"Sales to wireless customers increased from approximately 24% of total sales to 28% in 2013, but more importantly I am excited by the market acceptance of several new solutions among leading mobile network operators, who are faced with the daunting challenge of increasing network capacity and improving quality of experience while reducing their operating expenses. Looking ahead to 2014, I fully expect our two main product groups and our wireless business to deliver growth, and the entire organization remains steadfastly focused on the execution of our profitable growth strategy which will benefit from a reduced cost base of US\$9.0 million."

§ Sales Growth. Despite difficult market conditions, sales of Physical-Layer solutions (Optical and Copper Access) increased 4.3% in fiscal 2013 mainly due to market-share leadership in portable Optical testing and strong growth from Copper Access products. Sales of Protocol-Layer solutions (Transport & Datacom, Wireless and Service Assurance) decreased 11.3% year-over-year as the company upgraded several product lines during the course of the year and endured delayed investments by fixed and mobile network operators. Overall, EXFO's sales decreased 3.1% year-over-year.

Sales to wireless customers improved to approximately 28% of total sales in fiscal 2013 from 24% in 2012.

Business Outlook
