Triton Petroleum Group, Inc.

Notes to the Condensed Consolidated Financial Statements

For the Three Month Period Ended March 31, 2006

(Unaudited)

BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Item 310 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2006 are not necessarily indicative of the results that may be expected for the year ended December 31, 2006. The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-KSB for the year ended December 31, 2005.

GOING CONCERN

The accompanying condensed consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. As reflected in the condensed consolidated financial statements, the Company has incurred recurring net losses from operations, an accumulated deficit, and recurring negative cash flows from operations. Further, at March 31, 2006, current liabilities exceed current assets by approximately \$2,937,000 and total liabilities exceed total assets by approximately \$2,764,000. Its ability to continue as a going concern is dependent upon the ability of the Company to obtain the necessary financing to meet its obligations and pay its liabilities arising from normal business operations when they come due. These factors all raise substantial doubt about the ability of the Company to continue as a going concern.

Management's plan in regard to the going concern issues it to raise additional capital through new debt and equity financing in conjunction with future acquisitions.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS

Results of Operations

The Company's operating subsidiary, APPC Oil Company, Inc., increased its sales by 78% from the first quarter of 2005 to the first quarter of 2006. The increase was primarily attributable to management's determination to apply available cash flow to the purchase of inventory, to enable APPC Oil to meet the demand for its products. With the increase in sales came an increase in gross margin from 27% to 30%, primarily due to the allocation of factory expenses over a larger sales volume.

Despite the increase in revenue, the level of operations of APPC Oil remains insufficient to sustain the Company.

Selling, general and administrative expenses of \$524,615 in the first quarter of 2006 dwarfed the Company's gross profit of \$205,367, resulting in an operating loss of \$319,248. The level of administrative expense in the quarter was disproportionate to the level of revenue, as the Company accumulated management and facilities in anticipation of growth. Due to lack of funds, growth has been limited, resulting in excess overhead. The Company began to reduce its overhead level in the second quarter of 2006, after a change in management.

Selling, general and administrative expense during the first quarter of 2005 was \$1,162,838, more than twice the level of the first quarter of 2006. The primary reason for the disparity was the fact that the Company recognized a large bad debt expense in the beginning of 2005.

The demand for the products of APPC Oil Company is strong. And the company has the factory capacity to meet the demand. The hindrance to successful operations is the company's lack of funds. In order to satisfy orders for its petroleum products, APPC Oil must purchase raw materials, primarily oil and additives. In general, the time gap between the company's investment in raw materials and payment for the finished product is several months. Without cash resources, APPC Oil can only maintain a limited level of inventory. As a result, it is able to accept and service only a small portion of the potential orders for its products.

Interest expense increased from \$10,417 in the first quarter of 2005 to \$38,189 in the first quarter of 2006. The reason for the increase was the financing completed by the Company at the end of the first quarter of 2005.

The Company recorded a net loss of \$357,437 for the first quarter of 2006. In the first quarter of 2005 the net loss had been \$3,846,043, due to the factors mentioned above and the fact that the Company incurred a financing expense of \$2,872,500 in connection with the sale of convertible debentures in the first quarter of 2005. The Company will continue to incur losses until it can finance operations at a level proportionate to the Company's overhead.

Liquidity and Capital Resources

The Company's operations generated \$20,832 in cash during the first quarter of 2006. The positive cash flow from operations was achieved by reducing the Company's inventory of raw materials by \$155,885. The positive result, then, was achieved at the expense of future revenues, which are directly dependent on the availability to APPC Oil of raw materials inventory.

During the same period that operations produced \$20,832 in cash, the interest accrual on our balance sheet as a result of the Company's debt load increased by \$38,190. In addition, the Company paid nothing on account of any of its \$2,418,181 in debt. Because of the Company's inability to meet the requirements of its debts, the Company's independent auditor, in its report on the Company's 2005 financial statements, expressed substantial doubt as to the ability of the Company to continue as a going concern.

Because APPC Oil is unable to service its debts and fund operations, in August 2006 it petitioned for reorganization under Chapter 11 of the U.S. Bankruptcy Code. The action is pending in the U.S. Bankruptcy Court for the Southern District of New York, Poughkeepsie Division. At present it is not possible to determine whether APPC Oil can be successfully reorganized into a viable company. Since it is the only revenue-producing subsidiary of Triton Petroleum, the survival of Triton Petroleum will depend on a successful reorganization of APPC Oil.

Triton Petroleum lacks sufficient resources to sustain operations for the next twelve months. Management hopes that the APPC Oil bankruptcy proceeding will enable the Company to attract investors, who can provide the Company a fresh start. To date, however, no significant financing commitment has been achieved.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition or results of operations.

ITEM 3. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. Our Chief Executive Officer and Chief Financial Officer carried out an evaluation of the effectiveness of our disclosure controls and procedures as of March 31, 2006. Pursuant to Rule 13a-15(e) promulgated by the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934, disclosure controls and procedures means controls and other procedures that are designed to insure that information required to be disclosed by Triton Petroleum in the reports that it files with the Securities and Exchange Commission is recorded, processed, summarized and reported within the time limits specified in the Commission's rules. Disclosure controls and procedures include, without limitation, controls and procedures designed to insure that information Triton Petroleum is required to disclose in the reports it files with the Commission is accumulated and communicated to our Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosure. Based on his evaluation, our Chief Executive Officer and Chief Financial Officer concluded that Triton Petroleum's system of disclosure controls and procedures was effective as of March 31, 2006 for the purposes described in this paragraph.

Changes in Internal Controls. There was no change in internal controls over financial reporting (as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934) identified in connection with the evaluation described in the preceding paragraph that occurred during Triton Petroleum's first fiscal quarter that has materially affected or is reasonably likely to materially affect Triton Petroleum's internal control over financial reporting.
