CARL LANDERS, Director

Mr. Landers serves as Chairman of the Compensation Committee and a member of the Audit and Governance Committee of the Board of Directors. Carl Landers is the inventor of the Landers Lateral Horizontal Drilling (LHD) technology, and has been instrumental in bringing a contrarian approach to the energy industry. With more than 300 wells completed with his patented technology, Landers has moved from experimental to proven results for companies such as Anadarko, Burlington Resources and a division of Shell Oil. The Landers family has been associated with the oil industry over three generations. The development of the Landers Horizontal Drill came out of a fundamental need. Mr. Landers developed a solution that has made horizontal drilling far more cost effective, portable and practical. He worked on the development of this horizontal drill from 1986 until 1993 when the first prototype was ready for field-testing. It took from 1993 to 1996 for the drill to be commercially viable. Mr. Landers has worked on a step-by-step process that has proven to work with total repeatability and success, on the following formations: sandstone, limestone, coal seam and chalk. Inventor of the Landers Horizontal Technology, Mr. Landers has been the owner of Advanced Petroleum Technology Company for the last six years, before his direct involvement with MAXIM.

Degree in Mechanical Engineering, Mr. Pensack served in the military, finishing as a First Lieutenant in 1946. He spent seven years in the insurance industry earning promotions and supervisory positions but then saw the potential in the young computer industry. In 1953, utilizing his engineering training and entrepreneurial spirit, he founded Mitronics Inc., an innovative firm and manufacturer of hermetic ceramic to metal seals for the then-fledgling semiconductor industry. Mr. Pensack served as Chairman and CEO of Mitronics, which prospered, and in 1970 was merged into a public corporation to become Varadyne, Inc. Throughout the 1970s, 1980s and 1990s, Mr. Pensack had an active career as a financial consultant specializing in insurance, business succession planning and estate management. Throughout his career, and quick to recognize potential in many diverse fields, Mr. Pensack has been a private investor who specializes in researching and analyzing potential investment choices with a focus on management personnel and growth opportunity.

JOHN P. RITOTA, JR., D.D.S. - Director

Dr. Ritota serves as Chairman of the Audit Committee and a member of the Compensation and Governance Committees of the Board of Directors. As a Board member, Dr. Ritota negotiated an international contract with one of the world's largest food service companies, McDonalds. As one to seek out and invest in innovative technologies, he was also one of the original investors in CompuPix, one of the first developers of high definition televisions (HDTV), and was an original investor in Orrox, a company that offered one of the first eighteen-inch satellite dishes, and one that developed one of the first digital editing machines, later acquired by CBS. A published writer on a number of medical and dental issues, Dr. Ritota graduated from Ithaca College in June 1971, and then earned his Doctor of Dental Science at Georgetown University in May 1975, where he was also given a grant in 1975 for the "Anatomical Study of Temporo-Mandibular Joint" and his work on the subject of TMJ disorders has earned him much recognition nationally.
