STAFFING 360 SOLUTIONS, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FEBRUARY 28, 2015

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

Staffing 360 Solutions, Inc. (“we,” “us,” “our,” “Staffing 360,” or the “Company”) was incorporated in the State of Nevada on December 22, 2009, as Golden Fork Corporation (“Golden Fork”), which changed its name to Staffing 360 Solutions, Inc., trading symbol “STAF”, on March 16, 2012.

On July 31, 2012, the Company formed Staffing 360 Alliance, Inc. (“Staffing Alliance”), a wholly owned subsidiary, incorporated in the State of Nevada, which had operations for a short period of time before ceasing operations in February 2014.

On April 26, 2013, the Company purchased all of the issued and outstanding common stock (the “TRG Acquisition”) of The Revolution Group, Ltd. (“TRG”), a Massachusetts corporation. The aggregate consideration paid for the TRG Acquisition was approximately \$2.5 million, payable in cash, common stock and a percentage of future gross profits. TRG was a wholly owned subsidiary of the Company and operated under the name “Cyber 360, Inc.” until it was sold effective January 1, 2015. (See Note 14 - Acquisitions).

On June 28, 2013, the Company filed a Certificate of Amendment to its Articles of Incorporation with the State of Nevada, whereby the authorized number of common stock shares was increased from 75,000,000 to 200,000,000. Additionally, this amendment authorized the Company to issue up to 20,000,000 shares of Preferred Stock.

On November 4, 2013, the Company purchased all of the issued and outstanding common stock (the “CSI Acquisition”) of Control Solutions International, Inc. (“CSI”), a Florida corporation, and its wholly owned subsidiary, Canada Control Solutions International, Inc., an Ontario, Canada corporation (“CCSI”), from NewCSI, Inc., a Delaware corporation (“NCSI”), and the shareholders of NCSI. The aggregate consideration paid was approximately \$3.5 million, payable in cash, common stock and a percentage of future gross profits. CSI is a wholly owned subsidiary of the Company. (See Note 14 - Acquisitions).

On January 3, 2014, the Company purchased all of the issued and outstanding common stock of Initio International Holdings Limited (“Initio”), a company organized under the laws of England and Wales, and its respective subsidiaries, including but not limited to Monroe Staffing Services, LLC, a Delaware limited liability company (“Monroe,” and together with all of Initio’s subsidiaries, the “Subsidiaries”). The aggregate consideration paid was approximately \$13.29 million, payable in cash, common stock and promissory notes. Initio and its Subsidiaries are now wholly owned subsidiaries of the Company. Subsequently, Initio was renamed Staffing 360 Solutions Limited (“Staffing UK”). (See Note 14 - Acquisitions).

Initio is a United Kingdom domiciled full-service staffing company with established brands in the U.K. and U.S. Initio’s U.K. division, Longbridge, was established in 1989 as an international multi-sector recruitment company with a long successful history of catering to the sales and marketing, technology, legal and IT solutions sectors. Initio’s U.S. division, Monroe, was established in 1969 as a full-service consulting and staffing agency serving companies ranging from Fortune 100 to new start-ups. Monroe has fifteen (15) offices and five (5) on-site locations throughout Connecticut, Massachusetts, Rhode Island, New Hampshire and North Carolina.

On February 28, 2014, the Company, through its wholly owned subsidiary, Staffing UK, purchased substantially all of the business assets, including but not limited to contracts, business information, records, debt and goodwill (the “Poolia Acquisition”) of Poolia UK Ltd. (“Poolia UK”). All subsequent business activity is under a Staffing UK subsidiary. The aggregate consideration paid for the Poolia Acquisition was £500,000 (the “Fixed Consideration”), plus an amount equal to the net asset value at the completion date of the acquisition (the “NAV Consideration,” together with the Fixed Consideration, collectively, the “Poolia Purchase Price”). The Fixed Consideration and a sum of £250,000, being an advance payment of the NAV Consideration, was paid at closing. Subsequent to closing, the balance of the NAV Consideration was paid to Poolia UK Ltd. for a total Poolia Purchase Price of \$1,626,266. (See Note 14 - Acquisitions)

On May 17, 2014, the Company purchased all of the issued and outstanding common stock of PeopleSERVE, Inc., a Massachusetts corporation (“PSI”), and forty-nine percent (49%) of the issued and outstanding common stock of PeopleSERVE PRS, Inc., a Massachusetts corporation (“PRS”, together with PSI, collectively the “Acquired Companies” or “PS”), pursuant to a Stock Purchase Agreement (the “PS Purchase Agreement”) dated May 17, 2014. The aggregate consideration (the “PS Purchase Price”) paid was approximately \$8.4 million. (See Note 14 - Acquisitions).

At closing, the Company paid: (i) cash of approximately \$2.7 million; (ii) 1,127,365 common stock shares based on the market closing price on the date of purchase of \$1.93 for a total fair value of approximately \$2.2 million; (iii) an unsecured promissory note in the amount of approximately \$2.4 million; and (iv) approximately \$1.1 million of Net Working Capital. Subsequently, the Company prepared and delivered to seller a certificate that set forth the Company’s determination of the: (i) PS Purchase Price, including the calculation of the Adjusted EBITDA of each Acquired Company for the audited period; and (ii) calculation of the Net Working Capital. Based on this certificate, the Company and seller agreed there was no post-closing PS Purchase Price adjustment required.

NOTE 2 – GOING CONCERN

The accompanying unaudited condensed consolidated financial statements have been prepared on a going concern basis which implies the Company will continue to meet its obligations and continue its operations for the next fiscal year. As of February 28, 2015, the Company had a working capital deficiency of \$7,876,112 and had an accumulated deficit of \$30,035,058. For the nine (9) months ended February 28, 2015, the Company had a net loss and net cash used in operations of \$13,697,940 and \$1,444,175, respectively. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern and the outcome of these uncertainties cannot be predicted.

On April 8, 2015, the Company entered into a new revolving credit facility in the amount of \$25 million and a \$3 million four (4) year term loan with MidCap Financial. The \$25 million revolving credit facility, with the option to accordion up to \$50 million, a replacement of the Company’s previous Wells Fargo Bank \$15 million revolving credit facility, and is collateralized by the Company’s accounts receivable. Effectively the new MidCap revolving credit facility increased the Company’s cash availability materially through more favorably negotiated account eligibility criterion. Importantly, the larger facility provides the much needed additional borrowing capacity as the Company continues to expand and grow revenue. The Company used the proceeds to reduce its outstanding indebtedness, pay financing fees and costs associated with this capital transaction and provide for current and future working capital. (See Note 15 – Subsequent Events).

Currently, the Company does not have sufficient working capital to fund the continuation or expansion of its ongoing operations and obligations. The Company will need to raise additional capital to fund its operating expenses, pay its obligations, and acquire additional entities. In order to continue as a going concern and achieve a profitable level of operations, the Company will need, among other things, additional capital resources. Management’s plan to continue as a going concern includes raising capital through additional debt and equity financings to fund working capital and

additional acquisitions, increasing gross margin by driving organic revenue growth and strategic acquisitions, and reducing operating and overhead costs. The Company anticipates it will require \$1.5 million over the next twelve (12) months for working capital purposes. However, management cannot provide any assurances that the Company will be successful in accomplishing any of its plans. The ability of the Company to continue as a going concern is dependent upon management's ability to successfully secure additional sources of financing and attain profitable operations. Further, management cannot provide any assurance that unforeseen circumstances that may occur at any time within the next twelve (12) months or thereafter will not increase the need to raise additional capital on an immediate basis. These matters raise substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

If management is unsuccessful in the execution of the aforementioned plan to address issues which create substantial doubt about its ability to continue as a going concern, the Company may be forced to take one of the following actions:

- Liquidate its assets at distressed prices; and/or

- File for reorganization; and/or

- File for bankruptcy protection.

Any of the above scenarios will decrease stockholder value significantly and may result in the value of the Company's securities becoming worthless.

Restructuring Plan and Implementation:

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, a forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company's working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its Board of Directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the Board of Directors on September 3, 2014. Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties' acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods. The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes Payable and Other Debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes Payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$2,994,202 of principal and interest to 3,290,446 common stock shares and 3,619,490 warrants exercisable for a term of ten (10) years at \$1.25. This action is anticipated to reduce the Company's future cash outflows by approximately \$871,000 in the calendar year of 2015, and by a further \$2,265,723 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$1.50 to \$1.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert

their principal and interest to common stock and/or warrants on or before the maturity date of October 15, 2014, rather than redeem for cash; Bondholders converted \$3,709,655 of principal and interest to 3,709,687 common stock shares and 1,854,859 warrants exercisable for a term of three (3) years at \$2.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$1.50 to \$1.20 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest to common stock by the maturity date of September 15, 2015, rather than redeem for cash. No Bondholders have elected to convert as of February 28, 2015. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds;

Earn-out Liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360, Inc., effective January 1, 2015, the former shareholders of TRG were offered the opportunity and elected to convert their remaining earn-out liability of \$1,134,050 into common stock shares at \$1.00 per share. As a result, the Company issued 1,134,050 common stock shares and recorded a gain on conversion of earn-out of \$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*. These amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

Consulting Agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's future cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with some employees. The measurement date to record the expense was the date upon which the Company agreed to separate employment; The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually in perpetuity.

Restructuring Fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs. Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$123,334 and are properly classified in Professional fees - Restructuring.

Discontinued Operations

On January 27, 2015, the Board of Directors of the Company met without any representation of the officers, former owners or earn-out liability holders and discussed the possibility of discontinuing the Cyber 360 operations. Their independent decision was that they approved and authorized the discontinuance of Cyber 360 operations and to move immediately thereafter towards selling the Cyber 360 operations. Subsequently, the Company presented an arm's length transaction to some of the former TRG owners. On February 27, 2015, the Company entered into a Stock Purchase Agreement to sell Cyber 360, Inc. to some of the former TRG owners with an effective date of January 1, 2015 for an aggregate purchase price of \$1.00 and the settlement of the remaining earn-out obligation under the original purchase agreement. In connection with the sale, all agreements executed in connection with the original acquisition of Cyber 360's business (previously known as The Revolution Group) in April 2013 (the "Original Sale") and all obligations thereunder, except as set forth below, were terminated. As a result of the sale, the Company no longer owns Cyber 360, Inc. (FKA: Staffing 360 Group, Inc.), a Nevada corporation, or its subsidiary Cyber 360, Inc. (FKA: TRG), a Massachusetts corporation.

In connection with the sale and in full settlement of the remaining earn-out obligations, the Company issued 1,134,050 shares (the "Earn-Out Shares") of the Company's common stock with a fair value of \$0.30 per share. These shares are entitled to customary piggy-back registration rights but are subject to a lock-up restriction until the earlier of February 27, 2016 or a sale, liquidation, merger or similar reorganization of the Company resulting in the exchange of all outstanding Company shares for other property.

In accordance with ASC 205-20, the results of the discontinued business have been presented as discontinued operations for the nine (9) and three (3) months ended February 28, 2015. Previously reported results for comparable periods in fiscal year 2014 have also been restated to reflect this reclassification.

The operational results of Cyber 360 are presented in the “Net income from discontinued operations” line item on the Condensed Consolidated Statements of Operations. The assets and liabilities of the discontinued business are presented on the Condensed Consolidated Balance Sheets as assets and/or liabilities from discontinued operations.

Other than consolidated amounts reflecting operating results and balances for both the continuing and discontinued operations, all remaining amounts presented in the accompanying condensed consolidated financial statements and notes reflect the financial results and financial position of the Company's continuing operations.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Interim Financial Statements

These unaudited condensed consolidated financial statements as of and for the nine (9) and three (3) months ended February 28, 2015 and 2014, respectively, reflect all adjustments including normal recurring adjustments, which, in the opinion of management, are necessary to present fairly the financial position, results of operations and cash flows for the periods presented in accordance with the accounting principles generally accepted in the United States of America.

These interim unaudited condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements and notes thereto for the years ended May 31, 2014 and 2013, respectively, which are included in the Company's May 31, 2014 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission on September 15, 2014. The Company assumes that the users of the interim financial information herein have read, or have access to, the audited consolidated financial statements for the preceding period, and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. The results of operations for the nine (9) and three (3) months ended February 28, 2015 are not necessarily indicative of results for the entire year ending May 31, 2015.

Year End and Principles of Consolidation

These unaudited condensed consolidated financial statements and related notes are presented in accordance with generally accepted accounting principles ("GAAP") in the United States, and are expressed in U.S. dollars. The Company's consolidated fiscal year-end is May 31. Some of the Company's subsidiaries have varying year-ends.

The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. As described below, the Company also consolidates PeopleSERVE PRS, Inc., an entity of which it owns forty-nine percent (49%), since the Company is deemed to be the primary beneficiary of this entity. All inter-company transactions are eliminated.

Variable Interest Entities

Current accounting guidance provides a framework for identifying a Variable Interest Entity (“VIE”) and determining when a company should include the assets, liabilities, non-controlling interests, and results of activities of the VIE in its consolidated financial statements. In general, a VIE is an entity or other legal structure used to conduct activities or hold assets that either: (1) has an insufficient amount of equity to carry out its principal activities without additional subordinated financial support, or (2) has a group of equity owners that are unable to make significant decisions about its activities, or (3) has a group of equity owners that do not have the obligation to absorb losses or the right to receive returns generated by its operations. Generally, a VIE should be consolidated if a party with an ownership, contractual, or other financial interest in the VIE has the power to direct the VIE’s most significant activities and the obligation to absorb losses or right to receive benefits of the VIE that could be significant to the VIE. A variable interest holder that consolidates the VIE is called the primary beneficiary. Upon consolidation, the primary beneficiary generally must initially record all of the VIE’s assets, liabilities, and non-controlling interest at fair value and subsequently account for the VIE as if it were consolidated based on majority voting interest. On May 17, 2014, the Company purchased forty-nine percent (49%) of the issued and outstanding common stock of PeopleSERVE PRS, Inc. Pursuant to ASC 810, PeopleSERVE PRS, Inc. is deemed to be a variable interest entity since the Company is the primary beneficiary. Accordingly, the Company consolidates the results of PeopleSERVE PRS, Inc.

Non-controlling Interests

Non-controlling interests in our subsidiaries are recorded in accordance with the provisions of ASC 810 “Consolidation”, and are reported as a component of equity, separate from the parent company’s equity. Purchase or sale of equity interests that do not result in a change of control are accounted for as equity transactions. Results of operations attributable to the non-controlling interests are included in our consolidated results of operations and, upon loss of control, the interest sold, as well as interest retained, if any, will be reported at fair value with any gain or loss recognized in earnings.

Use of Estimates

The preparation of consolidated financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of net revenue and expenses in the reporting period. The Company regularly evaluates estimates and assumptions related to valuation, impairment testing, earn-out liabilities, stock-based compensation and deferred income tax assets valuation allowances. Estimates are based on estimates and assumptions on current facts, historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced may differ materially and adversely from estimates. To the extent there are material differences between estimates and the actual results, future results of operations will be affected. Significant estimates for the nine (9) and three (3) months ended February 28, 2015 and 2014, respectively, include the valuation of intangible assets, including goodwill, liabilities associated with earn-out obligations and testing of long-lived assets for impairment.

In recording the initial purchase accounting for previous acquisitions, estimates of the fair value of identifiable intangible assets and goodwill were reflected in the Company's interim financial statements. Upon retaining the services of an independent valuation consultant, the allocations previously estimated were revised and the results of the independent valuation consultant were retroactively reflected in the Company's consolidated financial statements for the fiscal year ended May 31, 2014.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with original maturities of three (3) months or less when acquired, to be cash equivalents. The Company had no cash equivalents at February 28, 2015 or 2014.

Accounts Receivable

Accounts receivable are presented net of an allowance for doubtful accounts. The Company maintains allowances for doubtful accounts for estimated losses. The Company reviews the accounts receivable on a periodic basis and makes general and specific allowances when there is doubt as to the collectability of individual balances. In evaluating the collectability of individual receivable balances, the Company considers many factors, including the age of the balance, a customer's historical payment history, its current credit-worthiness and current economic trends. Accounts are written off after exhaustive collection effort. At February 28, 2015 and 2014, the Company had an allowance for doubtful accounts of \$416,688 and \$503,518, respectively.

Income Taxes

The Company is governed by the Income Tax Law of the United States. The Company utilizes ASC Topic 740, "Accounting for Income Taxes," which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company applied the provisions of ASC 740-10-50, "Accounting for Uncertainty in Income Taxes", which provides clarification related to the process associated with accounting for uncertain tax positions recognized in the financial statements. Audit periods remain open for review until the statute of limitations has passed. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of the date of this filing, the Company is current on all corporate, federal and state tax returns.

The U.K. and Canadian entities file income tax returns in their respective jurisdictions.

Foreign Currency Translation

Assets and liabilities of subsidiaries operating in foreign countries are translated into U.S. dollars using both the exchange rate in effect at the balance sheet date or historical rate, as applicable. Results of operations are translated using the average exchange rates prevailing throughout the year. The effects of exchange rate fluctuations on translating foreign currency assets and liabilities into U.S. dollars are included in a separate component of stockholders' equity (accumulated other comprehensive loss), while gains and losses resulting from foreign currency transactions are included in operations.

Amortization of Deferred Financing Costs

Costs incurred in connection with obtaining financing are deferred and amortized on a straight-line basis over the term of the related loan, which is not materially different than the effective interest method. Amortization expense of deferred financing costs for the nine (9) and three (3) months ended February 28, 2015 and 2014 totaled \$545,984 and \$239,303 and \$36,644 and \$204,972, respectively.

Business Combinations

In accordance with Accounting Standards Codification 805 - Business Combinations ("ASC 805"), the Company records acquisitions under the purchase method of accounting, under which the acquisition purchase price is allocated to the assets acquired and liabilities assumed based upon their respective fair values. The Company utilizes management estimates and, in some instances, may retain the services of an independent third-party valuation firm to assist in determining the fair values of assets acquired, liabilities assumed and contingent consideration granted. Such estimates and valuations require us to make significant assumptions, including projections of future events and operating performance.

Fair Value of Financial Instruments

In accordance with Accounting Standards Codification 820 - Fair Value Measurements and Disclosures ("ASC 820"), the Company measures and accounts for certain assets and liabilities at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements, and establishes a framework for measuring fair value and standards for disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

- Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities;
- Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data;
- Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity's own assumptions.

The Company did not have any Level 2 or Level 3 assets or liabilities as of February 28, 2015 or 2014, with the exception of its Convertible Notes Payable (See Note 5 – Convertible Notes Payable), Promissory notes (See Note 6 – Promissory Notes), Series A Bonds Payable (See Note 7 – Bonds – Series A), Series B Bonds Payable (See Note 8 – Bonds – Series B) and Earn-Out Liability (See Note 12 – Commitments and Contingencies).

Cash is considered to be highly liquid and easily tradable as of February 28, 2015 and 2014 and therefore classified as Level 1 within our fair value hierarchy.

Accounting Standards Codification 825-10-25, "Fair Value Option" (ASC 825-10-25) expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. The Company did not elect the fair value options for any of its qualifying financial instruments.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with FASB No. 133 “Accounting for Derivative Instruments and Hedging Activities”.

Accounting standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, and (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur, and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as “The Meaning of Conventional Convertible Debt Instrument.”

The Company accounts for convertible instruments (when determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when “Accounting for Convertible Securities with Beneficial Conversion Features,” as those professional standards pertain to “Certain Convertible Instruments.” Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records, when necessary, deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, if an event is not within the entity’s control and may require a net cash settlement, then the contract shall be classified as an asset or a liability.

Revenue Recognition

Control Solutions International Inc.: CSI recognizes revenue primarily on a time and materials basis as the services are performed and amounts are earned. The Company considers amounts earned once evidence of an arrangement has been obtained, services are rendered, fees are fixed or determinable, and collectability is reasonably assured.

Revenue earned in excess of billings is recorded as unbilled accounts receivable until billed. Billings in excess of revenues earned are recorded as advanced billings until revenue recognition criteria are met. Deposits and prepayments from customers are carried as deferred revenue until the requirements for revenue recognition are met.

Reimbursements, including those relating to travel, other out-of-pocket expenses and third-party costs, are not included in revenue. They are applied to Cost of Services resulting in Cost of Services reflecting the net amount of expenses not reimbursed by clients.

Staffing 360 Solutions (UK) Limited: Staffing UK and its various subsidiaries, follow paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, and (ii) the services have been rendered to the customer, and (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

PeopleSERVE, Inc. and PeopleSERVE PRS, Inc.: PS recognizes revenue from the sale of staffing services as the services are performed, along with related labor costs and payroll taxes. The Company recognizes revenue for permanent employee placements when contractual contingencies, generally the passage of time, are satisfied. The Company's revenue recognition policies comply with ASC 605, "Revenue Recognition." The Company is the primary obligor in its transactions, and has responsibility for fulfillment, including the acceptability of services ordered and purchased by customers. In addition, the Company has all credit risk, retains substantially all risk and rewards of the services rendered, has sole discretion in staffing engagements and sets the billing rates of its consultants. Accordingly, the Company records all transactions at the gross revenue amount billed, consistent with the provisions of ASC 605. Typically, contracts require clients to pay for out-of-pocket expenses, principally travel related expenses. Accordingly, revenue includes amounts billed for these costs and the cost of revenue includes the corresponding actual costs. The Company provides certain customers a five percent (5.0%) discount on certain contracts if paid within thirty (30) days of the invoice date. Accounts receivable result from services provided to clients. The Company carries its accounts receivable at net realizable value. At the closing of the Company's fiscal period, a portion of receivables may not be invoiced. These unbilled receivables are typically billed within thirty (30) days of the close of the fiscal period.

Stock-Based Compensation

The Company accounts for stock-based instruments issued to employees in accordance with ASC Topic 718. ASC Topic 718 requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity based compensation issued to employees. The Company accounts for non-employee share-based awards in accordance with ASC Topic 505-50.

Earnings (Loss) per Common Share

The Company utilizes the guidance per FASB Codification ASC 260 - Earnings per Share (“ASC 260”). Basic earnings per share are calculated by dividing income available to stockholders by the weighted average number of common stock shares outstanding during each period. Diluted earnings per share are computed using the weighted average number of common stock shares and dilutive common share equivalents outstanding during the period. Dilutive common stock share equivalents consist of common shares issuable upon the conversion of convertible notes and the exercise of stock options and warrants (calculated using the modified treasury stock method). Such securities, shown below, presented on a common share equivalent basis and outstanding as of February 28, 2015 and 2014 have been excluded from the per share computations, since its inclusion would be anti-dilutive:

	For the Nine Months Ended February 28,	
	2015	2014
	(Unaudited)	(Unaudited)
Convertible bonds - Series A	470,334	-
Convertible bonds - Series B	833,794	-
Convertible promissory notes	696,453	1,655,000
Warrants	12,264,288	5,469,230
Options	2,425,000	1,750,000
Total	16,689,869	8,874,230

Property and Equipment

Property and equipment are stated at cost. Depreciation is computed on the straight-line method. The depreciation and amortization methods are designed to amortize the cost of the assets over their estimated useful lives, in years, of the respective assets as follows:

Edgar Filing: Staffing 360 Solutions, Inc. - Form 10-Q

Computers	3-5 years
Computer equipment	3-5 years
Network equipment	3-5 years
Software	3-5 years
Office equipment	3-7 years
Furniture and fixtures	3-7 years
Leasehold improvements	3-5 years

Amortization of leasehold improvements is computed using the straight-line method over the shorter of the life of the lease or the estimated useful life of the assets. Maintenance and repairs are charged to expense as incurred. Major improvements are capitalized. At the time of retirement or disposition of property and equipment, the cost and accumulated depreciation are removed from the accounts and any gains or losses are reflected in Other income/(loss).

Impairment of Long-Lived Assets

In accordance with ASC 360 - Property, Plant, and Equipment (“ASC 360”), the Company periodically reviews its long-lived assets, including goodwill and other intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The amount of impairment is measured as the difference between the estimated fair value and the book value of the underlying asset.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. ASC 350-30-35-4 requires that goodwill be tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis and between annual tests when circumstances indicate that the recoverability of the carrying amount of goodwill may be in doubt. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit. As of February 28, 2015 and May 31, 2014, the goodwill balance associated with the Cyber 360, Inc. and Control Solutions, Inc. acquisition was \$0 and \$2,700,255, respectively. The Company did not record any additional impairment of Goodwill during the nine (9) months ended February 28, 2015.

Intangible Assets

In connection with the CSI Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$912,000 representing trade name, customer relationships and employment agreements/non-competes. The assets were being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which was amortized over fifteen (15) years. CSI customer relationships were valued based on the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method resulted in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services’ calculations. The Company recorded amortization expense of \$91,099 and \$107,654 for the nine (9) months ended February 28, 2015 and the year ended May 31, 2014, respectively. During the quarter ended February 28, 2015, the Company recorded amortization expense of \$0. Based upon the impairment analysis performed as of May 31, 2014 and November 30, 2014, the Company impaired the trade name, customer relationships and employment agreements/non-competes in the amount of \$10,025 and \$703,222, respectively. The

intangible asset balance, net of impairment and accumulated amortization, at February 28, 2015 and May 31, 2014 was \$0 and \$794,321, respectively.

In connection with the acquisition of Staffing UK (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$10,311,465 representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. Staffing UK customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At February 28, 2015 and May 31, 2014, the intangible asset balance, net of accumulated amortization, was \$8,317,262 and \$9,599,250, respectively.

In connection with the Poolia Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$465,321 representing customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years. Poolia customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At February 28, 2015 and May 31, 2014, the intangible asset balance, net of accumulated amortization, was \$348,991 and \$436,238, respectively.

In connection with the acquisition of PeopleSERVE, Inc. and PeopleSERVE PRS, Inc. (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$2,999,100 representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. PS customer relationships were valued using the discounted replacement cost approach. This method is based on acquisition costs invested to attract each customer and relied on the actual selling costs incurred and allocated to new customer generation over the preceding four (4) years. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") No. 2014-15, ("ASU 2014-15"), "Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern". ASU 2014-15 requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued and provides guidance on determining when and how to disclose going concern uncertainties in the financial statements. Certain disclosures will be required if conditions give rise to substantial doubt about an entity's ability to continue as a going concern. ASU 2014-15 applies to all entities and is effective for annual and interim reporting periods ending after December 15, 2016, with early adoption permitted. The Company does not expect that the adoption of this standard will have a material effect on its financial statements.

In May 2014, the FASB issued ASU No. 2014-09 ("ASU 2014-09"), "Revenue from Contracts with Customers". The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 for public companies. Early adoption is not permitted. The standard permits the use of either a retrospective or modified retrospective (cumulative effect) transition method. The Company is currently evaluating the new guidance and has not determined the impact this standard may have on its financial statements nor decided upon the method of adoption.

In February 2015, the FASB issued new guidance to improve consolidation guidance for legal entities (Accounting Standards Update (“ASU”) 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*), effective for fiscal years beginning after December 15, 2015 and interim periods within those years and early adoption is permitted. The new standard is intended to improve targeted areas of the consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures. The amendments in the ASU affect the consolidation evaluation for reporting organizations. In addition, the amendments in this ASU simplify and improve current GAAP by reducing the number of consolidation models. The Company is currently evaluating the impact of this guidance on its consolidated financial statements.

In June 2014, the FASB issued new guidance on transfers and servicing ASU 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosure*, effective prospectively for fiscal years beginning after December 15, 2014 and interim periods within those years. The new guidance requires that repurchase-to-maturity transactions and repurchase financing arrangements be accounted for as secured borrowings and provides for enhanced disclosures, including the nature of collateral pledged and the time to maturity. Certain interim period disclosures for repurchase agreements and securities lending transactions are not required until the second quarter of 2015. The adoption of this new guidance will not have a material impact on the Company's consolidated financial statements.

The FASB has issued ASU No. 2014-12, *Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*. This ASU requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company has not yet determined the effect of the adoption of this standard and it is not expected to have a material impact on the Company's condensed consolidated financial position and results of operations.

Pursuant to the sale of Cyber 360, the Company agreed to continue as a guarantor on the accounts receivable financing facility between Sterling Bank and Cyber 360 until such time that it is paid in full, which is scheduled for April 28, 2015. All customer payments are required to be applied towards the outstanding balance and Cyber 360 is not allowed to make additional advances against this facility. Legal Proceedings

The Company is party to various legal proceedings, including those noted in this section. Although management at present believes that the ultimate outcome of these proceedings, individually and in the aggregate, are not probable to materially harm our financial position, results of operations, cash flows, or overall trends, legal proceedings are subject to inherent uncertainties, and unfavorable rulings or other events could occur. Unfavorable resolutions could include substantial monetary damages. Were unfavorable outcomes to occur, the possibility exists for a material adverse impact on our business, results of operations, financial position, and overall trends. The Company may also conclude that settling one or more such matters is in the best interests of our stockholders, employees, and customers, and any such settlement could include substantial payments. However, the Company has not reached this conclusion with respect to any particular matter at this time.

On May 22, 2014, NewCSI Inc. (“NCSI”), the former owners of Control Solutions International, filed a complaint in the United States District Court for the Western District of Texas, Austin Division, against the Company arising from the terms of the CSI Stock Purchase Agreement dated August 14, 2013. NCSI claims that the Company breached a provision of the CSI Stock Purchase Agreement which required the Company to calculate within 90 days after December 31, 2013 and pay to NCSI fifty percent (50%) of certain “Deferred Tax Assets”. The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the “Motion”). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint in which NCSI seeks up to \$154,433 of damages related to the Deferred Tax Assets and an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$1,670,635 at December 31, 2014. The earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company’s balance sheet as part of the purchase accounting at the time of the acquisition. The parties have completed fact discovery and are currently in expert discovery. On March 25, 2015, NCSI filed a Motion for Leave to File a Second Amended Complaint (the “Motion to Amend”) to assert a material breach based upon the termination of one of NCSI’s shareholders by the Company. The Company will oppose the Motion to Amend on the grounds that (a) the dispute must be arbitrated under the terms of the individual’s’ employment agreement; and (b) amendment should not be permitted on new grounds as fact discovery has closed in this case. On March 27, 2015, the Company filed a motion to disqualify NCSI’s proposed expert on Deferred Tax Assets. NCSI’s date to oppose is April 9, 2015 and to the best of our knowledge no opposition has been filed. The final pretrial conference in this matter will be held April 24, 2015. The Company believes that it acted in a manner consistent with our contractual rights, and intends to aggressively defend itself against this claim which is believed to be not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.

This resulted in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services’ calculations.

(See Note 14 - Acquisitions). See “Note 13 – Acquisitions” of the financial statements in the Company’s most recent Annual Report on Form 10-K, filed with the SEC on September 15, 2014, for a more complete description of this transaction.

Operating History:

To date, the Company has purchased six operating businesses: The Revolution Group, Control Solutions International, Inc., Staffing 360 Solutions (UK), Poolia (UK), PeopleSERVE, Inc., and forty-nine percent (49%) of PeopleSERVE, PRS Inc. Our business plan is to continue to grow the Company organically and to pursue acquisition prospects. The Company, less the discontinued operations of The Revolution Group, generated revenue of \$516,441, \$16,630,711 and \$96,640,920 for the nine (9) months ended February 28, 2013, 2014 and 2015, respectively. This growth has primarily been achieved through acquisitions, supplemented by organic growth. Our business plan is subject to certain inherent risks associated with a small, high-growth enterprise, including access to capital resources, execution risks, possible rejection of our business model and/or sales methods, and cost overruns.

Going concern:

The Company was presented as a development stage company through August 2012. Activities during the development stage included organizing the business and raising capital. In September 2012, Staffing Alliance commenced operations and the Company began to generate revenue in October 2012. In April 2013, Cyber 360, Inc. was purchased and began generating revenue. Cyber 360, Inc. was subsequently sold in January 2015. In November 2013, CSI was purchased and began generating revenue. In January 2014, Staffing UK was purchased and began generating revenue. In February 2014, Poolia UK commenced operations and began generating revenue. In May 2014, PeopleSERVE, Inc. and PeopleSERVE, PRS were purchased and began generating revenue. Since inception, the Company has been able to operate under a going concern audit opinion and meet its financial obligations. Since the Company has incurred losses and currently has negative working capital, these consolidated financial statements have been prepared on a going concern basis, which assumes these factors raise substantial doubt regarding the Company's ability to continue as a going concern and the outcome of these uncertainties cannot be predicted. Realization value may be substantially different from carrying values as shown and these consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary if the Company is unable to continue as a going concern. As of February 28, 2015, the Company had a working capital deficiency of \$7,876,112 and had an accumulated deficit of \$30,035,058. For the nine (9) months ended February 28, 2015, the Company had a net loss and net cash used in operations of \$13,697,940 and \$1,444,175, respectively. The continuation of the Company as a going concern is dependent upon the continued financial support from its major shareholders, the ability of the Company to obtain necessary financing to continue operations, and through profitable operations from existing subsidiaries and additional acquisitions. These factors raise substantial doubt regarding the Company's ability to continue as a going concern and the outcome of these uncertainties cannot be predicted.

On April 8, 2015, the Company entered into a new revolving credit facility in the amount of \$25 million and a \$3 million four (4) year term loan with MidCap Financial. The \$25 million revolving credit facility, with the option to accordion up to \$50 million, a replacement of the Company's previous Wells Fargo Bank \$15 million revolving credit facility, and is collateralized by the Company's accounts receivable. Effectively the new MidCap revolving credit facility increased the Company's cash availability materially through more favorably negotiated account eligibility criterion. Importantly, the larger facility provides the much needed additional borrowing capacity as the Company continues to expand and grow revenue. The Company used the proceeds to reduce its outstanding indebtedness, pay fees and costs associated with this capital transaction and provide for current and future working capital. (See Note 15 – Subsequent Events).

In addition, as a result of the aforementioned improvement in working capital and pursuant to a discussion with the Company's Independent Registered Accounting Firm ("Auditors"), subject to an audit of the Company's financial statements for the year end May 31, 2015, the Company believes that it has successfully mitigated any substantial doubt about its ability to continue as a going concern.

Currently, the Company does not have sufficient working capital to fund the continuation or expansion of its ongoing operations and obligations. The Company will need to raise additional capital to fund its operating expenses, pay its obligations, and acquire additional entities. In order to continue as a going concern and achieve a profitable level of operations, the Company will need, among other things, additional capital resources. Management's plan to continue as a going concern includes raising capital through additional debt and equity financings to fund working capital and additional acquisitions, increasing gross margin by driving organic revenue growth and strategic acquisitions, and reducing operating and overhead costs. The Company anticipates it will require \$1.5 million over the next twelve (12) months for working capital purposes. However, management cannot provide any assurances that the Company will be successful in accomplishing any of its plans. The ability of the Company to continue as a going concern is dependent upon management's ability to successfully secure additional sources of financing and attain profitable operations. Further, management cannot provide any assurance that unforeseen circumstances that may occur at any time within the next twelve (12) months or thereafter will not increase the need to raise additional capital on an immediate basis. These matters raise substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

Through February 28, 2015, the Company raised capital by conducting financings through debt and equity transactions as follows:

Restructuring Plan and Implementation:

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, the forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company's working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its Board of Directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the Board of Directors on September 3, 2014. While management plans to pursue each of the initiatives of the Restructuring Plan, some of the initiatives are contingent upon third parties' acceptance of the restructuring terms and may not be fully achieved.

Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties' acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, *the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods.* The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes Payable and Other Debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes Payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$2,994,202 in principal and interest to 3,290,446 common stock shares and 3,619,490 warrants exercisable for a term of ten (10) years at \$1.25. This action is anticipated to reduce the Company's future cash outflows by approximately \$871,000 in the calendar year of 2015, and by a further \$2,265,723 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$1.50 to \$1.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert their principal and interest to common stock and/or warrants on or before the maturity date of October 15, 2014,

rather than redeem for cash; Bonds totaling \$3,709,655 in principal and interest were converted to 3,370,687 common stock shares and 1,854,859 warrants exercisable for a term of three (3) years at \$2.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds from \$1.50 to \$1.00.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$1.50 to \$1.20 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest to common stock by the maturity date of September 15, 2015, rather than redeem for cash. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds.

Earn-out Liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360 effective January 1, 2015, Inc., the former shareholders of TRG were offered the opportunity and elected to convert their remaining earn-out liability of \$1,134,050 into common stock shares at \$1.00 per share. As a result, the Company issued 1,134,050 common stock shares and recorded a gain on conversion of earn-out of \$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*. These amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

Consulting Agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's future cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with some employees. The measurement date to record the expense was the date upon which the Company agreed to sever employment; The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually.

Restructuring Fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs. Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$123,334 and are properly classified in Professional fees - Restructuring.

Results of Operations:

For the three (3) months ended February 28, 2015 as compared to the three (3) months ended February 28, 2014

The Company is still in the early stages of its development and continues to fully integrate the five (5) staffing acquisitions. As a result of the integration, the Company generated a loss of \$80,789 for the three (3) months ended February 28, 2015 of which \$771,223 relates to non-cash amortization and depreciation charges.

The Company generated \$30,963,598 in revenue for the three (3) months ended February 28, 2015, which is consistent with what is expected on a seasonally adjusted quarterly basis going forward prior to any incremental amount from additional acquisitions. The Company believes the majority of acquisitions consummated during fiscal year 2014 are performing as expected or better. We believe that as these businesses continue to grow they will allow us to attract additional acquisitions in line with our stated strategic plan of achieving \$300 million in annualized revenue.

The Company is vigilantly managing its operations and has developed a “Pathway to Profitability” program that is being constantly monitored. This Pathway to Profitability includes overhead control, operational reviews, cash management, adequate capitalization and our mergers and acquisitions program. Young, high-growth, consolidation companies often confront struggles with integration and financing. We have invested for our future by building a strong industry-experienced corporate team which allows for stronger financial reporting, compliance and commercial management. This investment has contributed to our losses up to this point in time but we believe we will not need material additions to this team as we grow, either organically or through acquisitions.

The following table sets forth the results of operations for the three (3) months ended February 28, 2015 and 2014:

The Company believes the acquisitions consummated during fiscal year 2014 are performing as expected or better. We believe that as these businesses continue to grow that they will allow us to attract additional acquisitions in line with our stated strategic plan of achieving \$300 million in annualized revenue.

The Company is vigilantly managing its operations and has developed a "Pathway to Profitability" program that is being constantly monitored. This Pathway to Profitability includes overhead control, operational reviews, cash management, adequate capitalization and our mergers and acquisitions program. Young, high-growth, consolidation companies often confront struggles with integration and financing. We have invested for our future by building a strong industry-experienced corporate team which allows for stronger financial reporting, compliance and commercial management. This investment has contributed to our losses up to this point in time but we believe we will not need material additions to this team as we grow, either organically or through acquisitions.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. We have been funding our operations through promissory notes, the sale of the Company's common stock through private offerings and from loans from our majority shareholders/officers/directors.

Beginning in 2013, the Company acquired six (6) businesses that began generating revenue for the Company. These acquisitions are as follows: i) Cyber 360, Inc. in April 2013 (subsequently sold in January 2015), ii) CSI in November 2013, iii) Staffing UK in January 2014, iv) Poolia UK in February 2014, and v) PeopleSERVE, Inc. in May 2014, and vi) PeopleSERVE PRS, Inc. in May 2014. Since the Company has incurred losses and currently has negative working capital, these consolidated financial statements have been prepared on a going concern basis, which implies the Company will continue to meet its obligations and continue its operations for the next fiscal year. Realization value may be substantially different from carrying values as shown and these consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary if the Company is unable to continue as a going concern. As of February 28, 2015, the Company had a working capital deficiency of \$7,876,112, an accumulated deficit of \$30,035,058, a net loss of \$13,697,940, and net cash used in operations of \$1,444,175. The continuation of the Company as a going concern is dependent upon the continued financial support from its major shareholders, the ability of the Company to obtain necessary financing to continue operations, and profitable operations from existing subsidiaries and the acquisition of additional accretive and positive cash flowing entities.

On April 8, 2015, the Company entered into a new revolving credit facility in the amount of \$25 million and a \$3 million four (4) year term loan with MidCap Financial. The \$25 million revolving credit facility, with the option to accordion up to \$50 million, a replacement of the Company's previous Wells Fargo Bank \$15 million revolving credit facility, and is collateralized by the Company's accounts receivable. Effectively the new MidCap revolving credit facility increased the Company's cash availability materially through more favorably negotiated account eligibility criterion. Importantly, the larger facility provides the much needed additional borrowing capacity as the Company continues to expand and grow revenue. The Company used the proceeds to reduce its outstanding indebtedness, pay fees and costs associated with this capital transaction and provide for current and future working capital. (See Note 15 – Subsequent Events).

Our primary uses of cash have been expended in growing the business, implementing our business plan and funding operations. The following trends are reasonably likely to result in a material decrease in our liquidity over the near to long term:

- An increase in working capital requirements to finance targeted acquisitions, and

- Addition of administrative and sales personnel as the business grows, and

- Increases in advertising, public relations and sales promotions as we expand within existing markets or enters new markets, and

- The cost of being a public company, and

- Capital expenditures to add technologies.

We believe that we have the ability to generate adequate working capital necessary for on-going operations and obligations. However, we do not have sufficient working capital to fund our aggressive growth program. We will need to raise additional capital to fund our mergers and acquisition activity. Therefore, executing on our future publicly disclosed objective of achieving revenue of \$300 million over the next couple of years will be dependent on our ability to secure additional financing. We estimate that based on current plans and assumptions, that our available cash will be sufficient to satisfy our cash requirements under our present operating expectations, without further financing, for to the next twelve (12) months. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. However, the trading price of our common stock and a downturn in the U.S. equity and debt markets could make it more difficult to obtain financing through the issuance of equity or debt securities. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. As of February 28, 2015, dilutive common share equivalents totaling 16,689,869 common stock shares consisting of common stock shares issuable upon the conversion of existing convertible notes and the exercise of stock options and warrants. If we are unable to obtain additional financing, we will likely be required to curtail our marketing and development plans and possibly cease our operations.

We anticipate that depending on market conditions and our current state of operations, we may incur additional operating losses in the future. Therefore, our auditors have raised substantial doubt about our ability to continue as a going concern.

Our liquidity may be negatively impacted by the significant costs associated with our public company reporting requirements, costs associated with newly applicable corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and other rules implemented by the Securities and Exchange Commission. We expect all of these applicable rules and regulations to significantly increase our legal and financial compliance costs and to make some activities more time consuming and costly.

Critical Accounting Policies and Estimates

Our significant accounting policies are fully described in Note 3 to our unaudited consolidated financial statements for the fiscal quarter ended February 28, 2015 contained herein.

Recent Accounting Pronouncements

Accounting standards that have been issued or proposed by FASB that do not require adoption until a future date are not expected to have a material impact on the financial statement presentation or disclosure upon adoption.

In August 2014, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") No. 2014-15, ("ASU 2014-15"), "Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern". ASU 2014-15 requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued and provides guidance on determining when and how to disclose going concern uncertainties in the financial statements. Certain disclosures will be required if conditions give rise to substantial doubt about an entity's ability to continue as a going concern. ASU 2014-15 applies to all entities and is effective for annual and interim reporting periods ending after December 15, 2016, with early adoption permitted. The Company does not expect that the adoption of this standard will have a material effect

on its financial statements.

In May 2014, the FASB issued ASU No. 2014-09 (“ASU 2014-09”), “Revenue from Contracts with Customers”. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 for public companies. Early adoption is not permitted. The standard permits the use of either a retrospective or modified retrospective (cumulative effect) transition method. The Company is currently evaluating the new guidance and has not determined the impact this standard may have on its financial statements nor decided upon the method of adoption.

In February 2015, the FASB issued new guidance to improve consolidation guidance for legal entities (Accounting Standards Update (“ASU”) 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*), effective for fiscal years beginning after December 15, 2015 and interim periods within those years and early adoption is permitted. The new standard is intended to improve targeted areas of the consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures. The amendments in the ASU affect the consolidation evaluation for reporting organizations. In addition, the amendments in this ASU simplify and improve current GAAP by reducing the number of consolidation models. The Company is currently evaluating the impact of this guidance on its consolidated financial statements.

In June 2014, the FASB issued new guidance on transfers and servicing ASU 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosure*, effective prospectively for fiscal years beginning after December 15, 2014 and interim periods within those years. The new guidance requires that repurchase-to-maturity transactions and repurchase financing arrangements be accounted for as secured borrowings and provides for enhanced disclosures, including the nature of collateral pledged and the time to maturity. Certain interim period disclosures for repurchase agreements and securities lending transactions are not required until the second quarter of 2015. The adoption of this new guidance will not have a material impact on the Company's consolidated financial statements.

The FASB has issued ASU No. 2014-12, *Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*. This ASU requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company has not yet determined the effect of the adoption of this standard and it is not expected to have a material impact on the Company's condensed consolidated financial position and results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Smaller reporting companies are not required to provide the information required by this item.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act (defined below)). Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were not effective to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the required time periods and is accumulated and communicated to our

management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Change in Internal Control over Financial Reporting.

In addition, our management with the participation of our Principal Executive Officer and Principal Financial Officer have determined that no change in our internal control over financial reporting occurred during or subsequent to the quarter ended February 28, 2015 that has materially affected, or is (as that term is defined in Rules 13(a)-15(f) and 15(d)-15(f) of the Securities Exchange Act of 1934) reasonably likely to materially affect, our internal control over financial reporting.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting.

In its assessment of the effectiveness of internal control over financial reporting as of February 28, 2015, the Company determined that there were control deficiencies that constituted material weaknesses, as described below:

- 1) Inadequate segregation of duties, and
- 2) Inadequate procedures to test internal controls.

As of the date of filing of this Report, the Company does not intend to remedy the foregoing and therefore such material weaknesses in our control environment and financial reporting process will continue. A system of controls, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

PART II-OTHER INFORMATION

Item 1. Legal Proceedings

The Company is party to various legal proceedings, including those noted in this section. Although management at present believes that the ultimate outcome of these proceedings, individually and in the aggregate, are not probable to materially harm our financial position, results of operations, cash flows, or overall trends, legal proceedings are subject to inherent uncertainties, and unfavorable rulings or other events could occur. Unfavorable resolutions could include substantial monetary damages. Were unfavorable outcomes to occur, the possibility exists for a material adverse impact on our business, results of operations, financial position, and overall trends. We might also conclude that settling one or more such matters is in the best interests of our stockholders, employees, and customers, and any such settlement could include substantial payments. However, we have not reached this conclusion with respect to any particular matter at this time.

On May 22, 2014, NewCSI Inc. (“NCSI”), the former owners of Control Solutions International, filed a complaint in the United States District Court for the Western District of Texas, Austin Division, against the Company arising from the terms of the CSI Stock Purchase Agreement dated August 14, 2013. NCSI claims that the Company breached a provision of the CSI Stock Purchase Agreement which required the Company to calculate within 90 days after December 31, 2013 and pay to NCSI fifty percent (50%) of certain “Deferred Tax Assets”. The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the “Motion”). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint in which NCSI seeks up to \$154,433 of damages related to the Deferred Tax Assets and an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$1,670,635 at December 31, 2014. The earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company’s balance sheet as part of the purchase accounting at the time of the acquisition. The parties have completed fact discovery and are currently in expert discovery. On March 25, 2015, NCSI filed a Motion for Leave to File a Second Amended Complaint (the “Motion to Amend”) to assert a material breach based upon the termination of one of NCSI’s shareholders by the Company. The Company will oppose the Motion to Amend on the grounds that (a) the dispute must be arbitrated under the terms of the individual’s’ employment agreement; and (b) amendment should not be permitted on new grounds as fact discovery has closed in this case. On March 27, 2015, the Company filed a motion to disqualify NCSI’s proposed expert on Deferred Tax Assets; NCSI’s date to oppose is April 9, 2015. The final pretrial conference in this matter will be held April 22, 2015. We believe that the Company acted in a manner consistent with our contractual rights, and we intend to aggressively defend the Company against this claim which we believe is not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.

On February 5, 2015, the Company issued an eight percent (8%) promissory note in the amount of \$204,000 due in nine (9) months, with the conversion feature commencing 180 days after the loan issuance date. The loan is convertible at a 39% discount of the average share price on the lowest three (3) trading prices during the ten (10) days prior to conversion. These shares will be issued upon the Compensation Committee’s designation of all of the rights and preferences of the Preferred Stock and the filing of the same with the Nevada Secretary of State.
