Total costs and expenses in 2004 increased to \$1,194,645 vs. \$1,019,226 in 2003. This was related to increased marketing efforts and research and development expenses. Operating revenues decreased by 12% from the comparable quarter in 2003. The Company anticipates that sales of the BVA-100 Blood Volume Analyzers and kits will be the major source of income for the Company. The Company plans to continue expanding its sales and marketing force, which currently consists of 12 salesmen and 4 support personnel.

Six months ended June 30, 2004 as compared with six months ended June 30, 2003.

For the six months ended June 30, 2004, total revenues were \$2,063,765 up from \$1,509,284 in 2003. Operating revenues were \$662,983 up from \$509,094 in 2003. Selling and administrative expenses were \$1,537,378 in 2004, vs. \$1,295,354 in 2003. The increased expenses were related to the employment of additional sales and marketing personnel. In 2004, Dividend income was \$966,800 with a net interest expense of \$31,976 as compared to the dividend income of \$910,641 with a net interest expense of \$33,582 in 2003. In 2004, the Company had a net loss before income taxes of (\$222,637) versus a net loss before income taxes of (\$500,594) in 2003.

LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2004 the Company had total assets of \$49,524,095 with shareholders' equity of \$36,060,404. The Company has a net pre-taxed unrealized gain of \$25,635,758 and \$16,919,600 of net after tax unrealized capital gains on available-for-sale securities in its portfolio. This amount is included in the calculation of Total Shareholders' Equity. The Company's stock portfolio had a market value of \$48,537,767 with short-term loans of \$ 4,039,865 with 4,609,826 shares outstanding. The Company has the current liabilities of \$13,463,691. Included in these liabilities are deferred taxes of \$8,716,158. These deferred taxes would occur if the Company chose to sell its entire portfolio. Current liabilities minus these deferred taxes equals \$4,747,533.

The Company has adequate resources for the current marketing level of its Blood Volume Analyzer as well as capital to sustain its localized semen and blood banking services. The Company anticipates hiring additional regional

Edgar Filing: DAXOR CORP - Form 10-Q

managers to the existing sales/marketing team. It is the goal of the marketing team to develop an individual sales team for each regional manager. The Company is also expanding its support services personnel. The decision to develop the marketing team was partially based on the anticipation of new publications in peer reviewed medical journals by current users of the Blood Volume Analyzer.

The Company's goal is to establish blood volume measurement as a standard of care in multiple areas of medicine and surgery. It is hoped that the publication of research studies from leading medical facilities will result in an increase in sales in both the Blood Volume Analyzer and its associated kits.

3

The Company sells, as well as offers to lease or rent the BVA-100 as part of the overall marketing plan. The Company also loans the instrument for a limited time period, however, facilities evaluating the instrument must pay for the kits. Daxor Capital was established through a relationship with De Lage Landen (DLL). The significance of this relationship is as sales through leases increases, Daxor will not have to diminish its capital outlay for equipment as DLL will fund the net present value of the lease upon installation of the equipment. In an effort to obtain the best rates for our clients, the Company will also work with other independent leasing firms.

The Company is evaluating blood volume instrumentation management programs for hospitals. Under such a plan, the Company would provide equipment and personnel on a sub-contract basis. The Company will use its current financial reserves primarily for developing and marketing the Blood Volume Analyzer. The Company is evaluating various options to expand blood banking services in conjunction with the use of the Blood Volume Analyzer. Additional information on the Company is available on our website www.daxor.com.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is currently not exposed to any risk from currency fluctuations. The company's investment portfolio is a major source of revenue. The market value of this portfolio is related to fluctuations with the electric utility industry. Between 5% and 10% of the Company's portfolio are non-utilities. The Company will sell puts on stocks that it is willing to own. The Company neither sells naked calls nor engages in derivative transactions. Fluctuations in the value of these holdings for the past 5 years are reflected and closely correlated with changes in the total assets of the Company.

Item 4. Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report.
