FOR IMMEDIATE RELEASE

Oncolytics Biotech Announces 2003 Second Quarter Results

CALGARY, Alberta, August 1, 2003 Oncolytics Biotech Inc. (TSX: ONC, NASDAQ: ONCY) (Oncolytics) today announced its financial results for the three and six-month periods ending June 30, 2003.

Second Quarter Highlights

Increased working capital by \$8.7 million through the completion of a private placement, the sale of a non-core asset and exercise of warrants.

Added 7th U.S. patent, covering co-administration of the virus with immune suppressing agents such as cyclosporine, and use of the virus in combination with conventional therapeutic agents and treatments such as surgery, chemotherapy and radiation therapy.

Added 8th U.S. patent, covering use of combinations of reovirus strains for the treatment of Ras-mediated tumours.

Received approval from Health Canada for amendments to the Phase I/II recurrent malignant glioblastoma clinical trial, allowing the trial to resume enrolling patients.

In the second quarter, the Company strengthened its working cash position, as well as adding two U.S. patents that we consider important, said Dr. Brad Thompson, President and CEO of Oncolytics. We believe that the Company is now well positioned to continue its development of REOLYSIN®.

FINANCIAL REVIEW

CAPITAL EXPENDITURES

The Company continues to expand and protect its intellectual property. Oncolytics has received three U.S. patents during the first half of 2003. In the second quarter of 2003 the Company received its seventh and eighth U.S. patents covering the use of combinations of reovirus strains for the treatment of Ras-mediated tumours and co-administration of reovirus with immune suppressing agents such as Cyclosporin. Total patent costs incurred in 2003 were \$595,147 compared to \$346,186 in 2002.

Table of Contents

INVESTMENTS

Transition Therapeutics Inc. (TTH)

In the second quarter of 2003, the Company took advantage of an opportunity to monetize its investment in TTH. On June 6, 2003, Oncolytics sold all of its 6.89 million common shares in TTH for net cash proceeds of \$2.55 million. The sale of TTH has provided the Company with additional operating capital that will allow Oncolytics to continue its development of REOLYSIN®. As a result of the sale, an accounting loss of \$2.2 million was recorded (\$0.10 per share).

FINANCING ACTIVITIES

On June 19, 2003 the Company closed a private placement raising net proceeds of \$5.8 million. The Company issued 2,120,000 units for \$3.00 per unit. Each unit consisted of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase an additional common share for \$4.00 per share until December 19, 2004.

RESULTS OF OPERATIONS (For the three month period ended June 30, 2003)

Research and Development Expenses (R&D)

During the second quarter of 2003, the Company incurred R&D expenses of \$848,721 compared to \$753,200 in the second quarter of 2002. The increase in R&D expenses relates to costs associated with the production of REOLYSIN® as the Company continues activities in support of its commercial manufacturing process and prepares for a systemic clinical trial. As a result, the Company continues to incur costs associated with the production, quality and stability testing of REOLYSIN®. The Company also continues to study the toxicology of REOLYSIN® as it prepares to expand its clinical trial program. Pre-clinical toxicology studies were performed focusing on the systemic delivery of REOLYSIN® in the second quarter of 2003. Finally, the Company continues to advance its malignant glioma Phase I/II trial. On May 6, 2003 the malignant glioma trial was given approval to re-commence from Health Canada after protocol amendments were submitted following a planned interim safety assessment of the study in December of 2002.

Operating Expenses

During the second quarter of 2003, the Company incurred operating expenses of \$826,894 compared to \$601,495 in the second quarter of 2002. Operating expenses for the second quarter of 2003 increased due to additions to Oncolytics staff, increased professional fees and filing costs associated with public company filing requirements, an increase in liability insurance premiums and non-cash compensation associated with stock based compensation paid to third parties.

Loss on Sale of Investment in TTH

As a result of the sale of the Company's ownership in TTH a loss of \$2,156,685 was recorded. The loss represents the difference of the cash proceeds received on the sale of its TTH shares and the cost value ascribed to the investment when it was acquired through a share exchange in 2002.

About Oncolytics Biotech Inc.

Oncolytics is a Calgary-based biotechnology company focused on the development of REOLYSIN®, its proprietary formulation of the human reovirus, as a potential cancer therapeutic. Oncolytics' researchers have demonstrated that the reovirus is able to selectively kill human cancer cells *in vitro* that are derived from many types of cancer, including breast, prostate, pancreatic and brain tumours, and have also demonstrated successful cancer treatment results in a number of animal models. Phase I clinical trial results have indicated that REOLYSIN® was well tolerated and that the reovirus demonstrated activity in tumours injected with REOLYSIN®.

This news release contains forward looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Forward looking statements, including the Company's belief as to the value of the additional patents; the Company's expectations related to the applications of the patented technology, the ability of the technology to strengthen the core technology and the design, timing and success of planned clinical trial programs and other statements related to anticipated developments in the Company's business and technologies, all of which involve known and unknown risks and uncertainties that could cause the Company's actual results to differ materially from those in the forward looking statements. Such risks and uncertainties include, among others, the efficacy of REOLYSIN® as a cancer treatment, the success and timely completion of clinical studies and trials, uncertainties related to the research and development of pharmaceuticals, uncertainties related to the regulatory process and general changes to the economic environment. Investors should consult the Company's quarterly and annual filings with the Canadian and U.S. securities commissions for additional information on risks and uncertainties relating to the forward looking statements. Investors are cautioned against placing undue reliance on forward looking statements. The Company does not undertake to update these forward looking statements.
