A new approach for 2008

This year we've taken a new approach to how we report to our shareholders. In place of the Annual Review we have published this short summary and have moved to more dynamic reporting on our website, where you can also find our full Annual Report.

Our aim is to keep you updated on our top level results via this summary, while also giving you the opportunity to access more detailed information through the Internet.

We are now also able to give you the option to receive email notifications of our annual results, please see the Shareholder Information section overleaf for details.

Our strategy for the future

Earlier this year we launched our new strategic priorities:

Grow a diversified global business

Deliver more products of value

Simplify the operating model

Underpinning the strategic priorities, which are outlined in this summary, are a number of detailed plans. You can keep up to date with our progress throughout the year by visiting the new **Our mission and strategy** section of our website www.gsk.com/mission-strategy

Everyone at GSK has a part to play in putting these plans into action, to contribute to our challenging and inspiring mission - enabling people to do more, feel better and live longer.

Our strategy

Grow

a diversified global business

Deliver

more products of value

Simplify

the operating model

In 2008 we set out three new strategic priorities that aim to improve our long-term financial performance.

We believe these priorities will enable us to navigate the coming years successfully and retain our leading-edge as a company able to meet patients and payers needs into the future.

Results and strategic priorities 2008

**Grow a diversified
global business**

We are reducing risk by broadening and balancing our portfolio, diversifying into new product areas that show potential, while also fully capturing opportunities for our products across all geographic boundaries.

The plans which underpin this strategic priority:

Drive growth in the pharmaceutical business in our core markets

Deliver our ambitious vaccines forecast

Fulfil the potential of emerging markets

Expand our business in Japan

Grow the Consumer Healthcare business

Results and strategic priorities 2008

**Deliver more
products of value**

We are striving to build one of the strongest pipelines in the industry. We are transforming R&D to ensure that we not only deliver the current pipeline but are also able to sustain the flow of products for years to come.

The plans which underpin this strategic priority:

Focus on the best science

Diversify through externalisation

Re-personalise R&D

Focus on return on investment

**Simplify the
operating model**

GSK is a complex organisation. We recognise that we need to simplify our operating model further, changing the way we work, removing unnecessary processes and structures which slow us down and distract us from our mission.

The plans which underpin this strategic priority:

Evolve our commercial model

Re-shape manufacturing

Streamline our processes

Reduce working capital
