Summary

2006-2008, on a diluted basis, existing BDN shareholders receive more NOI from their investment in the combined company than owning BDN on a stand alone basis

After factoring in the expected incremental NOI from Cira Centre and Radnor Financial Center- existing BDN shareholders will participate in greater NOI growth within the combined company versus BDN stand alone

BDN existing markets expected to grow at one third the rate of the PP markets the combined company will focus on long-term

Depth of new markets creates opportunities for acquisition and development program expansion over the next three years
