ING Prime Rate Trust

(Registrant)

Supplement dated June 30, 2008 to the Registrant's 5,000,000 Common Shares Prospectus dated June 30, 2008

The Prospectus for the Registrant is hereby supplemented with the following information relating to Information Regarding Trading of ING's U.S. Mutual Funds.

Information Regarding Trading of ING's U.S. Mutual Funds

As discussed in earlier supplements, ING Investments, LLC (Investments), the adviser to the ING Funds, has reported to the Boards of Directors/Trustees (the Boards) of the ING Funds that, like many U.S. financial services companies, Investments and certain of its U.S. affiliates have received informal and formal requests for information since September 2003 from various governmental and self-regulatory agencies in connection with investigations related to mutual funds and variable insurance products. Investments has advised the Boards that it and its affiliates have cooperated fully with each request.

In addition to responding to regulatory and governmental requests, Investments reported that management of U.S. affiliates of ING Groep N.V., including Investments (collectively, ING), on their own initiative, have conducted, through independent special counsel and a national accounting firm, an extensive internal review of trading in ING insurance, retirement, and mutual fund products. The goal of this review was to identify any instances of inappropriate trading in those products by third parties or by ING investment professionals and other ING personnel. ING's internal review related to mutual fund trading is now substantially completed. ING has reported that, of the millions of customer relationships that ING maintains, the internal review identified several isolated arrangements allowing third parties to engage in frequent trading of mutual funds within ING's variable insurance and mutual fund products, and identified other circumstances where frequent trading occurred, despite measures taken by ING intended to combat market timing. ING further reported that each of these arrangements has been terminated and fully disclosed to regulators. The results of the internal review were also reported to the independent members of the Boards.

Investments has advised the Boards that most of the identified arrangements were initiated prior to ING's acquisition of the businesses in question in the U.S. Investments further reported that the companies in question did not receive special benefits in return for any of these arrangements, which have all been terminated.

Based on the internal review, Investments has advised the Boards that the identified arrangements do not represent a systemic problem in any of the companies that were involved.

Despite the extensive internal review conducted through independent special counsel and a national accounting firm, there can be no assurance that the instances of inappropriate trading reported to the Boards are the only instances of such trading respecting the ING Funds.

Investments reported to the Boards that ING is committed to conducting its business with the highest standards of ethical conduct with zero tolerance for noncompliance. Accordingly, Investments advised the Boards that ING management was disappointed that its voluntary internal review identified these situations. Viewed in the context of the breadth and magnitude of its U.S. business as a whole, ING management does not believe that ING's acquired companies had systemic ethical or compliance issues in these areas. Nonetheless, Investments reported that given ING's refusal to tolerate any lapses, it has taken the steps noted below, and will continue to seek opportunities to further strengthen the internal controls of its affiliates.

- ING has agreed with the ING Funds to indemnify and hold harmless the ING Funds from all damages resulting from wrongful conduct by ING or its employees or from ING's internal investigation, any investigations conducted by any governmental or self-regulatory agencies, litigation or other formal proceedings, including any proceedings by the SEC. Investments reported to the Boards that ING management believes that the total amount of any indemnification obligations will not be material to ING or its U.S. business.

- ING updated its Code of Conduct for employees reinforcing its employees' obligation to conduct personal trading activity consistent with the law, disclosed limits, and other requirements.

Other Regulatory Matters.

The New York Attorney General (the NYAG) and other federal and state regulators are also conducting broad inquiries and investigations involving the insurance industry. These initiatives currently focus on, among other things, compensation and other sales incentives; potential conflicts of interest; potential anti-competitive activity; reinsurance; marketing practices (including suitability); specific product types (including group annuities and indexed annuities); fund selection for investment products and brokerage sales; and disclosure. It is likely that the scope of these industry investigations will further broaden before they conclude. ING has received formal and informal requests in connection with such investigations, and is cooperating fully with each request.

Other federal and state regulators could initiate similar actions in this or other areas of ING's businesses. These regulatory initiatives may result in new legislation and regulation that could significantly affect the financial services industry, including businesses in which ING is engaged. In light of these and other developments, ING continuously reviews whether modifications to its business practices are appropriate. At this time, in light of the current regulatory factors, ING U.S. is actively engaged in reviewing whether any modifications in our practices are appropriate for the future.

There can be no assurance that these matters, or the adverse publicity associated with them, will not result in increased fund redemptions, reduced sale of fund shares, or other adverse consequences to ING Funds.

5,000,000 Common Shares

ING Prime Rate Trust

This Prospectus sets forth concisely the information about ING Prime Rate Trust ("Trust") that a prospective investor ought to know before investing. You should read it carefully before you invest, and keep it for future reference.

The Trust has filed with the Securities and Exchange Commission ("SEC") a Statement of Additional Information ("SAI") dated June 30, 2008 containing additional information about the Trust. The SAI is incorporated by reference in its entirety into this Prospectus. You may obtain a free copy of the SAI, annual shareholder report and semi-annual shareholder report by contacting the Trust at (800) 992-0180 or by writing to the Trust at 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. The Trust's SAI and annual and semi-annual shareholder reports are available, free of charge, on the Trust's website at www.ingfunds.com. The Prospectus, SAI and other information about the Trust are also available on the SEC's website (<http://www.sec.gov>). The table of contents for the SAI appears on page [] of this Prospectus.

Common Shares of the Trust trade on the New York Stock Exchange ("NYSE") under the symbol PPR.

Market fluctuations and general economic conditions can adversely affect the Trust. There is no guarantee that the Trust will achieve its investment objective. Investment in the Trust involves certain risks and special considerations, including risks associated with the Trust's use of leverage. See "Risk Factors and Special Considerations" on pages [] and [] for a discussion of any factors that make investment in the Trust speculative or high risk.

Neither the SEC nor any state securities commission has approved or disapproved these securities, or determined that this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

INTRODUCTION TO ING PRIME RATE TRUST

Risk is the potential that your investment will lose money or not earn as much as you hope. All mutual funds have varying degrees of risk, depending upon the securities in which they invest.

This Trust involves certain risks and special considerations, including risks associated with investing in below investment grade assets and risks associated with the Trust's use of borrowing and other leverage strategies. See "Risk Factors and Special Considerations" beginning on pages [] and [].

Please read this Prospectus carefully to be sure you understand the principal investment strategies and risks associated with the Trust. You should consult the SAI for a complete list of the principal investment strategies and risks.

If you have any questions about the Trust, please call your investment professional or us at 1-800-992-0180.

This Prospectus is designed to help you make an informed decision about making an investment in the Trust. Please read it carefully and retain it for future reference.

Who should invest in the Trust?

THE TRUST MAY BE A SUITABLE INVESTMENT IF YOU:

are seeking a high level of current income; and

are willing to accept the risks associated with an investment in a leveraged portfolio consisting primarily of senior loans that are typically below investment grade credit quality.

DESCRIPTION OF THE TRUST

The Trust is a diversified, closed-end management investment company that seeks to provide investors with as high a level of current income as is consistent with the preservation of capital. The Trust seeks to achieve this objective by investing in a professionally managed portfolio comprised primarily of senior loans, an investment typically not available directly to individual investors.

Since the senior loans in the Trust's portfolio typically are below investment grade credit quality and the portfolio is leveraged, the Trust has speculative characteristics. The Trust cannot guarantee that it will achieve its investment objective.

Common Shares of the Trust trade on the New York Stock Exchange "NYSE" under the symbol PPR.

The Trust's investment adviser is ING Investments, LLC. The Trust's sub-adviser is ING Investment Management Co.

If you have any questions, please call (800) 992-0180.

Introduction to ING Prime Rate Trust

1

PROSPECTUS SYNOPSIS

The following synopsis is qualified in its entirety by reference to the more detailed information appearing elsewhere in this Prospectus.

DESCRIPTION OF THE TRUST

The Trust

The Trust is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended ("1940 Act"). It was organized as a Massachusetts business trust on December 2, 1987. As of June 15, 2008, the Trust's net asset value ("NAV") per Common Share was \$[].

NYSE Listed

As of June 15, 2008, the Trust had [] Common Shares outstanding, which are traded on the NYSE under the symbol PPR. At that date, the last reported sales price of a Common Share of the Trust was \$[].

Investment Objective

To provide investors with as high a level of current income as is consistent with the preservation of capital. There is no assurance that the Trust will achieve its investment objective.

Adviser/Sub-Adviser

The Trust's investment adviser is ING Investments, LLC ("ING Investments" or "Adviser"), an Arizona limited liability company. As of March 31, 2008, ING Investments managed approximately \$[] billion in assets.

The Adviser is an indirect, wholly-owned subsidiary of ING Groep N.V. ("ING Groep") (NYSE: ING). ING Groep is one of the largest financial services organizations in the world with approximately 120,000 employees. Based in Amsterdam, ING Groep offers an array of banking, insurance and asset management services to both individual and institutional investors.

The Adviser receives an annual fee, payable monthly, in an amount equal to 0.80% of the Trust's average daily gross asset value, minus the sum of the Trust's accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Trust and the liquidation preference of any outstanding preferred shares) ("Managed Assets"). This definition includes the assets acquired through the Trust's use of leverage. ING Investment Management Co. ("ING IM" or "Sub-Adviser") serves as sub-adviser to the Trust. See "Investment Management and Other Service Providers - Sub-Adviser" on page []. ING IM is an affiliate of the Adviser.

Distributions

Income dividends on Common Shares accrue and are declared and paid monthly. Income dividends may be distributed in cash or reinvested in additional full and fractional shares of the Trust through the Trust's Shareholder Investment Program.

Principal Investment Strategies

The Trust seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in U.S. dollar denominated floating rate secured senior loans ("Senior Loans"). The Trust will provide shareholders with at least 60 days' prior notice of any change in this investment policy. Under normal circumstances, the Trust invests at least 80% of its assets in Senior Loans made to corporations or other business entities organized under U.S. or Canadian law and that are domiciled in the United States and in U.S. territories and possessions or Canada.

The Senior Loans in which the Trust invests either hold the most senior position in the capital structure of the borrower or hold an equal ranking with other senior debt or have characteristics that the Adviser or Sub-Adviser believes justifies treatment as senior debt. These Senior Loans are typically below investment grade quality.

The Trust typically makes its investments in Senior Loans by purchasing a portion of the overall loan, *i.e.*, the Trust becomes one of a number of lenders investing in the loan. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps, and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counterparty risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed.

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

The Trust seeks to minimize such counterparty risk by purchasing such investments from large, well established and highly rated counterparties.

Prospectus Synopsis

2

PROSPECTUS SYNOPSIS

Other Investment Strategies and Policies

Assets not invested in Senior Loans may be invested in unsecured loans, subordinated loans, tranches of floating rate asset-backed securities, including structured notes, short-term debt securities, and equities acquired in connection with investments in loans. See "Investment Objective and Policies" on page [].

Loans in which the Trust invests typically have interest rates which reset at least quarterly and may reset as frequently as daily. The maximum duration of an interest rate reset on any loan in which the Trust may invest is one year. In order to achieve overall reset balance, the Trust will ordinarily maintain a dollar-weighted average time until the next interest rate adjustment on its loans of 90 days or less.

Normally at least 80% of the Trust's portfolio will be invested in Senior Loans with maturities of one to ten years. The maximum maturity on any loan in which the Trust may invest is ten years.

To seek to increase the yield on the Common Shares, the Trust may engage in lending its portfolio securities. Such lending will be fully secured by investment grade collateral held by an independent agent.

The Trust may hold a portion of its assets in short-term interest bearing instruments. Moreover, in periods when, in the opinion of the Adviser or Sub-Adviser, a temporary defensive position is appropriate, up to 100% of the Trust's assets may be held in cash or short-term interest bearing instruments. The Trust may not achieve its investment objective when pursuing a temporary defensive position.

The Trust may invest up to 20% of its total assets in loans, secured or unsecured, to borrowers that are organized or located in countries outside the United States and U.S. territories and possessions or Canada. The Trust may invest up to 15% of its total assets in investments denominated in the Organization for Economic Co-operation and Development ("OECD") currencies (including the Euro), other than the U.S. dollar. The Trust will engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations. Investment in foreign borrowers involves special risks, including that foreign borrowers may be subject to:

- less rigorous regulatory, accounting and reporting requirements than U.S. borrowers;
- differing legal systems and laws relating to creditors' rights;
- the potential inability to enforce legal judgments;
- economic adversity that would result if the value of the borrower's non-U.S. dollar denominated revenues and assets were to fall because of fluctuations in currency values; and
- the potential for political, social and economic adversity in the foreign borrower's country.

The Trust may engage in executing repurchase and reverse repurchase agreements.

Leverage

To seek to increase the yield on the Common Shares, the Trust employs financial leverage by borrowing money and issuing preferred shares. The timing and terms of leverage will be determined by the Trust's Board of Trustees ("Board") in consultation with the Adviser or Sub-Adviser. See "Risk Factors and Special Considerations – Leverage" on page [].

Borrowings

Under the 1940 Act, the Trust may borrow up to an amount equal to 33 $\frac{1}{3}$ % of its total assets (including the proceeds of the borrowings) less all liabilities other than borrowings. The Trust's obligations to holders of its debt are senior to its ability to pay dividends on, or repurchase, Common Shares and preferred shares, or to pay holders of Common Shares and preferred shares in the event of liquidation.

If you have any questions, please call (800) 992-0180.

PROSPECTUS SYNOPSIS

Preferred Shares

Under the 1940 Act, the Trust may issue preferred shares so long as immediately after any issuance of preferred shares the value of the Trust's total assets (less all Trust liabilities and indebtedness that is not senior indebtedness) is at least twice the amount of the Trust's senior indebtedness plus the involuntary liquidation preference of all outstanding shares.

The Trust is authorized to issue an unlimited number of shares of a class of preferred stock in one or more series. In November 2000, the Trust issued 3,600 shares each of Series M, T, W, Th and F Auction Rate Cumulative Preferred Shares, \$0.01 par value, \$25,000 liquidation preference per share, for a total issuance of \$450 million ("Preferred Shares"). The Trust's obligations to holders of the Preferred Shares are senior to its ability to pay dividends on, or repurchase, Common Shares, or to pay holders of Common Shares in the event of liquidation.

The 1940 Act also requires that the holders of the Preferred Shares, voting as a separate class, have the right to:

- elect at least two trustees at all times; and

- elect a majority of the trustees at any time when dividends on any series of Preferred Shares are unpaid for two full years.

In each case, the holders of Common Shares voting separately as a class will elect the remaining trustees.

Since early February 2008, the Trust has not received hold orders and purchase requests for its Preferred Shares during their weekly auctions that equaled the full amount of such shares. As a result, under the terms of the Preferred Shares, the amount sold by each selling shareholder was reduced pro rata or to zero. In addition, the dividend rate on such preferred shares, which is normally set by means of a Dutch auction procedure, automatically reset to the maximum rate permitted under the Preferred Shares program. That maximum rate is 150% of the applicable commercial paper base rate on the day of the auction. It is unclear whether the dividend rate for the Preferred Shares will be set by means of an auction again in the future. The Trust and its Board of Trustees are evaluating potential options to restore liquidity to and/or provide additional refinancing options for this market in the context of regulatory guidelines, as well as the economic and tax implications for both common and preferred shareholders.

Diversification

The Trust maintains a diversified investment portfolio, an investment strategy which seeks to limit exposure to any one issuer or industry.

As a diversified investment company, the Trust may not make investments in any one issuer (other than the U.S. government) if, immediately after such purchase or acquisition, more than 5% of the value of the Trust's total assets would be invested in such issuer, or the Trust would own more than 25% of any outstanding issue. The Trust will consider a borrower on a loan, including a loan participation, to be the issuer of that loan. In addition, with respect to a loan under which the Trust does not have privity with the borrower or would not have a direct cause of action against the borrower in the event of the failure of the borrower to pay scheduled principal or interest, the Trust will also separately meet the foregoing requirements and consider each interpositioned bank (a lender from which the Trust acquires a loan) to be an issuer of the loan. This investment strategy is a fundamental policy that may not be changed without shareholder approval. With respect to no more than 25% of its total assets, the Trust may make investments that are not subject to the foregoing restrictions.

Concentration

In addition, a maximum of 25% of the Trust's total assets, measured at the time of investment, may be invested in any one industry. This investment strategy is also a fundamental policy that may not be changed without shareholder approval.

PROSPECTUS SYNOPSIS

Plan of Distribution

The Common Shares are offered by the Trust through the Trust's Shareholder Investment Program. The Shareholder Investment Program allows participating shareholders to reinvest all dividends in additional shares of the Trust, and also allows participants to purchase additional Common Shares through optional cash investments in amounts ranging from a minimum of \$100 to a maximum of \$100,000 per month. The Trust and ING Funds Distributor, LLC ("ING Funds Distributor") reserve the right to reject any purchase order. Please note that cash, travelers checks, third-party checks, money orders and checks drawn on non-U.S. banks (even if payment may be effected through a U.S. bank) generally will not be accepted. Common Shares may be issued by the Trust under the Shareholder Investment Program only if the Trust's Common Shares are trading at a premium to NAV. If the Trust's Common Shares are trading at a discount to NAV, Common Shares purchased under the Shareholder Investment Program will be purchased on the open market. See "Plan of Distribution" on pages [] and []. Shareholders may elect to participate in the Shareholder Investment Program by telephoning the Trust or submitting a completed Participation Form to DST Systems, Inc. ("DST").

Common Shares also may be offered pursuant to privately negotiated transactions between the Trust or ING Funds Distributor and individual investors. Common Shares of the Trust issued in connection with privately negotiated transactions will be issued at the greater of (i) NAV per Common Share of the Trust's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily market price of the Trust's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. See "Plan of Distribution" on pages [] and [].

Administrator

The Trust's administrator is ING Funds Services, LLC ("Administrator"). The Administrator is an affiliate of the Adviser. The Administrator receives an annual fee, payable monthly, in a maximum amount equal to 0.25% of the Trust's Managed Assets.

RISK FACTORS AND SPECIAL CONSIDERATIONS

Credit Risk on Senior Loans

The Trust invests a substantial portion of its assets in below investment grade Senior Loans and other below investment grade assets. Below investment grade loans involve a greater risk that borrowers may not make timely payment of the interest and principal due on their loans. They also involve a greater risk that the value of such loans could decline significantly. If borrowers do not make timely payments of the interest due on their loans, the yield on the Trust's Common Shares will decrease. If borrowers do not make timely payment of the principal due on their loans, or if the value of such loans decreases, the Trust's NAV will decrease.

Interest Rate Risk

Changes in short-term market interest rates will directly affect the yield on the Trust's Common Shares. If short-term market interest rates fall, the yield on the Trust's Common Shares will also fall. To the extent that the interest rate spreads on loans in the Trust's portfolio experience a general decline, the yield on the Trust's Common Shares will fall and the value of the Trust's assets may decrease. Conversely, when short-term market interest rates rise, because of the lag between changes in such short-term rates and the resetting of the floating rates on assets in the Trust's portfolio, the impact of rising rates will be delayed to the extent of such lag.

Discount from NAV

As with any security, the market value of the Common Shares may increase or decrease from the amount that you paid for the Common Shares. The Trust's Common Shares may trade at a discount to NAV. This is a risk separate and distinct from the risk that the Trust's NAV per Common Share may decrease.

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

If you have any questions, please call (800) 992-0180.

Prospectus Synopsis

5

PROSPECTUS SYNOPSIS

Leverage

The Trust's use of leverage through borrowings and the issuance of Preferred Shares can adversely affect the yield on the Trust's Common Shares. To the extent that the Trust is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Trust's Common Shares will decrease. In addition, in the event of a general market decline in the value of assets such as those in which the Trust invests, the effect of that decline will be magnified in the Trust because of the additional assets purchased with the proceeds of the leverage. As of June 15, 2008, the Trust had \$[] million of total leverage, including \$[] million of borrowings under two credit facilities and \$[] million of Preferred Shares (issued and outstanding).

Limited Secondary Market For Loans

Because of the limited secondary market for loans, the Trust may be limited in its ability to sell loans in its portfolio in a timely fashion and/or at a favorable price. An increase in demand for loans may adversely affect the rate of interest payable on new loans acquired by the Trust, and it may also increase the price of loans in the secondary market. A decrease in the demand for loans may adversely affect the price of loans in the Trust's portfolio, which could cause the Trust's NAV to decline.

Impact of Shareholder Investment Program and Privately Negotiated Transactions

The issuance of Common Shares through the Shareholder Investment Program and/or through privately negotiated transactions may have an adverse effect on prices in the secondary market for the Trust's Common Shares by increasing the number of Common Shares available for sale. In addition, the Common Shares may be issued at a discount to the market price for such Common Shares, which may put downward pressure on the market price for Common Shares of the Trust.

Prospectus Synopsis

6

WHAT YOU PAY TO INVEST TRUST EXPENSES

The cost you pay to invest in the Trust includes the expenses incurred by the Trust. In accordance with SEC requirements, the table below shows the expenses of the Trust, including interest expense on borrowings, as a percentage of the average net assets of the Trust, and not as a percentage of gross assets or Managed Assets. By showing expenses as a percentage of net assets, expenses are not expressed as a percentage of all of the assets that are invested for the Trust. The Table below assumes that the Trust has issued \$450 million of Preferred Shares and has borrowed an amount equal to 25% of its Managed Assets. For information about the Trust's expense ratios if the Trust had not borrowed or issued Preferred Shares, see "Risk Factors and Special Considerations Annual Expenses Without Borrowings or Preferred Shares."

Shareholder Transaction Expenses

Shareholder Investment Program Fees	NONE
-------------------------------------	------

Privately Negotiated Transactions

Commission (as a percentage of offering price)	3.00%
--	-------

Annual Expenses (as a percentage of net assets attributable to Common Shares)

Management and Administrative Fees ⁽¹⁾	[]%
---	------

Interest Expense on Borrowed Funds	[]%
------------------------------------	------

Other Operating Expenses ⁽²⁾	[]%
---	------

Total Annual Expenses ⁽³⁾	[]%
--------------------------------------	------

⁽¹⁾ Pursuant to the Investment Advisory Agreement with the Trust, ING Investments is paid a fee of 0.80% of the Trust's Managed Assets. Pursuant to its Administration Agreement with the Trust, the Trust's Administrator is paid a fee of 0.25% of the Trust's Managed Assets. See "Investment Management and Other Service Providers The Administrator."

⁽²⁾ Other Operating Expenses are based on estimated amounts for the current fiscal year, which, in turn, are based on other operating expenses for the fiscal year ended February 29, 2008, and do not include the expenses of borrowing.

⁽³⁾ If the Total Annual Expenses of the Trust were expressed as a percentage of Managed Assets (assuming the same 25% borrowing), the Total Annual Expense ratio would be []%.

If you have any questions, please call 1-800-992-0180.

What You Pay to Invest Trust Expenses

WHAT YOU PAY TO INVEST TRUST EXPENSES

Examples

The following hypothetical Examples show the amount of the expenses that an investor in the Trust would bear on a \$1,000 investment that is held for the different time periods in the table. The examples assume that all dividends and other distributions are reinvested at NAV and that the percentage amounts listed under Total Annual Expenses remain the same in the years shown. The tables and the assumption in the hypothetical examples of a 5% annual return are required by regulations of the SEC applicable to all investment companies. The assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Trust's Common Shares. For more complete descriptions of certain of the Trust's costs and expenses, see "Investment Management and Other Service Providers."

Example #1

The following Example applies to shares issued in connection with the Trust's Shareholder Investment Program. This example does not take into account whether such shares are purchased at a discount or a premium to the Trust's NAV.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return and where the Trust has borrowed in an amount equal to 25% of its Managed Assets	\$	\$	\$	\$
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return and where the Trust has not borrowed	\$	\$	\$	\$

Example #2

The following Example applies to shares issued in connection with privately negotiated transactions, which have the maximum front-end sales load of 3%.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return and where the Trust has borrowed in an amount equal to 25% of its Managed Assets	\$	\$	\$	\$
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return and where the Trust has not borrowed	\$	\$	\$	\$

The purpose of each table is to assist you in understanding the various costs and expenses that an investor in the Trust will bear directly or indirectly.

The foregoing Examples should not be considered a representation of future expenses, and actual expenses may be greater or less than those shown.

FINANCIAL HIGHLIGHTS

Financial Highlights Table

The table below sets forth selected financial information. The financial information for the most recent 5 fiscal years has been derived from the financial statements in the Trust's annual shareholder report dated as of February 28, 2007. The information in the table below has been audited by KPMG LLP, an independent registered public accounting firm. A report of the Trust's independent registered public accounting firm along with the Trust's financial statements for the most recent 5 fiscal years is included in the Trust's annual shareholder report dated as of February 28, 2007. A free copy of the annual shareholder report may be obtained by calling (800) 992-0180.

	Years Ended February 28 or February 29,

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

- (1) Total investment return calculations are attributable to common shares.
 - (2) Total investment return at closing market price measures the change in the market value of your investment assuming reinvestment of dividends and capital gain distributions, if any, in accordance with the provisions of the Trust's dividend reinvestment plan.
 - (3) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends and capital gain distributions in accordance with the provisions of the dividend reinvestment plan. This calculation differs from total investment return because it excludes the effects of changes in the market values of the Trust's shares.
 - (4) Asset coverage represents the total assets available for settlement of Preferred Stockholder's interest and notes payables in relation to the Preferred Shareholder interest and notes payable balance outstanding. The Preferred Shares were first offered November 2, 2000.
 - (5) Ratios do not reflect the effect of dividend payments to Preferred Shareholders; income ratios reflect income earned on assets attributable to the Preferred Shares; ratios do not reflect any add-back for the borrowings.
 - (6) The Adviser agreed to reduce its fee for a period of three years from the Expiration Date of the November 12, 1996 Rights Offering to 0.60% of the average daily net assets, plus the proceeds of any outstanding borrowings, over \$1.15 billion.
 - (7) Calculated on total expenses before impact of earnings credits.
- (A) Had the Trust not amortized premiums and accreted discounts, the ratio of net investment income to average net assets including Preferred Shares would have been 6.43% for the year ended February 28, 2002.
- (B) Had the Trust not amortized premiums and accreted discounts, the ratio of net investment income to average net assets plus borrowings applicable to common shares would have been 6.82% for the year ended February 28, 2002.
- (C) Had the Trust not amortized premiums and accreted discounts, the ratio of net investment income to average net assets applicable to common shares would have been 9.22% for the year ended February 28, 2002.

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The Trust's investment objective is to provide investors with as high a level of current income as is consistent with the preservation of capital. The Trust seeks to achieve this investment objective by investing in the types of assets described below:

1. Senior Loans. Under normal circumstances, at least 80% of the Trust's net assets, plus the amount of any borrowings for investment purposes, will be invested in Senior Loans. This investment policy may be changed without shareholder approval so long as the Trust provides its shareholders with at least 60 days' prior notice of any changes in this investment policy. Under normal circumstances, the Trust invests at least 80% of its assets in Senior Loans made to corporations or other business entities organized under U.S. or Canadian law and that are domiciled in the United States and in U.S. territories and possessions or Canada.

The Senior Loans in which the Trust invests either hold the most senior position in the capital structure of the borrower or hold an equal ranking with other senior debt or have characteristics (such as a senior position secured by liens on a borrower's assets) that the Adviser or Sub-Adviser believes justify treatment as senior debt. These Senior Loans are typically below investment grade credit quality.

The Trust typically makes its investments in Senior Loans by purchasing a portion of the overall loan, *i.e.*, the Trust becomes one of a number of lenders investing in the loan. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counterparty risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed. The Trust seeks to minimize such counterparty risk by purchasing such investments only from large, well established and highly rated counter-parties.

2. Other Investments. Under normal circumstances, the Trust may invest up to 20% of its total assets, measured at the time of investment, in a combination of one or more of the following types of investments ("Other Investments"):

loans to borrowers organized outside the United States and U.S. territories and possessions or Canada;

unsecured floating rate loans, notes and other debt instruments;

floating rate subordinated loans;

tranches of floating rate asset-backed securities, including structured notes;

short-term debt securities; and

equity securities incidental to investments in loans.

3. Cash and Short-Term Instruments. Under normal circumstances, the Trust may invest in cash and/or short-term instruments. During periods when, in the opinion of the Adviser or Sub-Adviser, a temporary defensive posture in the market is appropriate, the Trust may hold up to 100% of its assets in cash and/or short-term instruments.

4. Other Investment Strategies. The Trust may lend its portfolio securities, on a short-term or long-term basis, in an amount equal to up to 33 $\frac{1}{3}$ % of its total assets.

Fundamental Diversification Policies

1. Industry Diversification. The Trust may invest in any industry. The Trust may not invest more than 25% of its total assets in any single industry.

2. Borrower Diversification. As a diversified investment company, the Trust may not make investments in any one issuer (other than the U.S. government) if, immediately after such purchase or acquisition, more than 5% of the value of the Trust's total assets would be invested in such issuer, or the Trust would own more than 25% of any outstanding issue. The Trust will consider the borrower on a loan, including a loan participation, to be the issuer of such loan. With respect to no more than 25% of its total assets, the Trust may make investments that are not subject to the foregoing restrictions.

These fundamental diversification policies may only be changed with approval by a majority of all shareholders, including the vote of a majority of the holders of Preferred Shares, and holders of any other preferred shares, voting separately as a class.

Investment Policies

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

The Adviser and Sub-Adviser follow certain investment policies set by the Trust's Board. Some of those policies are set forth below. Please refer to the SAI for additional information on these and other investment policies.

1. Limitations on currencies. The Trust's investments must be denominated in U.S. dollars, provided that the Trust may invest up to 15% of its total assets in investments denominated in the OECD currencies (including the Euro), other than the U.S. dollar. The Trust will engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations.

2. Maturity. Although the Trust has no restrictions on portfolio maturity, under normal circumstances, at least 80% of the Trust's

If you have any questions, please call 1-800-992-0180.

Investment Objective and Policies

13

INVESTMENT OBJECTIVE AND POLICIES

total assets will be invested in assets with remaining maturities of one to ten years. The maximum maturity on any loan in which the Trust can invest is ten years.

3. Interest Rate Resets. Under normal circumstances, at least 80% of the Trust's total assets will be invested in assets with rates of interest which reset either daily, monthly, or quarterly. The maximum duration of an interest rate reset on any loan investment in which the Trust may invest is one year. In addition, under normal circumstances, the Trust will maintain a dollar-weighted average time until the next interest rate adjustment on its loan investments of 90 days or less.

4. Limitations on Other Investments. The Trust may also invest up to 20% of its total assets, measured at the time of investment, in Other Investments. The following additional limitations apply to Other Investments:

a. Unsecured Debt Instruments. The Trust may not invest in unsecured floating rate loans, notes and other debt instruments, in an aggregate amount that exceeds 20% of the Trust's total assets, measured at the time of investment.

b. Equities. The Trust may acquire equity securities only as an incident to the purchase or ownership of a loan or in connection with a reorganization of a borrower or its debt.

c. Subordinated Loans. The Trust may not invest in floating rate subordinated loans, whether or not secured, in an aggregated amount that exceeds 5% of its total assets, measured at the time of investment.

5. Investment Quality; Credit Analysis. Loans in which the Trust invests generally are rated below investment grade credit quality or are unrated. In acquiring a loan, the Adviser or Sub-Adviser will consider some or all of the following factors concerning the borrower: ability to service debt from internally generated funds; adequacy of liquidity and working capital; appropriateness of capital structure; leverage consistent with industry norms; historical experience of achieving business and financial projections; the quality and experience of management; and adequacy of collateral coverage. The Adviser or Sub-Adviser performs its own independent credit analysis of each borrower. In so doing, the Adviser or Sub-Adviser may utilize information and credit analyses from agents that originate or administer loans, other lenders investing in a loan, and other sources. The Adviser or Sub-Adviser also may communicate directly with management of the borrowers. These analyses continue on a periodic basis for any Senior Loan held by the Trust. See "Risk Factors and Special Considerations Credit Risk on Senior Loans."

6. Use of Leverage. The Trust may borrow money and issue preferred shares to the fullest extent permitted by the 1940 Act. See "Policy on Borrowing" and "Policy on Issuance of Preferred Shares" below.

7. Short-term Instruments. Short-term instruments in which the Trust invests may include (i) commercial paper rated A-1 by Standard and Poor's Rating Corporation ("S&P") or P-1 by Moody's Investors Service, Inc. ("Moody's"), or of comparable quality as determined by the Adviser or Sub-Adviser (ii) certificates of deposit, banker's acceptances, and other bank deposits and obligations, and (iii) securities issued or guaranteed by the U.S. government, its agencies or instrumentalities.

Policy on Borrowing

The Trust has a policy of borrowing for investment purposes. The Trust seeks to use proceeds from borrowing to acquire loans and other investments which pay interest at a rate higher than the rate the Trust pays on borrowings. Accordingly, borrowing has the potential to increase the Trust's total income available to holders of its Common Shares.

The Trust may issue notes, commercial paper, or other evidences of indebtedness and may be required to secure repayment by mortgaging, pledging, or otherwise granting a security interest in the Trust's assets. The terms of any such borrowings are subject to the provisions of the 1940 Act, and also subject to the more restrictive terms of the credit agreements relating to borrowings and additional guidelines imposed by rating agencies which are more restrictive than the provisions of the 1940 Act. The Trust is permitted to borrow an amount equal to up to 33¹/₃%, or such other percentage permitted by law, of its total assets (including the amount borrowed) less all liabilities other than borrowings. See "Risk Factors and Special Considerations Leverage" and "Risk Factors and Special Considerations Restrictive Covenants and 1940 Act Restrictions."

Policy on Issuance of Preferred Shares

The Trust has a policy of issuing preferred shares for investment purposes. The Trust seeks to use the proceeds from preferred shares to acquire loans and other investments which pay interest at a rate higher than the dividends payable on preferred shares. The terms of the issuance of preferred shares are subject to the 1940 Act and to additional guidelines imposed by rating agencies, which are more restrictive than the provisions of the 1940 Act. Under the 1940 Act, the Trust may issue preferred shares so long as immediately after any issuance of preferred shares the value of the Trust's total assets (less all Trust liabilities and indebtedness that is not senior indebtedness) is at least twice the amount of the Trust's senior indebtedness plus the involuntary liquidation preference of all outstanding shares. In November 2000, the Trust issued 18,000 Preferred Shares for a total of \$450 million. See "Risk Factors and Special Considerations Leverage."

THE TRUST'S INVESTMENTS

As stated above under "Investment Objective and Policies," the Trust will invest primarily in Senior Loans. This section contains a discussion of the characteristics of Senior Loans and the manner in which those investments are made.

Senior Loan Characteristics

Senior Loans are loans that are typically made to business borrowers to finance leveraged buy-outs, recapitalizations, mergers, stock repurchases and internal growth. Senior Loans generally hold the most senior position in the capital structure of a borrower and are usually secured by liens on the assets of the borrowers, including tangible assets such as cash, accounts receivable, inventory, property, plant and equipment, common and/or preferred stock of subsidiaries, and intangible assets including trademarks, copyrights, patent rights and franchise value. The Trust may also receive guarantees as a form of collateral.

Senior loans are typically structured to include two or more types of loans within a single credit agreement. The most common structure is to have a revolving loan and a term loan. A revolving loan is a loan that can be drawn upon, repaid fully or partially, and then the repaid portions can be drawn upon again. A term loan is a loan that is fully drawn upon immediately and once repaid it cannot be drawn upon again. Sometimes there may be two or more term loans, and they may be secured by different collateral and have different repayment schedules and maturity dates. In addition to revolving loans and term loans, senior loan structures can also contain facilities for the issuance of letters of credit, and may contain mechanisms for lenders to pre-fund letters of credit through credit-linked deposits.

The Trust typically invests only in the term loan portions of Senior Loan structures, although it does sometimes invest in the revolving loan portions and the pre-funded letters of credit portions.

By virtue of their senior position and collateral, Senior Loans typically provide lenders with the first right to cash flows or proceeds from the sale of a borrower's collateral if the borrower becomes insolvent (subject to the limitations of bankruptcy law, which may provide higher priority to certain claims such as, for example, employee salaries, employee pensions and taxes). This means Senior Loans are generally repaid before unsecured bank loans, corporate bonds, subordinated debt, trade creditors, and preferred or common stockholders.

Senior Loans typically pay interest at least quarterly at rates which equal a fixed percentage spread over a base rate such as the London Inter-Bank Offered Rate ("LIBOR"). For example, if LIBOR were 3% and the borrower were paying a fixed spread of 2.50%, the total interest rate paid by the borrower would be 5.50%. Base rates and, therefore, the total rates paid on Senior Loans float, *i.e.*, they change as market rates of interest change.

Although a base rate such as LIBOR can change every day, loan agreements for Senior Loans typically allow the borrower the ability to choose how often the base rate for its loan will change. A single loan may have multiple reset periods at the same time, with each reset period applicable to a designated portion of the loan. Such periods can range from one day to one year, with most borrowers choosing monthly or quarterly reset periods. During periods of rising interest rates, borrowers will tend to choose longer reset periods, and during periods of declining interest rates, borrowers will tend to choose shorter reset periods. The fixed spread over the base rate on a Senior Loan typically does not change.

Senior Loans generally are arranged through private negotiations between a borrower and several financial institutions represented by an agent who is usually one of the originating lenders. In larger transactions, it is common to have several agents; however, generally only one such agent has primary responsibility for ongoing administration of a Senior Loan. Agents are typically paid fees by the borrower for their services. The agent is primarily responsible for negotiating the loan agreement which establishes the terms and conditions of the Senior Loan and the rights of the borrower and the lenders. The agent also is responsible for monitoring collateral and for exercising remedies available to the lenders such as foreclosure upon collateral.

Loan agreements may provide for the termination of the agent's agency status in the event that it fails to act as required under the relevant loan agreement, becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy. Should such an agent, lender or assignor with respect to an assignment interpositioned between the Trust and the borrower become insolvent or enter FDIC receivership or bankruptcy, any interest in the Senior Loan of such person and any loan payment held by such person for the benefit of the Trust should not be included in such person's or entity's bankruptcy estate. If, however, any such amount were included in such person's or entity's bankruptcy estate, the Trust would incur certain costs and delays in realizing payment or could suffer a loss of principal or interest. In this event, the Trust could experience a decrease in the NAV.

The Trust acquires Senior Loans from lenders such as commercial and investment banks, insurance companies, finance companies, other investment companies and private investment funds.

Investment by the Trust

The Trust typically invests in Senior Loans primarily by purchasing an assignment of a portion of a Senior Loan from a third-party, either in connection with the original loan transaction (*i.e.*, in the primary market) or after the

If you have any questions, please call 1-800-992-0180.

THE TRUST'S INVESTMENTS

initial loan transaction (*i.e.*, in the secondary market). When the Trust purchases a Senior Loan in the primary market, it may share in a fee paid to the original lender. When the Trust purchases a Senior Loan in the secondary market, it may pay a fee to, or forego a portion of interest payments from, the lender making the assignment. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counter party risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed. Unlike an assignment, as described below, the Trust does not have a direct contractual relationship with the borrower. The Trust seeks to minimize such counter party risk by purchasing such investments only from large, well established and highly rated counter parties.

Except for rating agency guidelines imposed on the Trust's portfolio while it has outstanding Preferred Shares, there is no minimum rating or other independent evaluation of a borrower limiting the Trust's investments and most Senior Loans that the Trust may acquire, if rated, will be rated below investment grade credit quality. See "Risk Factors and Special Considerations – Credit Risk on Senior Loans."

Assignments. When the Trust is a purchaser of an assignment, it succeeds to all the rights and obligations under the loan agreement of the assigning lender and becomes a lender under the loan agreement with the same rights and obligations as the assigning lender. These rights include the ability to vote along with the other lenders on such matters as enforcing the terms of the loan agreement (*e.g.*, declaring defaults, initiating collection action, *etc.*). Taking such actions usually requires at least a vote of the lenders holding a majority of the investment in the loan, and may require a vote by lenders holding two-thirds or more of the investment in the loan. Because the Trust typically does not hold a majority of the investment in any loan, it will not be able by itself to control decisions that require a vote by the lenders.

Acquisition Costs. When the Trust acquires an interest in a Senior Loan in the primary market, it typically acquires the loan at par less its portion of the fee paid to all originating lenders. When the Trust acquires an interest in a Senior Loan, in the secondary market, it may be at par, but typically the Trust will do so at premium or discount to par.

The Trust's Investments

16

RISK FACTORS AND SPECIAL CONSIDERATIONS

Risk is inherent in all investing. The following discussion summarizes some of the risks that you should consider before deciding whether to invest in the Trust. For additional information about the risks associated with investing in the Trust, see "Additional Information About Investments and Investment Techniques" in the SAI.

Credit Risk on Senior Loans

The Trust's ability to pay dividends and repurchase its Common Shares is dependent upon the performance of the assets in its portfolio. That performance, in turn, is subject to a number of risks, chief among which is credit risk on the underlying assets.

Credit risk is the risk of nonpayment of scheduled interest or principal payments. In the event a borrower fails to pay scheduled interest or principal payments on a Senior Loan held by the Trust, the Trust will experience a reduction in its income and a decline in the market value of the Senior Loan, which will likely reduce dividends and lead to a decline in the NAV of the Trust's Common Shares. See "The Trust's Investments Investment by the Trust."

Senior Loans generally involve less risk than unsecured or subordinated debt and equity instruments of the same issuer because the payment of principal and interest on Senior Loans is a contractual obligation of the issuer that, in most instances, takes precedence over the payment of dividends, or the return of capital, to the issuer's shareholders and payments to bond holders. The Trust generally invests in Senior Loans that are secured with specific collateral. However, the value of the collateral may not equal the Trust's investment when the loan is acquired or may decline below the principal amount of the Senior Loan subsequent to the Trust's investment. Also, to the extent that collateral consists of stock of the borrower or its subsidiaries or affiliates, the Trust bears the risk that the stock may decline in value, be relatively illiquid, or may lose all or substantially all of its value, causing the Senior Loan to be undercollateralized. Therefore, the liquidation of the collateral underlying a Senior Loan may not satisfy the issuer's obligation to the Trust in the event of non-payment of scheduled interest or principal, and the collateral may not be readily liquidated.

In the event of the bankruptcy of a borrower, the Trust could experience delays and limitations on its ability to realize the benefits of the collateral securing the Senior Loan. Among the credit risks involved in a bankruptcy are assertions that the pledge of collateral to secure a loan constitutes a fraudulent conveyance or preferential transfer that would have the effect of nullifying or subordinating the Trust's rights to the collateral.

The Senior Loans in which the Trust invests are generally rated lower than investment grade credit quality, *i.e.*, rated lower than "Baa" by Moody's or "BBB" by S&P, or have been issued by issuers who have issued other debt securities which, if unrated, would be rated lower than investment grade credit quality. Investment decisions will be based largely on the credit analysis performed by the Adviser or Sub-Adviser, and not on rating agency evaluation. This analysis may be difficult to perform. Information about a Senior Loan and its issuer generally is not in the public domain. Moreover, Senior Loans are not often rated by any nationally recognized rating service. Many issuers have not issued securities to the public and are not subject to reporting requirements under federal securities laws. Generally, however, issuers are required to provide financial information to lenders and information may be available from other Senior Loan participants or agents that originate or administer Senior Loans.

Interest Rate Risk

During normal market conditions, changes in market interest rates will affect the Trust in certain ways. The principal effect will be that the yield on the Trust's Common Shares will tend to rise or fall as market interest rates rise and fall. This is because almost all of the assets in which the Trust invests pay interest at rates which float in response to changes in market rates. However, because the interest rates on the Trust's assets reset over time, there will be an imperfect correlation between changes in market rates and changes to rates on the portfolio as a whole. This means that changes to the rate of interest paid on the portfolio as a whole will tend to lag behind changes in market rates.

Market interest rate changes may also cause the Trust's NAV to experience moderate volatility. This is because the value of a loan asset in the Trust is partially a function of whether it is paying what the market perceives to be a market rate of interest for the particular loan, given its individual credit and other characteristics. If market interest rates change, a loan's value could be affected to the extent the interest rate paid on that loan does not reset at the same time. As discussed above, the rates of interest paid on the loans in which the Trust invests have a weighted average reset period that typically is less than 90 days. Therefore, the impact of the lag between a change in market interest rates and the change in the overall rate on the portfolio is expected to be minimal.

To the extent that changes in market rates of interest are reflected not in a change to a base rate such as LIBOR but in a change in the spread over the base rate which is payable on loans of the type and quality in which the Trust invests, the Trust's NAV could also be adversely affected. This is because the value of a loan asset in the Trust is partially a function of whether it is paying what the market perceives to be a market rate of interest for the particular loan, given its individual credit and other characteristics. However, unlike changes in market rates of interest for which there is only a temporary lag before the portfolio reflects those changes, changes in a loan's value based on changes in the market spread on loans in the Trust's portfolio may be of longer duration.

Finally, substantial increases in interest rates may cause an increase in loan defaults as borrowers may lack the resources to meet higher debt service requirements.

Pre-Payment Risk

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

If a Senior Loan in which the Trust invests is paid off sooner than scheduled, and interest rates are falling, the Trust will be forced to reinvest this money at lower yields.

Changes to NAV

The NAV of the Trust is expected to change in response to a variety of

Risk Factors and Special Considerations

17

RISK FACTORS AND SPECIAL CONSIDERATIONS

factors, primarily in response to changes in the creditworthiness of the borrowers on the loans in which the Trust invests. See "Risk Factors and Special Considerations – Credit Risk on Senior Loans" above. Changes in market interest rates may also have an impact on the Trust's NAV. See "Risk Factors and Special Considerations – Interest Rate Risk." Another factor which can affect the Trust's NAV is changes in the pricing obtained for the Trust's assets. See "Transaction Policies – Valuation of the Trust's Assets."

Discount From NAV

The Trust's Common Shares have traded in the market above, at, and below NAV since March 9, 1992, when the Trust's shares were initially listed on the NYSE. The reasons for the Trust's Common Shares trading at a premium to or discount from NAV are not known to the Trust, and the Trust cannot predict whether its Common Shares will trade in the future at a premium to or discount from NAV, and if so, the level of such premium or discount. Shares of closed-end investment companies frequently trade at a discount from NAV. The possibility that Common Shares of the Trust will trade at a discount from NAV is a risk separate and distinct from the risk that the Trust's NAV may decrease.

Leverage

The Trust may borrow an amount equal to up to 33 $\frac{1}{3}$ % (or such other percentage permitted by law) of its total assets (including the amount borrowed) less all liabilities other than borrowings. Under the 1940 Act, the Trust may issue preferred shares so long as immediately after any issuance of preferred shares the value of the Trust's total assets (less all Trust liabilities and indebtedness that is not senior indebtedness) is at least twice the amount of the Trust's senior indebtedness plus the involuntary liquidation preference of all outstanding shares. In November 2000, the Trust issued 18,000 Preferred Shares for a total of \$450 million. Borrowings and the issuance of preferred shares are referred to in this Prospectus collectively as "leverage." The Trust may use leverage for investment purposes, to finance the repurchase of its Common Shares, and to meet other cash requirements. The use of leverage for investment purposes increases both investment opportunity and investment risk.

Capital raised through leverage will be subject to interest and other costs, and these costs could exceed the income earned by the Trust on the proceeds of such leverage. There can be no assurance that the Trust's income from the proceeds of leverage will exceed these costs. However, the Adviser or Sub-Adviser seeks to use leverage for the purposes of making additional investments only if they believe, at the time of using leverage, that the total return on the assets purchased with such funds will exceed interest payments and other costs on the leverage.

To the extent that the Trust is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Trust's Common Shares will decrease. In addition, in the event of a general market decline in the value of assets such as those in which the Trust invests, the effect of that decline will be magnified in the Trust because of the additional assets purchased with the proceeds of the leverage. The Trust's lenders and Preferred shareholders have priority to the Trust's assets over the Trust's Common shareholders.

The Trust currently uses leverage by borrowing money on a floating rate basis and by the issuance of Preferred Shares. The current rate on the borrowings (as of June 15, 2008) is []%. The current dividend rate on the Preferred Shares (as of June 15, 2008) is []%. Since early February 2008, the Trust has not received hold orders and purchase requests for its Preferred Shares during their weekly auctions that equaled the full amount of such shares. As a result, under the terms of the Preferred Shares, the amount sold by each selling shareholder was reduced pro rata or to zero. In addition, the dividend rate on such preferred shares, which is normally set by means of a Dutch auction procedure, automatically reset to the maximum rate permitted under the Preferred Shares program. That maximum rate is 150% of the applicable commercial paper base rate on the day of the auction. It is unclear whether the dividend rate for the Preferred Shares will be set by means of an auction again in the future. To cover the annual interest and dividends on the borrowings and the Preferred Shares for the current fiscal year (assuming that the current interest and dividend rates remain in effect for the entire fiscal year and assuming that the Trust borrows an amount equal to 25% of its Managed Assets and the current Preferred Shares remain outstanding), the Trust would need to earn []% on its amount of Managed Assets as of June 15, 2008.

The Trust's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the credit facilities or obtained through the issuance of Preferred Shares, or any other preferred shares, may constitute a substantial lien and burden by reason of their prior claim against the income of the Trust and against the net assets of the Trust in liquidation.

The Trust is not permitted to declare dividends or other distributions, including dividends and distributions with respect to Common Shares or Preferred Shares, or to purchase Common Shares or Preferred Shares unless (i) at the time thereof the Trust meets certain asset coverage requirements and (ii) there is no event of default under any credit facility program that is continuing. See "Risk Factors and Special Considerations – Restrictive Covenants and 1940 Act Restrictions" below. In the event of a default under a credit facility program, the lenders have the right to cause a liquidation of the collateral (*i.e.*, sell Senior Loans and other assets of the Trust) and, if any such default is not cured, the lenders may be able to control the liquidation as well.

In addition, the Trust is not permitted to pay dividends on or redeem Common Shares unless all accrued dividends on the Preferred Shares and all accrued interest on borrowings have been paid or set aside for payment.

Because the fee paid to the Adviser will be calculated on the basis of Managed Assets, the fee will be higher when leverage is utilized, giving the Adviser an incentive to utilize leverage.

RISK FACTORS AND SPECIAL CONSIDERATIONS

The Trust is subject to certain restrictions imposed by lenders to the Trust and by guidelines of one or more rating agencies which issue ratings for the Preferred Shares issued by the Trust. These restrictions impose asset coverage, fund composition requirements and limits on investment techniques, such as the use of financial derivative products, that are more stringent than those imposed on the Trust by the 1940 Act. These covenants or guidelines could impede the Adviser or SubAdviser from fully managing the Trust's portfolio in accordance with the Trust's investment objective and policies.

Annual Expenses Without Borrowings or Preferred Shares

If the Trust were not to have borrowed or have Preferred Shares outstanding, the remaining expenses, as a percentage of the net assets of the Trust, would be as follows:

Annual Expenses Without Borrowings or Preferred Shares (as a percentage of net assets attributable to Common Shares)

Management and Administrative Fees ⁽¹⁾	%
Other Operating Expenses ⁽²⁾	%
Total Annual Expenses	%

(1) Pursuant to the Investment Advisers Agreement with the Trust, ING Investments is paid a fee of 0.80% of the Trust's Managed Assets. Pursuant to its Administration Agreement with the Trust, the Trust's Administrator is paid a fee of 0.25% of the Trust's Managed Assets. See "Investment Adviser and Other Service Providers – The Administrator."

(2) Other Operating Expenses are based on estimated amounts for the current fiscal year, which, in turn, are based on other operating expenses for the fiscal year ended February 29, 2008, and does not include the expenses of borrowing.

Effect of Leverage

The following table is designed to illustrate the effect on return to a holder of the Trust's Common Shares of the leverage created by the Trust's use of borrowing, using the annual interest rate of []%, assuming the Trust has used leverage by borrowing an amount equal to 25% of the Trust's Managed Assets and assuming hypothetical annual returns on the Trust's portfolio of minus 10% to plus 10%. As can be seen, leverage generally increases the return to shareholders when portfolio return is positive and decreases return when the portfolio return is negative. Actual returns may be greater or less than those appearing in the table.

Assumed Portfolio Return, net of expenses ⁽¹⁾	(10)%	(5)%	0%	5%	10%
Corresponding Return to Common Shareholders ⁽²⁾	()%	()%	()%	%	%

(1) The Assumed Portfolio Return is required by regulation of the SEC and is not a prediction of, and does not represent, the projected or actual performance of the Trust.

(2) In order to compute the Corresponding Return to Common Shareholders, the Assumed Portfolio Return is multiplied by the total value of the Trust's assets at the beginning of the Trust's fiscal year to obtain an assumed return to the Trust. From this amount, all interest accrued during the year is subtracted to determine the return available to shareholders. The return available to shareholders is then divided by the total value of the Trust's net assets attributable to Common Shares as of the beginning of the fiscal year to determine the Corresponding Return to Common Shareholders.

Impact of Shareholder Investment Program and Privately Negotiated Transactions

The issuance of Common Shares through the Trust's Shareholder Investment Program may have an adverse effect on the secondary market for the Trust's Common Shares. The increase in the number of the Trust's outstanding Common Shares resulting from issuances pursuant to the Trust's Shareholder Investment Program or pursuant to privately negotiated transactions, and the discount to the market price at which such Common Shares may be issued, may put downward pressure on the market price for Common Shares of the Trust. Common Shares will not be issued pursuant to the Trust's Shareholder Investment Program at any time when Common Shares are trading at a price lower than the Trust's NAV per Common Share.

Limited Secondary Market for Loans

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

Although the resale, or secondary, market for loans has grown substantially over the past decade, both in overall size and number of market participants, there is no organized exchange or board of trade on which loans are traded. Instead, the secondary market for loans is a private, unregulated inter-dealer or inter-bank re-sale market.

Loans usually trade in large denominations (typically in \$1 million or larger) and trades can be infrequent. The market has limited transparency so that

If you have any questions, please call 1-800-992-0180.

Risk Factors and Special Considerations

19

RISK FACTORS AND SPECIAL CONSIDERATIONS

information about actual trades may be difficult to obtain. Accordingly, some or many of the loans in which the Trust invests will be relatively illiquid.

In addition, loans in which the Trust invests may require the consent of the borrower and/or the agent prior to sale or assignment. These consent requirements can delay or impede the Trust's ability to sell loans and can adversely affect the price that can be obtained. The Trust may have difficulty disposing of loans if it needs cash to repay debt, to pay dividends, to pay expenses or to take advantage of new investment opportunities. Although the Trust has not conducted a tender offer since 1992, if it determines to again conduct a tender offer, limitations of a secondary market may result in difficulty raising cash to purchase tendered Common Shares.

These considerations may cause the Trust to sell securities at lower prices than it would otherwise consider to meet cash needs or cause the Trust to maintain a greater portion of its assets in cash equivalents than it would otherwise, which could negatively impact performance. The Trust seeks to avoid the necessity of selling assets to meet such needs by the use of borrowings.

The Trust values its assets daily. However, because the secondary market for loans is limited, it may be difficult to value loans. Reliable market value quotations may not be readily available for some loans and valuation of such loans may require more research than for liquid securities. In addition, elements of judgment may play a greater role in valuation of loans than for securities with a more developed secondary market, because there is less reliable, objective market value data available. In addition, if the Trust purchases a relatively large portion of a loan to generate extra income sometimes paid to large lenders, the limitations of the secondary market may inhibit the Trust from selling a portion of the loan and reducing its exposure to a borrower when the Adviser or Sub-Adviser deems it advisable to do so.

Lending Portfolio Securities

To generate additional income, the Trust may lend portfolio securities in an amount equal to up to 33 $\frac{1}{3}$ % of the Trust's total assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower default or fail financially. The Trust intends to engage in lending portfolio securities only when such lending is fully secured by investment grade collateral held by an independent agent.

Demand for Loans

At times during recent years, the volume of loans has increased. However, during such periods, demand for loans has also grown. An increase in demand may benefit the Trust by providing increased liquidity for loans and higher sales prices, but it may also adversely affect the rate of interest payable on loans acquired by the Trust, the rights provided to the Trust under the terms of a loan agreement, and increase the price of loans that the Trust wishes to purchase in the secondary market. A decrease in the demand for loans may adversely affect the price of loans in the Fund's portfolio, which could cause the Fund's NAV to decline.

Unsecured Loans and Subordinated Loans

Subject to the aggregate 20% limit on Other Investments, the Trust may invest up to 20% of its total assets in unsecured floating rate loans, notes and other debt instruments and 5% of its total assets in floating rate subordinated loans. Unsecured loans and subordinated loans share the same credit risks as those discussed above under "Credit Risk on Senior Loans" except that unsecured loans are not secured by any collateral of the borrower and subordinated loans are not the most senior debt in a borrower's capital structure. Unsecured loans do not enjoy the security associated with collateralization and may pose a greater risk of nonpayment of interest or loss of principal than do secured loans. The primary additional risk in a subordinated loan is the potential loss in the event of default by the issuer of the loan. Subordinated loans in an insolvency bear an increased share, relative to senior secured lenders, of the ultimate risk that the borrower's assets are insufficient to meet its obligations to its creditors.

Short-Term Debt Securities

Subject to the aggregate 20% limit on Other Investments, the Trust may invest in short-term debt securities. Short-term debt securities are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation and also may be subject to price volatility due to such factors as interest rates, market perception of the creditworthiness of the issuer and general market liquidity.

Because short-term debt securities typically pay interest at a fixed-rate, when interest rates decline, the value of the Trust's short-term debt securities can be expected to rise, and when interest rates rise, the value of those securities can be expected to decline.

Call Risk

During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk. An issuer may redeem a lower-grade obligation if the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer.

Investment in Non-U.S. and Non-Canadian Issuers

Subject to the aggregate 20% limit on Other Investments, the Trust may invest up to 20% of its total assets in loans, secured or unsecured, to borrowers that are organized or located in countries outside the United States and U.S. territories and possessions or Canada. Investment in non-U.S. entities involves special risks, including that non-U.S. entities may be subject to less rigorous accounting and reporting requirements than U.S. entities, less rigorous regulatory requirements, differing legal systems and laws relating to creditors' rights, the potential inability to enforce legal judgments, fluctuations in currency

Risk Factors and Special Considerations

20

RISK FACTORS AND SPECIAL CONSIDERATIONS

values and the potential for political, social and economic adversity. The Trust may invest up to 15% of its total assets in investments denominated in OECD currencies (including the Euro), other than the U.S. dollar.

The Trust will engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations.

Investments in Equity Securities Incidental to Investment in Loans

Subject to the aggregate 20% on Other Investments, the Trust may acquire equity securities as an incident to the purchase or ownership of a loan or in connection with a reorganization of a borrower or its debt. Investments in equity securities incidental to investment in loans entail certain risks in addition to those associated with investment in loans. The value of these securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Trust's NAV. The Trust may frequently possess material non-public information about a borrower as a result of its ownership of a loan of such borrower. Because of prohibitions on trading in securities of issuers while in possession of such information the Trust might be unable to enter into a transaction in a security of such a borrower when it would otherwise be advantageous to do so.

Borrowings under the Credit Facility Program

The Trust has a policy of borrowing to acquire income-producing investments which, by their terms, pay interest at a rate higher than the rate the Trust pays on borrowings. Accordingly, borrowing has the potential to increase the Trust's total income. The Trust currently is a party to two credit facilities with financial institutions that permit the Trust to borrow up to an aggregate of \$450 million. Interest is payable on the credit facilities by the Trust at a variable rate that is tied to either LIBOR, the federal funds rate, or a commercial paper based rate and includes a facility fee on unused commitments. As of June 15, 2008, the Trust had outstanding borrowings under the credit facilities of approximately \$[] million. Collectively, the lenders under the credit facilities have a security interest in all assets of the Trust. Under each of the credit facilities, the lenders have the right to liquidate Trust assets in the event of default by the Trust under such credit facility, and the Trust may be prohibited from paying dividends in the event of certain adverse events or conditions respecting the Trust or Adviser or Sub-Adviser until the credit facility is repaid in full or until the event or condition is cured.

Ranking of Senior Indebtedness

The rights of lenders to receive payments of interest on and repayments of principal of any borrowings made by the Trust under the credit facility program are senior to the rights of holders of Common Shares and, Preferred Shares with respect to the payment of dividends or upon liquidation.

Restrictive Covenants and 1940 Act Restrictions

The credit agreements governing the credit facility program ("Credit Agreements") include usual and customary covenants for their respective type of transaction, including limits on the Trust's ability to (i) issue preferred shares, (ii) incur liens or pledge portfolio securities, (iii) change its investment objective or fundamental investment restrictions without the approval of lenders, (iv) make changes in any of its business objectives, purposes or operations that could result in a material adverse effect, (v) make any changes in its capital structure, (vi) amend the Trust documents in a manner which could adversely affect the rights, interests or obligations of any of the lenders, (vii) engage in any business other than the businesses currently engaged in, (viii) create, incur, assume or permit to exist certain debt except for certain specified types of debt, and (ix) permit any of its Employee Retirement Security ("ERISA") affiliates to cause or permit to occur an event that could result in the imposition of a lien under the Internal Revenue Code or ERISA. In addition, the Credit Agreements do not permit the Trust's asset coverage ratio (as defined in the Credit Agreements) to fall below 300% at any time ("Credit Agreement Asset Coverage Test").

Under the requirements of the 1940 Act, the Trust must have asset coverage of at least 300% immediately after any borrowing, including borrowing under the credit facility program. For this purpose, asset coverage means the ratio which the value of the total assets of the Trust, less liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of borrowings represented by indebtedness issued by the Trust. The Credit Agreements limit the Trust's ability to pay dividends or make other distributions on the Trust's Common Shares, or purchase or redeem Common Shares, unless the Trust complies with the Credit Agreement Asset Coverage Test. In addition, the Credit Agreements do not permit the Trust to declare dividends or other distributions or purchase or redeem Common Shares or any preferred shares (i) at any time that an event of default under a Credit Agreement has occurred and is continuing; or (ii) if, after giving effect to such declaration, the Trust would not meet the Credit Agreement Asset Coverage Test set forth in the Credit Agreements.

If you have any questions, please call 1-800-992-0180.

TRANSACTION POLICIES

Net Asset Value

The NAV per common share of the Trust is determined each business day as of the close of regular trading ("Market Close") on the NYSE (normally 4:00 p.m. Eastern time unless otherwise designated by the NYSE). The Trust is open for business every day the NYSE is open. The NYSE is closed on all weekends and on all national holidays and Good Friday. Trust shares will not be priced on those days. The NAV per Common Share is determined by dividing the value of the Trust's loan assets plus all cash and other assets (including interest accrued but not collected) less all liabilities (including accrued expenses but excluding capital and less the liquidation preference of any outstanding preferred shares) by the number of Common Shares outstanding. The NAV per Common Share is made available for publication.

Valuation of the Trust's Assets

The assets in the Trust's portfolio are valued daily in accordance with the Trust's Loan Valuation Procedures adopted by the Board. A majority of the Trust's assets are valued using quotations supplied by a third-party loan pricing service. However, the loans in which the Trust invests are not listed on any securities exchange or board of trade. Some loans are traded by institutional investors in an over-the-counter secondary market that has developed in the past several years. This secondary market generally has fewer trades and less liquidity than the secondary markets for other types of securities. Some loans have few or no trades. Accordingly, determinations of the value of loans may be based on infrequent and dated trades. Because there is less reliable, objective market value data available, elements of judgment may play a greater role in valuation of loans than for other types of securities. For further information, see "Risk Factors and Special Considerations Limited Secondary Market for Loans."

Loans are normally valued at the mean of the means of one or more bid and asked quotations obtained from a pricing service or other sources believed to be reliable. Loans for which reliable market value quotations are not readily available from a pricing service may be valued with reference to another loan or a group of loans for which reliable market value quotations are readily available and whose characteristics are comparable to the loan being valued. Under this approach, the comparable loan or loans serve as a proxy for changes in value of the loan being valued. The Trust has engaged an independent pricing service to provide quotations from dealers in loans and to calculate values under this proxy procedure.

It is expected that most of the loans held by the Trust will be valued with reference to quotations from the independent pricing service or with reference to the proxy procedure described above. The Adviser or Sub-Adviser may believe that the price for a loan derived from quotations or the proxy procedure described above is not reliable or accurate. Among other reasons, this may be the result of information about a particular loan or borrower known to the Adviser or Sub-Adviser that they believe may not be known to the pricing service or reflected in a price quote. In this event, the loan is valued at fair value under procedures established by the Board, and in accordance with the provisions of the 1940 Act.

Under these procedures, fair value is determined by the Adviser or Sub-Adviser and monitored by the Board through its Compliance Committee. In fair valuing a loan, consideration is given to several factors, which may include, among others, the following:

- the characteristics of and fundamental analytical data relating to the loan, including the cost, size, current interest rate, period until the next interest rate reset, maturity and base lending rate of the loan, the terms and conditions of the loan and any related agreements, and the position of the loan in the borrower's debt structure;

- the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral;

- the creditworthiness of the borrower and the cash flow coverage of outstanding principal and interest, based on an evaluation of its financial condition, financial statements and information about the borrower's business, cash flows, capital structure and future prospects;

- information relating to the market for the loan, including price quotations for, and trading in, the loan and interests in similar loans and the market environment and investor attitudes towards the loan and interests in similar loans;

- the reputation and financial condition of the agent of the loan and any intermediate participants in the loans;

- the borrower's management; and

- the general economic and market conditions affecting the fair value of the loan.

Securities for which the primary market is a national securities exchange are stated at the last reported sale price on the day of valuation. Securities reported by NASDAQ National Market System will be valued at the NASDAQ Official Closing Price on the valuation day. Debt and equity securities traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the mean between the last reported bid and asked price. Valuation of short term cash equivalent investments is at amortized cost. Securities maturing in 60 days or less are valued at amortized cost, which, when combined with accrued interest, approximates market value.

Account Access

Unless your Common Shares are held through a third-party fiduciary or in an omnibus registration at your bank or brokerage firm, you may be able to access your account information over the internet at www.ingfunds.com, or via a touch tone telephone by calling (800) 992-0180 and selecting Option 1. Should you wish to speak with a Shareholder

Transaction Policies

22

TRANSACTION POLICIES

Services Representative, you may call the toll-free number listed above and select Option 2.

Privacy Policy

The Trust has adopted a policy concerning investor privacy. To review the privacy policy, contact a Shareholder Services Representative at (800) 992-0180 and select Option 1, obtain a policy over the internet at www.ingfunds.com, or see the privacy promise that accompanies this Prospectus.

Householding

To reduce expenses, we may mail only one copy of the Trust's Prospectus and each annual and semi-annual shareholder report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call us at (800) 992-0180 or speak to your investment professional. We will begin sending you individual copies 30 days after receiving your request.

PLAN OF DISTRIBUTION

Shareholder Investment Program

The following is a summary of the Shareholder Investment Program ("Program"). Shareholders are advised to review a fuller explanation of the Program contained in the Trust's SAI.

Common Shares are offered by the Trust through the Program. The Program allows participating shareholders to reinvest all dividends ("Dividends") in additional Common Shares of the Trust, and also allows participants to purchase additional Common Shares through optional cash investments in amounts ranging from a minimum of \$100 to a maximum of \$100,000 per month.

The Trust and ING Funds Distributor reserve the right to reject any purchase order. Please note that cash, travelers checks, third-party checks, money orders and checks drawn on non-U.S. banks (even if payment may be effected through a U.S. bank) generally will not be accepted.

Common Shares will be issued by the Trust under the Program when the Trust's Common Shares are trading at a premium to NAV. If the Trust's Common Shares are trading at a discount to NAV, Common Shares issued under the Program will be purchased on the open market. Common Shares issued under the Program directly from the Trust will be acquired at the greater of (i) NAV at the close of business on the day preceding the relevant investment date or (ii) the average of the daily market price of the Common Shares during the pricing period minus a discount of 5% for reinvested Dividends and 0% to 5%, for optional cash investments. Common Shares issued under the Program when shares are trading at a discount to NAV will be purchased in the market by "DST" at market price. Shares issued by the Trust under the Program will be issued without a fee or a commission.

Shareholders may elect to participate in the Program by telephoning the Trust or submitting a completed Participation Form to DST, the Program administrator. DST will credit to each participant's account funds it receives from: (a) Dividends paid on Trust shares registered in the participant's name, and (b) optional cash investments. DST will apply all Dividends and optional cash investments received to purchase Common Shares as soon as practicable beginning on the relevant investment date (as described below) and not later than six business days after the relevant investment date, except when necessary to comply with applicable provisions of the federal securities laws. For more information on the Trust's distribution policy, see "Dividends and Distributions."

In order for participants to purchase shares through the Program in any month, the Program administrator must receive from the participant any optional cash investment by the relevant investment date. The relevant investment date will be set in advance by the Trust, upon which optional cash investments are first applied by DST to the purchase of Common Shares. Participants may obtain a schedule of relevant dates, including investments dates, the dates by which optional cash investment payments must be received and the dates in which shares will be paid by calling ING's Shareholder Services Department at (800) 992-0180.

Participants will pay a pro rata share of brokerage commissions with respect to DST's open market purchases in connection with the reinvestment of Dividends or purchases made with optional cash investments.

The Program is intended for the benefit of investors in the Trust. The Trust reserves the right to exclude from participation, at any time, (i) persons or entities who attempt to circumvent the Program's standard \$100,000 maximum by accumulating accounts over which they have control or (ii) any other persons or entities, as determined in the sole discretion of the Trust.

Currently, persons who are not shareholders of the Trust may not participate in the Program. The Board may elect to change this policy at a future date, and permit non-shareholders to participate in the Program. Shareholders may request to receive their Dividends in cash at any time by giving DST written notice or by contacting ING's Shareholder Services Department at (800) 992-0180, and selecting Option 2. Shareholders may elect to close their account at any time by giving DST written notice. When a participant closes their account, the participant upon request will receive a certificate for full Common Shares in the account.

Fractional Common

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

If you have any questions, please call 1-800-992-0180.

Transaction Policies

23

PLAN OF DISTRIBUTION

Shares will be held and aggregated with other fractional Common Shares being liquidated by DST as agent of the Program and paid for by check when actually sold.

The automatic reinvestment of Dividends does not affect the tax characterization of the Dividends (*i.e.*, capital gains and income are realized even though cash is not received). If shares are issued pursuant to the Program's dividend reinvestment provisions or cash purchase provisions at a discount from market price, participants may have income equal to the discount.

Additional information about the Program may be obtained by contacting ING's Shareholder Services Department at (800) 992-0180, and selecting Option 2.

Privately Negotiated Transactions

The Common Shares may also be offered pursuant to privately negotiated transactions between the Trust and the Distributor and specific investors. Generally, such investors will be sophisticated institutional investors. The terms of such privately negotiated transactions will be subject to the discretion of the management of the Trust. In determining whether to sell Common Shares pursuant to a privately negotiated transaction, the Trust will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the person seeking to purchase the Common Shares.

Common Shares issued by the Trust in connection with privately negotiated transactions will be issued at the greater of (i) NAV per Common Share of the Trust's Common Shares or (ii) at a discount ranging from 0% to 5% of the average of the daily market price of the Trust's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The discount to apply to such privately negotiated transactions will be determined by the Trust with regard to each specific transaction. The Trust will not pay any commissions with regard to privately negotiated transactions, but an investor may be subject to a front end sales load of up to 3% paid to or retained by a third party broker-dealer through which such transaction may be effected.

USE OF PROCEEDS

It is expected that 100% of the net proceeds of Common Shares issued pursuant to the Shareholder Investment Program and privately negotiated transactions will be invested in Senior Loans and other securities consistent with the Trust's investment objective and policies. Pending investment in Senior Loans, the proceeds, which are expected to be used within three months, will be used to pay down the Trust's outstanding borrowings under its credit facilities. See "Investment Objective and Policies Policy on Borrowing."

As of June 15, 2008, the Trust's outstanding borrowings under its credit facilities was \$[] million. By paying down the Trust's borrowings, the Trust can avoid adverse impacts on yields pending investment of such proceeds in Senior Loans. As investment opportunities are subsequently identified, it is expected that the Trust will reborrow amounts previously repaid and invest such amounts in additional Senior Loans.

DIVIDENDS AND DISTRIBUTIONS

Distribution Policy. Income dividends are declared and paid monthly. Income dividends consist of interest accrued and amortization of fees earned less any amortization of premiums paid and the estimated expenses of the Trust, including fees payable to ING Investments. Income dividends are calculated monthly under guidelines approved by the Trustees. Each dividend is payable to shareholders of record on the 10th day of the following month (unless it is a holiday, in which case the next business day is the record date). Accrued amounts of fees received, including facility fees, will be taken in as income and passed on to shareholders as part of dividend distributions. Any fees or commissions paid to facilitate the sale of portfolio Senior Loans in connection with tender offers or other portfolio transactions may reduce the dividend yield.

Capital gains, if any, are declared and paid annually. Because the Trust currently has capital loss carry forwards, it is not anticipated that capital gains distributions will be made for the foreseeable future.

Dividend Reinvestment. Unless you instruct the Trust to pay you dividends in cash, dividends and distributions paid by the Trust will be reinvested in additional Common Shares of the Trust. You may request to receive dividends in cash at any time by giving DST written notice or by contacting the ING's Shareholder Services Department at (800) 992-0180, and selecting Option 2.

INVESTMENT MANAGEMENT AND OTHER SERVICE PROVIDERS

Adviser

ING Investments, an Arizona limited liability company, serves as the Adviser to the Trust and has overall responsibility for the management of the Trust under the general supervision of the Board. Its principal business address is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258.

The Trust and the Adviser have entered into an investment advisory agreement ("Investment Advisory Agreement") that requires ING Investments to provide all investment advisory and portfolio management services for the Trust. The Investment Advisory Agreement with ING Investments may be canceled by the Board or by the vote of a majority of the outstanding voting securities of the Trust upon 60 days' written notice.

ING Investments is registered with the SEC as an investment adviser. ING Investments is an indirect wholly-owned subsidiary of ING Groep. ING Groep is one of the largest financial services organizations in the world with approximately 120,000 employees. ING Investments became an investment management firm in April, 1995.

As of March 31, 2008, ING Investments had assets under management of approximately \$[] billion.

The Adviser bears its expenses of providing the services described above. The Adviser currently receives from the Trust an annual fee, paid monthly, of 0.80% of the Trust's Managed Assets.

For more information regarding the basis for the Board's approval of the investment advisory and investment sub-advisory relationships, please refer to the annual shareholder report dated February 29, 2008.

Sub-Adviser

ING Investments has engaged a sub-adviser to provide the day-to-day management of the Trust's portfolio. The sub-adviser has, at least in part, been selected primarily on the basis of its successful application of a consistent, well-defined, long-term investment approach over a period of several market cycles.

ING Investments is responsible for monitoring the investment program and performance of the sub-adviser. Under the terms of the sub-advisory agreement, the agreement can be terminated by either ING Investments or the Board. In the event the sub-advisory agreement is terminated, the sub-adviser may be replaced subject to any regulatory requirements or ING Investments may assume day-to-day investment management of the Trust.

ING Investment Management Co.

ING Investment Management Co., a Connecticut corporation, serves as Sub-Adviser to the Trust. Founded in 1972, ING IM is registered with the SEC as an investment adviser. ING IM is an indirect, wholly-owned subsidiary of ING Groep, and is an affiliate of ING Investments. ING IM has acted as adviser or sub-adviser to mutual funds since 1994 and has managed institutional accounts since 1972.

As of March 31, 2008, ING IM managed approximately \$[] billion in assets. Its principal business address is 230 Park Avenue, New York, NY 10169. For its services, ING IM is entitled to receive a sub-advisory fee of 0.36%, expressed as an annual rate based on the average daily Managed Assets of the Trust. This sub-advisory fee is paid by ING Investments, not by the Trust.

Portfolio Management. The following individuals jointly share responsibility for the day-to-day management of the Trust's Portfolio:

Daniel A. Norman. Mr. Norman is Senior Vice President and Group Head of the ING IM Senior Debt Group, and has served in that capacity since November 1999. Mr. Norman also serves as Senior Vice President of the Trust, and he serves as Senior Vice President of ING Senior Income Fund, another closed-end fund sub-advised by ING IM that invests primarily in Senior Loans. Mr. Norman has co-managed the Trust with Jeffrey A. Bakalar and with Curtis F. Lee since 2000.

Jeffrey A. Bakalar. Mr. Bakalar is Senior Vice President and Group Head of the ING IM Senior Debt Group, and has served in that capacity since November 1999. Mr. Bakalar also serves as Senior Vice President of the Trust and as Senior Vice President of ING Senior Income Fund, another closed-end fund sub-advised by ING IM that invests primarily in Senior Loans. Mr. Bakalar has co-managed the Trust with Mr. Norman and with Curtis F. Lee since 2000.

Curtis F. Lee. Mr. Lee is Senior Vice President and Chief Credit Officer in the ING IM Senior Debt Group and has served in that capacity since January 2001. Mr. Lee also serves as Senior Vice President and Chief Credit Officer of the Fund (since January 2001), and he serves as Senior Vice President and Chief Credit Officer of ING Prime Rate Trust, another closed-end fund sub-advised by ING IM that invests primarily in Senior Loans. Mr. Lee has co-managed the Trust with Mr. Norman and with Mr. Bakalar since 2000.

Additional Information Regarding Portfolio Managers

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

The SAI provides additional information about each portfolio manager's compensation, other accounts managed by each portfolio manager and each portfolio manager's ownership of securities.

The Administrator

The Administrator of the Trust is ING Funds Services, LLC ("ING Funds Services"). Its principal business address is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. The Administrator is a wholly-owned subsidiary of ING Groep and the immediate parent company of the Adviser.

Under an administration agreement ("Administration Agreement") between the Administrator and the Trust, ING Funds Services administers the Trust's corporate affairs subject to the supervision of the Board. In that connection, the Administrator monitors the provisions of the Senior Loan

If you have any questions, please call 1-800-992-0180.

Investment Management and Other Service Providers

25

INVESTMENT MANAGEMENT AND OTHER SERVICE PROVIDERS

agreements and any agreements with respect to interests in Senior Loans and is responsible for recordkeeping with respect to the Senior Loans in the Trust's repurchase offers portfolio. The Administrator also furnishes the Trust with office facilities and furnishes executive personnel together with clerical and certain recordkeeping and administrative services. These services include preparation of annual and other reports to shareholders and to the SEC. The Administrator also handles the filing of federal, state and local income tax returns not being furnished by the Custodian or Transfer Agent (as defined below). The Administration Agreement also requires ING Funds Services to assist in managing and supervising all aspects of the general day-to-day business activities and operations of the Trust, including custodial, transfer agency, dividend disbursing, accounting, auditing, compliance and related services. The Administrator provides the Trust with office space, equipment and personnel necessary to administer the Trust. The Administrator has authorized all of its officers and employees who have been elected as officers of the Trust to serve in such capacities. All services furnished by the Administrator under the Administration Agreement may be furnished by such officers or employees of the Administrator.

The Trust pays the Administrator an administration fee, computed daily and payable monthly. The Administration Agreement states that the Administrator is entitled to receive a fee at an annual rate of 0.25% of the Trust's Managed Assets. The Administration Agreement may be canceled by the Board upon 60 days' written notice.

Transfer Agent, Dividend Disbursing Agent and Registrar

The transfer agent, dividend disbursing agent and registrar for the Common Shares is DST Systems, Inc., whose principal business address is 333 W. 11th Street, Kansas City, Missouri 64105.

Custodian

The Trust's securities and cash are held and maintained under a Custody Agreement with State Street Bank and Trust Company, whose principal place of business is 801 Pennsylvania Avenue, Kansas City, Missouri 64105.

Investment Management and Other Service Providers

26

DESCRIPTION OF THE TRUST

The Trust is an unincorporated business trust established under the laws of the Commonwealth of Massachusetts by an Agreement and Declaration of Trust dated December 2, 1987, as amended (Declaration of Trust). The Board is responsible for protecting the interests of shareholders. The Trustees are experienced executives who oversee the Trust's activities, review contractual arrangements with companies that provide services to the Trust and review the Trust's performance.

The Declaration of Trust provides that the Trustees of the Trust may authorize separate classes of shares of beneficial interest. The Trustees have authorized an unlimited number of shares of beneficial interest, without par value, all of which were initially classified as Common Shares. The Declaration of Trust also authorizes the creation of an unlimited number of shares of beneficial interest with preference rights, including preferred shares, without par value, in one or more series, with rights as determined by the Board, by action of the Board without the approval of the shareholders. The following table shows the number of (i) shares authorized, (ii) shares held by the Trust for its own account and (iii) shares outstanding, for each class of authorized securities of the Trust as of June 15, 2008.

Title of Class	Number Authorized	Number Held By Trust for its Own Account	Number Outstanding
Common Shares	unlimited	0	145,033,235
Preferred Shares, Series M	3,600	0	3,600
Preferred Shares, Series T	3,600	0	3,600
Preferred Shares, Series W	3,600	0	3,600
Preferred Shares, Series Th	3,600	0	3,600
Preferred Shares, Series F	3,600	0	3,600

The Common Shares outstanding are fully paid and nonassessable by the Trust. Holders of Common Shares are entitled to share equally in dividends declared by the Board payable to holders of Common Shares and in the net assets of the Trust available for distribution to holders of Common Shares after payment of the preferential amounts payable to holders of any outstanding Preferred Shares. Neither holders of Common Shares nor holders of Preferred Shares have pre-emptive or conversion rights and Common Shares are not redeemable. Upon liquidation of the Trust, after paying or adequately providing for the payment of all liabilities of the Trust and the liquidation preference with respect to any outstanding preferred shares, and upon receipt of such releases, indemnities and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Trust among the holders of the Common Shares. Under the rules of the NYSE applicable to listed companies, the Trust is required to hold an annual meeting of shareholders in each year. If the Trust is converted to an open-end investment company or if for any other reason Common Shares are no longer listed on the NYSE (or any other national securities exchange the rules of which require annual meetings of shareholders), the Trust does not intend to hold annual meetings of shareholders.

The Trust is responsible for paying the following expenses, among others: the fees payable to the Adviser; the fees payable to the Administrator; the fees and certain expenses of the Trust's custodian and transfer agent, including the cost of providing records to the Administrator in connection with its obligation of maintaining required records of the Trust; the charges and expenses of the Trust's legal counsel, legal counsel to the Trustees who are not "interested persons" of the Trust, as defined in the 1940 Act and independent accountants; commissions and any issue or transfer taxes chargeable to the Trust in connection with its transactions; all taxes and corporate fees payable by the Trust to governmental agencies; the fees of any trade association of which the Trust is a member; the costs of share certificates representing Common Shares of the Trust; organizational and offering expenses of the Trust and the fees and expenses involved in registering and maintaining registration of the Trust and its Common Shares with the SEC, including the preparation and printing of the Trust's registration statement and prospectuses for such purposes; allocable communications expenses with respect to investor services, and all expenses of shareholders' and Trustees' meetings and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders; fees for independent loan pricing services; the cost of insurance; and litigation and indemnification expenses and extraordinary expenses not incurred in the ordinary course of the Trust's business.

Under Massachusetts law, shareholders, including holders of Preferred Shares, could under certain circumstances be held personally liable for the obligations of the Trust. However, the Declaration of Trust disclaims shareholder liability for acts or obligations of the Trust and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Trust or the Trustees. The Declaration of Trust provides for indemnification out of Trust property for all loss and expense of any shareholder held personally liable for the obligations of the Trust. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Trust would be unable to meet its obligations.

Holders of Common Shares are entitled to one vote for each share held and will vote with the holders of any outstanding Preferred Shares or any other preferred shares on each matter submitted to a vote of holders of Common Shares, except as described under "Description of Capital Structure Preferred Shares."

Shareholders are entitled to one vote for each share held. The Common Shares, Preferred Shares and any other preferred shares do not have cumulative voting rights, which means that the holders of more than 50% of the shares of Common Shares, Preferred Shares and any other preferred shares voting for the election of Trustees can elect all of the Trustees standing for election by such holders, and, in such event, the holders of the remaining shares of Common Shares, Preferred Shares and any other preferred shares will not be able to elect any of such Trustees.

If you have any questions, please call 1-800-992-0180.

DESCRIPTION OF THE TRUST

So long as any Preferred Shares or any other preferred shares are outstanding, holders of Common Shares will not be entitled to receive any dividends or other distributions from the Trust, unless at the time of such declaration, (1) all accrued dividends on preferred shares or accrued interest on borrowings has been paid and (2) the value of the Trust's total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Trust not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing indebtedness plus the aggregate liquidation value of the outstanding preferred shares (expected to equal the aggregate original purchase price of the outstanding preferred shares plus redemption premium, if any, together with any accrued and unpaid dividends thereon, whether or not earned or declared and on a cumulative basis). In addition to the requirements of the 1940 Act, the Trust is required to comply with other asset coverage requirements as a condition of the Trust obtaining a rating of the Preferred Shares from a rating agency. These requirements include an asset coverage test more stringent than under the 1940 Act.

The Trust will send unaudited reports at least semi-annually and audited financial statements annually to all of its shareholders.

The Declaration of Trust further provides that obligations of the Trust are not binding upon Trustees individually but only upon the property of the Trust and that the Trustees will not be liable for errors of judgment or mistakes of fact or law, but nothing in the Declaration of Trust protects a Trustee against any liability to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

Conversion to Open-End Fund

The Trustees may at any time propose conversion of the Trust to an open-end management investment company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing. In considering whether to submit an open-ending proposal to shareholders, the Trustees might consider, among other factors, the differences in operating expenses between open-end and closed-end funds (due to the expenses of continuously selling shares and of standing ready to effect redemptions), the potentially adverse tax consequences to non-redeeming shareholders once a fund is open-ended, and the impact of open-ending on portfolio management policies. Such a conversion would require the approval of both a majority of the Trust's outstanding Common Shares and preferred shares voting together as a single class and a majority of the outstanding preferred shares voting as a separate class on such conversion. Conversion of the Trust to an open-end investment company would require the redemption of all outstanding preferred shares, including the Preferred Shares, which would eliminate the leveraged capital structure of the Trust with respect to the Common Shares. A delay in conversion could result following shareholder approval due to the Trust's inability to redeem the preferred shares. Shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their next computed NAV less any redemption charge as might be in effect at the time of redemption. If the Trust is converted to an open-end management investment company, it could be required to liquidate portfolio securities to meet requests for redemption, and its shares would no longer be listed on the NYSE. If the Trust were to experience significant redemptions as an open-end fund, the decrease in total assets could result in a higher expense ratio and inefficiencies in portfolio management. In this regard, the Trust could reserve the right to effect redemptions in-kind with portfolio securities, which would subject redeeming shareholders to transaction costs in liquidating those securities.

Repurchase of Common Shares

In recognition of the possibility that the Trust's Common Shares may trade at a discount to their NAV, the Trust may from time to time take action to attempt to reduce or eliminate a market value discount from NAV by repurchasing its Common Shares in the open market or by tendering its Common Shares at NAV. So long as any Preferred Shares are outstanding, the Trust may not purchase, redeem or otherwise acquire any Common Shares unless (1) all accumulated dividends on the Preferred Shares have been paid or set aside for payment through the date of such purchase, redemption or other acquisition and (2) at the time of such purchase, redemption or acquisition asset coverage requirements set forth in the Declaration of Trust and the Trust's Certificate of Designation for Preferred Shares are met. Repurchases of Common Shares may result in the Trust being required to redeem preferred shares to satisfy asset coverage requirements.

Fundamental and Non-fundamental Policies of the Trust

The investment objective of the Trust, certain policies of the Trust specified herein as fundamental and the investment restrictions of the Trust described in the SAI are fundamental policies of the Trust and may not be changed without a Majority Vote of the shareholders of the Trust. The term Majority Vote means the affirmative vote of (a) more than 50% of the outstanding shares of the Trust or (b) 67% or more of the shares present at a meeting if more than 50% of the outstanding shares of the Trust are represented at the meeting in person or by proxy, whichever is less. All other policies of the Trust may be modified by resolution of the Board.

Description of the Trust

28

DESCRIPTION OF CAPITAL STRUCTURE

Common Shares

The Trust's Declaration of Trust authorizes the issuance of an unlimited number of Common Shares of beneficial interest, without par value. All Common Shares have equal rights to the payment of dividends and the distribution of assets upon liquidation. Common Shares will, when issued, be fully paid and non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting.

Whenever preferred shares are outstanding, holders of Common Shares will not be entitled to receive any distributions from the Trust, unless at the time of such declaration, (1) all accrued dividends on Preferred Shares or accrued interest on borrowings have been paid and (2) the value of the Trust's total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Trust not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing indebtedness plus the aggregate liquidation value of the outstanding preferred shares. In addition to the requirements of the 1940 Act, the Trust is required to comply with other asset coverage requirements as a condition of the Trust obtaining a rating of the preferred shares from a rating agency. These requirements include asset coverage tests more stringent than under the 1940 Act. See "Preferred Shares" below.

Borrowings

The Trust's Declaration of Trust authorizes the Trust, without the prior approval of holders of Common Shares, to borrow money. In this connection, the Trust may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such borrowings by mortgaging, pledging or otherwise granting a security interest in the Trust's assets. See "Risk Factors and Special Considerations – Leverage."

Preferred Shares

Under the 1940 Act, the Trust is permitted to have outstanding more than one series of preferred shares as long as no single series has priority over another series nor holders of preferred shares have pre-emptive rights to purchase any other preferred shares that might be issued.

The Trust's Declaration of Trust authorizes the issuance of a class of preferred shares (which class may be divided into two or more series) as the Trustees may, without shareholder approval, authorize. The preferred shares have such preferences, voting powers, terms of redemption, if any, and special or relative rights or privileges (including conversion rights, if any) as the Trustee may determine and as are set forth in the Trust's Certificate of Designation establishing the terms of the preferred shares. The number of shares of the preferred class or series authorized is unlimited, and the shares authorized may be represented in part by fractional shares. Under the Trust's Certificate of Designation, the Trustees have authorized the creation of 18,000 Auction Rate Cumulative Preferred Shares, without par value, with a liquidation preference of \$25,000 per share, classified as Series M, T, W, Th and F Auction Rate Cumulative Preferred Shares.

Any decision to offer preferred shares is subject to market conditions and to the Board and the Adviser's continuing belief that leveraging the Trust's capital structure through the issuance of preferred shares is likely to achieve the benefits to the Common Shares described in this Prospectus for long-term investors. The terms of the preferred shares will be determined by the Board in consultation with the Adviser (subject to applicable law and the Trust's Declaration of Trust) if and when it authorizes a preferred shares offering.

The Preferred Shares have complete priority over the Common Shares as to distribution of assets. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Trust, holders of preferred shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to holders of Common Shares.

Since early February 2008, the Trust has not received hold orders and purchase requests for its Preferred Shares during their weekly auctions that equaled the full amount of such shares. As a result, under the terms of the Preferred Shares, the amount sold by each selling shareholder was reduced pro rata or to zero. In addition, the dividend rate on such preferred shares, which is normally set by means of a Dutch auction procedure, automatically reset to the maximum rate permitted under the Preferred Shares program. That maximum rate is 150% of the applicable commercial paper base rate on the day of the auction. It is unclear whether the dividend rate for the Preferred Shares will be set by means of an auction again in the future. The Trust and its Board of Trustees are evaluating potential options to restore liquidity to and/or provide additional refinancing options for this market in the context of regulatory guidelines, as well as the economic and tax implications for both common and preferred shareholders.

If you have any questions, please call 1-800-992-0180.

TAX MATTERS

The following information is meant as a general summary for U.S. shareholders. Please see the SAI for additional information. Investors should rely on their own tax adviser for advice about the particular federal, state and local tax consequences to them of investing in the Trust.

The federal income tax treatment of the Trust's Preferred Shares is not entirely clear, but the Trust believes, based on the advice of its counsel, that the Preferred Shares will constitute stock of the Trust. It is possible, however, that the IRS might take a contrary position, asserting, for example, that the Preferred Shares constitute debt of the Trust. The discussion below assumes that the Preferred Shares are stock.

The Trust will distribute all or substantially all of its net investment income and net realized capital gains, if any, to its shareholders each year. Although the Trust will not be taxed on amounts it distributes, most shareholders will be taxed on amounts they receive. A particular distribution generally will be taxable as either ordinary income or long-term capital gain. The Trust will allocate a proportionate amount of each type of its income to the Common Shares and to the Preferred Shares. It generally does not matter how long a shareholder has held the Trust's Common Shares or Preferred Shares or whether the shareholder elects to receive distributions in cash or reinvest them in additional Trust's Common Shares or Preferred Shares. For example, if the Trust designates a particular distribution as a long-term capital gains distribution, it will be taxable to a shareholder at his or her long-term capital gains rate. Dividends from the Trust are not expected to be eligible for the reduced rate of tax that may apply to certain qualifying dividends on corporate stock.

Distributions of earnings from non-qualifying dividends interest income, other types of ordinary income and short-term capital gains will be taxed at the ordinary income tax rate applicable to the taxpayer.

Dividends declared by the Trust in October, November or December and paid during the following January may be treated as having been received by shareholders in the year the distributions were declared.

Each shareholder will receive an annual statement summarizing the shareholder's dividend and capital gains distributions.

If a shareholder invests through a tax-deferred account, such as a retirement plan, the shareholder generally will not have to pay tax on dividends until they are distributed from the account. These accounts are subject to complex tax rules, and shareholders should consult a tax adviser about investment through a tax-deferred account.

There may be tax consequences to a shareholder if the shareholder sells the Trust's Common Shares or Preferred Shares. A shareholder will generally have a capital gain or loss, which will be long-term or short-term, generally depending on how long the shareholder holds those Common Shares or Preferred Shares. If a shareholder exchanges shares, the shareholder may be treated as if he or she sold them. Shareholders are responsible for any tax liabilities generated by their own transactions.

As with all investment companies, the Trust may be required to withhold U.S. federal income tax at the current rate of 28% of all taxable distributions payable to a shareholder if the shareholder fails to provide the Trust with his or her correct taxpayer identification number or to make required certifications, or if the shareholder has been notified by the IRS that he or she is subject to backup withholding. Backup withholding is not an additional tax; rather, it is a way in which the IRS ensures it will collect taxes otherwise due. Any amounts withheld may be credited against a shareholder's U.S. federal income tax liability.

Tax Matters

MORE INFORMATION

Distribution Arrangements

Pursuant to the terms of a distribution agreement ("Distribution Agreement"), ING Funds Distributor will act as the Trust's distributor for the optional cash investments under the Trust's Shareholder Investment Program and for privately negotiated transactions. The Distribution Agreement provides that ING Fund's Distributor does not receive compensation or commissions from the Trust for such services. In addition, no fees or commissions will be paid by the Trust or its shareholders in connection with the reinvestment of dividends and capital gains distributions. ING Funds Distributor's principal business address is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. ING Funds Distributor, ING Investments, the Trust's Adviser, and ING IM, the Trust's Sub-Adviser, are indirect, wholly-owned subsidiaries of ING Groep. See "Plans of Distribution" in the SAI.

The Trust bears the expenses of issuing the Common Shares. These expenses include, but are not limited to, the expense of preparation and printing of the Prospectus and SAI, the expense of counsel and independent registered public accounting firm, and others.

Legal Matters

The validity of the Common Shares offered hereby will be passed upon for the Trust by Dechert LLP, 1775 I Street, NW, Washington, DC 20006, counsel to the Trust.

Independent Registered Public Accounting Firm

KPMG LLP serves as the independent registered public accounting firm for the Trust. The principal address of KPMG is 99 High Street, Boston, Massachusetts 02110.

Registration Statement

The Trust has filed with the SEC a Registration Statement under the Securities Act of 1933, relating to the Common Shares offered hereby. For further information with respect to the Trust and its Common Shares, reference is made to such Registration Statement and the exhibits filed therein.

If you have any questions, please call 1-800-992-0180.

ING Prime Rate Trust

7337 East Doubletree Ranch Road

Scottsdale, Arizona 85258-2034

(800) 992-0180

ING Prime Rate Trust (Trust) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (1940 Act). The Trust 's investment objective is to provide investors with as high a level of current income as is consistent with the preservation of capital. There is no assurance that the Trust will achieve its investment objective. The Trust is managed by ING Investments, LLC (ING Investments or Adviser) and sub-advised by ING Investment Management Co. (ING IM or Sub-Adviser).

This Statement of Additional Information (SAI) does not constitute a prospectus, but should be read in conjunction with the Prospectus relating thereto dated June 30, 2008. Capitalized terms not defined herein are used as defined in the Prospectuses. This SAI does not include all the information that a prospective investor should consider before purchasing Common Shares in this offering, and investors should obtain and read the Prospectus prior to purchasing such shares. In addition, the Trust 's financial statements and the independent registered public accounting firm 's report thereon included in the annual shareholder report dated February 29, 2008, are incorporated herein by reference. A copy of the Prospectuses may be obtained without charge by contacting the Trust at the address and phone number written above.

The Prospectuses and SAI omit certain information contained in the registration statement filed with the U.S. Securities and Exchange Commission (SEC). The registration statement may be obtained from the SEC upon payment of the fee prescribed, or inspected at the SEC 's office for no charge. The registration statement is also available on the SEC 's website (www.sec.gov).

CHANGE OF NAME

The Trust changed its name from Pilgrim Prime Rate Trust to Pilgrim America Prime Rate Trust in April 1996, and then changed its name back to Pilgrim Prime Rate Trust on November 16, 1998. Effective March 1, 2002, the Trust changed its name to ING Prime Rate Trust.

INVESTMENT OBJECTIVE

The Trust's investment objective is to obtain as high a level of current income as is consistent with the preservation of capital. The Trust seeks to achieve its investment objective by investing under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in U.S. dollar denominated floating rate secured senior loans (Senior Loans). Under normal circumstances, the Trust invests at least 80% of its assets in Senior Loans made to corporations or other business entities organized under U.S. or Canadian law and that are domiciled in the United States and in U.S. territories and possessions, or Canada.

The Senior Loans in which the Trust invests either hold the most senior position in the capital structure of the borrower or hold an equal ranking with other senior debt or have characteristics that the Adviser or Sub-Adviser believes justify treatment as senior debt. These Senior Loans are typically below investment grade credit quality.

The Trust may also invest up to 20% of its total assets, measured at the time of investment, in a combination of one or more of the following types of investments: loans to borrowers outside the United States and U.S. territories and possessions or Canada, unsecured floating rate loans, notes and other debt securities, floating rate subordinated loans, tranches of floating rate asset-backed securities, including structured notes, short-term debt instruments equity securities acquired in connection with investments in loans and other instruments as described under

Additional Information About Investments and Investment Techniques. During periods when, in the opinion of the Trust's Adviser or Sub-Adviser, a temporary defensive posture in the market is appropriate, the Trust may hold up to 100% of its assets in cash and/or in short-term debt instruments.

INVESTMENT RESTRICTIONS

The Trust operates under a number of investment policies and restrictions. Certain investment restrictions of the Trust are designated as fundamental policies and as such may not be changed without the approval of a majority of the Trust's outstanding voting securities. In accordance with the 1940 Act, a majority of the Trust's outstanding securities means the lesser of (i) 67% or more of the Trust's shares present at a meeting, if the holders of more than 50% of the Trust's shares are present or represented by proxy, or (ii) more than 50% of the Trust's shares. The following investment restrictions have been designated as fundamental policies. The Trust will not:

1. issue senior securities, except insofar as the Trust may be deemed to have issued a senior security by reason of (i) entering into certain interest rate hedging transactions, (ii) entering into reverse repurchase agreements, (iii) borrowing money in an amount not exceeding 33¹/₃%, or such other percentage permitted by law, of the Trust's total assets (including the borrowed amount) less all liabilities other than borrowings, or (iv) issuing a class or classes of preferred shares in an amount not exceeding 50%, or such other percentage permitted by law, of the Trust's total

assets less all liabilities and indebtedness not represented by senior securities;

- invest more than 25% of its total assets in any industry;

3. invest in marketable warrants other than those acquired in conjunction with Senior Loans and such warrants will not constitute more than 5% of its assets;
4. make investments in any one issuer other than U.S. government securities if, immediately after such purchase or acquisition, more than 5% of the value of the Trust's total assets would be invested in such issuer, or the Trust would own more than 25% of any outstanding issue, except that up to 25% of the Trust's total assets may be invested without regard to the foregoing restrictions. For the purpose of the foregoing restriction, the Trust will consider the borrower of a Senior Loan to be the issuer of such Senior Loan. In addition, with respect to a Senior Loan under which the Trust does not have privity with the borrower or would not have a direct cause of action against the borrower in the event of the failure of the borrower to pay scheduled principal or interest, the Trust will also separately meet the foregoing requirements and consider each interpositioned bank (a lender from which the Trust acquires a Senior Loan) to be an issuer of the Senior Loan;
5. act as an underwriter of securities, except to the extent that it may be deemed to act as an underwriter in certain cases when disposing of its portfolio investments or acting as an agent or one of a group of co-agents in originating Senior Loans;
6. purchase or sell equity securities (except that the Trust may, incidental to the purchase or ownership of an interest in a Senior Loan, or as part of a borrower reorganization, acquire, sell and exercise warrants and/or acquire or sell other equity securities), real estate, real estate mortgage loans, commodities, commodity futures contracts, or oil or gas exploration or development programs; or sell short, purchase or sell straddles, spreads, or combinations thereof, or write put or call options;
7. make loans of money or property to any person, except that the Trust: (i) may make loans to corporations or other business entities, or enter into leases or other arrangements that have the characteristics of a loan; (ii) may lend portfolio instruments; and (iii) may acquire securities subject to repurchase agreements;
8. purchase shares of other investment companies, except in connection with a merger, consolidation, acquisition or reorganization; or
9. make investments on margin or hypothecate, mortgage or pledge any of its assets except for the purpose of securing borrowings as described above in connection with the issuance of senior securities and then only in an amount up to 33¹/₃% (50% in the case of the issuance of a preferred class of shares), or such other percentage permitted by law, of the value of the Trust's total assets (including, with respect to borrowings, the amount borrowed) less all liabilities other than borrowings (or, in the case of the issuance of senior securities, less all liabilities and indebtedness not represented by senior securities).

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

With regard to paragraph number 2 above, the Fund will consider the borrower on a loan, including a loan participation, to be the issuer of that loan. In addition, with respect to a loan under which the Fund does not have privity with the borrower or would not have a direct cause of action against the borrower in the event of the failure of the borrower to pay scheduled principal or interest, the Fund will also consider each interpositioned bank (a lender from which the Fund acquires a loan) to be an issuer of the loan.

If a percentage restriction is adhered to at the time of investment, a later increase or decrease in percentage resulting from a change in value of the Trust's investments or amount of total assets will not be considered a violation of any of the foregoing restrictions.

There is no limitation on the percentage of the Trust's total assets that may be invested in instruments which are not readily marketable or subject to restrictions on resale, and to the extent the Trust invests in such instruments, the Trust's portfolio should be considered illiquid. The extent to which the Trust invests in such instruments may affect its ability to realize the net asset value (NAV) of the Trust in the event of the voluntary or involuntary liquidation of its assets.

The Trust has also adopted a non-fundamental policy as required by Rule 35d-1 under the 1940 Act to invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in floating rate secured Senior Loans. The Trust has also adopted a policy to provide its shareholders with at least 60 days' prior notice of any change in such investment policy. If, subsequent to an investment, the 80% requirement is no longer met, the Trust's future investments will be made in a manner that will bring the Trust into compliance with this policy.

ADDITIONAL INFORMATION ABOUT INVESTMENTS AND

INVESTMENT TECHNIQUES

Some of the different types of securities in which the Trust may invest, subject to its investment objective, policies and restrictions, are described in the Prospectus under Investment Objective and Policies. Additional information concerning certain of the Trust's investments and investment techniques is set forth below.

Equity Securities

In connection with its purchase or holding of interests in loans, the Trust may acquire (and subsequently sell) equity securities or exercise warrants that it receives. The Trust will acquire such interests only as an incident to the intended purchase or ownership of loans or in connection with a reorganization of a borrower or its debt. The Trust normally will not hold more than 20% of its total assets in equity securities. Equity securities will not be treated as Senior Loans; therefore, an investment in such securities will not count toward the 80% of the Trust's net assets, plus the amount of any borrowings for investment purposes, that normally will be invested in Senior Loans. Equity securities are subject to financial and market risks and can be expected to fluctuate in value.

Lease Participations

Senior Loans that the Trust may acquire include participation interests in lease financings (Lease Participations) where the collateral quality, credit quality of the borrower and the likelihood of payback are believed by the Adviser or Sub-Adviser to be the same as those applied to conventional Senior Loans. A Lease Participation is also required to have a floating interest rate that is indexed to a benchmark indicator of prevailing interest rates, such as London Inter-Bank Offered Rate (LIBOR) or the Prime Rate.

The credit quality standards and general requirements that the Trust applies to Lease Participations including collateral quality, the credit quality of the borrower and the likelihood of payback are substantially the same as those applied to conventional Senior Loans. A Lease Participation is also required to have a floating interest rate that is indexed to the federal funds rate, LIBOR or Prime Rate in order to be eligible for investment.

The Office of the Comptroller of the Currency has established regulations which set forth circumstances under which national banks may engage in lease financings. Among other things, the regulation requires that a lease be a net-full payout lease representing the noncancelable obligation of the lessee, and that the bank make certain determinations with respect to any estimated residual value of leased property relied upon by the bank to yield a full return on the lease. The Trust may invest in lease financings only if the Lease Participation meets these banking law requirements.

Interest Rates and Portfolio Maturity

Interest rates on loans in which the Trust invests adjust periodically. The interest rates are adjusted based on a base rate plus a premium or spread over the base rate. The base rate usually is LIBOR, the Federal Reserve federal funds rate, the Prime Rate or other base lending rates used by commercial lenders. LIBOR usually is an average of the interest rates quoted by several designated banks as the rates at which they pay interest to major depositors in the London interbank market on U.S. dollar denominated deposits. The Adviser and Sub-Adviser believe that changes in short-term LIBOR rates are closely related to changes in the Federal Reserve federal funds rate, although the two are not technically linked. The Prime Rate quoted by a major U.S. bank is generally the interest rate at which that bank is willing to lend U.S. dollars to its most creditworthy borrowers, although it may not be the bank's lowest available rate.

A single loan may have multiple reset periods at the same time, with each reset period applicable to a designated portion of the loan. The maximum duration of an interest rate reset on any loan in which the Trust can invest is one year. The maximum maturity on any loan in which the Trust can invest is ten years. The Trust's portfolio of loans will ordinarily have a dollar-weighted average time until the next interest rate adjustment of ninety (90) days or less, although the time may exceed 90 days. The Trust may find it possible and appropriate to use interest rate swaps and other investment practices to shorten the effective interest rate adjustment period of loans. If the Trust does so, it will consider the shortened period to be the adjustment period of the loan. As short-term interest rates rise, interest payable to the Trust should increase. As short-term interest rates decline, interest payable to the Trust should decrease. The amount of time that will pass before the Trust experiences the effects of changing short-term interest rates will depend on the dollar-weighted average time until the next interest rate adjustment on the Trust's portfolio of loans.

Loans usually have mandatory and optional prepayment provisions. Because of prepayments, the actual remaining maturity of a loan may be considerably less than its stated maturity. If a loan is prepaid, the Trust will have to reinvest the proceeds in other loans or securities which may have a lower fixed spread over its base rate. In such a case, the amount of interest paid to the Trust would likely decrease.

In the event of a change in the benchmark interest rate on a loan, the rate payable to lenders under the loan will, in turn, reset as the applicable reset period reach their scheduled reset date. If the benchmark rate goes up, the Trust as lender would earn interest at a higher rate, but only on and after such reset date. If the benchmark rate goes down, the Trust as lender would earn interest at a lower rate, but only on and after such reset date.

During normal market conditions, changes in market interest rates will affect the Trust in certain ways. The principal effect will be that the yield on the Trust's Common Shares will tend to rise or fall as market interest rates rise and fall. This is because almost all of the assets in which the Trust invests pay interest at rates which float in response to changes in market rates. However, because the interest rates on the Trust's assets reset over time, there will be an imperfect correlation between changes in market rates and changes to rates on the portfolio as a whole. This means that changes to the rate of interest paid on the portfolio as a whole will tend to lag behind changes in market rates.

Market interest rate changes may also cause the Trust's NAV to experience moderate volatility. This is because the value of a loan asset in the Trust is partially a function of whether it is paying what the market perceives to be a market rate of interest for the particular loan, given its individual credit and other characteristics. If market interest rates change, a loan's value could be affected to the extent the interest rate paid on that loan does not reset at the same time. As discussed above, the rates of interest paid on the loans in which the Trust invests have a weighted average reset period that typically is less than 90 days. Therefore, the impact of the lag between a change in market interest rates and the change in the overall rate on the portfolio is expected to be minimal.

Finally, to the extent that changes in market rates of interest are reflected not in a change to a base rate such as LIBOR but in a change in the spread over the base rate which is payable on loans of the type and quality in which the Trust invests, the Trust's NAV could be adversely affected. Again, this is because the value of a loan asset in the Trust is partially a function of whether it is paying what the market perceives to be a market rate of interest for the particular loan, given its individual credit and other characteristics. However, unlike changes in market rates of interest for which there is only a temporary lag before the portfolio reflects those changes, changes in a loan's value based on changes in the market spread on loans in the Trust's portfolio may be of longer duration.

Other Investments

Assets not invested in Senior Loans will generally consist of other instruments, including loans to borrowers organized outside the United States and U.S. territories and possessions or Canada, unsecured floating rate loans, notes and other debt instruments, floating rate subordinated loans up to a maximum of 5% of the Trust's total assets, tranches of floating rate asset-backed securities, including structured notes, short-term debt securities, with remaining maturities of 120 days or less (which may have yields tied to the Prime Rate, commercial paper rates, the federal funds rate or LIBOR) and equity securities acquired in connection with investments in loans. Short-term debt instruments may include (i) commercial paper rated A-1 by Standard & Poor's (S&P) Ratings Services or P-1 by Moody's Investors Service, Inc. (Moody's), or of comparable quality as determined by the Adviser or Sub-Adviser, (ii) certificates of deposit, bankers' acceptances, and other bank deposits and obligations, and (iii) securities issued or guaranteed by the U.S. government, its agencies or instrumentalities. Under normal circumstances, the Trust may invest in cash and/or short-term instruments. During periods when, in the judgment of the Adviser or Sub-Adviser, a temporary defensive posture in the market is appropriate, the Trust may hold up to 100% of its assets in cash and/or in short-term debt instruments.

Repurchase Agreements

The Trust has the ability, pursuant to its investment objective and policies, to enter into repurchase agreements. A repurchase agreement is a contract under which the Trust may sell and simultaneously obtain the commitment of the purchaser to sell the security back to the Trust at an agreed upon price on an agreed upon date. Repurchase agreements will be considered borrowings by the Trust, and as such are subject to the restrictions on borrowing. Borrowings by the Trust create an opportunity for greater total return, but at the same time increase exposure to capital risk. The Trust will maintain in a segregated account with its custodian cash or liquid high grade portfolio securities in an amount sufficient to cover its obligations with respect to the repurchase agreements. The Trust will receive payment for such securities only upon physical delivery or evidence of book entry transfer by its custodian. Regulations of the SEC require either that securities sold by the Trust under a repurchase agreement be segregated pending repurchase or that the proceeds be segregated on the Trust's books and records pending repurchase. Repurchase agreements may involve certain risks in the event of default or insolvency of the other party, including possible loss from delays or restrictions upon the Trust's ability to dispose of the underlying securities.

Reverse Repurchase Agreements

The Trust has the ability, pursuant to its investment objective and policies, to enter into repurchase agreements if the asset which is the subject of the repurchase is a loan. Such agreements may be considered to be loans by the Trust for purposes of the 1940 Act. Each reverse repurchase agreement must be collateralized fully, in accordance with the provisions of Rule 5b-3 under the 1940 Act, at all times. Pursuant to such reverse repurchase agreements, the Trust acquires securities from financial institutions such as brokers, dealers and banks, subject to the seller's agreement to repurchase and the Trust's agreement to resell such securities at a mutually agreed upon date and price. The term of such an agreement is generally quite short, possibly overnight or for a few days, although it may extend over a number of months (up to one year) from the date of delivery. The repurchase price generally equals the price paid by the Trust plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). The securities underlying a reverse repurchase agreement will be marked to market every business day so that the value of the collateral is at least equal to the value of the loan, including the accrued interest thereon, and the Adviser or Sub-Adviser will monitor the value of the collateral. Securities subject to reverse repurchase agreements will be held by the custodian or in the Federal Reserve/Treasury Book-Entry System. If the seller defaults on its repurchase obligation, the Trust will suffer a loss to the extent that the proceeds from a sale of the underlying securities is less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause the Trust's rights with respect to such securities to be delayed or limited. To mitigate this risk, the Trust only enters into reverse repurchase agreements with highly rated, large financial institutions. The Trust may only enter into reverse repurchase agreements that qualify for an exclusion from any automatic stay of creditors' rights against the counterparty under applicable insolvency law in the event of the counterparty's insolvency.

Lending Loan Interests and Other Portfolio Instruments

To generate additional income, the Trust may lend its portfolio securities, including interests in Senior Loans, in an amount equal to up to 33 $\frac{1}{3}$ % of the Trust's total assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities. No lending may be made to any companies affiliated with the Adviser or Sub-Adviser. During the time portfolio securities are on loan, the borrower pays the Trust any dividends or interest paid on such securities, and the Trust may invest the cash collateral and earn additional income, or it may receive an agreed-upon amount of interest income from the borrower who has delivered equivalent collateral or a letter of credit. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower fail financially.

The Trust may seek to increase its income by lending financial instruments in its portfolio in accordance with present regulatory policies, including those of the Board of Governors of the Federal Reserve System and the SEC. The lending of financial instruments is a common practice in the securities industry. The loans are required to be secured continuously by collateral, consistent with the requirements of the 1940 Act discussed below, maintained on a current basis at an amount at least equal to the market value of the portfolio instruments loaned. The Trust has the right to call a loan and obtain the portfolio instruments loaned at any time on such notice as specified in the transaction documents. For the duration of the loan, the Trust will continue to receive the equivalent of the interest paid by the issuer on the portfolio instruments loaned and may also receive compensation for the loan of the financial instrument. Any gain or loss in the market price of the instruments loaned that may occur during the term of the loan will be for the account of the Trust.

The Trust may lend its portfolio instruments so long as the terms and the structure of such loans are not inconsistent with the requirements of the 1940 Act, which currently require that (a) the borrower

pledge and maintain with the Trust collateral consisting of cash, a letter of credit issued by a domestic U.S. bank, or securities issued or guaranteed by the U.S. government having a value at all times not less than 100% of the value of the instruments loaned, (b) the borrowers add to such collateral whenever the price of the instruments loaned rises (*i.e.*, the value of the loan is marked to market on a daily basis), (c) the loan be made subject to termination by the Trust at any time, and (d) the Trust receives reasonable interest on the loan (which may include the Trust's investing any cash collateral in interest bearing short-term investments), any distributions on the loaned instruments and increase in their market value. The Trust may lend its portfolio instruments to member banks of the Federal Reserve System, members of the New York Stock Exchange (NYSE) or other entities determined by the Adviser or Sub-Adviser to be creditworthy. All relevant facts and circumstances, including the creditworthiness of the qualified institution, will be monitored by the Adviser or Sub-Adviser, and will be considered in making decisions with respect to the lending of portfolio instruments.

The Trust may pay reasonable negotiated fees in connection with loaned instruments. In addition, voting rights may pass with loaned securities, but if a material event were to occur affecting such a loan, the Trust will retain the right to call the loan and vote the securities. If a default occurs by the other party to such transaction, the Trust will have contractual remedies pursuant to the agreements related to the transaction, but such remedies may be subject to bankruptcy and insolvency laws which could materially and adversely affect the Trust's rights as a creditor. However, the loans will be made only to firms deemed by the Adviser or Sub-Adviser to be of good financial standing and when, in the judgment of the Adviser or Sub-Adviser, the consideration which can be earned currently from loans of this type justifies the attendant risk.

Interest Rate Hedging Transactions

The Trust has the ability, pursuant to its investment objectives and policies, to engage in certain hedging transactions including interest rate swaps and the purchase or sale of interest rate caps and floors. The Trust may undertake these transactions primarily for the following reasons: to preserve a return on or value of a particular investment or portion of the Trust's portfolio, to protect against decreases in the anticipated rate of return on floating or variable rate financial instruments which the Trust owns or anticipates purchasing at a later date, or for other risk management strategies such as managing the effective dollar-weighted average duration of the Trust's portfolio. Market conditions will determine whether and in what circumstances the Trust would employ any of the hedging techniques described below.

Interest rate swaps involve the exchange by the Trust with another party of their respective commitments to pay or receive interest, *e.g.*, an exchange of an obligation to make floating rate payments on a specified dollar amount, referred to as the notional principal amount, for an obligation to make fixed rate payments. For example, the Trust may seek to shorten the effective interest rate redetermination period of a Senior Loan in its portfolio that has an interest rate redetermination period of one year. The Trust could exchange its right to receive fixed-income payments for one year from a borrower for the right to receive payments under an obligation that readjusts monthly. In such an event, the Trust would consider the interest rate redetermination period of such Senior Loan to be the shorter period.

The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The Trust will not enter into swaps, caps or floors if, on a net basis, the aggregate notional principal amount with respect to such

agreements exceeds the net assets of the Trust or to the extent the purchase of swaps, caps or floors would be inconsistent with the Trust's other investment restrictions.

The Trust will usually enter into interest rate swaps on a net basis, *i.e.*, where the two parties make net payments with the Trust receiving or paying, as the case may be, only the net amount of the two payments. The net amount of the excess, if any, of the Trust's obligations over its entitlement with respect to each interest rate swap will be accrued and an amount of cash or liquid securities having an aggregate NAV at least equal to the accrued excess will be maintained in a segregated account. If the Trust enters into a swap on other than a net basis, the Trust will maintain in the segregated account the full amount of the Trust's obligations under each such swap. The Trust may enter into swaps, caps and floors with member banks of the Federal Reserve System, members of the NYSE or other entities determined by ING Investments. If a default occurs by the other party to such transaction, the Trust will have contractual remedies pursuant to the agreements related to the transaction but such remedies may be subject to bankruptcy and insolvency laws which could materially and adversely affect the Trust's rights as a creditor. The Trust will not treat swaps covered in accordance with applicable regulatory guidance as senior securities.

The swap, cap and floor market has grown substantially in recent years with a large number of banks and financial services firms acting both as principals and as agents utilizing standardized swap documentation. As a result, this market has become relatively liquid. There can be no assurance, however, that the Trust will be able to enter into interest rate swaps or to purchase interest rate caps or floors at prices or on terms the Adviser or Sub-Adviser believes are advantageous to the Trust. In addition, although the terms of interest rate swaps, caps and floors may provide for termination, there can be no assurance that the Trust will be able to terminate an interest rate swap or to sell or offset interest rate caps or floors that it has purchased.

The successful utilization of hedging and risk management transactions requires skills different from those needed in the selection of the Trust's portfolio securities and depends on the Adviser's or Sub-Adviser's ability to predict correctly the direction and degree of movements in interest rates. Although the Trust believes that use of the hedging and risk management techniques described above will benefit the Trust, if the Adviser's or Sub-Adviser's judgment about the direction or extent of the movement in interest rates is incorrect, the Trust's overall performance would be worse than if it had not entered into any such transactions. The Trust will incur brokerage and other costs in connection with its hedging transactions.

Originating Senior Loans Reliance on Agents

The Trust has the ability to act as an agent in originating and administering a loan on behalf of all lenders or as one of a group of co-agents in originating Senior Loans. However, the Trust has not acted as agent or co-agent on any loans, and has no present intention of doing so in the future. An agent for a loan is required to administer and manage the Senior Loan and to service or monitor the collateral. The agent is also responsible for the collection of principal and interest and fee payments from the borrower and the apportionment of these payments to the credit of all lenders which are parties to the loan agreement. The agent is charged with the responsibility of monitoring compliance by the borrower with the restrictive covenants in the loan agreement and of notifying the lenders of any adverse change in the borrower's financial condition. In addition, the agent generally is responsible for determining that the lenders have obtained a perfected security interest in the collateral securing the Senior Loan.

Lenders generally rely on the agent to collect their portion of the payments on a Senior Loan and to use the appropriate creditor remedies against the borrower. Typically under loan agreements, the agent is given broad discretion in enforcing the loan agreement and is obligated to use the same care it would

use in the management of its own property. The borrower compensates the agent for these services. Such compensation may include special fees paid on structuring and funding the Senior Loan and other fees on a continuing basis. The precise duties and rights of an agent are defined in the loan agreement.

When the Trust is an agent, it has, as a party to the loan agreement, a direct contractual relationship with the borrower and, prior to allocating portions of the loan to lenders, if any, assumes all risks associated with the loan. The agent may enforce compliance by the borrower with the terms of the loan agreement. Agents also have voting and consent rights under the applicable loan agreement. Action subject to agent vote or consent generally requires the vote or consent of the holders of some specified percentage of the outstanding principal amount of the Senior Loan, which percentage varies depending on the relative loan agreement. Certain decisions, such as reducing the amount or increasing the time for payment of interest on or repayment of principal of a Senior Loan, or relating collateral therefor, frequently require the unanimous vote or consent of all lenders affected.

Pursuant to the terms of a loan agreement, the agent typically has sole responsibility for servicing and administering a loan on behalf of the other lenders. Each lender in a Senior Loan is generally responsible for performing its own credit analysis and its own investigation of the financial condition of the borrower. Generally, loan agreements will hold the agent liable for any action taken or omitted that amounts to gross negligence or willful misconduct. In the event of a borrower's default on a loan, the loan agreements provide that the lenders do not have recourse against the Trust for its activities as agent. Instead, lenders will be required to look to the borrower for recourse.

In a typical interest in a Senior Loan, the agent administers the loan and has the right to monitor the collateral. The agent is also required to segregate the principal and interest payments received from the borrower and to hold these payments for the benefit of the lenders. The Trust normally looks to the agent to collect and distribute principal of and interest on a Senior Loan. Furthermore, the Trust looks to the agent to use normal credit remedies, such as to foreclose on collateral, monitor credit loan covenants, and notify the lenders of any adverse changes in the borrower's financial condition or declarations of insolvency. At times the Trust may also negotiate with the agent regarding the agent's exercise of credit remedies under a Senior Loan. The agent is compensated for these services by the borrower as set forth in the loan agreement. Such compensation may take the form of a fee or other amount paid upon the making of the Senior Loan and/or an ongoing fee or other amount.

The loan agreements in connection with Senior Loans set forth the standard of care to be exercised by the agents on behalf of the lenders and usually provide for the termination of the agent's agency status in the event that it fails to act properly, becomes insolvent, enters FDIC receivership, or if not FDIC insured, enters into bankruptcy or if the agent resigns. In the event an agent is unable to perform its obligations as agent, another lender would generally serve in that capacity.

Additional Information on Senior Loans

Senior Loans are direct obligations of corporations or other business entities and are arranged by banks or other commercial lending institutions and made generally to finance internal growth, mergers, acquisitions, stock repurchases, and leveraged buyouts. Senior Loans usually include restrictive covenants which must be maintained by the borrower. Such covenants, in addition to the timely payment of interest and principal, may include mandatory prepayment provisions arising from free cash flow and restrictions on dividend payments, and usually state that a borrower must maintain specific minimum financial ratios as well as establishing limits on total debt. A breach of covenant, which is not waived by the agent, is normally an event of acceleration, *i.e.*, the agent has the right to call the outstanding Senior Loan. In addition, loan covenants may include mandatory prepayment provisions stemming from free cash flow. Free cash flow is cash that is in excess of capital expenditures plus debt service requirements.

of principal and interest. The free cash flow shall be applied to prepay the Senior Loan in an order of maturity described in the loan documents. Under certain interests in Senior Loans, the Trust may have an obligation to make additional loans upon demand by the borrower. The Trust intends to ensure its ability to satisfy such demands by segregating sufficient assets in high quality short-term liquid investments or by sufficiently maintaining unused borrowing capacity.

In a typical interest in a loan, the agent administers the loan and has the right to monitor the collateral. The agent is also required to segregate the principal and interest payments received from the borrower and to hold these payments for the benefit of the lenders. The Fund normally looks to the agent to collect and distribute principal of and interest on a loan. Furthermore, the Fund looks to the agent to use normal credit remedies, such as to foreclose on collateral, monitor loan covenants, and notify the lenders of any adverse changes in the borrower's financial condition or declarations of insolvency. At times the Fund may also negotiate with the agent regarding the agent's exercise of credit remedies under a loan. The agent is compensated for these services by the borrower as set forth in the loan agreement. Such compensation may take the form of a fee or other amount paid upon the making of the loan and/or an ongoing fee or other amount.

The loan agreements in connection with the loans set forth the standard of care to be exercised by the agents on behalf of the lenders and usually provide for the termination of the agent's agency status in the event that it fails to act properly, becomes insolvent, enters FDIC receivership, or if not FDIC insured, enters into bankruptcy or if the agent resigns. In the event an agent is unable to perform its obligations as agent, another lender would generally serve in that capacity.

The Fund believes that the principal credit risk associated with acquiring loans from another lender is the credit risk associated with the borrower of the underlying loan. The Fund may incur additional credit risk, however, when the Fund acquires a participation in a loan from another lender because the Fund must assume the risk of insolvency or bankruptcy of the other lender from which the loan was acquired. However, in acquiring loans, the Fund conducts an analysis and evaluation of the financial condition of each such lender. In this regard, if the lenders have a long-term debt rating, the long-term debt of all such participants is rated BBB or better by S&P or Baa or better by Moody's, or has received a comparable rating by another nationally recognized rating service. In the absence of rated long-term debt, the lenders or, with respect to a bank, the holding company of such lenders have commercial paper outstanding which is rated at least A-1 by S&P or P-1 by Moody's. In the absence of such rated long-term debt or rated commercial paper, the Fund may acquire participations in loans from lenders whose long-term debt and commercial paper is of comparable quality to the foregoing rating standards as determined by the Adviser under the supervision of the Trustees. The Fund also diversifies its portfolio with respect to lenders from which the Fund acquires loans. See Investment Restrictions.

Senior Loans, unlike certain bonds, usually do not have call protection. This means that investments comprising the Trust's portfolio, while having a stated one to ten-year term, may be prepaid, often without penalty. The Trust generally holds Senior Loans to maturity unless it becomes necessary to sell them to adjust the Trust's portfolio in accordance with the Adviser's or Sub-Adviser's view of current or expected economic or specific industry or borrower conditions.

Senior Loans frequently require full or partial prepayment of a loan when there are asset sales or a securities issuance. Prepayments on Senior Loans may also be made by the borrower at its election. The rate of such prepayments may be affected by, among other things, general business and economic conditions, as well as the financial status of the borrower. Prepayment would cause the actual duration of a Senior Loan to be shorter than its stated maturity. Prepayment may be deferred by the Trust. This should, however, allow the Trust to reinvest in a new loan and recognize as income any unamortized loan fees. In many cases this will result in a new facility fee payable to the Trust.

Because interest rates paid on these Senior Loans fluctuate periodically with the market, it is expected that the prepayment and a subsequent purchase of a new Senior Loan by the Trust will not have a material adverse impact on the yield of the portfolio. See Portfolio Transactions.

Under a Senior Loan, the borrower generally must pledge as collateral assets which may include one or more of the following: cash, accounts receivable, inventory, property, plant and equipment, both common and preferred stock in its subsidiaries, trademarks, copyrights, patent rights and franchise value. The Trust may also receive guarantees as a form of collateral. In some instances, a Senior Loan may be secured only by stock in a borrower or its affiliates. There is no assurance, however, that the liquidation of the existing collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated.

Loan Participation and Assignments

The Trust's investment in loan participations typically will result in the Trust having a contractual relationship only with the lender and not with the borrower. The Trust will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing participation, the Trust generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any right of set-off against the borrower, and the Trust may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the Trust may be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the Trust may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

When the Trust purchases a loan assignment from lenders, it will acquire direct rights against the borrowers on the loan. Because assignments are arranged through private negotiations between potential assignees and potential assignors, however, the rights and obligations acquired by the Trust as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. Because there is no liquid market for such securities, the Trust anticipates that such securities could be sold only to a limited number of institutional investors. The lack of a liquid secondary market may have an adverse impact on the value of such securities and the Trust's ability to dispose of particular assignments or participation when necessary to meet redemption of Trust shares, to meet the Trust's liquidity needs or when necessary in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. The lack of a liquid secondary market for assignments and participation also may make it more difficult for the Trust to value these securities for purposes of calculating its NAV.

The Trust may be required to pay and receive various fees and commissions in the process of purchasing, selling and holding loans. The fee component may include any, or a combination of, the following elements: arrangement fees, assignment fees, non-use fees, facility fees, letter of credit fees and ticking fees. Arrangement fees are paid at the commencement of a loan as compensation for the initiation of the transaction. A non-use fee is paid based upon the amount committed but not used under the loan. Facility fees are on-going annual fees paid in connection with a loan. Letter of credit fees are paid if a loan involves a letter of credit. Ticking fees are paid from the initial commitment indication until loan closing if for an extended period. The amount of fees is negotiated at the time of transaction.

TRUSTEES AND OFFICERS**Management of the Trust**

The Trust is governed by its Board of Trustees (Board). A trustee who is not an interested person of the Trust, as defined in the 1940 Act, as amended, is an independent trustee (Independent Trustee). The Trustees of the Trust are listed below.

Name, Address and Age	Position(s) Held With Trust	Term of Office and Length of Time Served(1)	Principal Occupation(s) During the Past 5 Years	Number of Funds in Fund Complex Overseen by Trustee(2)	Other Directorships/Trusteeships Held by Trustee
Independent Trustees

(March 2006 Present).

- (1) Trustees serve until their successors are duly elected and qualified, subject to the Board's retirement policy which states that each duly elected or appointed Trustee who is not an interested person of the Trusts, as defined in the 1940 Act, as amended (Independent Trustees), shall retire from service as a Trustee at the first regularly scheduled quarterly meeting of the Board that is held after: (a) the Trustee reaches the age 70, if that Trustee qualifies for a retirement benefit as discussed in the Board's retirement policy; or (b) the Trustee reaches the age of 72 or has served as a Trustee for 15 years, if that Trustee does not qualify for the retirement benefit. A unanimous vote of the Board may extend the retirement date of a Trustee for up to one year. An extension may be permitted if the retirement would trigger a requirement to hold a meeting of shareholders of the Trust under applicable law, whether for purposes of appointing a successor to the Trustee or if otherwise necessary under applicable law, in which case the extension would apply until such time as the shareholder meeting can be held or is no longer needed.
- (2) For the purposes of this table, ING Fund Complex means the following investment companies: ING Asia Pacific High Dividend Equity Income Fund, ING Equity Trust; ING Funds Trust; , ING Global Advantage and Premium Opportunity Fund; ING Global Equity Dividend and Premium Opportunity Fund; ING International High Dividend Equity Income Fund.; ING Investors Trust; ING Mayflower Trust; ING Mutual Funds; ING Partners, Inc.; ING Prime Rate Trust; ING Risk Managed Natural Resources Fund; ING Senior Income Fund; ING Separate Portfolios Trust; ING Variable Insurance Trust; and ING Variable Products Trust. The number of Funds in the Fund Complex is as of May 31, 2008.
- (3) Ms. Baldwin, Messrs. Crispin, Drotch and Mathews each commenced services as a Trustee November 28, 2007.
- (4) Shaun Mathews, President and Chief Executive Officer, ING Investments, LLC, and Head of ING USFS Mutual Funds and Investment Products, has held a seat on the Board of Directors of The Mark Twain House & Museum since September 19, 2002. ING Groep N.V. makes non-material, charitable contributions to The Mark Twain House & Museum.
- (5) Retired partner Pricewaterhouse Coopers.
- (6) Messrs. Crispin and Mathews are deemed to be interested persons of the Trust as defined in the 1940 Act because of their relationship with ING Groep., N.V., the parent corporation of the Adviser, ING Investments, LLC and the distributor, ING Funds Distributor, LLC.
- (7) Mr. Mathews is also a director of the following investment companies: ING VP Balanced Portfolio, Inc.; ING Strategic Allocation Portfolio, Inc.; ING GET Fund; ING VP Intermediate Bond Portfolio; ING VP Money Market Portfolio; ING Variable Funds; ING Variable Portfolios, Inc.; and ING Series Fund, Inc. Therefore, for the purposes of this table with reference to Mr. Mathews, Fund Complex includes these investment companies.
- (8) ING Funds Distributor, LLC is the successor in interest to ING Funds Distributor, Inc. which was previously known as ING Pilgrim Securities, Inc. and prior to that was known as Pilgrim America Securities, Inc.
- (9) ING Funds Services, LLC was previously named ING Pilgrim Group, LLC. ING Pilgrim Group, LLC is the successor in interest to ING Pilgrim, Inc. which was previously known as Pilgrim Group, Inc. and prior to that was known as Pilgrim America Group, Inc.

Board

The Board governs the Trust and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who oversee the Trust's activities, review contractual arrangements with companies that provide services to the Trust, and review the Trust's performance.

Frequency of Board Meetings

The Board currently conducts regular meetings eight (8) times a year. The Audit Committee and the Compliance Committee each meets regularly four (4) times per year; the Investment Review Committees meet six (6) times per year; the Contracts Committee meets seven (7) times per year; and the remaining Committees meet as needed. In addition, the Board or the Committees may hold special meetings by telephone or in person to discuss specific matters that may require action prior to the next regular meeting. Each Committee listed below operates pursuant to a Charter approved by the Board.

Recent Committee Changes

Effective March 27, 2008, November 28, 2007, and May 10, 2007, changes were made to the Board's Committee structure. In particular, the Committee memberships changed on those dates, and these changes are reflected in the discussion of the Committees that is set out below. Prior to May 10, 2007, the Board had a Valuation, Proxy and Brokerage Committee. Effective May 10, 2007, the functions of the Valuation, Proxy and Brokerage Committee and the Compliance Committee were combined. The Compliance Committee was the surviving Committee, and now oversees valuation, proxy and brokerage matters, as well as compliance issues. We also note that Roger Vincent became the Chairman of the Board effective May 10, 2007. Prior to that date, Jock Patton served as the Chairman of the Board.

Committees

Executive Committee. The Board has established an Executive Committee whose function is to act on behalf of the full Board between meetings, when necessary. The Executive Committee currently consists of three (3) Independent Trustees and two (2) Trustees who are interested persons, as defined in the Investment Company Act of 1940, as amended (1940 Act) of the Trust. The following Trustees serve as members of the Executive Committee: Ms. Pressler and Messrs. Boyer, Crispin, Mathews and Vincent. Mr. Vincent, Chairman of the Board, serves as the Chairperson of the Executive Committee.

From May 10, 2007 to November 28, 2007, the Executive Committee consisted of the following Trustees: Ms. Pressler and Messrs. Turner, Boyer and Vincent and Mr. Vincent served as the Chairperson. Prior to May 10, 2007 the following Trustees served as members of the Executive Committee: Messrs. Turner, Vincent and Patton. Mr. Patton served as Chairperson of the Executive Committee.

The Executive Committee held four (4) meetings during the fiscal year ended February 29, 2008.

Audit Committee. The Board has established an Audit Committee whose functions include, among others, meeting with the independent registered public accounting firm of the Trust to review the scope of the Trust's audit, its financial statements and interim accounting controls, and meeting with management concerning these matters. The Audit Committee currently consists of three (3) Independent Trustees. The following Trustees serve as members of the Audit Committee: Ms. Chadwick and Messrs. Drotch and Earley. Mr. Earley currently serves as Chairperson of the Audit Committee, and also has been designated as the Audit Committee's financial expert under the Sarbanes-Oxley Act.

Edgar Filing: ING PRIME RATE TRUST - Form POS 8C

From May 10, 2007 to November 28, 2007 the Audit Committee consisted of the following Trustees: Ms. Chadwick and Messrs. Earley and Putnam. Mr. Early served as the Chairperson and the financial expert under the Sarbanes-Oxley Act for the Committee. Prior to May 10, 2007, the following Trustees served as members of the Audit Committee: Messrs. Earley, Kenny, Vincent, and Putnam and Ms. Pressler. During the period prior to May 10, 2007, Mr. Earley served as Chairperson of the Audit Committee, and Mr. Kenny was designated as the Audit Committee's financial expert under the Sarbanes-Oxley Act.

The Audit Committee held six (6) meetings during the fiscal year ended February 29, 2008.

Compliance Committee. The Board has established a Compliance Committee for the purpose of, among others things, coordinating activities between the Board and the Chief Compliance Officer (CCO) of the Trust. The Compliance Committee facilitates the information flow among Board members and the CCO between Board meetings; works with the CCO and management to identify the types of reports to be submitted by the CCO to the Compliance Committee and the Board; coordinates CCO oversight activities with other ING Fund boards; and makes recommendations regarding the role, performance and oversight of the CCO. The Board also oversees quarterly compliance reporting.

Effective May 10, 2007, the functions of the Board's Valuation, Proxy and Brokerage Committee were combined with the functions of the Compliance Committee. As a result of this combination, the functions of the Compliance Committee now include determining the value of securities held by the Trust for which market value quotations are not readily available; overseeing management's administration of proxy voting; and overseeing the effectiveness of the investment adviser's usage of the Trust's brokerage and the adviser's compliance with changing regulations regarding the allocation of brokerage for services (other than pure trade executions).

The Compliance Committee currently consists of five (5) Independent Trustees: Messes. Baldwin and Pressler and Messrs. Boyer, Kenny and Vincent. Mr. Kenny currently serves as Chairperson of the Compliance Committee.

From May 10, 2007 to November 28, 2007, the Compliance Committee consisted of the following Trustees: Ms. Pressler and Messrs. Boyer, Kenny and Vincent. Mr. Kenny served as the Chairperson for the Committee. Prior to May 10, 2007, the Compliance Committee consisted of five (5) Independent Trustees: Messrs. Boyer, Earley, Putnam, Kenny and Patton. Mr. Kenny served as Chairperson of the Compliance Committee during the period prior to May 10, 2007.

The Compliance Committee held four (4) **meetings** during the fiscal year ended February 29, 2008.

Valuation, Proxy and Brokerage Committee.
