**Letter from the President**

Dear Shareholder:

Despite tepid growth earlier in the year, the US economy improved as the six-month fiscal reporting period ended July 31, 2015. Against this backdrop, longer-term bond yields moved higher and US equities generated positive returns.

Julian Sluyters

**Six Months in Review through July 31, 2015**

*President & CEO*

For the period since the Fund's inception on May 27, 2015 through July 31, 2015:

• AllianzGI Diversified Income & Convertible Fund returned -1.69% on net asset value (NAV) and returned -15.58% on market price.

For the six-month reporting period ended July 31, 2015:

• AllianzGI NFJ Dividend, Interest & Premium Strategy Fund returned 1.57% on NAV and returned -3.40% on market price.

• AllianzGI Equity & Convertible Income Fund returned 4.62% on NAV and returned 0.84% on market price.

During the reporting period, the Russell 3000 Index, a broad measure of US stock market performance, increased 6.61%; the Russell 1000 Value Index, a measure of large-cap value-style stocks, rose 3.98%; and the Russell 1000 Growth Index, a measure of growth style stocks, advanced 9.16%. Convertible securities, as reflected by the BofA Merrill Lynch All Convertibles Index, returned 4.03%. The BofA Merrill Lynch High Yield Master II Index, generally representative of the high yield market, returned -2.07% since the AllianzGI Diversified Income & Convertible Fund was incepted on May 27, 2015, and returned 1.16% during the full reporting period.

Turning to the US economy, gross domestic product (GDP), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, expanded at a revised annual pace of 2.1% during the fourth quarter of 2014. The economy then moderated during the first quarter of 2015 as the US Commerce Department reported that GDP grew at an annual pace of 0.6%. However, economic activity then improved as the Commerce Department's second estimate showed that GDP released after the reporting period ended grew at an annual pace of 3.7% for the second quarter of 2015.

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

The Federal Reserve (the Fed ) maintained an accommodative monetary policy during the reporting period, but it appeared to move closer to its first rate hike in nearly a decade. At its March 2015 meeting, the Fed eliminated the word patient from its official statement regarding

2 Semi-Annual Report | July 31, 2015

when it may start raising rates. Then, at its June 2015 meeting, the Fed said that it currently anticipates that, even after employment and inflation are near mandate-consistent levels, economic conditions may, for some time, warrant keeping the target federal funds rate below levels the Committee views as normal in the longer run. At its meeting in July 2015, the Fed noted continued progress in the US economy and labor market but was still not ready to begin raising rates.

## **Outlook**

We believe macroeconomic data remain consistent with a moderate pace of growth in the US in coming months, although we will likely see a low growth environment globally.

Despite the changing economic environment, we believe bond markets still do not appear to be priced for the start of Fed tightening. This, combined with poor bond-market liquidity, could result in more volatility as we get closer to interest rate lift-off. While this volatility may affect equities more than bonds, we believe that stocks should see support from improving economic growth.

## Fund Insights

**AllianzGI Diversified Income & Convertible Fund/  
AllianzGI Equity & Convertible Income Fund/  
AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

### AllianzGI Diversified Income & Convertible Fund Fund Insights

*For the period from inception on May 27, 2015 through July 31, 2015 as provided by Doug Forsyth, CFA, Portfolio Manager.*

For the period since the Fund's inception through July 31, 2015, the AllianzGI Diversified Income & Convertible Fund (the Fund) returned -1.69% on NAV and -15.58% on market price

During the period from the Fund's inception through July 31, 2015, the Russell 1000 Growth Index, a measure of growth style stocks, advanced 0.61%; High Yield securities, as reflected by the BofA Merrill Lynch High Yield Master II Index, returned -2.07%; and Convertible securities, as reflected by the BofA Merrill Lynch All Convertibles Index, returned -2.93%.

### Market Environment

Several factors influenced the equity, convertible and high-yield markets during the period – most notably commodity prices, economic data, corporate earnings, the movement in the US Treasury market and the Fed's outlook.

One influential factor was the sharp drop in crude oil and metal prices during July as angst around slowing economic activity in China increased. Steep price declines weighed on producers, pressuring commodity-linked sectors.

On the economic front, improving indicators signaled continued US expansion. The positive trends in data supported the favorable backdrop for equities, convertible and high-yield securities.

Another factor that influenced the markets was corporate earnings. As anticipated, adverse weather conditions, a West Coast port shutdown and a strong dollar dampened profits, but earnings growth was impressive nonetheless.

Treasury-rate volatility affected a portion of the convertible and high-yield markets throughout the period. Despite a drop in July, the 10-year Treasury rate moved higher during the reporting period. This had a negative impact on bond-like or busted convertible securities, and it negatively affected sentiment on yield-producing investments such as utilities and REITS. The impact on the high-yield market was mixed. The

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

increase in Treasury yields supported the BB rated, more narrow-spread issuers in the period.

Global central banks have continued to be accommodative. Although there has been investor uncertainty around the timing of the first rate hike and the path of US monetary policy thereafter, the Fed's message has remained consistent: Changes in policy will be data-dependent and international developments will be assessed.

4 Semi-Annual Report | July 31, 2015

## Fund Insights

### AllianzGI Diversified Income & Convertible Fund/ AllianzGI Equity & Convertible Income Fund/ AllianzGI NFJ Dividend, Interest & Premium Strategy Fund

July 31, 2015 (unaudited) (continued)

Against this backdrop, investment-grade convertible issuers outperformed non-investment-grade issuers and total-return convertibles outperformed yield or busted categories. Thus far, 2015 new issuance has been robust and on pace to exceed 2014's elevated levels.

The Chicago Board Options Exchange Volatility Index ( VIX ) decreased concurrent with equity market strength. The VIX ended the reporting period at 12.12 after starting at 13.27.

## Portfolio Specifics

In the equity sleeve, stock picking was strongest in the financials, consumer discretionary and energy sectors. Conversely, security selection in the materials, health care and industrials sectors hampered performance.

In the convertibles sleeve, sector allocations that helped relative performance in the period included energy, health care and technology. An underweight in the energy sector and an overweight in the health care sector were beneficial. Issue selection was positive in the technology sector. In contrast, exposure to the utilities, transportation and consumer staples sectors detracted. All three sectors were impacted by issue selection.

In the high-yield sleeve, industries that helped relative performance in the period included metals/mining ex steel, energy and health care. Having no exposure to metals/mining ex steel had a positive impact. An underweight and positive issue selection in energy was beneficial. In health care, an overweight and issue selection were areas of strength. In contrast, technology, banking and support-services detracted from relative performance. Having no exposure to banking had a negative impact. Issue selection in technology and support-services were areas of weakness.

Regarding the options strategy, many of the covered call option positions expired below strike and the portfolio was able to retain the set premiums.

## AllianzGI Equity & Convertible Income Fund Fund Insights

*For the period of February 1, 2015 through July 31, 2015 as provided by Doug Forsyth, CFA, Portfolio Manager.*

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

For the six-month period ended July 31, 2015, the AllianzGI Equity & Convertible Income Fund (the Fund ) returned 4.62% on NAV and 0.84% on market price.

beneficial. In contrast, exposure in the health care, technology and industrials sectors weighed on performance. An underweight in the health care sector was a detractor, in addition to issue selection in the technology and industrials sectors.

Regarding the options strategy, many of the covered call option positions expired below strike and the portfolio was able to retain the set premiums.

### AllianzGI NFJ Dividend, Interest & Premium Strategy Fund Fund Insights

*For the period of February 1, 2015, through July 31, 2015 as provided by Krysta Hill, Product Specialist Associate.*

For the six-month period ended July 31, 2015, the AllianzGI NFJ Dividend, Interest & Premium Strategy Fund (the Fund) returned 1.57% on NAV and -3.40% on market price.

During the reporting period, the Russell 1000 Value Index, a measure of large-cap value-style stocks, rose 3.98%; and Convertible securities, as reflected by the BofA Merrill Lynch All Convertibles Index, returned 4.03%.

## Market Environment

US equities appreciated over the six-month reporting period, driven in part by positive first quarter earnings and robust merger & acquisition activity, including Anthem and Cigna's agreement to a \$54 billion deal and Teva Pharmaceutical's deal to acquire Allergan for \$40.5 billion. In February and April, share prices rocketed to new all-time highs on Wall Street as investors applauded strong economic data, easy monetary policy and fresh measures to keep Greece in the euro zone. In February alone, the S&P 500 Index climbed into uncharted territory with a 5.75% rally, its biggest in 40 months. Commodity markets also recovered in February after posting losses for nine consecutive months, the longest down streak since at least 1986. The first quarter saw anemic growth in the US. Weakness was attributed to a range of factors, including harsh winter weather, the West Coast port strike, falling energy industry investment and a steep drop in exports. However, growth picked up significantly in the US in the second quarter. Markets also processed an increasingly politicized dialogue regarding the Greek debt crisis. At the close of the quarter, the crisis deteriorated further as Greece defaulted on its €1.55 billion (\$1.73 billion) June 30th International Monetary Fund (IMF) payment and became ineligible for Emergency Liquidity Assistance (ELA) for the first time in over five years. Crude prices largely fell over the trailing six-month period, finishing the month of July at \$47.12/barrel West Texas Intermediate (WTI).

July 31, 2015 (unaudited) (continued)

(10.79%) generated double-digit gains. The energy (-9.56%) and utilities (-7.75%) sectors exhibited the greatest losses as commodity prices generally declined and fears of an interest rate hike bridled both sectors, respectively.

Several factors influenced the convertible market during the period most notably commodity prices, economic data, corporate earnings, the movement in the US Treasury market and the Fed's outlook.

One of the most significant influential factors was the sharp drop in crude oil and metal prices during July as angst around slowing economic activity in China increased. Steep price declines weighed on producers, pressuring commodity-linked sectors.

On the economic front, improving indicators signaled continued US expansion. The positive trends in data supported the favorable backdrop for convertible securities.

Another factor that influenced the convertible market was corporate earnings. As anticipated, adverse weather conditions, a West Coast port shutdown and a strong dollar dampened profits, but earnings growth was impressive nonetheless.

Treasury-rate volatility affected a portion of the convertible market throughout the period. Despite a drop in July, the 10-year Treasury rate moved higher during the reporting period. This had a negative impact on bond-like or busted convertible securities, and it negatively affected sentiment on yield-producing investments such as utilities and REITS.

Global central banks have continued to be accommodative. Although there has been investor uncertainty around the timing of the first rate hike and the path of US monetary policy thereafter, the Fed's message has remained consistent: Changes in policy will be data-dependent and international developments will be assessed.

Against this backdrop, investment-grade issuers outperformed non-investment-grade issuers and total-return convertibles outperformed yield or busted categories. Thus far, 2015 new issuance has been robust and on pace to exceed 2014's elevated levels.

## Portfolio Specifics

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

The equity portion of the Fund delivered positive returns but failed to keep pace with the Russell 1000 Value benchmark index. Negative stock selection and sector allocation drove relative underperformance. In terms of security selection, the Fund's holdings in the energy and financials sectors were the most beneficial. However, these positive results were overwhelmed by negative selection in the information technology, consumer discretionary and health care sectors. From a sector allocation perspective, underweight positions in the utilities and consumer staples

8 Semi-Annual Report | July 31, 2015

July 31, 2015 (unaudited) (continued)

sectors boosted the Fund's performance. Conversely, the Fund's overweights in the energy and materials sectors, as well as an underweight in the financials sector detracted from results.

During the six-month reporting period, the equity portion of the Fund's largest overweights relative to the Russell 1000 Value Index were in the telecommunication services, energy and materials sectors. The Fund's largest relative underweights were in the consumer staples, industrials and financials sectors.

In the convertible portion of the portfolio, sector allocations that helped relative performance included financials, industrials and technology. An underweight and issue selection in all three of the above mentioned sectors were beneficial. In contrast, health care, materials and energy exposure weighed on performance. An underweight and issue selection in the health care sector was a detractor. Furthermore, issue selection in materials and an overweight in energy hindered relative returns.

The Fund benefited from gains attributed to option premium retention early in the year. Since many of the portfolio's options positions expired out-of-the money, the fund was able to retain premium collected at initiation. However, the majority of the gains generated from the options portfolio at the beginning of the period were later offset by cash assignments. Two equity market moves proved to be particularly challenging for the options portion of the portfolio during the period. As the S&P 500 climbed nearly 6% in February, several options positions expired in-the-money. The strength of energy sector equities was a hindrance to the options portfolio from mid-March to early May. The oil service index rose more than 22%, resulting in significant cash assignments in excess of the premium originally collected. Ultimately, the options component of the portfolio was unable to contribute meaningful gains for the period.

**Market Price/NAV:**

Market Price \$20.94  
 NAV \$23.31  
 Discount to NAV -10.17%  
 Market Price Yield(2) 9.57%  
 Leverage Ratio(3) 28.12%

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all dividends and distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares and includes the effect of any expense reductions, if any. Total return for a period of less than one year is not annualized.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares, or changes in the Fund's dividends.

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets less total liabilities divided by the number of shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly dividend per share (comprised of net investment income and net capital gains, if any) payable to shareholders by the market price per share at July 31, 2015.

(3) Represents amount drawn under short-term margin loan facility ( Leverage ), as a percentage of total managed assets. Total managed assets refer to total assets (including assets attributable to Leverage) minus liabilities (other than liabilities representing Leverage).

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**1. Organization and Significant Accounting Policies**

AllianzGI Diversified Income & Convertible Fund ( Diversified Income & Convertible ), AllianzGI Equity & Convertible Income Fund ( Equity & Convertible Income ) and AllianzGI NFJ Dividend, Interest & Premium Strategy Fund ( Dividend, Interest & Premium Strategy ) (each a Fund and collectively the Funds ) were organized as Massachusetts business trusts on March 10, 2015, December 12, 2006 and August 20, 2003, respectively. The Funds follow the investment company accounting and reporting guidance of the Financial Accounting Standards Board ( FASB ) Accounting Standards Codification topic 946 Financial Services Investment Companies. Prior to commencing operations on May 27, 2015, February 27, 2007, and February 28, 2005 respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies registered under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended, and the sale and issuance of 4,189 shares at an aggregate price of \$100,012 for Diversified Income & Convertible to Allianz Asset Management of America L.P. ( AAM ). Allianz Global Investors Fund Management LLC (the Investment Manager ) serves as the Funds investment manager and Allianz Global Investors U.S. LLC ( AllianzGI U.S. ) and NFJ Investment Group LLC ( NFJ ), each an affiliate of the Investment Manager (each a Sub-Adviser and collectively the Sub-Advisers ), serve as the Funds sub-advisers. The Investment Manager, AllianzGI U.S. and NFJ are indirect, wholly-owned subsidiaries of Allianz Asset Management of America L.P. ( AAM ). AAM is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has authorized an unlimited amount of common shares with \$0.00001 par value.

Diversified Income & Convertible s investment objective is to provide total return through a combination of current income and capital appreciation, while seeking to provide downside protection against capital loss. Under normal market conditions, the Fund will seek to achieve its investment objective by investing in a combination of convertible securities, debt and other income-producing instruments and common stocks and other equity securities. The Fund expects to normally employ a strategy of writing (selling) covered call options on the stocks held in the equity portion of the portfolio.

Equity & Convertible Income s investment objective is to seek total return comprised of capital appreciation, current income and gains. Under normal market conditions the Fund pursues its objective by investing in a diversified portfolio of equity securities and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on the equity securities held by the Fund as well as on equity indexes.

Dividend, Interest & Premium Strategy s primary investment objective is to seek current income and gains, with a secondary objective of long-term capital appreciation. Under normal market conditions the Fund pursues its investment objectives by investing in a

diversified portfolio of dividend-paying common stocks and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on equity indexes in an attempt to generate gains from option premiums.

Diversified Income & Convertible issued 11,200,000 shares of common stock in its initial public offering. An additional 90,000 shares were issued in connection with the exercise of the underwriters' over-allotment option. These shares were all issued at \$25.00 per share. A sales load of \$1.125 per share was deducted from gross offering proceeds. Offering costs of \$564,500 (representing \$0.05 per share) were also deducted from gross proceeds of the offering and have been charged to paid-in capital in excess of par. The Investment Manager paid all offering costs associated with the initial public offering (other than the sales load) exceeding \$0.05 per share, which came to approximately \$890,000. In addition, the underwriters' commission and offering costs have been charged to paid-in-capital in excess of par.

There can be no assurance that the Funds will meet their stated objectives.

The preparation of the Funds' financial statements in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) requires the Funds' management to make estimates and assumptions that affect the reported amounts and disclosures in each Fund's financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

The following is a summary of significant accounting policies consistently followed by the Funds:

**(a) Valuation of Investments**

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of official closing prices, last reported sales prices, or if no sales or closing prices are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services. The Funds' investments are valued daily using prices supplied by an independent pricing service or broker/dealer quotations, or by using the last sale or settlement price on the exchange that is the primary market for such securities, or the mean between the last bid and ask quotations. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics.

The Board of Trustees (the Board) has adopted procedures for valuing portfolio securities and other financial instruments in circumstances where market quotations are not readily available (including in cases where

**1. Organization and Significant Accounting Policies (continued)**

available market quotations are deemed to be unreliable), and has delegated primary responsibility for applying the valuation methods to the Investment Manager and the Sub-Advisers. The Funds' Valuation Committee was established by the Board to oversee the implementation of the Funds' valuation methods and to make fair value determinations on behalf of the Board, as instructed by the Board. Each Sub-Adviser monitors the continued appropriateness of methods applied and identifies to the Investment Manager circumstances and events that may require fair valuation. The Investment Manager, in turn, determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Investment Manager (in consultation with the Sub-Advisers) determines that a valuation method may no longer be appropriate, another valuation method may be selected or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall review and ratify the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee.

Synthetic convertible securities are valued based on quotations obtained from unaffiliated brokers who are the principal market-makers in such securities. Such valuations are derived by the brokers from proprietary models which are generally based on readily available market information including valuation of the common stock underlying the synthetic security.

Short-term debt-instruments maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing premium or discount based on their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value investments may differ from the value that would be realized if the investments were sold, and these differences could be material to the Funds' financial statements. Each Fund's net asset value ( NAV ) is normally determined at the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange ( NYSE ) on each day the NYSE is open for business.

**(b) Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price ) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

- j Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access
- j Level 2 valuations based on other significant observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates or other market corroborated inputs

54 Semi-Annual Report | July 31, 2015

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

- j Level 3 valuations based on significant unobservable inputs (including the Sub-Advisers' or Valuation Committee's own assumptions and securities whose price was determined by using a single broker's quote)

The valuation techniques used by the Funds to measure fair value during the period or six months ended July 31, 2015 were intended to maximize the use of observable inputs and to minimize the use of unobservable inputs.

The Funds' policy is to recognize transfers between levels at the end of the reporting period. An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used. Assets categorized as Level 1 or 2 as of period end may have been transferred between Levels 1 and 2 since the prior period due to changes in the valuation method utilized in valuing the investments.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with U.S. GAAP.

**Equity Securities (Common and Preferred Stock)** Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**Convertible Bonds & Notes** Convertible bonds & notes are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of convertible bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

values are categorized as Level 3.

**Corporate Bonds & Notes** Corporate bonds & notes are generally comprised of two main categories: investment grade bonds and

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

high yield bonds. Investment grade bonds are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services based primarily on broker-dealer from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of corporate bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**Option Contracts** Option contracts traded over-the-counter ( OTC ) and FLEXible EXchange ( FLEX ) options are valued by independent pricing services based on pricing models that incorporate various inputs such as interest rates, credit spreads, currency exchange rates and volatility measurements for in-the-money, at-the-money, and out-of-the-money contracts based on a given strike price. To the extent that these inputs are observable, the values of OTC and FLEX option contracts are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**(c) Investment Transactions and Investment Income**

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Interest income adjusted for the accretion of discount and amortization of premium is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income. Conversion premium is not amortized. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, and then are recorded as soon after the ex-dividend date as the Fund, using reasonable diligence, becomes aware of such dividends. Payments received on synthetic convertible securities are generally included in dividends. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. These payments may initially be recorded as dividend income and may subsequently be reclassified as realized gains and/or return of capital upon receipt of information from the issuer.

**(d) Federal Income Taxes**

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended,

**Notes to Financial Statements**

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. The funds may be subject to excise tax based on distributions to shareholders.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. In accordance with provisions set forth under U.S. GAAP, the Investment Manager has reviewed the Funds' tax positions for all open tax years. As of July 31, 2015, the Funds have recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions they have taken. The Funds' federal tax returns for the prior three years, as applicable, remain subject to examination by the Internal Revenue Service.

**(e) Dividends and Distributions to Shareholders**

Dividend, Interest & Premium Strategy and Equity & Convertible Income declare dividends and distributions on a quarterly basis. Diversified Income & Convertible declares dividends and distributions on a monthly basis. These dividends and distributions may be comprised in varying proportions of net investment income, gains from option premiums and the sale of portfolio securities and return of capital. The Funds record dividends and distributions on the ex-dividend date. The amount of dividends from net investment income and distributions from net realized capital gains or return of capital is determined in accordance with federal income tax regulations, which may differ from U.S. GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions to shareholders from return of capital. At July 31, 2015, it is anticipated that Dividend, Interest & Premium Strategy will have a return of capital at fiscal year-end.

**(f) Convertible Securities**

It is the Funds' policy to invest a portion of their assets in convertible securities. Although convertible securities derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments in convertible securities include features which render them sensitive to price changes in their underlying securities. The value of structured/synthetic convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at risk of loss depending on the performance of the underlying equity security. Consequently, the

**Notes to Financial Statements**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

Funds are exposed to greater downside risk than traditional convertible securities, but typically still less than that of the underlying stock.

**(g) Warrants**

The Funds may receive warrants. Warrants are securities that are usually issued together with a debt security or preferred stock and that give the holder the right to buy a proportionate amount of common stock at a specified price. Warrants are freely transferable and are often traded on major exchanges. Warrants normally have a life that is measured in years and entitle the holder to buy common stock of a company at a price that is usually higher than the market price at the time the warrant is issued. Warrants may entail greater risks than certain other types of investments. Generally, warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. If the market price of the underlying stock does not exceed the exercise price during the life of the warrant, the warrant will expire worthless. Warrants may increase the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities. Similarly, the percentage increase or decrease in the value of an equity security warrant may be greater than the percentage increase or decrease in the value of the underlying common stock. Warrants may relate to the purchase of equity or debt securities. Debt obligations with warrants attached to purchase equity securities have many characteristics of convertible securities and their prices may, to some degree, reflect the performance of the underlying stock. Debt obligations also may be issued with warrants attached to purchase additional debt securities at the same coupon rate. A decline in interest rates would permit the Funds to sell such warrants at a profit. If interest rates rise, these warrants would generally expire with no value.

**(h) Short Sales**

Short sale transactions involve the Funds selling securities they do not own in anticipation of a decline in the market price of the securities. The Funds are obligated to deliver securities at the market price at the time the short position is closed. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested. There were no open short sales at July 31, 2015.

**(i) Statement of Cash Flows**

U.S. GAAP requires entities providing financial statements that report both financial position and results of operations to also provide a statement of cash flows for each period for which results of operations are provided, but exempts investment companies meeting certain conditions. One of the conditions is that substantially all of the enterprise's investments were carried at fair value during the period and classified as Level 1 or Level

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

2 in the fair value hierarchy in accordance with the requirements of U.S. GAAP. Another condition is that the

**1. Organization and Significant Accounting Policies (continued)**

enterprise had little or no debt, based on the average debt outstanding during the period, in relation to average total assets. Each Fund's Level 3 investments have been determined to be at a level not requiring a Statement of Cash Flows. Funds with certain degrees of borrowing activity, typically through the use of margin loan financing, have been determined to be at a level requiring a Statement of Cash Flows. The Statement of Cash Flows has been prepared using the indirect method which requires net change in net assets resulting from operations to be adjusted to reconcile to net cash flows from operating activities.

**(j) Interest Expense**

Interest expense relates to the Diversified Income & Convertible's participation in margin loan financing transactions. Interest expense is recorded as it is incurred.

**2. Principal Risks**

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds also are exposed to other risks such as, but not limited to, interest rate, credit and leverage risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. This risk may be particularly acute in the current market environment because market interest rates are currently at historically low levels. As nominal interest rates rise, the value of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements. Interest rate changes can be sudden and unpredictable, and a Fund may lose money as a result of movements in interest rates. A Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often

reflected in credit ratings.

The market values of securities may decline due to general market conditions (market risk) which are not specifically related to a particular company, such as real or perceived adverse economic conditions, adverse changes in the general outlook for corporate earnings, changes in interest or currency rates, adverse changes to credit markets or adverse investor sentiment. They may also decline due to

**Notes to Financial Statements**

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**2. Principal Risks (continued)**

factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity-related investments generally have greater market price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. Credit ratings downgrades may also negatively affect securities held by a Fund. Even when markets perform well, there is no assurance that the investments held by a Fund will increase in value along with the broader market. In addition, market risk includes the risk that geopolitical events will disrupt the economy on a national or global level.

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Sub-Advisers seek to minimize the Funds' counterparty risk by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Funds are exposed to risks associated with leverage. Leverage may cause the value of the Funds' shares to be more volatile than if the Funds did not use leverage. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. The Funds may engage in transactions or purchase instruments that give rise to forms of leverage. In addition, to the extent the Funds employ leverage, dividend and interest costs may not be recovered by any appreciation of the securities purchased with the leverage proceeds and could exceed the Funds' investment returns, resulting in greater losses.

The Funds may hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds' ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted securities may also be illiquid and may not be actively traded. Sale of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of securities used by the Funds could be material. A Fund may incur additional expenses to the extent it is required to seek recovery upon a portfolio security's default in the payment of principal or interest. In any bankruptcy proceeding relating to a defaulted investment, a Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment.

**Notes to Financial Statements**

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**2. Principal Risks (continued)**

Diversified Income & Convertible will terminate on the first business day following the fifteenth anniversary of the effective date of its registration statement, May 22, 2030, unless such term is extended by the Trustees and absent Trustee and shareholder approval to amend the limited term. Leading up to the Fund's dissolution date, the Fund may begin liquidating all or a portion of the Fund's portfolio, and the Fund may deviate from its investment strategy. As a result, during the wind-down period, the Fund's distributions may decrease, and such distributions may include a return of capital. The Fund does not seek to return \$25.00 per common share (its initial offering price) upon termination. As the assets of the Fund will be liquidated in connection with its termination, the Fund may be required to sell portfolio securities when it otherwise would not, including at times when market conditions are not favorable, which may cause the Fund to lose money.

There can be no assurance that repurchases of common shares by Diversified Income & Convertible pursuant to its Repurchase Plan (as defined below) will cause the common shares to trade at a price equal to or in excess of NAV or prevent or reduce any decline in the market price of the common shares. Any acquisition of common shares by the Fund would decrease the managed assets of the Fund and therefore tend to have the effect of increasing the Fund's gross expense ratio and decreasing the asset coverage with respect to any leverage outstanding. Because of the nature of the Fund's investment objective, policies and portfolio, the Investment Manager and the Sub-Adviser do not anticipate that repurchases of common shares should interfere with the ability of the Fund to manage its investments in order to seek its investment objective, and do not anticipate any material difficulty in borrowing money or disposing of portfolio securities to consummate repurchases, although no assurance can be given that this will be the case. The Fund's repurchase of shares under the Repurchase Plan will be subject to certain conditions under Rule 10b-18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), and other applicable laws, including Regulation M, which may prohibit such repurchases under certain circumstances.

**3. Financial Derivative Instruments**

Disclosure about derivatives and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivatives, and disclosure about credit-risk related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives which are accounted for as hedges, and those that do not qualify for such accounting. Although the Funds at times use derivatives for hedging purposes, the Funds reflect derivatives at fair value and recognize changes in fair value through the Funds' Statements of Operations, and such derivatives do not qualify for hedge accounting treatment.

**Option Transactions**

The Funds may write (sell) put and call options on securities and indices to earn premiums, for

**Notes to Financial Statements**

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**3. Financial Derivative Instruments (continued)**

hedging purposes, risk management purposes or otherwise as part of their investment strategies. When an option is written, the premium received is recorded as an asset with an equal liability that is subsequently marked to market to reflect the market value of the option written. These liabilities are reflected as call options written in the Funds' Statements of Assets and Liabilities. Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions as a realized loss. If a call option written is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss. If a put option written is exercised, the premium reduces the cost basis of the security. In writing an option, the Funds bear the market risk of an unfavorable change in the price of the security underlying the written option. Exercise of a written option could result in the Funds purchasing a security at a price different from its current market value.

There are several risks associated with transactions in options on securities. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objective. The Funds' ability to use options successfully will depend on the Sub-Advisers' ability to predict pertinent market movements, which cannot be assured. As the writer of a covered call option, a Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline.

**4. Investment Manager/Sub-Advisers & Deferred Compensation**

**Investment Manager/Sub-Advisers.** Each Fund has an Investment Management Agreement (for the purposes of this section, each an "Agreement") with the Investment Manager. Subject to the supervision of the each Fund's Board, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to their Agreements, Diversified Income & Convertible and Equity & Convertible Income pay the Investment Manager an annual fee, payable monthly, at an annual rate of 1.00% of their average daily total managed assets. Pursuant to its Agreement, Dividend, Interest & Premium Strategy pays the Investment Manager an annual fee, payable monthly, at an annual rate of 0.90% of its average daily total managed assets. Diversified Income & Convertible's Agreement defines total managed assets as the total assets of the Fund (including assets attributable to any borrowings or issued debt securities that may be outstanding) minus accrued liabilities (other than liabilities representing borrowings or issued debt securities). The Agreements of each of Equity & Convertible Income and Dividend, Interest &

**Notes to Financial Statements**

**AllianzGI Diversified Income & Convertible Fund**

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**4. Investment Manager/Sub-Advisers & Deferred Compensation (continued)**

Premium Strategy define total managed assets as the total assets of the Fund (including assets attributable to any borrowings that may be outstanding) minus accrued liabilities (other than liabilities representing borrowings).

The Investment Manager has retained the Sub-Advisers to manage Dividend, Interest & Premium Strategy. NFJ manages the equity component of the Fund and AllianzGI U.S. manages the convertible and index option strategy components of the Fund. AllianzGI U.S. serves as the sole sub-adviser to Diversified Income & Convertible and Equity & Convertible Income. The Investment Manager, not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Advisers in return for their services.

Deferred Compensation. Trustees do not currently receive any pension or retirement benefits from the Funds. The Funds have adopted a deferred compensation plan for the Trustees that went into place at the beginning of this calendar year and permits the Trustees to defer their receipt of compensation from the Funds, at their election, in accordance with the terms of the plan. Under the plan, each Trustee may elect not to receive all or a portion of his or her fees from the Funds on a current basis but to receive in a subsequent period chosen by the Trustee an amount equal to the value of such compensation if such compensation had been invested in a Fund or Funds, or one or more series of Allianz Funds, selected by the Trustees from and after the normal payment dates for such compensation. The deferred compensation program is structured such that the Funds remains in substantially the same financial position whether Trustee fees are paid when earned or deferred.

**5. Investments in Securities**

For the period and six months ended July 31, 2015, purchases and sales of investments, other than short-term securities were:

	Diversified Income & Convertible	Equity & Convertible Income	Dividend, Interest & Premium Strategy
Purchases	\$537,618,114	\$465,398,504	\$478,217,869
Sales	164,045,867	478,839,544	552,017,805

**6. Income Tax Information**

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

At July 31, 2015, the aggregate cost basis and the net unrealized appreciation (depreciation) of investments (before call options written) for federal income tax purposes were as follows:

	Federal Tax Cost Basis(1)	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
Diversified Income & Convertible Equity & Convertible Income	\$381,029,314	\$2,115,309	\$14,002,843	\$(11,887,534)
Dividend, Interest & Premium Strategy	1,528,757,872	148,380,768	116,930,548	31,450,220

(1) Differences between book and tax cost basis were attributable to wash sale loss deferrals.

**AllianzGI Equity & Convertible Income Fund**

**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

July 31, 2015 (unaudited)

**7. Margin Loan Financing**

Diversified Income & Convertible has entered into a margin loan financing agreement with BNP Paribas Prime Brokerage International, Ltd. ( "BNP"). The margin loan is offered at a daily rate equal to the U.S. 3-month LIBOR rate. At July 31, 2015, the Fund had borrowings outstanding under the margin agreement totaling \$103,000,000. The interest rate charged at July 31, 2015 was 1.20%. During the period ended July 31, 2015, the weighted average daily balance was \$103,000,000 at a weighted average interest rate of 1.17%. With respect to the margin loan agreement, interest expense of \$180,017 is included in the Fund's Statement of Operations.

The Fund is required to fully collateralize its outstanding loan balance as determined by BNP. Pledged assets are held in a segregated account and are denoted in the Fund's Schedule of Investments.

Diversified Income & Convertible is pursuing longer-term, fixed-rate financing arrangements, which would replace most of the indebtedness under the existing margin loan facility. As disclosed in the Fund's initial public offering prospectus, the Fund's cost of leverage is expected to increase substantially as a result of this refinancing transaction.

**8. Subsequent Events**

In preparing these financial statements, the Funds' management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

On August 3, 2015, a monthly distribution of \$0.167 per share was declared to Diversified Income & Convertible shareholders, payable September 1, 2015 to shareholders of record on August 13, 2015.

On September 1, 2015, a monthly distribution of \$0.167 per share was declared to Diversified Income & Convertible shareholders, payable October 1, 2015 to shareholders of record on September 11, 2015.

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

On September 4, 2015, the following quarterly distributions were declared to shareholders, payable September 25, 2015 to shareholders of record on September 14, 2015.

Equity & Convertible Income	\$0.38 per share
Dividend, Interest & Premium Strategy	\$0.45 per share

The common share repurchase plan (the Repurchase Plan) of Diversified Income & Convertible (for purposes of this paragraph, the Fund) became effective on September 4, 2015. The Board of Trustees initially authorized the Repurchase Plan at the Fund's organizational meeting on April 20, 2015. The Repurchase Plan is intended in part to provide additional liquidity in the marketplace for the Fund's common shares. The Repurchase Plan will remain in effect until 230 days after the commencement of the Repurchase Plan (*i.e.*, April 21, 2016) (the Repurchase Period), during which the Fund will repurchase its

**8. Subsequent Events (continued)**

common shares in the open market on any trading day when the Fund's common shares are trading at a discount of 2% or more from the common shares' closing NAV on the prior trading day and only so long as shares of the SPDR Barclays Convertible Securities ETF have not, at any time during such trading day, traded down 2% or more from their closing market price on the prior trading day. Any repurchases are and will be made through a single broker-dealer who was not an underwriter in this initial public offering of the Fund's common shares acting as the Fund's agent. On any day that shares are repurchased under the Repurchase Plan, the Fund, subject to certain conditions under Rule 10b-18 under the Exchange Act and other applicable laws, including Regulation M, repurchases its shares in an amount equal to the lesser of (i) \$125,000 based on the aggregate purchase price of the common shares or (ii) the maximum number of common shares the Fund may purchase under Rule 10b-18, which, generally, is currently 25% of the average daily trading volume of the common shares over the trailing four week period. In addition to providing potential additional liquidity in the marketplace, any repurchases under the Repurchase Plan are made by the Fund at a discount to then current NAV of the common shares and therefore would be accretive to the NAV of the remaining common shares following the repurchases, and the Repurchase Plan may also have the effect of preventing or reducing a significant decline in the market price of the common shares in comparison to their NAV.

Effective September 21, 2015, Diversified Income & Convertible and Equity & Convertible Income each rescinded its non-fundamental policy to normally write call options on the stocks held in its portfolio with respect to approximately 70% of the value of each position, and adopted a revised non-fundamental policy to normally write call options on the stocks held in its portfolio with respect to up to approximately 70% of the value of each equity position (emphasis added). The policy of each Fund with respect to writing call options that was in effect prior to September 21, 2015 is set forth below:

Diversified Income & Convertible

The Fund expects to normally employ a strategy of writing (selling) covered call options on the stocks held in its portfolio (the Option Strategy). It is expected that the Fund will ordinarily write call options on the individual stocks held in its portfolio, and with respect to approximately 70% of the value of each position. The Fund initially intends to write covered call options on approximately 50% of the Fund's common stocks, but may write covered call options on approximately 30% to 80% of the Fund's common stocks from time to time, depending on market conditions. The Fund's use of the Option Strategy may vary from time to time, depending on market conditions and other factors.

Equity & Convertible Income

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

The Fund employs a strategy of writing (selling) call options on the stocks held in the equity component of its portfolio (the

Equity Component ) as well as on equity indexes, generally with respect to approximately 70% of the value of the securities in the Equity Component (the Option Strategy ). The extent of NIE's use of the Option Strategy will vary depending on market conditions and other factors, and NIE may determine from time to time to write call options on only a portion, or none, of the stocks in the Equity Component.

The newly adopted non-fundamental policy of each Fund with respect to writing call options is set forth below:

Diversified Income & Convertible

The Fund expects to normally employ a strategy of writing (selling) covered call options on the stocks held in its portfolio (the Option Strategy ). It is expected that the Fund will ordinarily write call options on the individual stocks held in its portfolio, and with respect to up to approximately 70% of the value of each position. The Fund initially intends to write covered call options on approximately 50% of the Fund's common stocks, but may write covered call options on approximately 30% to 80% of the Fund's common stocks from time to time, depending on market conditions. The Fund's use of the Option Strategy may vary from time to time, depending on market conditions and other factors.

Equity & Convertible Income

NIE employs a strategy of writing (selling) call options on the stocks held in the equity component of its portfolio (the Equity Component ) as well as on equity indexes, generally with respect to up to approximately 70% of the value of the securities in the Equity Component (the Option Strategy ). The extent of NIE's use of the Option Strategy will vary depending on market conditions and other factors, and NIE may determine from time to time to write call options on only a portion, or none, of the stocks in the Equity Component.

There were no other subsequent events identified that require recognition or disclosure.

**Financial Highlights**

**AllianzGI Diversified Income & Convertible Fund**

For a share outstanding throughout the period:

	For the period May 27, 2015* through July 31, 2015 (unaudited)
Net asset value, beginning of period	\$23.88
<b>Investment Operations:</b>	
Net investment income	0.08
Net realized and unrealized loss	(0.43)
Total from investment operations	(0.35)
Dividends to shareholders from net investment income	(0.17)
<b>Share Transactions:</b>	
Offering costs charged to paid-in-capital in excess of par	(0.05)
Net asset value, end of period	\$23.31
Market price, end of period	\$20.94

The 1940 Act requires that both the full Board of Trustees (the Trustees) and a majority of the non-interested Trustees (the Independent Trustees), voting separately, approve each Fund's Investment Management Agreement with the Investment Manager (for purposes of this section, the Advisory Agreements) and Portfolio Management Agreements between the Investment Manager and the applicable Sub-Advisers (for purposes of this section, the Sub-Advisory Agreements, and together with the Advisory Agreements, the Agreements). The Trustees met in person on June 3, 2015 (the contract review meeting) for the specific purpose of considering whether to approve the continuation of the Advisory Agreements and the Sub-Advisory Agreements for AllianzGI NFJ Dividend, Interest & Premium Strategy Fund (NFJ) and AllianzGI Equity & Convertible Income Fund (NIE and, together with NFJ, for the purposes of this section, the Funds). Prior to the contract review meeting, on April 27, 2015, the Chair of the Contracts Committee of the Board of Trustees participated in a conference call with independent legal counsel to the Independent Trustees (Independent Counsel) to discuss the process for the Board's review of the Agreements and to consider and request certain information pertaining to the Funds, including, among other information, information relating to comparative fees and expenses and Fund performance. The Independent Trustees were otherwise assisted in their evaluation of the Agreements by Independent Counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meeting.

In connection with their deliberations regarding the continuation of the Agreements, the Trustees, including the Independent Trustees, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Trustees considered the nature, quality, and extent of the various investment management, administrative and other services performed by the Investment Manager or the Sub-Advisers under the applicable Agreement.

In advance of their contract review meeting, the Trustees received and relied upon materials provided by the Investment Manager which included, among other items: (i) information provided by Lipper Inc. (Lipper), an independent third party, on the total return investment performance (based on net assets) of the Funds for various time periods, the investment performance of a group of funds identified by Lipper with investment classifications/objectives comparable to those of the Funds (the Lipper performance universe), (ii) information provided by Lipper on the Funds' management fees and other expenses and the management fees and other expenses of comparable funds identified by Lipper, (iii) information regarding the investment performance and management fees for other funds and accounts managed by the Investment Manager and/or the Sub-Advisers with strategies that have similarities (but none of which were substantially similar)

**Matters Relating to the Trustees Consideration of the Investment**

**Management & Portfolio Management Agreements (unaudited) (continued)**

**AllianzGI Diversified Income & Convertible Fund  
AllianzGI Equity & Convertible Income Fund  
AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

to those of the Funds, (iv) the estimated profitability to the Investment Manager and Sub-Advisers (on a combined basis) from their relationship with the Funds for the one-year periods ended December 31, 2014 and 2013, (v) descriptions of various functions performed by the Investment Manager and the Sub-Advisers for the Funds, including portfolio management, compliance monitoring and oversight of third party service providers, (vi) information regarding the overall organization and business functions of the Investment Manager and the Sub-Advisers, including, without limitation, information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Funds, and corporate ownership and business operations unrelated to the Funds, (vii) fact cards for each Fund including, among other information, total return investment performance based on net asset value and market value, related share price premium and/or discount information, performance (based on net asset value and market value) relative to each Fund's Lipper peer group, total expense ratio (including any interest and borrowing expenses) and management fee comparisons between each Fund and its Lipper peer group and trends in profitability to the Investment Manager and Sub-Advisers (on a combined basis) from their advisory relationships with each Fund and (viii) Focus Group Scorecards that presented each Fund's performance with respect to selected metrics against Lipper medians.

The Trustees' conclusions as to the continuation of the Agreements were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations are described below, although individual Trustees may have evaluated the information presented differently from one another, attributing different weights to various factors. The Trustees recognized that the fee arrangements for the Funds are in many cases the result of review and discussion in prior years between the Independent Trustees and the Investment Manager, that certain aspects of such arrangements may receive greater scrutiny in some years than in others, and that the Trustees' conclusions may be based, in part, on their consideration of these same arrangements during the course of the year and in prior years.

Fund-specific performance results for the Funds reviewed by the Trustees are discussed below. The comparative performance information was prepared and provided by Lipper or AllianzGI U.S. and was not independently verified by the Trustees. The Trustees reviewed, among other information, comparative information showing performance of each Fund against its respective Lipper performance universe for the one-year, three-year, five-year and (in the case of NFJ only) ten-year periods ended March 31, 2015.

In addition, it was noted that the Trustees considered matters bearing on the Funds and their advisory arrangements at their meetings throughout the year, including a review of performance data at each regular meeting (either by the full Board and/or the Performance Committee of the Board).

**Matters Relating to the Trustees Consideration of the Investment**

**Management & Portfolio Management Agreements (unaudited) (continued)**

**AllianzGI Diversified Income & Convertible Fund**  
**AllianzGI Equity & Convertible Income Fund**  
**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

As part of their review, the Trustees examined the Investment Manager's and the Sub-Advisers' abilities to provide high-quality investment management and other services to the Funds. Among other information, the Trustees considered the investment philosophy and research and decision-making processes of the Sub-Advisers, as well as the Sub-Advisers' broker selection process and trading operations; the experience of key advisory personnel of the Sub-Advisers responsible for portfolio management of the Funds; the ability of the Investment Manager and the Sub-Advisers to attract and retain capable personnel; the background and capabilities of the senior management and staff of the Investment Manager and the Sub-Advisers; employee compensation; and the operational infrastructure, including technology and systems, of the Investment Manager and the Sub-Advisers. In addition, the Trustees reviewed the extent and quality of the Investment Manager's and the Sub-Advisers' services with respect to regulatory compliance and compliance with the investment policies of the Funds; the compliance programs and risk controls of the Investment Manager and the Sub-Advisers; the specific contractual obligations of the Investment Manager and the Sub-Advisers pursuant to the Agreements; the nature and quality of certain administrative services the Investment Manager is responsible for providing to the Funds; and conditions that might affect the Investment Manager's or a Sub-Adviser's ability to provide high quality services to the Funds in the future under the Agreements, including each organization's respective financial condition and operational stability. Based on the foregoing, the Trustees concluded that the Sub-Advisers' investment process, research capabilities and philosophy were well suited to each of the Funds given their respective investment objectives and policies, that the Investment Manager's capabilities were well suited to the Funds' needs, and that the Investment Manager and the Sub-Advisers would be able to continue to meet any reasonably foreseeable obligations under the Agreements.

In assessing the reasonableness of each Fund's fees under the Agreements, the Trustees considered, among other information, each Fund's management fee and its total expense ratio (including any interest and borrowing expenses) as a percentage of average net assets attributable to common shares and the management fee and total expense ratios of peer expense groups of funds based on information provided by Lipper. The Fund-specific fee and expense results discussed below were prepared and provided by Lipper and were not independently verified by the Trustees.

The Trustees specifically took note of how each Fund compared to its Lipper peers as to performance and management fee and total net expenses. The Trustees noted that while the Funds are not charged a separate administration fee (recognizing that their management fee includes a component for administrative services), it was not clear in all cases whether the peer funds in the Lipper categories were separately charged such a fee by their investment managers, so that the total expense ratio (rather than any individual expense component) represented the most relevant comparison. It was noted that the total expense ratio comparisons reflect the

**Matters Relating to the Trustees Consideration of the Investment**

**AllianzGI Diversified Income & Convertible Fund**  
**AllianzGI Equity & Convertible Income Fund**  
**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

effect of expense waivers/reimbursements (although none exist for the Funds).

**Dividend, Interest & Premium Strategy**

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of five closed-end funds, including the Fund. The Trustees noted that only non-leveraged closed-end funds were considered for inclusion in the group. The Trustees also noted that average net assets of the common shares of the five funds in the expense group ranged from \$311.8 million to \$1.818 billion, and that one of the funds in the group was larger in asset size than the Fund. The Trustees also noted that the Fund was ranked second out of five funds in the expense group for total expense ratio (including any interest and borrowing expenses) based on common share assets and actual management fees based on common share assets (with funds ranked first having the lowest fees/expenses and funds ranked fifth having the highest fees/expenses in the expense group).

With respect to Fund total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had fifth quintile performance for the one-year period, fourth quintile performance for the three-year period, third quintile performance for the five-year period and fourth quintile performance for the ten-year period, each ended March 31, 2015.

**Equity & Convertible Income**

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of eight closed-end funds, including the Fund. The Trustees noted that only non-leveraged closed-end funds were considered for inclusion in the group. The Trustees also noted that average net assets of the common shares of the seven funds in the expense group ranged from \$181.8 million to \$968.0 million, and that three of the funds in the group were larger in asset size than the Fund. The Trustees also noted that the Fund was ranked fifth out of eight funds in the expense group for total expense ratio (including any interest and borrowing expenses) based on common share assets and third out of eight funds in the expense group for actual management fees based on common share assets (with funds ranked first having the lowest fees/expenses and funds ranked eighth having the highest fees/expenses in the expense group).

With respect to Fund total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had fourth quintile performance for the one-year period, second quintile performance for the three-year period and first quintile performance for the five-year period, each ended March 31, 2015.

## Edgar Filing: AllianzGI Equity & Convertible Income Fund - Form N-CSRS

In addition to their review of Fund performance based on net asset value, the Trustees also considered the market value performance of each Fund's common shares and related share price premium and/or discount information based on the materials provided by Lipper and management.

The Trustees were advised that the Investment Manager and the Sub-Advisers do not manage any funds or accounts, including institutional or separate accounts, with investment strategies and return profiles substantially similar to those

July 31, 2015 | Semi-Annual Report 75

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

of the Funds. However, the Trustees considered the management fees charged by the Investment Manager and/or the Sub-Advisers to other funds and accounts with strategies that have similarities (but none of which are substantially similar) to those of the Funds, including open-end funds and, in some cases, separate accounts, advised by the Sub-Advisers. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by such separate account clients. However, the Trustees were advised that the Investment Manager and Sub-Advisers generally provide broader and more extensive services to the Funds in comparison to separate accounts, and incur additional expenses in connection with the more extensive regulatory regime to which the Funds are subject in comparison to separate accounts generally. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by the open-end funds offered for comparison, but were advised that there are additional portfolio management challenges in managing closed-end funds such as the Funds, including those associated with less liquid holdings, issues relating to trading on a national exchange and attempting to meet a regular dividend, that do not apply to the management of open-end funds.

Based on a profitability analysis provided by the Investment Manager, the Trustees also considered the estimated profitability to the Investment Manager and Sub-Advisers (on a combined basis) from their relationship with each Fund and determined that such profitability did not appear to be excessive.

The Trustees also took into account that, as a general matter, as closed-end investment companies, the assets of the Funds will grow (if at all) principally through the investment performance of each Fund or through the use of additional leverage. The Trustees considered that the Funds do not currently intend to raise additional assets, and the Trustees therefore did not consider potential economies of scale as a principal factor in assessing the fee rates payable under the Agreements.

Additionally, the Trustees considered so-called fall-out benefits potentially available to the Investment Manager and the Sub-Advisers as a result of their advisory arrangements with the Funds, including research, statistical and quotation services from broker-dealers executing the Funds portfolio transactions, and enhanced visibility for marketing and distribution of other products managed by the Investment Manager and the Sub-Advisers.

After reviewing these and other factors described herein, the Trustees concluded with respect to each Fund, within the context of their overall conclusions regarding the Agreements and based on the information provided and related representations made by management, that they were satisfied with the Investment Manager's and the Sub-Advisers' responses and ongoing efforts relating to the investment performance of the Funds. The Trustees also concluded that the fees payable under each Agreement represent reasonable compensation in light of the nature, extent and quality of services provided by the Investment Manager or the applicable Sub-Adviser, as the case may be. Based on their evaluation of factors that they deemed to be material,

**AllianzGI Diversified Income & Convertible Fund**  
**AllianzGI Equity & Convertible Income Fund**  
**AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

including those factors described above, the Trustees, including the Independent Trustees, unanimously concluded that the continuation of the Agreements with respect to each Fund was in the best interests of the Fund and its shareholders, and should be approved.

**AllianzGI Diversified Income & Convertible Fund**

The 1940 Act requires that both the full Board and a majority of the Independent Trustees, voting separately, approve the Investment Management Agreement with the Investment Manager (for purposes of this section, the Advisory Agreement) and Portfolio Management Agreement between the Investment Manager and AllianzGI U.S. (for purposes of this section, the Sub-Advisory Agreement, and together with the Advisory Agreement, the Agreements) for AllianzGI Diversified Income & Convertible Fund (for purposes of this section, the Fund). The Trustees met in person on April 20, 2015 (the contract review meeting) for the specific purpose of considering whether to approve the Advisory Agreement and the Sub-Advisory Agreement for the Fund for initial terms of two years commencing upon their execution in connection with the initial public offering of the Fund's common shares. The Independent Trustees were assisted in their evaluation of the Agreements by Independent Counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meeting.

In connection with their deliberations regarding the approval of the Agreements, the Trustees, including the Independent Trustees, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Trustees considered the nature, quality, and extent of the various investment management, administrative and other services to be performed by the Investment Manager or AllianzGI U.S. under the applicable Agreement.

In advance of their contract review meeting, the Independent Trustees received and relied upon materials provided by the Investment Manager which included, among other items: (i) descriptions of various functions proposed to be performed by the Investment Manager and AllianzGI U.S. for the Fund, such as portfolio management, compliance monitoring and portfolio trading practices and administrative services, (ii) information regarding the overall organization of the Investment Manager and AllianzGI U.S., including information regarding senior management, portfolio managers and other personnel proposed to provide investment management, administrative and other services to the Fund, (iii) the estimated costs to the Investment Manager and AllianzGI U.S. of providing these services, (iv) the estimated profitability of the advisory arrangement to the Investment Manager and AllianzGI U.S. (on a combined basis), (v) information regarding economies of scale, (vi) information on potential fall-out benefits to the Investment

Manager and AllianzGI U.S., (vii) information from Morningstar, Inc. ( Morningstar ) as compiled by the Investment Manager, on the total return investment performance for various time periods of a group of funds, including certain funds managed by AllianzGI U.S., with investment classifications/objectives comparable to those of the Fund (the Trustees noted that the Fund was, at the time, newly organized and had no performance history of its own), (viii) information from Morningstar, as compiled by the Investment Manager, on the management fees and other expenses of comparable funds in the Morningstar peer group (the Morningstar Fee Information ) and (ix) information regarding the fees for any other open-end funds, closed-end funds, private funds and/or accounts, as applicable, managed by the Investment Manager and AllianzGI U.S. with strategies that are similar (but in no case identical) to those of the Fund.

The Trustees' conclusions as to the approval of the Agreements were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations are described below, although individual Trustees may have evaluated the information presented differently from one another, attributing different weights to various factors.

As part of their review, the Trustees examined the Investment Manager's and AllianzGI U.S.'s abilities to provide high quality investment management and other services to the Fund. Among other information, the Trustees considered the investment philosophy and research and decision-making processes to be employed by AllianzGI U.S. in managing the Fund, as well as AllianzGI U.S.'s broker selection process and trading operations; the experience of key advisory personnel of AllianzGI U.S. who would be responsible for portfolio management of the Fund; the ability of the Investment Manager and AllianzGI U.S. to attract and retain capable personnel; the background and capabilities of the senior management and staff of the Investment Manager and AllianzGI U.S.; employee compensation; and the general business policies and practices of AllianzGI U.S. and the Investment Manager that are not directly related to the Agreements. In addition, the Trustees reviewed the extent and quality of the Investment Manager's and AllianzGI U.S.'s services to be provided with respect to regulatory compliance and compliance with the investment policies of the Fund; the compliance programs of each of the Investment Manager and AllianzGI U.S.; the specific contractual obligations of each of the Investment Manager and AllianzGI U.S. pursuant to the Agreements; and conditions that might affect the Investment Manager or AllianzGI U.S.'s ability to provide high quality services to the Fund in the future under the Agreements, including each organization's respective financial condition, operational stability and ownership structure. Based on the foregoing, the Trustees concluded that AllianzGI U.S.'s investment process, research capabilities and philosophy were well suited to the Fund given its investment objective and policies, that the Investment Manager and

**AllianzGI Diversified Income & Convertible Fund  
AllianzGI Equity & Convertible Income Fund  
AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

AllianzGI U.S. would be able to meet any reasonably foreseeable obligations under the Agreements.

In assessing the reasonableness of the Fund's proposed fees under the Agreements, the Trustees considered, among other information, the Fund's management fee and projected total expense ratio and the management fees and total net expense ratios of a peer group of funds based on the Morningstar Fee Information. The Trustees also considered that the proposed fees to the Investment Manager and AllianzGI U.S. under the Agreements will increase in absolute dollar terms to the extent that the Fund utilizes leverage, and that therefore the Investment Manager and AllianzGI U.S. have a financial incentive to have leverage outstanding, which may create a conflict of interest between the Investment Manager and AllianzGI U.S., on the one hand, and the Fund's shareholders, on the other. The Trustees noted that, in connection with their assessment of the Fund's potential use of leverage, the meeting materials included fee data for peer funds based on both total (i.e., including leverage) and net assets, and both with and without interest expense. The Trustees considered, furthermore, the Fund's intention to initially engage in bank borrowings through the use of a short-term credit facility, and to subsequently replace a portion of its initial short-term borrowings with longer-term, fixed-rate financing. The Trustees also considered the Fund's common share repurchase plan and its potential effects on the Fund's asset levels and share price.

The Trustees specifically took note of how the Fund was expected to compare to its Morningstar peers as to management fee expense and total expenses (both before and after giving effect to leverage). The Trustees, at the recommendation of the Investment Manager, considered the estimated total expense ratio of the Fund compared to the total expenses of the peer funds (both before and after giving effect to leverage), recognizing that fees for management and administrative services would be included within the total expense ratio. It was noted that the Fund's proposed management fee was generally in line with the peer group average and median, as was the Fund's total net expense ratio, not including interest expense (somewhat above the peer group median but below the peer group average). It was noted that the total expense ratio comparisons reflected the effect of expense waivers/reimbursements (although none were proposed or reflected for the Fund). It was noted, further, that various information regarding the Fund's estimated fees and expenses would depend upon the actual size of the assets raised by the Fund in its initial public offering, such as the level of other expenses to be borne by the Fund, as well as the amount of leverage actually used by the Fund.

The Trustees also considered the management fees charged by the Investment Manager and AllianzGI U.S. to other funds and accounts, if any, with investment strategies that are similar (although in no case identical) to those of the Fund.

The Trustees also considered estimated profitability to the Investment Manager and

**Matters Relating to the Trustees Consideration of the Investment**

**Management & Portfolio Management Agreements (unaudited) (continued)**

**AllianzGI Diversified Income & Convertible Fund  
AllianzGI Equity & Convertible Income Fund  
AllianzGI NFJ Dividend, Interest & Premium Strategy Fund**

AllianzGI U.S. (on a combined basis) of their relationship with the Fund based on estimated initial offering sizes of the Fund and determined that such profitability was not excessive. The Trustees also took into account that estimated profitability would increase or decrease, as applicable, if the Fund raised a higher or lower level of assets in its initial public offering, and also took into account how estimated profitability would decrease significantly if the Investment Manager's start-up costs, transaction fees and other offering expenses associated with the initial public offering of the Fund were factored in. It was noted that the profitability analysis provided to the Trustees included estimates both before and after giving effect to estimated leverage.

The Trustees also took into account that, as a closed-end fund, the Fund was not expected to raise additional assets following its initial offering, so the net assets of the Fund were expected to grow (if at all) principally through the investment performance of the Fund or through the use of additional leverage. The Trustees also took into account the Investment Manager's view that the proposed management fees for the Fund represent appropriate sharing of economies of scale under anticipated asset levels, while recognizing that the size of the initial public offering could not be predicted with accuracy.

Additionally, the Trustees considered so-called "fall-out benefits" potentially available to the Investment Manager and AllianzGI U.S. as a result of their advisory arrangements, including research, statistical and quotation services from broker-dealers executing the Fund's portfolio transactions, and enhanced visibility for marketing and distribution of other products managed by the Investment Manager and AllianzGI U.S.

After reviewing these and other factors described herein, the Independent Trustees concluded, within the context of their overall conclusions regarding the Agreements, that the fees payable under each Agreement represent reasonable compensation in light of the nature, extent and quality of the services to be provided by the Investment Manager and AllianzGI U.S. to the Fund. Based on their evaluation of factors that they deemed to be material, including those factors described above, the Trustees, including the Independent Trustees, unanimously concluded that the approval of the Agreements was in the interests of the Fund and its shareholders, and should be approved for initial two-year periods commencing upon their execution.

**We Care about Your Privacy**

We consider your privacy to be a fundamental aspect of our relationship with you, and we strive to maintain the confidentiality, integrity and security of your Personal Information. To ensure your privacy, we have developed policies that are designed to protect your Personal Information while allowing your needs to be served.

**Information We May Collect**

In the course of providing you with products and services, we may obtain Personal Information about you, which may come from sources such as account application and other forms, from other written, electronic, or verbal communications, from account transactions, from a brokerage or financial advisory firm, financial advisor or consultant, and/or from information you provide on our website.

You are not required to supply any of the Personal Information that we may request. However, failure to do so may result in us being unable to open and maintain your account, or to provide services to you.

**How Your Information Is Shared**

We do not disclose your Personal Information to anyone for marketing purposes. We disclose your Personal Information only to those service providers, affiliated and non-affiliated, who need the information for everyday business purposes, such as to respond to your inquiries, to perform services, and/or to service and maintain your account. This applies to all of the categories of Personal Information we collect about you. The affiliated and non-affiliated service providers who receive your Personal Information also may use it to process your transactions, provide you with materials (including preparing and mailing prospectuses and shareholder reports and gathering shareholder proxies), and provide you with account statements and other materials relating to your account. These service providers provide services at our direction, and under their agreements with us, are required to keep your Personal Information confidential and to use it only for providing the contractually required services. Our service providers may not use your Personal Information to market products and services
