Yes No

Release 18 June 2008, Lisbon

Meo surpasses 100 thousand customers

Portugal Telecom announced today that Meo, its pay-TV service, surpassed 100 thousand customers. Meo customers already represents 15% of PT's ADSL customers and 3.7% of its traffic generating lines. Net additions in the quarter to date surpassed 53 thousand customers, more than doubling the net additions of 1Q08.

Meo, the integrated offer of voice, internet and television services, represents a key lever of PT's strategy to strengthen the value proposition to its residential customers, which is based on a multiplatform concept that is intended to provide the same content, regardless of the customer interface. The IPTV platform over ADSL2+ provides a triple-play service mainly in urban areas. Additionally, Portugal Telecom launched in record time a satellite (DTH - direct to home) platform to provide nationwide coverage with a fast time to market. Portugal Telecom is also participating in the digital terrestrial television contest (DTT), in the mux A (free-to-air) and muxes B-F (pay-TV), with the aim of complementing its existing television distribution technologies.

Meo provides access to a comprehensive content offering, with more than 100 channels available in the pay-TV service and flexibility in the choice of the channels, which are tiered in packages, and that can be subscribed directly through the TV set in real time. In addition, Meo also provides to the customer access to a set of advanced features such as digital recording, pause-TV, video-on-demand catalogue with more than 1,000 titles, high definition (HD) channels. Without legacy constraints, the set-top boxes in the Meo service are all HD compliant, using MPEG4.

Portugal Telecom has since launch been reinforcing its offer with new features and content. On 1 June 2008, PT included also the Disney channel in its basic pay-TV offer, thus providing access to this reference children's channel for the entire customer base. On 7 June 2008, Portugal Telecom, in an exclusive partnership with TVI, broadcasted the first free-to-air emission in HD to all Meo customers, also making available the Euro 2008 football championship in this format. Meo will also broadcast the Olympic Games in HD, in partnership with Eurosport.

On 2 April 2008, Portugal Telecom launched an extensive marketing campaign around Meo, which was advertised for the first time in April by four Portuguese well known comedians, Gato Fedorento. In just a few weeks, this campaign pushed the brand notoriety of Meo, measured by proved ad recall, to more than 40%.

With the implementation of this strategy, PT aims to enhance average revenue per user through the up-selling of additional services whilst contributing to increased customer retention through an attractive service offer at competitive triple-play prices. The implementation of this strategy is already reflected in the ability of Portugal Telecom to regain customers in the competitive residential market. In effect, 40% of Meo IPTV net additions are new customers to PT.

PT's Meo television offering is an investment in excellence and innovation to provide an experience of next generation television. Portugal Telecom will continue to invest in the quality of service and innovation of Meo, in order to provide more and better services to its customers.
