Cautionary Statement Regarding Forward Looking Statements

This Quarterly Report on Form 10-Q for the period ended September 30, 2015 (this “Report”) contains forward-looking statements intended to qualify for the safe harbor contained in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements often include words such as “may,” “will,” “should,” “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “seek,” “would,” “could,” and similar words or expressions and are made in connection with discussions of future operating or financial performance.

Forward-looking statements reflect our management’s expectations at the date of this Report regarding future conditions, events or results. They are not guarantees of future performance. By their nature, forward-looking statements are subject to risks and uncertainties. Our actual results and financial condition may differ materially from what is anticipated in the forward-looking statements. There are many factors that could cause actual conditions, events or results to differ from those anticipated by the forward-looking statements contained in this Report. They include the factors discussed in Part 1, Item 1A. “Risk Factors” of the Company’s Annual Report on Form 10-K for the year ended December 31, 2014 (“2014 Form 10-K”).

Readers are cautioned not to place undue reliance on forward-looking statements in this Report or that we make from time to time, and to consider carefully the factors discussed in Part I, Item 1A. “Risk Factors” of the 2014 Form 10-K in evaluating these forward-looking statements. We have not undertaken to update any forward-looking statements.

MMA Capital Management, LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1— DESCRIPTION OF THE BUSINESS AND BASIS OF PRESENTATION

MMA Capital Management, LLC, the registrant, was organized in 1996 as a Delaware limited liability company. When used in this Quarterly Report on Form 10-Q for the period ended September 30, 2015 (this “Report”), the “Company,” “MMA,” “we,” “our,” or “us” may refer to the registrant, the registrant and its subsidiaries, or one or more of the registrant’s subsidiaries depending on the context of the disclosure.

Description of the Business

The Company uses its experience and expertise to partner with institutional capital to create attractive and impactful alternative investment opportunities, to manage them well and to report on them effectively. Beginning in 2015, the Company operates through three reportable segments – United States (“U.S.”) Operations, International Operations and Corporate Operations.

U.S. Operations

Our U.S. Operations consists of three business lines: Leveraged Bonds, Low-Income Housing Tax Credits (“LIHTCs”) and Other Investments and Obligations.

The Leveraged Bonds business line finances affordable housing and infrastructure in the U.S. This business line manages the vast majority of the Company’s bonds and bond related investments (“bonds”) and associated financings. The bond portfolio is comprised primarily of multifamily tax-exempt bonds, but also includes other real estate related bond investments.

Our LIHTC business consists primarily of a secured subordinate loan receivable from Morrison Grove Management, LLC (“MGM”) and an option to purchase MGM beginning in 2019.

The Other Investments and Obligations business line includes legacy assets targeted for eventual disposition and serves as our research and development unit for new business opportunities in the U.S., which has resulted in the creation of a renewable energy finance business that operates as MMA Energy Capital, LLC (“MEC”).

International Operations

We manage our International Operations through a wholly owned subsidiary, International Housing Solutions S.à r.l. (“IHS”). IHS’s strategy is to raise, invest in, and manage private real estate funds. IHS currently manages three funds: the South Africa Workforce Housing Fund (“SAWHF”), which is a multi-investor fund and is fully invested; IHS Residential Partners I, which is a single-investor fund targeted at the emerging middle class in South Africa; and IHS Fund II, which is a multi-investor fund targeting investments in affordable housing, including green housing projects, within South Africa and Sub-Saharan Africa. During the second quarter of 2015, IHS and a South African property management company formed a company in South Africa, IHS Property Management Proprietary Limited (“IHS PM”), to provide property management services to the properties of IHS-managed funds. IHS owns 60% of IHS PM and the third party property manager owns the remaining 40%.

Corporate Operations

Our Corporate Operations segment is responsible for accounting, reporting, compliance and planning, which are fundamental to our success as a global fund manager and publicly traded company in the U.S.

Use of Estimates

The preparation of the Company’s financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, commitments and contingencies, and revenues and expenses. Management has made significant estimates in certain areas, including the determination of fair values for bonds, derivative financial instruments, guarantee obligations, and certain assets and liabilities of consolidated funds and ventures (“CFVs”). Management has also made significant estimates in the determination of impairment on bonds and real estate investments. Actual results could differ materially from these estimates.

Basis of Presentation and Significant Accounting Policies

The consolidated financial statements include the accounts of the Company and of entities that are considered to be variable interest entities in which the Company is the primary beneficiary, as well as those entities in which the Company has a controlling financial interest, including wholly owned subsidiaries of the Company. All intercompany transactions and balances have been eliminated in consolidation. Equity investments in unconsolidated entities where the Company has the ability to exercise significant influence over the operations of the entity, but is not considered the primary beneficiary, are accounted for using the equity method of accounting.

New Accounting Guidance

Accounting for Consolidation

In February 2015, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2015-02, “Consolidation (Topic 810): Amendments to the Consolidation Analysis,” which amends current guidance related to the consolidation of legal entities such as limited partnerships, limited liability corporations and securitization structures. The guidance removed the specialized consolidation model surrounding limited partnerships and similar entities and amended the requirements that such entities must meet to qualify as voting interest entities. In addition, the guidance eliminated certain of the conditions for evaluating whether fees paid to a decision maker or service provider represented a variable interest. The new guidance is effective for us on January 1, 2016 with early adoption permitted. The Company is currently evaluating the potential impact of the new guidance on our consolidated financial statements.

Accounting for Debt Issuance Costs

On April 7, 2015, the Company adopted ASU No. 2015-03, “Interest – Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs.” This guidance provides an amendment to the accounting guidance related to the presentation of debt issuance costs and is effective for fiscal years beginning after December 15, 2015 with early adoption allowed. This guidance is applied retrospectively to all prior periods. Under the new guidance, debt issuance costs related to a note shall be reported in the Consolidated Balance Sheets as a direct deduction from the face amount of that note. In this regard, debt issuance costs shall not be classified separately from related debt obligations as a deferred charge. Therefore, as a result of adopting this guidance, the Company reclassified in its Consolidated Balance Sheets \$2.9 million of debt issuance costs at December 31, 2014, from “Other Assets” to “Debt,” thereby decreasing the carrying value of our recognized debt obligations for presentational purposes.

NOTE 2—BONDS AVAILABLE-FOR-SALE

Bonds Available-for-Sale

The Company's bond portfolio is comprised primarily of multifamily tax-exempt bonds, but also includes other real estate related bond investments.

Multifamily tax-exempt bonds are issued by state and local governments or their agencies or authorities to finance multifamily rental housing; typically however, the only source of recourse on these bonds is the collateral, which is either a first mortgage or a subordinate mortgage on the underlying properties.

The Company's investments in other real estate related bonds include municipal bonds that are issued to finance the development of community infrastructure that supports mixed-use and commercial developments and that are secured by incremental tax revenues generated from the development. Investments in other real estate related bonds also include senior investments in a trust collateralized by a pool of tax-exempt municipal bonds that finance a variety of non-profit projects such as hospitals, healthcare facilities, charter schools and airports, as well as a subordinate investment in a collateralized mortgage backed security that finances multifamily housing.

The weighted average pay rate on the Company's bond portfolio was 5.5% and 5.2% at September 30, 2015 and December 31, 2014, respectively. Weighted average pay rate represents the cash interest payments collected on the bonds as a percentage of the bonds' average unpaid principal balance ("UPB") for the preceding 12 months for the population of bonds at September 30, 2015 and December 31, 2014, respectively.

The following tables provide information about the UPB, amortized cost, gross unrealized gains, gross unrealized losses and fair value (“FV”) associated with the Company’s investments in bonds that are classified as available-for-sale:

(in thousands)	At September 30, 2015		Gross	Gross	Fair Value	FV as a % of UPB

(2) At December 31, 2014, \$0.6 million represents the non-credit loss component for certain unrealized losses deemed to be OTTI and \$0.3 million represents unrealized losses that were not considered OTTI.

(3) Comprised of bonds in a gross unrealized loss position for less than 12 consecutive months that had a fair value of \$1.8 million at December 31, 2014, as well as bonds in a gross unrealized loss position for more than 12 consecutive months that had a fair value of \$6.0 million at December 31, 2014.

See Note 9, “Fair Value Measurements,” which describes factors that contributed to the \$4.8 million decrease in the reported fair value of the Company’s bond portfolio during the nine months ended September 30, 2015.

Maturity

Principal payments on the Company's investments in bonds are based on contractual terms that are set forth in the offering documents for such investments. If principal payments are not required to be made prior to the contractual maturity of a bond, its UPB is required to be paid in a lump sum payment at contractual maturity or at such earlier time as may be provided under the offering documents. At September 30, 2015, six bonds (that have a combined amortized cost of \$15.0 million and combined fair value of \$24.9 million) were non-amortizing with principal due in full between November 2044 and August 2048. The remaining bonds are amortizing with stated maturity dates between September 2017 and June 2056.

Bonds with Prepayment Features

The contractual terms of substantially all of the Company's investments in bonds include provisions that permit the bonds to be prepaid at par after a specified date that is prior to the stated maturity date. The following table provides information about the UPB, amortized cost and fair value of the Company's investments in bonds that were prepayable at par at September 30, 2015, as well as stratifies such information for the remainder of the Company's investments based upon the periods in which such instruments become prepayable at par:

Non-Accrual Bonds

The fair value of the Company's investments in bonds that were on non-accrual status was \$40.5 million and \$43.6 million at September 30, 2015 and December 31, 2014, respectively. During the period in which such bonds were on non-accrual status, the Company recognized interest income on a cash basis of \$0.4 million and \$3.4 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.2 million and \$4.6 million for the nine months ended September 30, 2015 and 2014, respectively. Interest income not recognized during the period in which these investments in bonds were on non-accrual status was \$0.4 million and \$0.9 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.3 million and \$2.3 million for the nine months ended September 30, 2015 and 2014, respectively.

NOTE 3—INVESTMENTS IN PREFERRED STOCK

The Company's investments in preferred stock are prepayable at any time and represent an interest in a private national mortgage lender and servicer that specializes in affordable and market rate multifamily housing, senior housing and healthcare. At September 30, 2015, the carrying value of the Company's investments in preferred stock was \$31.4 million and the UPB and estimated fair value was \$36.6 million with a weighted average pay rate of 14.4%. The Company accounts for its investment in preferred stock using the cost method of accounting and tests such investment for impairment at each balance sheet date. The Company did not recognize any impairment losses associated with its investment in preferred stock for the nine months ended September 30, 2015 and 2014.

As of September 30, 2015, a significant portion of our investment in preferred stock (\$25.0 million) was the referenced asset in two total return swap agreements that expire on March 31, 2016.

On October 30, 2015, the Company's investments in preferred stock were fully redeemed by the issuer at a par value of \$36.6 million and, as a result, the Company terminated the two aforementioned total return swaps and will recognize a gain of \$5.2 million during the fourth quarter of 2015. Refer to Note 6, "Debt," for more information.

Investments in U.S. Real Estate Partnerships

At September 30, 2015, \$16.3 million of the reported carrying value of investments in U.S. real estate partnerships pertains to an equity investment made by the Company in a real estate venture that was formed during the fourth quarter of 2014. The Company accounts for this investment using the equity method of accounting. The Company made an initial contribution of \$8.8 million, which represented 80% of the real estate venture's initial capital. The Company has rights to a preferred return on its capital contribution, as well as rights to share in excess cash flows of the real estate venture.

At September 30, 2015, the majority of the remaining balance (\$6.1 million) of investments in U.S. real estate partnerships pertains to an equity investment that represents a 33% ownership interest in a partnership that was formed to take a deed-in-lieu of foreclosure on land that was collateral for a loan held by the Company. The Company accounts for this investment using the equity method of accounting.

The following table provides information about the total assets and liabilities of the U.S. real estate partnerships in which the Company held an equity investment:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Total assets	\$ 86,018	\$ 83,021
Total liabilities	39,222	34,856

Investments in IHS-managed Funds

At September 30, 2015, the Company held equity co-investments in three IHS-managed funds (SAWHF, IHS Residential Partners I and IHS Fund II) that range from a 1.8% to a 4.25% ownership interest in such funds. IHS provides asset management services to each of these investment vehicles in return for asset management fees. For each investment vehicle, IHS also has rights to investment returns on its equity co-investment as well as has rights to an allocation of profits from such funds (the latter of which is often referred to as “carried interest”), which is contingent upon the investment returns generated by each investment vehicle.

The Company accounts for its interest in SAWHF, IHS Residential Partners I and IHS Fund II as equity investments using the equity method of accounting. At September 30, 2015, the carrying basis of the Company’s equity investment in SAWHF, IHS Residential Partners I and IHS Fund II was \$1.5 million, \$1.5 million and \$39,118, respectively.

The Company recognizes an impairment loss for equity method investments when evidence demonstrates that the loss is other-than-temporary. During the third quarter of 2015, the Company assessed that its co-investment in SAWHF

was other-than-temporarily impaired and recognized a loss of \$1.6 million in its Consolidated Statements of Operations as a component of "Other expenses" as a result of adjusting the carrying value of such investment to its fair value.

The following table provides information about the carrying value of total assets (primarily real estate) and liabilities of the three IHS-managed funds in which the Company held an equity investment:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Total assets	\$ 251,790	\$ 276,007
Total liabilities	103,449	104,863

The table that follows below provides information about the net (loss) income recognized by the Company in connection with its equity investments in the three IHS-managed funds. However, the net loss that was recognized for the three months and nine months ended September 30, 2014 was related only to IHS Residential Partners I since, during such reporting periods, no capital had been called for IHS Fund II and SAWHF was consolidated by the Company for reporting purposes (such that its equity investment in SAWHF was eliminated for reporting purposes in consolidation).

Investment in a Solar Joint Venture

On July 15, 2015, the Company entered into a joint venture with a third party to provide capital for the development and construction of solar power projects throughout the U.S. (hereinafter, the “Solar Joint Venture”). The Company is primarily responsible for the day-to-day management and operation of the Solar Joint Venture and day-to-day oversight of its investments. In return for providing this service, the Company receives an administrative member cost reimbursement fee that is recognized in the Consolidated Statements of Operations as a component of “Asset management fees and reimbursements.” The Company’s initial capital commitment was \$25.0 million, which represented a 50% ownership interest in the Solar Joint Venture. As of September 30, 2015, the Company had contributed \$25.0 million in capital to the Solar Joint Venture. The Company accounts for its investment in the Solar Joint Venture using the equity method of accounting.

On October 28, 2015, the Operating Agreement of the Solar Joint Venture was amended to increase the capital commitment for each member to \$50.0 million.

The following table provides information about the carrying amount of total assets (primarily cash and solar construction and development loans) and liabilities of the Solar Joint Venture in which the Company held an equity investment at September 30, 2015:

	At September 30, 2015	At December 31, 2014

Loans Held for Investment

We report the carrying value of loans that are held for investment ("HFI") at their UPB, net of unamortized premiums, discounts and other cost basis adjustments and related allowance for loan losses.

The following table provides information about the amortized cost and allowance for loan losses that was recognized in the Company's Consolidated Balance Sheets related to loans that it classified as HFI:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Amortized cost	\$ 9,233	\$ 40,163
Allowance for loan losses	(751)	(17,771)
Loans held for investment, net	\$ 8,482	\$ 22,392

At September 30, 2015 and December 31, 2014, HFI loans had an UPB of \$9.5 million and \$40.9 million, respectively, as well as deferred fees and other basis adjustments of \$0.3 million and \$0.7 million, respectively.

At September 30, 2015 and December 31, 2014, HFI loans that were specifically impaired had an UPB of \$1.1 million and \$18.4 million, respectively, and were not accruing interest. The carrying value for HFI loans on non-accrual status was \$0.3 million at September 30, 2015 and December 31, 2014.

At September 30, 2015 and December 31, 2014, no HFI loans that were 90 days or more past due related to scheduled principal or interest payments were still accruing interest.

At September 30, 2015, the Company had a \$13.0 million subordinate loan receivable relating to the seller financing previously provided to MGM. This loan is not recognized for financial statement purposes because the conveyance of the Company's LIHTC business to MGM was not reported as a sale. Interest collected during the three months and nine months ended September 30, 2015 on the seller financing was \$0.4 million and \$1.0 million, respectively, which was recorded as a deferred gain through "Other liabilities."

At September 30, 2015, the cumulative amount of the deferred gain on the seller financing, which is recognized in the Consolidated Balance Sheets as a component of "Other Liabilities," was \$4.3 million (\$2.9 million of principal collected and \$1.4 million of interest collected).

Loans Held for Sale

At September 30, 2015, loans held for sale (“HFS”) primarily included five solar loans. These loans were conveyed to the Solar Joint Venture during the third quarter of 2015 at par value, thereby generating cash proceeds of \$7.2 million. However, such conveyance was treated as a secured borrowing for reporting purposes. See Note 6, “Debt” for more information.

At September 30, 2015, there were no solar loans that were 90 days or more past due, and there were no solar loans that were placed on non-accrual status.

The Company recognized interest income on its solar loans of \$0.2 million and \$0.3 million for the three and nine months ended September 30, 2015, respectively.

Unfunded Loan Commitments

The Company had no unfunded loan commitments at September 30, 2015 and December 31, 2014.

Real Estate Owned

The following table provides information about the carrying value of the Company's real estate owned:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Real estate held for sale	\$	\$ 10,145
Real estate held for use	2,619	18,417
Total real estate	\$ 2,619	\$ 28,562

During the third quarter of 2015, the Company sold undeveloped land that was classified as HFS and recognized a gain on sale of \$4.3 million in its Consolidated Statements of Operations.

Asset Management Fees and Reimbursements Receivable

At September 30, 2015, the Company had \$3.0 million of recognized asset management fees and reimbursements receivables recognized in its Consolidated Balance Sheets, of which \$2.7 million was due from IHS-managed funds and ventures.

Derivative Assets

At September 30, 2015, the Company had \$3.6 million of recognized derivative assets. See Note 7, "Derivative Financial Instruments," for more information.

Solar Facilities

At September 30, 2015, the Company owned five solar facilities that were classified as HFS and had a carrying value of \$2.5 million. These facilities generate energy that is sold under long-term power purchase agreements to the owner

or lessee of the properties on which the projects are built.

(1) Asset related debt is debt that finances interest-bearing assets and the interest expense from this debt is recognized in "Net interest income" on the Consolidated Statements of Operations. Other debt is debt which does not finance interest-bearing assets and the interest expense from this debt is included in "Interest expense" under "Operating and other expenses" on the Consolidated Statements of Operations.

(2)

Included in notes payable and other debt – bond related were unamortized debt issuance costs of \$0.1 million and less than \$0.1 million at September 30, 2015 and December 31, 2014, respectively.

- (3) The subordinate debt balances include a net adjustment of \$9.3 million and \$7.2 million at September 30, 2015 and December 31, 2014, respectively. These adjustments were comprised of net premiums due to effective interest adjustments of \$12.0 million and \$10.1 million at September 30, 2015 and December 31, 2014, respectively, offset by debt issuance costs of \$2.7 million and \$2.8 million at September 30, 2015 and December 31, 2014, respectively.

Covenant Compliance and Debt Maturities

At September 30, 2015, the Company was not in default under any of its debt obligations.

Asset Related Debt

Notes Payable and Other Debt – Bond Related

These debt obligations pertain to bonds that are classified as available-for-sale and that were financed by the Company through total return swaps. That is, in such transactions, the Company conveyed its interest in investments in bonds to a counterparty in exchange for cash consideration while simultaneously executing total return swaps with the same counterparty for purposes of retaining the economic risks and returns of such investments. The conveyance of the Company's interest in bonds was treated for reporting purposes as a secured borrowing while total return swaps that were executed simultaneously with such conveyance did not receive financial statement recognition since such derivative instruments caused the conveyance of the Company's interest in these bonds not to qualify for sale accounting treatment.

Under the terms of the total return swaps, the counterparty is required to pay the Company an amount equal to the interest payments received on the underlying bonds (UPB of \$80.4 million with a weighted average pay rate of 5.7%

at September 30, 2015). The Company is required to pay the counterparty a rate of Securities Industry and Financial Markets Association (“SIFMA”) 7-day municipal swap index plus a spread on the total return swaps (notional amount of \$89.6 million with a weighted average pay rate of 1.3% at September 30, 2015). The Company uses this pay rate on executed total return swaps to accrue interest on its secured borrowing obligations to its counterparty.

Interest expense on notes payable and other debt – bond related totaled \$1.0 million and \$2.1 million for the nine months ended September 30, 2015 and 2014, respectively.

Notes Payable and Other Debt – Non-Bond Related

At September 30, 2015, notes payable and other debt – non-bond related consisted primarily of the debt obligation that the Company recognized in connection with a conveyance of five solar loans to the Solar Joint Venture during the third quarter of 2015 that did not qualify for sale accounting treatment.

Interest expense on notes payable and other debt – non-bond related totaled \$0.6 million for the nine months ended September 30, 2015 and 2014.

Other Debt

Subordinate Debt

The table below provides information about the key terms of the subordinate debt that was issued by MMA Financial Inc. (“MFI”) and MMA Financial Holdings, Inc. (“MFH”) and that was outstanding at September 30, 2015:

(dollars in thousands)	Principal	Net Premium and Debt Issuance Costs	Carrying Value	Interim Principal Payments	Maturity Date	Coupon
MFI	\$ 28,106	\$ (165)	\$ 27,941	Amortizing	December 2027 and December 2033	8.00%

MFH	25,744	2,637	28,381	Amortizing	April 30, 2035	3-month LIBOR plus 2.0%
MFH	14,840	1,399	16,239	Amortizing	July 30, 2035	3-month LIBOR plus 2.0%
MFH	26,981	2,545	29,526	Amortizing	July 30, 2035	3-month LIBOR plus 2.0%
	\$ 123,983	\$ 9,303	\$ 133,286			

Interest expense on the subordinate debt totaled \$5.0 million and \$7.7 million for the nine months ended September 30, 2015 and 2014, respectively.

Notes Payable and Other Debt

This debt primarily relates to the Company’s investments in preferred stock that it financed using total return swaps (i.e., consistent with the approach described above for Notes Payable and Other Debt – Bond Related). This debt is non-amortizing and, reflective of payment terms in corresponding total return swaps, bore an interest rate of 3-month London Interbank Offer Rate (“LIBOR”) plus 400 basis points (“bps”) (4.3% at September 30, 2015) that resets on a quarterly basis. As discussed in Note 3, “Investments in Preferred Stock,” this debt was repaid on October 30, 2015 as a result of the preferred stock redemption and there was no gain or loss recognized by the Company in connection with the repayment of such debt. Additionally, on November 12, 2015, the Company reached an agreement to acquire at a

significant discount from the bankruptcy estate of one of the co-founders of IHS, all interests held by such estate in the Company's subsidiaries or affiliates, including notes payable and other debt obligations of the Company that had a carrying value in the Consolidated Balance Sheets of approximately \$4.4 million as of September 30, 2015. Among other provisions, such purchase agreement provides for the release and discharge of the Company from its payment obligations associated with such debt instruments. As a result, and based on all consideration to be exchanged under the agreement, the Company will recognize during the fourth quarter of 2015 a net gain in its Consolidated Statements of Operations that is estimated to be between \$3.0 million and \$3.5 million.

Letters of Credit

The Company had no letters of credit outstanding at September 30, 2015.

NOTE 7—DERIVATIVE INSTRUMENTS

Derivative instruments that are recognized in the Consolidated Balance Sheets are subsequently measured on a fair value basis. In this case, changes in fair value of such instruments are recognized in the Consolidated Statements of Operations as a component of “Net gains on derivatives and loans.” Derivative assets are presented in the Consolidated Balance Sheets as a component of “Other assets” and derivative liabilities are presented in the Consolidated Balance Sheets as a component of “Other liabilities.”

The following table provides information about the carrying value of the Company’s derivative assets and derivative liabilities:

(1) The cash paid and received on total return swaps that was reported as derivative instruments is settled on a net basis and recorded through "Net gains on derivatives and loans" on the Consolidated Statements of Operations. Net cash received was \$1.0 million for the three months ended September 30, 2015 and 2014. Net cash received was \$3.0 million and \$1.7 million for the nine months ended September 30, 2015 and 2014, respectively.

(2) The cash paid and received on the interest rate swap is settled on a net basis and recorded through "Net gains on derivatives and loans" on the Consolidated Statements of Operations. Net cash paid was \$0.1 million for the three months ended September 30, 2015 and 2014. Net cash paid was \$0.2 million for the nine months ended September 30, 2015 and 2014.

Total Return Swaps

As of September 30, 2015, the Company had 10 bond related total return swap agreements that were accounted for as derivatives. Under the terms of these agreements, the counterparty is required to pay the Company an amount equal to the interest payments received on underlying bonds (which, at September 30, 2015, had a UPB of \$87.3 million and a weighted average pay rate of 5.7%) while the Company is required to pay the counterparty a rate of SIFMA 7-day municipal swap index plus a spread (weighted average pay rate of 1.7% at September 30, 2015). Additionally, the terms of these total return swaps require that the change in fair value of reference bonds since the inception of such agreements be factored into their cash settlement upon expiry or early termination.

Interest rate cap

At September 30, 2015 and December 31, 2014, the Company had one interest rate cap contract that terminates on January 2, 2019. The notional amount on the interest rate cap was \$45.0 million at September 30, 2015 and December 31, 2014 and provides us with interest rate protection on \$45.0 million of our floating rate debt in the event SIFMA 7-day municipal swap index rises to 250 bps or higher.

Interest rate swap

At September 30, 2015 and December 31, 2014, the Company had one interest rate swap contract. Under the terms of the agreement, the counterparty is required to pay the Company SIFMA 7-day municipal swap index plus 250 bps (pay rate of 252 bps at September 30, 2015) and the Company is required to pay the counterparty a fixed interest rate of 6.5%.

NOTE 8—FINANCIAL INSTRUMENTS

The Company measures the fair value of its financial instruments based upon their contractual terms and using relevant market information. A description of the methods used by the Company to measure fair value is provided below. Fair value measurements are subjective in nature, involve uncertainties and often require the Company to make significant judgments. Changes in assumptions could significantly affect the Company's measurement of fair value.

Generally accepted accounting principles ("GAAP") establishes a three-level hierarchy that prioritizes inputs into the valuation techniques used to measure fair value. Fair value measurements associated with assets and liabilities are categorized into one of the following levels of the hierarchy based upon how observable the valuation inputs are that are used in such measurements.

- Level 1: Quoted prices in active markets for identical instruments.
- Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which significant inputs or significant value drivers are observable in active markets.
- Level 3: Valuations derived from valuation techniques in which significant inputs or significant value drivers are unobservable.

The following table provides information about the carrying amounts and fair values of those financial instruments of the Company for which fair value is not measured on a recurring basis and organizes such information based upon the level of the fair value hierarchy within which fair value measurements are categorized:

Investment in preferred stock –The Company estimates fair value by using the terms and conditions of the preferred stock as compared to other, best available market benchmarks.

Loans held for investment –The Company estimates fair value by discounting the expected cash flows using current market yields for similar loans. Loans receivable are recorded through “Other assets.”

Notes payable and other debt – The Company estimates fair value by discounting contractual cash flows using a market rate of interest or by estimating the fair value of the collateral supporting the debt arrangement, taking into account credit risk.

Subordinate debt – At September 30, 2015, the Company estimates the fair value of the subordinate debt by discounting contractual cash flows using an estimated market rate of interest of 20%. As outlined in the table above, at September 30, 2015 the aggregate fair value was estimated at \$45.8 million. At September 30, 2015, the estimated fair value of this debt would have been \$59.1 million and \$37.4 million using a discount rate of 15% and 25%, respectively. The estimated fair value of this debt is inherently judgmental and based on management’s assumption of market yields. There can be no assurance that the Company could repurchase the remaining subordinated debt at the

estimated fair values reflected in the table above or that the debt would trade at that price.

NOTE 9—FAIR VALUE MEASUREMENTS

Recurring Valuations

The following tables present the carrying amounts of assets and liabilities that are measured at fair value on a recurring basis based upon the level of the fair value hierarchy within which fair value measurements of such assets and liabilities are categorized:

⁽¹⁾ This amount represents \$11.3 million of unrealized net holding gains arising during the period, partially offset by the reversal of \$7.2 million of unrealized bond losses related to bonds that were redeemed.

The following table provides the amount included in earnings related to the activity presented in the table above, as well as additional gains (losses) that were recognized by the Company for the nine months ended September 30, 2014:

(in thousands)	Net gains on bonds (1)	Equity in Losses from LTTPs	Net gains on derivatives (1)

Additional realized gains recognized	8,218		1,429
Total gains (losses) reported in earnings	\$ 8,105	\$ (2,183)	\$ 2,241

(1) Amounts are reflected through “Other expenses” and “Net gains on bonds” on the Consolidated Statements of Operations.

(2) Amounts are reflected through “Net gains on derivatives and loans” on the Consolidated Statements of Operations. The following methods or assumptions were used to estimate the fair value of these recurring financial instruments:

Bonds available-for-sale – If a bond is performing and payment of full principal and interest is not deemed at risk, then the Company estimates fair value using a discounted cash flow methodology; specifically, the Company discounts contractual principal and interest payments, adjusted for expected prepayments. The discount rate is based on expected investor yield requirements adjusted for bond attributes such as the expected term of the bond, debt service coverage ratio, geographic location and bond size. The weighted average discount rate for the performing bond portfolio was 5.8% and 6.2% at September 30, 2015 and December 31, 2014, respectively, for performing bonds still held in the portfolio at September 30, 2015. If observable market quotes are available, the Company will estimate the fair value based on such quoted prices.

For non-performing bonds and certain performing bonds where payment of full principal and interest is deemed at risk, the Company estimates fair value by discounting the property’s expected cash flows and residual proceeds using estimated market discount and capitalization rates, less estimated selling costs. The weighted average discount rate was 7.6% and 7.8% at September 30, 2015 and December 31, 2014, for the bonds remaining in our portfolio at September 30, 2015. The weighted average capitalization rate was 6.4% and 6.6% at September 30, 2015 and December 31, 2014, respectively, for the bonds remaining in our portfolio at September 30, 2015. However, to the extent available, the Company may estimate fair value based on a sale agreement, a letter of intent to purchase, an appraisal or other third-party indications of fair value.

The discount rates and capitalization rates discussed above are significant inputs to bond valuations and are unobservable in the market. To the extent discount rates and capitalization rates were to increase (decrease) in isolation the corresponding estimated bond values would decrease (increase).

Loans held for sale – The Company estimates fair value using a discounted cash flow methodology whereby contractual principal and interest payments are discounted at expected investor yield requirements for similar assets.

Derivative financial instruments – The Company estimates fair value, taking into consideration credit risk, using internal models or third party models, depending on the nature of the derivative contract.

Non-recurring Valuations

At September 30, 2015, the Company measured the fair value of its co-investment in SAWHF for purposes of recognizing an impairment loss. The fair value measurement of this instrument, which was categorized as Level 3, was advanced using a discounted cash flow methodology. At December 31, 2014, the Company had no assets that were measured at fair value on a non-recurring basis.

NOTE 10—FINANCIAL GUARANTEES AND COLLATERAL

Guarantees

The Company recognized a guaranty obligation for its obligation to stand ready to perform in connection with guarantees that it underwrote in connection with investor yields on certain third party LIHTC Funds and property performance on certain third party LTPPs. Such guarantees will expire by December 31, 2017.

The Company does not have any recourse provisions that would enable it to recover from third parties any of the amounts that would be required to be paid under such guarantees. The Company made no cash payments related to these indemnification agreements for the nine months ended September 30, 2015 and 2014.

The following table provides information about the maximum exposure and guaranty obligation recognized in the Company's Consolidated Balance Sheets:

	At September 30, 2015		At December 31, 2014	
	Maximum Exposure	Carrying Amount	Maximum Exposure	Carrying Amount
(in thousands) Indemnification contracts	\$ 13,209	\$ 614	\$ 13,209	\$ 864

The Company's maximum exposure under its indemnification contracts represents the maximum loss the Company could incur under its guarantee agreements and is not indicative of the likelihood of the expected loss under the guarantee. The Company also has guarantees associated with certain consolidated LIHTC Funds. See Note 15, "Consolidated Funds and Ventures," for more information.

Collateral and restricted assets

The following table summarizes assets that are either pledged or restricted for the Company's use at September 30, 2015 and December 31, 2014. This table also reflects certain assets held by CFVs in order to reconcile to the Company's Consolidated Balance Sheets:

(1) The Company pledges collateral in connection with secured borrowings and various guarantees that it has provided.

(2) These are assets held by consolidated LIHTC Funds.

NOTE 11—COMMITMENTS AND CONTRINGENCIES

Operating Leases

As of September 30, 2015, the Company had two non-cancelable operating leases that expire in 2016 and 2020, respectively. These leases require the Company to pay property taxes, maintenance and other costs. The Company recognized rental expense of \$0.1 million and \$0.3 million for the three months and nine months ended September 30, 2015, respectively and \$0.1 million and \$0.4 million for the three months and nine months ended September 30, 2014, respectively. On October 6, 2015, the Company entered into a new lease agreement that will expire in 2024. The future minimum rental commitments related to this new lease are not reflected in the table below.

The following table summarizes the future minimum rental commitments on the two non-cancelable operating leases at September 30, 2015:

(in thousands)	
2015	\$ 118
2016	145
2017	124
2018	134
2019	146

Total minimum future rental commitments	\$ 717

Litigation

From time to time, the Company and its subsidiaries are named as defendants in various litigation matters arising in the ordinary course of business. These proceedings may include claims for substantial or indeterminate compensatory or punitive damages, or for injunctive or declaratory relief.

The Company establishes reserves for litigation matters when a loss is probable and can be reasonably estimated. Once established, reserves may be adjusted when new information is obtained.

It is the opinion of the Company's management that adequate provisions have been made for losses with respect to litigation matters and other claims that existed at September 30, 2015. Management believes the ultimate resolution of these matters is not likely to have a material effect on its financial position, results of operations or cash flows. Assessment of the potential outcomes of these matters involves significant judgment and is subject to change, based on future developments, which could result in significant changes.

Shareholder Matters

The Company was a defendant in a purported class action lawsuit originally filed in 2008. The plaintiffs claimed to represent a class of investors in the Company's shares who allegedly were injured by misstatements in press releases and SEC filings between May 3, 2004 and January 28, 2008. The plaintiffs sought unspecified damages for themselves and the shareholders of the class they purported to represent. The class action lawsuit was brought in the United States District Court for the District of Maryland. The Company filed a motion to dismiss the class action, and

in June 2012, the Court issued a ruling dismissing all of the counts alleging any knowing or intentional wrongdoing by the Company or its affiliates, directors and officers. The plaintiffs appealed the Court's ruling and on March 7, 2014, the United States Court of Appeals for the Fourth Circuit unanimously affirmed the lower Court's ruling. As a result of these rulings, the only counts remaining in the class action related to the Company's dividend reinvestment plan.

The parties negotiated a settlement agreement, which was submitted to the United States District Court for the District of Maryland for approval. On September 24, 2015, the Court approved the settlement agreement. On September 25, 2015, the court entered an order dismissing the case in light of the settlement. The settlement provides for a maximum of \$826,820 to cover payments to the class as well as the attorneys for the plaintiffs' counsel. The settlement is a claims-made settlement, in which payments will be made only to those plaintiffs who submit a claim and whose claim is approved, thus the final settlement amount to the class could be less than the amount stated above.

The Company will not incur any settlement costs, as all costs, including both class payments and plaintiffs' attorneys' fees, will be paid directly by its insurance company. As a result, the Company released the litigation reserve of \$0.5 million during the first quarter of 2015.

In addition, 41,667 unvested employee deferred shares had a potential dilutive share impact of 20,834 for the three months and nine months ended September 30, 2014. For the nine months ended September 30, 2014, the adjustment to net income for the awards classified as liabilities caused the common stock equivalents to be anti-dilutive.
- (4) For the three months and nine months ended September 30, 2015, the number of options excluded from the calculations of diluted earnings per share was 24,211 either because of their anti-dilutive effect (i.e. options that were not in the money) or because the option had contingency vesting requirements. For the three months and nine months ended September 30, 2014, respectively, the number of options excluded from the calculations of diluted earnings per share was 60,211 either because of their anti-dilutive effect (i.e. options that were not in the money) or because the option had contingent vesting requirements.

Common Shares

As of September 30, 2015, the Board had authorized total stock repurchases of up to 2.05 million shares. Between October 1, 2015 and November 6, 2015, the Company repurchased 56,260 shares at an average price of \$12.97. As of November 6, 2015, the Company had repurchased 2.0 million shares at an average price of \$9.13 since the plan's inception. The maximum price at which management is authorized to purchase shares is \$13.92 per share.

Effective May 5, 2015, the Company adopted a Tax Benefits Rights Agreement ("Rights Plan"). In connection with adopting the Rights Plan, the Company declared a distribution of one right per common share to shareholders of record as of May 15, 2015. The rights will not trade apart from the current common shares until the distribution date, as defined in the Rights Plan. Under the Rights Plan, should a new investor acquire greater than a 4.9% stake in the Company, all existing shareholders other than the new 4.9% holder will be provided the opportunity to acquire new shares for a nominal cost, thereby significantly diluting the ownership interest of the acquiring person. The Rights Plan will run for a period of five years, or until the Board determines the plan is no longer required, whichever comes first.

Noncontrolling Interests

LIHTC Funds

At September 30, 2015 and December 31, 2014, the noncontrolling interest holders were comprised of the limited partners as well as the general partner in 11 LIHTC Funds.

IHS

At December 31, 2014, 3.7% of IHS was held by a third party. During the second quarter of 2015, the Company acquired the remaining interest held by a third party and now wholly owns IHS.

IHS PM

During the second quarter of 2015, IHS formed a company in South Africa, IHS PM, to provide property management services to the properties of IHS-managed funds. IHS owns 60% of IHS PM and the third party property manager owns 40%.

NOTE 13—STOCK-BASED COMPENSATION

The Company has stock-based compensation plans (“Plans”) for Non-employee Directors (“Non-employee Directors’ Stock-Based Compensation Plans”) and stock-based incentive compensation plans for employees (“Employees’ Stock-Based Compensation Plans”).

The following table provides information related to total compensation expense that was recorded for these Plans:

(in thousands)	For the three months ended September 30,		For the nine months ended September 30,	
	2015	2014	2015	2014
Employees’ Stock-Based Compensation Plans	\$ 291	\$ 62	\$ 1,592	\$ 1,714
Non-employee Directors’ Stock-Based Compensation Plans	74	50	221	188
Total	\$ 365	\$ 112	\$ 1,813	\$ 1,902

Employees’ Stock-Based Compensation Plans

As of September 30, 2015, there were 375,134 share awards available to be issued under Employees’ Stock-Based Compensation Plans. While each existing Employees’ Stock-Based Compensation Plan has been approved by the Company’s Board of Directors, not all of the Plans have been approved by the Company’s shareholders. The Plans that have not been approved by the Company’s shareholders are currently restricted to the issuance of only stock options. As a result, of the 375,134 shares available under the plans, only 10,994 are available to be issued in the form of either stock options or shares; all remaining share awards must be issued in the form of stock options.

Employee Common Stock Options

The Company measures the fair value of unvested options with time-based vesting and all vested options (both time-based and performance based), using a lattice model for purposes of recognizing compensation expense. The Company believes the lattice model provides a better estimate of the fair value of these options as, according to Financial Accounting Standards Board’s (“FASB”) Accounting Standards Codification Topic 718, “the design of a lattice model more fully reflects the substantive characteristics of a particular employee share option.” Because options granted with stock price targets contain a “market condition” under FASB’s Accounting Standards Codification Topic 718, a Monte Carlo simulation is used to simulate future stock price movements for the Company. The Company believes a Monte Carlo simulation provides a better estimate of the fair value for unvested options granted with specific stock price targets as the model’s flexibility allows for the fair value to account for the vesting provisions as well as the different probabilities of stock price outcomes.

The following table provides information related to option activity under the Employees' Stock-Based Compensation Plans:

	Number of Options	Weighted- average Exercise Price per Option	Weighted- average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1)	Period End Liability (2)
(in thousands, except per option data)					
Outstanding at January 1, 2014	416	\$ 3.52	7.3	\$ 1,644	\$ 1,785
Forfeited/Expired in 2014					
Outstanding at December 31, 2014	416	3.52	6.3	3,196	3,281
Forfeited/Expired in 2015					
Outstanding at September 30, 2015	416	3.52	5.6	4,717	4,744

Number of options that were exercisable at:

December 31, 2014	325	4.00	6.1
September 30, 2015	398	3.60	5.6

(1) Intrinsic value is based on outstanding options.

(2) Only options that were amortized based on a vesting schedule have a liability balance. These options were 416,211; 412,100; and 378,173; at September 30, 2015, December 31, 2014 and January 1, 2014, respectively.

The value of employee options increased by \$0.3 million and \$1.5 million during the three months and nine months ended September 30, 2015 due to the increase in market value of our stock price. This increase was recognized as additional compensation expense.

Employee Deferred Shares

The following table summarizes the deferred shares granted to employees. The grants outstanding at September 30, 2015 will vest in the first quarter of 2016.

(in thousands, except per share data)	Deferred Share Grants	Weighted- average Grant Date Share Price	Period End Liability
Balance, January 1, 2015	42	\$ 4.40	\$ 336
Granted in 2015			
Issued in 2015	31	4.40	
Forfeited in 2015	1	4.40	
Balance, September 30, 2015	10	4.40	103

The Company recognized \$0.1 million of additional compensation expense related to employee deferred shares during the nine months ended September 30, 2015, mainly driven by the increase in MMA's share price and amortization of existing grants.

Non-employee Directors' Stock-Based Compensation Plans

The Non-employee Directors' Stock-based Compensation Plans authorize a total of 1,130,000 shares for issuance, of which 428,291 were available to be issued at September 30, 2015. The Non-employee Directors' Stock-based Compensation Plans provide for grants of non-qualified common stock options, common shares, restricted shares and deferred shares.

On March 12, 2015, the Board adopted an amendment to the Non-employee Director's Stock-based Compensation Plans providing directors to be paid \$60,000 per year, an increase from \$50,000 per year for their services; 50% of their compensation is paid in cash and 50% is paid in share based grants. In addition, the Chairman now receives an additional \$20,000 per year, the Audit Committee Chair receives an additional \$15,000 per year and the other

committee chairs receive an additional \$10,000 per year.

The table below summarizes director compensation, including cash, vested options and common and deferred shares, for services rendered for the nine months ended September 30, 2015 and 2014. The directors are fully vested in the deferred shares at the grant date.

		Common Shares	Deferred Shares	Weighted- average Grant Date Share Price	Options Vested	Directors' Fees Expense

NOTE 14—DISCONTINUED OPERATIONS

The table below provides information about income and expenses related to the Company's discontinued operations. The discontinued operations activity reported during the three months ended and nine months ended September 30, 2015 relates to operations that were disposed of prior to the Company's adoption of Accounting Standards Update No. 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant and Equipment (Topic 360) Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity."

NOTE 15—CONSOLIDATED FUNDS AND VENTURES

As previously discussed in our 2014 Form 10-K, the Company no longer consolidates SAWHF or the non-profit entity and its LTTPs as of December 31, 2014. At September 30, 2015 and December 31, 2014, CFVs was comprised only of LIHTC Funds.

LIHTC Funds

The Company guarantees investor yield for 11 LIHTC Funds. These guarantees fully expire by the end of 2027.

At September 30, 2015, the Company's maximum exposure under these guarantees was estimated to be \$558.9 million

If the Company was required to perform under these guarantees in order to bring projected investor yield to a guaranteed minimum, it could (subject to third party consent) access, at September 30, 2015, \$13.1 million of fund reserves, which are not cross collateralized, and \$16.4 million of guarantee collateral. The Company could also defer the collection of debt service on certain of its bonds, to fully or partially cover its guarantee obligation.

At September 30, 2015, the Company had \$11.1 million of unamortized fees related to these guarantees. These unamortized fees are included in the Company's measurement of its common shareholders' equity. However, for presentation purposes, these unamortized fees are eliminated in consolidation against the 11 LIHTC Funds' prepaid guarantee fees.

The LIHTC Funds' primary assets are their investments in LTPPs, which are the owners of the affordable housing properties (see Investments in LTPPs in the Asset Summary below). The LIHTC Funds account for these investments using the equity method of accounting.

Asset Summary:

The following table summarizes the assets of the consolidated LIHTC Funds:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Cash, cash equivalents and restricted cash	\$ 21,283	\$ 24,186
Investments in LTPPs	189,295	231,204
Other assets	9,539	11,128
Total assets of consolidated LIHTC Funds	\$ 220,117	\$ 266,518

All of the assets of the consolidated LIHTC Funds are restricted for use by the specific owner entity and are not available for the Company's general use.

Investments in LTPPs

The LIHTC Funds' limited partner investments in LTPPs are accounted for using the equity method of accounting. The following table provides the assets and liabilities of the LTPPs:

	At September 30, 2015	At December 31, 2014
(in thousands)		
Total assets of the LTPPs (1)	\$ 1,230,905	\$ 1,273,903
Total liabilities of the LTPPs (1)	1,023,618	1,035,695

(1) The assets of the LTPPs are primarily real estate and the liabilities are predominantly mortgage debt.

The Company's maximum exposure to loss from the LIHTC Funds and the underlying LTPPs relate to the guarantee exposure associated with the LIHTC Funds discussed above and the Company's bonds that represent the primary mortgage debt obligation owed by certain LTPPs of the LIHTC Funds. The reported fair value of the Company's investments in bonds that are secured by properties owned by the LTPPs was \$126.9 million and \$118.9 million at September 30, 2015 and December 31, 2014, respectively.

Liability Summary:

The following table summarizes the liabilities of the consolidated LIHTC Funds:

(in thousands)	At September 30, 2015	At December 31, 2014
Debt (1)	\$ 6,712	\$ 6,712
Unfunded equity commitments to unconsolidated LTPPs	8,229	9,597
Asset management fee payable	24,400	28,848
Other liabilities	3,201	2,983
Total liabilities of consolidated LIHTC Funds	\$ 42,542	\$ 48,140

⁽¹⁾ At September 30, 2015 and December 31, 2014, this debt had a face amount equal to its carrying value, a weighted average effective interest rate of 5.3%, and was due on demand.

NOTE 16—SEGMENT INFORMATION

Beginning in 2015, the Company operated through three reportable segments: U.S. Operations, International Operations and Corporate Operations. We have revised the presentation for the three months and nine months ended September 30, 2014 based on these segments, which had no impact on Net income (loss) to common shareholders.

- (2) Represents equity in losses from the LTTPs that the Company recognized as an allocation (see Note 15, "Consolidated Funds and Ventures"). The Company is allocated equity in losses in situations where the LIHTC Funds' equity investment in the LTTP has reached zero, but the Company has a bond investment represented by mortgage debt owned by the LTTP. For purposes of the table above, the Company recognized \$1.1 million of losses in U.S. Operations and reduced the CFVs losses by the same amount.

- (1) Represents bond interest income that the Company recognized through an allocation of income (see Note 15, “Consolidated Funds and Ventures”) and for purposes of the table above, the \$0.6 million was reflected in total interest income for U.S. Operations.
- (2) This amount includes \$0.6 million of asset management fees recognized by IHS through an income allocation (see Note 15, “Consolidated Funds and Ventures”) and for purposes of the table above, the \$0.6 million was reflected in total fee and other income for International Operations. This amount also includes \$1.2 million of asset management fees and \$0.4 million of guarantee fees both related to the Company’s LIHTC Funds and both recognized during the third quarter of 2014 through an allocation of income (see Note 15, “Consolidated Funds and Ventures”) and for purposes of the table above, both were included in total fee and other income for U.S. Operations.
- (3) Represents net expenses recognized by the Company through an allocation of income (see Note 15, “Consolidated Funds and Ventures”) and for purposes of the table above, these expenses were reflected as additional other expenses for U.S. Operations.
- (4) Represents the Company’s share of its equity interest in the SAWHF (i.e., 2.7% of the SAWHF’s third quarter of 2014 net income) which was recognized through an allocation of income (see Note 15, “Consolidated Funds and Ventures”) and for purposes of the table above, the \$0.2 million was reflected as equity in income of unconsolidated ventures for International Operations.
- (5) Represents net expenses of CFVs that were eliminated in consolidation because they were payments or income allocations to MMA.
- (6) Represents equity in losses from the LTPPs that the Company recognized as an allocation (see Note 15, “Consolidated Funds and Ventures”). The Company is allocated equity in losses in situations where the LIHTC

Funds' equity investment in the LTPP has reached zero, but the Company has a bond investment represented by mortgage debt owned by the LTPP. For purposes of the table above, the Company recognized \$0.3 million of losses in U.S. Operations and reduced the CFVs losses by the same amount.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General Overview

The Company uses its experience and expertise to partner with institutional capital to create attractive and impactful alternative investment opportunities, to manage them well and to report on them effectively. Beginning in 2015, the Company operated through three reportable segments – United States (“U.S.”) Operations, International Operations and Corporate Operations.

U.S. Operations

Our U.S. Operations consists of three business lines: Leveraged Bonds, Low-Income Housing Tax Credits (“LIHTC”) and Other Investments and Obligations.

The Leveraged Bonds business line finances affordable housing and infrastructure in the U.S. This business line manages the vast majority of the Company's bonds and associated financings. The bond portfolio is comprised primarily of multifamily tax-exempt bonds, but also includes other real estate related bond investments.

Our LIHTC business consists primarily of a secured subordinate loan receivable from Morrison Grove Management, LLC (“MGM”) and an option to purchase MGM in 2019.

The Other Investments and Obligations business line includes legacy assets targeted for eventual disposition and serves as our research and development unit for new business opportunities in the U.S., which has resulted in the creation of a renewable energy finance business that operates as MMA Energy Capital, LLC (“MEC”).

International Operations

We manage our International Operations through a wholly owned subsidiary, International Housing Solutions S.à r.l. (“IHS”). IHS's strategy is to raise, invest in and manage private real estate funds. IHS currently manages three funds: the South Africa Workforce Housing Fund (“SAWHF”), which is a multi-investor fund and is fully invested; IHS Residential Partners I, which is a single-investor fund targeted at the emerging middle class in South Africa; and IHS Fund II, which is a multi-investor fund targeting investments in affordable housing, including green housing projects, within South Africa and Sub-Saharan Africa. During the second quarter of 2015, IHS and a South African property management company formed a company in South Africa, IHS Property Management Propriety Limited (“IHS PM”), to provide property management services to the properties of IHS-managed funds. IHS owns 60% of IHS PM and the third party property manager owns the remaining 40%.

Corporate Operations

Our Corporate Operations segment is responsible for accounting, reporting, compliance and planning, which are fundamental to our success as a global fund manager and publicly traded company in the U.S.

Financial Results

Common shareholders' equity increased \$9.6 million for the third quarter to \$104.9 million at September 30, 2015 from \$95.3 million at June 30, 2015. The Company reported an 11.7% increase in diluted common shareholders' equity per share representing an increase of \$1.63 to \$15.55 at September 30, 2015 from \$13.92 at June 30, 2015. The majority of the Company's reported growth per share, or \$1.58 per share, was primarily due to bond valuation and net

income generated during the third quarter, driven mainly by real estate sales, while \$0.05 per share was due to common share repurchases completed during the third quarter at prices below book value per share.

Balance Sheet Summary – Table 1

The table below summarizes the change in our balance sheet at September 30, 2015 from June 30, 2015. The balance sheet below presents the assets, liabilities and equity attributable to the noncontrolling interest holder of Consolidated Funds and Ventures (“CFVs”) as separate line items. At each period presented, CFVs were comprised of guaranteed LIHTC Funds. See Notes to Consolidated Financial Statements – Note 15, “Consolidated Funds and Ventures,” for more information.

During the three months ended September 30, 2015, the Company repurchased 142,200 shares at an average price of \$13.21 resulting in a reduction to common shareholders' equity of \$1.9 million, but causing our equity per diluted common share outstanding to increase by \$0.05 during the third quarter of 2015.

During the nine months ended September 30, 2015, the Company repurchased 591,112 shares at an average price of \$11.08 resulting in a reduction to common shareholders' equity of \$6.5 million, but causing our equity per diluted common share outstanding to increase by \$0.35 during the first nine months of 2015.

Results of Operations

The following discussion of our consolidated results of operations should be read in conjunction with our financial statements, including the accompanying notes. See “Critical Accounting Policies and Estimates” for more information concerning the most significant accounting policies and estimates applied in determining our results of operations.

Net interest income – Table 6

The following table summarizes our net interest income for the periods presented:

(in thousands)	For the three months ended September 30,			For the nine months ended September 30,		
	2015	2014	Change	2015	2014	Change
Interest income:

7 Net interest income	\$ 2,904	\$ 4,922	\$ (2,018)	\$ 10,065	\$ 10,924	\$ (859)

Three Months Ended September 30, 2015 Compared to Three Months Ended September 30, 2014

Net interest income declined by \$2.0 million primarily as a result of the collection of \$1.8 million of delinquent interest in the third quarter of 2014 associated with a non-performing bond that was restructured in the third quarter of 2014. This decline was partially offset by a \$0.2 million increase in interest income that was recognized on loans and short-term investments during the third quarter of 2015 and that was primarily attributable to solar loans that were originated in the second quarter of 2015.

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Net interest income declined by \$0.9 million primarily as a result of the collection of \$3.0 million of delinquent interest during the first nine months of 2014 associated with two non-performing bonds that were restructured during the first nine months of 2014. This decline was partially offset by (i) a \$1.4 million increase in interest income that

was attributable to a bridge loan that we made to MGM during the fourth quarter of 2014 and to solar loans that were originated in the second quarter of 2015 and (ii) a \$1.1 million decline in asset related interest expense that was driven by a termination in the second quarter of 2014 of \$30.3 million of bond financings that carried a weighted average yield of 7.8%.

Fee and Other Income – Table 7

The following table summarizes our fee and other income for the periods presented:

(in thousands)	For the three months ended			For the nine months ended

4 Fee and other income	\$ 3,906	\$ 3,812	\$ 94	\$ 11,043	\$ 8,178	\$ 2,865

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Fee and other income increased by \$2.9 million primarily as a result of \$1.7 million of SAWHF asset management fees and reimbursements that were recognized during the first nine months of 2015. No SAWHF fee income was recognized during 2014 in this financial statement line item because SAWHF was consolidated for financial reporting purposes. SAWHF asset management fees and reimbursements of \$1.9 million were reported for the first nine months of 2014 as an allocation of income (refer to line 10 of Table 11 below). In addition, we recognized \$1.8 million of IHS Fund II asset management fees and reimbursements in the first nine

months of 2015, which reflects an increase of \$0.4 million as compared to the first nine months of 2014. The increase in Fee and other income was also driven in part by the release of a \$0.5 million litigation reserve in the first quarter of 2015 (and that was recognized in Other income). See Notes to Consolidated Financial Statements – Note 11, “Commitments and Contingencies,” for more information.

Other interest expense – Table 8

The following table summarizes our other interest expense for the periods presented:

(in thousands)	For the three months ended September 30,			For the nine months ended September 30,		
	2015	2014	Change	2015	2014	Change
1 Subordinate debt Notes payable and	\$ (997)	\$ (2,597)	\$ 1,600	\$ (5,047)	\$ (7,708)	\$ 2,661
2 other debt Other interest	(303)	(803)	500	(1,157)	(2,754)	1,597
3 expense	\$ (1,300)	\$ (3,400)	\$ 2,100	\$ (6,204)	\$ (10,462)	\$ 4,258

Three Months and Nine Months Ended September 30, 2015 Compared to Three Months and Nine Months Ended September 30, 2014

Other interest expense represents interest expense associated with debt that does not finance interest-bearing assets. Declines in other interest expense for the three months and nine months ended September 30, 2015 were driven primarily by the decline in the cost of funding associated with MMA Financial Holdings, Inc. (“MFH”) subordinate debt, which was restructured during the second quarter of 2015. Prior to such restructuring, the yield on this debt was 6.9%, which decreased to 1.6% as a result of the restructuring.

Operating Expenses – Table 9

The following table summarizes our operating expenses for the periods presented:

(in thousands)	For the three months ended September 30,			For the nine months ended September 30,		
	2015	2014	Change	2015	2014	Change

Edgar Filing: MMA CAPITAL MANAGEMENT, LLC - Form 10-Q

Three Months Ended September 30, 2015 Compared to Three Months Ended September 30, 2014

Operating expenses increased primarily as a result of a \$1.1 million increase in employee incentive compensation. This increase was partially offset by a \$0.8 million decrease in professional fees that was primarily driven by a \$0.5 million decline in general legal fees.

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Operating expenses increased primarily as a result of a \$1.8 million increase in employee incentive compensation. This increase was partially offset by a \$1.1 million decline in professional fees that was primarily attributable to a \$0.4 million decline in tax related fees, a \$0.3 million decline in consulting fees and a \$0.2 million decline in general legal fees.

Net Gains on Assets, Derivatives and Extinguishment of Liabilities – Table 10

The following table summarizes our net gains on assets, derivatives and extinguishment of liabilities for the periods presented:

(in thousands)	For the three months ended September 30,			For the nine months ended September 30,		
	2015	2014	Change	2015	2014	Change

Three Months Ended September 30, 2015 Compared to Three Months Ended September 30, 2014

Net gains on bonds declined \$6.8 million primarily as a result of a sale in the third quarter of 2014 of a multifamily tax-exempt bond, which resulted in the recognition of a \$6.5 million gain during that reporting period.

Net gains on sales of real estate increased \$4.3 million as a result of a sale of undeveloped land in the third quarter of 2015.

Net gains on extinguishment of liabilities declined by \$1.5 million as a result of the forgiveness of non-recourse debt and related interest payable associated with two solar facilities in the third quarter of 2014.

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Net gains on bonds were \$5.0 million for the first nine months of 2015. In addition to recognizing a gain of \$0.6 million during the third quarter of 2015 related to the sale of a bond interest that had no reported carrying value, one of the Company's investments in bonds was redeemed early in full by the issuer during the second quarter of 2015, thereby resulting in the recognition of a \$3.8 million gain. The Company also sold a bond during the first quarter of 2015 for \$0.6 million that resulted in a gain on sale of \$0.6 million.

Net gains on sale of real estate of \$9.9 million for the first nine months of 2015 were comprised of the third quarter of 2015 sale activity discussed above, as well as a \$5.6 million gain that was recognized during the second quarter of 2015 primarily in connection with the sale of an affordable multifamily property for \$14.6 million.

Net gains on extinguishment of liabilities were \$1.9 million for the first nine months of 2014 and were primarily driven by the aforementioned forgiveness of debt.

Net Gains on Derivatives

The following table provides the details of Net gains on derivatives (as presented above in line 3 of Table 10):

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Net gains on derivatives increased by \$1.5 million during the first nine months of 2015 as compared to 2014 mainly due to the net interest income associated with bond-related total return swaps (“TRS”) with a notional amount of \$95.5 million that were executed into during the second quarter of 2014.

Net (Loss) Income Allocated to Common Shareholders Related to CFVs – Table 11

The table below summarizes the allocable net (loss) income related to funds and ventures that were consolidated for the periods presented:

(1) Excludes \$12,706 and \$12,343 of net gain allocable to the minority interest holder in IHS PM for the three months and nine months ended September 30, 2015, respectively. Excludes \$77,326 of net loss allocable to the minority interest holder in IHS for the nine months ended September 30, 2014. These amounts are excluded from this presentation because IHS related activity is not included within lines 1 through 5 above. There were no losses allocable to the minority interest holder in IHS for the three months ended September 30, 2014.

The majority of the change period over period is due to the Company no longer consolidating SAWHF and the non-profit entity and its Consolidated LTPPs as of December 31, 2014.

The following table provides the details of Net (loss) income from CFVs allocated to the common shareholders as presented above in line 7 of Table 11:

Guarantee fees associated with the guaranteed LIHTC Funds that we continue to consolidate for financial reporting purposes, represent consideration received at fund formation in exchange for guarantee-related risk that was underwritten by the Company. As of September 30, 2015, we had \$11.1 million of unamortized guarantee fees.

Equity in losses from LTPPs are losses from certain LTPPs that are allocated to MMA's bond interest in the LTPPs. To the extent MMA has a bond interest in the LTPP and the consolidated LIHTC Funds' equity interest in the LTPP has no remaining book basis, MMA is required to pick up the limited partners' share of losses from the LTPP. Because we carry our bonds at fair value, these losses are equally offset by an increase to unrealized bond value recorded through accumulated other comprehensive income ("AOCI") having no impact on overall common shareholders' equity (see Table 4, line 2).

Asset management fees recognized during the three months ended and nine months ended September 30, 2014 are primarily related to IHS's management of SAWHF (\$0.6 million and \$1.9 million, respectively). The fees earned from SAWHF for the three months ended and nine months ended September 30, 2015 of \$0.5 million and \$1.7 million, respectively, are reported through asset management fees on Table 7, line 5, and are not recognized as an allocation of income because SAWHF is no longer consolidated as of December 31, 2014. The balance of asset management fees recognized during the three months and nine months ended September 30, 2014 (\$1.2 million and \$1.6 million, respectively) related to the management of certain LIHTC funds and those asset management rights were sold during the fourth quarter of 2014.

Liquidity and Capital Resources

Our principal sources of liquidity include cash and cash equivalents and cash flows from investing activities. At September 30, 2015 and December 31, 2014, we had unrestricted cash and cash equivalents of \$56.9 million and \$29.6 million, respectively and we believe we have sufficient liquidity to meet our obligations as they become due.

For the periods presented, we consolidated certain funds and ventures even though we had no or nominal equity interest in these entities, and we therefore reflected the cash flow activities for those funds and ventures as part of our Consolidated Statements of Cash Flow. As reflected on our consolidated balance sheets, the cash held by these CFVs was reported in "Restricted cash," rather than as cash and cash equivalents because the Company does not have legal title to this cash. Therefore, the net increase to cash and cash equivalents is representative of the change only to MMA's cash (i.e., without the cash of CFVs); however, the individual operating, investing and financing categories include cash flow activity for MMA and the CFVs. The tables below provide the cash activity related to both MMA and the CFVs.

Other	1,744	433	1,311
Net cash (used in) provided by operating activities	\$ (4,716)	\$ 402	\$ (5,118)

Cash flows used in operating activities were \$5.1 million higher during the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014.

During the second and third quarters of 2015, we funded \$6.8 million of loans held for sale through our new renewable energy capital business. As required by U.S. generally accepted accounting principles (“GAAP”), the amount of cash used to fund these loans was recognized as an operating activity because these loans were classified as held for sale for accounting purposes.

Through the first nine months of 2015, net cash used in operating activities that were attributable to salaries and benefits increased \$2.3 million primarily as a result of higher bonus payments made by the Company in 2015, as well as due to the hiring of new employees associated with our new renewable energy business. In addition, interest income declined \$2.0 million primarily due to two bond restructurings that were completed during the first nine months of 2014. Furthermore, other income declined \$1.6 million primarily as a result of the conveyance of our LIHTC business to MGM in the fourth quarter of 2014, which resulted in less asset management fees to be earned and collected by the Company.

These impacts, which decreased operating cash flows, were partially offset by a decrease in interest paid of \$2.7 million as a result of the redemption of Company debt obligations during 2014. In addition, the Company incurred approximately \$2.8 million less general and administrative expenses and professional fees, primarily as a result of a discounted settlement of an obligation related to professional fees that was paid during the second quarter of 2014. Other operating activities generated \$1.3 million in cash during the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014 primarily as a result of interest received on the seller financing issued to MGM in connection with the sale of our LIHTC business. These amounts were not recognized in income. Rather, such amounts were recognized as a deferred gain since the conveyance of our LIHTC business was not reported by the Company as a sale.

Investing activities

The following table provides information about cash flows associated with investing activities of MMA:

(in thousands)	For the nine months ended		
	September 30, 2015	September 30, 2014	Change
Proceeds from the sale of real estate and other investments	\$ 37,533	\$ 61,178	\$ (23,645)
Principal payments and sales proceeds received on bonds and loans	29,255	9,916	19,339
Capital distributions received from investments in partnerships	129		129
Investments in partnerships and real estate	(25,633)	(3,111)	(22,522)
Decrease in restricted cash	17,616	11,584	6,032
Purchase of bonds	(15,123)	(8,380)	(6,743)
Purchase, advances on and originations of loans	(449)	(7,950)	7,501
Net cash provided by investing activities	\$ 43,328	\$ 63,237	\$ (19,909)

Cash flows provided by investing activities during the nine months ended September 30, 2015 declined \$19.9 million compared to the nine months ended September 30, 2014.

For the nine months ended September 30, 2015, proceeds from the sale of real estate and other investments declined \$23.6 million compared to that received in the nine months ended September 30, 2014. This decline is primarily the result of fewer real estate sales in 2015 as our non-performing asset portfolio has been reduced. Additionally, we

invested \$25.0 million in our newly formed Solar Joint Venture during the third quarter of 2015, which contributed to a \$22.5 million increase in cash used for investments in partnerships and real estate as compared to the nine months ended September 30, 2014. Furthermore, cash used for purchases of bonds increased by \$6.7 million primarily due to additional purchases during the third quarter of 2015.

The declines in investing cash flows discussed above were partially offset by an increase in principal payments and sales proceeds received on bonds and loans of \$19.3 million for the nine months ended September 30, 2015, compared to investing-related cash flows received during the same period in 2014. This increase was largely attributable to the collection of \$14.4 million in connection with the redemption of the bridge loan to MGM during the second quarter of 2015. The Company also received \$2.9 million related to a partial payment of the seller financing that was provided to MGM and that is reflected in "Proceeds from the sale of real estate and other investments" within investing activities.

Restricted cash decreased \$17.6 million for the nine months ended September 30, 2015 primarily due to the purchase of two bonds that were referenced in two total return swaps. Such agreements were terminated during the third quarter of 2015. Additionally, we used \$7.5 million less cash for purchases, advances on and originations of loans during the nine months ended September 30, 2015, as compared to the same period in 2014.

Financing activities

The following table provides information about cash flows associated with financing activities of MMA:

(in thousands)	For the nine months ended		
	September 30,		Change
	2015	2014	
Proceeds from borrowing activity	\$ 32,743	\$	\$ 32,743
Repayment of borrowings	(37,232)	(75,288)	38,056
Purchase of treasury stock	(6,547)	(6,938)	391
Payment of debt issuance costs	(301)	(1,600)	1,299
Net cash used in financing activities	\$ (11,337)	\$ (83,826)	\$ 72,489

Cash flows used in financing activities were \$72.5 million lower during the nine months ended September 30, 2015 as compared to the nine months ended September 30, 2014.

The decrease in cash used in financing activities was primarily due to a \$38.1 million decrease in our repayment of borrowings. During 2014, the repayment of borrowings was primarily comprised of payments of \$55.6 million that were made to repurchase bonds, payment of which were reported as the repayment of secured borrowings for reporting purposes, as well as an \$11.5 million payment of a note payable. During 2015, the repayment of borrowings was largely due to (i) \$16.1 million of principal payments made in connection with subordinate debt that was issued by MFH, (ii) \$11.6 million of cash used to terminate one of the total return swap financings associated with our preferred stock investments and (iii) \$6.2 million of cash used to repurchase a bond (but whose cash outlay was reported by the Company as a repayment of a secured borrowing in connection with the termination of a related total return swap financing agreement).

The decrease in cash used in financing activities was also attributable to a \$32.7 million increase in proceeds from borrowing activities which was primarily a result of proceeds of \$25.6 million generated from total return swap financing arrangements that were entered into during the first nine months of 2015. The Company also received \$7.2 million from loans conveyed to the Solar Joint Venture, cash payments of which are included in "Proceeds from borrowing activity" since the conveyance of such loans were reported as a secured borrowing.

Off-Balance Sheet Arrangements

In the fourth quarter of 2014, we provided \$15.9 million of seller financing to MGM for the sale of substantially all of our LIHTC asset management operations including our general partner interests in 11 guaranteed LIHTC Funds. We did not record the seller financing in our Consolidated Balance Sheet because we retained the yield guarantee to the investors in the 11 guaranteed LIHTC Funds. During the second quarter of 2015, MGM paid \$2.9 million of the seller financing, bringing the off-balance sheet receivable from MGM in this case to \$13.0 million. We recorded the cash collected of \$2.9 million to deferred gain through “Other Liabilities.” See Notes to Consolidated Financial Statements – Note 5, “Other Assets,” for more information.

Debt

The table that follows below summarizes the carrying values of weighted-average interest rates of the Company's debt obligations that were at September 30, 2015. See Notes to Consolidated Financial Statements – Note 6, "Debt," for more information.

(dollars in thousands)	September 30, 2015	Weighted-Average Interest Rate at September 30, 2015	
Asset Related Debt (1)			
Notes payable and other debt – bond related	\$ 89,405	1.4	%
Notes payable and other debt – non-bond related debt	16,742	11.1	
Total asset related debt	106,147	2.9	
Other Debt (1)			
Subordinate debt	133,286	2.9	
Notes payable and other debt	29,377	4.1	
Total other debt	162,663	3.1	
Total asset related debt and other debt	268,810	3.0	
Debt related to CFVs	6,712	5.3	
Total debt	\$ 275,522	3.1	

⁽¹⁾ Asset related debt is debt, which finances interest-bearing assets. The interest expense from this debt is included in "Net interest income" on the Consolidated Statements of Operations. Other debt is debt, which does not finance interest-bearing assets. The interest expense from this debt is included in "Interest expense" under "Operating and other expenses" on the Consolidated Statements of Operations.

Asset Related Debt

Notes Payable and Other Debt – Bond Related

These debt obligations pertain to bonds that are classified as available-for-sale and that were financed by the Company through total return swaps. See Notes to Consolidated Financial Statements – Note 6, "Debt," for more information.

Other Debt

Subordinate debt

At September 30, 2015, the Company had subordinate debt with a UPB of \$124.0 million and carrying value of \$133.3 million. The weighted average yield of such debt was 2.9%. The carrying value of such debt includes \$12.0 million of net premiums that will amortize into net interest income as a reduction to debt expense over the life of the debt. Such impacts will be offset by \$2.7 million of unamortized debt issuance costs that will amortize as an increase to interest expense over the remaining life of the debt.

Notes payable and other debt

This debt pertains to the Company's investments in preferred stock that were financed by the Company through total return swaps. During the first quarter of 2015, the Company repaid \$11.6 million of this debt while \$25.0 million of the UPB of such debt was extended and now matures on March 31, 2016. See Notes to Consolidated Financial Statements Note 3, "Investment in Preferred Stock," for more information. This debt is non-amortizing and bears an interest rate of 3-month LIBOR plus 400 bps (4.3% at September 30, 2015) that resets on a quarterly basis. This debt was terminated on October 30, 2015. See Notes to Consolidated Financial Statements – Note 6, "Debt," for more information.

Covenant Compliance and Debt Maturities

At September 30, 2015, the Company was not in default under any of its debt arrangements.

Guarantees

The following table provides information about the maximum exposure and guaranty obligation recognized in the Company's Consolidated Balance Sheets:

	At September 30, 2015	
(in thousands)	Maximum Exposure	Carrying Amount
Indemnification contracts	\$ 13,209	\$ 614

The Company recognized a guaranty obligation for its obligation to stand ready to perform in connection with guarantees that it underwrote in connection with investor yields on certain third party LIHTC Funds and property performance on certain third party LTPPs. Such guarantees will expire by December 31, 2017.

The Company does not have any recourse provisions that would enable it to recover from third parties any of the amounts that would be required to be paid under such guarantees. The Company made no cash payments related to these indemnification agreements for the nine months ended September 30, 2015 and 2014.

The Company's maximum exposure under its indemnification contracts represents the maximum loss the Company could incur under its guarantee agreements and is not indicative of the likelihood of the expected loss under the guarantee. The Company also has guarantees associated with certain consolidated LIHTC Funds. See Notes to Consolidated Financial Statements – Note 15, "Consolidated Funds and Ventures."

Debt Related to CFVs

At September 30, 2015, debt related to CFVs includes a \$6.7 million debt obligation of one of the consolidated LIHTC Funds. At September 30, 2015, the carrying value of this debt, which is due on demand, equals its UPB and its weighted average yield is 5.3%.

Company Capital

Common Shares

As of September 30, 2015, the Board had authorized total stock repurchases of up to 2.05 million shares. Between October 1, 2015 and November 6, 2015, we repurchased 56,260 shares at an average price of \$12.97. As of November 6, 2015, the Company had repurchased 2.0 million shares at an average price of \$9.13 since the plan's inception. The maximum price at which management is authorized to purchase shares is \$13.92 per share.

Dividend Policy

The Board makes determinations regarding dividends based on management's recommendation, which is based on an evaluation of a number of factors, including our common shareholders' equity, business prospects and available cash. We do not expect to pay a dividend for the foreseeable future.

Tax Benefits Rights Agreement ("Rights Plan")

Effective May 5, 2015, the Company adopted a Rights Plan. In connection with adopting the Rights Plan, the Company declared a distribution of one right per common share to shareholders of record as of May 15, 2015. The rights will not trade apart from the current common shares until the distribution date, as defined in the Rights Plan.

Under the Rights Plan, should a new investor acquire greater than a 4.9% stake in the Company, all existing shareholders other than the new 4.9% holder will be provided the opportunity to acquire new shares for a nominal cost, thereby significantly diluting the ownership interest of the acquiring person. The Rights Plan will run for a period of five years, or until the Board determines the plan is no longer required, whichever comes first. See Income Taxes section below for more information.

Bond Portfolio

The table below provides key metrics related to all bonds in which we have an economic interest, including bonds that are not recognized for financial statement purposes but for which the Company maintains economic risks and rewards through total return swaps that the Company executed and accounts for as derivatives as of September 30, 2015. See Notes to Consolidated Financial Statements – Note 7, “Derivative Instruments” for more information about total return swaps that are accounted for as derivative instruments.

(1) Non-performing is defined as bonds that are 30+ days past due in either principal or interest.

(2) This amount includes subordinate bonds with must-pay coupons with a UPB of \$7.6 million and a fair value of \$4.3 million.

(3) Subordinate cash flow bonds do not have must-pay coupons and are payable out of available cash flow only. A portion of the debt service has been collected on these bonds over the preceding 12 months, however, debt service is not calculated on these bonds as non-payment of debt service is not a default.

(4) The weighted average pay rate represents the cash interest payments collected on the bonds as a percentage of the bonds' average UPB for the preceding 12 months for the population of bonds at September 30, 2015.

(5) Debt service coverage is calculated on a rolling 12-month basis using property level information as of the prior quarter-end for those bonds with must pay coupons.

(6) The weighted average coupon and pay rate of the multifamily tax-exempt bonds and total bond portfolio excludes the population of subordinate cash flow bonds where non-payment of debt service is not a default.

(7) Includes 10 bonds financed by TRSs and accounted for as derivatives. These 10 bonds had a UPB of \$87.3 million and a fair value of \$91.7 million and were subject to TRSs with a notional amount of \$88.7 million, for a net

derivative asset value of \$3.0 million. This amount also includes an additional 10 bonds financed by TRSs accounted for as a secured borrowing. These bonds had a UPB of \$87.8 million and a fair value of \$92.2 million and were subject to TRSs with a notional amount of \$89.6 million.

Real Estate Investments

At September 30, 2015, our U.S. real estate investments had a GAAP carrying amount of \$25.1 million with an estimated fair value of \$29.2 million. Of the \$25.1 million GAAP carrying amount, \$22.5 million was reported through investments in partnerships and \$2.6 million was reported through other assets. At September 30, 2015, our U.S. real estate investments were comprised of interests in real estate partnerships that invest in commercial real estate, land and affordable multifamily rental properties as well as a direct land investment. The Company estimates the fair value of its interests in real estate partnerships and direct land investments using various valuation techniques including discounting the expected cash flows from such investments, appraisals and other indications of fair value, including sale agreements and letters of intent to purchase if available.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements is based on the selection and application of U.S. GAAP, which requires us to make certain estimates and assumptions that affect the reported amounts and classification of the amounts in our consolidated financial statements. These estimates and assumptions require us to make difficult, complex and subjective judgments involving matters that are inherently uncertain. We base our accounting estimates and assumptions on historical experience and on judgments that are believed to be reasonable under the circumstances known to us at the time. Actual results could differ materially from these estimates. We applied our critical accounting policies and estimation methods consistently in all material respects and for all periods presented, and have discussed those policies with our Audit Committee.

We believe the following accounting policies involve a higher degree of judgment and complexity and represent the critical accounting policies and estimates used in the preparation of our consolidated financial statements.

Valuation of Bonds

Our bond portfolio includes mortgage revenue bonds and other municipal bonds. We account for investments in bonds as available-for-sale debt securities under the provisions of ASC No. 320, "Investments – Debt and Equity Securities." Accordingly, these investments in bonds are carried at fair value with changes in fair value (excluding other-than-temporary impairments) recognized in other comprehensive income. For most of our performing bonds, we estimate fair value using a discounted cash flow methodology; specifically, the Company discounts contractual principal and interest payments, adjusted for expected prepayments. The discount rate for each bond is based on expected investor yield requirements adjusted for bond attributes such as the expected term of the bond, debt service coverage ratio, geographic location and bond size. If observable market quotes are available, we will estimate the fair value based on such quoted prices. For non-performing bonds (i.e., defaulted bonds as well as certain non-defaulted bonds that we deem at risk of default in the near term), we estimate the fair value by discounting the property's expected cash flows and residual proceeds using estimated discount and capitalization rates, less estimated selling costs. However, to the extent available, the Company may estimate fair value based on a sale agreement, a letter of intent to purchase, an appraisal or other third-party indications of fair value. There are significant judgments and estimates associated with forecasting the estimated cash flows related to the bonds or the underlying collateral for non-performing bonds, including macroeconomic conditions, interest rates, local and regional real estate market conditions and individual property performance. In addition, the determination of the discount rates applied to these cash flow forecasts involves significant judgments as to current credit spreads and investor return expectations. The bonds reflected on the Consolidated Balance Sheets at September 30, 2015 were priced on average at approximately 96% of the portfolio's UPB.

Consolidated Funds and Ventures

We have equity investments in partnerships and other entities that primarily hold or develop real estate. In most cases our legal interest in these entities is minimal; however, we apply ASC No. 810, "Consolidation" in order to determine if we need to consolidate any of these entities. There is considerable judgment in assessing whether to consolidate an entity under these accounting principles. Some of the criteria we are required to consider include:

- The determination as to whether an entity is a variable interest entity ("VIE").
- If the entity is considered a VIE, then the determination of whether we are the primary beneficiary of the VIE is needed and requires us to make judgments regarding: (1) our power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and (2) our obligation to absorb losses of the VIE that could potentially be significant to the VIE or our right to receive benefits from the VIE that could potentially be significant to the VIE. These assessments require a significant analysis of all of the variable interests in an entity, any related party considerations and other features that make such an analysis difficult and highly judgmental.

If the entity is required to be consolidated, then upon initial consolidation, we record the assets, liabilities and noncontrolling interests at fair value. As of September 30, 2015, all of our CFVs were investment entities that own real estate or real estate related investments and, as such, we make judgments related to the forecasted cash flows to be generated from the investments such as rental revenue and operating expenses, vacancy, replacement reserves and tax benefits (if any). In addition, we must make judgments about discount rates and capitalization rates.

Income Taxes

We are a limited liability company that elected to be taxed as a corporation for income tax purposes. All of our business activities, with the exception of our foreign investments and managing member interests in two remaining LIHTC Funds, are conducted by entities included in our consolidated corporate federal income tax return.

ASC No. 740, "Income Taxes," establishes financial accounting and reporting standards for the effect of income taxes. The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current period and deferred tax assets and liabilities for future tax consequences of events that have been recognized in an entity's financial statements or tax returns. Significant judgment is required in determining and evaluating income tax positions, including assessing the relative merits and risks of various tax treatments considering statutory, judicial and regulatory guidance available regarding the tax position. We establish additional provisions for income taxes when there are certain tax positions that could be challenged and it is more likely than not these positions will not be sustained upon review by taxing authorities. Judgment is also required in assessing the future tax consequences of events that have been recognized in our consolidated financial statements or tax returns as well as the recoverability of our deferred tax assets. In assessing our ability to realize the benefit of our deferred tax assets and thereby measuring the required valuation allowance, we consider information such as forecasted earnings, future taxable income and tax planning strategies, all of which entail significant judgment.

As of December 31, 2014, we had an estimated \$418.2 million of federal net operating losses representing a significant potential asset of the Company, subject to a full valuation allowance as of that measurement date as discussed above. As discussed in our 2014 Annual Report filed on Form 10-K, there are a number of risks associated with the potential ability of the Company to use the net operating losses, including: 1) change of control for the Company; 2) lack of taxable income generated before expiration of the carryforward period beginning in 2027; and 3) potential challenges from tax authorities. On May 5, 2015, the Board adopted a Rights Plan to potentially mitigate the risk of a change of control event. Although the Rights Plan is generally an effective deterrent against, it does not absolutely prevent, a change of control and it could be subject to challenge following a trigger event. The Rights Plan will run for a period of five years, or until the Board determines the plan is no longer required, whichever comes first.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our filings and submissions to the Securities and Exchange Commission (the "SEC") under the Exchange Act is recorded, processed, and reported within the time periods specified in the SEC's rules and forms. Such controls include those designed to ensure that information is accumulated and communicated to management, including our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), as appropriate, to allow timely decisions regarding required disclosures.

An evaluation was conducted under the supervision and with the participation of management, including the CEO and CFO, on the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based on this evaluation, the CEO and CFO concluded that our disclosure

controls and procedures were effective as of September 30, 2015.

Changes in Internal Control Over Financial Reporting During the Quarter Ended September 30, 2015

There were no changes in our internal control over financial reporting for the quarter ended September 30, 2015 that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Except as described below, we are not, nor are any of our subsidiaries, a party to any material pending litigation or other legal proceedings. Furthermore, to the best of our knowledge, we are not party to any threatened litigation or legal proceedings, which, in the opinion of management, individually or in the aggregate, would be likely to have a material adverse effect on our results of operations or financial condition.

The Company was a defendant in a purported class action lawsuit originally filed in 2008. The plaintiffs claimed to represent a class of investors in the Company's shares who allegedly were injured by misstatements in press releases and SEC filings between May 3, 2004 and January 28, 2008. The plaintiffs sought unspecified damages for themselves and the shareholders of the class they purported to represent. The class action lawsuit was brought in the United States District Court for the District of Maryland. The Company filed a motion to dismiss the class action, and in June 2012, the Court issued a ruling dismissing all of the counts alleging any knowing or intentional wrongdoing by the Company or its affiliates, directors and officers. The plaintiffs appealed the Court's ruling and on March 7, 2014, the United States Court of Appeals for the Fourth Circuit unanimously affirmed the lower Court's ruling. As a result of these rulings, the only counts remaining in the class action related to the Company's dividend reinvestment.

The parties negotiated a settlement agreement, which was submitted to the United States District Court for the District of Maryland for approval. On September 24, 2015, the Court approved the settlement agreement. On September 25, 2015, the court entered an order dismissing the case in light of the settlement. The settlement provides for a maximum of \$826,820 to cover payments to the class as well as the attorneys for the plaintiffs' counsel. The settlement is a claims-made settlement, in which payments will be made only to those plaintiffs who submit a claim and whose claim is approved, so the final settlement amount to the class could be less than the amount stated above.

The Company will not incur any settlement costs, as all costs, including both class payments and plaintiffs' attorneys' fees, will be paid directly by its insurance company. As a result, the Company released the litigation reserve of \$0.5 million during the first quarter of 2015.

Item 1A. Risk Factors
