Lisbon, Portugal, 6 August 2009

In 1H09, consolidated operating revenues amounted to Euro 3,231 million, a decrease of 0.3% y.o.y, and EBITDA reached Euro 1,197 million, an increase of 0.5% y.o.y. EBITDA margin increased by 0.3pp in 1H09 to 37.1%. Adjusting for the effects of the consolidation of Telemig, lower mobile termination rates (MTRs) and using constant exchange rate, consolidated operating revenues and EBITDA would have grown by 4.4% and by 4.5% y.o.y, respectively. Income from operations reached Euro 484 million. Net income amounted to Euro 256 million, an increase of 1.7% y.o.y, while basic earnings per share increased by 9.6% y.o.y to Euro 0.29. Capex amounted to Euro 506 million, compared to Euro 358 million in 1H08, an increase of 41.1% y.o.y, as a result of the investments in the rollout of the fibre network and the TV service in Portugal and of the investments in 3G and 3.5G in Brazil. Free cash flow increased from Euro 7 million to Euro 135 million in 1H09, as investments in 1H08 included the acquisition of Telemig.

As at 30 June 2009, net debt amounted to Euro 6,156 million and after-tax unfunded post retirement benefit obligations totalled Euro 1,291 million. Liquidity including cash, undrawn underwritten commercial paper and standby facilities stood at Euro 1,779 million.

## Financial Review

## Income Statement

In 1H09, consolidated operating revenues decreased by 0.3% y.o.y to Euro 3,231 million, as a result of the negative impact of the 41% decline in MTRs between 30 June 2008 and 30 June 2009 at TMN, which more than offset growth in wireline and Vivo. Adjusting for the effects of the consolidation of Telemig, lower MTRs and using constant exchange rate, consolidated operating revenues would have increased by 4.4% y.o.y.

(1) Considering a Euro/Real average exchange rate of 2.5946 in 1H08 and 2.9214 in 1H09. (2) The wireline and domestic mobile operating revenues include the impact of the decline in regulated mobile termination rates (MTRs). At TMN this impact amounted to Euro 40.3 million in 1H09 and Euro 21.5 million in 2Q09. (3) EBITDA = income from operations + post retirement benefits + depreciation and amortisation.

## Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

(4) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + other costs (gains).

In 1H09, wireline operating revenues increased by 1.2% y.o.y, supported by the inflection of retail revenues, which posted a 1.2% increase y.o.y, as a result of the continued strong performance of triple-play, pay-TV, broadband and its positive impact in the improvement of the trend of line loss.

## Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

The success of PT's triple-play and pay-TV offer (Meo) is demonstrated by strong growth in retail net additions, which reached 137 thousand in 1H09, underpinned by decelerating line loss and growth in flat fee broadband customers. Line loss reached 65 thousand in 1H09 compared to 110 thousand lines in 1H08. At the same time, PT continued to gain broadband market share as flat fee broadband net additions reached 78 thousand in 1H09 compared to 30 thousand in 1H08. As a result of this improved performance, PT had 443 thousand pay-TV customers at the end of 1H09, with 131 thousand net additions during the period, and equivalent to 56.7% penetration of the ADSL customer base. The ADSL retail customer base increased by 71 thousand customers, equivalent to a growth of 19.9% y.o.y, thus taking the number of ADSL customers to 781 thousand.

TMN's operating revenues decreased by 4.6% y.o.y due to the impact of lower MTRs (Euro 40 million), which more than offset the continued growth in customer revenues (+1.9% y.o.y in 1H09). Data revenues increased by 13.7% y.o.y in 1H09, and already account for 22.7% of service revenues. Excluding the impact of lower MTRs, TMN's operating revenues would have increased by 0.6% y.o.y in 1H09, underpinned by growth in customer revenues of 1.9% y.o.y.

Revenues from domestic operations decreased by 1.5% y.o.y in 1H09 in great part due to substantially lower equipment sales, which declined by Euro 15 million, from 1H08 to 1H09. The financial performance of the domestic operations was also negatively impacted by lower MTRs. Excluding this adverse impact of MTRs, revenues from the domestic operations would have increased by 1.1% y.o.y.

Vivo's operating revenues increased by 0.8% y.o.y in Euros and by 13.5% y.o.y in Reais, on the back of continued customer growth (15.8% increase y.o.y in the customer base). Excluding the consolidation of Telemig and using constant exchange rate, Vivo's operating revenues would have increased by 7.7% y.o.y, with service revenues growing by 9.6% y.o.y.

Other revenues, including intra-group eliminations, increased by 5.5% y.o.y, in 1H09, mainly due to the improved revenue performance of PT's call centre business in Brazil, MTC in Namibia and Timor Telecom, which more than offset the loss of fees resulting from the termination of the management contract with Vivo in August 2008.

(1) Domestic operations include the wireline segment, domestic mobile, PT Inovação, PT SI, PT Pro and PT Contact. (2) Considering a Euro/Real average exchange rate of 2.5946 in 1H08 and 2.9214 in 1H09. Includes mainly Vivo and Dedic. (3) Includes fully consolidated international assets, namely MTC, CVT, CST and Timor Telecom, and also the holding companies.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

The contribution from fully and proportionally consolidated international assets to operating revenues increased from 48.8% in 1H08 to 49.8% in 1H09. Brazil accounted for 46.1% of consolidated operating

revenues, an increase of 0.7pp over 1H08, despite the adverse impact of the depreciation of the Real against the Euro in the period.

EBITDA increased by 0.5% y.o.y, in 1H09, to Euro 1,197 million, equivalent to a margin of 37.1%. Excluding the effects of the consolidation of Telemig, lower MTRs and using constant exchange rate, consolidated EBITDA would have increased by 4.5% y.o.y. EBITDA performance in the period was supported by growth at Vivo and other international assets, which was partially offset by the decrease in the domestic businesses, as a result of investments in triple-play, pay-TV and wireless broadband and the termination of Vivo's management fee.

Wireline EBITDA amounted to Euro 409 million in 1H09, equivalent to a 42.3% margin. EBITDA margin continued to be impacted primarily by higher programming, customer care and support service costs related to the roll-out of the pay-TV service. In 1H09, wages and salaries in the wireline segment increased by 1.5% y.o.y as a result of the decision to halt the redundancy programme and focus on insourcing, which in turn led to the reduction of the obligations related to salaries to pre-retired and suspended employees (Euro 53 million in 1H09) and corresponding cash payments.

In 1H09, TMN's EBITDA decreased by 1.7% y.o.y to Euro 331 million mainly as a result of the decrease in MTRs. EBITDA margin stood at 45.0%. Excluding the negative impact of Euro 20.6 million due to lower MTRs, TMN's EBITDA would have increased by 4.4% y.o.y in 1H09, as a result of strict cost discipline and growth in customer revenues.

In 1H09, Vivo's EBITDA increased by 20.4% y.o.y in 1H09, underpinned by customer growth and strict cost control. Excluding the consolidation of Telemig and using constant exchange rate, Vivo's EBITDA would have increased by 29.5% y.o.y. Vivo's EBITDA margin reached 29.0% in 1H09, an improvement of 4.7pp versus 1H08.

Other EBITDA decreased by 16.7% y.o.y to Euro 39 million in 1H09, mainly as a result of the loss of fees due to the termination of Vivo's management contract as from August 2008, notwithstanding the improved performance of MTC, in Namibia, and Timor Telecom.

(3) Domestic operations includes the wireline segment, domestic mobile, PT Inovação, PT SI, PT Pro and PT Contact. (4) Includes mainly Vivo and Dedic. (5) Includes only fully consolidated international assets, namely MTC, CVT, CST and Timor Telecom, and also the holding companies.

Fully and proportionally consolidated international assets contributed to 41.1% of PT's consolidated EBITDA in 1H09, up from 34.6% in 1H08. Brazilian businesses accounted for 35.3% of EBITDA in 1H09, which compares to 29.8% in 1H08. EBITDA of the fully consolidated African businesses in 1H09 accounted for 4.7% of consolidated EBITDA, an increase of 0.6 pp y.o.y.

Post retirement benefit costs amounted to Euro 45 million in 1H09, compared to Euro 22 million in 1H08, primarily as a result of lower expected return on assets (Euro 20 million), following the devaluation of fund assets under management that occurred in 2008 due to market conditions.

Depreciation and amortisation costs increased by 9.6% y.o.y to Euro 668 million, reflecting higher contributions from: (1) Vivo, which accounted for approximately 78% of the increase in D&A, as a result of the acquisition and consolidation of Telemig and higher depreciation rates for the CDMA network, following the GSM network rollout, partially offset by the impact of the depreciation of the Real against the Euro in 1H09, and (2) the wireline business in Portugal, resulting from the investments in the rollout of pay-TV service, and also from the revaluation of ducts and certain real estate assets undertaken in 2008. Excluding the effects of the consolidation of Telemig and using constant exchange rate, consolidated D&A would have increased by 11.8% y.o.y.

Curtailement costs amounted to Euro 3 million in 1H09, as compared to Euro 78 million in the same period of last year, due to the halting of the redundancy programme.

Net losses on disposal of fixed assets amounted to Euro 0.1 million in 1H09, as compared to net gains of Euro 13 million in the same period of last year. Gains recorded in 1H08 were related to real estate disposals, which generated a cash inflow of Euro 15 million in the period.

Net interest expenses increased to Euro 145 million, equivalent to an increase of 25.2% y.o.y, of which: (1) Euro 22 million was due to the increase in PT's average net debt in the period, post completion of the share buyback programme undertaken in 2008 and to the acquisitions of Telemig and 3G licences in Brazil, and (2) Euro 5 million due to the increase in the average cost of debt in Brazil. In 1H09, consolidated average cost of debt was 4.9%. Excluding Brazil, the average cost of debt was 4.0% versus 4.0% in 1H08.

Equity in earnings of affiliates includes primarily PT's share in the earnings of Unitel, CTM, Médi Télécom and UOL, and amounted to Euro 102 million in 1H09, compared to Euro 74 million in 1H08, up by 37.3% y.o.y. In 1H08, equity in earnings of affiliates included a Euro 9 million gain related to the disposal of PT's interest in Banco Best.

Net other financial losses, which include foreign currency gains, net gains on financial assets and other financial expenses, amounted to Euro 12 million in 1H09, as compared to Euro 32 million in 1H08. Net foreign currency gains amounted to Euro 2 million in 1H09, an improvement over the net losses of Euro 13 million in 1H08, which were mainly related to the impact of the depreciation of the US Dollar against the Euro on net assets denominated in US Dollars. Net gains on financial assets amounted to Euro 7 million in 1H09 (losses of Euro 4 million in 1H08) due to the change in fair value of free-standing cross-currency derivative instruments. Other financial expenses, which include banking services, commissions, financial discounts and other financing costs, increased to Euro 21 million in 1H09, compared to Euro 15 million in 1H08.

Provision for income taxes increased from Euro 114 million in 1H08 to Euro 118 million in 1H09 corresponding to an effective tax rate of 28.0% in 1H08 and 28.6% in 1H09.

Income attributable to minority interests decreased to Euro 38 million in 1H09, compared to Euro 42 million in 1H08. The reduction in this caption is primarily attributable to the decrease in minority interests from: (1) Vivo, which amounted to Euro 13 million in 1H09 compared to Euro 16 million in 1H08, and (2) Africatel, which amounted to Euro 21 million in 1H09 compared to Euro 24 million in 1H08. The reduction in Vivo's minority interests is mainly related to the increase in D&A costs, in part related to the acquisition of Telemig, which more than offset the impact of the improvement in EBITDA.

Net income increased by 1.7% y.o.y in 1H09 to Euro 256 million, compared to Euro 252 million in 1H08. In addition to the EBITDA increase in the period, PT benefited from lower curtailment costs and higher income from affiliates, which more than offset higher post retirement benefits, depreciation and amortisation and interest costs. In 1H08, net income included a Euro 13 million gain related to real estate disposals and a Euro 9 million gain related to the disposal of PT's interest in Banco Best.

#### Earnings per Share

In 1H09, basic earnings per share increased by 9.6% y.o.y to Euro 29 cents, benefiting from the reduction in the number of shares outstanding following the completion of the share buyback programme.

The average number of shares outstanding decreased by 7.2% to 876 million in 1H09, whilst the diluted average number of shares outstanding over the same period declined by 6.8% to 941 million. At the end of June 2009, the number of shares outstanding, adjusted for the 20.6 million own shares recognised in the statement of financial position, was 876 million.

Capex

## Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Total capex increased by 41.1% y.o.y in 1H09 to Euro 506 million, equivalent to 15.7% of revenues, as a result of growth in wireline and Vivo, which more than offset capex reductions at TMN.

Wireline capex increased from Euro 126 million in 1H08 to Euro 227 million in 1H09, primarily as a result of: (1) the FTTH rollout and investments in network upgrades to provide increased bandwidth, related to the continued success of IPTV services, and (2) a strong growth in pay-TV net additions resulting in increased customer-related capex (Euro 35 million) during 1H09.

TMN's capex decreased by 27.6% y.o.y to Euro 58 million in 1H09. The decrease in TMN's capex is primarily explained by the investments in the continued deployment of 3G/3.5G networks, both in terms of capacity and coverage, carried out in 2008, which resulted in improved quality of mobile voice and data services in Portugal. As a result, in a recent study undertaken by the Portuguese telecoms regulator, TMN was considered as having the most reliable and stable network performance in Portugal.

(1) Considering a Euro/Real average exchange rate of 2.5946 in 1H08 and 2.9214 in 1H09. (2) Excludes additional commitments under the terms of the UMTS licence (Euro 11.5 million in 1H09). (3) Excludes the acquisition of 3G licences in Brazil (Euro 227 million in 2Q08).

Capex at Vivo increased from Euro 128 million in 1H08 to Euro 191 million in 1H09. Excluding the consolidation of Telemig (Euro 7 million) and the depreciation of the Real against the Euro (Euro 23 million), capex at Vivo would have increased by 61.7% y.o.y. Capex at Vivo was primarily directed towards: (1) increasing network capacity to support the accelerated growth experienced by Vivo, namely in GSM / EDGE; (2) expanding coverage of WCDMA / HSUPA network; (3) continued expansion of coverage in the Northeast states following the launch of the service in October 2008, and (4) continued improvement in network quality to meet the objectives set forth by the local regulator.

In 1H09, other capex increased to Euro 29 million, compared to Euro 24 million in 1H08, primarily due to the increase in capex related to PT's businesses in Africa, namely MTC and CVT, and related to Timor Telecom, which more than offset the decrease in capex of the call centre business in Brazil.

#### Cash Flow

Operating cash flow decreased to Euro 476 million in 1H09, compared to Euro 717 million in 1H08, primarily due to the reduction in EBITDA minus Capex, as a result of the 41.1% increase in capex, and an increase in working capital investment. The increase in working capital investment is mainly explained by: (1) one-off cash receipts in 1H08 from Zon and the settlement with the Portuguese State of discounts granted to retirees; (2) Vivo's management fees received in 1H08 (Euro 15 million), and (3) higher capex in 4Q08 as compared to 4Q07, resulting in higher payments to fixed assets suppliers in 1H09 as compared to 1H08.

Free cash flow amounted to Euro 135 million in 1H09, which compares to Euro 7 million in 1H08. This increase is primarily explained by the investment in the acquisition of Telemig in 1H08 (Euro 327 million), the decrease in income taxes paid (Euro 66 million), and the decrease in contributions and payments related to PRBs, following the decision, at the end of 2008, to halt the redundancy programme. These effects more than offset: (1) the reduction in operating cash flow described above; (2) the increase in interest paid (Euro 23 million), due to higher average net debt and an increase in the average cost of debt in Brazil, and (3) the disposal of the investment in Banco Best in 1H08 (Euro 16 million).

(1) In 1H08, PT paid Euro 64 million in Portugal regarding the fourth and last instalment of income taxes related to 2007. In 1H09, there were no ordinary taxes paid in the domestic businesses, as the payments on account made during 2008 were higher than the tax payable. (2) In 1H08, this caption included Euro 15 million of cash proceeds from real estate asset disposals.

## Consolidated Net Debt

Consolidated net debt amounted to Euro 6,156 million as at 30 June 2009, compared to Euro 5,571 million as at 31 December 2008, an increase of Euro 585 million mainly due to the dividends paid by PT, amounting to Euro 504 million, and the appreciation of the Brazilian Real against the Euro, leading to an increase in net debt of Euro 128 million, thus offsetting the cash flow generated in the period.

As at 30 June 2009, total consolidated gross debt amounted to Euro 7,577 million, of which 85.6% was medium/long-term and 59.2% was set at fixed rates. As at 30 June 2009, 85.2% of total debt was denominated in Euros and 14.8% in Brazilian Reais. Vivo's debt is either Real-denominated or has been hedged into Reais.

(1) PT settled an Euro-Dollar derivative in April, 7 which resulted in a payment of Euro 38 million. As such, PT no longer holds any free standing derivatives on its domestic businesses. (2) In 1H08, PT contracted equity swaps over 89.2 million own shares under the share buyback programme concluded in December 2008. (3) This caption includes mainly Euro 45 million related to dividends paid by PT's fully consolidated subsidiaries to minority shareholders (Euro 12 million in 1H08), net of Euro 13 million related to the cash contribution of minority shareholders to a share capital increase at Vivo Participações.

The amount of cash available in the domestic operations plus the undrawn amount of committed commercial paper lines and standby facilities totalled Euro 1,779 million at the end of June 2009, of which Euro 906 million was undrawn committed commercial paper and standby facilities. In April 2009, PT repaid

Euro 880 million in an existing bond and issued a Euro 1 billion 4-year bond, thus increasing its liquidity position and the average maturity of its debt. In addition, PT issued Euro 450 million, during 1H09, which includes a tap of the 2012 Euro Bond, new bilateral lines and private placements.

PT's average cost of debt was 4.9% in 1H09, with a maturity of 5.2 years as at 30 June 2009. Excluding Brazil, PT's average cost of debt was 4.0% in 1H09, with a maturity of 5.1 years as at 30 June 2009. In 1H09, the net debt to EBITDA ratio was 2.6x (2.4x in 1H08) and EBITDA cover stood at 8.3x (10.3x in 1H08).

#### Post Retirement Benefits Obligations

As at 30 June 2009, the projected post retirement benefits obligations (PBO) related to pensions and healthcare amounted to Euro 3,046 million and the market value of assets amounted to Euro 2,143 million. In addition, PT has liabilities with salaries to suspended and pre-retired employees amounting to Euro 855 million, which are not subject to any legal funding requirement. These monthly salaries are paid directly by PT to the beneficiaries until retirement age. As a result, gross unfunded total obligations amounted to Euro 1,757 million, while after-tax unfunded obligations amounted to Euro 1,291 million. PT's post retirement benefits plans for pensions and healthcare are closed to new participants. PT kept the actuarial assumptions used in December 2008 unchanged in order to compute the 1H09 post retirement obligations.

Unrecognised prior years service gains	24.5	25.4
<b>Accrued post retirement benefits</b>	<b>1,781.5</b>	<b>1,835.3</b>

(1) The change in the market value of funds resulted from the positive performance of assets under management of Euro 81.4 million (equivalent to 3.9% in 1H09) and the contributions made by beneficiaries and by PT totalling Euro 10.2 million, which were partially offset by the payment of pensions and supplements of Euro 70.0 million and healthcare benefits of Euro 11.2 million.

Total gross unfunded obligations decreased by Euro 53 million to Euro 1,757 million in 1H09, as a result of lower responsibilities related with salaries payable to suspended and pre-retired employees, while responsibilities towards pension and healthcare benefits remained flat with the positive performance of assets under management (3.9% in 1H09) offsetting the time value effect on the unfunded gap. The decrease in the liability concerning salaries to suspended and pre-retired employees is related to the halting of the redundancy programme. In addition, PT approved an extraordinary contribution of up to Euro 150 million to the pension funds to be carried out during 2009, in kind, through a transfer of certain real estate assets.

(1) In 1H09, this caption includes: (i) payments of salaries to pre-retired and suspended employees amounting to Euro 78.3 million; (ii) termination payments, under the workforce reduction programme, amounting to Euro 2 million; (iii) net payment of healthcare expenses made by PT amounting to Euro 1.2 million, and (iv) contributions to the pension funds of Euro 5.1 million. (2) In 1H09, this caption relates to the difference between the actual return on assets (Euro 81.4 million, or 3.9% in 1H09) and the expected return on assets (6% on an annual basis).

(1) The decrease in the expected return on assets is explained by the devaluation of plan assets occurred in 2008.

## Equity

Equity excluding minority interests amounted to Euro 440 million as at 30 June 2009. The increase of Euro 208 million in 1H09 is explained by: (1) the net income generated in the period of Euro 256 million, (2) actuarial gains related to post retirement benefits amounting to Euro 11 million (net of taxes), and (3) positive currency translation adjustments amounting to Euro 432 million, mainly related to the appreciation of the Real against the Euro. These effects more than offset the dividends paid by PT to shareholders amounting to Euro 504 million.

Pursuant to Portuguese legislation, the amount of distributable reserves is determined according to the standalone financial statements of the Company prepared in accordance with Portuguese GAAP. Distributable reserves decreased by Euro 280 million to Euro 488 million as at 30 June 2009, as the Euro 186 million net income generated in 1H09, under Portuguese GAAP, was more than offset by the dividends paid by PT amounting to Euro 504 million.

(1) The main differences between net income under Portuguese GAAP and IFRS are related to the recognition of post retirement benefits, the goodwill amortisation and the recognition of fair value of financial instruments and derivatives.

## Consolidated Statement of Financial Position

As at 30 June 2009, the net exposure (assets minus liabilities) to Brazil amounted to Euro 2,686 million. The assets denominated in Brazilian Reais in the consolidated statement of financial position, as at 30 June 2009, amounted to Euro 6,128 million, equivalent to 41.6% of total assets.

The increase in total assets in 1H09 is mainly due to the impact of the appreciation of the Real against the Euro, whilst the increase in total liabilities is primarily explained by the increase in gross debt resulting mainly from the dividend (Euro 504 million) attributed to shareholders following the AGM of 27 March 2009 and paid on 24 April 2009, and also the impact of the appreciation of the Real against the Euro.

## Operational Review

## Domestic Operations

Revenues from domestic operations, which include wireline and TMN, decreased by 2.6% y.o.y in 2Q09 as a result of the severe decline in MTRs and the substantial decrease in equipment sales, despite the strong performance of wireline retail revenues, which increased by 2.0% y.o.y in 2Q09, and TMN customer revenues, which increased by 1.6% y.o.y. Revenue performance of the domestic operations was negatively impacted by lower MTRs in the amount of Euro 23.3 million. Excluding this adverse impact, revenues from the domestic operations would have increased by 0.2%. Adjusting for the impact of lower MTRs, TMN's service revenues would have increased by 0.4% y.o.y in 2Q09.

Wireline revenues decreased by 0.6% y.o.y in 2Q09, impacted by a marked decrease in equipment sales (-45.1% y.o.y). The improvement in retail revenues, the best performance of the last eighteen quarters, is explained by the robust take-up of pay-TV and postpaid broadband and by decelerating line loss. Accordingly, retail revenue generating units (RGUs) increased by 52 thousand in 2Q09, compared to 28 thousand in 2Q08. The continued success of pay-TV is underpinning the performance of the wireline segment even though it was only launched on a nationwide basis in April 2008 and has not yet reached critical mass.

Customer revenues at TMN continued to post resilient growth in 2Q09 (+1.6% y.o.y), driven by data revenues, which increased by 10.2% y.o.y and account for 22.6% of mobile service revenues, an improvement of 3.3pp y.o.y. As of 1 April 2009, MTRs were reduced from Euro 7 cents to Euro 6.5 cents, which compares to Euro 11 cents in 2Q08, equivalent to a decline in interconnection revenues of 38.7% y.o.y in 2Q09.
