FORM N-CSR

CERTIFIED SHAREHOLDER REPORT OF REGISTERED MANAGEMENT INVESTMENT COMPANIES

Investment Company Act file number 811-21982

Claymore/Guggenheim Strategic Opportunities Fund
(Exact name of registrant as specified in charter)

2455 Corporate West Drive, Lisle, IL 60532
(Address of principal executive offices) (Zip code)

Kevin M. Robinson

2455 Corporate West Drive, Lisle, IL 60532
(Name and address of agent for service)

Registrant's telephone number, including area code: (630) 505-3700

Date of fiscal year end: May 31

Date of reporting period: November 30, 2010

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. Section 3507.

Item 1. Reports to Stockholders.

The registrant's semi-annual report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940, as amended (the "Investment Company Act"), is as follows:

It is just one more small way we are working to keep you better informed about your investment in the Fund.

2 | Semiannual Report | November 30, 2010

GOF | Claymore/Guggenheim Strategic Opportunities Fund

Dear Shareholder |

We thank you for your investment in the Claymore/Guggenheim Strategic Opportunities Fund (the “Fund”). This report covers the Fund’s performance for the semiannual fiscal period ended November 30, 2010.

The Fund’s investment objective is to maximize total return through a combination of current income and capital appreciation. The Fund seeks to achieve that objective by combining a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms.

Guggenheim Funds Investment Advisors, LLC (“Guggenheim Funds” or the “Adviser”), formerly known as Claymore Advisors, LLC (“Claymore”), serves as the adviser to the Fund. The name change, effective September 24, 2010, marks the next phase of business integration following the acquisition of Claymore by Guggenheim Partners, LLC (“Guggenheim Partners”), announced on October 15, 2009. Guggenheim Partners Asset Management, LLC (“GPAM” or the “Sub-Adviser”) serves as the Fund’s investment sub-adviser and is responsible for the management of the Fund’s portfolio of investments. Each of the Adviser and the Sub-Adviser is an affiliate of Guggenheim Partners, a global diversified financial services firm with more than \$100 billion in assets under management and supervision.

All Fund returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2010, the Fund returned 14.62% on a NAV basis and 20.48% on a market price basis. The closing price of the Fund’s shares as of November 30, 2010, was \$20.02, which represented a premium of 4.43% to the NAV of \$19.17. The closing price of the Fund’s shares as of May 31, 2010, was \$17.46, which represented a discount of 0.57% to the NAV of \$17.56. The market value of the Fund’s shares fluctuates from time to time and it may be higher or lower than the Fund’s NAV.

During the six-month period ended November 30, 2010, the Fund paid monthly dividends of \$0.154 per share. The most recent dividend represents an annualized distribution rate of 9.23% based on the Fund’s last closing market price of \$20.02 as of November 30, 2010.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan (“DRIP”), which is described in detail on page 31 herein. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund’s common shares is at a premium above NAV, the DRIP reinvests participants’ dividends in newly-issued common shares at NAV, subject to an IRS limitation that the purchase price cannot be more than 5% below the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time. Since the Fund endeavors to maintain a stable monthly distribution, the DRIP plan effectively provides an income averaging technique, which causes shareholders to accumulate a larger number of Fund shares when the market price is depressed than when the price is higher.

December 31, 2010

4 | Semiannual Report | November 30, 2010

GOF | Claymore/Guggenheim Strategic Opportunities Fund |

Questions & Answers |

The investment portfolio of Claymore/Guggenheim Strategic Opportunities Fund (the “Fund”) is managed by a team of seasoned professionals at Guggenheim Partners Asset Management, LLC (“GPAM”). This team includes B. Scott Miner, Chief Executive Officer and Chief Investment Officer; Anne Bookwalter Walsh, CFA, JD, Senior Managing Director; Michael Curcio, Senior Managing Director; and Kerim Engin, Ph.D., Managing Director & Director of Risk Management. In the following interview, the investment team discusses the market environment and the Fund’s performance for the Fund’s semiannual fiscal period ended November 30, 2010.

Please remind us of this Fund’s objective and the way it is managed.

The Fund’s investment objective is to seek to maximize total return through a combination of current income and capital appreciation. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. GPAM seeks to combine a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. There is no guarantee that the perceived fair value will be achieved.

The Fund seeks to achieve its investment objective by investing in a wide range of fixed income and other debt and senior equity securities (“income securities”) selected from a variety of sectors and credit qualities, including, but not limited to, corporate bonds, loans and loan participations, structured finance investments, U.S. government and agency securities, mezzanine and preferred securities and convertible securities, and in common stocks, limited liability company interests, trust certificates and other equity investments (“common equity securities”) that GPAM believes offer attractive yield and/or capital appreciation potential, including employing a strategy of writing (selling) covered call and put options on such equities. GPAM believes the volatility (risk) of the Fund can be reduced by diversifying the portfolio across a large number of sectors and securities, many of which historically have not been highly correlated to one another.

- The Fund may invest, under normal market conditions, up to 60% of its total assets in income securities rated below investment grade (commonly referred to as “junk bonds”).
- The Fund may invest up to 20% of its total assets in non-U.S. dollar-denominated fixed-income securities of corporate and governmental issuers located outside the U.S., including up to 10% of total assets in income securities of issuers located in emerging markets.
- The Fund may invest up to 50% of its total assets in common equity securities consisting of common stock; and
- The Fund may invest up to 30% of its total assets in investment funds that primarily hold (directly or indirectly) investments in which the Fund may invest directly and may invest up to 20% of the Fund’s total assets in investment funds that are registered as investment companies under the Investment Company Act of 1940, as amended (the “1940 Act”) to the extent permitted by applicable law and related interpretations of the staff of the U.S. Securities and Exchange Commission.

GPAM's investment process is a collaborative effort between its Portfolio Construction Group, which utilizes tools such as a proprietary risk optimization model to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions.

The Fund seeks to enhance the level of distributions by utilizing financial leverage through borrowings, reverse repurchase agreements or other forms of debt. As of November 30, 2010, the amount of leverage was approximately 28% of the Fund's total assets.

Although the use of financial leverage by the Fund may create an opportunity for increased return for the common shares, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned on securities purchased with the financial leverage proceeds are greater than the cost of the financial leverage, then the common shares' return will be greater than if financial leverage had not been used. Conversely, if the income and gains from the securities purchased with the financial leverage is less than the cost of the financial leverage then the return on the common shares will be less than if financial leverage had not been used. There can be no assurance that a leveraging strategy will be implemented or that it will be successful during any period during which it is employed.

Please tell us about the market environment over the last six months.

The six-month period ended November 30, 2010, and indeed the entire calendar year 2010, has proven to be a very good period for financial markets generally, with tremendous improvement in the markets for both stocks and bonds. This market strength is most welcome for investors, as it follows a difficult period for financial markets that was characterized by sharp declines in the market prices of most non-government securities. In the bond market, the spread sectors (that is, bonds

Semiannual Report | November 30, 2010 15

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Questions & Answers continued

that carry credit risk) have performed especially well during 2010, as investors have once again embraced risky assets. During 2008 and 2009 investors were fearful of risk, and lower rated, less liquid debt securities performed very poorly. During 2010, high yield bonds and riskier asset classes such as asset-backed securities (“ABS”), riskier sectors of commercial mortgage-backed securities (“CMBS”), and non-agency residential mortgage-backed securities (“RMBS”) have been among the best performing asset classes.

For the six-month period ended November 30, 2010, the Standard & Poor’s 500 Index (“S&P 500”), which is generally regarded as an indicator of the broad U.S. stock market, returned 9.50%. The Barclays Aggregate Bond Index, which is a proxy for the investment grade bond market, returned 3.85%. Reflecting investors’ increased appetite for risk, the return of the Barclays U.S. Corporate High Yield Index was 9.54%. The return of the Barclays U.S. Treasury Bill 1-3 Months Index was just 0.07%, a reflection of the record low Fed Funds target rate set between zero and 0.25%.

How did the Fund perform during this period?

The Fund performed very well over the last six months, as it has done in previous periods. All Fund returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2010, the Fund returned 14.62% on an NAV basis and 20.48% on a market price basis. The closing price of the Fund’s shares as of November 30, 2010, was \$20.02, which represented a premium of 4.43% to the NAV of \$19.17. The closing price of the Fund’s shares as of May 31, 2010, was \$17.46, which represented a discount of 0.57% to the NAV of \$17.56. The market value of the Fund’s shares fluctuates from time to time and it may be higher or lower than the Fund’s NAV.

An important goal of the Fund is to provide long-term returns in line with equity returns but with less volatility. For the period from the Fund’s inception date of July 27, 2007, through November 30, 2010, the Fund’s NAV return on an annualized basis was 12.17%, compared with the annualized return of -4.45% for the S&P 500. Over this same period, the Fund’s annualized volatility has been approximately 10%. This compares with annualized volatility of the Barclays Aggregate Bond Index (a proxy for bonds) of approximately 5% and volatility of the S&P 500 of approximately 30% over the same period. Since inception, on an annualized basis, the Fund has outperformed equities (as measured by the S&P 500) by 16.67 percentage points with less than one-third of the volatility. The volatility is measured by calculating the standard deviation of the percentage changes in the Fund’s daily NAV and then annualizing these percentage changes. The relatively low volatility of the Fund’s NAV is attributable to its high level of diversification across many different asset classes.

During the six-month period ended November 30, 2010, the Fund paid monthly dividends of \$0.154 per share. The most recent dividend represents an annualized distribution rate of 9.23% based on the Fund’s last closing market price of \$20.02 as of November 30, 2010.

How was the Fund allocated among asset classes during this period and how did these decisions affect performance?

This Fund was created to provide investors the potential to realize a level of return similar to that achieved by equities, but with less volatility. GPAM tracks a large number of equity and fixed income asset classes and, in constructing this portfolio, it seeks to use investments that historically have had low correlations to one another. GPAM has attempted

to optimize the portfolio by analyzing the historical returns generated by GPAM's management team in each sector, the volatility of each sector and the correlations among the sectors. GPAM does this in an effort to reduce the risk of the portfolio while providing the potential for an attractive long-term return to their investors.

In the final months of 2008, GPAM recognized some unusual opportunities in the market, especially for structured securities, which were selling at extremely depressed prices. One reason was that certain levered investors were forced to sell securities at a time of very poor market liquidity, creating attractive opportunities for opportunistic investors such as GPAM. Additionally, many investors were so fearful of the high level credit risk in some structured securities that they shied away from the entire category, driving prices much lower than was warranted by fundamentals. With its ability to thoroughly analyze both asset classes and individual securities, GPAM was well positioned to invest in some of the more sound structured securities and continued to do so during 2009. Accordingly, the Fund was heavily invested during the period in asset-backed securities, which represented approximately 42.0% of the Fund's total investments as of November 30, 2010.

Additionally, almost 23% of the portfolio was invested in commercial mortgage-backed securities, another sector that investors had avoided, fearing a spate of defaults in commercial mortgages, similar to what happened in the residential mortgage market. These fears were not realized, and CMBS have recovered nicely.

The approximately 65% of the Fund's total investments that were in ABS and CMBS were the main reasons for the Fund's strong performance during the six months ended November 30, 2010.

6 | Semiannual Report | November 30, 2010

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Questions & Answers continued

The only disadvantage to this very strong performance of the portfolio's structured securities was that the value of the positions has increased so much that the Fund's representation in equities is relatively low, approximately 10% as of November 30, 2010. While this small equity position performed very well, in line with the equity market, the Fund's performance would have been even better if it had had greater participation in the equity market.

How did the Fund's leverage affect performance during this period?

Since leverage adds to performance when the cost of leverage is less than the total return generated by investments, the use of leverage contributed to the Fund's total return during this period. The purpose of leverage (borrowing) is to fund the purchase of additional securities that provide increased income and potentially greater appreciation to common shareholders than could be achieved from an unlevered portfolio. Of course, leverage results in greater NAV volatility and entails more downside risk than an unlevered portfolio.

As of November 30, 2010, the Fund's leverage is approximately 28% of total assets. GPAM employs leverage through three vehicles: reverse repurchase agreements, under which it lends securities and receive in return cash which can be used for additional investments; a committed financing facility through BNP Paribas, a leading European bank; and the Troubled Asset - Backed Securities Loan Facility ("TALF") loan program.

What is the current outlook for the markets and the Fund, and how is the Fund positioned for this outlook?

GPAM believes that market trends will continue to be positive for financial assets such as those held by the Fund. As the U.S. and world economies continue to recover, albeit at a relatively modest pace, valuations of both debt and equity securities are likely to improve.

Given the Fund's mandate and its ability to invest across many asset classes, it has been very well suited to take advantage of the opportunities that have prevailed since the summer of 2007 when the Fund was launched. In the name of this Fund—Claymore/Guggenheim Strategic Opportunities Fund—the key term is "opportunities." The Fund was designed to invest across a broad array of sectors and securities, and to take advantage of the imbalances and dislocations that often exist in the financial markets. GPAM continues to believe that a portfolio that is highly diversified across many asset classes, such as those represented by the Fund, can be of great value to investors in a wide variety of market conditions.

Index Definitions

Indices are unmanaged and reflect no expenses. It is not possible to invest directly in an index.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.

The Barclays U.S. Corporate High Yield Index is an unmanaged index of below investment grade bonds issued by U.S. corporations.

Barclays Capital U.S. Treasury Bill 1-3 Months Index tracks the performance of U.S. Treasury bills with a remaining maturity of one to three months. U.S. Treasury bills, which are short-term loans to the U.S. government, are full-faith-and-credit obligations of the U.S. Treasury and are generally regarded as being free of any risk of default.

Risks and Other Considerations

The views expressed in this report reflect those of Guggenheim Funds and GPAM only through the report period as stated on the cover. These views are subject to change at any time, based on market and other conditions and should not be construed as a recommendation of any kind. The material may also include forward looking statements that involve risk and uncertainty, and there is no guarantee that any predictions will come to pass. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value.

Below Investment-Grade Securities Risk: The Fund may invest in income securities rated below investment grade or, if unrated, determined by the Sub-Adviser to be of comparable credit quality, which are commonly referred to as “high-yield” or “junk” bonds. Investment in securities of below investment-grade quality involves substantial risk of loss. Income securities of below investment-grade quality are predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal when due and therefore involve a greater risk of default or decline in market value due to adverse economic and issuer-specific developments.

Semiannual Report | November 30, 2010 | 7

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Questions & Answers continued

Senior and Second Lien Secured Loans Risk: The Fund's investments in senior loans and second lien secured floating-rate loans are typically below investment grade and are considered speculative because of the credit risk of their issuers. The risks associated with senior loans of below investment-grade quality are similar to the risks of other lower-grade income securities. Second lien loans are second in right of payment to senior loans and therefore are subject to the additional risk that the cash flow of the borrower and any property securing the loan may be insufficient to meet scheduled payments after giving effect to the senior-secured obligations of the borrower. Second lien loans are expected to have greater price volatility and exposure to losses upon default than senior loans and may be less liquid.

Structured Finance Investments Risk: The Fund's structured finance investments may include residential and commercial mortgage-related and asset-backed securities issued by governmental entities and private issuers, collateralized debt obligations and risk-linked securities. These securities entail considerable risk, including many of the risks described above (e.g., market risk, credit risk, interest rate risk and prepayment risk). The value of collateralized debt obligations also may change because of changes in the market's perception of the underlying collateral of the pool, the creditworthiness of the servicing agent for or the originator of the pool, or the financial institution or entity providing credit support for the pool. Returns on risk-linked securities are dependent upon such events as property or casualty damages which may be caused by such catastrophic events as hurricanes or earthquakes or other unpredictable events.

Mezzanine Investments Risk: Mezzanine investments are subject to the same risks associated with investment in senior loans, second lien loans and other lower-grade income securities. Mezzanine investments are expected to have greater price volatility than senior loans and second lien loans and may be less liquid.

Preferred Stock Risk: Preferred stock is inherently more risky than the bonds and other debt instruments of the issuer, but typically less risky than its common stock. Preferred stocks may be significantly less liquid than many other securities, such as U.S. Government securities, corporate debt and common stock.

Convertible Securities Risk: As with all income securities, the market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. Convertible securities also tend to reflect the market price of the underlying stock in varying degrees, depending on the relationship of such market price to the conversion price in the terms of the convertible security.

Equity Risk: Common equity securities' prices fluctuate for a number of reasons, including changes in investors' perceptions of the financial condition of an issuer, the general condition of the relevant stock market, and broader domestic and international political and economic events.

Real Estate Securities Risk: Because of the Fund's ability to invest in securities of companies in the real estate industry and to make indirect investments in real estate, it is subject to risks associated with the direct ownership of real estate, including declines in the value of real estate; general and local economic conditions; increased competition; and changes in interest rates. Because of the Fund's ability to make indirect investments in natural resources and physical commodities, and in real property asset companies, the Fund is subject to risks associated with such real property assets, including supply and demand risk, depletion risk, regulatory risk and commodity pricing risk.

Personal Property Asset Company Risk: The Fund may invest in personal property asset companies such as special situation transportation assets. The risks of special situation transportation assets include cyclicality of supply and demand for transportation assets and risk of decline in the value of transportation assets and rental values. Private Securities Risk Private securities have additional risk considerations than with investments in comparable public

investments.

Inflation/Deflation Risk: There is a risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money.

Dividend Risk: Dividends on common stock and other common equity securities which the Fund may hold are not fixed but are declared at the discretion of an issuer's board of directors. There is no guarantee that the issuers of the common equity securities in which the Fund invests will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

Portfolio Turnover Risk: The Fund's annual portfolio turnover rate may vary greatly from year to year. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in an increased realization of net short-term capital gains by the Fund which, when distributed to common shareholders, will be taxable as ordinary income. Additionally, in a declining market, portfolio turnover may create realized capital losses.

Derivatives Risk: The Fund may be exposed to certain additional risks should the Sub-Adviser use derivatives as a means to synthetically implement the Fund's investment strategies. If the Fund enters into a derivative instrument whereby it agrees to receive the return of a security or financial instrument or a basket of securities or financial instruments, it will typically contract to receive such returns for a predetermined period of time. During such period, the Fund may not have the ability to increase or decrease its exposure. In addition, such customized derivative instruments will likely be highly illiquid, and it is possible that the Fund will not be able to terminate such derivative instruments prior to their expiration date or that the penalties associated with such a termination might impact the Fund's performance in a material adverse manner. Furthermore, derivative instruments typically contain provisions giving the counterparty the right to terminate the contract upon the occurrence of certain events. If a termination were to occur, the Fund's return could be adversely affected as it would lose the benefit of the indirect exposure to the reference securities and it may incur significant termination expenses.

Foreign Securities and Emerging Markets Risk: Investing in foreign issuers may involve certain risks not typically associated with investing in securities of U.S. issuers due to increased exposure to foreign economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations, expropriation or nationalization of assets, imposition of withholding taxes on payments and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities and obligations are subject to different, often less comprehensive, accounting, reporting and disclosure requirements than domestic issuers. The securities and obligations of some foreign companies and foreign markets are less liquid and at times more volatile than comparable U.S. securities, obligations and markets. These risks may be more pronounced to the extent that the Fund invests a significant amount of its assets in companies located in one region and to the extent that the Fund invests in securities of issuers in emerging markets. Heightened risks of investing in emerging markets include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible repatriation of investment income and capital.

8 | Semiannual Report | November 30, 2010

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Questions & Answers continued

Financial Leverage Risk: Although the use of Financial Leverage by the Fund may create an opportunity for increased after-tax total return for the Common Shares, it also results in additional risks and can magnify the effect of any losses. If the income and gains earned on securities purchased with Financial Leverage proceeds are greater than the cost of Financial Leverage, the Fund's return will be greater than if Financial Leverage had not been used. Conversely, if the income or gains from the securities purchased with such proceeds does not cover the cost of Financial Leverage, the return to the Fund will be less than if Financial Leverage had not been used. Financial Leverage involves risks and special considerations for shareholders, including the likelihood of greater volatility of net asset value and market price of and dividends on the Common Shares than a comparable portfolio without leverage; the risk that fluctuations in interest rates on borrowings that the Fund must pay will reduce the return to the Common Shareholders; and the effect of Financial Leverage in a declining market, which is likely to cause a greater decline in the net asset value of the Common Shares than if the Fund were not leveraged, which may result in a greater decline in the market price of the Common Shares. There can be no assurance that a leveraging strategy will be implemented or that it will be successful during any period during which it is employed.

In addition to the risks described above, the Fund is also subject to: Income Securities Risk, Foreign Currency Risk, Risks Associated with the Fund's Covered Call Option Strategy, Risks of Real Property Asset Companies, Private Securities Risk, Investment Funds Risk, Private Investment Funds Risk, Affiliated Investment Funds Risk, Synthetic Investments Risk, Inflation/Deflation Risk, Anti-Takeover Provisions, Market Discount Risk, and Current Developments Risks. Please see www.guggenheimfunds.com/gof for a more detailed discussion about Fund risks and considerations.

(a) All or a portion of this security has been physically segregated in connection with swap agreements, line of credit, options and reverse repurchase agreements. As of November 30, 2010, the total amount segregated was \$124,107,631.

(b) Securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At November 30, 2010,

these securities amounted to \$129,254,786 which represents 72.8% of net assets applicable to common shares.

(c) Perpetual maturity.

(d) Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

(e) Floating or Variable Rate Coupon. Rate shown is in effect at November 30, 2010.

(f) Risk-Linked Security – A risk-linked security is issued by insurance companies and insurance related special purpose vehicles that apply securitization techniques to catastrophic property and casualty damages. The security is typically a debt obligation for which the return of principal and the payment of interest are contingent on the non-occurrence of a pre-defined “trigger event.” Depending on the specific terms and structure of the security, this trigger could be the result of a hurricane, earthquake or some other catastrophic event.

(g) All or a portion of this security was acquired, and has been physically segregated in connection with the Fund’s participation in the Term Asset-Backed Securities Loan Facility program (the “TALF program”) operated by the Federal Reserve Bank of New York. As of November 30, 2010, the total amount physically segregated was \$14,727,566. See notes to financial statements.

(h) Security is a “step-up” bond where the coupon increases or steps up at a predetermined date.

(i) Non-income producing as security is in default.

(j) All or a portion of this security position represents cover for outstanding options written.

(k) Term loans held by the Fund have a variable interest rate feature which is periodically adjusted based on an underlying interest rate benchmark. In addition, term loans may include mandatory and/or optional prepayment terms. As a result, the actual maturity dates of the loans may be different than the amounts disclosed in the portfolio of investments. Term loans may be considered restricted in that the Fund may be contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the sale or disposition of loan.

(l) Non-income producing security.

(m) Represents 100 shares per contract.

Ratings shown are per Standard & Poor’s and Moody’s. Securities classified as NR are not rated.

--	---------	---------	---------	---------

* Commencement of operations.

- (a) Based on average shares outstanding during the period.
- (b) Before deduction of offering expenses charged to capital.
- (c) Total investment return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value (“NAV”) or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund’s Dividend Reinvestment Plan for market value returns. Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.
- (d) The ratios of total expenses to average net assets applicable to common shares do not reflect fees and expenses incurred indirectly by the Fund as a result of its investment in shares of other investment companies. If these fees were included in the expense ratios, the expense ratios would increase by 0.03% for the period ended November 30, 2010, 0.05% for the year ended May 31, 2010, 0.08% for the year ended May 31, 2009, and 0.04% for the period ended May 31, 2008.
- (e) Annualized.
- (f) Portfolio turnover is not annualized for periods of less than one year.
- (g) Calculated by subtracting the Fund’s total liabilities (not including the borrowings) from the Fund’s total assets and dividing by the total borrowings.

See notes to financial statements.

Semiannual Report | November 30, 2010 | 21

GOF | Claymore/Guggenheim Strategic Opportunities Fund |

Notes to Financial Statements | November 30, 2010 (unaudited)

Note 1 – Organization:

Claymore/Guggenheim Strategic Opportunities Fund (the “Fund”) was organized as a Delaware statutory trust on November 13, 2006. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (“1940 Act”).

The Fund’s primary investment objective is to maximize total return through a combination of current income and capital appreciation.

On September 24, 2010, Claymore Advisors, LLC changed its name to Guggenheim Funds Investment Advisors, LLC (the “Adviser”). Also, Claymore Securities, Inc. changed its name to Guggenheim Funds Distributors, Inc.

Note 2 – Accounting Policies:

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies consistently followed by the Fund.

(a) Valuation of Investments

The Fund values equity securities at the last reported sale price on the principal exchange or in the principal over-the-counter (“OTC”) market in which such securities are traded, as of the close of regular trading on the New York Stock Exchange (“NYSE”) on the day the securities are being valued or, if there are no sales, at the mean between the last available bid and asked prices on that day. Securities traded on the NASDAQ are valued at the NASDAQ Official Closing Price. Preferred stocks are valued at their sales price as of the close of the exchange on which they are traded. Preferred stocks for which the last sales price is not available are valued at the last available bid price. Debt securities (including asset-backed securities, collateralized mortgage obligations, and term loans) are valued at the last available bid price. If bids are not available, debt securities are estimated using valuation models that incorporate market data that may include assumptions relating to current yields, timing of cash flows, dealer quotes, prepayment risk, value of underlying collateral, general market conditions, liquidity and prices of other debt securities with comparable coupon rates, maturities/duration, and credit quality. Foreign securities are translated from the local currency into U.S. dollars using the current exchange rate. The Fund’s securities that are primarily traded in foreign markets may be traded in such markets on days that the NYSE is closed. As a result, the net asset value of the Fund may be significantly affected on days when holders of common shares have no ability to trade common shares on the NYSE. Investment companies are valued at the last available closing price. The Fund values exchange-traded options and other derivative contracts at the mean of the best bid and asked prices at the close on those exchanges on which they are traded. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

For those securities where market quotes or independent pricing services valuations are not available, the valuations are determined in accordance with procedures established in good faith by the Adviser and approved by the Board of Trustees. For fixed income securities, fair valuations may include input from Guggenheim Partners Asset Management, LLC (“GPAM”) utilizing a wide variety of market data including yields or prices of investments of

comparable quality, type of issue, coupon, maturity, rating, indications of value from security dealers, evaluations of anticipated cash flows or collateral, spread over treasuries, and other information and analysis. GPAM also uses third party service providers to model certain securities using cash flow models to represent a fair market value.

For those securities where quotations or prices are not available, the valuations are determined in accordance with procedures established in good faith by the Adviser and approved by the Board of Trustees. Valuations in accordance with these procedures are intended to reflect each security's (or asset's) "fair value." Such "fair value" is the amount that the Fund might reasonably expect to receive for the security (or asset) upon its current sale. Each such determination should be based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security's disposition, (iv) the price and extent of public trading in similar securities of the issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security). There are no securities fair valued at November 30, 2010.

The Fund has elected to recognize the TALF loan at fair value, as permitted by GAAP, to mitigate the volatility in net assets caused by measuring related assets and liabilities differently. The TALF loan is valued at prices furnished by an independent pricing service. Consequently the Fund recorded the loan liability on the Statement of Assets and Liabilities, at fair value. The fair value option requires that the TALF loan be marked-to-market giving consideration to changes in the market value of the pledged collateral.

The Fund adopted the Accounting Standards Update, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements which provides guidance on how investment assets and liabilities are to be valued and disclosed. Specifically, the amendment requires reporting entities to disclose i) the input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements, for Level 2 or Level 3 positions, ii) transfers between all levels (including Level 1 and Level 2) will be required to be disclosed on a gross basis (i.e. transfers out must be disclosed separately from transfers in) as well as the reason(s) for the transfer, and iii) purchases, sales, issuances and settlements must be shown on a gross basis in the Level 3 rollfor-ward rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2009; however, the requirement to provide the Level 3 activity for purchases, sales, issuances and settlements on a gross basis will be effective for interim and annual periods beginning after December 15, 2010. The Fund adopted the disclosures required by this amendment, which did not have a material impact on the financial statements.

The Fund values Level 1 securities using readily available market quotations in active markets. The Fund values Level 2 fixed income securities using independent pricing providers who employ matrix pricing models utilizing market prices, broker quotes and prices of securities with comparable maturities and qualities. The Fund values Level 2 equity securities using various observable market inputs in accordance with procedures established in good faith by the Adviser and approved by the Board of Trustees as described above.

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Notes to Financial Statements (unaudited) continued

The following table represents the Fund's investments carried on the Statement of Assets and Liabilities by caption and by level within the fair value hierarchy as of November 30, 2010.

Description (value in \$000s)	Level 1	Level 2	Level 3	Total
Assets:				
Corporate Bonds	\$-	\$51,418	\$-	\$51,418
Asset Backed Securities	-	96,209	-	96,209

Options Written	206	117	-	323
TALF Loan	-	10,619	-	10,619
Unfunded Commitments	-	26	-	26
Total	\$206	\$11,816	\$-	\$12,022

There were no transfers between Level 1 and Level 2 during the period ended November 30, 2010. There were three transfers, in the amount of \$4,646,880, from Level 3 to Level 2 during the period ended November 30, 2010. The transfers from Level 3 to Level 2 were the result of the availability of broker quotes during the period.

The following table presents the activity of the Fund's investments measured at fair value using significant unobservable inputs (Level 3 valuations) for the period ended November 30, 2010.

Level 3 Holdings (value in \$000s)	Securities	Derivatives	Total
Beginning Balance at 5/31/10	\$4,632	\$-	\$4,632
Net Realized Gain/Loss	-	-	-
Change in Unrealized Gain/Loss	15	-	15
Purchases	-	-	-
Sales	-	-	-
Transfers In	-	-	-
Transfers Out	(4,647)	-	(4,647)
Ending Balance at 11/30/10	\$-	\$-	\$-

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Paydown gains and losses on mortgage and asset-backed securities are treated as an adjustment to interest income. For the period ended November 30, 2010, the Fund recognized an increase of interest income and a decrease of net realized gain of \$1,142,622. This reclassification is reflected on the Statement of Operations and had no effect on the net asset value of the Fund. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts on debt securities purchased are accreted to interest income over the lives of the respective securities using effective interest method. Premiums on debt securities purchased are amortized to interest income up to the next call date of the respective securities using the effective interest method.

(c) Restricted
Cash

A portion of cash on hand is pledged with a broker for current or potential holdings, which includes options, swaps and securities purchased on a when issued or delayed delivery basis.

(d) Swaps

A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Fund may enter into swap agreements to manage its exposure to interest rates and/or credit risk or to generate income. The swaps are valued daily at current market value and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized on the termination date of the swap and is equal to the difference between the Fund's basis in the swap and the proceeds of the closing transaction, including any fees. During the period that the swap agreement is open, the Fund may be subject to risk from the potential inability of the counterparty to meet the terms of the agreement. The swaps involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities. Upon termination of a swap agreement, a payable to or receivable from swap counterparty is established on the Statement of Assets and Liabilities to reflect the net gain/loss, including interest income/expense, on terminated swap positions. The line item is removed upon settlement according to the terms of the swap agreement.

Realized gain (loss) upon termination of swap contracts is recorded on the Statement of Operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation (depreciation) of swap contracts. Net periodic payments received by the Fund are included as part of realized gain (loss) and, in the case of accruals for periodic payments, are included as part of unrealized appreciation (depreciation) on the Statement of Operations.

(e) Covered Call Options

The Fund will pursue its primary objective by employing an option strategy of writing (selling) covered call options on equity securities and indices. The Fund seeks to generate current gains from option premiums as a means to enhance distributions payable to the Fund's common shareholders.

When an option is written, the premium received is recorded as an asset with an equal liability and is subsequently marked to market to reflect the current market value of the option written. These liabilities are reflected as options written in the Statement of Assets and Liabilities. Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions, as a realized loss. If an option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss.

(f) Currency Translation

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the mean of the bid and asked price of respective exchange rates on the last day of the period. Purchases and sales of investments denominated in foreign currencies are translated at the exchange rate on the date of the transaction.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Foreign exchange realized gain or loss resulting from holding of a foreign currency, expiration of a currency exchange contract, difference in exchange rates between the trade date and settlement date of an investment purchased or sold, and the difference between

Semiannual Report | November 30, 2010 | 23

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Notes to Financial Statements (unaudited) continued

dividends or interest actually received compared to the amount shown in a Fund’s accounting records on the date of receipt is shown as net realized gains or losses on foreign currency transactions on the Fund’s Statement of Operations.

Foreign exchange unrealized gain or loss on assets and liabilities, other than investments, is shown as unrealized appreciation (depreciation) on foreign currency translation on the Fund’s Statement of Operations.

(g) Distributions to Shareholders

The Fund declares and pays monthly dividends to common shareholders. These dividends consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains. To the extent distributions exceed net investment income, the excess will be deemed a return of capital. Any net realized long-term capital gains are distributed annually to common shareholders.

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

Note 3 – Investment Advisory Agreement, Sub-Advisory Agreement and Other Agreements:

Pursuant to an Investment Advisory Agreement (the “Agreement”) between the Fund and Guggenheim Funds Investment Advisors, LLC (“the Adviser”), the Adviser furnishes offices, necessary facilities and equipment, provides administrative services, oversees the activities of GPAM, provides personnel including certain officers required for the Fund’s administrative management and compensates the officers or trustees of the Fund who are affiliates of the Adviser. As compensation for these services, the Fund pays the Adviser a fee, payable monthly, in an amount equal to 1.00% of the Fund’s average daily managed assets (net assets applicable to common shareholders plus any assets attributable to financial leverage).

Pursuant to a Sub-Advisory Agreement (the “Sub-Advisory Agreement”) among the Fund, the Adviser and GPAM, GPAM under the supervision of the Fund’s Board of Trustees and the Adviser, provides a continuous investment program for the Fund’s portfolio; provides investment research, makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including certain officers required for its administrative management and pays the compensation of all officers and trustees of the Fund who are GPAM’s affiliates. As compensation for its services, the Adviser pays GPAM a fee, payable monthly, in an annual amount equal to 0.50% of the Fund’s average daily managed assets.

Certain officers and trustees of the Fund may also be officers, directors and/or employees of the Adviser or GPAM. The Fund does not compensate its officers or trustees who are officers, directors and/or employees of the aforementioned firms.

Under a separate Fund Administration agreement, the Adviser provides fund administration services to the Fund. As compensation for services performed under the Administration Agreement, the Adviser receives a fund administration fee payable monthly at the annual rate set forth below as a percentage of the average daily managed assets of the Fund.

Managed Assets	Rate
First \$200,000,000	0.0275%
Next \$300,000,000	0.0200%
Next \$500,000,000	0.0150%

Over \$1,000,000,000

0.0100%

For the period ended November 30, 2010, the Fund recognized expenses of \$31,033 for these services.

The Bank of New York Mellon (“BNY”) acts as the Fund’s custodian, accounting agent, and transfer agent. As custodian, BNY is responsible for the custody of the Fund’s assets. As accounting agent, BNY is responsible for maintaining the books and records of the Fund’s securities and cash. As transfer agent, BNY is responsible for performing transfer agency services for the Fund.

Note 4 – Federal Income Taxes:

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. In addition, by distributing substantially all of its ordinary income and long-term capital gains, if any, during each calendar year, the Fund intends not to be subject to U.S. federal excise tax.

Information on the components of investments, excluding purchased and written options, and net assets as of November 30, 2010, is as follows:

Cost of Investments for Tax Purposes	Gross Tax Unrealized Appreciation	Gross Tax Unrealized Depreciation	Net Tax Unrealized Appreciation on Investments	Net Tax Unrealized Appreciation on Derivatives
\$221,872,969	\$20,154,728	(\$12,983,979)	\$7,170,749	\$1,449,288

Tax components of the following balances as of May 31, 2010, (the most recent fiscal year end for federal income tax purposes) are as follows:

Undistributed Ordinary Income (Accumulated Ordinary Loss)	Undistributed Long-Term Gains/ (Accumulated Capital Loss)
\$(281,496)	\$(4,711,104)

The differences between book basis and tax basis unrealized appreciation (depreciation) is attributable to the tax deferral of losses on wash sales.

For federal income tax purposes, as of May 31, 2010, (the most recent fiscal year end for federal income tax purposes) the Fund had a capital loss carryforward of \$4,711,104 available to offset possible future capital gains. The capital loss carryforward is set to expire on May 31, 2018.

For the year ended May 31, 2010, (the most recent fiscal year end for federal income tax purposes) the tax character of distributions paid to common shareholders as reflected in the Statement of Changes in Net Assets was as follows:

Distributions paid from Ordinary Income	2010 \$16,931,384
---	----------------------

For all open tax years and all major jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e. generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Note 5 – Investments in Securities:

During the period ended November 30, 2010, the cost of purchases and proceeds from sales of investments, excluding written options and short-term investments were \$59,670,040 and \$60,765,042, respectively.

24 | Semiannual Report | November 30, 2010

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Notes to Financial Statements (unaudited) continued

Note 6 – Derivatives:

(a) Covered Call Option

An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or “strike” price. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put).

There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Fund forgoes, during the option’s life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

The Fund entered into written option contracts during the period ended November 30, 2010.

Details of the transactions were as follows:

	Number of Contracts	Premiums Received
Options outstanding, beginning of year	10,539	\$ 818,148
Options written during the period	91,413	3,578,020
Options expired during the period	(39,345)	(811,321)
Options closed during the period	(40,276)	(2,462,093)
Options assigned during the period	(3,181)	(640,276)
Options outstanding, end of period	19,150	\$ 482,478

(b) Swaps

Swap agreements are contracts between parties in which one party agrees to make periodic payments to the other party (the “Counterparty”) based on the change in market value or level of a specified rate, index or asset. In return, the Counterparty agrees to make periodic payments to the first party based on the return of a different specified rate, index or asset. Swap agreements will usually be done on a net basis, the Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of the Fund’s obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Fund’s custodian bank. The Fund has entered into master netting arrangements, established within the Fund’s International Swap and Derivatives Association, Inc. master agreements, which allow the Fund to net unrealized appreciation and depreciation for positions in swaps for each individual counterparty.

Total return swap agreements are contracts in which one party agrees to make payments of the total return from the underlying asset during a specified period in return for receiving payments equal to a fixed or floating rate of interest or the total return from another designated underlying asset.

Interest rate swap agreements involve the Fund's agreement to exchange a stream of interest payments for another party's stream of cash flows.

Credit default swap transactions involve the Fund's agreement to exchange the credit risk of an issuer. A buyer of a credit default swap is said to buy protection by paying periodic fees in return for a contingent payment from the seller if the issuer has a credit event such as bankruptcy, a failure to pay outstanding obligations or deteriorating credit while the swap is outstanding. A seller of a credit default swap is said to sell protection and thus collects the periodic fees and profits if the credit of the issuer remains stable or improves while the swap is outstanding but the seller in a credit default swap contract would be required to pay an agreed-upon amount, which approximates the notional amount of the swap, to the buyer in the event of an adverse credit event of the issuer.

The Fund entered into swap agreements during the period ended November 30, 2010, to potentially enhance return. Details of the swap agreements outstanding as of November 30, 2010, are as follows:

Credit Default Swap Agreements

Counterparty	Reference Entity	Buy/Sell	Termination Date	Implied Credit Spread at November 30, 2010 (2)	Notional Amount	Receive Fixed Rate	Unrealized Appreciation (Depreciation)
Goldman Sachs(1)	Basket of distinct corporate entities	Sell	09/20/14	11.12%	\$ 3,000	1.180%	\$(935,976)

Interest Rate Swap Agreements

Counterparty	Floating Rate	Termination Date	Notional Amount (000)	Receive Fixed Rate	Unrealized Appreciation (Depreciation)
Goldman Sachs (3)	3 Month LIBOR	01/04/38	\$ 10,000	5.675%	\$ 910,180
Goldman Sachs (3)	3 Month LIBOR	01/04/38	10,000	5.860	282,182
Goldman Sachs (3)	3 Month LIBOR	01/12/15	10,000	3.155	253,771

Total Return Swap
Agreements

Counterparty	Reference Entity	Floating Rate	Termination Date	Notional Amount (000)	Unrealized Appreciation (Depreciation)
Barclays Capital (4)	S&P 500	1 Month LIBOR + 0.15%	12/27/10	\$ 1,000	\$ 2,353
Barclays Capital (4)	S&P 500	1 Month LIBOR + 0.15%	12/22/10	8,257	(118,041) \$ (115,688)
Total Unrealized Appreciation for Swap Agreements					\$1,296,063

- (1) The Fund receives a fixed rate based upon the notional amount of \$3 million and if a defined credit event occurs, pays cumulative losses in excess of a stated percentage on an underlying basket of distinct corporate entities with an aggregate notional value of \$3 billion. The maximum loss exposure is \$3 million.
- (2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as "Defaulted" indicates a credit event has occurred for the referenced entity or obligation.
- (3) The Fund pays the floating rate and receives the fixed rate.
- (4) The Fund pays a floating rate and receives the total return of the Standard's & Poor's 500 Index.

(c) Summary of Derivatives Information

The Fund is required by GAAP to disclose: a) how and why a fund uses derivative instruments, b) how derivatives instruments and related hedge fund items are accounted for, and c) how derivative instruments and related hedge items affect a fund's financial position, results of operations and cash flows.

The following table presents the types of derivatives in the Fund by location as presented on the Statement of Assets Liabilities as of November 30, 2010.

Statement of Asset and Liability Presentation of Fair Values of Derivative
Instruments:

(value in \$000s)

Derivatives not accounted for as hedging instruments	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Equity risk	Investments in securities (Options Purchased), Unrealized appreciation on swaps	\$ 26	Options Written, Unrealized depreciation on swaps	\$ 441
Interest rate risk	Unrealized appreciation on swaps	2,348	Unrealized depreciation on swaps	—
Credit risk	Unrealized appreciation on swaps	—	Unrealized depreciation on swaps	936
Total		\$2,374		\$1,377

The following table presents the effect of Derivatives Instruments on the Statement of Operations for the period ended November 30, 2010.

Effect of Derivative Instruments on the Statement of Operations:

(value in \$000s)

Amount of Realized Gain (Loss) on Derivatives

Derivatives not accounted for as hedging instruments	Options	Swaps	Total
Equity risk	\$293	\$ 915	\$1,208
Interest rate risk	—	1,364	1,364
Credit risk	—	—	—
Total	\$293	\$2,279	\$2,572

Change in Unrealized Appreciation (Depreciation) on Derivatives

Derivatives not accounted for as hedging instruments	Options	Swaps	Total
Equity risk	\$(60)	\$(203)	\$(263)
Interest rate risk	—	(46)	(46)
Credit risk	—	293	293
Total	\$(60)	\$ 44	\$(16)

Derivative notional amounts and values as of November 30, 2010, are indicative of the volume of the Fund's derivatives over the reporting period.

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Notes to Financial Statements (unaudited) continued

Note 7 – Leverage:

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements as part of its financial leverage strategy. Under a reverse repurchase agreement, the Fund temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker-dealer, in return for cash. At the same time, the Fund agrees to repurchase the instrument at an agreed upon time (normally within seven days) and price, which reflects an interest payment. Such agreements are considered to be borrowings under the 1940 Act. The Fund may enter into such agreements when it is able to invest the cash acquired at a rate higher than the cost of the agreement, which would increase earned income. When the Fund enters into a reverse repurchase agreement, any fluctuations in the market value of either the instruments transferred to another party or the instruments in which the proceeds may be invested would affect the market value of the Fund's assets. As a result, such transactions may increase fluctuations in the market value of the Fund's assets. For the period ended November 30, 2010, the average daily balance for which reverse repurchase agreements were outstanding amounted to \$32,048,501. The weighted average interest rate was 2.54%. As of November 30, 2010, the total amount segregated in connection with reverse repurchase agreements was \$60,643,719. At the period end, there was \$37,377,505 in reverse repurchase agreements outstanding. As of November 30, 2010, the range of maturity dates on the outstanding reverse repurchase agreements were from December 3, 2010, to February 16, 2011.

Borrowings

On November 18, 2008, the Fund entered into a \$30,000,000 credit facility agreement with BNP Paribas. Interest on the amount borrowed is based on the 3-month LIBOR plus 0.85%. An unused commitment fee of 0.75% is charged on the difference between the \$30,000,000 credit facility and the amount borrowed. At November 30, 2010, there was \$22,399,119 outstanding in connection with the Fund's credit facility. The average daily amount of borrowings on the credit facility during the period ended November 30, 2010, was \$22,386,187 with a related average interest rate of 1.23%. The maximum amount outstanding during the period ended November 30, 2010, was \$26,727,551.

The credit facility agreement governing the loan facility includes usual and customary covenants. These covenants impose on the Fund asset coverage requirements, collateral requirements, investment strategy requirements, and certain financial obligations.

These covenants place limits or restrictions on the Fund's ability to (i) enter into additional indebtedness with a party other than the lender, (ii) change its fundamental investment policy, or (iii) pledge to any other party, other than to the lender, securities owned or held by the Fund over which BNY has a lien. In addition, the Fund is required to deliver financial information to the lender within established deadlines, maintain an asset coverage ratio (as defined in Section 18(g) of the 1940 Act) greater than 300%, comply with the rules of the stock exchange on which its share are listed, and maintain its classification as a "closed-end fund company" as defined in the 1940 Act.

TALF Program

The Fund may invest a portion of its total assets through participation in the Term Asset-Backed Securities Loan Facility program (the "TALF program"), a program developed by the Board of Governors of the Federal Reserve System and the U.S. Department of the Treasury and operated by the Federal Reserve Bank of New York ("FRBNY"). Under the TALF program, the FRBNY may provide loans to the Fund to purchase certain investment-grade, asset-backed securities which must be backed by auto loans, student loans, credit card loans, small business loans or certain commercial mortgage-backed securities ("Eligible Securities").

Per the terms of the TALF Program, the FRBNY lends to each borrower an amount equal to the lesser of par or market value of the Eligible Securities pledged as collateral minus a percentage of the par or market value of the Eligible Securities. The Fund pledges Eligible Securities as collateral for a TALF Program loan, which consist of securities that the Fund currently owns or securities that the Fund purchases with the loan proceeds. Loans acquired through the TALF Program may be prepaid at the option of the Fund without any prepayment penalty, and the Fund may satisfy its loan obligation in full at any time by surrendering the Eligible Securities pledged by the Fund to the FRBNY. The TALF program loans are non-recourse. If the Fund does not repay the loan, or if the Eligible Securities pledged by the Fund loses some or all of its value, under the terms of the TALF Program the FRBNY may enforce its rights only against the Eligible Securities pledged as collateral by the Fund and not against any other assets of the Fund.

The Fund is charged interest based on the terms of each loan and the type of Eligible Securities pledged as collateral by the Fund. During the period ended November 30, 2010, the Fund paid \$179,743 of interest expense, which is included in Interest expense on the Statement of Operations.

As of November 30, 2010, borrowings under the TALF Program represent 4.2% of the Fund's total assets.

Details of the TALF loan outstanding as of November 30, 2010, are as follows:

Loan Principal Amount	\$10,618,934	Loan Type Commercial Mortgage Obligation	Commercial Mortgage Pass Through Certificates	Collateral Description
Loan Interest Rate	3.796%	Loan Maturity Date	9/25/14	Loan Value \$10,618,934
				Collateral Value \$14,727,566

Note 8 – Loan Commitments

Pursuant to the terms of certain Term Loan agreements, the Fund held unfunded loan commitments of as of November 30, 2010. The Fund is obligated to fund these loan commitments at the borrower's discretion. The Fund intends to reserve against such contingent obligations by designating cash, liquid securities, and liquid term loans as a reserve. The unrealized appreciation on these commitments of \$26,250 as of November 30, 2010 is reported as "Unrealized appreciation on unfunded commitments" on the Statement of Assets and Liabilities. At November 30, 2010, the Fund had the following unfunded loan commitments which could be extended at the option of the borrower:

Borrower	Principal Amount	Unrealized Appreciation
Bumble Bee	\$1,000,000	\$ –
Catalent Pharma Solutions, Inc.	500,000	16,250
Darling	500,000 –	

Polymer	400,000	–	
ServiceMaster	1,000,000		10,000
Syniverse	1,000,000	–	
	\$4,400,000		\$26,250

Semiannual Report | November 30, 2010 | 27

GOF | Claymore/Guggenheim Strategic Opportunities Fund | Notes to Financial Statements (unaudited) continued

Note 9 – Capital:

Common Shares

The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and 9,268,340 issued and outstanding.

Transactions in common shares were as follows:

	Period Ended November 30, 2010	Year Ended May 31, 2010
Beginning Shares	9,215,636	9,105,240
Shares issued through dividend reinvestment	52,704	110,396
Ending Shares	9,268,340	9,215,636

Note 10 – Indemnifications:

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would require future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 11– Subsequent Event:

The Fund evaluated subsequent events through the date the financial statements were available for issue and determined there were no additional material events that would require disclosure in the Fund's financial statements, except as noted below.

On December 1, 2010, the Fund declared a monthly dividend to common shareholders of \$0.154 per common share. The dividend was payable on December 31, 2010, to shareholders of record on December 15, 2010.

On December 22, 2010, the Fund declared a supplemental dividend to common shareholders of \$0.027 per common share. The dividend was payable on December 31, 2010, to shareholders of record on December 29, 2010.

On January 1, 2011, the Fund declared a monthly dividend to common shareholders of \$0.154 per common share. The dividend was payable on January 31, 2011, to shareholders of record on January 14, 2011.

** Officers serve at the pleasure of the Board of Trustees and until his or her successor is appointed and qualified or until his or her earlier resignation or removal.

GOF | Claymore/Guggenheim Strategic Opportunities Fund |

Dividend Reinvestment Plan |

Unless the registered owner of common shares elects to receive cash by contacting the Plan Administrator, all dividends declared on common shares of the Fund will be automatically reinvested by The Bank of New York Mellon (the “Plan Administrator”), Administrator for shareholders in the Fund’s Dividend Reinvestment Plan (the “Plan”), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder’s common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a “Dividend”) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants’ accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (“Newly Issued Common Shares”) or (ii) by purchase of outstanding common shares on the open market (“Open-Market Purchases”) on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant’s account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders’ accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance

with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, BNY Mellon Shareowner Services, P.O. Box 358015, Pittsburgh, PA 15252-8015, Phone Number: (866) 488-3559.

Privacy Principles of the Fund

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how the Fund protects that information and why, in certain cases, the Fund may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about its shareholders to employees of the Fund’s investment advisor and its affiliates with a legitimate business need for the information. The Fund maintains physical,

electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

About the Fund Manager |

Guggenheim Partners Asset Management, LLC

Guggenheim Partners Asset Management, LLC (“GPAM”) is an indirect subsidiary of Guggenheim Partners, LLC, a diversified financial services firm. The firm provides capital markets services, portfolio and risk management expertise, wealth management, and investment advisory services. Clients of Guggenheim Partners, LLC subsidiaries are an elite mix of individuals, family offices, endowments, foundations, insurance companies and other institutions.

Investment Philosophy

GPAM’s investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns over time as compared to such benchmark indexes.

Investment Process

GPAM’s investment process is a collaborative effort between various groups including the Portfolio Construction Group, which utilize proprietary portfolio construction and risk modeling tools to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions, including the structuring of certain securities directly with the issuers or with investment banks and dealers involved in the origination of such securities.
