pursuing the litigation, our business, prospects, financial condition and results of operation may suffer.

We may be liable if third parties misappropriate our customers' personal information.

If third parties are able to penetrate our network security or otherwise misappropriate our customers' personal information or credit card information, or if we give third parties improper access to our customers' personal information or credit card information, we could be subject to liability. This liability could include claims for unauthorized purchases with credit card information, impersonation or other similar fraud claims. This liability could also include claims for other misuses of personal information, including unauthorized marketing purposes. These claims

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

could result in litigation. Liability for misappropriation of this information could adversely affect our business. In addition, the Federal Trade Commission and state agencies have been investigating various Internet companies regarding their use of personal information. We could incur additional expenses if new regulations regarding the use of personal information are introduced or if government agencies investigate our privacy practices.

We rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure transmission of confidential information such as customer credit card numbers. We cannot assure you that advances in computer capabilities, new discoveries in the field of cryptography or other events or developments will not result in a compromise or breach of the algorithms that we use to protect customer transaction data. If any such compromise of our security were to occur, it could harm our reputation, business, prospects, financial condition and results of operations. A party who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. We may be

required to expend significant capital and other resources to protect against such security breaches or to alleviate problems caused by such breaches. We cannot assure you that our security measures will prevent security breaches or that failure to prevent such security breaches will not harm our business, prospects, financial condition and results of operations.

We may be subject to product liability claims that could be costly and time consuming.

We sell products manufactured for us by third parties, some of which may be defective. If any product that we sell were to cause physical injury or injury to property, the injured party or parties could bring claims against us as the manufacturer and/or retailer of the product. Our insurance coverage may not be adequate to cover every claim that could be asserted. If a successful claim were brought against us in excess of our insurance coverage, it could adversely affect our business. Even unsuccessful claims could result in the expenditure of funds and management time and could have a negative impact on our business.

We may face risks relating to our recent acquisition of Ski West, Inc. and the development of our travel business.

We acquired all of the capital stock of Ski West, Inc., an on-line travel company, on July 1, 2005 and integrated Ski West with our travel operations to form OTravel.com, Inc (our travel business). There can be no assurance about the future performance of our travel business. We may encounter unforeseen operating or other difficulties. The integration of any acquired business can be difficult, and unforeseen problems can arise. Our travel business operates on a software platform that is different from the ones we use in the rest of our business, and it may be difficult or expensive for us to achieve any necessary or desirable integration. Although we have operated a travel service in the past, the travel business operated by Ski West is substantially greater than the travel business we operated, and will involve new and potentially unforeseen risks, including exposure to seasonal and other fluctuations in leisure travel, including disruptions resulting from domestic or international terrorist incidents or expectations or perceptions of leisure travelers regarding the safety and desirability of leisure travel.

We have significant indebtedness.

In connection with our sale of our 3.75% Convertible Senior Notes (the Senior Notes) in November 2004, we incurred \$120.0 million of indebtedness, due December 1, 2011. Under the repurchase program approved by our Board of Directors in 2005, we retired \$33.0 million and \$10.0 million of the Senior Notes in June and November 2005 for \$27.9 million and \$7.8 million in cash, respectively. As a result of the note retirements, we recognized a gain of \$6.2 million for the year ended December 31, 2005, net of the associated unamortized discount of \$1.2 million. As of September 30, 2006, \$77.0 million of the Senior Notes remained outstanding. As a result of this indebtedness, our principal and interest payment obligations increased substantially. The degree to which we are leveraged could materially and adversely affect our ability to obtain additional financing for working capital, acquisitions or other purposes and could make us more vulnerable to industry downturns and competitive pressures. Our ability to meet our debt service obligations is dependent upon our future performance, which will be subject to financial, business and other factors affecting our operations, many of which are beyond our control.

We may be unable to generate sufficient cash flow to satisfy our debt service obligations.

Our ability to generate cash flow from operations to make interest payments on our debt obligations will depend on our future performance, which will be affected by a range of economic, competitive and business factors. We cannot control many of these factors, including general economic conditions and the health of the internet retail industry. If our operations do not generate sufficient cash flow from operations to satisfy our debt service obligations, we may need to borrow additional funds to make these payments or undertake alternative financing plans, such as refinancing or restructuring our debt, or reducing or delaying capital investments and acquisitions. Additional funds or alternative financing may not be available to us on favorable terms, or at all. Our inability to generate sufficient cash flow from operations or obtain additional funds or alternative financing on acceptable terms could have a material adverse effect on our business, prospects, financial condition and results of operations.

Risks Relating to our Auctions Site Business

Our auctions site is a new business.

Our auctions site began operation in September 2004. The online auctions business is a new business for us, and we cannot ensure that our expansion into the online auctions business will succeed. Our entry into the online auctions business will require us to devote substantial financial, technical, managerial and other resources to the business. It will also expose us to additional risks, including legal and regulatory risks, and it will require us to compete with established businesses having substantially greater experience in the online auctions business and substantially greater resources than we have.

Our auction business may be subject to a variety of regulatory requirements.

Many states and other jurisdictions, including Utah, where our company is located, have regulations governing the conduct of traditional auctions and the liability of traditional auctioneers in conducting auctions. Although the vast majority of these regulations clearly contemplated only traditional auctions, not online auctions, the potential application of these types of regulations to online auction sites is not clear. We are aware that several states and some foreign jurisdictions have attempted to impose such regulations on other companies operating online auction sites or on the users of those sites. In addition, certain states have laws or regulations that do expressly apply to online auction site services. Although we do not expect these laws to have a significant effect on

our auction site business, we will incur costs in complying with these laws, and we may from time to time be required to make changes in our business that may increase our costs, reduce our revenues, cause us to prohibit the listing of certain items in certain locations, or make other changes that may adversely affect our auctions business.

Current and future laws could affect our auctions business.

Like our shopping site business, our auction site business is subject to the same laws and regulations that apply to other companies conducting business on and off the Internet. In addition, our auction site business may be affected by other laws and regulations, such as those that expressly apply to online auction site services. Further, because of the wide range of items that users of our auctions service may choose to list on the site, a variety of additional laws and regulations may apply to transactions between users of our site, such as those requiring a license to sell or purchase certain items or mandating particular disclosures in connection with an offer or sale of an item. To the extent that such current or future laws or regulations prevent users from selling items on our auction site, they could harm our business.

Our business may be harmed if our auction site is used for unlawful transactions.

The law regarding the potential liability of an online auction service for the activities of its users is not clear. We prohibit the listing of numerous categories of items in an effort to reduce the possibility that users of our auction site will engage in an unlawful transaction. However, we cannot assure that users of the site will comply with all laws and regulations applicable to them and their transactions, and we may be subject to allegations of civil or criminal liability for any unlawful activities conducted by them. Any costs we incur as a result of any such allegations, or as a result of actual or alleged unlawful transactions utilizing our site, or in our efforts to prevent any such transactions, may harm our business. In addition, any negative publicity we receive regarding any such transactions or allegations may damage our reputation, our ability to attract new customers to our main shopping site, and the Overstock.com brand name generally.

Fraudulent activities using our auctions site and disputes between users of our auctions site may harm our business.

We are aware that other companies operating online auction services have periodically received complaints from users alleging that they have not received the purchase price or the goods they expected to receive, and that in some cases users have been arrested and convicted for engaging in fraudulent activities using those companies' auction sites. We may receive similar complaints. We do not have the ability to require users of our services to fulfill their obligations to make payments or to deliver items. We are aware that other companies periodically receive complaints from buyers about the quality of the items they purchase, requests for reimbursement of amounts paid, and communications threatening or commencing legal actions against them. We may receive similar complaints, requests and communications in connection with our auctions site business.

We are subject to risks associated with information transmitted through our service.

The law relating to the liability of online services companies for information carried on or disseminated through their services is currently unsettled. Claims could be made against online services companies under both U.S. and foreign law for defamation, libel, invasion of privacy, negligence, copyright or trademark infringement, or other theories based on the nature and content of the materials disseminated through their services. We are aware that private lawsuits seeking to impose liability under a number of these theories have been brought against other companies operating auction sites. In addition, domestic and foreign legislation has been proposed that would prohibit or impose liability for the transmission over the Internet of certain types of information. Our service permits users to make comments regarding other users. Although all such comments are generated by users and not by us, we are aware that claims of defamation or other injury have been made against other companies operating auction services in the past and could be made in the future against us for comments made by users. Recent court decisions have narrowed the scope of the immunity provided to Internet service providers like us under the Communications Decency Act. This trend, if continued, may increase our potential liability to third parties for the user-provided content on our site.

Difficulties or negative publicity associated with our auctions business could affect our main shopping site business.

Any significant operational or other difficulties we encounter with our auctions business could damage our reputation, our ability to attract new customers to our main shopping site, and the Overstock.com brand name generally. Negative publicity resulting from actual or alleged fraudulent or deceptive conduct by users of our auctions site could also damage our reputation, our ability to attract new customers to our main shopping site, and the Overstock.com brand name generally.

Risks Relating to the Internet Industry

Our success is tied to the continued use of the Internet and the adequacy of the Internet infrastructure.

Our future revenues and profits, if any, substantially depend upon the continued widespread use of the Internet as an effective medium of business and communication. Factors which could reduce the widespread use of the Internet include:

- actual or perceived lack of security of information or privacy protection;
- possible disruptions, computer viruses or other damage to the Internet servers or to users' computers; and
- excessive governmental regulation.

38

Customers may be unwilling to use the Internet to purchase goods.

Our long-term future depends heavily upon the general public's willingness to use the Internet as a means to purchase goods. E-commerce remains a relatively new concept, and large numbers of customers may not begin or continue to use the Internet to purchase goods. The demand for and acceptance of products sold over the Internet are highly uncertain, and most e-commerce businesses have a short track record. If consumers are unwilling to use the Internet to conduct business, our business may not develop profitably.

The security risks or perception of risks of e-commerce may discourage customers from purchasing goods from us.

In order for the e-commerce market to develop successfully, we and other market participants must be able to transmit confidential information securely over public networks. Third parties may have the technology or know-how to breach the security of customer transaction data. Any breach could cause customers to lose confidence in the security of our Websites and choose not to purchase from our Websites. If someone is able to circumvent our security measures, he or she could destroy or steal valuable information or disrupt our operations. Concerns about the security and privacy of transactions over the Internet could inhibit the growth of the Internet and e-commerce. Our security measures may not effectively prohibit others from obtaining improper access to our information. Third parties may target our customers directly with fraudulent identity theft schemes designed to appear as legitimate communications from us. Any security breach or fraud perpetrated on our customers could expose us to increased costs and to risks of loss, litigation and liability and could seriously disrupt our operations.

Credit card fraud could adversely affect our business.

We do not carry insurance against the risk of credit card fraud, so the failure to adequately control fraudulent credit card transactions could reduce our net revenues and our gross margin. We have implemented technology to help us detect the fraudulent use of credit card information. However, we may in the future suffer losses as a result of orders placed with fraudulent credit card data even though the associated financial institution approved payment of the orders. Under current credit card practices, we may be liable for fraudulent credit card transactions because we do not obtain a cardholder's signature. If we are unable to detect or control credit card fraud, our liability for these transactions could harm our business, results of operation or financial condition.

If one or more states successfully assert that we should collect sales or other taxes on the sale of our merchandise or the merchandise of third parties that we offer for sale on our Websites, our business could be harmed.

We do not currently collect sales or other similar taxes for physical shipments of goods into states other than Utah and Indiana. One or more local, state or foreign jurisdictions may seek to impose sales tax collection obligations on us and other out-of-state companies that engage in online commerce. Our business could be adversely affected if one or more states or any foreign country successfully asserts that we should collect sales or other taxes on the sale of our merchandise.

Existing or future government regulation could harm our business.

We are subject to the same federal, state and local laws as other companies conducting business on the Internet. Today there are relatively few laws specifically directed towards conducting business on the Internet. However, due to the increasing popularity and use of the Internet, many laws and regulations relating to the Internet are being debated at the state and federal levels. These laws and regulations could cover issues such as user privacy, freedom of expression, pricing, fraud, quality of products and services, taxation, advertising, intellectual property rights and information security. Applicability to the Internet of existing laws governing issues such as property ownership, copyrights and other intellectual property issues, taxation, libel, obscenity and personal privacy could also harm our business. For example, United States and foreign laws regulate our ability to use customer information and to develop, buy and sell mailing lists. The vast majority of these laws was adopted prior to the advent of the Internet, and do not contemplate or address the unique issues raised thereby. Those laws that do reference the Internet are only beginning to be interpreted by the courts and their applicability and reach are therefore uncertain. These current and future laws and regulations could harm our business, results of operation and financial condition.

Laws or regulations relating to privacy and data protection may adversely affect the growth of our Internet business or our marketing efforts.

We are subject to increasing regulation at the federal, state and international levels relating to privacy and the use of personal user information. For example, we are subject to various telemarketing laws that regulate the manner in which we may solicit future suppliers and customers. Such regulations, along with increased governmental or private enforcement, may increase the cost of growing our business. In addition, many jurisdictions have laws that limit the uses of personal user information gathered online or offline or require companies to establish privacy

Edgar Filing: OVERSTOCK.COM, INC - Form 10-Q

policies. The Federal Trade Commission has adopted regulations regarding the collection and use of personal identifying information obtained from children under 13. Proposed legislation in this country and existing laws in foreign countries require companies to establish procedures to notify users of privacy and security policies, obtain consent from users for collection and use of personal information, and/or provide users with the ability to access, correct and delete personal information stored by us. Additional legislation regarding data security and privacy has been proposed in Congress. These data protection regulations may restrict our ability to collect demographic and personal information from users, which could be costly

or harm our marketing efforts, and could require us to implement new and potentially costly processes, procedures and/or protective measures.

Risks Relating to the Securities Markets and Ownership of Our Securities

The price of our securities may be volatile and you may lose all or a part of your investment.

Our common stock has been publicly traded only since May 30, 2002. The market price of our common stock has been subject to significant fluctuations since the date of our initial public offering. These fluctuations could continue. It is possible that in some future periods our results of operations may be below the expectations of public market analysts and investors. If this occurs, the market price of our securities may decline. Among the factors that could affect the market price of our securities are as follows:

- changes in securities analysts' recommendations or estimates of our financial performance or publication of research reports by analysts;
- changes in market valuations of similar companies;
- announcements by us or our competitors of significant contracts, acquisitions, commercial relationships, joint ventures or capital commitments;
- general market conditions;
- actual or anticipated fluctuations in our operating results;
- intellectual property or litigation developments;
- changes in our management team;
- economic factors unrelated to our performance; and
- our issuance of additional shares of stock or other securities.

In addition, the securities markets have experienced significant price and trading volume fluctuations. These broad market fluctuations may adversely affect the trading price of our securities. In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been instituted against that company. Such litigation could result in substantial cost and a diversion of management's attention and resources.

Our quarterly operating results are volatile and may adversely affect the market price of our securities.

Our future revenues and operating results are likely to vary significantly from quarter to quarter due to a number of factors, many of which are outside our control, and any of which could harm our business. As a result, we believe that quarterly comparisons of our operating results are not necessarily meaningful and that you should not rely on the results of one quarter as an indication of our future performance. In addition to the other risk factors described in this report, additional factors that have caused and/or could cause our quarterly operating results to fluctuate and in turn affect the market price of our securities include:

- increases in the cost of advertising;
- our inability to retain existing customers or encourage repeat purchases;
- the extent to which our existing and future marketing agreements are successful;

- price competition that results in lower profit margins or losses;
- the amount and timing of operating costs and capital expenditures relating to the expansion of our business operations and infrastructure;
- the amount and timing of our purchases of inventory;
- our inability to manage distribution operations or provide adequate levels of customer service;
- our ability to successfully integrate operations and technologies from acquisitions or other business combinations;
- entering into new lines of products;
- our ability to attract users to our new auctions site; and
- our inability to replace the loss of significant customers.

Our operating results may fluctuate depending on the season, and such fluctuations may affect the market price of our securities.

We have experienced and expect to continue to experience fluctuations in our operating results because of seasonal fluctuations in traditional retail patterns. Sales in the retail and wholesale industry tend to be significantly higher in the fourth calendar quarter of each year than in the preceding three quarters due primarily to increased shopping activity during the holiday season. However, there can be no assurance that our sales in the fourth quarter will exceed those of the preceding quarters or, if the fourth quarter sales do exceed those of the preceding quarters, that we will be able to manage the increased sales effectively. Further, we generally increase our inventories substantially in anticipation of holiday season shopping activity, which has a negative effect on our cash flow. Securities analysts and investors may inaccurately estimate the effects of seasonality on our results of operations in one or more future quarters and, consequently, our operating results may fall below expectations, causing the market price of our securities to decline.

We do not intend to pay dividends on our non-redeemable common stock, and you may lose the entire amount of your investment in our common stock.

We have never declared or paid any cash dividends on our non-redeemable common stock and do not intend to pay dividends on our non-redeemable common stock for the foreseeable future. We intend to invest our future earnings, if any, to fund our growth. Therefore, you will not receive any funds without selling your shares. We cannot assure that you will receive a positive return on your investment when you sell your shares or that you will not lose the entire amount of your investment.

Our Amended and Restated Certificate of Incorporation, Amended and Restated Bylaws and the Delaware General Corporation Law contain anti-takeover provisions which could discourage or prevent a takeover, even if an acquisition would be beneficial to our stockholders.

Several provisions of our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws could discourage potential acquisition proposals and could delay or prevent a change in control of our company even if that change in control would be beneficial to our stockholders. For example, only one-third of our board of directors will be elected at each of our annual meetings of stockholders, which will make it more difficult for a potential acquirer to change the management of our company, even after acquiring a majority of the shares of our common stock. These provisions, which cannot be amended without the approval of two-thirds of our stockholders, could diminish the opportunities for a stockholder to participate in tender offers, including tender offers at a price above the then current market value of our common stock. In addition, our board of directors, without further stockholder approval, may issue preferred stock, with such terms as the board of directors may determine, that could have the effect of delaying or preventing a change in control of our company. The issuance of preferred stock could also adversely affect the voting powers of the holders of common stock, including the loss of voting control to others. We are also afforded the protections of Section 203 of the Delaware General Corporation Law, which could delay or prevent a change in control of our company or could impede a merger, consolidation, takeover or other business combination involving our company or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our company.

Potential Stock Manipulation

We have filed an unfair business practice lawsuit against Gradient Analytics, Rocker Partners, L.P. and others, alleging that the defendants have conspired to denigrate Overstock's business for personal profit, as well as an amended complaint alleging additional causes of action and articulating in greater detail the allegations against the defendants. We believe that the defendants have engaged in unlawful actions and have caused substantial harm to Overstock, and that certain of the defendants have made efforts to drive the market price of Overstock's common stock down. To the extent that the defendants or other persons engage in any such actions or other take any other actions to interfere with or destroy or harm Overstock's existing and/or prospective business relationships with its suppliers, bankers, customers, lenders, investors, prospective investors or others, our business, prospects, financial condition and results of operation may suffer, and the price of our common stock may be more volatile than it might otherwise be and/or may trade at prices below those that might prevail in the absence of any such efforts.
