### **About Oncolytics Biotech Inc.**

Oncolytics is a Calgary-based biotechnology company focused on the development of REOLYSIN®, its proprietary formulation of the human reovirus, as a potential cancer therapeutic. Oncolytics researchers have demonstrated that the reovirus is able to selectively kill human cancer cells in vitro that are derived from many types of cancer, including breast, bladder, prostate, pancreatic and brain tumours, and have also demonstrated successful cancer treatment results in a number of animal models. Phase I clinical trial results have indicated that REOLYSIN® was well tolerated and that the reovirus demonstrated activity in tumours injected with REOLYSIN®.

The webcast time is subject to change. This release and the presentation related thereto contain forward-looking statements which involve known and unknown risks, delays, uncertainties and other factors not under the Company s control and which may cause actual results, performance or achievements of the Company to be materially different from the results, performance or expectations implied by these forward-looking statements.
