These estimates exclude the impact of expenses related to equity-based compensation and related tax benefits, potential one-time restructuring charges of up to \$100 million that may be incurred in connection with the transaction, and the potential impact from non-cash intangible amortization resulting from purchase price accounting. In addition, these estimates assume continued net revenue growth as well as expense reductions and other synergies that may or may not be realized. Estimates for future periods are subject to significant inherent uncertainties, which increase with periods farther into the future. Actual results may differ materially and are subject to risks, including the risks described in the Cautionary Note below.
