1. Interim Report For The 105th Business Term From January 1, 2005 to June 30, 2005 Canon Inc.
-

To Our Shareholders

We are pleased to present our report for the first half of our 105th business term (from January 1, 2005 to June 30, 2005).

Reviewing conditions in both the domestic and overseas economies during the first half of the current fiscal year, the U.S. economy was on a steady growth track, as evidenced by a gradual increase in personal consumption and improvement in employment condition, although a number of factors, such as a series of interest rate rise and jumps in the crude oil price, limited economic growth. The European economies remained flat as a whole, due to various factors, including stagnant domestic demand. On the other hand, Asian economies continued to show strong growth particularly in China, although the growth rate was somewhat slowing. As for Japan, the economy remained firm with capital investments showing gradual improvement and personal consumption taking a favorable turn toward the end of the first half. In the foreign exchange markets, the yen strengthened against the U.S. dollar, but weakened against the euro, compared to the first half of 2004.

Looking at the markets in which we conduct business, growth of the domestic market for digital cameras and digital video cameras slowed down somewhat, but it continued to expand at overseas. The market for networked multifunctional devices and printers grew moderately on account of increasing demand for the multifunctionality and color. In the market for semiconductor production equipment, demand weakened due to such factors as the restrained capital investment by semiconductor manufacturers. Demand for mirror projection mask aligners for LCDs, however, was robust due to stronger capital investment by LCD panel manufacturers.

Amid these business conditions, Canon entered the final year of Phase II (2001 to 2005) of its Excellent Global Corporation Plan, and implemented various measures throughout the Group to establish a solid business foundation. In particular, we focused on reforming the development process and promoting the automation of production through the joint efforts of our development, production engineering and manufacturing departments, believing that it was vital to further improve the speed of introducing new products into the market and price competitiveness in order to surpass our competitors in the severe business environment. Furthermore, as for the production of digital cameras, we increased our production capacity by setting

up a state-of-the-art factory in Oita city, which handles all stages from production of lenses, the mounting process of printed circuit boards to assembly, in preparation for anticipated severe international competition.

As a result of these efforts, our earnings during the first half of the current fiscal year remained strong, as it was in the second half of the previous fiscal year. We recorded consolidated net sales of 1,755.8 billion yen (up 6.5% from the first half of 2004), consolidated income before income taxes and minority interests of 283.7 billion yen (up 9.1%), and consolidated net income of 175.3 billion yen (up 9.0%). On a non-consolidated basis, we recorded net sales of 1,158.5 billion yen (up 7.4%), ordinary profit of 210.1 billion yen (up 6.3%) and net income of 137.9 billion yen (up 8.6%). All of these figures were historic highs.

We have decided to pay an interim dividend of 32.50 yen per share (up 7.50 yen from the interim dividend for the previous business term) from August 26.

Looking ahead to the second half of the current fiscal year, while we expect the global economy to remain fairly stable, we believe that the market competition will intensify and our business environment will continue to be uncertain. Under these conditions, the Canon Group will work together as a single unit to tackle management reforms, in order to achieve the successful completion of Phase II of the Excellent Global Corporation Plan.

We look forward to your continued support and encouragement in the future.
August 2005

FUJIO MITARAI
President & C.E.O.

Regarding the segment of Business Information Products within the Business Machines category in the consolidated information above, there were no sales on a non-consolidated basis.

Consolidated

Non-Consolidated

n Business Machines Operations

Office Imaging Products

While sales of color and digital devices were firm, competition continued to be fierce due to a continuing decline in prices.

As for office-use color machines in our imageRUNNER series digital networked multifunctional devices, sales grew as revenue from the medium-speed iR C3220/2620 series and iR C3100 series continued to be firm, and the marketing area of the high-speed iR C5800 series was expanded. Furthermore, in May 2005, we launched in Japan the iR C3170/2570 series as the follow-up to the iR C3100 series, which has increased our product strength and competitiveness. For the office-use black-and-white machines, business performance was firm as a result of our efforts to strengthen our product lineup and expand sales, such as the commencement of full-scale global marketing activities of our high-performance, medium-speed iR4570/3570/2870/2270 series featuring low power consumption and compact size, which was launched domestically last year. We also introduced the high-speed iR6570/5570 series that is highly productive and energy saving, starting from the launch to the domestic market in March 2005.

For solutions business, we worked aggressively to propose workflow solutions that match clients' needs by taking advantage of our Multifunctional Embedded Application Platform (MEAP) incorporated in our imageRUNNER series machines, which offer users an expanded range of functions, and by strengthening our software line-up of imageWARE series. These efforts contributed to the sales growth of the imageRUNNER series and other products.

For products targeting individuals and small-business owners, as the customer demand has shifted to multifunctional digital devices, we strove to expand sales through enhancing our product lineup. We started marketing the Satera MF5750/5730/3110 series black-and-white devices, which was introduced into the Japanese market last year, in the overseas markets. We also introduced Satera MF8170 into the domestic market, the world's first color machine for A4-size printing, which was launched in the North American market last year.

As a result of these activities, sales for this segment grew 2.4% on a consolidated basis, and 4.9% on a non-consolidated basis, compared to the first half of 2004.

5

Computer Peripherals

In inkjet printers, while demand grew for digital photo printers, a fierce competition for market share continued in terms of price and functions. Under the brand name of PIXUS for the Japanese market and PIXMA for overseas markets, we aggressively marketed our products that incorporate FINE, a high-precision print head technology that features both high-speed printing and extremely fine ink droplets, and PictBridge, an industry standard that enables easy direct printing from digital cameras. In particular, sales of our key models such as PIXUS iP3100/4100 continued to be strong as was last year, and we strengthened the lineup of our products by offering PIXUS iP9910, a model that can handle A3 wide paper. In the multifunctional inkjet machines market where demand continues to increase rapidly, we endeavored to expand sales by launching the affordable PIXMA MP110/130 for overseas, in addition to our PIXUS MP770 which generated solid revenue. As a result, sales of the inkjet printers grew.

As for laser beam printers, our OEM-brand products, both black-and-white and color, grew in terms of volume, contributing to favorable sales, against the background of robust demand of low-priced products. For Canon-brand products, an array of new products were released, including Satera LBP3000 and Satera LBP3210 black-and-white printers capable of printing A4 papers, Satera LBP5200 color printer capable of printing A4 papers, and Satera LBP5900/5600 newly-developed color printer capable of printing A3 papers that features high-speed four tandem engines. In addition, in an effort to propel our solution business, we launched a system named MEAP-Lite, that would expand printer functions enabling us to meet the mode of operation and needs of the customers in a precise manner.

Regarding image scanners, our new CanoScan LiDE 500F received high praise for its slim design and its unique 3-way position scan style. Also, sales were strong for our inkjet fax machines, both for the FAX-B820 for the overseas markets and for the FAXPHONE series for the domestic market.

As a result of these activities, sales for this segment grew 8.9% on a consolidated basis, and 12.5% on a non-consolidated basis compared to the first half of 2004.

7

Business Information Products

The demand for business-use document scanners marketed by Canon Electronics, Inc. continued to expand against the background of a trend toward document digitization. We recorded strong sales thanks to our DR series that continued to show brisk sales and the contribution from new products such as our affordable DR-2580C/2050C series and the mid-level DR-5010C.

With regard to calculators marketed by Canon Electronics Business Machines (H.K.) Co., Ltd., print-capable calculators continued to be popular in the U.S. The company also focused to increase its sales at both Japanese and European markets by strengthening the marketing structure, but sales remained flat due to the market contraction. As for electronic dictionaries, the company promoted the marketing activities targeting the Japanese market focused on language study. As a result, overall sales increased due to both of wordtank V80, which is designed for Chinese language studying, and wordtank V30, which boasts numerous English learning functions, sustaining brisk sales. The company also introduced wordtank C50, which contains the contents of the Comprehensive Dictionary of Colloquial English for the first time in the industry.

As for servers and personal computers handled by Canon Sales Co., Inc., market demand held firm, supported by improvement in corporate earnings. However, sales reduced due to price reduction, etc.

Consequently, consolidated sales for this segment decreased 10.2% compared to the first half of 2004.

Note: For this segment, there were no sales on a non-consolidated basis.

Change in Sales
100 MILLIONS OF YEN

n Camera Operations

In digital cameras, we enjoyed a large sales growth in the single lens reflex (SLR) cameras market where demand stayed robust, thanks to the introduction of EOS Kiss Digital N, a follow-up model of the best-selling EOS Kiss Digital, and our efforts to promote its sales together with our EOS 20D, high-end amateur model. Sales of our flagship models, EOS-1Ds Mark II and EOS-1D Mark II, and our EF lens series products, also continued to be strong. In compact digital cameras, we released PowerShot S2 IS, PowerShot A520 and PowerShot A510, the three new models for the PowerShot series, and IXY DIGITAL 600 and IXY DIGITAL 55, the two new models for the IXY DIGITAL series, in an effort to boost sales. Furthermore, in the SELPHY series compact photo printers that use the industry-standard PictBridge technology, we launched the new SELPHY CP 600, which incorporates the DIGIC II image engine that further enhanced high speed and high image.

In digital video cameras, we bolstered our product lineup by introducing three new products including FV M30 KIT, in addition to our flagship XL2 KIT and IXY DV M3 KIT, released last year.

In film cameras, sales declined despite our effort of introducing three new models including the compact Autoboy N130 II.

In addition, we endeavored to bolster sales of the Power Projector SX50 LCD projector, which incorporates our AISYS new optical engine with reflective liquid crystal panel (LCOS) to achieve high resolution and brightness in a compact, low-cost unit.

As a result of these activities, sales for this segment increased 9.2% on a consolidated basis, but decreased 2.8% on a non-consolidated basis compared to the first half of 2004.

11

n Optical and Other Products Operations

Although the shipment volume was in a downward trend in the market for semiconductor production equipment as a whole, our sales were firm thanks to the fact that the semiconductor manufacturers in both Japan and Asia moved forward their investments in 12-inch wafer factories. In addition, we launched the FPA-5500iZa i-line stepper and FPA-6000ES6a KrF (krypton fluoride) stepper. However, fierce price competition in the market led to a decline in sales.

As for mirror projection mask aligners for LCDs, thanks to steady capital investment by LCD panel manufacturers in response to growing demand for products using LCD panels, demand for the MPA-7800, our fifth-generation mirror projection mask aligner for LCDs, grew briskly. Furthermore, as panel makers aggressively pursued the investment to increase the size and to lower the cost of panels for LCD TVs, we launched in advance of our competitors the MPA-8000 series, our seventh-generation mirror projection mask aligners for LCDs, which received high praise and pushed up sales significantly.

Regarding broadcast-use television lenses, while demand was stagnant at the Japanese market, sales recovered in both Europe and Asia, leading to stable revenue mainly from lenses for High Definition Television (HDTV) cameras, introduced last year. In addition, we focused on increasing the sales of HJ17eX7.6B and other handy-type lenses for HDTV cameras in our high-grade ENG lens series. As a result, sales rose steadily.

In medical equipment, sales of X-ray digital cameras in our CXDI series using Canon's proprietary sensor technology achieved solid growth. In addition, sales of our CR-DGi non-mydratic retinal digital camera remained robust, against the background of rising interest in preventing lifestyle-related diseases and spread of medical examinations.

As a result of these activities, sales for this segment grew 13.1% on a consolidated basis, and 20.7% on a non-consolidated basis compared to the first half of 2004.
