Notes to Consolidated Financial Statements

(Table amounts in thousands, except per share data, unaudited)

Note 1 Summary of Significant Accounting Policies

The accounting policies followed in the preparation of the interim financial statements are consistent with those used in the preparation of the annual financial information. The interim financial statements reflect all normal and recurring adjustments, which are necessary, in the opinion of management, for a fair statement of results for the interim period presented. Results for the period ended March 31, 2013, are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. These interim financial statements should be read in conjunction with the audited financial statements and notes included in Old Second Bancorp, Inc. s (the Company) annual report on Form 10-K for the year ended December 31, 2012. Unless otherwise indicated, amounts in the tables contained in the notes are in thousands. Certain items in prior periods have been reclassified to conform to the current presentation.

The Company s consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

All significant accounting policies are presented in Note 1 to the consolidated financial statements included in the Company s annual report on Form 10-K for the year ended December 31, 2012. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined.

Recent Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-02 Comprehensive Income (Topic 220) Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under United States generally accepted accounting practices (GAAP) to be reclassified to net income in its entirety in the same reporting period. The impact of ASU 2013-02 on the Company s consolidated financial statements is reflected in the consolidated statement of comprehensive income (loss).

Note 2 Securities

Investment Portfolio Management

Our investment portfolio serves the liquidity and income needs of the Company. While the portfolio serves as an important component of the overall liquidity management at the Bank, portions of the portfolio will also serve as income producing assets. The size of the portfolio will reflect liquidity needs, loan demand and interest income objectives.

8

Table of Contents

Portfolio size and composition may be adjusted from time to time. While a significant portion of the portfolio will always consist of readily marketable securities to address liquidity, other parts of the portfolio may reflect funds invested pending future loan demand or to maximize interest income without undue interest rate risk.

Investments are comprised of debt securities and non-marketable equity investments. All debt securities are classified as available-for-sale and may be sold under our management and asset/liability management strategies. Securities available-for-sale are carried at fair value. Unrealized gains and losses on securities available-for-sale are reported as a separate component of equity. This balance sheet component will change as interest rates and market conditions change. Unrealized gains and losses are not included in the calculation of regulatory capital.

Non-marketable equity investments include Federal Home Loan Bank of Chicago (FHLBC) stock, Federal Reserve Bank of Chicago (FRB) stock and various other equity securities. FHLBC stock was recorded at a value of \$6.4 million at March 31, 2013, and December 31, 2012. FRB stock was recorded at \$4.8 million at March 31, 2013, and December 31, 2012. Our FHLB stock is necessary to maintain our program of access to FHLB advances.

The following table summarizes the amortized cost and fair value of the available-for-sale securities at March 31, 2013, and December 31, 2012 and the corresponding amounts of gross unrealized gains and losses recognized in accumulated other comprehensive loss were as follows:

	Α	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
March 31, 2013:					
U.S. Treasury	\$	1,500	\$ 2	\$ -	\$ 1,502

Recognition of other-than-temporary impairment was not necessary in the three months ended March 31, 2013, or the year ended December 31, 2012. The changes in fair values related primarily to interest rate fluctuations and were generally not related to credit quality deterioration, although the amount of deferrals and defaults in the pooled collateralized debt obligations (CDO) decreased in the period from December 31, 2012 to March 31, 2013.

Continued uncertainty in the financial markets in the periods presented has resulted in sharply reduced liquidity for certain investments, particularly the CDO securities. In the case of the CDO securities fair value measurement, management included a risk premium adjustment as of March 31, 2013, to reflect an estimated yield that a market participant would demand because of uncertainty in cash flows, based on incomplete and sporadic levels of market activity. Accordingly, management continues to designate these securities as Level 3 securities as described in Note 12 of this quarterly report as of March 31, 2013. Management does not have the intent to sell the above securities and it is more likely than not the Company will not sell the securities before recovery of its cost basis.

Table of Contents

Below is additional information as it relates to the CDOs, Trapeza 2007-13A, which is secured by a pool of trust preferred securities issued by trusts sponsored by multiple financial institutions.

	 nortized Cost	•	Fair Value	Un	Gross realized Loss	S&P Credit Rating1	Number of Banks in Issuance	A	Issua Deferrals & Amount		A	Issua Excess Sub- Amount

1 Moody s credit rating for class A1 and A2A were Baa2 and Ba2, respectively, as of March 31, 2013, and December 31, 2012. The Fitch ratings for class A1 and A2A were BBB and B, respectively, as of March 31, 2013, and December 31, 2012.

Note 3 Loans

Major classifications of loans were as follows:

]	March 31, 2013	December 31, 2012
Commercial	\$	84,332	\$ 86,941
Real estate - commercial		566,349	579,687
Real estate - construction		40,698	42,167
Real estate - residential		394,599	414,543
Consumer		2,908	3,101
Overdraft		584	994
Lease financing receivables		8,574	6,060
Other		15,022	16,451
		1,113,066	1,149,944
Net deferred loan cost (fees)		236	106
	\$	1,113,302	\$ 1,150,050

It is the policy of the Company to review each prospective credit in order to determine an adequate level of security or collateral was obtained prior to making a loan. The type of collateral, when required, will vary from liquid assets to real estate. The Company s access to collateral, in the event of borrower default, is assured through adherence to state lending laws, the Company s lending standards and credit monitoring procedures. The Bank generally makes loans solely within its market area. There are no significant concentrations of loans where the customers ability to honor loan terms is dependent upon a single economic sector although the real estate related categories listed above represent 90.0% and 90.1% of the portfolio at March 31, 2013, and December 31, 2012, respectively. The Company remains committed to overseeing and managing its loan portfolio to reduce its real estate credit concentrations in accordance with the requirements of the Consent Order the Bank entered into with the Office of the Controller of the Currency (the OCC) on May 16, 2011 (the Consent Order). Regulatory and Capital matters including the Consent Order are discussed in more detail in Note 11 of the consolidated financial statements included in this report.

The Bank had no commitments to any borrower whose loans were classified as impaired at March 31, 2013.

Credit Quality Indicators:

The Company categorizes loans into credit risk categories based on current financial information, overall debt service coverage, comparison against industry averages, historical payment experience, and current economic trends. Each loan and loan relationship is examined. This analysis includes loans with outstanding loans or commitments greater than \$50,000 and excludes homogeneous loans such as home equity line of credit and residential mortgages. Loans with a classified risk rating are reviewed quarterly regardless of size or loan type. The Company uses the following definitions for classified risk ratings:

Table of Contents

Special Mention. Loans classified as special mention have a potential weakness that deserves management s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Credits that are not covered by the definitions above are pass credits, which are not considered to be adversely rated.

Credit Quality Indicators by class of loans as were as follows:

Table of Contents

Troubled debt restructurings (TDR) are loans for which the contractual terms have been modified and both of these conditions exist: (1) there is a concession to the borrower and (2) the borrower is experiencing financial difficulties. Loans are restructured on a case-by-case basis during the loan collection process with modifications generally initiated at the request of the borrower. These modifications may include reduction in interest rates, extension of term, deferrals of principal, and other modifications. The Bank does participate in the U.S. Department of the Treasury s (the Treasury) Home Affordable Modification Program (HAMP) which gives qualifying homeowners an opportunity to refinance into more affordable monthly payments.

The specific allocation of the allowance for loan losses on TDRs is determined either by discounting the modified cash flows at the original effective rate of the loan before modification or is based on the underlying collateral value less costs to sell, if repayment of the loan is collateral-dependent. If the resulting amount is less than the recorded book value, the Bank either establishes a valuation allowance (i.e. specific reserve) as a component of the allowance for loan losses or charges off the impaired balance if it determines that such amount is a confirmed loss. This method is used consistently for all segments of the portfolio. The allowance for loan losses also includes an allowance based on a loss migration analysis for each loan category for loans that are not individually evaluated for specific impairment. All loans charged-off, including TDRs charged-off, are factored into this calculation by portfolio segment.

TDR s that were modified during the period are summarized as follows:

	TDR Modifications Three months ending 3/31/13									
Troubled debt restructurings Real estate - residential Owner occupied		of cracts		odification investment		Post-modification recorded investment				
Deferral1		1	\$	137	\$	137				
Bolonar	\$	1	\$	137	\$	137				
		of cracts	Three mo	Modifications on the ending 3/31/1 odification investment	Post-m	odification I investment				
Troubled debt restructurings Real estate - construction Commercial speculative										
Interest2 Real estate - residential		1	\$	430	\$	460				
Owner occupied Deferral		1		108		108				
2	\$	2	\$	538	\$	568				

¹ Deferral: Refers to the deferral of principal

2 Interest: Interest rate concession below normal market

Table of Contents

TDR s are classified as being in default on a case-by-case basis. The following table presents TDR s that defaulted during the periods shown and were restructured within the 12 month period prior to default. There was no TDR default activity for the three months ending March 31, 2012.

¹ As of March 31, 2013, this segment consisted of performing loans that included a higher risk pool of loans rated as substandard that totaled \$21.8 million. The amount of general allocation that was estimated for that portion of these performing substandard rated loans was \$3.1 million at March 31, 2013.

The Company s allowance for loan loss is calculated in accordance with GAAP and relevant supervisory guidance. All management estimates were made in light of observable trends within loan portfolio segments, market conditions and established credit review administration practices.

18

Table of Contents

Changes in the allowance for loan losses by segment of loans based on method of impairment for the quarter ended March 31, 2012, were as follows:

Table of Contents

Note 7 Borrowings

The following table is a summary of borrowings as of March 31, 2013, and December 31, 2012. Junior subordinated debentures are discussed in detail in Note 8:

	March	31, 2013	December 31, 2012
Securities sold under repurchase agreements	\$	20,802 \$	17,875
FHLB advances		-	100,000
Junior subordinated debentures		58,378	58,378
Subordinated debt		45,000	45,000
Notes payable and other borrowings		500	500
	\$	124,680 \$	221,753

The Company enters into deposit sweep transactions where the transaction amounts are secured by pledged securities. These transactions consistently mature within 1 to 90 days from the transaction date. All sweep repurchase agreements are treated as financings secured by U. S. government agencies and collateralized mortgage-backed securities with a carrying amount of \$31.7 and \$26.0 million at March 31, 2013, and December 31, 2012, respectively.

The Company s borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC and are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. At March 31, 2013, there were no advances on the FHLBC stock of \$6.4 million and collateralized securities and loans valued at \$109.4 million. As of December 31, 2012, there were advances totaling \$100.0 million on FHLBC stock of \$6.4 million and collateralized loan balances of \$129.5 million. All \$100.0 million was paid off during the month of January 2013. On January 30, 2013, an advance of \$40.0 million was taken on FHLBC stock, which matured and was paid off on March 20, 2013. The Company has also established borrowing capacity at the FRB that was not used at either March 31, 2013, or December 31, 2012. The Company currently has \$34.7 million of borrowing capacity at the FRB at the current secondary rate of 1.25%.

One of the Company s most significant borrowing relationships continued to be the \$45.5 million credit facility with Bank of America. That credit facility was originally comprised of a \$30.5 million senior debt facility, which included a \$30.0 million revolving line now matured and \$500,000 in term debt (together, the Senior Debt), as well as \$45.0 million of subordinated debt (the Subordinated Debt). The Subordinated Debt and the term debt portion of the Senior Debt mature on March 31, 2018. The interest rate on the Senior Debt resets quarterly and at the Company s option, based on the Lender s prime rate or three-month LIBOR plus 90 basis points. The interest rate on term debt portion of the Subordinated Debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the Bank of America senior line of credit when it matured but did have \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in Subordinated Debt at both December 31, 2012 and March 31, 2013. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal amounts on a timely basis.

The credit facility agreement contains usual and customary provisions regarding acceleration of the term debt portion of the Senior Debt upon the occurrence of an event of default by the Company under the agreement, as described therein. The agreement also contains certain customary representations and warranties as well as financial covenants. At March 31, 2013, the Company was out of compliance with one of the financial covenants. Previously, the Company was out of compliance with two of the financial covenants. The agreement provides that upon an event of default as the result of the Company s failure to comply with a financial covenant, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line and the term debt by 200 basis points, (iii) declare the Senior Debt immediately due and

payable and (iv) exercise all of its rights and remedies

Table of Contents

at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal amount of the Senior Debt is the \$500,000 in term debt with interest payable at the default rate mentioned above. Because the Subordinated Debt is treated as Tier 2 capital for regulatory capital purposes, the agreement does not provide the lender with any rights of acceleration or other remedies with regard to the Subordinated Debt upon an event of default caused by the Company s failure to comply with a financial covenant.

Note 8 Junior Subordinated Debentures

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I in June 2003. An additional \$4.1 million of cumulative trust preferred securities was sold in July 2003. The costs associated with the issuance of the cumulative trust preferred securities are being amortized over 30 years. The trust preferred securities may remain outstanding for a 30-year term but, subject to regulatory approval, can be called in whole or in part by the Company. The stated call period commenced on June 30, 2008 and a call can be exercised by the Company from time to time hereafter. When not in deferral, cash distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

The Company issued an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. Although nominal in amount, the costs associated with that issuance are being amortized over 30 years. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the Old Second Capital Trust II in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

Under the terms of the subordinated debentures issued to each of Old Second Capital Trust I and II, the Company is allowed to defer payments of interest for 20 quarterly periods without default or penalty, but such amounts will continue to accrue. Also during the deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Fixed Rate Cumulative Perpetual Preferred Stock (the Series B Preferred Stock) as discussed in Note 15. In August of 2010, the Company elected to defer regularly scheduled interest payments on the \$58.4 million of junior subordinated debentures. Because of the deferral on the subordinated debentures, the trusts will defer regularly scheduled dividends on the trust preferred securities. Both of the debentures issued by the Company are recorded on the Consolidated Balance Sheets as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Operations. The total accumulated unpaid interest on the junior subordinated debentures including compounded interest from July 1, 2010 on the deferred payments totals \$13.0 million at March 31, 2013.

Note 9 - Long-Term Incentive Plan

The Long-Term Incentive Plan (the Incentive Plan) authorizes the issuance of up to 1,908,332 shares of the Company s common stock, including the granting of qualified stock options, non-qualified stock options, restricted stock, restricted stock units, and stock appreciation rights. Total shares issuable under the plan were 200,868 at March 31, 2013. Stock based awards may be granted to selected directors and officers or employees at the discretion of the board of directors. There were no stock options granted in the first quarter of 2013 or 2012. All stock options are granted for a term of ten years.

Table of Contents

Total compensation cost that has been charged for those plans was \$14,000 in the first quarter of 2013 and \$87,000 in the first quarter of 2012.

There were no stock options exercised during the first quarter of 2013 or 2012. There is no unrecognized compensation cost related to nonvested stock options as all stock options of the Company s common stock have vested as of March 31, 2012.

A summary of stock option activity in the Incentive Plan as of each quarter is as follows:

March 31, 2013	Shares	Weighted Average Exercise Price	Weighted- Average Remaining Contractual Term (years)	Aggregate Intrinsic Value	
Beginning outstanding	409,500	\$ 28.75	• •		
Canceled	-	-			
Ending outstanding	409,500	\$ 28.75	2.8	\$	-
Exercisable at end of quarter	409,500	\$ 28.75	2.8	\$	-

Generally, restricted stock and restricted stock units vest three years from the grant date, but the Company s Board of Directors have discretionary authority to change some terms including the amount of time until vest date. Awards under the Incentive Plan become fully vested upon a merger or change in control of the Company.

Under the Incentive Plan, restricted stock was granted beginning in 2005 and the grant of restricted units began in February 2009. Both of these restricted awards have voting and dividend rights and are subject to forfeiture until certain restrictions have lapsed including employment for a specific period. Further, in first quarter 2013 after completion on Treasury s auction of the Old Second Bancorp Series B Preferred Stock at a discount, 45,000 unvested restricted stock shares previously awarded were recaptured in addition to 133,943 restricted stock shares that were fully vested. These recaptures provided an income statement benefit of \$612,000 included in other noninterest income. There were no restricted awards issued during the first quarter of 2013 and 60,000 restricted awards were issued during the first quarter of 2012. Compensation expense is recognized over the vesting period of the restricted award based on the market value of the award at issue date.

Table of Contents

A summary of changes in the Company s nonvested restricted awards from December 31, 2012 is as follows:

	March 31, 2013					
	Restricted Stock Shares and Units		Weighted Average Grant Date Fair Value			
Nonvested at January 1	327,920	\$	2.21			
Granted	<u>-</u>		-			
Vested	(191,920)		2.63			
Forfeited	(11,000)		2.47			
Recaptured after Series B auction	(45,000)		1.25			
Nonvested at March 31	80,000	\$	1.73			

Total unrecognized compensation cost of restricted awards is \$31,000 as of March 31, 2013, and is expected to be recognized over a weighted-average period of 0.81 years. Total unrecognized compensation cost of restricted awards was \$294,000 as of March 31, 2012, which was expected to be recognized over a weighted-average period of 1.29 years.

Note 10 Earnings (Loss) Per Share

Earnings (loss) per share is included below as of March 31 (in thousands except for share data):

	Three Months Ended					
		Marc	ch 31,			
		2013		2012		
Basic earnings (loss) per share:						
Weighted-average common shares outstanding		14,076,114		14,043,545		
Weighted-average common shares less stock based awards		13,947,454		13,855,339		
Weighted-average common shares stock based awards		210,069		340,804		
Net earnings (loss)	\$	5,471	\$	(2,968)		
Dividend and accretion on preferred shares		1,289		1,223		
Net earnings (loss) available to common stockholders		4,182		(4,191)		
Undistributed earnings (loss)		4,182		(4,191)		
Basic earnings (loss) per share common undistributed						
earnings (loss)		0.30		(0.30)		
Basic earnings (loss) per share of common stock	\$	0.30	\$	(0.30)		
Diluted earnings (loss) per share:						
Weighted-average common shares outstanding		14,076,114		14,043,545		
Dilutive effect of nonvested restricted awards		81,409		152,598		
Diluted average common shares outstanding		14,157,523		14,196,143		
Net earnings (loss) available to common stockholders	\$	4,182	\$	(4,191)		
Diluted earnings (loss) per share	\$	0.30	\$	(0.30)		

Number of antidilutive options excluded from the diluted earnings per share calculation 1,224,839 1,313,839

The above loss per share calculation did not include 815,339 common stock warrants that were outstanding as of March 31, 2013, and March 31, 2012 because they were anti-dilutive.

Note 11 - Regulatory & Capital Matters

On May 16, 2011, the Bank, the wholly-owned banking subsidiary of the Company, entered into Consent Order with the OCC. Pursuant to the Consent Order, the Bank has agreed to take certain actions and operate in compliance with the Consent Order s provisions during its terms.

Under the terms of the Consent Order, the Bank is required to, among other things: (i) adopt and adhere to a three-year written strategic plan that establishes objectives for the Bank is overall risk profile, earnings performance, growth, balance sheet mix, off-balance sheet activities, liability structure, capital adequacy, reduction in nonperforming assets and its product development; (ii) adopt and maintain a capital plan; (iii) by September 30, 2011, achieve and thereafter maintain a total risk-based capital ratio of at least 11.25% and a Tier 1 capital ratio of at least 8.75%; (iv) seek approval of the OCC prior to paying any dividends on its capital stock; (v) develop a program to reduce the Bank is credit risk; (vi) obtain or update appraisals on certain loans secured by real estate; (vii) implement processes to ensure that real estate valuations conform to applicable standards; (viii) take certain actions related to credit and collateral exceptions; (ix) reaffirm the Bank is liquidity risk management program; and (x) appoint a compliance committee of the Bank is Board of Directors to help ensure the Bank is compliance with the Consent Order. The Bank is also required to submit certain reports to the OCC with respect to the foregoing requirements.

Both capital ratio objectives in the OCC agreement have been exceeded since June 30, 2011. At March 31, 2013, the Bank s Tier 1 leverage ratio was 9.94%, up 27 basis points from December 31, 2012, and 119 basis points above the objective the Bank had agreed with the OCC to maintain of 8.75%. The Bank s total capital ratio was 15.79%, up 93 basis points from December 31, 2012, and 454 basis points above the objective of 11.25%.

On July 22, 2011, the Company entered into a Written Agreement with the FRB (the Written Agreement). Pursuant to the Written Agreement, the Company has agreed to take certain actions and operate in compliance with the Written Agreement s provisions during its term.

Under the terms of the Written Agreement, the Company is required to, among other things: (i) serve as a source of strength to the Bank, including ensuring that the Bank complies with the Consent Order; (ii) refrain from declaring or paying any dividend, or taking dividends or other payments representing a reduction in the Bank s capital, each without the prior written consent of the FRB and the Director of the Division of Banking Supervision and Regulation of the Board of Governors of the Federal Reserve System (the Director); (iii) refrain, along with its nonbank subsidiaries, from making any distributions on subordinated debentures or trust preferred securities without the prior written consent of the FRB and the Director; (iv) refrain, along with its nonbank subsidiaries, from incurring, increasing or guaranteeing any debt, and from purchasing or redeeming any shares of its capital stock, each without the prior written consent of the FRB; (v) provide the FRB with a written plan to maintain sufficient capital at the Company on a consolidated basis; (vi) provide the FRB with a projection of the Company s planned sources and uses of cash; (vii) comply with certain regulatory notice provisions pertaining to the appointment of any new director or senior executive officer, or the changing of responsibilities of any senior executive officer; and (viii) comply with certain regulatory restrictions on indemnification and severance payments. The Company is also required to submit certain reports to the FRB with respect to the foregoing requirements.

Bank holding companies are required to maintain minimum levels of capital in accordance with Federal Reserve Capital guidelines. The general bank and holding company capital adequacy guidelines are described in the accompanying table, as are the capital ratios of the Company and the Bank, as of March 31, 2013, and December 31, 2012. These ratios are calculated on a consistent basis with the ratios disclosed in the most recent filings with the regulatory agencies.

At March 31, 2013, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered adequately capitalized under regulatory defined capital ratios. The Company and the

Table of Contents

Bank are subject to regulatory capital requirements administered by federal banking agencies. Generally, if adequately capitalized, regulatory approval is not required to accept brokered deposits, however, the Bank is limited in the amount of brokered deposits that it can hold pursuant to the Consent Order.

Capital levels and industry defined regulatory minimum required levels:

	Actual		Minimum R for Cap Adequacy P	ital	Minimum Required to be Well Capitalized 1		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
March 31, 2013 Total capital to risk weighted assets							
Consolidated	\$ 193,639	14.33%	\$ 108,103	8.00%	N/A	N/A

Tier 1 capital to average assets							
Consolidated	100,877	5.11	78,964	4.00	N/A	N/A	
Old Second Bank	195,854	9.94	78,814	4.00	98,518	5.00	
December 31, 2012 Total capital to risk weighted assets							
Consolidated	\$ 189,465	13.62%	\$ 111,286	8.00%	N/A	N/A	
Old Second Bank	206,496	14.86	111,169	8.00	138,961	10.00	
Tier 1 capital to risk weighted assets			,				
Consolidated	94,816	6.81	55,692	4.00	N/A	N/A	
Old Second Bank	188,873	13.59	55,592	4.00	83,388	6.00	
Tier 1 capital to average assets							
Consolidated	94,816	4.85	78,199	4.00	N/A	N/A	
Old Second Bank	188,873	9.67	78,127	4.00	97,659	5.00	

The Company s credit facility with Bank of America includes \$45.0 million in subordinated debt. That debt obligation continues to qualify as Tier 2 regulatory capital. In addition, the trust preferred securities continue to qualify as Tier 1 regulatory capital, and the Company treats the maximum amount of this security type allowable under regulatory guidelines as Tier 1 capital. As of March 31, 2013, trust preferred proceeds of \$26.0 million qualified as Tier 1 regulatory capital and \$30.6 million qualified as Tier 2 regulatory capital. As of December 31, 2012, trust preferred proceeds of \$24.6 million qualified as Tier 1 regulatory capital and \$32.0 million qualified as Tier 2 regulatory capital.

¹ The Bank exceeded the general minimum regulatory requirements to be considered well capitalized and is in full compliance with heightened capital ratios, that it has agreed to maintain with the OCC, contained within the Consent Order.

Dividend Restrictions and Deferrals

In addition to the above requirements, banking regulations and capital guidelines generally limit the amount of dividends that may be paid by a Bank without prior regulatory approval. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year s profits, combined with the retained profit of the previous two years, subject to the capital requirements described above. As a result of the December 31, 2012, operating loss, funds were not available for the payment of dividends by the Bank to the Company and this restriction continued at March 31, 2013.

Table of Contents

As discussed in Note 8, as of March 31, 2013, the Company had \$58.4 million of junior subordinated debentures held by two statutory business trusts that it controls. The Company has the right to defer interest payments on the debentures for a period of up to 20 consecutive quarters, and elected to begin such a deferral in August 2010. However, all deferred interest must be paid before the Company may pay dividends on its capital stock. Therefore, the Company will not be able to pay dividends on its common stock until all deferred interest on these debentures has been paid in full. The total amount of such deferred and unpaid interest as of March 31, 2013, was \$13.0 million.

Furthermore, as with the debentures discussed above, the Company is prohibited from paying dividends on its common stock unless it has fully paid all accrued dividends on the Series B Preferred Stock. In August 2010, it also began to defer the payment of dividends on such preferred stock. Therefore, in addition to paying all the accrued and unpaid distributions on the debentures set forth above, the Company must also fully pay all accrued and unpaid dividends on the Series B Preferred Stock before it may reinstate the payment of dividends on the common stock. The total amount of deferred Series B Preferred Stock dividends as of March 31, 2013, was \$10.2 million. Agreements with the OCC and the FRB contain restrictions on dividend payments.

Further detail on the subordinated debentures, the Series B Preferred Stock and the deferral of interest and dividends thereon is described in Notes 8 and 15.

During the fourth quarter 2012, the U.S. Treasury (Treasury) announced the continuation of individual auctions of the preferred stock that was issued through the Troubled Asset Relief Program and Capital Purchase Program (the CPP). At this time, the Company was informed that the Series B Stock would be auctioned. Auctions were held and transactions were settled in first quarter 2013 reflecting Treasury s efforts to conclude the CPP. The auctions were successful for Treasury as all of the Series B Stock held by Treasury was sold to third parties, including certain of our directors. At December 31, 2012, Old Second Bancorp carried \$71.9 million of Series B Stock in Total Stockholders Equity. At March 31, 2013, the Company carried \$72.1 million of Series B Stock.

As a result of the completed auctions, the Company s Board elected to stop accruing the dividend on the Series B Stock. Previously, the Company had declared and accrued the dividend on the Series B Stock quarterly throughout the deferral period. Given the discount reflected in the results of the auction, the Board believes that the Company will likely be able to repurchase the Series B Stock in the future at a price less than the face amount of the Series B Stock plus accrued and unpaid dividends. Therefore, under GAAP, the Company did not fully accrue the dividend on the Series B Stock in the first quarter and does not anticipate accruing for it through the second quarter. The Company will continue to evaluate whether declaring dividends on the Series B Stock is appropriate in future periods. Pursuant to the terms of the Series B Stock, the dividends paid on the Series B Stock will increase from 5% to 9% in 2014.

Note 12 Fair Value Option and Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established by the Company also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value are:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

27

Table of Contents

Level 3: Significant unobservable inputs that reflect a company s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Transfers between levels are deemed to have occurred at the end of the reporting period. For the quarters ended March 31, 2013, and 2012 there were no significant transfers between levels.

Securities available-for-sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented. The Company uses the following methods and significant assumptions to estimate fair value:

- Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded real estate mortgage investment conduits and collateralized mortgage obligations are primarily priced using available market information including benchmark yields, prepayment speeds, spreads, volatility of similar securities and trade date.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics (i.e., geographical data and source of revenue in trade dissemination systems). Because some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities and could be valued with Level 3 measurements.
- CDOs are collateralized by trust preferred security issuances of other financial institutions. CDOs are valued utilizing a discounted cash flow analysis. To reflect an appropriate fair value measurement, management included a risk premium adjustment to provide an estimate of the amount that a market participant would demand because of uncertainty in cash flows in the discounted cash flow analysis. Changes in unobservable inputs such as future cash flows, prepayment speeds and market rates which may result in a significantly higher or lower fair value measurement. Due to the significant amount of unobservable inputs for the security and limited market activity, these securities are considered Level 3 valuations.
- Asset-backed securities are priced using a single expected cash flow stream model using trades, covers, bids, offers and price for similar bonds as well as prepayment and default projections based on historical statistics of the underlying collateral and current market data.
- Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held for sale is determined using quoted secondary market prices.
- Lending related commitments to fund certain residential mortgage loans (interest rate locks) to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of mortgage-backed securities are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.

- Interest rate swap positions, both assets and liabilities, are based on a valuation pricing models using an income approach based upon readily observable market parameters such as interest rate yield curves.
- Both the credit valuation reserve on current interest rate swap positions and on receivables related to unwound customer interest rate swap positions was determined based upon management s estimate of the amount of credit risk exposure, including available collateral protection and/or by

28

Table of Contents

utilizing an estimate related to a probability of default as indicated in the Bank credit policy. Such adjustments would result in a Level 3 classification.

- The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.
- Nonrecurring adjustments to certain commercial and residential real estate properties classified as OREO are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Recurring Basis:

The tables below present the balance of assets and liabilities at March 31, 2013, and December 31, 2012, respectively, which are measured by the Company at fair value on a recurring basis:

				March	31, 2013	3
