Income taxes	\$ -	\$ 1,002

Noncash Activities

Loans transferred to Other Real Estate	\$ 207	\$ 413
--	--------	--------

The accompanying notes are an integral part of these financial statements.

FRANKLIN FINANCIAL SERVICES CORPORATION and SUBSIDIARIES
UNAUDITED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Franklin Financial Services Corporation (the Corporation), and its wholly-owned subsidiaries, Farmers and Merchants Trust Company of Chambersburg (the Bank), Franklin Financial Properties Corp., and Franklin Future Fund Inc. Farmers and Merchants Trust Company of Chambersburg is a commercial bank that has one wholly-owned subsidiary, Franklin Realty Services Corporation. Franklin Realty Services Corporation is an inactive real-estate brokerage company. Franklin Financial Properties Corp. holds real estate assets that are leased by the Bank. Franklin Future Fund Inc. is a non-bank investment company. The activities of non-bank entities are not significant to the consolidated totals. All significant intercompany transactions and account balances have been eliminated.

In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations, and cash flows as of March 31, 2011, and for all other periods presented have been made.

Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted. It is suggested that these consolidated financial statements be read in conjunction with the audited consolidated financial statements and notes thereto included in the Corporation's 2010 Annual Report on Form 10-K. The consolidated results of operations for the period ended March 31, 2011 are not necessarily indicative of the operating results for the full year. Management has evaluated subsequent events for potential recognition and/or disclosure through the date these consolidated financial statements were issued.

The consolidated balance sheet at December 31, 2010 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by GAAP for complete consolidated financial statements.

For purposes of reporting cash flows, cash and cash equivalents include Cash and due from banks, Interest-bearing deposits in other banks and Federal funds sold. Generally, Federal funds are purchased and sold for one-day periods.

Earnings per share is computed based on the weighted average number of shares outstanding during each period end. A reconciliation of the weighted average shares outstanding used to calculate basic earnings per share and diluted earnings per share follows:

	For the Three Months Ended March 31	
(In thousands, except per share data)	2011	2010
Weighted average shares outstanding (basic)	3,925	3,868
Impact of common stock equivalents	5	-
Weighted average shares outstanding (diluted)	3,931	3,868
Anti-dilutive options excluded from the calculation	70	102
Net income	\$ 1,849	\$ 1,974
Basic earnings per share	\$ 0.47	\$ 0.51
Diluted earnings per share	\$ 0.47	\$ 0.51

Note 2 – Recent Accounting Pronouncements

Receivables – Troubled Debt Restructurings by Creditors. The FASB has issued this Update to clarify the accounting principles applied to loan modifications, as defined by FASB ASC Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors. The update clarifies guidance on a creditor’s evaluation of whether or not a concession has been granted, with an emphasis on evaluating all aspects of the modification rather than a focus on specific criteria, such as the effective interest rate test, to determine a concession. The Update goes on to provide guidance on specific types of modifications such as changes in the interest rate of the borrowing, and insignificant delays in payments, as well as guidance on the creditor’s evaluation of whether or not a debtor is experiencing financial difficulties. For public entities, the amendments in the Update are effective for the first interim or annual periods beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. The entity should also disclose information required by ASU 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, which had previously been deferred by ASU 2011-01, Deferral of the Effective Date of Disclosures about Troubled Debit Restructurings in Update No. 2010-20, for interim and annual periods beginning on or after June 15, 2011. Early adoption is permitted. The Corporation is in the process of analyzing the loan portfolio to properly identify loans that may be determined to be Troubled Debt Restructuring loans. The results of this analysis could increase future charge-off and nonaccrual balances.

Note 3 – Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on available-for-sale securities and derivatives and the change in plan assets and benefit obligations on the Bank’s pension plan, net of tax, that are recognized as separate components of shareholders’ equity.

The components of other comprehensive income and related tax effects are as follows:

(Amounts in thousands)	For the Three Months Ended March 31	
	2011	2010
Net Income	\$ 1,849	\$ 1,974
Securities:		
Unrealized gains arising during the period	737	1,435
Reclassification adjustment for (gains) losses included in net income	(11)	6
Net unrealized gains	726	1,441
Tax effect	(247)	(490)
Net of tax amount	479	951
Derivatives:		
Unrealized gains (losses) arising during the period	66	(338)
Reclassification adjustment for losses included in net income	175	181
Net unrealized gains (losses)	241	(157)
Tax effect	(82)	53
Net of tax amount	158	(104)
Pension:		
Change in plan assets and benefit obligations	-	(191)
Reclassification adjustment for losses included in net income	-	-
Net unrealized losses	-	(191)
Tax effect	-	65
Net of tax amount	-	(126)
Total other comprehensive income	637	721
Total Comprehensive Income	\$ 2,486	\$ 2,695

The components of accumulated other comprehensive loss included in shareholders' equity are as follows:

(Amounts in thousands)	March 31	December 31
	2011	2010
Net unrealized losses on securities	\$(300)	\$(1,026)
Tax effect	102	349
Net of tax amount	(198)	(677)
Net unrealized losses on derivatives	(1,511)	(1,752)
Tax effect	513	596
Net of tax amount	(998)	(1,156)
Accumulated pension adjustment	(5,771)	(5,771)
Tax effect	1,962	1,962
Net of tax amount	(3,809)	(3,809)
Total accumulated other comprehensive loss	\$(5,005)	\$(5,642)

Note 4 – Guarantees

The Corporation does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Bank generally holds collateral and/or personal guarantees supporting these commitments. The Bank had \$28.6 million and \$20.5 million of standby letters of credit as of March 31, 2011 and December 31, 2010, respectively. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The amount of the liability as of March 31, 2011 and December 31, 2010 for guarantees under standby letters of credit issued was not material.

Note 5 - Investments

The amortized cost and estimated fair value of investment securities available for sale as of March 31, 2011 and December 31, 2010 are:

(Amounts in thousands)

March 31, 2011	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Equity securities	\$3,258	\$58	\$(454)	\$2,862
Obligations of U.S. Government agencies	17,562	61	(46)	17,577
Obligations of state and political subdivisions	38,908	1,203	(99)	40,012
Corporate debt securities	2,615	69	(25)	2,659
Preferred securities	5,881	-	(1,363)	4,518
Mortgage-backed securities				
Agency	51,305	863	(148)	52,020
Non-Agency	4,167	20	(419)	3,768
Asset-backed securities	71	-	(20)	51
	\$123,767	\$2,274	\$(2,574)	\$123,467

December 31, 2010	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Equity securities	\$4,126	\$50	\$(538)	\$3,638
Obligations of U.S. Government agencies	14,780	61	(56)	14,785
Obligations of state and political subdivisions	39,477	894	(419)	39,952
Corporate debt securities	2,646	64	(44)	2,666
Preferred securities	5,876	-	(1,680)	4,196
Mortgage-backed securities				
Agency	47,239	1,104	(46)	48,297
Non-Agency	4,424	20	(415)	4,029
Asset-backed securities	74	-	(21)	53
	\$118,642	\$2,193	\$(3,219)	\$117,616

The book value of securities pledged as collateral to secure various funding sources was \$115.5 million at March 31, 2011 and \$108.7 million at December 31, 2010.

The amortized cost and estimated fair value of debt securities as of March 31, 2011, by contractual maturity are shown below. Actual maturities may differ from contractual maturities because of prepayment or call options embedded in the securities.

(Amounts in thousands)	Amortized cost	Estimated fair value
Due in one year or less	\$ 5,378	\$ 5,411
Due after one year through five years	14,235	14,647
Due after five years through ten years	17,491	17,997
Due after ten years	27,933	26,762
	65,037	64,817
Mortgage-backed securities	55,472	55,788
	\$ 120,509	\$ 120,605

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of March 31, 2011 and December 31, 2010:

(Amounts in thousands)	Less than 12 months			March 31, 2011 12 months or more			Total		
	Fair Value	Unrealized Losses	Number	Fair Value	Unrealized Losses	Number	Fair Value	Unrealized Losses	Number

For more information concerning investments, refer to the Investment Securities discussion in the Financial Condition section of management's discussion and analysis.

Note 6 – Loans

A summary of loans outstanding, by primary collateral, at the end of the reporting period is as follows:

(Amounts in thousands)	March 31, 2011	December 31, 2010	Change	
			Amount	%
Residential Real Estate 1-4 Family				
First liens	\$ 144,174	\$ 144,128	\$46	-
Junior liens and lines of credit	54,323	56,694	(2,371)	(4.2)
Total	198,497	200,822	(2,325)	(1.2)
Residential real estate - construction	81,184	79,557	1,627	2.0
Commercial, industrial and agricultural real estate	303,153	304,195	(1,042)	(0.3)
Commercial, industrial and agricultural	164,712	146,672	18,040	12.3
Consumer	15,972	17,396	(1,424)	(8.2)
	763,518	748,642	14,876	2.0
Less: Allowance for loan losses	(9,198)	(8,801)	(397)	4.5
Net Loans	\$ 754,320	\$ 739,841	\$14,479	2.0

Included in the loan balances are the following:

Net unamortized deferred loan costs	\$ 566	\$ 567
Unamortized discount on purchased loans	\$ (208)	\$ (220)

Loans pledged as collateral for borrowings and commitments from:

FHLB	\$ 702,866	\$ 648,272
Federal Reserve Bank	49,343	53,682
	\$ 752,209	\$ 701,954

Note 7 – Loan Quality

The following table presents, by loan segment, the Allowance for Loan Losses (ALL) for the periods ended:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural	Commercial Industrial &	Consumer	Total
	First Liens	Junior Liens & Lines of Credit	Construction	Real Estate	Agricultural		
ALL at December 31, 2010	\$ 600	\$ 352	\$ 2,596	\$ 3,358	\$ 1,578	\$ 317	\$ 8,801
Charge-offs	(107)	(5)	(400)	(161)	-	(64)	(737)
Recoveries	11	-	-	193	-	30	234

Commercial, industrial and agricultural	1	\$637	-	\$-	1	\$637
Total	1	\$637	-	\$-	-	\$637
December 31, 2010						
Commercial, industrial and agricultural	1	\$656	-	\$-	-	\$-
Total	1	\$656	-	\$-	-	\$-

Note 8 – Pensions

The components of pension expense for the periods presented are as follows:

(Amounts in thousands)	Three Months Ended	
	2011	2010
Components of net periodic cost:		

Edgar Filing: FRANKLIN FINANCIAL SERVICES CORP /PA/ - Form 10-Q

Service cost	\$	103	\$	91
Interest cost		182		185
Expected return on plan assets		(188)		(209)
Recognized net actuarial loss		89		43
Net periodic cost	\$	186	\$	110

The Bank expects its pension expense to increase in 2011 compared to 2010. The Bank expects to contribute \$1.9 million to its pension plan in 2011. This amount will meet the minimum funding requirements.

Note 9 – Mortgage Servicing Rights

Activity pertaining to mortgage servicing rights and the related valuation allowance follows:

(Amounts in thousands)	Three Months Ended	
	March 31	
	2011	2010
Cost of mortgage servicing rights:		
Beginning balance	\$ 933	\$ 1,190
Originations	-	6
Amortization	(48)	(69)
Ending balance	\$ 885	\$ 1,127
Valuation allowance:		
Beginning balance	\$ (330)	\$ (477)
Valuation charges	-	-
Valuation reversals	12	60
Ending balance	\$ (318)	\$ (417)
Mortgage servicing rights cost	\$ 885	\$ 1,127
Valuation allowance	(318)	(417)
Carrying value	\$ 567	\$ 710
Fair value	\$ 567	\$ 710

Note 10 – Fair Value Measurements

Management uses its best judgment in estimating the fair value of the Corporation's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective quarter-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each quarter-end.

FASB ASC Topic 825, Financial Instruments, requires disclosure of the fair value of financial assets and liabilities, including those financial assets and liabilities that are not measured and reported at fair value on a recurring and non-recurring basis.

The estimated fair value of the Corporation's financial instruments are as follows:

(Amounts in thousands)	March 31, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$21,980	\$21,980	\$22,106	\$22,106
Investment securities available for sale	123,467	123,467	117,616	117,616
Restricted stock	5,852	5,852	6,159	6,159
Net loans	754,320	753,693	739,841	750,944
Accrued interest receivable	3,630	3,630	3,662	3,662
Mortgage servicing rights	567	567	603	603
Financial liabilities:				
Deposits	\$757,307	\$759,917	\$734,331	\$737,274
Securities sold under agreements to repurchase	54,366	54,366	51,164	51,164
Long-term debt	61,712	64,699	70,885	74,695
Accrued interest payable	892	892	757	757
Interest rate swaps	1,511	1,511	1,752	1,752

The preceding information should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Corporation's financial instruments at March 31, 2011 and December 31, 2010:

Cash and Cash Equivalents: For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities available for sale: The fair value of investment securities is determined in accordance with the methods described under FASB ASC Topic 820, Fair Value Measurements and Disclosures, as discussed below.

Restricted stock: The carrying value of restricted stock approximates its fair value based on redemption provisions for the restricted stock.

Net loans: The fair value of fixed-rate loans is estimated for each major type of loan (e.g. real estate, commercial, industrial and agricultural and consumer) by discounting the future cash flows associated with such loans using rates currently offered for loans with similar terms to borrowers of comparable credit quality. The model considers scheduled principal maturities, repricing characteristics, prepayment assumptions and interest cash flows. The discount rates used are estimated based upon consideration of a number of factors including the treasury yield curve, expense and service charge factors. For variable rate loans that reprice frequently and have no significant change in credit quality, carrying values approximate the fair value.

Accrued interest receivable: The carrying amount is a reasonable estimate of fair value.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates assumptions, such as loan default rates, costs to service, and prepayment speeds. Mortgage servicing rights are carried

at the lower of cost or fair value after initial recognition.

20

Deposits, Securities sold under agreements to repurchase and Long-term debt: The fair value of demand deposits, savings accounts, and money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-rate certificates of deposit and long-term debt is estimated by discounting the future cash flows using rates approximating those currently offered for certificates of deposit and borrowings with similar remaining maturities. For securities sold under agreements to repurchase, the carrying value approximates a reasonable estimate of the fair value.

Accrued interest payable: The carrying amount is a reasonable estimate of fair value.

Interest rate swaps: The fair value of the interest rate swaps is determined in accordance with the methods described under FASB ASC Topic 820, as discussed below.

Off balance sheet financial instruments: Outstanding commitments to extend credit and commitments under standby letters of credit include fixed and variable rate commercial and consumer commitments. The fair value of the commitments is estimated using the fees currently charged to enter into similar agreements.

FASB ASC Topic 820, Fair Value Measurements and Disclosures established a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as follows:

Level 1: Valuation is based on unadjusted, quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Corporation's assumptions regarding what market participants would assume when pricing a financial instrument.

For financial assets and liabilities measured at fair value on a recurring basis, there were no transfers of financial assets or liabilities between Level 1 and Level 2 during the period ending March 31, 2011.

For financial assets and liabilities measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollars in Thousands)		Fair Value at March 31, 2011			
Asset Description	Level 1	Level 2	Level 3	Total	
Equity securities	\$2,862	\$-	\$-	\$2,862	
Obligations of U.S. Government agencies	-	17,577	-	17,577	
Obligations of state and political subdivisions	-	40,012	-	40,012	
Corporate debt securities	-	2,659	-	2,659	
Preferred Securities	1	4,518	-	4,518	
Mortgage-backed securities					
Agency	-	52,020	-	52,020	
Non-Agency	-	3,768	-	3,768	
Asset-backed securities	-	51	-	51	
Total assets	\$2,863	\$120,605	\$-	\$123,467	
Liability Description					
Interest rate swaps	\$-	\$1,511	\$-	\$1,511	
Total liabilities	\$-	\$1,511	\$-	\$1,511	

(Dollars in Thousands)		Fair Value at December 31, 2010			
Asset Description	Level 1	Level 2	Level 3	Total	
Equity securities	\$3,638	\$-	\$-	\$3,638	
Obligations of U.S. Government agencies	-	14,785	-	14,785	
Obligations of state and political subdivisions	-	39,952	-	39,952	
Corporate debt securities	-	2,666	-	2,666	
Preferred Securities	-	4,196	-	4,196	
Mortgage-backed securities					
Agency	-	48,297	-	48,297	
Non-Agency	-	4,029	-	4,029	
Asset-backed securities	-	53	-	53	
Total assets	\$3,638	\$113,978	\$-	\$117,616	
Liability Description					
Interest rate swaps	\$-	\$1,752	\$-	\$1,752	
Total liabilities	\$-	\$1,752	\$-	\$1,752	

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Corporation used the following methods and significant assumptions to estimate the fair value for assets and liabilities measured on a recurring basis.

Investment securities: Level 1 securities represent equity securities that are valued using quoted market prices from nationally recognized markets. Level 2 securities represent debt securities that are valued using a mathematical model based upon the specific characteristics of a security in relationship to quoted prices for similar securities.

Interest rate swaps: The interest rate swaps are valued using a discounted cash flow model that uses verifiable market environment inputs to calculate the fair value. This method is not dependent on the input of any significant judgments or assumptions by Management.

For financial assets and liabilities measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollars in Thousands)

Asset Description	Fair Value at March 31, 2011			
	Level 1	Level 2	Level 3	Total
Impaired loans	\$-	\$-	\$20,619	\$20,619
Other real estate owned	-	-	635	635
Mortgage servicing rights	-	-	567	567
Total assets	\$-	\$-	\$21,821	\$21,821

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2010			
	Level 1	Level 2	Level 3	Total
Impaired loans	\$-	\$-	\$16,973	\$16,973
Other real estate owned	-	-	618	618
Mortgage servicing rights	-	-	603	603
Total assets	\$-	\$-	\$18,194	\$18,194

The Corporation used the following methods and significant assumptions to estimate the fair value of assets and liabilities measured on a nonrecurring basis:

Impaired loans: Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Other real estate: The fair value of other real estate, upon initial recognition, is estimated using Level 2 inputs within the fair value hierarchy based on observable market data and Level 3 inputs based on customized discounting criteria. In connection with the measurement and initial recognition of the foregoing assets, the Corporation recognizes charge-offs through the allowance for loan losses.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates Level 3 assumptions such as cost to service, discount rate, prepayment speeds, default rates and losses. Mortgage servicing rights are carried at the lower of cost or fair value after initial recognition.

Note 11 – Financial Derivatives

The Board of Directors has given Management authorization to enter into derivative activity including interest rate swaps, caps and floors, forward-rate agreements, options and futures contracts in order to hedge interest rate risk. The Bank is exposed to credit risk equal to the positive fair value of a derivative instrument, if any, as a positive fair value indicates that the counterparty to the agreement is financially liable to the Bank. To limit this risk, counterparties must have an investment grade long-term debt rating and individual counterparty credit exposure is limited by Board approved parameters. Management anticipates continuing to use derivatives, as permitted by its Board-approved policy, to manage interest rate risk. In 2008, the Bank entered into two interest rate swap transactions in order to hedge the Corporation's exposure to changes in cash flows attributable to the effect of interest rate changes on variable rate liabilities.

Information regarding the interest rate swaps as of March 31, 2011 follows:

(Dollars in thousands)						Amount Expected to be Expensed into Earnings within the next 12 Months
Notional Amount	Maturity Date	Fixed	Interest Rate	Variable		
\$ 10,000	5/30/2013	3.60	%	0.10	% \$ 350	
\$ 10,000	5/30/2015	3.87	%	0.10	% \$ 377	

The variable rate is indexed to the 91-day Treasury Bill auction (discount) rate and resets weekly.

Derivatives with a positive fair value are reflected as other assets in the consolidated balance sheet while those with a negative fair value are reflected as other liabilities. As short-term interest rates decrease, the net expense of the swap increases. As short-term rates increase, the net expense of the swap decreases.

Fair Value of Derivative Instruments in the Consolidated Balance Sheets as of March 31, 2011 and December 31, 2010 are as follows:

Fair Value of Derivative Instruments			
(Dollars in thousands)	Date	Type	Balance Sheet Location
	March 31, 2011	Interest rate contracts	Other liabilities
	December 31, 2010	Interest rate contracts	Other liabilities
			Fair Value
			\$ 1,511
			\$ 1,752

The Effect of Derivative Instruments on the Statement of Income for the Three Months Ended March 31, 2011 and 2010 follows:

Derivatives in ASC Topic 815 Cash Flow Hedging Relationships			Amount of Gain or (Loss)
(Dollars in thousands)		Location of Gain or (Loss)	

Date / Type	Amount of Gain or (Loss) Recognized in OCI net of tax on Derivative (Effective Portion)	Location of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)
March 31, 2011					
Interest rate contracts	\$ 158	Interest Expense	\$ (175)	Other income (expense)	\$ -
March 31, 2010					
Interest rate contracts	\$ (104)	Interest Expense	\$ (181)	Other income (expense)	\$ -

Note 12 – Reclassifications

Certain prior period amounts may have been reclassified to conform to the current year presentation. Such reclassifications did not affect reported net income.

25

Item 2

Management's Discussion and Analysis of Results of Operations and Financial Condition
For the Three Month Period Ended March 31, 2011 and 2010

Forward Looking Statements

Certain statements appearing herein which are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements refer to a future period or periods, reflecting management's current views as to likely future developments, and use words such as "may," "will," "expect," "believe," "estimate," "anticipate," or similar terms. Because forward-looking statements involve certain risks, uncertainties and other factors over which the Corporation has no direct control, actual results could differ materially from those contemplated in such statements. These factors include (but are not limited to) the following: general economic conditions, changes in interest rates, changes in the Corporation's cost of funds, changes in government monetary policy, changes in government regulation and taxation of financial institutions, changes in the rate of inflation, changes in technology, the intensification of competition within the Corporation's market area, and other similar factors.

Critical Accounting Policies

Management has identified critical accounting policies for the Corporation to include Allowance for Loan Losses, Mortgage Servicing Rights, Financial Derivatives, Temporary Investment Impairment and Stock-based Compensation. There were no changes to the critical accounting policies disclosed in the 2010 Annual Report on Form 10-K in regards to application or related judgements and estimates used. Please refer to Item 7 of the Corporation's 2010 Annual Report on Form 10-K for a more detailed disclosure of the critical accounting policies.

Results of Operations

Year-to-Date Summary

The Corporation reported net income for the first three months of 2011 of \$1.8 million. This is a 6.3% decrease versus net income of \$2.0 million for the same period in 2010. Total revenue (interest income and noninterest income) decreased \$489 thousand year-over-year. Interest income decreased \$616 thousand, due primarily to a decrease in interest on investments, while noninterest income increased due primarily to an increase in loan service charges. Higher salary and benefit expense contributed to the increase in noninterest expense. The provision for loan losses was \$900 thousand for the period, \$275 thousand more than in 2010. Diluted earnings per share decreased to \$.47 in 2011 from \$.51 in 2010. Net loans grew to \$754.3 million and total deposits increased to \$757.3 million. Total assets were \$972.0 million at March 31, 2011, an increase of \$20.1 million from year-end 2010.

Other key performance ratios as of, or for the three months ended March 31, 2011 and 2010 (on an annualized basis) are listed below:

	2011		2010	
Return on average equity (ROE)	8.98	%	10.00	%
Return on average assets (ROA)	.78	%	.82	%
Return on average tangible average equity(1)	10.74	%	12.02	%
Return on average tangible average assets(1)	.81	%	.85	%
Net interest margin	3.71	%	3.46	%
Efficiency ratio	66.55	%	65.17	%

(1) The Corporation supplements its traditional GAAP measurements with Non-GAAP measurements. The Non-GAAP measurements include Return on Average Tangible Assets and Return on Average Tangible Equity. As a result of merger transactions, intangible assets (primarily goodwill and core deposit intangibles) were created. The Non-GAAP disclosures are intended to eliminate the effects of the intangible assets and allow for better comparisons to periods when such assets did not exist. The following table shows the adjustments made between the GAAP and NON-GAAP measurements:

GAAP Measurement	Calculation
Return on Average Assets	Net Income / Average Assets
Return on Average Equity	Net Income / Average Equity
Non- GAAP Measurement	Calculation
Return on Average Tangible Assets	Net Income plus Intangible Amortization / Average Assets less Average Intangible Assets
Return on Average Tangible Equity	Net Income plus Intangible Amortization / Average Equity less Average Intangible Assets
Efficiency Ratio	Noninterest Expense / Tax Equivalent Net Interest Income plus Noninterest Income (excluding Security Gains/Losses and Other Than Temporary Impairment)

A more detailed discussion of the operating results for the three months ended March 31, 2011 follows:

Comparison of the three months ended March 31, 2011 to the three months ended March 31, 2010:

Net Interest Income

The most important source of the Corporation's earnings is net interest income, which is defined as the difference between income on interest-earning assets and the expense of interest-bearing liabilities supporting those assets. Principal categories of interest-earning assets are loans and securities, while deposits, securities sold under agreements to repurchase (Repos), short-term borrowings and long-term debt are the principal categories of interest-bearing liabilities. Demand deposits enhance net interest income because they are noninterest-bearing deposits. For the purpose of this discussion, balance sheet items refer to the average balance for the year and net interest income is adjusted to a fully taxable-equivalent basis. This tax-equivalent adjustment facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Corporation's 34% Federal statutory rate.

Tax equivalent interest income for the first quarter of 2011 decreased by \$637 thousand compared to 2010. Average interest-earning assets decreased \$13.8 million from 2010 and the yield on these assets decreased by 17 basis points. The average balance of investment securities decreased \$22.6 million quarter over quarter due to pay downs, maturities and sales in the portfolio, net of investment purchases. Total average loans increased \$8.6 million (1.1%) quarter over quarter. Average commercial loans increased \$39.2 million, but the increase was partially offset by a decrease in the average balance of mortgage and consumer loans. Average mortgage loans decreased \$8.4 million, as the majority of new mortgage originations are sold in the secondary market and the portfolio continues to runoff. Average consumer loans, including home equity loans, decreased \$18.3 million, as consumers continue to borrow less during the economic recession and the indirect lending portfolio continues to run-off as the Bank exited this business in early 2010 and no new loans have been booked.

Interest expense was \$2.4 million for the first quarter, a decrease of \$966 thousand from the 2010 total of \$3.4 million. Average interest-bearing liabilities decreased to \$766.9 million for 2011 from an average balance of \$802.3 million in 2010, a decrease of \$35.4 million. The average cost of these liabilities decreased from 1.70% in 2010 to 1.27% in 2011. Average interest-bearing deposits decreased \$2.2 million, due to decreases in certificates of deposit (\$61.0 million), but this decrease was nearly offset by increases in interest checking and savings accounts (\$12.5 million) and money management deposits (\$46.3 million). The cost of interest-bearing deposits decreased from 1.48% to 1.05%. Securities sold under agreements to repurchase have decreased \$6.3 million on average over the prior year quarter and the average rate has remained constant at .25%. The average balance of long-term debt decreased by \$27.4 million due to scheduled amortization and maturities, as well as a prepayment of \$3.4 million on a Federal Home Loan Bank of Pittsburgh (FHLB) advance.

The changes in the balance sheet and interest rates resulted in an increase in tax equivalent net interest income of \$329 thousand to \$8.1 million in 2011 compared to \$7.8 million in 2010. The Bank's net interest margin increased from 3.46% to 3.71% in 2011. The increase in the net interest margin is the result of a decrease in the rate on interest-earning liabilities of 43 basis points, while the yield on interest-bearing assets only decreased 17 basis points.

The following table shows a comparative analysis of average balances, asset yields and funding costs for the three months ended March 31, 2011 and 2010. These components drive changes in net interest income.

(Dollars in thousands)	2011		For the Three Months Ended March 31 2010					
	Average balance	Tax Equivalent Interest	Average yield/rate		Average balance	Tax Equivalent Interest	Average yield/rate	
Interest-earning assets								
Federal funds sold and interest-bearing balances	\$ 10,908	\$ 7	0.26	%	\$ 10,636	\$ 7	0.25	%
Investment securities	125,721	1,128	3.59	%	148,326	1,576	4.25	%
Loans	755,092	9,418	5.08	%	746,523	9,607	5.18	%
Total interest-earning assets	\$ 891,721	10,553	4.80	%	\$ 905,485	11,190	4.97	%
Interest-bearing liabilities								
Interest-bearing deposits	\$ 644,878	1,670	1.05	%	\$ 647,079	2,360	1.48	%
Securities sold under agreements to repurchase	54,268	33	0.25	%	60,612	38	0.25	%
Short-term borrowings	722	1	0.73	%	223	-	0.65	%
Long-term debt	67,062	701	4.24	%	94,416	973	4.18	%
Total interest-bearing liabilities	\$ 766,930	2,405	1.27	%	\$ 802,330	3,371	1.70	%
Interest spread			3.53	%			3.27	%
Tax equivalent Net interest income/Net interest margin		8,148	3.71	%		7,819	3.46	%
Tax equivalent adjustment		(253)				(274)		
Net interest income		\$ 7,895				\$ 7,545		

All amounts have been adjusted to a tax-equivalent basis using a tax rate of 34%. Investments include the average unrealized gains or losses. Dividend income is reported as taxable income, but is adjusted for the dividend received deduction. Loan balances include nonaccruing loans, loans held for sale and are gross of the allowance for loan losses.

Provision for Loan Losses

For the first quarter of 2011, the provision expense was \$900 thousand versus \$625 thousand in 2010. For more information concerning loan quality and the allowance for loan losses, refer to the Loan discussion in the Financial Condition section.

Noninterest Income

For the first three months of 2011, noninterest income increased slightly to \$2.5 million compared to \$2.4 million in the first quarter of 2010. Investment and trust service fees decreased \$85 thousand due to lower income from estate fees. Loan service charges increased \$284 thousand from a large prepayment penalty on a commercial loan. This loan was match funded with an FHLB advance and the fee to prepay the FHLB advance is recorded in other expense. Mortgage banking fees decreased quarter over quarter due to a smaller reversal of previously recorded impairment charges and lower mortgage servicing amortization expense in 2011, while 2010 contained \$16 thousand in gains on sales of mortgage loans versus none in 2011. Deposit service charges decreased \$41 thousand in the first quarter of 2011 due to a decrease in retail overdraft fees and a decrease in fees from the Bank's overdraft protection program. Part of this decrease can be attributed to new legislation in 2010 requiring consumers to opt-in to an overdraft coverage program, resulting in some choosing not to opt-in. Other service charges and fees increased primarily due to a \$34 thousand increase in debit card fees. However, debit card fees could be reduced by hundreds of thousands of dollars annually if the Durbin Act, as proposed, is implemented. There are currently alternate proposals to the Durbin Act being considered, and a delay in implementation appears likely; however, the final outcome is unknown at this time. The increase in cash surrender value of life insurance and other income remained fairly flat in the first quarter of 2011. No other than temporary impairment charges were taken in the first quarter of 2011 compared to \$255 thousand on two bonds in the first quarter of 2010. The Corporation also had realized gains of \$11 thousand on the sale of equity securities in 2011, compared to \$249 thousand in 2010.

The following table presents a comparison of noninterest income for the three months ended March 31, 2011 and 2010:

	For the Three Months Ended		Change	
	2011	2010	Amount	%
Noninterest Income				
Investment and trust services fees	\$ 932	\$ 1,017	\$(85)	(8.4)
Loan service charges	481	197	284	144.2
Mortgage banking activities	10	69	(59)	(85.5)
Deposit service charges and fees	536	577	(41)	(7.1)
Other service charges and fees	362	326	36	11.0
Increase in cash surrender value of life insurance	165	166	(1)	(0.6)
Other	25	49	(24)	(49.0)
OTTI losses on securities	-	(689)	689	N/A
Less: Loss recognized in other comprehensive income (before taxes)	-	(434)	434	N/A
Net OTTI losses recognized in earnings	-	(255)	255	N/A
Securities gains, net	11	249	(238)	(95.6)
Total noninterest income	\$ 2,522	\$ 2,395	\$ 127	5.3

Noninterest Expense

Noninterest expense for the first quarter of 2011 totaled \$7.0 million compared to \$6.7 million in the first quarter of 2010. The increase in salaries and benefits was primarily due to annual salary adjustments, an increase in pension expense and for an incentive compensation program. Net occupancy expense, furniture and equipment expense and advertising expense remained relatively flat year over year. Legal and professional fees decreased due to lower legal fees in 2011. FDIC insurance increased \$19 thousand, as the FDIC assessment rate increased and the volume of deposits was higher in 2011. Other expenses increased \$158 thousand due to a \$172 thousand prepayment penalty on

an FHLB advance.

29

The following table presents a comparison of noninterest expense for the three months ended March 31, 2011 and 2010:

	For the Three Months Ended		Change Amount	%
	2011	March 31 2010		
Noninterest Expense				
Salaries and benefits	\$ 3,713	\$ 3,441	\$ 272	7.9
Net occupancy expense	531	526	5	1.0
Furniture and equipment expense	223	192	31	16.1
Advertising	292	301	(9)	(3.0)
Legal and professional fees	271	395	(124)	(31.4)
Data processing	381	377	4	1.1
Pennsylvania bank shares tax	165	156	9	5.8
Intangible amortization	111	114	(3)	(2.6)
FDIC insurance	311	292	19	6.5
Other	1,024	866	158	18.2
Total noninterest expense	\$ 7,022	\$ 6,660	\$ 362	5.4

Income taxes

Federal income tax expense was \$646 thousand in 2011 compared to \$681 thousand in 2010. The effective tax rate remained flat year over year at 25.9% for the first quarter of 2011 compared to 25.6% for 2010. All taxable income for the Corporation is taxed at a rate of 34%.

Financial Condition

Summary:

At March 31, 2011, assets totaled \$972.0 million, an increase of \$20.1 million from the 2010 year-end balance of \$951.9 million. Investment securities increased \$5.9 million, while net loans increased \$14.5 million. Deposits are up \$23.0 million in 2011 due primarily to increases in noninterest-bearing and money management deposits. Shareholders' equity increased \$1.7 million during the first three months as retained earnings increased approximately \$791 thousand, other comprehensive loss improved \$637 thousand and changes to the Bank's DRIP program added an additional \$272 thousand in new capital.

Investment Securities:

The investment portfolio totaled \$123.5 million at March 31, 2011, an increase of \$5.9 million since year-end 2010. The composition of the portfolio has not changed significantly during the first quarter with only \$11.2 million of new purchases, primarily agency mortgage backed securities, being added to replace collateral. The net unrealized loss in the portfolio decreased from \$1.0 million at year-end 2010 to \$300 thousand at March 31, 2011.

The equity portfolio is comprised of bank stocks and the Bank and the Corporation each maintain separate equity investment portfolios. The municipal bond portfolio is well diversified geographically (issuers from within 26 states) and is comprised primarily of general obligation bonds (73%) with credit enhancements in the form of private bond insurance or other credit enhancements. The largest municipal bond exposure is to nineteen issuers in the state of Texas with a fair value of \$7.2 million. The Bank holds corporate bonds with a fair value \$7.2 million with the majority of the bonds representing financial services companies. Included in the corporate bond portfolio are seven

single issuer trust preferred securities with an amortized cost of \$5.9 million and a fair value of \$4.6 million. The majority of the mortgage-backed security portfolio is comprised of U.S. Government Agency products. However, the Bank has seven private label mortgage backed securities (PLMBS) with an amortized cost of \$4.2 million and a fair value of \$3.8 million.

The amortized cost and estimated fair value of investment securities available for sale as of March 31, 2011 and December 31, 2010 are:

(Amounts in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
March 31, 2011				
Equity securities	\$3,258	\$58	\$(454)	\$2,862
Obligations of U.S. Government agencies	17,562	61	(46)	17,577
Obligations of state and political subdivisions	38,908	1,203	(99)	40,012
Corporate debt securities	2,615	69	(25)	2,659
Preferred securities	5,881	-	(1,363)	4,518

At March 31, 2011, the investment portfolio contained 77 securities with \$41.2 million of temporarily impaired fair value and \$2.6 million in unrealized losses. This position is improved from year-end 2010 when there were 85 securities with an unrealized loss of \$3.2 million. The investment category with the largest unrealized losses is the corporate bond portfolio (9 securities and \$1.4 million unrealized loss). This unrealized loss is approximately 54% of the total unrealized loss in the portfolio.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for "other-than-temporary" impairment. In the case of debt securities, investments considered for "other-than-temporary" impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to

specific issues. Accordingly, the impairments identified on debt and equity securities and subjected to the assessment at March 31, 2011 were deemed to be temporary and required no further adjustment to the financial statements, unless otherwise noted.

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of March 31, 2011 and December 31, 2010:

The unrealized loss in the equity portfolio was \$454 thousand on a fair value of \$2.1 million. The fair value of equities with an unrealized loss declined by \$1.2 million since year-end 2010, due in large part to the sale of \$880 thousand of equities at a gain of \$11 thousand during the quarter. The equities sold were a portion of the Tower shares that were

written down by \$389 thousand at the end of 2010.

The unrealized loss in the corporate debt portfolio of \$1.4 million is concentrated in trust-preferred securities. Trust preferred securities experienced significant declines in value during the economic recession in 2008 and 2009.

However, market prices continue to show signs of improvement and the value of the Bank's trust preferred securities has increased \$354 in the first quarter. Trust-preferred securities can reflect single entity issues or a group of entities (pooled trust preferred). Pooled trust preferred securities have been the subject of significant write-downs due in some cases from the default of one issuer in the pool that then impairs the entire pool. All of the Bank's trust preferred securities are single issue, variable rate notes with long maturities (2027 – 2028) from companies that received money (and in some cases paid back) from the Troubled Asset Relief Program (TARP), continue to pay dividends and have raised capital. At March 31, 2011, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. See the Trust Preferred Securities table above for additional information.

The largest unrealized loss in the MBS portfolio is in the non-agency PLMBS sector with an unrealized loss of \$399 thousand. Five PLMBS have an unrealized loss of \$419 thousand and two have an unrealized gain of \$20 thousand.

These bonds were all rated AAA at time of purchase, but have since have experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the PLMBS investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that two bonds contained losses that were considered other-than-temporary and an impairment charge of \$335 thousand was recorded against earnings in 2010. The same review process was conducted for the first quarter of 2011 and no additional impairment charges were required. The market for PLMBS continues to be weak and Management believes that this factor accounts for a portion of the unrealized losses that is not attributable to credit issues. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. See the PLMBS table above for additional information.

The following table represents the cumulative credit losses on securities recognized in earnings as of March 31, 2011.

	Three Months Ended March 31, 2011
Balance of cumulative credit losses on securities, January 1, 2011	\$ 335
Additions for credit losses recorded which were not previously recognized as components of earnings	-
Balance of cumulative credit losses on securities, March 31, 2011	\$ 335

The Bank held \$5.8 million of restricted stock at March 31, 2011. Except for \$30 thousand, this investment represents stock in the FHLB Pittsburgh. The Bank is required to hold this stock to be a member of FHLB and it is carried at cost of \$100 per share. In December 2008, FHLB announced it would suspend its regular cash dividend and the regular repurchase of excess capital stock from its members as part of capital restoration plan. However, FHLB made an unscheduled stock repurchase of \$307 thousand during the quarter. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Loans:

Net loans increased \$14.5 million since year-end. Residential real estate loans, comprised of mortgage and home equity loans, decreased \$2.3 million from year-end 2010. First lien loans remained virtually unchanged as the Bank sells the majority of new mortgage originations in the secondary market. The Bank originated approximately \$3.6 million in mortgage loans for sale this year through a third party brokerage agreement. The Bank collects a fee for originating these loans, but it does not retain or service the loans. Junior liens and lines of credit decreased \$2.4 million, as there is less demand from consumers for home equity products. Many consumers have seen the equity in their homes decline and are less willing to borrow money in the uncertain economy. Due to these facts, the Bank expects its residential real estate loan portfolio to decline in future periods.

Residential real estate construction loans increased \$1.6 million from the end of 2010 to \$81.2 million at March 31, 2011. This portfolio is comprised of \$1.8 million to individuals to build their own homes and \$79.4 million to developers to construct residential homes for sale or improve land for the sale of residential building lots. These balances compare to \$6.0 million to individuals and \$73.6 million to developers at year-end. The Bank's exposure to residential construction loans is concentrated primarily in south central Pennsylvania. Real estate construction loans, especially land development loans, frequently provide an interest reserve in order to assist the developer during the development stage when minimal cash flow is generated. All real estate construction loans are underwritten in the same manner, regardless of the use of an interest reserve. At March 31, 2011, the Bank had \$23.7 million in real estate loans with a Bank funded interest reserve and has capitalized \$1.8 million of interest from these reserves on active projects. Real estate construction loans are monitored on a regular basis by either an independent third party inspector, or a joint effort between the Bank's Risk Management division and the assigned loan officer depending on loan amount or complexity of the project. This monitoring process includes at a minimum, the submission of invoices and AIA documents of costs incurred by the borrower, on-site inspections, and joint signature between the Risk Management division and the loan officer for disbursement of funds. Year-to-date, the Bank has recognized \$88 thousand of interest income that was funded by interest reserve accounts.

Commercial lending activity continues to be strong and these balances have increased approximately \$17.0 million since year-end. Commercial real estate loans (CRE) decreased \$1.0 million during the first quarter. The commercial real estate portfolio includes \$106.7 million of owner occupied properties, \$116.3 million of non-owned occupied properties and \$36.7 million secured by farmland. Commercial, industrial and agricultural loans (C&I) increased \$18.0 million, primarily the result of loans to local municipalities (approximately \$13.5 million) and loans to commercial customers to fund business operations (approximately \$3.0 million). Included in the C&I portfolio is \$59.6 million of loans to government municipalities. During the first three months of 2011, the Bank purchased \$3.1 million of loan participations, \$597 thousand of C&I loans and \$2.5 million included in residential real estate construction. The Bank expects the amount of commercial loan participations available for purchase in 2011 will be less than the \$17.4 million purchased in 2010 as a result of a general slow down in commercial business activity. At March 31, 2011, the Bank held \$143.5 million in purchased commercial loan participations.

Consumer loans have decreased by approximately \$1.4 million, with most of the decrease occurring in the indirect lending portfolio. The Bank's indirect lending portfolio is approximately \$6 million, down from approximately \$7.2 million at year-end. With the Bank's decision to exit this line of business in the first quarter of 2010, as well as the unwillingness of consumers to increase their debt, the consumer portfolio will continue to run-down.

The following table presents a summary of loans outstanding, by primary collateral, at the end of the reporting period:

(Amounts in thousands)	March 31, 2011	December 31, 2010	Change	
			Amount	%
Residential Real Estate 1-4 Family				
First liens	\$ 144,174	\$ 144,128	\$46	-
Junior liens and lines of credit	54,323	56,694	(2,371)	(4.2)
Total	198,497	200,822	(2,325)	(1.2)
Residential real estate - construction	81,184	79,557	1,627	2.0
Commercial, industrial and agricultural real estate	303,153	304,195	(1,042)	(0.3)
Commercial, industrial and agricultural	164,712	146,672	18,040	12.3
Consumer	15,972	17,396	(1,424)	(8.2)
	763,518	748,642	14,876	2.0
Less: Allowance for loan losses	(9,198)	(8,801)	(397)	4.5
Net Loans	\$ 754,320	\$ 739,841	\$14,479	2.0

Included in the loan balances are the following:

Net unamortized deferred loan costs	\$ 566	\$ 567
Unamortized discount on purchased loans	\$ (208)	\$ (220)

Loans pledged as collateral for borrowings and commitments from:

FHLB	\$ 702,866	\$ 648,272
Federal Reserve Bank	49,343	53,682
	\$ 752,209	\$ 701,954

Loan Quality:

Management utilizes a risk rating system (1 – 9) to evaluate loan asset quality. It monitors loan asset quality by continually reviewing four measurements: (1) watch list loans (loans risk rated 6 or higher), (2) loan delinquency, (3) foreclosed real estate (other real estate owned or OREO), and (4) net-charge-offs. Management compares trends in these measurements with the Bank's internally established targets, as well as its national and local peer group's average measurements.

Loans that are risk rated 6 (OAEM) or higher are placed on the on the Bank's watch list. At March 31, 2011, there was \$70.0 million on the Bank's watch list, essentially unchanged from \$69.9 million at year-end 2010. The watch list is a comprehensive list of loans that the Bank has identified as needing increased monitoring, usually because of indications that the borrower is, or is likely to be, in a position of weakening cash flow that may require alternative sources of cash, or collateral liquidation to pay the loan. Included on the watch list are loans that may or may not be delinquent or on nonaccrual, loans that may or may not be considered impaired (including troubled debt restructurings), and potential problem loans. The Bank's Loan Management Committee reviews the watch list and risk ratings on a monthly basis in order to proactively identify and manage loan problems.

A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Impaired loans totaled \$31.1 million at March 31, 2011 compared to \$33.2 million at December 31, 2010.

A loan is considered a troubled debt restructuring (TDR) if the creditor, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Bank has one

loan classified as a TDR for \$637 thousand and it is not in compliance with its modified terms. The Bank has not performed any type of loan workout where it has restructured an existing loan into multiple new loans, for example a performing and nonperforming note. The Bank is currently reviewing its procedures for identifying when a loan modification is a TDR in accordance with new accounting guidance. The Bank expects to report a higher level of TDR loans at June 30, 2011.

Potential problem loans are loans on the watch list that represent borrowers that may or may not be able to comply with current loan terms, but excludes loans that are 90 days or more past due and nonaccrual loans. Potential problem loans totaled \$43.6 million at quarter-end compared to \$42.4 million at year-end 2010.

Delinquent loans are a result of borrowers' cash flow and/or alternative sources of cash being insufficient to pay loans. The Bank's likelihood of collateral liquidation to repay the loans becomes more probable the further behind a borrower falls, particularly when loans reach 90 days or more past due. Management's primary delinquent loans measurements are loans 30-89 days past due, and nonperforming loans (90 days or more past due or nonaccrual loans). Nonaccrual loans generally represent Management's determination that collateral liquidation is not likely to fully repay both interest and principal.

It is the Bank's policy to evaluate the probable collectability of principal and interest due under the terms of loan contracts for all loans 90-days or more past due or restructured loans. Further, it is the Bank's policy to discontinue accruing interest on loans that are not adequately secured and in the process of collection. When a loan is placed on nonaccrual status, any current year accrued interest is subtracted from its current period income, and any prior year accrued interest is charged-off from the allowance for loan losses.

Loan quality, as measured by nonperforming loans, has shown little improvement during the quarter. At March 31, 2011, nonperforming loans totaled \$26.5 million compared to \$27.5 million at year-end 2010. Loans past due 90 days or more and still accruing has remained relatively flat from year-end 2010; however, the composition has shifted, as commercial real estate loans past due 90 days or more has increased \$1.7 million during the quarter. Approximately \$1.0 million of this increase is from a loan that has matured, but has been extended subsequent to quarter end. Nonaccrual loans declined slightly from year-end 2010, due to a pay-off of a \$2.2 million nonaccrual loan in January 2011. The ratio of nonperforming loans to total gross loans fell from 3.68% at December 31, 2010 to 3.46% at March 31, 2011. If Management is successful in its work out efforts on several large credits, nonperforming loans could decrease during 2011. However, if the slow economy continues, it is possible that other loans may become delinquent and nonperforming loans could remain at a high level.

The following table presents a summary of nonperforming assets:

(Dollars in thousands)	March 31, 2011		December 31, 2010	
	Balance	% of Loan Segment	Balance	% of Loan Segment
Nonaccrual loans				
Residential Real Estate 1-4 Family

Credit 5 Commercial real estate	2008	6,500	1,594	Dec-10	1st lien on 92 acres undeveloped commercial real estate	PA	Jan-11 \$ 5,629
		\$ 16,482	\$ 2,486				

(1) Appraisal value, as reported, does not reflect the pay-off of any senior liens, or any adjustment to reflect the cost to liquidate the collateral either through an orderly or forced liquidation process

One significant nonaccrual loan (\$2.2 million) reported at year-end 2010 was paid off in January 2011 with the Bank receiving sufficient funds to completely satisfy the outstanding balance. The status of the remaining significant nonaccrual credits is essentially unchanged since year-end 2010. The Bank is still expecting a bankruptcy court approved refinancing plan for Credit 3 to be settled late in the second quarter of 2011 in an amount sufficient to pay-off the outstanding balance.

The Bank holds \$635 thousand of foreclosed real estate, comprised of six loans secured primarily by residential real estate. At March 31, 2011, the Bank had \$435 thousand of portfolio mortgages in the process of foreclosure.

The following table provides additional information on the foreclosed real estate:

Foreclosed Real Estate
March 31, 2011

(Dollars in thousands)	Date Acquired	Balance	Collateral	Location	Last Appraisal
Property 1	2009	\$ 91	4 residential building lots	PA	Sep-09

Property 4	2010	87	residential property	PA	Dec-10
Property 5	2010	148	residential property	PA	Jul-10
Property 6	2011	141	residential property	PA	Feb-11
		\$ 635			

Management continually monitors the status of nonperforming loans, the value of any collateral and potential of risk of loss.

Allowance for Loan Losses:

Management performs a monthly evaluation of the adequacy of the allowance for loan losses. Consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, borrowers' actual or perceived financial and managerial strengths, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. It is Management's general practice to obtain a new appraisal or asset valuation for any loan that it has rated as substandard or higher, including nonaccrual. Management, at its discretion, may determine that additional adjustments to the appraisal or valuation are required. Valuation adjustments will be made as necessary based on other factors, including, but not limited to the economy, deferred maintenance, industry, type of property/equipment etc and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated when determining the realizable value to the Bank.

Real estate appraisals and collateral valuation are an important part of the Bank's process for determining potential loss on collateral dependent loans and thereby have a direct affect on the determination of loan charge-offs and the calculation of the allowance for loan losses. As long as the loan remains a performing loan, no further updates to appraisals are required. If a loan/relationship migrates to watch list status, an evaluation for impairment is made based on the current information available at the time of downgrade. If a loan reaches a OAEM rating or higher, including nonaccrual, Management orders a new or updated appraisal if the current appraisal is more than 12 months old. This practice complies with the new regulatory guidance dated December 12, 2010 and could potentially increase the Bank's allowance for loan loss provision, depending on the results of the new appraisals.

Certain factors involved in the evaluation are inherently subjective, as they require material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

The analysis for determining the ALL is consistent with guidance set forth in generally accepted accounting principles (GAAP) and the Interagency Policy Statement on the Allowance for Loan and Lease Losses. The analysis has two components, specific and general allocations. The specific component addresses specific reserves established for impaired loans. A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Expected cash flow or collateral values discounted for market conditions and selling costs are used to establish specific allocations.

The general component addresses the reserves established for pools of homogenous loans. The general component includes a quantitative and qualitative analysis. The quantitative analysis includes the Bank's historical loan loss experience (weighted towards most recent periods) and other factors derived from economic and market conditions that have been determined to have an affect on the probability and magnitude of a loss. The qualitative analysis utilizes a risk matrix that incorporates qualitative and environmental factors such as: loan volume, management, nonperforming loans, loan review process, credit concentrations, competition, and legal and regulatory issues. Input for these factors is determined on the basis of Management's observation, judgment and experience. As a result of this input, additional loss percentages are assigned to each pool of loans.

The following table shows the loans that were evaluated for the allowance for loan losses under a specific reserve (individually) and those that were evaluated under a general reserve (collectively), and the amount of the allowance established in each category as of March 31, 2011:

(Dollars in thousands)	Residential Real Estate 1-4 Family Junior Liens & First Liens			Commercial Industrial & Commercial Agricultural Industrial & Agricultural Consumer			Total
	Lines of Credit	Construction	Real Estate	Agricultural	Consumer		
March 31, 2011							
Loans evaluated for allowance:							
Individually	\$ 1,016	\$ 308	\$ 9,283	\$ 18,155	\$ 2,291	\$ 3	\$ 31,056
Collectively	143,158	54,015	71,901	284,998	162,421	15,969	732,462
Total	\$ 144,174	\$ 54,323	\$ 81,184	\$ 303,153	\$ 164,712	\$ 15,972	\$ 763,518
Allowance established for loans evaluated:							
Individually	\$ 171	\$ -	\$ 1,284	\$ 3,006	\$ 693	\$ -	\$ 5,154
Collectively	441	292	1,058	1,210	754	289	4,044
Allowance at March 31, 2011	\$ 612	\$ 292	\$ 2,342	\$ 4,216	\$ 1,447	\$ 289	\$ 9,198

In the first quarter of 2011, \$900 thousand was added to the allowance for loan losses (ALL) through the provision for loan loss expense. This compares to a provision expense of \$625 thousand for the first quarter of 2010. The provision expense that was added to the ALL exceeded net charge-offs and the ALL increased from \$8.8 million at year-end 2010 to \$9.2 million at March 31, 2011. The ALL as a percentage of loans improved to 1.20% from 1.18% at December 31, 2010.

Charged-off loans usually result from: (1) a borrower being legally relieved of loan repayment responsibility through bankruptcy, (2) insufficient collateral sale proceeds to repay a loan; or (3) the borrower and/or guarantor does not own other marketable assets that, if sold, would generate sufficient sale proceeds to repay a loan.

The Bank recorded net loan charges-off of \$503 thousand for the quarter compared to \$213 thousand in 2010. Residential real estate construction loans recorded the largest gross charge-offs for the quarter of \$400 thousand. This charge-off was recorded in March 2011 for one nonaccrual credit. The annualized net loan charge-off ratio decreased to .27% from .45% at the end of 2010.

The following table presents an analysis of the allowance for loan losses at March 31, 2011:

(Dollars in thousands)	Residential Real Estate 1-4 Family Junior Liens & First Liens			Commercial Industrial & Commercial Agricultural Industrial & Agricultural Consumer			Total
	Lines of Credit	Construction	Real Estate	Agricultural	Consumer		
Allowance at December 31, 2010	\$ 600	\$ 352	\$ 2,596	\$ 3,358	\$ 1,578	\$ 317	\$ 8,801
Charge-offs	(107)	(5)	(400)	(161)	-	(64)	(737)
Recoveries	11	-	-	193	-	30	234

Edgar Filing: FRANKLIN FINANCIAL SERVICES CORP /PA/ - Form 10-Q

Provision	108	(55)	146	826	(131)	6	900
Allowance at March 31, 2011	\$ 612	\$ 292	\$ 2,342	\$ 4,216	\$ 1,447	\$ 289	\$ 9,198

Allowance for Loan Loss Ratios:	3/31/2011	12/31/2010	3/31/2010
Net loans charged-off as a percentage of average gross loans	0.27 %	0.45 %	0.21 %
Net loans charged-off as a percentage of the provision for loan losses	55.89 %	104.20 %	64.75 %
Allowance as a percentage of loans	1.20 %	1.18 %	1.27 %

Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy quarterly to the Credit Risk Oversight Committee of the Board of Directors. Management believes that the ALL at March 31, 2011 is adequate.

Other Assets:

Other intangible assets are comprised of a core deposit intangible and a customer list and are being amortized over the estimated useful life of the asset.

Deposits:

Total deposits increased \$23.0 million during the first three months of 2011 to \$757.3 million. Non-interest bearing deposits increased \$10.3 million, while savings and interest-bearing checking deposits increased \$14.1 million and time deposits decreased \$1.5 million. The majority of the increase in non-interest bearing accounts came in state/municipal checking accounts. The Bank's Money Management product increased \$7.7 million due primarily to an increase in the Bank's money market reciprocal deposit product available through Promontory Financial. Retail time deposits decreased since year-end, as customers moved funds to more liquid accounts. Brokered CDs increased \$3.7 million, which includes new brokered CDs of \$9.2 million, net of \$5.5 million in CDARS reciprocal deposits maturities. As of March 31, 2011, the Bank had \$16.5 million in CDARS reciprocal deposits included in brokered time deposits.

The following table presents a summary of deposits outstanding at:

(Amounts in thousands)	3/31/2011	12/31/2010	Change	
			Amount	%
Demand, noninterest-bearing checking	\$100,647	\$90,317	\$10,330	11.4
Interest-bearing checking	108,309	103,918	4,391	4.2
Money market accounts	297,453	289,763	7,690	2.7
Savings accounts	50,185	48,138	2,047	4.3
Total interest-bearing checking and savings	455,947	441,819	14,128	3.2
Retail time deposits	156,258	161,399	(5,141)	(3.2)
Brokered time deposits	44,455	40,796	3,659	9.0
Total time deposits	200,713	202,195	(1,482)	(0.7)
Total deposits	\$757,307	\$734,331	\$22,976	3.1
Overdrawn deposit accounts reclassified as loan balances	\$126	\$74		

Borrowings:

The balance of securities sold under agreements to repurchase, which are accounted for as collateralized financings, increased \$3.2 million from year-end and the long-term debt from the FHLB decreased \$9.2 million due to the prepayment of one term loan as well as scheduled amortization and maturities.

Shareholders' Equity:

Total shareholders' equity increased \$1.7 million to \$84.3 million at March 31, 2011, compared to \$82.6 million at the end of 2010. The increase in retained earnings from the Corporation's net income of \$1.8 million was partially offset by the cash dividend of \$1.1 million. The Corporation's dividend payout ratio is 57.2% compared to 55.1% in 2010. As capital levels become increasingly important during this difficult economic period, the Corporation decided to maintain its current dividend rate for the first and second quarters of 2011 as a sign of confidence to its shareholders. Management views the dividend payout as a critical piece of its capital management plan. Additionally, the Corporation continues to explore other sources of capital as part of its capital management plan for the Corporation and the Bank. The Corporation did not repurchase any shares of the Corporation's common stock during the first three months of 2011.

Effective September 30, 2010, the Corporation amended its dividend reinvestment plan for shareholders electing to purchase additional shares of the Corporation's common stock by reinvesting cash dividends paid on their shares or through optional cash payments. Under the amended plan, the Corporation has modified the minimum and maximum amounts that may be invested pursuant to the voluntary cash payment option under the plan, provided for the investment of voluntary cash payments as frequently as weekly, permitted participants to make voluntary cash payments via direct draft (ACH transfer); and modified the formula for determining the purchase price with respect to shares purchased under the plan directly from the Corporation. The Corporation also authorized an additional one million (1,000,000) shares of common stock. In the first quarter of 2011, these changes have added \$272 thousand to capital.

Capital adequacy is currently defined by regulatory agencies through the use of several minimum required ratios. At March 31, 2011, the Corporation was well capitalized as defined by the banking regulatory agencies. Regulatory capital ratios for the Corporation and the Bank are shown below:

	March 31, 2011		December 31, 2010		Regulatory Ratios			
					Minimum		Well Capitalized Minimum	
Total Risk Based Capital Ratio (1)								
Franklin Financial Services Corporation	11.74	%	11.73	%	8.00	%	n/a	
Farmers & Merchants Trust Company	11.21	%	11.22	%	8.00	%	10.00	%
Tier 1 Capital Ratio (2)								
Franklin Financial Services Corporation	10.51	%	10.54	%	4.00	%	n/a	
Farmers & Merchants Trust Company	9.98	%	10.02	%	4.00	%	6.00	%
Leverage Ratio (3)								
Franklin Financial Services Corporation	8.27	%	8.16	%	4.00	%	n/a	
Farmers & Merchants Trust Company	7.83	%	7.73	%	4.00	%	5.00	%

(1)Total risk-based capital / total risk-weighted assets, (2)Tier 1 capital / total risk-weighted assets, (3) Tier 1 capital / average quarterly assets

Economy

The Corporation's primary market area includes Franklin, Fulton, Cumberland and Huntingdon County, PA. This area is diverse in demographic and economic makeup. County populations range from a low of approximately 15,000 in Fulton County to over 230,000 in Cumberland County. At March 31, 2011, the unemployment rate for Pennsylvania decreased to 7.9% and the national rate was 9.0%, while the unemployment rate in the Corporation's market area ranged from 7.3% in Cumberland County to 12.2% in Fulton County. The unemployment rates for the Bank's market area have remained high during the last three years along with state and national rates. As the recession lingers, housing prices have improved slightly over prior year, while mortgage delinquencies are consistent from the end of 2010.

The following table presents economic data:

Economic Data		3/31/2011		12/31/2010	
Unemployment Rate (seasonally adjusted)					
Market area range (1)		7.30 - 12.2	%	7.3% - 12.5	%
Pennsylvania		8.2	%	8.9	%
United States		9.0	%	9.6	%
Housing Price Index - year over year change					
PA, nonmetropolitan statistical area		0.7	%	-1.5	%
United States		-1.3	%	-1.2	%
Franklin County Building Permits - year over year change					
Residential, estimated		26.8	%	26.8	%
Multifamily, estimated		-10.9	%	-10.9	%
Mortgage Delinquency					
Market area range (1)		1.8 - 3.0	%	1.8% - 3.0	%
National		5.30	%	5.30	%

(1) Franklin, Cumberland, Fulton and Huntingdon Counties

Unlike many companies, the assets and liabilities of the Corporation are financial in nature. As such, interest rates and changes in interest rates may have a more significant effect on the Corporation's financial results than on other types of industries. Because of this, the Corporation watches the actions of the Federal Reserve Open Market Committee (FOMC) as it makes decisions about interest rate changes. The Fed continued to hold the fed funds target rate steady at .25% in the first three months of 2011.

Regulatory Issues

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank). This legislation is one of the most comprehensive reform bills ever introduced to the financial services industry. Financial service providers from small community banks to the largest Wall Street firms will be affected by this legislation. Many of aspects of this Act will take effect over several years and the Corporation is still reviewing the details of the Act. At this time, it is difficult to predict the extent to which each component of Dodd-Frank will affect the Corporation. However, it is likely that the Act will impose a greater regulatory burden on the Corporation

and increase its cost of compliance. Some of the key provisions included in Dodd-Frank that are likely to affect the Corporation are:

44

Consumer Financial Protection Bureau (CFPB). The CFPB has been created to set rules and regulations regarding consumer lending activities. Banks with less than \$10 billion in assets are exempt from examination by the CFPB, but the CFPB can require community banks to submit any information it requests for review. The CFPB will also require new disclosure requirements for all banks.

FDIC Insurance. Changes include permanently increasing the insurance limit to \$250,000, changing the assessment base from a deposit-based calculation to an asset-based calculation, and extending unlimited FDIC insurance on certain non-interest bearing depository accounts through December 31, 2012.

Corporate Checking. The prohibition against paying interest on corporate checking accounts has been lifted effective July 21, 2011. The Bank is currently researching the best way to take advantage of this change. The Bank currently has \$54 million in a sweep Repo product that it currently uses, for all intents and purposes, to pay interest on corporate checking accounts. The net effect on interest expense cannot currently be determined, but will be dependent on the type of product developed and customers' response to it. Any reduction in the Repo product balance will improve the Bank's liquidity by freeing up securities used as collateral.

Debit Card Fees. The Durbin Amendment to Dodd-Frank requires that the amount of any interchange fee charged by a debit card issuer must be reasonable and proportional to the cost incurred by the issuer. The Federal Reserve is charged with establishing standards for reasonable and proportional fees. This price regulation applies only to banks with assets greater than \$10 billion; however, the Bank expects market forces to push the regulated prices down to all banks, potentially reducing the Bank's fee income substantially.

Mortgage Licensing. Residential mortgage loan originators must register with the Nationwide Mortgage Licensing System and Registry. This registry is a database created by the states to support the licensing of mortgage originators. Employees of agency-related institutions must register prior to originating residential mortgage loans. This requirement will increase compliance costs for the Corporation.

Appraisals. New appraisal guidance sets forth the minimum regulatory standard for appraisals. It requires institutions to utilize strong internal controls to ensure reliable appraisals and evaluations to monitor and periodically update valuations of collateral for existing real estate loans. This is expected to increase compliance costs for the Corporation.

Compensation. At least once every three years, companies must conduct a non-binding shareholder vote (say-on-pay) to approve the compensation of the CEO and the company's "named executive officers". At least once every 6 years, shareholders must also vote on whether to hold the non-binding vote on executive compensation every 1, 2, or 3 years. Additionally, banking regulators have established guidance that prohibits incentive-based compensation arrangements that encourage inappropriate risks that could lead to material financial loss to the institution. Bank compensation plans will be required to be submitted to the appropriate regulator for review and monitoring of compliance. This is expected to increase compliance costs for the Corporation.

Liquidity

The Corporation must meet the financial needs of the customers that it serves, while providing a satisfactory return on the shareholders' investment. In order to accomplish this, the Corporation must maintain sufficient liquidity in order to respond quickly to the changing level of funds required for both loan and deposit activity. The goal of liquidity management is to meet the ongoing cash flow requirements of depositors who want to withdraw funds and of borrowers who request loan disbursements. The Bank regularly reviews its liquidity position by measuring its projected net cash flows (in and out) at a 30 and 90-day interval. The Bank stresses this measurement by assuming a level of deposit out-flows within 30 days that have not historically been realized. In addition to this forecast, other funding sources are reviewed as a method to provide emergency funding if necessary. The objective of this measurement is to identify the amount of cash that could be raised quickly without the need to liquidate assets. The Bank believes it can meet all anticipated liquidity demands.

Historically, the Corporation has satisfied its liquidity needs from earnings, repayment of loans and amortizing investment securities, maturing investment securities, loan sales, deposit growth and its ability to access existing lines of credit. All investments are classified as available for sale; therefore, securities that are not pledged as collateral for borrowings are an additional source of readily available liquidity, either by selling the security or, more preferably, to provide collateral for additional borrowing. However, at March 31, 2011, the Bank had approximately \$116 million (fair value) or 94% of its investment portfolio pledged as collateral. The primary source of liquidity for the Bank is a line of credit with the FHLB. At March 31, 2011, the Bank had approximately \$173 million available on this line of credit.

The Bank also has \$26 million in unsecured lines of credit at three correspondent banks and approximately \$31 million in funding available at the Federal Reserve Discount Window. The Bank also has the ability to access other funding sources including wholesale borrowings and brokered CDs. The Bank's ability to access brokered CDs could be negatively affected if its capital level was to fall below "well capitalized."

Off Balance Sheet Commitments and Contractual Obligations

The Corporation's financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist mainly of unfunded loans and letters of credit made under the same standards as on-balance sheet instruments. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Corporation. Unused commitments and standby letters of credit totaled \$229.1 million and \$219.3 million, respectively, at March 31, 2011 and December 31, 2010.

The Corporation has entered into various contractual obligations to make future payments. These obligations include time deposits, long-term debt, operating leases, deferred compensation and pension payments. These amounts have not changed materially from those reported in the Corporation's 2010 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes in the Corporation's exposure to market risk during the three months ended March 31, 2011. For more information on market risk refer to the Corporation's 2010 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Evaluation of Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that as of March 31, 2011, the Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

The management of the Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. The Corporation's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Controls

There were no changes during the three months ended March 31, 2011 in the Corporation's internal control over financial reporting which materially affected, or which are reasonably likely to affect, the Corporation's internal control over financial reporting.

Part II – OTHER INFORMATION

Item 1. Legal Proceedings

The nature of the Corporation's business generates a certain amount of litigation involving matters arising in the ordinary course of business. However, in management's opinion, there are no proceedings pending to which the Corporation is a party or to which our property is subject, which, if determined adversely to the Corporation, would be material in relation to our shareholders' equity or financial condition. In addition, no material proceedings are pending or are known to be threatened or contemplated against us by governmental authorities or other parties.

Item 1A. Risk Factors

There were no material changes in the Corporation's risk factors during the three months ended March 31, 2011. For more information, refer to the Corporation's 2010 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Corporation announced a stock repurchase plan on July 8, 2010 to repurchase up to 100,000 shares of the Corporation's common stock over a 12 month time period. There were no shares purchased in 2011. The Corporation did not issue any unregistered equity securities during the quarter ended March 31, 2011.

Item 3. Defaults by the Company on its Senior Securities

None

Item 4. Removed and Reserved

Item 5. Other Information

None

Item 6. Exhibits

Exhibits

3.1 Articles of Incorporation of the Corporation. (Filed as Exhibit 3.1 to Annual Report on Form 10-K for the year ended December 31, 2005 and incorporated herein by reference.)

3.2 Bylaws of the Corporation. (Filed as Exhibit 99 to Current Report on Form 8-K filed on December 20, 2004 and incorporated herein by reference.)

31.1 Rule 13a – 14(a)/15d-14(a) Certifications – Principal Executive Officer

31.2 Rule 13a – 14(a)/15d-14(a) Certifications – Principal Financial Officer

32.1 Section 1350 Certifications – Principal Executive Officer

32.2 Section 1350 Certifications – Principal Financial Officer
