HERITAGE FINANCIAL CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the Three Months Ended March 31, 2014 and 2013

(Unaudited)

(1) Description of Business, Basis of Presentation and Significant Accounting
Policies

(a) Description of Business

Heritage Financial Corporation (the "Company") is a bank holding company that was incorporated in the State of Washington in August 1997. The Company is primarily engaged in the business of planning, directing and coordinating the business activities of its wholly-owned subsidiary Heritage Bank (the "Bank"). The Bank is a Washington-chartered commercial bank and its deposits are insured by the FDIC under the Deposit Insurance Fund. The Bank is headquartered in Olympia, Washington and conducts business from its thirty-six branch offices located throughout Washington state and the greater Portland, Oregon area. The Bank's business consists primarily of lending and deposit relationships with small businesses and their owners in its market areas and attracting deposits from the general public. The Bank also makes real estate construction and land development loans and consumer loans and originates first mortgage loans on residential properties located in western and central Washington State and the greater Portland, Oregon area.

The Company has expanded its footprint through acquisitions beginning with the FDIC-assisted acquisition of Cowlitz Bank ("Cowlitz"), a Washington chartered commercial bank headquartered in Longview, Washington effective on July 30, 2010. Heritage Bank entered into a definitive agreement with the FDIC, pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Cowlitz Bank (the "Cowlitz Acquisition"). The Cowlitz Acquisition included nine branches of Cowlitz Bank, including its division Bay Bank, which opened as branches of Heritage Bank on August 2, 2010. It also included the Trust Services Division of Cowlitz Bank. Effective November 5, 2010, Heritage Bank entered into a definitive agreement with the FDIC, pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Pierce Commercial Bank ("Pierce"), a Washington chartered commercial bank headquartered in Tacoma, Washington (the "Pierce Commercial Acquisition"). The Pierce Commercial Acquisition included one branch, which opened as a branch of Heritage Bank on November 8, 2010.

On September 14, 2012, the Company and the Bank entered into a definitive agreement to acquire Northwest Commercial Bank ("NCB"), a Washington chartered commercial bank headquartered in Lakewood, Washington (the "NCB Acquisition"). The NCB Acquisition was completed on January 9, 2013, with the merger of NCB into Heritage Bank. The NCB Acquisition included two branches, and one of those branches was consolidated into an existing Heritage Bank location.

On March 11, 2013, the Company entered into a definitive agreement to acquire Valley Community Bancshares, Inc. ("Valley" or "Valley Community Bancshares") and its wholly-owned subsidiary, Valley Bank, both headquartered in Puyallup, Washington (the "Valley Acquisition"). The Valley Acquisition was completed on July 15, 2013 and included eight branches, four of which were initially maintained by Heritage Bank following the completion of the transaction. At the time of the acquisition, one of the four branches, an owned branch building, was considered held for sale. During the fourth quarter of 2013, the leases for the remaining three leases were terminated by Heritage Bank.

On April 8, 2013, the Company announced the proposed merger of its two wholly-owned bank subsidiaries Central Valley Bank and Heritage Bank, with Central Valley Bank merging into Heritage Bank. The common control merger was completed on June 19, 2013 and on a consolidated basis had no accounting impact on the Company. Central Valley Bank now operates as a division of Heritage Bank.

On October 23, 2013, the Company, along with the Bank, and Washington Banking Company ("Washington Banking") and its wholly owned subsidiary bank, Whidbey Island Bank ("Whidbey"), jointly announced the signing of a merger agreement pursuant to which Heritage and Washington Banking will enter into a strategic merger with Washington Banking merging into Heritage, and immediately thereafter, Whidbey will merge with and into the Bank (the

"Washington Banking Merger"). Washington Banking branches will adopt the Heritage Bank name in all markets, with the exception of six branches in the Whidbey Island markets that will continue to operate using the Whidbey Island Bank name. The corporate headquarters of the combined company will be in Olympia, Washington. The Washington Banking Merger is anticipated to be completed in the second quarter of 2014. See "Note 13 - Proposed Merger" for additional information.

Table of Contents

(b) Basis of Presentation

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with Generally Accepted Accounting Principles (“GAAP”), for interim financial information, pursuant to the rules and regulations of the SEC. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. These Condensed Consolidated Financial Statements and accompanying Notes should be read with our December 31, 2013 audited Consolidated Financial Statements and the accompanying Notes included in our Annual Report on Form 10-K (“2013 Annual Form 10-K”). In our opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. In preparing the Condensed Consolidated Financial Statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Actual results could differ from those estimates. Estimates related to the allowance for loan losses, other than temporary impairments in the fair value of investment securities, expected cash flows of purchased loans and related indemnification asset, fair value measurements, stock-based compensation, impairment of goodwill and other intangible assets and income taxes are particularly subject to change.

Certain prior period amounts have been reclassified to conform to the current period’s presentation. Reclassifications had no effect on prior periods’ net income or stockholders’ equity.

(c) Significant Accounting Policies

The significant accounting policies used in preparation of our Condensed Consolidated Financial Statements are disclosed in our 2013 Annual Form 10-K. There have not been any material changes in our significant accounting policies from those contained in our 2013 Annual Form 10-K.

(d) Recently Issued Accounting Pronouncements

FASB ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, A Similar Tax Loss, or a Tax Credit Carryforward Exists, was issued in July 2013. This Update provides that an unrecognized tax benefit, or a portion thereof, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except to the extent that a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date to settle any additional income taxes that would result from disallowance of a tax position, or the tax law does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, then the unrecognized tax benefit should be presented as a liability. These amendments are effective for interim and annual reporting periods beginning after December 15, 2013. The adoption of this amendment did not have a material impact on the Condensed Consolidated Financial Statements.

FASB ASU 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure, was issued in January 2014. This Update intends to reduce diversity in practice by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendment states that the real estate property should be recognized upon either the creditor obtaining legal title or the borrower conveying all interest through a deed in lieu of foreclosure or similar legal agreement. These amendments are effective for interim and annual reporting periods beginning after December 15, 2014. Early adoption is permitted. The Company adopted the amendments in first quarter of 2014. The adoption did not have an impact on the Condensed Consolidated Financial Statements.

(2) Cash and Cash Equivalents

Since the fourth quarter of 2013, the Company has been required to maintain an average reserve balance with the Federal Reserve or maintain such reserve balance in the form of cash. The average required reserve balance for the

three months ended March 31, 2014 was approximately \$46.1 million and was met by holding cash and maintaining an average balance with the Federal Reserve. The Company did not have a cash reserve requirement for the three months ended March 31, 2013.

Table of Contents

(3) Investment Securities

The Company's investment policy is designed primarily to provide and maintain liquidity, generate a favorable return on assets without incurring undue interest rate and credit risk, and complement the Bank's lending activities. Securities are classified as either available for sale or held to maturity when acquired.

(a) Securities by Type and Maturity

The amortized cost, gross unrealized gains, gross unrealized losses and fair values of investment securities available for sale at the dates indicated were as follows:

14

Table of Contents

The Company has evaluated these securities and has determined that, other than certain private residential collateralized mortgage obligations discussed below, the decline in their value is temporary. The unrealized losses are primarily due to increases in market interest rates and larger spreads in the market for mortgage-related products. The fair value of these securities is expected to recover as the securities approach their maturity date and/or as the pricing spreads narrow on mortgage-related securities. The Company has the ability and intent to hold the investments until recovery of the market value which may be the maturity date of the securities.

To analyze the unrealized losses, the Company estimated expected future cash flows of the private residential collateralized mortgage obligations by estimating the expected future cash flows of the underlying collateral and applying those collateral cash flows, together with any credit enhancements such as subordination interests owned by third parties, to the security. The expected future cash flows of the underlying collateral are determined using the remaining contractual cash flows adjusted for future expected credit losses (which considers current delinquencies and nonperforming assets, future expected default rates and collateral value by vintage and geographic region) and prepayments. The expected cash flows of the security are then discounted at the interest rate used to recognize interest income on the security to arrive at a present value amount. The average discount interest rate used in the valuations of the present value was 6.7% for both the three months ended March 31, 2014 and 2013, and the average prepayment rate for each period was 6.0%.

For the three months ended March 31, 2014, there were two private residential collateralized mortgage obligations determined to be other-than-temporarily impaired. All unrealized losses for the three months ended March 31, 2014 were deemed to be credit related, and the Company recorded the impairment in earnings. For the three months ended March 31, 2013, there was one private residential collateralized mortgage obligation determined to be other-than-temporarily impaired. The impairment for the three months ended March 31, 2013 was considered credit related and was recorded in earnings. No impairment for the three months ended March 31, 2014 and 2013 was recorded through other comprehensive income (loss). The following table summarizes activity for the three months ended March 31, 2014 and 2013 related to the amount of impairments on held to maturity securities:

	Life-to-Date Gross Other- Than-Temporary Impairments	Life-to-Date Other-Than- Temporary Impairments Included in Other Comprehensive Income (Loss)	Life-to-Date Net Other- Than- Temporary Impairments Included in Earnings
	(In thousands)		
December 31, 2012	\$2,565	\$1,152	\$1,413
Subsequent impairments March 31, 2013	2	—	2
	\$2,567	\$1,152	\$1,415
December 31, 2013	\$2,603	\$1,152	\$1,451
Subsequent impairments March 31, 2014	8	—	8
	\$2,611	\$1,152	\$1,459

(c) Redemption-in-Kind

In May 2008, the Board of Trustees of the AMF Ultra Short Mortgage Fund (“Fund”) activated the Fund’s redemption-in-kind provision because of the uncertainty in the mortgage backed securities market. Exiting participants in the Fund were allowed to redeem and receive up to \$250,000 in cash per quarter or receive 100% of their investment in “like-kind” securities equal to their proportional ownership in the Fund. The Company elected to receive the like-kind securities.

Table of Contents

Details of private residential collateralized mortgage obligation securities received from the redemption-in-kind election as of March 31, 2014 were as follows:

Type of Security	Par Value	Amortized Cost	Fair Value (1)	Aggregate Unrealized Gain	Year-to-date Change in Unrealized Gain	Year-to-date Impairment Charge	Life-to-date Impairment Charge (2)	Current Ratings

(1) Level two valuation assumptions were used to determine the fair value of held to maturity securities in the Fund.

(2) Life-to-date impairment charge represents impairment charges recognized in earnings subsequent to redemption of the Fund.

(d) Pledged Securities

The following table summarizes the amortized cost and fair value of available for sale and held to maturity securities that are pledged as collateral for the following obligations at March 31, 2014 and December 31, 2013:

	March 31, 2014		December 31, 2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(In thousands)				
Washington and Oregon state to secure public deposits	\$74,572	\$74,706	\$80,386	\$80,881
Repurchase agreements	35,398	35,195	34,170	33,893
Total	\$109,970	\$109,901	\$114,556	\$114,774

(4) Loans Receivable

The Company originates loans in the ordinary course of business. These loans are identified as “originated” loans. Disclosures related to the Company’s recorded investment in originated loans receivable generally exclude accrued interest receivable and net deferred loan origination fees and costs because they are insignificant. The Company has also acquired loans through FDIC-assisted and open bank transactions. Loans acquired in a business acquisition are designated as “purchased” loans. The Company refers to the purchased loans subject to the FDIC shared-loss agreements as “covered” loans, and those loans without shared-loss agreements are referred to as “non-covered” loans. Loans purchased with evidence of credit deterioration since origination for which it is probable that not all contractually required payments will be collected are accounted for under FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. These loans are identified as “purchased impaired” loans. Loans purchased that are not accounted for under FASB ASC 310-30 are accounted for under FASB ASC 310-20, Receivables—Nonrefundable Fees and Other Costs. These loans are identified as “purchased other” loans.

(a) Loan Origination/Risk Management

The Company originates loans in one of the four segments of the total loan portfolio: commercial business, real estate construction and land development, one-to-four family residential and consumer. Within these segments are classes of loans to which management monitors and assesses credit risk in the loan portfolios. The Company has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. Management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management with frequent reports related to loan production, loan quality,

Edgar Filing: - Form

concentrations of credit, loan delinquencies, and nonperforming and potential problem loans. The Company also conducts internal loan reviews and validates the credit risk assessment on a periodic basis and presents the results of these reviews to management. The loan review process complements and reinforces the risk identification and assessment decisions made by loan officers and credit personnel, as well as the Company's policies and procedures.

16

Table of Contents

A discussion of the risk characteristics of each loan portfolio segment is as follows:

Commercial Business:

There are three significant classes of loans in the commercial portfolio segment, including commercial and industrial loans, owner-occupied commercial real estate and non-owner occupied commercial real estate. The owner and non-owner occupied commercial real estate are both considered commercial real estate loans. As the commercial and industrial loans carry different risk characteristics than the commercial real estate loans, they are discussed separately below.

Commercial and industrial. Commercial and industrial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial and industrial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may include a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate. The Company originates commercial real estate loans within its primary market areas. These loans are subject to underwriting standards and processes similar to commercial and industrial loans, in addition to those of real estate loans. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate involves more risk than other classes of loans in that the lending typically involves higher loan principal amounts, and payments on loans secured by real estate properties are dependent on successful operation and management of the properties. Repayment of these loans may be more adversely affected by conditions in the real estate market or the economy.

One-to-Four Family Residential:

The majority of the Company's one-to-four family residential loans are secured by single-family residences located in its primary market areas. The Company's underwriting standards require that single-family portfolio loans generally are owner-occupied and do not exceed 80% of the lower of appraised value at origination or cost of the underlying collateral. Terms of maturity typically range from 15 to 30 years. Until the second quarter of 2013, the Company sold most single-family loans in the secondary market and retained a smaller portion in its loan portfolio. After the second quarter of 2013, the Company only originated single-family loans for its loan portfolio.

Real Estate Construction and Land Development:

The Company originates construction loans for one-to-four family residential and for five or more family residential and commercial properties. The one-to-four family residential construction loans generally include construction of custom homes whereby the home buyer is the borrower. The Company also provides financing to builders for the construction of pre-sold homes and, in selected cases, to builders for the construction of speculative residential property. Substantially all construction loans are short-term in nature and priced with variable rates of interest. Construction lending can involve a higher level of risk than other types of lending because funds are advanced partially based upon the value of the project, which is uncertain prior to the project's completion. Because of the uncertainties inherent in estimating construction costs as well as the market value of a completed project and the effects of governmental regulation of real property, the Company's estimates with regard to the total funds required to complete a project and the related loan-to-value ratio may vary from actual results. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project and the ability of the borrower to sell or lease the property or refinance the indebtedness. If the Company's estimate of the value of a project at completion proves to be overstated, it may have inadequate security for repayment of the loan and may incur a loss if the borrower does not repay the loan. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from the Company until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being dependent upon successful completion of the construction project, interest rate changes, governmental regulation of real property, general economic conditions and the availability of long-term financing.

Consumer:

The Company originates consumer loans and lines of credit that are both secured and unsecured. The underwriting process for these loans ensures a qualifying primary and secondary source of repayment. Underwriting standards for home equity loans are significantly influenced by statutory requirements, which include, but are not limited to, a maximum loan-to-value percentage of 80%, collection remedies, the number of such loans a borrower can have at one time and documentation requirements. To monitor and manage consumer loan risk, policies and procedures

Table of Contents

are developed and modified, as needed. The majority of consumer loans are for relatively small amounts disbursed among many individual borrowers which reduces the credit risk for this type of loan. To further reduce the risk, trend reports are reviewed by management on a regular basis.

Originated loans receivable at March 31, 2014 and December 31, 2013 consisted of the following portfolio segments and classes:

	March 31, 2014	December 31, 2013
	(In thousands)

Originated loans receivable, net of allowance for loan losses	\$976,377	\$960,132

The recorded investment of purchased covered loans receivable at March 31, 2014 and December 31, 2013 consisted of the following portfolio segments and classes:

	March 31, 2014	December 31, 2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$14,646	\$14,690
Owner-occupied commercial real estate	24,107	24,366
Non-owner occupied commercial real estate	13,399	14,625
Total commercial business	52,152	53,681
One-to-four family residential	4,306	4,777
Real estate construction and land development:		
One-to-four family residential	1,554	1,556
Total real estate construction and land development	1,554	1,556
Consumer	3,462	3,740
Gross purchased covered loans receivable	61,474	63,754
Allowance for loan losses	(6,567) (6,167
Purchased covered loans receivable, net	\$54,907	\$57,587

The March 31, 2014 and December 31, 2013 gross recorded investment balance of purchased impaired covered loans accounted for under FASB ASC 310-30 was \$37.3 million and \$38.9 million, respectively. The gross recorded investment balance of purchased other covered loans was \$24.2 million and \$24.9 million at March 31, 2014 and December 31, 2013, respectively. At both March 31, 2014 and December 31, 2013, the recorded investment balance of purchased covered loans which are no longer covered under the FDIC shared-loss agreements was \$2.6 million.

Table of Contents

Funds advanced on the purchased covered loans subsequent to acquisition, referred to as “subsequent advances,” are included in the purchased covered loan balances as these subsequent advances are covered under the shared-loss agreements. These subsequent advances are not accounted for under FASB ASC 310-30. The total balance of subsequent advances on the purchased covered loans was \$5.6 million and \$4.7 million as of March 31, 2014 and December 31, 2013, respectively.

The recorded investment of purchased non-covered loans receivable at March 31, 2014 and December 31, 2013 consisted of the following portfolio segments and classes:

	March 31, 2014	December 31, 2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$48,267	\$53,465
Owner-occupied commercial real estate	68,366	70,022
Non-owner occupied commercial real estate	44,246	45,528
Total commercial business	160,879	169,015
One-to-four family residential	2,747	3,847
Real estate construction and land development:		
One-to-four family residential	1,134	1,131
Five or more family residential and commercial properties	4,398	3,471

Consumer	12,494	13,417
Gross purchased non-covered loans receivable	181,652	190,881
Allowance for loan losses	(5,286)	(5,504)
Purchased non-covered loans receivable, net	\$176,366	\$185,377

The March 31, 2014 and December 31, 2013 gross recorded investment balance of purchased impaired non-covered loans accounted for under FASB ASC 310-30 was \$32.8 million and \$36.0 million, respectively. The recorded investment balance of purchased other non-covered loans was \$148.9 million and \$154.9 million at March 31, 2014 and December 31, 2013, respectively.

(b) Concentrations of Credit

Most of the Company’s lending activity occurs within Washington State, and to a lesser extent Oregon State. The Company’s primary market areas include Thurston, Pierce, King, Mason, Cowlitz, Yakima, Kittitas and Clark counties in Washington and Multnomah County in Oregon, as well as other contiguous markets. The majority of the Company’s loan portfolio consists of (in order of balances at March 31, 2014) non-owner occupied commercial real estate, commercial and industrial and owner-occupied commercial real estate. As of March 31, 2014 and December 31, 2013, there were no concentrations of loans related to any single industry in excess of 10% of the Company’s total loans.

(c) Credit Quality Indicators

As part of the on-going monitoring of the credit quality of the Company’s loan portfolio, management tracks certain credit quality indicators including trends related to (i) the risk grade of the loans, (ii) the level of classified loans, (iii) net charge-offs, (iv) nonperforming loans, and (v) the general economic conditions of the United States of America, and specifically the states of Washington and Oregon. The Company utilizes a risk grading matrix to assign a risk grade to each of its loans. Loans are graded on a scale of 0 to 10. A description of the general characteristics of the risk grades is as follows:

Grades 0 to 5: These grades are considered “pass grade” and include loans with negligible to above average but acceptable risk. These borrowers generally have strong to acceptable capital levels and consistent earnings and debt service capacity. Loans with the higher grades within the “pass” category may include borrowers who are experiencing unusual operating difficulties, but have acceptable payment performance to date. Increased monitoring of financials and/or collateral may be appropriate. Loans with this grade show no immediate loss exposure.

Table of Contents

Grade 6: This grade includes "Watch" loans and is considered a "pass grade". The grade is intended to be utilized on a temporary basis for pass grade borrowers where a potentially significant risk-modifying action is anticipated in the near term.

Grade 7: This grade includes "Other Assets Especially Mentioned" ("OAEM") loans in accordance with regulatory guidelines, and is intended to highlight loans with elevated risks. Loans with this grade show signs of deteriorating profits and capital, and the borrower might not be strong enough to sustain a major setback. The borrower is typically higher than normally leveraged, and outside support might be modest and likely illiquid. The loan is at risk of further decline unless active measures are taken to correct the situation.

Grade 8: This grade includes "Substandard" loans in accordance with regulatory guidelines, which the Company has determined have a high credit risk. These loans also have well-defined weaknesses which make payment default or principal exposure likely, but not yet certain. The borrower may have shown serious negative trends in financial ratios and performance. Such loans may be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. Loans with this grade can be placed on accrual or nonaccrual status based on the Company's accrual policy.

Grade 9: This grade includes "Doubtful" loans in accordance with regulatory guidelines, and the Company has determined these loans to have excessive credit risk. Such loans are placed on nonaccrual status and may be dependent upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. Additionally, these loans generally have a specific valuation allowance.

Grade 10: This grade includes "Loss" loans in accordance with regulatory guidelines, and the Company has determined these loans have the highest risk of loss. Such loans are charged-off or charged-down when payment is acknowledged to be uncertain or when the timing or value of payments cannot be determined. "Loss" is not intended to imply that the loan or some portion of it will never be paid, nor does it in any way imply that there has been a forgiveness of debt. Loan grades for all commercial business loans and real estate construction and land development loans are established at the origination of the loan. One-to-four family residential loans and consumer loans ("non-commercial loans") are not numerically graded at origination date as these loans are determined to be "pass graded" loans. These non-commercial loans may subsequently require numeric grade if the credit department has evaluated the credit and determined it necessary to classify the loan. Loan grades are reviewed on a quarterly basis, or more frequently if necessary, by the credit department. Typically, an individual loan grade will not be changed from the prior period unless there is a specific indication of credit deterioration or improvement. Credit deterioration is evidenced by delinquency, direct communications with the borrower, or other borrower information that becomes known to management. Credit improvements are evidenced by known facts regarding the borrower or the collateral property.

The loan grades relate to the likelihood of losses in that the higher the grade, the greater the loss potential. Loans with a pass grade may have some estimated inherent losses, but to a lesser extent than the other loan grades. The OAEM loan grade is transitory in that the Company is waiting on additional information to determine the likelihood and extent of the potential loss. The likelihood of loss for OAEM graded loans, however, is greater than Watch graded loans because there has been measurable credit deterioration. Loans with a Substandard grade are generally loans for which the Company has individually analyzed for potential impairment. For Doubtful and Loss graded loans, the Company is almost certain of the losses, and the unpaid principal balances are generally charged-off to the realizable value.

Table of Contents

The following tables present the balance of the originated loans receivable by credit quality indicator as of March 31, 2014 and December 31, 2013.

	March 31, 2014				
	Pass	OAEM	Substandard	Doubtful	Total
	(In thousands)				
Commercial business:

Consumer	27,986	—	144	—	28,130
Gross originated loans	\$921,947	\$24,115	\$32,624	\$1,269	\$979,955

The tables above include \$29.3 million and \$27.4 million of originated impaired loans as of March 31, 2014 and December 31, 2013, respectively, as detailed in the impaired loans section below. These impaired loans have been individually reviewed for probable incurred losses and have a specific valuation allowance, as necessary. The tables above also include potential problem loans. Potential problem loans are those loans that are currently accruing interest

Edgar Filing: - Form

and are not considered impaired, but which management is monitoring because the financial information of the borrower causes concern as to their ability to meet their loan repayment terms. Potential problem originated loans as of March 31, 2014 and December 31, 2013 were \$41.6 million and \$34.5 million, respectively. The balance of

21

Table of Contents

potential problem originated loans guaranteed by a governmental agency, which reduces the Company's credit exposure, was \$1.4 million and \$1.8 million as of March 31, 2014 and December 31, 2013, respectively.

The following tables present the recorded invested balance of the purchased covered and non-covered loans receivable by credit quality indicator as of March 31, 2014 and December 31, 2013.

	March 31, 2014

Total commercial business	6,157	5,524
One-to-four family residential	334	340
Real estate construction and land development:		
One-to-four family residential	4,074	1,045
Total real estate construction and land development	4,074	1,045
Consumer	62	38
Gross originated nonaccrual loans (1)	\$10,627	\$6,947

(1) \$1.8 million and \$1.7 million of nonaccrual originated loans were guaranteed by governmental agencies at March 31, 2014 and December 31, 2013, respectively.

The recorded investment balance of purchased other nonaccrual loans, segregated by segments and classes of loans, were as follows as of March 31, 2014 and December 31, 2013:

	March 31, 2014	December 31, 2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$276	\$151
Owner-occupied commercial real estate	429	—
Total commercial business	705	151
Consumer	644	647
Gross purchased other nonaccrual loans (1)	\$1,349	\$798

(1) \$7,000 of purchased other nonaccrual loans were covered by the FDIC shared-loss agreements at both March 31, 2014 and December 31, 2013.

(e) Past due loans

The Company performs an aging analysis of past due loans using the categories of 30-89 days past due and 90 or more days past due. This policy is consistent with regulatory reporting requirements.

Table of Contents

The balances of originated past due loans, segregated by segments and classes of loans, as of March 31, 2014 and December 31, 2013 were as follows:

March 31, 2014

Table of Contents

The Company had governmental guarantees of \$3.0 million related to the originated impaired loan balances at both March 31, 2014 and December 31, 2013.

The average recorded investment of originated impaired loans (including TDRs) for the three months ended March 31, 2014 and 2013 are set forth in the following table.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$9,936	\$11,858
Owner-occupied commercial real estate	2,949	2,251
Non-owner occupied commercial real estate	6,878	7,095
Total commercial business	19,763	21,204

The average recorded investment of purchased other impaired loans (including TDRs) for the three months ended March 31, 2014 and 2013 are set forth in the following table.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$4,999	\$437
Owner-occupied commercial real estate	240	138
Non-owner occupied commercial real estate	518	972
Total commercial business	5,757	1,547
One-to-four family residential	225	495
Consumer	734	101
Gross impaired purchased other loans	\$6,716	\$2,143

For the three months ended March 31, 2014 and 2013 no interest income was recognized subsequent to a loan's classification as nonaccrual. For the three months ended March 31, 2014 and 2013, the Bank recorded \$309,000 and \$217,000 of interest income related to restructured performing loans, respectively.

(g) Troubled Debt Restructured Loans

A troubled debt restructured loan is a restructuring in which the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. TDRs are considered impaired and are separately measured for impairment under FASB ASC 310-10-35, whether on accrual or nonaccrual status.

The majority of the Bank's TDRs are a result of granting extensions to troubled credits which have already been adversely classified. We grant such extensions to reassess the borrower's financial status and to develop a plan for repayment. Certain modifications with extensions also include interest rate reductions, which is the second most prevalent concession. Certain TDRs were additionally re-amortized over a longer period of time. The Bank additionally advanced funds to a troubled speculative home builder to complete established projects. These modifications would all be considered a concession for a borrower that could not obtain similar financing terms from another source other than from the Bank.

Edgar Filing: - Form

The financial effects of each modification will vary based on the specific restructure. For the majority of the Bank's TDRs, the loans were interest-only with a balloon payment at maturity. If the interest rate is not adjusted and the modified terms are consistent with other similar credits being offered, the Bank may not experience any loss associated with the restructure. If, however, the restructure involves forbearance agreements or interest rate

Table of Contents

modifications, the Bank may not collect all the principal and interest based on the original contractual terms. The Bank estimates the necessary allowance for loan losses on TDRs using the same guidance as used for other impaired loans.

The recorded investment balance and related allowance for loan losses of accruing and non-accruing TDRs as of March 31, 2014 and December 31, 2013 were as follows:

	March 31, 2014		December 31, 2013	
	Accruing TDRs	Non-accruing TDRs	Accruing TDRs	Non-accruing TDRs
	(In thousands)			
Originated TDRs	\$18,710	\$3,669	\$20,439	\$2,532
Allowance for loan losses on originated TDRs	2,007	434	2,187	133
Purchased other TDRs	5,382	232	5,903	110
Allowance for loan losses on purchased other TDRs	1,035	185	1,430	57

The unfunded commitment to borrowers related to originated TDRs was \$842,000 and \$1.5 million at March 31, 2014 and December 31, 2013, respectively. There were \$74,000 and \$17,000 of unfunded commitments to borrowers related to the purchased other TDRs as of March 31, 2014 and December 31, 2013, respectively.

Originated loans that were modified as TDRs during the three months ended March 31, 2014 and 2013 are set forth in the following table:

	Three Months Ended March 31, 2014		2013	
	Number of Contracts (1)	Outstanding Principal Balance (1)(2)	Number of Contracts (1)	Outstanding Principal Balance (1)(2)
	(Dollars in thousands)			
Commercial business:				
Commercial and industrial	7	\$1,614	11	\$4,224
Owner-occupied commercial real estate	1	351	—	—
Total commercial business	8	1,965	11	4,224
One-to-four family residential	—	—	1	257
Real estate construction and land development:				
One-to-four family residential	1	190	1	180
Total real estate construction and land development	1	190	1	180
Consumer	2	45	—	—
Total originated TDRs	11	\$2,200	13	\$4,661

(1) Number of contracts and outstanding principal balance represent loans which have balances as of period end as certain loans may have been paid-down or charged-off during the three months ended March 31, 2014 and 2013.

(2) Includes subsequent payments after modifications and reflects the balance as of period end. As the Bank did not forgive any principal or interest balance as part of the loan modification, the Bank's recorded investment in each loan at the date of modification (pre-modification) did not change as a result of the modification (post-modification), except when the modification was the initial advance on a one-to-four family residential real estate construction and land development loan under a master guidance line. There were no construction loans under a master guidance line that were modified as TDRs during the three months ended March 31, 2014 and 2013.

Of the 11 loans modified during the three months ended March 31, 2014, three loans with a total outstanding principal balance of \$584,000 were previously reported as TDRs as of December 31, 2013. Of the 13 loans modified during the three months ended March 31, 2013, five loans with a total outstanding principal balance of \$1.9 million were

previously reported as TDRs as of December 31, 2012. The Bank typically grants shorter extension periods to continually monitor the troubled credits despite the fact that the extended date might not be the date the Bank expects the cash flow. The Company does not consider these modifications a subsequent default of a TDR as new loan terms, specifically maturity dates, were granted. The potential losses related to these loans would have been considered in the period the loan was first reported as a TDR and adjusted, as necessary, in the current periods based on more recent information. The related specific valuation allowance for TDRs that were modified during the three months ended March 31, 2014 was \$744,000 at March 31, 2014. The related specific valuation allowance for those TDRs

Table of Contents

that were previously reported as TDRs as of December 31, 2013 was \$484,000 and the allowance for loan losses for TDRs that were modified during the three months ended March 31, 2014 that were not previously reported as TDRs was \$6,000 as of December 31, 2013.

Purchased other loans that were modified as TDRs during the three months ended March 31, 2014 and 2013 are set forth in the following table:

	Three Months Ended March 31, 2014		2013	
	Number of Contracts (1)	Outstanding Principal Balance (1)(2) (Dollars in thousands)	Number of Contracts	Outstanding Principal Balance
Commercial business:				
Commercial and industrial	3	\$4,224	—	\$—
Total commercial business	3	4,224	—	—
Consumer	1	177	—	—
Total purchased other TDRs	4	\$4,401	—	\$—

(1) Number of contracts and outstanding principal balance represent loans which have balances as of period end as certain loans may have been paid-down or charged-off during the three months ended March 31, 2014 and 2013.

(2) Includes subsequent payments after modifications and reflects the balance as of period end. The Bank's initial recorded investment in each loan at the date of modification (pre-modification) did not change as a result of the modification (post-modification) as the Bank did not forgive any principal or interest balance as part of the loan modification.

Of the four purchased other loans modified as TDRs during the three months ended March 31, 2014, the three commercial and industrial loans totaling \$4.2 million were previously reported as TDRs at December 31, 2013. The Bank granted extensions of one year to two of the loans and required full payment of the third loan approximately two years before the original maturity date based on a revised loan agreement. The related specific valuation allowance for the purchased other loans modified as TDRs during the three months ended March 31, 2014 was \$954,000 as of March 31, 2014.

The loans modified during the previous twelve months ended March 31, 2014 that subsequently defaulted during the three months ended March 31, 2014 are included in the following table:

	Three Months Ended March 31, 2014			
	Originated Loans		Purchased Other Loans	
	Number of Contracts	Outstanding Principal Balance (Dollars in thousands)	Number of Contracts	Outstanding Principal Balance
Commercial business:				
Commercial and industrial	2	\$674	1	\$125
Non-owner occupied commercial real estate	1	3	—	—
Total commercial business	3	677	1	125
Total loans receivable	3	\$677	1	\$125

All of the loans included in the above table defaulted because they were past their modified maturity date. There were no originated or purchased other loans that had been modified during the previous twelve months ended March 31, 2013 that subsequently defaulted during the three months ended March 31, 2013.

(h) Purchased Impaired Loans

As indicated above, the Company purchased impaired loans from the Cowlitz, Pierce, NCB and Valley Acquisitions which are accounted for under FASB ASC 310-30.

Table of Contents

The following tables reflect the outstanding balance at March 31, 2014 and December 31, 2013 of the purchased impaired loans by acquisition:

	Cowlitz	
	March 31, 2014	December 31, 2013
	(In thousands)	
Commercial business:		
Commercial and industrial	\$ 10,562	\$ 10,608
Owner-occupied commercial real estate	11,370	11,538
Non-owner occupied commercial real estate	9,460	10,611
Total commercial business	31,392	32,757
One-to-four family residential	3,934	3,966
Real estate construction and land development:		
One-to-four family residential	1,284	1,298
Total real estate construction and land development	1,284	1,298
Consumer	1,829	2,022
Gross purchased impaired covered loans	\$38,439	\$40,043

The total balance of subsequent advances on the purchased impaired covered loans was \$3.3 million and \$2.6 million as of March 31, 2014 and December 31, 2013, respectively. The Bank has the option to modify certain purchased covered loans which may terminate the FDIC shared-loss coverage on those modified loans. At both March 31, 2014 and December 31, 2013, the recorded investment balance of purchased impaired covered loans which are no longer covered under the FDIC shared-loss agreements was \$1.7 million. The Bank continues to report these loans in the covered portfolio as they are in a pool and they continue to be accounted for under FASB ASC 310-30. The FDIC indemnification asset has been adjusted to reflect the change in the loan status.

Total commercial business	3,274	3,293
Consumer	57	58
Gross purchased impaired non-covered loans	\$3,331	\$3,351

On the acquisition dates, the amount by which the undiscounted expected cash flows of the purchased impaired loans exceeded the estimate fair value of the loan is the “accretable yield”. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the purchased impaired loan.

The following tables summarize the accretable yield on the purchased impaired loans resulting from the Cowlitz, Pierce, NCB and Valley Acquisitions for the three months ended March 31, 2014 and 2013. As the Valley Acquisition was not completed until third quarter of 2013, there are no balances for the three months ended March 31, 2013.

	Three Months Ended March 31, 2014				
	Cowlitz	Pierce	NCB	Valley	Total
	(In thousands)

Table of Contents

(5) Allowance for Loan Losses

The allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio. A summary of the changes in the originated loans' allowance for loan losses for the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Balance at the beginning of the period	\$17,153	\$19,125
Charge-offs	(63) (1,827
Recoveries of loans previously charged-off	244	119
Provision for loan losses	200	495
Balance at the end of the period	\$17,534	\$17,912

A summary of the changes in the purchased covered loans' allowance for loan losses for the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Balance at the beginning of the period	\$6,167	\$4,352
Charge-offs	(79) —
Provision for loan losses	479	358
Balance at the end of the period	\$6,567	\$4,710

A summary of the changes in the purchased noncovered loans' allowance for loan losses for the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Balance at the beginning of the period	\$5,504	\$5,117
Charge-offs	—	(197
Recoveries of loans previously charged-off	3	—
Provision for loan losses	(221) 5
Balance at the end of the period	\$5,286	\$4,925

The purchased loans acquired in the Cowlitz, Pierce, NCB and Valley Acquisitions are subject to the Company's internal credit review. If and when credit deterioration occurs subsequent to the acquisition dates, a provision for loan losses will be charged to earnings for the full amount without regard to the FDIC shared-loss agreements for the covered loan balances. The portion of the estimated loss reimbursable from the FDIC is recorded in noninterest income and increases the FDIC indemnification asset.

Table of Contents

The following table details activity in the allowance for loan losses disaggregated on the basis of the Company's impairment method as of and for the three months ended March 31, 2014:

	Commercial and industrial	Owner- occupied commercial real estate	Non-owner occupied commercial real estate	One-to-four family residential	Real estate construction and land development: one-to-four family residential	Real estate construction and land development: five or more family residential and commercial properties	Consumer	Unallocated	Total

Table of Contents

(6) FDIC Indemnification Asset

Changes in the FDIC indemnification asset during the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Balance at the beginning of the period	\$4,382	\$7,100
Cash payments received or receivable from the FDIC	(376) (1,480
FDIC share of additional estimated losses	336	88
Net amortization	(373) (355
Balance at the end of the period	\$3,969	\$5,353

(7) Other Real Estate Owned

Changes in other real estate owned during the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Balance at the beginning of the period	\$4,559	\$5,666
Additions	218	—
Additions from acquisitions	—	2,279
Proceeds from dispositions	(520) (2,961
Gain (loss) on sales, net	27	172
Valuation adjustment	—	107
Balance at the end of the period	\$4,284	\$5,263

(8) Goodwill and Other Intangible Assets

(a) Goodwill

The Company's goodwill represents the excess of the purchase price over the fair value of net assets acquired in the purchases of Valley on July 15, 2013, Western Washington Bancorp in 2006 and North Pacific Bank in 1998. The Company's goodwill is assigned to the Bank and is evaluated for impairment at the Bank level (reporting unit).

There were no goodwill additions recorded during the three months ended March 31, 2014 and 2013.

At March 31, 2014, the Company's step-one analysis concluded that the reporting unit's fair value was greater than its carrying value and therefore no goodwill impairment charges were required for the three months ended March 31, 2014. The Company did not record goodwill impairment charges for the three months ended March 31, 2013. Even though there was no goodwill impairment at March 31, 2014, adverse events may impact the recoverability of goodwill and could result in a future impairment charge which could have a material impact on the Company's Condensed Consolidated Financial Statements.

(b) Other Intangible Assets

The other intangible assets represents the core deposit intangible ("CDI") acquired in business combinations. The useful life of the CDI related to Valley, NCB, Pierce, Cowlitz, and Western Washington Bancorp acquisitions is ten, five, four, nine, and eight years, respectively.

There were no intangible asset additions recorded during the three months ended March 31, 2014. During the three months ended March 31, 2013, the Company recorded additions of intangible assets of \$156,000 due to the NCB Acquisition.

Amortization expense related to the core deposit intangibles was \$156,000 and \$115,000 for the three months ended March 31, 2014 and 2013, respectively.

Table of Contents

(9) Stock-Based Compensation

Stock options generally vest ratably over three years and expire five years after they become exercisable or vest ratably over four years and expire ten years from date of grant. Restricted stock awards issued generally have a five-year cliff vesting or four year ratably vesting schedule. The Company issues new shares to satisfy share option exercises and restricted stock awards. As of March 31, 2014, 110,745 shares remain available for future issuances under stock-based compensation plans.

(a) Stock Option Awards

For the three months ended March 31, 2014 and 2013, the Company recognized compensation expense related to stock options of \$15,000 and \$22,000, respectively, with no related tax benefit for either period. As of March 31, 2014, the total unrecognized compensation expense related to non-vested stock options was \$10,000 and the related weighted average period over which it is expected to be recognized is approximately 0.15 years. The intrinsic value and cash proceeds from options exercised during the three months ended March 31, 2014 totaled \$22,000 and \$57,000, respectively. The intrinsic value and cash proceeds from options exercised during the three months ended March 31, 2013 totaled \$6,000 and \$20,000, respectively.

The following tables summarize the stock option activity for the three months ended March 31, 2014 and 2013:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value (In thousands)
Outstanding at December 31, 2012	300,658	\$ 17.48		
Granted	—	—

Forfeited or expired	(35,735)) 20.42		
Outstanding at March 31, 2013	263,123	17.12		
Outstanding at December 31, 2013	194,482	\$ 15.82		
Granted	—	—		
Exercised	(4,492)) 12.70		
Forfeited or expired	(6,055)) 19.76		
Outstanding at March 31, 2014	183,935	\$ 15.77	3.22	\$ 503
Vested and expected to vest at March 31, 2014	183,924	\$ 15.77	3.21	\$ 503
Exercisable at March 31, 2014	166,425	\$ 15.88	2.92	\$ 466

(b) Restricted and Unrestricted Stock Awards

For the three months ended March 31, 2014 and 2013, the Company recognized compensation expense related to restricted and unrestricted stock awards of \$276,000 and \$251,000, respectively, and a related tax benefit of \$97,000 and \$88,000, respectively. As of March 31, 2014, the total unrecognized compensation expense related to non-vested restricted and unrestricted stock awards was \$1.7 million and the related weighted average period over which it is expected to be recognized is approximately 2.05 years. The vesting date fair value of restricted stock awards that vested during the three months ended March 31, 2014 and 2013 was \$536,000 and \$615,000, respectively.

Table of Contents

The following tables summarize the restricted and unrestricted stock award activity for the three months ended March 31, 2014 and 2013:

	Shares	Weighted-Average Grant Date Fair Value
Nonvested at December 31, 2012	189,670	\$14.86
Granted	37,197	14.31
Vested	(43,491)) 16.87
Forfeited	(890)) 15.64
Nonvested at March 31, 2013	182,486	\$14.27
Nonvested at December 31, 2013	202,939	\$14.29
Granted	6,407	17.17
Vested	(30,176)) 14.55
Forfeited	(811)) 14.67
Nonvested at March 31, 2014	178,359	\$14.35

(10) Stockholders' Equity

(a) Earnings Per Common Share

The following table illustrates the reconciliation of weighted average shares used for earnings per common share computations for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Net income:		
Net income	\$2,543	\$2,885
Less: Dividends and undistributed earnings allocated to participating securities	(28)) (34)
Net income allocated to common shareholders	\$2,515	\$2,851
Basic:		
Weighted average common shares outstanding	16,214,735	15,128,944
Less: Restricted stock awards	(197,697)) (186,751)
Total basic weighted average common shares outstanding	16,017,038	14,942,193
Diluted:		
Basic weighted average common shares outstanding	16,017,038	14,942,193
Incremental shares from stock options	9,764	15,996
Total diluted weighted average common shares outstanding	16,026,802	14,958,189

Potential dilutive shares are excluded from the computation of earnings per share if their effect is anti-dilutive. For the three months ended March 31, 2014 and 2013, anti-dilutive shares outstanding related to options to acquire common stock totaled 131,459 and 207,468, respectively, as the assumed proceeds from exercise price, tax benefits and future compensation was in excess of the market value.

(b) Dividends

The timing and amount of cash dividends paid on the Company's common stock depends on the Company's earnings, capital requirements, financial condition and other relevant factors. Dividends on common stock from the Company depend substantially upon receipt of dividends from the Bank, which is the Company's predominant sources of income. The following table summarizes the dividend activity for the three months ended March 31, 2014 and 2013.

Table of Contents

Declared	Cash Dividend per Share	Record Date	Paid/Payable Date
February 1, 2012	\$0.06	February 10, 2012	February 24, 2012
April 26, 2012	\$0.08	May 10, 2012	May 24, 2012
June 26, 2012	\$0.20	July 10, 2012	July 24, 2012
July 25, 2012	\$0.08	August 14, 2012	August 24, 2012
October 30, 2012	\$0.08	November 9, 2012	November 21, 2012
November 30, 2012	\$0.30	November 26, 2012	December 6, 2012
January 30, 2013	\$0.08	February 8, 2013	February 22, 2013
April 24, 2013	\$0.08	May 10, 2013	May 24, 2013
July 23, 2013	\$0.18	August 6, 2013	August 15, 2013
October 23, 2013	\$0.08	November 5, 2013	November 15, 2013
January 29, 2014	\$0.08	February 10, 2014	February 24, 2014
March 27, 2014	\$0.08	April 8, 2014	April 23, 2014

The FDIC and the Washington DFI have the authority under their supervisory powers to prohibit the payment of dividends by Heritage Bank to the Company. Additionally, current guidance from the Federal Reserve Board provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters. Current regulations allow the Company and the Bank to pay dividends on their common stock if the Company's or the Bank's regulatory capital would not be reduced below the statutory capital requirements set by the Federal Reserve Board and the FDIC.

(c) Stock Repurchase Program

The Company has had various stock repurchase programs since March 1999. On August 30, 2012, the Board of Directors approved the Company's tenth stock repurchase plan, authorizing the repurchase of up to 5% of the Company's outstanding shares of common stock, or approximately 757,000 shares.

During the three months ended March 31, 2014 and 2013, the Company did not repurchase shares under the plan. In total, the Company has repurchased 596,900 shares at an average price of \$15.70 per share under the tenth stock repurchase plan as of March 31, 2014.

During the three months ended March 31, 2014 and 2013, the Company repurchased 9,298 and 7,780 shares at an average price of \$17.77 and \$14.21 to pay withholding taxes on restricted stock that vested during the three months ended March 31, 2014 and 2013, respectively.

(11) Accumulated Other Comprehensive
Income (Loss)

The changes in accumulated other comprehensive income (loss) ("AOCI") by component, during the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31, 2014			Total
	Changes in Fair Value of Available for Sale Securities (1)	Reclassification Adjustment of Net gain from Sale of Available for Sale Securities Included in Income (1)	Accretion of Other-than- temporary Impairment on Held to Maturity Securities (1)

(1) All amounts are net of tax.

(12) Fair Value Measurements

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Valuations for assets and liabilities traded in active exchange markets, or interest in open-end mutual funds that allow the Company to sell its ownership interest back to the fund at net asset value on a daily basis. Valuations are obtained from readily available pricing sources for market transactions involving identical assets, liabilities, or funds.

Level 2: Valuations for assets and liabilities traded in less active dealer, or broker markets, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or valuations using methodologies with observable inputs.

Level 3: Valuations for assets and liabilities that are derived from other valuation methodologies, such as option pricing models, discounted cash flow models and similar techniques using unobservable inputs, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

(a) Recurring and Nonrecurring Basis

The Company used the following methods and significant assumptions to estimate fair value of certain assets on a recurring and nonrecurring basis:

Investment Securities Available for Sale and Held to Maturity:

The fair values of all investment securities are based upon the assumptions market participants would use in pricing the security. If available, investment securities are determined by quoted market prices (Level 1). For investment securities where quoted market prices are not available, fair values are calculated based on market prices on similar securities (Level 2). Level 2 includes U.S. Treasury, U.S. government and agency debt securities, municipal securities, corporate securities and mortgage-backed securities and collateralized mortgage obligations-residential. For investment securities where quoted prices or market prices of similar securities are not available, fair values are calculated by using observable and unobservable inputs such as discounted cash flows or other market indicators (Level 3). Security valuations are obtained from third party pricing services for comparable assets or liabilities.

Table of Contents**Impaired Loans:**

At the time a loan is considered impaired, its impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, a loan's observable market prices, or fair market value of the collateral if the loan is collateral-dependent. Impaired loans for which impairment is measured using the discounted cash flow approach are not considered to be measured at fair value because the loan's effective interest rate is not a fair value input, and for the purposes of fair value disclosures, the fair value of these loans are measured commensurate with non-impaired loans. Generally, the Company utilizes the fair market value of the collateral, which is commonly based on recent real estate appraisals, to measure impairment. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business (Level 3). Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Other Real Estate Owned:

Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in Level 3 classification of the inputs for determining fair value.

Appraisals for both collateral-dependent impaired loans and other real estate owned are performed by certified general appraisers for commercial properties or certified residential appraisers for residential properties whose qualifications and licenses have been reviewed and verified by the Company. Once received, the Company reviews the assumptions and approaches utilized in the appraisal as well as the resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. On a quarterly basis, the Company compares the actual selling price of collateral that has been liquidated to the most recent appraised value to determine what additional adjustment should be made to the appraisal value to arrive at fair value.

The following table summarizes the balances of assets measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2013.

	March 31, 2014			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Investment securities available for sale:				
U.S. Treasury and U.S. Government-sponsored agencies	\$6,550	\$—	\$6,550	\$—

Total	\$163,134	\$—	\$163,134	\$—

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2014 and 2013.

The Company may be required to measure certain financial assets and liabilities at fair value on a nonrecurring basis. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets.

The tables below represent assets measured at fair value on a nonrecurring basis at March 31, 2014 and December 31, 2013 and the net losses (gains) recorded in earnings during the three months ended March 31, 2014 and 2013.

Table of Contents

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at March 31, 2014 and December 31, 2013.

March 31, 2014

	Fair Value	Valuation Technique(s)	Unobservable Input(s)	Range of Inputs; Weighted Average
	(Dollars in thousands)			
Impaired originated loans	\$8,665	Market approach	Adjustment for differences between the comparable sales	(33.0%) - 26.7%; (6.3%)
Purchased other impaired loans	\$3,965	Market approach	Adjustment for differences between the comparable sales	(50.0%) - 3.0%; (20.4%)

December 31, 2013

	Fair Value	Valuation Technique(s)	Unobservable Input(s)	Range of Inputs; Weighted Average
	(Dollars in thousands)			
Impaired originated loans	\$12,106	Market approach	Adjustment for differences between the comparable sales	(27.8%) - 19.1%; (7.6%)
Purchased other impaired loans	\$4,738	Market approach	Adjustment for differences between the comparable sales	(50.0%) - 15.0%; (26.2%)
Other real estate owned	\$1,222	Market approach	Adjustment for differences between the comparable sales	(60.1%) - 13.6%; (35.2%)

(b) Fair Value of Financial Instruments

Because broadly traded markets do not exist for most of the Company's financial instruments, the fair value calculations attempt to incorporate the effect of current market conditions at a specific time. These determinations are subjective in nature, involve uncertainties and matters of significant judgment and do not include tax ramifications; therefore, the results cannot be determined with precision, substantiated by comparison to independent markets and may not be realized in an actual sale or immediate settlement of the instruments. There may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results. For all of these reasons, the aggregation of the fair value calculations presented herein do not represent, and should not be construed to represent, the underlying value of the Company.

Table of Contents

The tables below present the carrying value amount of the Company's financial instruments and their corresponding estimated fair values at the dates indicated.

Accrued interest payable	\$152	\$152	\$17	\$135	\$—

The methods and assumptions, not previously presented, used to estimate fair value are described as follows:

Cash and Cash Equivalents:

The fair value of financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to carrying value (Level 1).

Other Interest Earning Deposits:

These deposits with other banks have maturities greater than three months. The fair value is calculated based upon market prices for similar deposits (Level 2).

Federal Home Loan Bank ("FHLB") Stock:

FHLB of Seattle stock is not publicly traded, as such, it is not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Loans Receivable:

Except for impaired loans discussed previously, fair value is based on discounted cash flows using current market rates applied to the estimated life (Level 3). While these methodologies are permitted under U.S. GAAP, they are not based on the exit price concept of the fair value required under ASC 820-10, Fair Value Measurements and Disclosures, and generally produce a higher value.

Accrued Interest Receivable/Payable:

The fair value of accrued interest receivable/payable balances are determined using inputs and fair value measurements commensurate with the asset from which the accrued interest is generated. The carrying amounts of accrued interest approximate fair value (Level 1, Level 2, and Level 3).

Table of Contents

Deposits:

For deposits with no contractual maturity, the fair value is assumed to equal the carrying value (Level 1). The fair value of fixed maturity deposits is based on discounted cash flows using the difference between the deposit rate and the rates offered by the Company for deposits of similar remaining maturities (Level 2).

Securities Sold Under Agreement to Repurchase:

Securities sold under agreement to repurchase are short-term in nature, repricing on a daily basis. Fair value financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to carrying value (Level 1).

Off-Balance Sheet Financial Instruments:

The majority of our commitments to extend credit, standby letters of credit and commitments to sell mortgage loans carry current market interest rates if converted to loans. As such, no premium or discount was ascribed to these commitments (Level 1). They are excluded from the preceding tables.

(13) Proposed Merger

On October 23, 2013, the Company, along with the Bank, and Washington Banking and its wholly owned subsidiary bank, Whidbey, jointly announced the signing of a merger agreement for the Washington Banking Merger.

Washington Banking branches will adopt the Heritage Bank name in all markets, with the exception of six branches in the Whidbey Island markets which will continue to operate using the Whidbey Island Bank name. The corporate headquarters of the combined company will be located in Olympia, Washington.

Under the terms of the merger agreement, Washington Banking shareholders will receive 0.89000 shares of Heritage common stock and \$2.75 in cash for each share of Washington Banking common stock. Based on the closing price of Heritage common stock of \$18.14 on March 4, 2014, the last practicable trading day before the printing of the joint proxy statement/prospectus, the value of the per share merger consideration payable to Washington Banking shareholders was \$18.89, or approximately \$296.7 million in the aggregate. Upon consummation, the shareholders of Washington Banking will own approximately 46% of the combined company and the shareholders of Heritage will own approximately 54%. As of December 31, 2013, Washington Banking had approximately \$1.7 billion in total assets.

The merger agreement has been unanimously approved by the boards of directors of Heritage and Washington Banking and their respective shareholder and the transaction has received all regulatory approvals. The closing of the merger is subject to certain other customary closing conditions. The merger is expected to close on May 1, 2014. The transaction is intended to qualify as a tax-free reorganization for U.S. federal income tax purposes and Washington Banking shareholders are not expected to recognize any taxable gain or loss in connection with the share exchange to the extent of the stock consideration received.

For further information, reference is made to the Form 8-K filed by the Company with the SEC on October 24, 2013, and the 424(b)(3), the definitive joint proxy statement/prospectus filed by the Company with the SEC on March 14, 2014.

ITEM 7. MANGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is intended to assist in understanding the financial condition and results of the Company as of and for the three months ended March 31, 2014. The information contained in this section should be read with the unaudited Condensed Consolidated Financial Statements and the accompanying Notes included herein, and the December 31, 2013 audited Consolidated Financial Statements and the accompanying Notes included in our Annual Report on Form 10-K for the year ended December 31, 2013.

Overview

Heritage Financial Corporation is a bank holding company, which primarily engages in the business activities of its wholly owned subsidiary, Heritage Bank. We provide financial services to our local communities with an ongoing strategic focus on expanding our commercial lending relationships and market area and a continual focus on asset quality. At March 31, 2014, we had total assets of \$1.66 billion and total stockholders' equity of \$216.4 million. The Company's business activities generally are limited to passive investment activities and oversight of its investment in the Bank. Accordingly, the information set forth in this report relates primarily to the Bank's operations.

Our business consists primarily of lending and deposit relationships with small businesses and their owners in our market areas and attracting deposits from the general public. We also originate real estate construction and land development loans, consumer loans and one-to-four family residential loans collateralized by residential properties located in western and central Washington State and the greater Portland, Oregon area.

Our core profitability depends primarily on our net interest income. Net interest income is the difference between interest income, which is the income that we earn on interest earning assets, comprised primarily of loans and investments, and interest expense, which is the amount we pay on our interest bearing liabilities, including primarily deposits. Management strives to match the repricing characteristics of the interest earning assets and interest bearing liabilities to protect net interest income from changes in market interest rates and changes in the shape of the yield curve. Like most financial institutions, our net interest income is affected significantly by general and local economic conditions, particularly changes in market interest rates, and by governmental policies and actions of regulatory agencies. Net interest income is additionally affected by changes on the volume and mix of interest earning assets, interest earned on this assets, the volume and mix of interest bearing liabilities and interest paid on interest bearing liabilities.

Our net income is affected by many factors, including the provision for loan losses. The provision for loan losses is dependent on changes in the loan portfolio and management's assessment of the collectability of the loan portfolio as well as prevailing economic and market conditions. The allowance for loan losses reflects the amount that the Company believes is appropriate to cover known and inherent credit losses in its loan portfolio.

Net income is also affected by noninterest income and noninterest expense. Noninterest income primarily consists of service charges and other fees, merchant Visa income (net), change in FDIC indemnification asset and other income. Noninterest expense consists primarily of compensation and employee benefits, occupancy and equipment, data processing, professional services and other expenses. Compensation and employee benefits consist primarily of the salaries and wages paid to our employees, payroll taxes, expenses for retirement and other employee benefits. Occupancy and equipment expenses, which are the fixed and variable costs of buildings and equipment, consist primarily of lease payments, taxes, depreciation charges, maintenance and costs of utilities.

Results of operations may also be affected significantly by general and local economic and competitive conditions, governmental policies and actions of regulatory authorities. Other income and other expenses are also impacted by growth of operations and growth in the number of loan and deposit accounts through acquisitions and core banking business growth. Growth in operations affects other expenses primarily as a result of additional employees, branch facilities and marketing expense. Growth in the number of loan and deposit accounts affects other income, including service charges as well as other expenses such as data processing services, supplies, postage, telecommunications and other miscellaneous expenses.

Earnings Summary

Net income was \$0.16 per diluted common share for the three months ended March 31, 2014 compared to \$0.19 per diluted common share for the three months ended March 31, 2013. Net income for the three months ended March 31, 2014 was \$2.5 million compared to net income of \$2.9 million for the same period in 2013. The \$342,000, or 11.9%, decrease was primarily the result of a \$1.1 million increase in noninterest expense, partially offset by a \$400,000 decrease in total provision for loan losses and a \$166,000 increase in net interest income.

Table of Contents

The efficiency ratio consists of noninterest expense divided by the sum of net interest income before provision for loan losses plus noninterest income. The Company's efficiency ratio increased to 77.6% for the three months ended March 31, 2014 from 72.9% for the three months ended March 31, 2013. The increase in the ratio for the three months ended March 31, 2014 is due primarily to the increase in the noninterest expense as a result of the Valley Acquisition and proposed Washington Banking Merger. While growth strategies are being executed, the Company expects to incur higher expenses as evidenced in the current efficiency ratio. Expenses are expected to be more consistent with revenue in the future since these growth strategies are being implemented to produce long term positive results. The efficiency ratio for the three months ended March 31, 2014 was additionally affected by a trending decline in the net interest margin.

Net Interest Income

One of the Company's key sources of earnings is net interest income. There are several factors that affect net income including, but not limited to, the volume, pricing, mix and maturity of interest-earning assets and interest-bearing liabilities; the volume of noninterest-bearing deposits and other liabilities and shareholders' equity; the volume of noninterest-earning assets; market interest rate fluctuations; and asset quality.

Net interest income increased \$166,000, or 1.0%, to \$16.7 million for the three months ended March 31, 2014, compared with \$16.6 million for the same period in 2013. The following table provides relevant net interest income information for the dates indicated. The average loan balances presented in the table are net of allowances for loan losses. Nonaccrual loans have been included in the tables as loans carrying a zero yield. Yields on tax-exempt securities and loans have not been stated on a tax-equivalent basis.

Net interest spread			4.38	%			5.09	%
Net interest margin			4.48	%			5.20	%
Average interest earning assets to average interest bearing liabilities (1) Annualized			140.80	%			138.89	%

The \$166,000 increase in net interest income for the three months ended March 31, 2014 compared to the same period in 2013 was primarily the result of an increase in the taxable securities and the taxable securities' yields and a decrease in the certificate of deposit balance and yields, partially offset by a decrease in the loan yields. The Company continues to experience lower contractual loan note rates which are partially offset by the decreased costs of interest bearing deposits. The effects of the incremental accretion income have also resulted in a decrease in net interest income. The following table presents the net interest margins and effects of the incremental accretion on purchased loans for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,		
	2014	2013	
Net interest margin, excluding incremental accretion on purchased loans (1)	4.23	% 4.48	%
Impact on net interest margin from incremental accretion on purchased loans (1)	0.25	0.72	
Net interest margin	4.48	% 5.20	%

(1) The incremental accretion income represents the amount of income recorded on the purchased loans above the contractual stated interest rate in the individual loan notes. This income results from the discount established at the time these loan portfolios were acquired and modified as a result of quarterly cash flow re-estimation.

Table of Contents

The impact on net interest margin from incremental accretion on purchased loans decreased 47 basis points to 0.25% for the three months ended March 31, 2014 from 0.72% for the same period in 2013 primarily as a result of loans purchased in the NCB Acquisition on January 9, 2013. During the three months ended March 31, 2013, the Bank recorded \$1.1 million of incremental income related to NCB purchased loans primarily as a result of unanticipated prepayments of the newly acquired loans, compared to incremental income related to NCB purchased loans of \$78,000 for the three months ended March 31, 2014.

Net interest income as a percentage of average earning assets (net interest margin) for the three months ended March 31, 2014, decreased 72 basis points to 4.48% from 5.20% for the same period in 2013. The net interest spread for the three months ended March 31, 2014 decreased 71 basis points to 4.38% from 5.09% for the same period in 2013. Total interest income increased \$92,000, or 0.5%, to \$17.6 million for the three months ended March 31, 2014, from \$17.5 million for the three months ended March 31, 2013. The increase in interest income for the three months ended March 31, 2014 was primarily due to the \$22.4 million, or 21.3%, increase in taxable investment securities as well as the increase in the yield and the related interest income recognized on the taxable investment securities, partially offset by lower contractual loan yields.

The balance of average interest earning assets (including nonaccrual loans) increased \$223.5 million, or 17.3%, to \$1.52 billion for the three months ended March 31, 2014, from \$1.29 billion for the three months ended March 31, 2013 primarily due to the Valley Acquisition on July 15, 2013. The Bank acquired fair value of \$117.1 million in loans, \$13.9 million in other interest earning deposits and \$54.4 million in investment securities in the Valley Acquisition. The average interest earning assets for the three months ended March 31, 2013 was impacted by the fair value of \$51.5 million in non-covered loans, \$2.8 million in investment securities and \$1.0 million in other interest earning deposits acquired in the NCB Acquisition on January 9, 2013. The average originated loans receivable, net increased \$129.5 million, or 14.8%, during the three months ended March 31, 2014 to \$1.00 billion from \$873.7 million for the three months ended March 31, 2013.

The yield on total interest earning assets decreased 79 basis points to 4.71% for the three months ended March 31, 2014 from 5.50% for the three months ended March 31, 2013. The decrease in the yield on interest earning assets for the three months ended March 31, 2014 reflects the decrease in loan yields as a result of lower contractual loan rates and declining effects of discount accretion on loan yields, partially offset by an increase in the yield for the taxable investment securities. The effect of discount accretion on loan yields for the three months ended March 31, 2014 and March 31, 2013 was approximately 31 basis points and 90 basis points, respectively. The decrease in discount accretion yield for the three months ended March 31, 2014 as compared to the same period in 2013 was due to early payoffs of certain NCB purchased loans during the three months ended March 31, 2013. For the three months ended March 31, 2014 and March 31, 2013, nonaccruing originated loans reduced the yield earned on loans by approximately five basis points and seven basis points, respectively. Originated nonaccrual loans totaled \$10.6 million at March 31, 2014 as compared to \$6.9 million at December 31, 2013 and \$13.6 million at March 31, 2013.

Total interest expense decreased by \$74,000, or 7.8%, to \$872,000 for the three months ended March 31, 2014 from \$946,000 for the three months ended March 31, 2013. The decrease in interest expense was attributable to lower average rates paid on interest bearing liabilities, partially offset by higher average interest bearing liabilities.

The average cost of interest bearing liabilities decreased eight basis points to 0.33% for the three months ended March 31, 2014 from 0.41% for the three months ended March 31, 2013. Total average interest bearing liabilities increased by \$146.1 million, or 15.7%, to \$1.08 billion for the three months ended March 31, 2014 from \$930.7 million for the three months ended March 31, 2013. The increase in average interest bearing liabilities for the three months ended March 31, 2014 was due primarily to the Valley Acquisition on July 15, 2013 which had approximately \$161.0 million of assumed interest bearing deposits. The NCB Acquisition on January 9, 2013 had approximately \$40.8 million of interest bearing deposits which was considered in the average interest bearing liabilities for the three months ended March 31, 2013. Additionally, average interest bearing liabilities increased during the three months ended March 31, 2013 as a result of \$26.8 million in non-maturity deposits from one customer which were deposited in first quarter 2013 and were all withdrawn by the end of 2013. These increases in deposits were offset partially by deposit runoff.

Edgar Filing: - Form

Deposit interest expense decreased \$83,000, or 8.9%, to \$854,000 for the three months ended March 31, 2014 compared to \$937,000 for the same quarter in 2013. The decrease in deposit interest expense for the three months ended March 31, 2014 is primarily a result of an eight basis point decrease in the average cost of interest bearing deposits.

Due to the current low interest rate environment, together with the projected principal reduction in higher yielding purchased loans, the Bank expects the net interest margin will continue to decline in future periods.

Table of Contents

Provision for Loan Losses

The provision for loan losses is highly dependent on the Company's ability to manage asset quality and control the level of net charge-offs through prudent underwriting standards. In addition, the decline in general economic conditions could increase future provisions for loan losses and materially impact the Company's net income. The provision for loan losses for originated loans decreased \$295,000, or 59.6%, to \$200,000 for the three months ended March 31, 2014 from \$495,000 for the three months ended March 31, 2013. The amount of the provision was calculated in accordance with the Company's methodology for determining the allowance for loan losses as discussed below. The Bank had net recoveries on originated loans of \$181,000 for the three months ended March 31, 2014 compared to net charge-off \$1.7 million for the three months ended March 31, 2013.

Based on the change in mix and volume of the originated loan portfolio at March 31, 2014 compared to December 31, 2013, as well as the decrease in certain historical loss factors and improvements in certain environmental factors, the Company determined that the provision for loan losses for originated loans of \$200,000 for the three months ended March 31, 2014 was appropriate. The ratio of net (recoveries) charge-offs to average total originated loans outstanding was (0.02%) for the three months ended March 31, 2014 compared to 0.20% for the three months ended March 31, 2013.

The Bank has established a comprehensive methodology for determining the allowance for loan losses. On a quarterly basis, the Bank performs an analysis taking into consideration pertinent factors underlying the credit quality of the loan portfolio. These factors include changes in the amount and composition of the loan portfolio, historical loss experience for various loan classes, changes in economic conditions, delinquency rates, a detailed analysis of individual loans on nonaccrual status, and other factors to determine the level of the allowance for loan losses. The allowance for loan losses on originated loans increased by \$381,000, or 2.2%, to \$17.5 million at March 31, 2014 from \$17.2 million at December 31, 2013. As of March 31, 2014, the Bank identified \$29.3 million of impaired originated loans, which includes \$18.7 million of performing restructured originated loans. Of those impaired loans, \$16.3 million have no allowances for credit losses as their estimated collateral value is equal to or exceeds their carrying costs. The remaining \$13.1 million have related allowances for credit losses totaling \$3.5 million.

Based on the established comprehensive methodology, management deemed the allowance for loan losses on originated loans of \$17.5 million at March 31, 2014 (1.76% of total originated loans and 199.15% of nonperforming originated loans, net of amounts guaranteed by governmental agencies) appropriate to provide for probable incurred losses based on an evaluation of known and inherent risks in the loan portfolio at that date.

The following table outlines the allowance for loan losses on originated loans and related outstanding loan balances at March 31, 2014 and December 31, 2013:

	March 31, 2014	December 31, 2013	
	(Dollars in thousands)		
General Valuation Allowance:			
Allowance for loan losses on originated loans	\$14,010	\$14,054	
Gross originated loan balance of non-impaired loans	967,197	952,569	
Percentage	1.45	% 1.48	%
Specific Valuation Allowance:			
Allowance for loan losses on originated loans	\$3,524	\$3,099	
Gross originated loan balance of impaired loans	29,336	27,386	
Percentage	12.01	% 11.32	%
Total Allowance for Loan Losses:			
Allowance for loan losses on originated loans	\$17,534	\$17,153	
Gross originated loan balance	996,533	979,955	
Percentage	1.76	% 1.75	%

Edgar Filing: - Form

The Bank has established a comprehensive methodology for determining the allowance for loan losses on the purchased other loans which is similar to the methodology for the originated loans receivable with the additional consideration of the remaining fair value discount, if any, on the loans, estimated at the acquisition date. For the purchased impaired loans, the acquisition date fair value incorporated our estimate of future expected cash flows until

54

Table of Contents

the ultimate resolution of these credits. To the extent actual or projected cash flows are less than previously estimated, additional provisions for loan losses on the purchased loan portfolios will be recognized immediately into earnings. To the extent actual or projected cash flows are more than previously estimated, the increase in cash flows is recognized immediately as a recapture of provision for loan losses up to the previously recognized provision for that pool of loans, if any, and then prospectively recognized in interest income as a yield adjustment.

The provision for loan losses on purchased loans for the three months ended March 31, 2014 totaled \$258,000, a decrease of \$105,000, or 28.9%, compared to \$363,000 for the three months ended March 31, 2013. The provision expense for the three months ended March 31, 2014 was due substantially to one borrower who experienced financial difficulties during the period and whose collateral decreased in value. The need for a greater provision expense was partially offset by purchased impaired loans that experienced cash flows that were better than expected for the prior period, which generated a reversal of a portion of the previously recorded allowance for loan losses for certain pools. Excluding the identified transaction, the purchased loans were generally performing in accordance with or better than cash flow estimates from prior periods. During the three months ended March 31, 2013, the provision for loan losses reflected the resolution of a purchased impaired loan to one borrower.

While the Bank believes it has established its existing allowances for loan losses in accordance with GAAP, there can be no assurance that bank regulators, in reviewing the Bank's loan portfolio, will not request the Bank to increase significantly its allowance for loan losses. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is appropriate or that increased provisions will not be necessary should the credit quality of the loans deteriorate. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations.

Noninterest Income

Total noninterest income increased \$62,000, or 2.8%, to \$2.3 million for the three months ended March 31, 2014 compared to \$2.2 million for the same period in 2013. The following table presents the key components of noninterest income for the three months ended March 31, 2014 and the change from the comparable quarter in 2013.

	Three Months Ended March 31,			
	2014	2013	Change	Percentage Change
	(Dollars in thousands)			
Bargain purchase gain on bank acquisition	\$—	\$399	\$(399)	(100.0)%
Service charges and other fees	1,398	1,353	45	3.3
Merchant Visa income, net	245	172	73	42.4
Change in FDIC indemnification asset	(37)	(267)	230	86.1
Gain on sale of investment securities, net	180	—	180	100.0
Other income	521	588	(67)	(11.4)
Total noninterest income	\$2,307	\$2,245	\$62	2.8%

The change in FDIC indemnification asset caption includes amortization of the FDIC indemnification asset and increases to the FDIC indemnification asset as a result of decreases in projected remaining cash flows of the purchased covered loans. The increase in the Change in FDIC indemnification asset was primarily due to a \$248,000 increase in the FDIC share of additional estimated losses as a result of the collateral deterioration of one loan during the three months ended March 31, 2014, which also caused the increase in the provision for loan losses for the same period. Under the symmetrical accounting for acquired covered loans, an increase in the provision for loan losses on covered loans will generally have a related increase in the FDIC share of additional estimated losses. The provision for loan losses on covered loans was \$479,000 for the three months ended March 31, 2014 and increase of \$121,000, or 33.8%, compared to \$358,000 for the three months ended March 31, 2013.

The bargain purchase gain on bank acquisition of \$399,000 for the three months ended March 31, 2013 was the result of the NCB Acquisition in January 2013. There were no acquisitions for the three months ended March 31, 2014.

Table of Contents

Noninterest Expense

Noninterest expense increased \$1.1 million, or 7.7%, to \$14.8 million during the three months ended March 31, 2014 compared to \$13.7 million for the three months ended March 31, 2013. The following table presents the key components of noninterest expense for the three months ended March 31, 2014 and the change from the comparable quarter in 2013.

	Three Months Ended March 31,				Percentage Change
	2014	2013	Change		
	(Dollars in thousands)				
Compensation and employee benefits	\$8,011	\$7,589	\$422	5.6	%

Data processing	996	1,136	(140)	(12.3))
Marketing	505	326	179	54.9	
Professional services	830	1,030	(200)	(19.4))
State and local taxes	249	279	(30)	(10.8))
Impairment loss on investment securities, net	8	2	6	300.0	
Federal deposit insurance premium	252	233	19	8.2	
Other real estate owned, net	52	(104)	156	150.0	
Amortization of intangible assets	156	115	41	35.7	
Other expense	1,103	1,193	(90)	(7.5))
Total noninterest expense	\$14,779	\$13,719	\$1,060	7.7	%

The increase in total noninterest expense for the three months ended March 31, 2014 as compared to the three months ended March 31, 2013 was due primarily to increased expenses related to 2013 Company initiatives. These initiatives included the NCB and Valley Acquisitions, the merger of Central Valley Bank and the proposed merger of Washington Banking, all of which are discussed in Notes 1 and 13 to the Condensed Consolidated Financial Statements included in this Form 10-Q. Additionally, the Company completed a core system conversion in the fourth quarter of 2013, converting from the FiServ Total Plus core system that had been in place for 18 years, to FiServ's DNA platform, which provides a variety of efficiencies in all of the Bank's operation areas. The consolidation by the Company of three of Heritage Bank's existing branches to nearby branches also occurred in the fourth quarter of 2013. The table below includes each of the Company's major initiatives, as well as the direct costs associated with the initiatives, for the three months ended March 31, 2014 and 2013. The amounts include identifiable costs paid to third party providers as well as any retention bonuses or severance payments made in conjunction with these initiatives. The amounts do not include the costs of additional staffing required to be maintained or utilized during a period of time in order to complete the initiatives.

	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Company Initiatives:		
NCB Acquisition	\$—	\$708
Central Valley Bank merger	—	123
Valley Acquisition	430	122
Core system conversion	22	—
Consolidation of existing branches	11	—
Proposed Washington Banking Merger	330	—
Total noninterest expense	\$793	\$953

Table of Contents

The following table further segregates the Company's initiative costs by financial statement caption.

Expense Caption:	Three Months Ended March 31,	
	2014	2013
	(In thousands)	
Compensation and employee benefits	\$—	\$98
Occupancy and equipment	430	33
Data processing	14	506
Professional services	313	316
Other expense	36	—
Total noninterest expense	\$793	\$953

The types of expenses associated with the significant expense categories in the table above are summarized as follows:

- Compensation and employee benefits expense consisted substantially of retention bonus and severance packages paid to transition employees.
- Occupancy and equipment expense consisted primarily of lease termination costs.
- Data processing expense consisted of costs relating to the Company's core system conversion as well as conversions of NCB and Valley.
- Professional services expense related to fees paid to: (1) financial advisors for the NCB Acquisition, the Valley Acquisition and the proposed Washington Banking Merger, (2) attorney, accountant and consultant fees related to mergers and acquisitions, and (3) consultant fees relating to the core system conversion.

Compensation and employee benefits increased \$422,000, or 5.6%, to \$8.0 million during the three months ended March 31, 2014 compared to \$7.6 million during the three months ended March 31, 2013. The increase is the result of the increase in the number of full-time equivalent employees as a result of the NCB and Valley Acquisitions, which increased to 358 at March 31, 2014 from 349 at March 31, 2013. Occupancy and equipment increased \$697,000, or 36.3%, to \$2.6 million for the three months ended March 31, 2014 compared to \$1.9 million for the same period in 2013. The increase was primarily the result of the Valley Acquisition direct costs as reflected in the table above as well as additional non-direct costs which are the result of the acquisition of the Valley branches. Data processing decreased \$140,000, or 12.3%, to \$996,000 for the three months ended March 31, 2014 from \$1.1 million for the same period in 2013. The data processing expense for the three months ended March 31, 2013 included \$506,000 of expenses related primarily to the NCB Acquisition. Without the additional cost of the NCB Acquisition in 2013, data processing expenses for the comparable 2014 period would have increased due to the growth of the Company through acquisitions and a de novo branch.

Other real estate owned, net expense increased by \$156,000 to \$52,000 for the three months ended March 31, 2014 compared to a negative expense of \$104,000 for the same period in 2013 as a result of a decrease in the net gain on sales. The Company also recorded a positive valuation allowance adjustment during the three months ended March 31, 2013 in the amount of \$107,000 related to a covered property that had an increase in collateral value. The increase in other real estate owned, net expense was offset by the decrease in property maintenance costs for the three months ended March 31, 2014 compared to 2013.

Income Tax Expense

The provision for income taxes decreased by \$90,000, or 6.6%, to \$1.3 million for the three months ended March 31, 2014 from \$1.4 million for the three months ended March 31, 2013. The Company's effective tax rate was 33.3% for the three months ended March 31, 2014 compared to 32.0% for the same period in 2013. The increase in the Company's effective tax rate for three months ended March 31, 2014 compared to prior period in 2013 is due primarily to increased non-deductible acquisition expenses related to the proposed Washington Banking Merger.

Financial Condition Overview

Edgar Filing: - Form

Total assets were \$1.662 billion as of March 31, 2014 as compared to \$1.659 billion as of December 31, 2013. The \$3.4 million increase was due primarily to increases of \$24.0 million in cash and cash equivalents, \$16.2 million

57

Table of Contents

in originated loans receivable, net allowance for loan losses and \$3.1 million in investment securities held to maturity, offset by decreases of \$24.3 million in investment securities available for sale, \$9.2 million in purchased non-covered loans receivable, \$2.3 million in purchased covered loans receivable and \$1.7 million in prepaid expenses and other assets. The increase in the cash and cash equivalents is primarily related to the sale of investment securities available for sale with proceeds of \$40.3 million, offset by purchases of investment securities available for sale of \$24.4 million during the three months ended March 31, 2014. The purchased covered and noncovered loans decreased primarily as a result of prepayments and regular principal loan payments. The originated loans receivable increased as loan production outpaced loan pay-offs.

Deposits increased by \$5.0 million, or 0.36%, to \$1.404 billion as of March 31, 2014 compared to \$1.399 billion as of December 31, 2013. The total non-maturity deposits increased to 78.8% of total deposits at March 31, 2014 from 77.9% at December 31, 2013 and certificates of deposits decreased to 21.2% of total deposits at March 31, 2014 from 22.1% at December 31, 2013.

Securities sold under agreement to repurchase decreased \$630,000, or 2.1%, to \$28.8 million as of March 31, 2014 from \$29.4 million as of December 31, 2013 primarily due to changes in customer balances.

Total stockholders' equity increased by \$655,000, or 0.3%, to \$216.4 million as of March 31, 2014 from \$215.8 million at December 31, 2013. The increase during the three months ended March 31, 2014 was due primarily to \$2.5 million in net income and \$491,000 in other comprehensive income which was primarily the result of an increase in the fair value of investment securities available for sale, partially offset by \$2.6 million in cash dividends, \$165,000 in stock repurchases, \$291,000 in stock based compensation expense, and \$89,000 related to the exercise of stock options net of tax affects. The Company's capital position continues to remain strong at 13.0% of total assets as of both March 31, 2014 and December 31, 2013.

Lending Activities

As indicated in the table below, total loans receivable, net of net deferred loan fees increased \$5.1 million, or 0.4%, to \$1.24 billion at March 31, 2014 from \$1.23 billion at December 31, 2013. Originated loans receivable, net of deferred loan fees increased \$16.6 million, or 1.7%, to \$993.9 million at March 31, 2014 from \$977.3 million at December 31, 2013. The covered purchased loans decreased by \$2.3 million, or 3.6%, to \$61.5 million at March 31, 2014 from \$63.8 million at December 31, 2013. The noncovered purchased loans decreased by \$9.2 million, or 4.8%, to \$181.7 million at March 31, 2014 from \$190.9 million at December 31, 2013.

Nonperforming Assets

The following table describes our nonperforming assets for the dates indicated.

	March 31, 2014	December 31, 2013		
	(Dollars in thousands)			
Nonaccrual originated loans:				
Commercial business	\$6,157	\$5,524		
One-to-four family residential	334	340		
Real estate construction and land development	4,074	1,045		
Consumer	62	38		
Total nonaccrual originated loans (1)(2)	10,627	6,947		
Other real estate owned, non-covered	4,102	4,377		
Total nonperforming originated assets	\$14,729	\$11,324		
Restructured performing originated loans:				
Commercial business	\$13,802	\$14,043		
One-to-four family residential	250	252		
Real estate construction and land development	4,549	6,043		
Consumer	109	101		
Total restructured performing originated loans(3)	\$18,710	\$20,439		
Accruing originated loans past due 90 days or more(4)	—	6		
Potential problem originated loans(5)	41,650	34,504		
Allowance for loan losses on originated loans	17,534	17,153		
Nonperforming originated loans to total originated loans(6)	0.89	% 0.53		%
Allowance for loan losses to total originated loans (6)	1.76	% 1.76		%
Allowance for loan losses to nonperforming originated loans(6)	199.15	% 329.40		%
Nonperforming originated assets to total originated assets(6)	0.90	% 0.68		%

(1) \$3.0 million and \$2.5 million of nonaccrual originated loans were considered troubled debt restructurings at March 31, 2014 and December 31, 2013, respectively.

(2) \$1.8 million and \$1.7 million of nonaccrual originated loans were guaranteed by government agencies at March 31, 2014 and December 31, 2013, respectively.

(3) \$1.2 million of restructured performing originated loans were guaranteed by government agencies at both March 31, 2014 and December 31, 2013.

(4) There were no accruing originated loans past due 90 days or more that were guaranteed by government agencies at March 31, 2014 or December 31, 2013.

(5) \$1.4 million and \$1.8 million of potential problem originated loans were guaranteed by government agencies at March 31, 2014 and December 31, 2013, respectively.

(6) Excludes portions guaranteed by government agencies and includes net deferred fees.

Nonperforming originated assets increased \$3.7 million to \$10.6 million, or 0.89% of total originated assets excluding portions guaranteed by governmental agencies, at March 31, 2014 from \$6.9 million, or 0.53% of total originated assets excluding portions guaranteed by governmental agencies, at December 31, 2013 due to an increase in nonperforming originated loans offset partially by a decrease in noncovered other real estate owned. For the three months ended March 31, 2014, the increase in nonperforming loans was primarily the result of additions of nonperforming loans of \$4.4 million (\$1.0 million of which were previously classified as performing troubled debt restructured loans), principal payments of \$629,000 and transfers to other real estate owned of \$88,000. The addition to nonperforming loans was primarily the result of one borrowing relationship totaling \$4.2 million which was downgraded during the period. The Bank has recorded a specific valuation allowance on this downgraded borrowing relationship of \$604,000 at March 31, 2014. The other real estate owned, noncovered balance decreased to \$4.1 million at March 31, 2014 from \$4.4 million at December 31, 2013 as a result of the sale of three properties with net proceeds of \$520,000 and net gain of \$27,000, partially offset by the addition of two properties totaling \$218,000 in

other real estate owned.

60

Table of Contents

Restructured performing originated loans were \$18.7 million and \$20.4 million as of March 31, 2014 and December 31, 2013, respectively. The \$1.7 million, or 8.5%, decrease in the restructured performing originated loans for the three months ended March 31, 2014 was primarily the result of \$1.2 million of loan pay-offs, \$1.0 million of loans transferred to nonaccrual and \$452,000 of principal payments, offset partially by advances of \$962,000. The advances are primarily related to one single family construction borrowing relationship. At March 31, 2014 and December 31, 2013, the Company had recorded \$3.7 million and \$2.2 million, respectively, in allowance for loan losses on the restructured performing originated loans.

Potential problem originated loans as of March 31, 2014 and December 31, 2013 were \$41.6 million and \$34.5 million, respectively. Potential problem loans are those loans that are currently accruing interest and are not considered impaired, but which we are monitoring because the financial information of the borrower causes us concerns as to their ability to comply with their loan repayment terms. Loans that are past due 90 days or more and still accruing interest are both well secured and in the process of collection. The \$7.1 million, or 20.7%, increase in the potential problem loans was primarily the result of \$15.7 million of loan downgrades and \$353,000 of principal advances, offset by \$4.2 million of principal repayments, \$2.4 million of loans transferred to impaired loans, \$1.7 million of loan upgrades and \$549,000 of regular payments of previously categorized potential problem loans. The loan downgrades during the three months ended March 31, 2014 consisted primarily of a \$4.6 million non-owner occupied commercial real estate loan which was downgraded to special mention and a \$7.8 million five-or-more family residential and commercial construction loan which was downgraded to substandard.

Analysis of Allowance for Loan Losses

Management maintains an allowance for loan losses (“ALL”) to provide for estimated probable incurred credit losses inherent in the loan portfolio. The adequacy of the ALL is monitored through our ongoing quarterly loan quality assessments.

We assess the estimated probable incurred credit losses inherent in our loan portfolio by considering a number of elements including:

- Historical loss experience in a number of homogeneous classes of the loan portfolio;
- The impact of environmental factors, including:
 - Levels of and trends in delinquencies and impaired loans;
 - Levels and trends in charge-offs and recoveries;
 - Effects of changes in risk selection and underwriting standards, and other changes in lending policies, procedures and practices;
- Experience, ability, and depth of lending management and other relevant staff;
- National and local economic trends and conditions;
- External factors such as competition, legal, and regulatory requirements; and
- Effects of changes in credit concentrations.

We calculate an appropriate ALL for the non-classified and classified performing loans in our loan portfolio by applying historical loss factors for homogeneous classes of the portfolio, adjusted for changes to the above-noted environmental factors. We may record specific provisions for impaired loans, including loans on nonaccrual status and TDRs, after a careful analysis of each loan’s credit and collateral factors. Our analysis of an appropriate ALL combines the provisions made for our non-classified loans, classified loans, and the specific provisions made for each impaired loan.

While we believe we use the best information available to determine the allowance for loan losses, results of operations could be significantly affected if circumstances differ substantially from the assumptions used in determining the allowance. A further decline in local and national economic conditions, or other factors, could result in a material increase in the allowance for loan losses and may adversely affect the Company’s financial condition and results of operations. In addition, the determination of the amount of the allowance for loan losses is subject to review by bank regulators, as part of their routine examination process, which may result in the establishment of additional allowance allocations based upon their judgment of information available to them at the time of their examination.

Table of Contents

The following table provides information regarding changes in our allowance for originated loan losses for the three months ended March 31, 2014 and 2013:

	For the Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Originated loans outstanding at the end of the period, net of deferred loan fees	\$993,911	\$887,111
Average originated loans receivable during the period	1,003,252	873,727
Allowance for originated loan losses at the beginning of the period	17,153	19,125
Provision for loan losses on originated loans	200	495
Charge-offs:		
Commercial business	—	(1,637)
Real estate construction and land development	—	(83)
Consumer	(63)	(107)
Total charge-offs	(63)	(1,827)
Recoveries:		
Commercial business	232	110
Consumer	12	9
Total recoveries	244	119
Net recoveries (charge-offs)	181	(1,708)
Allowance for originated loan losses at end of period	\$17,534	\$17,912
Allowance for originated loan losses to total originated loans receivable, net deferred loan fees	1.76	% 2.02 %
Ratio of net recoveries (charge-offs) during period to average originated loans receivable	0.02	% (0.20)%

The allowance for loan losses for originated loans increased \$381,000 to \$17.5 million at March 31, 2014 from \$17.2 million at December 31, 2013. The allowance for loan losses increased during the period because of an increase in nonperforming loans as well as the change in mix and volume of loan types. The nonperforming loans increased from \$6.9 million at December 31, 2013 to \$10.6 million at March 31, 2014. The increase was primarily the result of the deterioration of one lending relationship totaling \$4.2 million. Nonperforming originated loans to total originated loans excluding portions guaranteed by governmental agencies increased to 0.89% at March 31, 2014 from 0.53% at December 31, 2013 and the allowance for loan losses to nonperforming originated loans excluding portions guaranteed by governmental agencies was 199.15% at March 31, 2014 and 329.40% at December 31, 2013. These ratios increased primarily due to the one lending relationship previously mentioned.

Based on management's assessment of loan quality and current economic conditions, the Company believes that its allowance for loan losses was appropriate to absorb the probable incurred losses and inherent risks of loss in the loan portfolio at March 31, 2014.

Liquidity and Cash Flows

Our primary sources of funds are customer deposits, loan principal and interest payments and interest earned on and proceeds from sales and maturities of investment securities. These funds, together with retained earnings, equity and other borrowed funds (as necessary), are used to make loans, acquire investment securities and other assets, and fund continuing operations. While maturities and scheduled amortization of loans are predictable sources of funds, deposit flows and prepayments are greatly influenced by the level of interest rates, economic conditions, and competition. In addition to customer deposits, management may utilize the use of brokered deposits on an as-needed basis.

Heritage Bank: The principal objective of the Bank's liquidity management program is to maintain the ability to meet day-to-day cash flow requirements of its customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs. The Bank monitors the sources and uses of funds on a daily basis to maintain an acceptable

liquidity position. In addition to liquidity from core deposits and the repayment and maturities of loans, the Bank can utilize established credit facilities and lines with correspondent banks or sale of investment securities.

Table of Contents

Heritage Financial Corporation: The Company is a separate legal entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. However, management believes that such restrictions will not have an adverse impact on the ability of the Company to meet its ongoing cash obligations.

Consolidated Cash Flows: As disclosed in the Condensed Consolidated Statements of Cash Flows, net cash provided by operating activities was \$5.5 million for the three months ended March 31, 2014, and primarily consisted of net income of \$2.5 million and depreciation and amortization of \$2.7 million. During the three months ended March 31, 2014, net cash provided by investing activities was \$15.5 million, which consisted primarily of proceeds from sale of investment securities available for sale of \$40.3 million available for sale, and maturities of investment securities available for sale of \$7.3 million, partially offset by purchases of investment securities of \$27.7 million and total loan receivable originations, net of principal payments of \$5.2 million. Net cash provided by financing activities was \$3.0 million for the three months ended March 31, 2014, and primarily consisted of the net increase in deposits of \$5.0 million, partially offset by the \$1.3 million payment of cash dividends on common stock.

Deposits and Other Borrowings

As indicated in the table below, total deposits increased \$5.0 million, or 0.4%, to \$1.404 billion at March 31, 2014 from \$1.399 billion at December 31, 2013.

	March 31, 2014	% of Total	December 31, 2013	% of Total	
	(Dollars in thousands)				
Non-interest demand deposits	\$353,043	25.1	% \$349,902	25.0	%
NOW accounts	350,182	24.9	352,051	25.2	
Money market accounts	235,541	16.8	232,016	16.6	
Savings accounts	167,988	12.0	155,790	11.1	
Total non-maturity deposits	1,106,754	78.8	1,089,759	77.9	
Certificate of deposit accounts	297,460	21.2	309,430	22.1	
Total deposits	\$1,404,214	100.0	% \$1,399,189	100.0	%

Since December 31, 2013, non-maturity deposits (total deposits less certificate of deposit accounts) have increased \$17.0 million, or 1.6%, to \$1.11 billion from \$1.09 billion and certificate of deposit accounts have decreased \$12.0 million, or 3.9%, to \$297.5 million from \$309.4 million. The increase in non-maturity deposits is primarily the result of the increases in balance from existing customer relationships. The decrease in certificates of deposits is primarily the result of maturities without renewal of certificates that were at higher than current market rates. As a result of the change in volume and types of deposits, the percentage of certificate of deposit accounts to total deposits decreased to 21.2% at March 31, 2014 from 22.1% at December 31, 2013.

Borrowings may also be used on a short-term basis to compensate for reductions in other sources of funds (such as deposit inflows at less than projected levels). Borrowings may also be used on a longer-term basis to support expanded lending activities and match the maturity of repricing intervals of assets. The Bank is utilizing securities sold under agreement to repurchase as a supplement to its funding sources. Our repurchase agreements are secured by available for sale investment securities. At March 31, 2014, the Bank had securities sold under agreements to repurchase totaling \$28.8 million, a decrease of \$630,000, or 2.1%, from \$29.4 million at December 31, 2013. The decrease is the result of customer activity during the period.

We are required to maintain an adequate level of liquidity to ensure the availability of sufficient funds to fund loan originations and deposit withdrawals, satisfy other financial commitments, and fund operations. We generally maintain sufficient cash and short-term investments to meet short-term liquidity needs. At March 31, 2014, cash and cash equivalents totaled \$154.4 million, or 9.32% of total assets. In addition, \$6.2 million of the \$15.2 million of other interest earning deposits are scheduled to mature within one year of March 31, 2014. The fair value of investment securities available for sale totaled \$138.8 million at March 31, 2014; however, management generally does not consider those with maturities beyond one year to be a viable source of liquidity given that many securities available

for sale are pledged to secure borrowing arrangements. The fair value of investment securities classified as either available for sale or held to maturity with maturities of one year or less amounted to \$2.9 million, or less than 0.18% of total assets. At March 31, 2014, the Bank maintained credit facilities with the FHLB of Seattle for \$327.6 million and credit facilities with the Federal Reserve Bank of San Francisco for \$54.5 million, of which there were no borrowings

Table of Contents

outstanding at March 31, 2014. The Bank also maintains lines with Zions Bank, Wells Fargo, US Bank and Pacific Coast Bankers' Bank to purchase federal funds totaling \$50.0 million as of March 31, 2014. There were no federal funds purchased as of March 31, 2014.

Capital and Capital Requirements

Stockholders' equity at March 31, 2014 was \$216.4 million compared with \$215.8 million at December 31, 2013. During the three months ended March 31, 2014, the Company realized net income of \$2.5 million, declared cash dividends of \$2.6 million, recorded \$491,000 in other comprehensive income, recorded stock-based compensation expense totaling \$291,000, recorded \$89,000 related to the exercise of stock options, net of tax effect, and repurchased common stock for \$165,000.

The Company is a bank holding company under the supervision of the Federal Reserve Bank of San Francisco. Bank holding companies are subject to capital adequacy requirements of the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended, and the regulations of the Federal Reserve Board. Heritage Bank is a federally insured institution and thereby is subject to the capital requirements established by the FDIC. The Federal Reserve Board capital requirements generally parallel the FDIC requirements. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's Condensed Consolidated Financial Statements and operations. Management believes the Company and the Bank meet all capital adequacy requirements to which they are subject. Pursuant to minimum capital requirements of the FDIC, Heritage Bank was required to maintain a leverage ratio (Tier 1 capital to average assets ratio) of 4.0% and risk-based capital ratios of Tier 1 capital and total capital (to total risk-weighted assets) of 4.0% and 8.0%, respectively. As of March 31, 2014 and December 31, 2013, the most recent regulatory notifications categorized Heritage Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the Bank's categories.

	Minimum Requirements		Well-Capitalized Requirements		Actual			
	\$	%	\$	%	\$	%

Table of Contents

In July 2013, the Federal banking regulators approved a final rule to implement the revised capital adequacy standards of the Basel Committee on Banking Supervision, commonly called Basel III, and to address relevant provisions of the Dodd-Frank Act. The final rule strengthens the definition of regulatory capital, increases risk-based capital requirements, makes selected changes to the calculation of risk-weighted assets, and adjusts the prompt corrective action thresholds. Community banking organizations, such as the Company and the Bank, become subject to the new rule on January 1, 2015 and certain provisions of the new rule will be phased in over the period of 2015 through 2019. The final rule:

Permits banking organizations that had less than \$15 billion in total consolidated assets as of December 31, 2009, or were mutual holding companies as of May 19, 2010, to include in Tier 1 capital trust preferred securities and cumulative perpetual preferred stock that were issued and included in Tier 1 capital prior to May 19, 2010, subject to a limit of 25% of Tier 1 capital elements, excluding any non-qualifying capital instruments and after all regulatory capital deductions and adjustments have been applied to Tier 1 capital.

Establishes new qualifying criteria for regulatory capital, including new limitations on the inclusion of deferred tax assets and mortgage servicing rights.

- Requires a minimum ratio of common equity Tier 1 capital to risk-weighted assets of 4.5%.
- Increases the minimum Tier 1 capital to risk-weighted assets ratio requirement from 4% to 6%.
- Retains the minimum total capital to risk-weighted assets ratio requirement of 8%.

Establishes a minimum leverage ratio requirement of 4%.

Retains the existing regulatory capital framework for one-to-four family residential mortgage exposures.

Permits banking organizations that are not subject to the advanced approaches rule, such as the Company and the Bank, to retain, through a one-time election, the existing treatment for most accumulated other comprehensive income, such that unrealized gains and losses on securities available for sale will not affect regulatory capital amounts and ratios.

Implements a new capital conservation buffer requirement for a banking organization to maintain a common equity capital ratio more than 2.5% above the minimum common equity Tier 1 capital, Tier 1 capital and total risk-based capital ratios in order to avoid limitations on capital distributions, including dividend payments, and certain discretionary bonus payments. The capital conservation buffer requirement will be phased in beginning on January 1, 2016 at 0.625% and will be fully phased in at 2.50% by January 1, 2019. A banking organization with a buffer of less than the required amount would be subject to increasingly stringent limitations on such distributions and payments as the buffer approaches zero. The new rule also generally prohibits a banking organization from making such distributions or payments during any quarter if its eligible retained income is negative and its capital conservation buffer ratio was 2.5% or less at the end of the previous quarter. The eligible retained income of a banking organization is defined as its net income for the four calendar quarters preceding the current calendar quarter, based on the organization's quarterly regulatory reports, net of any distributions and associated tax effects not already reflected in net income.

Increases capital requirements for past-due loans, high volatility commercial real estate exposures, and certain short-term commitments and securitization exposures.

- Expands the recognition of collateral and guarantors in determining risk-weighted assets.

Removes references to credit ratings consistent with the Dodd-Frank Act and establishes due diligence requirements for securitization exposures.

The Company's management is currently evaluating the provisions of the final rule and their expected impact on the Company.

Quarterly, the Company reviews the potential payment of cash dividends to its common shareholders. The timing and amount of cash dividends paid on our common stock depends on the Company's earnings, capital requirements,

financial condition and other relevant factors. Dividends on common stock from the Company depend substantially upon receipt of dividends from the Bank, which is the Company's predominant source of income. On January 29, 2014, the Company's Board of Directors declared a dividend of \$0.08 per share payable on February 24, 2014 to shareholders of record on February 10, 2014. In addition, on March 27, 2014, the Company's Board of Directors declared a dividend of \$0.08 per share payable on April 23, 2014 to shareholders of records on April 8, 2014. This quarterly dividend was made one month in advance of the normal quarterly dividend as a result of the anticipated merger with Washington Banking.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our results of operations are highly dependent upon our ability to manage interest rate risk. We consider interest rate risk to be a significant market risk that could have a material effect on our financial condition and results of operations. Interest rate risk is measured and assessed on a quarterly basis. In our opinion, there has not been a material change in our interest rate risk exposure since the information disclosed in our annual report on Form 10-K for the year-ended at December 31, 2013.

We do not maintain a trading account for any class of financial instrument nor do we engage in hedging activities or purchase high-risk derivative instruments. Moreover, we have no material foreign currency exchange rate risk or commodity price risk.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

An evaluation of the Company's disclosure controls and procedure (as defined in Section 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934 (the "Act")) was carried out under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and the Company's Disclosure Committee as of the end of the period covered by this quarterly report. In designing and evaluating the Company's disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Based on their evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures as of March 31, 2014 are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Act) that occurred during the three months ended March 31, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. The Company does not expect that its internal control over financial reporting will prevent all error and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Heritage and Heritage Bank, are not a party to any material pending legal proceedings other than ordinary routine litigation incidental to the business of the Bank, other than the matters described below.

On April 4, 2014, Washington Banking, its directors and Heritage entered into a Memorandum of Understanding (the "MOU") with the plaintiffs providing the terms of an agreement in principle among Washington Banking, its directors,

Table of Contents

Heritage and the plaintiffs for the settlement of the putative shareholder class action lawsuit captioned In Re Washington Banking Company Shareholder Litigation, Lead Case No. 13-2-38689-5 SEA, pending before the Superior Court of the State of Washington in and for King County (the "Action"). The Action alleges that Washington Banking's directors breached their fiduciary duties to Washington Banking and its shareholders in connection with the transactions contemplated by the Agreement and Plan of Merger, dated October 23, 2013 (the "Merger Agreement"), under which Washington Banking and Heritage will combine their organizations in a strategic combination, with Washington Banking merging with and into Heritage (the "Merger"). The Action also alleges, among other things, that Heritage aided and abetted the alleged breaches of fiduciary duties by Washington Banking's directors and that the public disclosures concerning the Merger are misleading in various respects.

Under the terms of the MOU, plaintiffs' counsel also has reserved the right to seek an award of attorneys' fees and costs. If the Court approves the settlement contemplated by the MOU, the lawsuit will be dismissed with prejudice. There can be no assurance, however, that the parties will ultimately enter into a definitive settlement agreement or that the Court will approve the settlement even if the parties enter into such an agreement. In the absence of either event, the proposed settlement as contemplated by the MOU may be terminated.

The settlement of the Action will not affect the Merger consideration to be paid to Washington Banking's shareholders in connection with the proposed Merger.

Washington Banking, its directors and Heritage continue to believe that the Action is without merit, have vigorously denied, and continue to vigorously deny, all of the allegations of wrongful or actionable conduct asserted in the Action, and Washington Banking and its directors and Heritage maintain that they have diligently complied with all applicable fiduciary duties, that the Proxy Statement is complete and accurate in all material respects and that no further disclosure is required under applicable law. Washington Banking, its directors and Heritage are entering into the MOU and the contemplated settlement solely to eliminate the costs, risks, burden, distraction and expense of further litigation and to put the claims that were or could have been asserted to rest. Nothing in the MOU, any settlement agreement or any public filing, including this Current Report on Form 8-K, shall be deemed an admission of the legal necessity of filing or the materiality under applicable laws of any of the additional information contained herein or in any public filing associated with the proposed settlement of the Action.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors set forth in Part I. Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The Company has had various stock repurchase programs since March 1999. On August 30, 2012, the Board of Directors approved the Company's tenth stock repurchase plan, authorizing the repurchase of up to 5% of the Company's outstanding shares of common stock, or approximately 757,000 shares. There is no time limit on the tenth plan.

During the three months ended March 31, 2014 and 2013, the Company did not repurchase shares under the plan. In total, the Company has repurchased 596,900 shares at an average price of \$15.70 per share under the tenth stock repurchase plan as of March 31, 2014.

During the three months ended March 31, 2014 and 2013, the Company repurchased 9,298 and 7,780 shares at an average price of \$17.77 and \$14.21 to pay withholding taxes on restricted stock that vested during the three months ended March 31, 2014 and 2013, respectively.

The following table sets forth information about the Company's purchases of its outstanding common stock during the quarter ended March 31, 2014

Table of Contents

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share(1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1, 2014—January 31, 2014	164	\$17.15	7,205,348	160,100
February 1, 2014—February 28, 2014	6,203	17.53	7,205,348	160,100
March 1, 2014—March 31, 2014	2,931	18.30	7,205,348	160,100
Total	9,298	\$17.77	7,205,348	160,100

(1) Common shares repurchased by the Company between January 1, 2014 and March 31, 2014 included solely the cancellation of 9,228 shares of restricted stock to pay withholding taxes at an average price per share of \$17.77.
