PROSPECTUS SUPPLEMENT SUMMARY

This summary description highlights selected information contained elsewhere in this prospectus supplement or incorporated herein by reference. This summary may not contain all of the information that you should consider before buying securities in this offering. You should carefully read this entire prospectus supplement and the base prospectus, including each of the documents incorporated herein or therein by reference, before making an investment decision. As used herein, “we,” “us,” and “our” refer to Acorn Energy and its subsidiaries.

Our Company

Acorn Energy is a holding company focused on improving the efficiency and environmental impact of the energy infrastructure, fossil fuel and nuclear industries. Our operating companies are focused on three problems in the energy sector: improving the efficiency of the energy grid; reducing the risk for owners of large energy assets; and reducing the environmental impact of the energy sector. Our companies leverage advanced technologies to transform the existing energy infrastructure. We aim to acquire primarily controlling positions in companies led by promising entrepreneurs and we add value by supporting those companies with financing, branding, positioning, and strategy and business development.

Through our majority-owned operating subsidiaries we provide the following services:

- **SCR Catalyst and Management Services.** We provide selective catalytic reduction, or SCR, management and catalyst regeneration services for coal-fired power plants through our CoalLogix subsidiary. These services include SCR catalyst management, cleaning and regeneration as well as consulting services to help power plant operators to optimize efficiency and reduce overall nitrogen oxide compliance costs.
- **Naval and RT Solutions.** We provide sonar and acoustic related solutions for energy, defense and commercial markets with a focus on underwater site security for strategic energy installations and other real-time and embedded hardware and software development and production through our DSIT subsidiary.
- **Smart Grid Distribution Automation** products and services are provided by our GridSense subsidiary which provides remote monitoring and control systems to electric utilities and industrial facilities worldwide.
- **Energy and Security Sensor Systems** products and services are provided by our U.S. Sensor Systems, Inc. subsidiary (“USSSI”) which develops and produces “state of the art” fiber optic sensing systems for the energy, commercial security and defense markets worldwide.

Since August 2008 we also provided energy infrastructure software services through our Coreworx Inc. subsidiary. On November 9, 2010, the Company entered into a letter of intent with Coreworx for the Company to sell all of its common stock in Coreworx to a management buyout group consisting of Coreworx’ management and certain employees and other investors. For more information, see Note 15 to the unaudited consolidated financial statement included in our quarterly report on Form 10-Q for the quarterly period ended September 30, 2010. The transaction closed on December 17, 2010.

RISK FACTORS

An investment in our common stock involves a high degree of risk. Before making an investment decision you should carefully consider the risks described below and the risks and uncertainties described in our other periodic filings, including Part II, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, which is incorporated by reference herein, and the other information set forth or incorporated by reference in this prospectus supplement and the accompanying base prospectus. The risks and uncertainties described or incorporated by reference in this prospectus supplement and the accompanying prospectus are not the only ones we face. Additional risks and uncertainties that we are unaware of or that we believe are not material at this time could also materially adversely affect our business, financial condition or results of operations. You should also refer to our financial statements and the notes to those statements, which are incorporated by reference in this prospectus supplement.

Our use of the offering proceeds may not yield a favorable return on your investment.

We currently intend to use the net proceeds received from the sale of the securities for working capital and other general corporate purposes. Our management has broad discretion over how these proceeds are used and could spend the proceeds in ways with which you may not agree. Pending the use of the proceeds in this offering, we will invest them. However, the proceeds may not be invested in a manner that yields any significant return.

As a new investor, you will incur substantial dilution from the price paid in this offering.

The offering price is substantially higher than the net tangible book value per share of our outstanding common stock. As a result, based on our capitalization as of September 30, 2010, investors purchasing common stock in this offering will incur immediate dilution of \$1.26 per share of common stock purchased, based on the offering price of \$3.50 per share. Such investors may experience additional dilution upon the exercise of outstanding stock options and warrants having exercise prices less than the per share offering price to the public in this offering. See "Dilution" on page S-5.

Our share price may decline due to the large number of shares of our common stock eligible for future sale in the public market including shares underlying warrants and options.

A substantial number of shares of our Common Stock are or could become eligible for sale in the public market as described below. Sales of a substantial number of shares of our common stock in the public market, or the possibility of these sales, may adversely affect our stock price.

As of the date hereof, 16,116,005 shares of our common stock are issued and outstanding. We have 233,306 warrants outstanding and exercisable, all of which have an exercise price of \$4.50, and 1,504,121 options outstanding and exercisable with a weighted average exercise price of \$3.60 per share, which if exercised would result in the issuance of an additional 1,737,427 shares of our common stock. An additional 393,544 options are outstanding, but have not yet vested.

Substantially all our outstanding shares and shares issuable under our outstanding options and warrants are or would be freely tradable.

In addition to the 1,150,000 shares being offered in this offering, we will be issuing warrants to purchase 80,500 shares to HFP Capital Markets LLC as part of the remuneration for its services as placement agent in connection with this offering. Such warrants may be exercised for cash or on a "cashless basis" at a price of \$3.68 per share and will be freely tradable upon issuance.

USE OF PROCEEDS

We estimate that the net proceeds of this offering, after deducting placement agent fees and our estimated offering expenses, will be approximately \$3.7 million, assuming all the shares offered hereby are sold.

We expect to use the net proceeds from this offering for general corporate purposes.

DILUTION

If you invest in our shares, your interest in the common stock contained therein will be diluted to the extent of the difference between the public offering price per share of our shares and the net tangible book value per share of our common stock after this offering. Our net tangible book value on September 30, 2010 was approximately \$34,932,000, or approximately \$2.17 per share of common stock. Net tangible book value per share is determined by dividing our net tangible book value, which consists of tangible assets less total liabilities, by the number of shares of common stock outstanding on that date. Dilution in net tangible book value per share represents the difference between the amount per share paid by purchasers of shares in this offering and the net tangible book value per share of common stock immediately after the completion of this offering. Without taking into account any other changes in our net tangible book value after September 30, 2010, other than to give effect to our receipt of the estimated proceeds from the sale of the maximum number of shares issuable in this offering (1,150,000 shares) at a public offering price of \$3.50 per share, less the fees due to the placement agent and our estimated offering expenses, our pro forma net tangible book value as of September 30, 2010, after giving effect to the items above, would have been approximately \$38,625,000, or \$2.24 per share. This represents an immediate increase in the net tangible book value of \$0.07 per share to existing stockholders and an immediate dilution of \$1.70 per share to anyone who purchases shares in the offering. The following table illustrates this per share dilution:

Public offering price per share:	\$	3.50
Net tangible book value per share as of September 30, 2010	\$	2.17
Increase in net tangible book value per share attributable to this offering:	\$	0.07
Pro forma net tangible book value per share as of September 30, 2010 after giving effect to this offering:	\$	2.24
Dilution per share to new investors in this offering:	\$	1.26

The foregoing table is based 16,116,005 shares of our common stock outstanding as of September 30, 2010.

In addition, the calculations in the foregoing table do not take into account any of the following:

- 1,897,665 shares subject to outstanding options as of September 30, 2010, having a weighted average exercise price of \$3.84, none of which have been exercised through the date hereof;
- 233,306 shares subject to outstanding warrants as of September 30, 2010, having a weighted average exercise price of \$4.50, none of which have been exercised through the date hereof;

To the extent that any of our outstanding options or warrants are exercised, we grant additional options under our stock option plans or issue additional warrants, or we issue additional shares of common stock in the future, there may be further dilution to new investors.

PLAN OF DISTRIBUTION

HFP Capital Markets LLC, referred to as the placement agent, has entered into a placement agent agreement, dated as of December 17, 2010, with us in which it has agreed to act as placement agent in connection with the offering. Subject to the terms and conditions contained in the placement agency agreement, the placement agent is using its commercially reasonable efforts to introduce us to potential investors who will purchase the securities. The placement agent is not purchasing or selling any shares offered by this prospectus supplement nor is it required to arrange the purchase or sale of any specific number of shares, but has agreed to use its commercially reasonable efforts to arrange for the sale of all of the shares offered hereby. The placement agent has solicited indications of interest from investors for the full amount of the offering. We will enter into subscription agreements directly with investors in connection with this offering and we may not sell all the shares offered pursuant to this prospectus supplement.

Any compensation paid by us to the placement agent in connection with the offering of the securities offered in this prospectus supplement, and any discounts, concessions or commissions allowed by the placement agent to participating dealers, are set forth below. We have agreed to pay the placement agent a fee equal to 7.0% of the proceeds of this offering. The following table shows the per share and total fees we will pay to the placement agent in connection with the sale of the shares offered pursuant to this prospectus supplement assuming the sale of all of the shares offered hereby and that the placement agent receives a fee for all of the shares sold.

Per Share	\$ 0.245
Total	\$ 281,750

Because there is no minimum offering amount required as a condition to closing in this offering, the actual total offering commissions, if any, are not presently determinable and may be substantially less than the maximum amount set forth above.

In addition, we have agreed to issue a warrant to HFP Capital Markets LLC exercisable to acquire 80,500 shares of our common stock representing 7.0% of the of the shares offered hereby. The warrant is exercisable for cash or on a cashless basis for a period of five years at a price of \$3.68, the closing price for our common stock on December 17, 2010.

We have also agreed to reimburse the placement agent, on a fully accountable basis, for legal and other expenses that it incurs in connection with the offering up to \$8,000.

Unless other arrangements are made with a particular investor, all investor funds will be delivered directly to us. We have not accepted any investor funds prior to the date of this prospectus supplement.

Our obligation to issue and sell shares to the investors is subject to the conditions set forth in the placement agency agreement, which may be waived by us at our discretion. An investor's obligation to purchase shares is subject to the conditions set forth in the subscription agreement as well, which may also be waived.

S-6

We currently anticipate that the sale of the shares of common stock offered hereby will be completed on or about December 21, 2010. At the closing, The Depository Trust Company will credit the shares of common stock to the respective accounts of the investors.

We have agreed to indemnify the placement agent and certain other persons against certain liabilities under the Securities Act.

This is a brief summary of the material provisions of the placement agency agreement and does not purport to be a complete statement of its terms and conditions. The placement agency agreement and the form of subscription agreement will be exhibits to our Form 8-K to be filed with the SEC on or about December 20, 2010, and will be incorporated by reference into the registration statement of which this prospectus supplement forms a part from and after that date. See "Where You Can Find More Information" on page S-7.

The placement agent has informed us that it will not engage in over-allotment, stabilizing transactions or syndicate covering transactions in connection with this offering.
