II. BUSINESS**1. Business Summary****A. Industry Status****(1) Characteristics of the Industry**

As of September 30, 2007, the number of domestic mobile phone subscribers reached 42.8 million and with a 88.4% penetration rate, and the Korean mobile communication market can be considered to have reached its maturation stage. However, considering the number of European countries with penetration rates exceeding 90%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services and other related contents.

	Total	42,801	40,197	38,342	36,586	33,592

(Data: Ministry of Information and Communication website)

Table of Contents**(3) Market Characteristics**

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. With the market penetration rate reaching as high as 88.4% (as of the end of September 2007), the customer base is continuing to expand to include elementary school and pre-school children. Although demand to date has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

3. Contingent Liabilities**A. Material Legal Proceedings****(1) Action for Monetary Damages**

- a) Parties to the litigation: G.Mate Inc. (plaintiff) vs. the Company (defendant)
- b) Overview: G.Mate alleged that the Company had engaged G.Mate to develop and deliver certain PDA units, but that the Company subsequently refused to take delivery of such units. G.Mate sought approximately Won 4.5 billion in damages.
- c) Progress: An initial mediation process, which was requested by G.Mate, was terminated in January 2007. G.Mate commenced a lawsuit, which is currently pending at the Seoul Central District Court.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk that the Company will be obligated to pay up to Won 4.5 billion in damages. But as G.Mate, to date, has been unable to produce detailed evidence in support of its claim and calculation of requested damages, the Company expects that the likelihood of a ruling against the Company to be low and the estimated impact on the Company's operations and finances should not be large; however, the actual results of the litigation and actual impact on impact on the Company's operations and finances may differ depending on future events.

(2) Actions for the Cancellation of Key Communication Business Licenses and Allotment of Satellite DMB Frequency

- a) Parties to the litigation: Korea Multinet vs. MIC (the Company is participating in the action on behalf of MIC)
- b) Overview: Korea Multinet brought an administrative action against MIC to cancel the Company's key communication business licenses and the allotment of the Company's satellite DMB frequency.
- c) Progress: The Seoul Administrative Court dismissed the claim in July 2006, and Korea Multinet has appealed to the Seoul Appellate Court where the lawsuit is currently pending.

- d) Impact on business: The Company plans to provide full support to MIC in the action although no significant impact to the Company's business is expected; however, the actual impact may differ depending on future events.

Independent Accountants' Review Report

English Translation of a Report Originally Issued in Korean

To the Stockholders and Board of Directors of

SK Telecom Co., Ltd.

We have reviewed the accompanying non-consolidated balance sheet of SK Telecom Co., Ltd. (the Company) as of September 30, 2007, the related non-consolidated statements of income for the three months and nine months ended September 30, 2007 and 2006, the non-consolidated statement of cash flows for nine months ended September 30, 2007 and 2006, and the non-consolidated statement of changes in stockholders' equity for nine months ended September 30, 2007, all expressed in Korean won. These financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our reviews.

We conducted our reviews in accordance with standards for review of interim financial statements in the Republic of Korea. Those standards require that we plan and perform the review to obtain moderate assurance as to whether the non-consolidated financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the financial statements referred to above are not presented fairly, in all material respects, in conformity with accounting principles generally accepted in the Republic of Korea.

We have previously audited, in accordance with auditing standards generally accepted in the Republic of Korea, the non-consolidated balance sheet of the Company as of December 31, 2006, and the related non-consolidated statements of income, appropriations of retained earnings and cash flows for the year then ended (not presented herein); and in our report dated February 14, 2007, we expressed an unqualified opinion on those non-consolidated financial statements. The accompanying balance sheet as of December 31, 2006, which is comparatively presented, does not differ in material respects from such audited non-consolidated balance sheet.

Our reviews also comprehended the translation of the Korean won amounts into U.S. dollar amounts and nothing has come to our attention that causes us to believe that such translation has not been made in conformity with the basis stated in Note 2(a). Such U.S. dollar amounts are presented solely for the convenience of readers of the financial statements.

Accounting principles and review standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting principles and practices and review standards and their application in practice.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the Republic of Korea, using the same accounting policies which were adopted in preparing the annual financial statements. Significant accounting policies followed in preparing the accompanying non-consolidated financial statements are summarized as follows:

a. **Basis of Presentation**

The Company maintains its official accounting records in Korean won and prepares statutory non-consolidated financial statements in Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations, changes in stockholders' equity or cash flows, is not presented in the accompanying financial statements.

The accompanying financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers of financial statements and has been made at the rate of ₩913.60 to US\$1.00, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the period ended September 30, 2007. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

b. Adoptions of New Statements of Korea Accounting Standards (SKAS)

On January 1, 2007, the Company adopted SKAS No. 11 and SKAS No. 21 through No. 24. The adoption of such accounting standards did not have an effect on the financial position of the Company as of September 30, 2007 and the ordinary income and net income of the Company for the three months and nine months ended September 30, 2007. Details of primary change due to such adoption of SKAS are as follows:

Pursuant to adoption of SKAS No. 21, Preparation and Presentation of Financial Statements , a statement of changes in stockholders equity was prepared for the nine months ended June 30, 2007. Certain amounts classified as capital adjustments through 2006 are classified as accumulated other comprehensive income (loss); such amounts include unrealized gain/loss on available-for-sale securities, equity in capital adjustments of affiliates and gain/loss on valuation of derivative instruments. In addition, certain amounts classified as investment assets through 2006 are classified as other non-current assets; such amounts include long-term loans, guarantee deposits, long-term deposits and others. The accompanying balance sheet as of December 31, 2006, which is comparatively presented, was reclassified in accordance with SKAS No. 21 and the statement of changes in stockholders equity for the nine months ended September 30, 2006 was not prepared as allowed in accordance with the transitional provision of SKAS No. 21.

c. Early adoption of revised SKAS No.2, Interim Financial Reporting

The Company early adopted SKAS No. 2 Interim Financial Reporting revised in May 2007, which requires company to prepare the statements of cash flows and changes in stockholders equity only for the accumulated interim period. Therefore, the statements of cash flows and changes in stockholders equity for the three months ended September 30, 2007 and 2006 have not been prepared.

d. Cash Equivalents

Cash equivalents are highly liquid investments and short term financial instruments, which are readily convertible without significant transaction cost, do not have significant risk of changes in interest rates, and with original maturities of three months or less.

e. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectibility of individual accounts and historical bad debt experience.

f. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities and supplies for sales promotion, are stated at the lower of cost or market value, with cost determined using the moving average method. The Company maintains perpetual inventory systems, which are adjusted to physical inventory counts performed at fiscal year end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. There was no such loss for the three months and nine months ended September 30, 2007 and 2006.

g. Securities (Excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity securities depending on the acquisition purpose and nature .

Table of Contents

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in accumulated other comprehensive income (loss) and the unrealized gains or losses are reflected in net income when the securities are sold or if there is an objective evidence of impairment such as bankruptcy of investees. Equity securities are stated at acquisition cost if fair value cannot be reliably measured.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current asset section of the balance sheet if their maturities are within one year; otherwise, such securities are recorded in the non-current section of the balance sheet.

h. **Equity Securities Accounted for Using the Equity Method**

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of stockholders' equity of the investee. Differences between the purchase cost and net asset fair value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized inter-company gains and losses are eliminated (See Note 4). In addition, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

When the Company's share of equity interest in the equity method investees increases as a result of capital transactions of the investees with (or without) consideration, the increase in the Company's proportionate shares in the investees are treated as goodwill or negative goodwill and when the Company's share of equity interest in the equity method investees decreases as a result of capital transactions of the investees with (or without) consideration, the decrease in the Company's proportionate shares in the investees are accounted for as gain or loss on disposal. However, if equity method investees are subsidiaries, such differences in the Company's proportionate shares in the investees are accounted for as capital adjustments of affiliates in the Company's stockholders' equity.

In translating the foreign currency statements of the Company's foreign-based investees, the Company applies (a) the current rate of exchange at the balance sheet date to the investee's balance sheet items (except historical rates applied for stockholders' equity), and (b) the average rate for the current period for income statement items. After translating the balance sheet and income statement items as noted above, the Company's portion of the amount after deducting the translated total liabilities from translated total assets and equity is recorded as capital adjustment of affiliates in the Company's stockholders' equity.

Table of Contents

i. Troubled Debt Restructuring

In cases where contractual terms such as the face amount, interest rate, or maturity are changed to alleviate the debtor's burdens in accordance with an agreement between the Company and the debtor or initiation of corporate reorganization procedures under court trustee or under debtor's management, the Company recognizes the restructured receivables at present value of the expected future cash flows discounted by a reasonable interest rate and amortizes the difference between face value and present value to interest income using the effective interest rate method.

j. Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4~30 years) of the related assets (See Note 6).

Interest expense and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

k. Intangible Assets

Intangible assets are recorded at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the nine months ended September 30, 2007 and 2006 were ₩325,475 million and ₩260,627 million, respectively, and for the three months ended September 30, 2007 and 2006 were ₩109,033 million and ₩89,367 million, respectively.

With its application for a license to provide IMT 2000 service, the Company has a commitment to pay ₩1,300,000 million to the Ministry of Information Communication (MIC) → ₩650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (4.44% as of September 30, 2007). The future payment obligations are ₩110,000 million (related present value discount: ₩6,908 million) in 2008, ₩130,000 million in 2009, ₩150,000 million in 2010 and ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from MIC, and recorded the total license cost (measured at present value) as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of ₩1,259,253 million and assumed the related long-term payable with principal amount of ₩650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016. As of September 30, 2007, the present value discount related to the current portion and long-term portion of payments to be made to MIC totaled ₩6,908 million and ₩25,218 million, respectively.

Table of Contents

l. Impairment Losses

When the recoverable amount of assets (that are not recorded at fair value) including investment assets (except for trading and available for sale investments in listed companies), property and equipment, and intangible assets is significantly less than the carrying value due to obsolescence, physical damage, decline in market value or other causes, the carrying value is reduced to the recoverable amount and any difference is charged to current operation as an impairment loss. The impairment loss for the nine months ended September 30, 2007 and 2006 were ₩369 million and nil, respectively.

m. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; and the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

n. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

o. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

p. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (See Note 24). When a possible range of loss in connection with a probable loss contingency as of the balance sheet date is estimable with reasonable certainty, and some amount within that range appears to be a better estimate than any other amount within the range, the Company accrues such amount. When no amount within the range appears to be a better estimate than any other amount, the minimum in that range is recorded.

The Company does not recognize the following contingent obligations as liabilities:

Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

Table of Contents

Present obligations arising out of past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future events or events outside the control of the Company.

q. **Accrued Severance Indemnities**

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities upon termination of their employment based on length of service and rate of pay. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are the Company's employees, totaling ~~₩22,721 million~~ and ₩23,895 million as of September 30, 2007 and December 31, 2006, respectively, are deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, the Company transferred a portion of its accrued severance indemnities to the National Pension Fund through March 1999. Such transfers, amounting to ~~₩50 million~~ as of September 30, 2007 and December 31, 2006, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to ~~₩3,514 million~~ and ₩257,989 million for the nine months ended September 30, 2007 and 2006, respectively.

Effective March 31, 2006, the Company changed its policy for the severance indemnities applicable to those employees who joined the Company before or on December 31, 2002 from cumulative method, where employees are entitled to get paid more than one month of salary each year depending on the length of service, to simple multiplier method, where employees are paid one month of salary each year regardless of their service period in accordance with the resolution of the Company's joint labor-management conference held on March 16, 2006. As a result of such policy change, the Company distributed early settlements to those eligible employees on their accumulated severance indemnities as of September 30, 2006 on a mandatory basis. In addition, the Company paid the additional bonuses of ₩125,890 million for those employees who received the mandatory distribution for their early settlement as compensation for those employees. The Company recorded such settlements as compensation costs as special severance indemnities in other expenses for the nine months ended September 30, 2006. In addition, the Company executed the early retirement program and the related special bonus of ₩18,131 million was paid to eligible employees and accounted for as special severance indemnities in other expenses for the nine months ended September 30, 2006.

r. Accounting for Employee Stock Option Compensation Plan

The Company adopted the fair value based method of accounting for its employee stock option compensation plan (See Note 16). Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock, expected dividends and the current risk-free interest rate for the expected life of the option. However, as permitted under Korean GAAP, the Company excludes the volatility factor in estimating the value of its stock options granted before December 31, 2003, which results in measurement at minimum value. The total compensation cost of an option estimated at the grant date is not subsequently adjusted for changes in the price of the underlying stock or its volatility, the actual life of the option, dividends on the stock, or the risk-free interest rate. In addition, recognized compensation costs related to stock options expired due to such stock options not being exercised within the exercisable period are transferred to other capital surplus from capital adjustments (See Note 13).

s. Accounting for Leases

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a lease term equal to 75% or more of the estimated economic life of the leased property or where the present value of minimum lease payments equals or exceeds 90% of the fair value of the leased property, are accounted for as capital leases. All other leases are accounted for as operating leases.

t. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ₩151,782 million and ₩153,294 million for the nine months ended September 30, 2007 and 2006, respectively, and ₩53,388 million and ₩51,539 million for the three months ended September 30, 2007 and 2006, respectively. In addition, external research and development costs were ₩55,956 million and ₩49,702 million for the nine months ended September 30, 2007 and 2006, respectively, and ₩17,769 million and ₩16,354 million for the three months ended September 30, 2007 and 2006, respectively.

u. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the date of the transactions. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet date, which were ₩920.70 and ₩929.60 to US\$1.00 at September 30, 2007 and December 31, 2006, respectively. The resulting gains or losses arising from the translation or settlement of such assets and liabilities are included in current operations.

v. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of

Table of Contents

derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as accumulated other comprehensive income (loss) and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

w. Revenue Recognition

Operating revenue is recognized when cellular telephone communication and related services are provided.

x. Income Tax

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Deferred income tax assets and liabilities are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes (See Note 17).

y. Handset Subsidies to Long-term Mobile Subscribers

Effective March 27, 2006, the Telecommunication Law of Korea was revised to allow wireless carriers to provide handset subsidies to customers who have maintained their wireless account with the same carrier for 18 months or longer and who have not received such subsidies within the last two years to acquire new or renewed customer relationships. The Company commenced its handset subsidy program on the effective date of the revised Telecommunications Law and included a clause in the service contract which allows the Company to change the terms of its subsidy program, including the Company's ability to terminate the program at any time after a thirty day notice to its customers. The Company charges such handset subsidies to commissions paid as the related payments are made.

z. Reclassifications

Certain reclassifications have been made in prior period's financial statements to conform to classifications used in the current period. Such reclassifications did not have an effect on the previously reported net assets as of December 31, 2006 and net income for the three months and nine months ended September 30, 2006.

(note b) The Company recorded its investments in common stock of LG Powercomm Co., Ltd. at its fair value, which was estimated with the assistance of an outside professional valuation company using the present value of expected future cash flows. The unrealized loss on valuation of investments amounting to ₩115,908 million (net of tax effect of ₩43,965 million) as of December 31, 2006 was recorded as accumulated other comprehensive loss. Based in part, on the opinion of the outside professional valuation company, there was no significant change in LG Powercomm Co., Ltd.'s operation and financial results, which have an effect on the fair value of the investment, for the nine months ended September 30, 2007. Accordingly, no additional unrealized loss or recovery on valuation of such investments was recorded.

(note c) Due to the impairment of the Company's investments in common stock of Japan MBCO, the Company recorded impairment loss on such investments of ₩27,332 million for the year ended December 31, 2006.

(note d) As a reasonable estimate of fair value could not be made, the investment is stated at acquisition cost.

(note e) Due to the impairment of such bonds, the Company recorded an impairment loss of ₩10,656 million prior to December 31, 2004 and as of September 30, 2007, the principal amount of the bond has not been redeemed at its maturity.

(note f) In accordance with the resolution of the Company's board of directors dated August 20, 2007, convertible bonds of China Unicom Ltd. were converted into its common stocks and reclassified to available-for sale equity securities from available-for-sale debt securities. As a result of such conversion, the Company recorded gain on conversion of convertible bonds of ₩373,140 million for the nine months ended September 30, 2007.

(note g) On October 11, 2006, the Company purchased convertible bonds of Eonex Technologies, Inc. at face value of ₩1,000 million. Such convertible bonds can be converted into 7,142 shares of common stock of Eonex Technologies, Inc. at ₩140,000 per share during the period from April 1, 2007 to October 11, 2008. Unless either previously redeemed or converted, the notes are redeemable at 106% of the principal amount at maturity. If all such bonds are converted, the Company's equity interest in Eonex Technologies, Inc. will increase to 12.9%.

- (Note a) Investments were recorded using the equity method of accounting based on unaudited and unreviewed financial statements as of and for the nine months ended September 30, 2007. In order to verify the reliability of such unaudited and unreviewed financial statements, the Company has performed the following procedures and found no significant errors:
- i) obtained the signature from the chief executive officer of the equity method investee asserting that the unaudited and unreviewed financial statements are accurate
 - ii) checked whether the major transactions identified by the Company, including public disclosures, were appropriately reflected in the unaudited and unreviewed financial statements
 - iii) performed an analytical review on the unaudited and unreviewed financial statements
- (Note b) Investments in equity securities are carried using the equity method of accounting based on the financial statements as of December 31, 2006 as information as of September 30, 2007 was not available and the change in the Company's portion of stockholders' equity of the investee for the nine months ended September 30, 2007 was immaterial.
- (Note c) The Company received dividends from SK Telink Co., Ltd., SK C&C Co., Ltd. and Skytel Co., Ltd., and the corresponding amount was deducted from the carrying amount of equity method securities.
- (Note d) Other increase in investments in TU Media Corp. represents realization of equity in other comprehensive income of affiliates as TU Media Corp. became the Company's subsidiary as a result of the Company's additional investment in TU Media Corp. for the nine months ended September 30, 2007.
- (Note e) Other increase (decrease) in investments in equity securities of IHQ, Inc. and Helio, Inc. represent gains on disposal of investments in equity securities, which have resulted from the dilution of the Company's ownership as a result of capital transactions of the investees.
- (Note f) Other decrease in investments in Centurion IT Investment Association resulted from the collection of a portion of the Company's investment.
- (Note g) Other decrease in investments in Ntreev Soft Co., Ltd. represents the difference between the purchase cost and net asset value of the investee, which is offset against the Company's capital surplus as Ntreev Soft Co., Ltd. is the Company's subsidiary (See Note 13).
- (Note h) Other decrease in investments in Baba Club and Philio Co., Ltd. represents the goodwill recognized, which resulted from the Company's acquisition of a portion of BaBa Club and Philio Co., Ltd.'s assets and operational business units after the investment in equity securities of Baba Club and Philio Co., Ltd., respectively.

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years and principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of ₩235,625 per share of the Company's common stock, which was greater than market value at the date of issuance. Subsequently, the initial conversion price was changed to ₩211,099 per share in accordance with anti-dilution protection. The Company may redeem the principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of December 31, 2006 is 1,649,014 shares. During the nine months ended September 30, 2007, the conversion price was changed from ₩211,943 to

Table of Contents

₩211,099 and the number of shares to be converted was changed from 1,688,842 shares to 1,695,593 shares due to the payment of interim dividends in accordance with the resolution of the Company's board of directors dated July 1, 2007.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock. If this 49% ownership limitation is violated due to the exercise of conversion rights, the Company will pay a bond holder as cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days at the discretion of bond holders. [should they say how the choice is made between these two options? Refer to revised notes]. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to reduce the effect of fluctuation with respect to cash settlement payments that may be more or less than the proceeds from sales of treasury shares held in trust. Unless either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity.

During the year ended December 31, 2006, the convertible bonds with a principal amount of US\$25,210,000 were converted into 136,163 shares of treasury stock (See Note 15), and the principal amount of the convertible bonds decreased from US\$329,450,000 to US\$304,240,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩3,733 million (net of tax effect of ₩1,416 million).

During the nine months ended September 30, 2007, the conversion rights for the convertible bond with principal amount of US\$19,230,000 were exercised and ₩22,286 million of cash was paid to bond holders without delivering the Company's common stocks due to the 49% ownership limitation as explained above. Therefore, the principal amount of the convertible bonds decreased from US\$304,240,000 to US\$285,010,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩2,847 million (net of tax effect of ₩1,080 million).

Reserve for business expansion	6,151,138	5,266,138
Total	₩ 7,335,037	₩ 6,679,234

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

The Financial Control Regulation for listed companies in Korea requires that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income taxes, if any) on the disposal of property and equipment be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reaches 30%. The reserve for improvement of financial structure may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures for tax purposes. These reserves will be reversed from appropriated retained earnings in accordance with the relevant tax laws. Such reversal will be included in taxable income in the year of reversal.

d. Reserve for Business Expansion

The reserve for business expansion is voluntary and was approved by the board of directors and stockholders.

Table of Contents**15. TREASURY STOCK**

Upon issuances of stock dividends and new common stock, and the merger with Shinsegi Telecomm, Inc. and SK IMT Co., Ltd., the Company acquired fractional shares totaling 77,970 shares for ₩6,110 million through 2005. In addition, the Company acquired 8,584,445 shares of treasury stock in the market or through the trust funds for ₩2,040,995 million through 2005 in order to stabilize the market price of its stock. In addition, during the year ended December 31, 2006, the convertible bonds with principal amount of US\$25,210,000 were converted into 136,163 shares of common stock. Such conversion was settled by the Company by using its treasury stock with carrying value totaling ₩32,178 million, which resulted in loss on disposal of treasury stock of ₩7,887 million. In addition, the losses on disposal of treasury stock decreased by ₩337 million for the nine months ended September 30, 2007 to reflect the change in accumulated temporary differences related to treasury stock based on the prior year tax return.

On August 17, 2006, the Company retired 491,000 shares of treasury stock, which were acquired by the Company during the period from August 1, 2006 through August 14, 2006 for ₩92,518 million in accordance with a resolution of the board of directors dated July 28, 2006. On September 29, 2006, the Company retired 592,000 shares of treasury stock, which were acquired by the Company during the period from September 4, 2006 through September 27, 2006 for ₩116,559 million in accordance with a resolution of the board of directors dated August 31, 2006. In connection with the retired treasury stocks discussed above, the Company reduced its retained earnings before appropriations by ₩209,077 million in accordance with the Korean Commercial law.

There was no change in the shares of treasury stock for the nine months ended September 30, 2007.

16. STOCK OPTIONS

On March 17, 2000, March 16, 2001 and March 8, 2002, in accordance with the approval of its stockholders or its board of directors, the Company granted stock options to its management, representing 17,800 shares at an exercise price of ₩424,000 per share, 43,820 shares at an exercise price of ₩211,000 per share and 65,730 shares at an exercise price of ₩267,000 per share, respectively. The stock options will become exercisable after three years from the date of grant and shall be exercisable for two years from the first exercisable date. Upon exercise of stock options, the Company will issue its common stock. If the employees leave the Company within three years after the grant of stock options, such employees forfeit their unvested stock options awarded. Stock options representing 530 shares for which total compensation cost was ₩3 million were forfeited during the year ended December 31, 2004.

The value of stock options granted was determined using the Black-Scholes option-pricing model, without considering the volatility factor in estimating the value of its stock options, as permitted under Korean GAAP. The following assumptions are used to estimate the fair value of options granted in 2000, 2001 and 2002; risk-free interest rate of 9.1% for 2000, 5.9% for 2001 and 6.2% for 2002; expected life of three years for 2000, 2001 and 2002; expected dividend of ₩500 per share for 2000, 2001 and 2002. Under these assumptions, total compensation cost, the recognized compensation cost (included in labor cost) for the three months and nine months ended September 30, 2007 and 2006 and the outstanding balance of stock options in capital adjustments as of September 30, 2007 and December 31, 2006 are as follows (In millions of Korean won):
