PIMCO High Income Fund Letter to Shareholders
November 1, 2007
Dear Shareholder:
We are pleased to provide you with the semi-annual report for PIMCO High Income Fund (the Fund ) for the six-months ended September 30, 2007.
During the six-month period, instability in subprime mortgages contributed to significant risk aversion among bond investors. As a result, higher-income U.S. bonds underperformed the broad bond market. The Merrill Lynch High Yield Master II Index returned 0.66% for the period, compared with the Lehman Brothers Aggregate Bond Index s return of 2.31%.
For performance and specific information on the Fund please refer to the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Fund s shareholder servicing agent at (800) 331-1710. In addition, a wide range of information and resources is available on our Web site, www.allianzinvestors.com/closedendfunds.
Together with Allianz Global Investors Fund Management LLC, the Fund s investment manager, and Pacific Investment Management Company LLC, the Fund s sub-adviser, we thank you for investing with us.
We remain dedicated to serving your financial needs.
Sincerely,
Hans W. Kertess  Brian S. Shlissel

Chairman

President & Chief Executive Officer

9.30.07 | PIMCO High Income Fund Semi-Annual Report 1

#### PIMCO High Income Fund Fund Insights/Performance & Statistics

September 30, 2007 (unaudited)

For the fiscal six-month period ended September 30, 2007, the Fund returned (0.95)% on net asset value (NAV) and (4.01)% on market price.

Security selection in the consumer cyclical sector hindered Fund performance, where auto loans underperformed auto manufacturers and the broader consumer cyclical sector.

Minimal exposure to the lodging sector was negative for Fund performance, as the sector saw a strong rebound for most of 2007, following lows last year.

Exposure to high yield bank loans, which came under considerable pressure in the latter half of the period and underperformed bonds, detracted from performance.

The Fund used interest rates swaps to adjust duration and target specific areas of yield-curve exposure during the period. Credit default swaps were used either as a substitute for purchasing corporate bonds or as a means of hedging corporate bond exposure.

A relatively strong emphasis on the healthcare sector, which outperformed the overall high yield market, was a significant contributor to Fund performance during the reporting period.

As the fallout in the subprime mortgage sector and falling home prices weighed heavily on home construction and real estate bonds, avoiding both industry categories benefited Fund performance.

A larger-than-market weighting in utility bonds added to returns, as the sector outperformed the high yield market, on the whole, in excess of 100 basis points.

Tactically adding exposure to local currency and dollar-denominated emerging market sovereigns, which outperformed the high yield market, added to the Fund s returns.

Total Return <sup>(1)</sup> :	Market Prio	ce	Net Asset Value	(NAV)
6 months	(4.01) %	,	(0.95)	%
1 year	3.09 %	,	8.69	%
3 year	11.98 %	,	9.15	%
Commencement of Operations (4/30/03) to 9/30/07	10.89 %	,	11.38	%

Common Share Market Price/NAV Performance:	Market Price/NAV:	
Commencement of Operations (4/30/03) to 9/30/07	Market Price	\$14.57
	NAV	\$14.31
NAV	Premium to NAV	1.82%
Market Price	Market Price Yield <sup>(2)</sup>	10.04%

Moody s Rating (as a % of total investments)

(1) <b>Past performance is no guarantee of future results.</b> Total return is determined by subtracting the initial investment from the value at the end of the period and dividing the remainder by the initial investment and expressing the result as a percentage. The calculation assumes that all income dividends and capital gain distributions have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.
An investment in the Fund involves risk, including the loss of principal. Investment return, price, yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is total assets applicable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.
(2) Market Price Yield is determined by dividing the annualized fiscal year to date (six-months ended September 30, 2007) dividends to common shareholders by the market price per common share at September 30, 2007.

#### **Notes to Schedule of Investments:**

- Private Placement. Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$108,132,225, representing 4.21% of total investments.
- Illiquid security. (b)
- These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a (c) premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the LIBOR or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of senior loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty.
- 144A Security Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in (d) transactions exempt from registration typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- Security in default. (e)
- (f) Fair-valued security. Securities with an aggregate value of \$41,338,139, representing 1.61% of total investments, have been fair-valued.
- Credit-linked trust certificate. (g)
