CASTELLE
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Basis of Presentation:

The accompanying unaudited condensed consolidated financial statements include the accounts of Castelle and its wholly-owned subsidiary in the United Kingdom. These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. All intercompany balances and transactions have been eliminated. In our opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of our financial position, results of operations and cash flows at the dates and for the periods indicated have been included. Because all of the disclosures required by accounting principles generally accepted in the United States of America are not included in the accompanying condensed consolidated financial statements and related notes, they should be read in conjunction with the audited consolidated financial statements and related notes included in the Company's Form 10-K for the year ended December 31, 2004. The condensed consolidated balance sheet data as of December 31, 2004 was derived from our audited financial statements and does not include all of the disclosures required by accounting principles generally accepted in the United States of America. The results of operations for the periods presented are not necessarily indicative of results that we expect for any future period, or for the entire year.

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

We believe that our existing cash balances and anticipated cash flows from operations will be sufficient to meet our anticipated capital requirements for the next 12 months. If we have a need for additional capital resources, we may be required to sell additional equity or debt securities, secure additional lines of credit or obtain other third party financing. The timing and amount of such capital requirements cannot be determined at this time and will depend on a number of factors, including demand for our existing and new products, if any, and changes in technology in the networking industry. There can be no assurance that such additional financing will be available on satisfactory terms when needed, if at all. Failure to raise such additional financing, if needed, may result in us not being able to achieve our long-term business objectives. To the extent that additional capital is raised through the sale of additional equity or convertible debt securities, the issuance of such securities would result in additional dilution to our shareholders.

In addition, because we are dependent on a small number of distributors for a significant portion of the sales of our products, the loss of any of our major distributors or their inability to satisfy their payment obligations to us could have a significant adverse effect on our business, operating results and financial condition. In the first nine months of 2005 and 2004, our two largest distributors collectively represented approximately 45% and 44% of our net sales, respectively.

We do not currently have any material long-term supply contracts with any of our manufacturing subcontractors or component suppliers. We purchase finished products and components on a purchase order basis. We own all engineering, sourcing documentation, functional test equipment and tooling used in the manufacturing of our products and believe that we could shift product assembly to alternate suppliers if necessary. Certain key components of our products, including a

modem chip set from Conexant, microprocessors from Motorola, integrated circuits from Intel and Kendin, are currently available from single sources. Other components of our products are currently available from only a limited number of sources. In addition, certain manufacturers have announced the end-of-life of certain standard off-the-shelf components which are being used by us in the manufacture of our FaxPress Products. However, we have purchased over the last two years what we believe to be at least two years worth of supplies of these end-of-life components in an effort to guarantee an uninterrupted supply of FaxPress Products to our customers for the next one to two years, while we decide whether to re-engineer our Products with the manufacturers' suggested replacement parts, or develop new replacement products. We believe that most of these end-of-life components will be utilized in the following one to two years, resulting in insignificant amounts of excessive inventory, or none at all. We believe that Castelle's liquidity continues to be strong despite these purchases, as our cash reserves have increased during the periods when the parts were purchased.

2. Revenue Recognition:

We recognize revenue based on the provisions of Staff Accounting Bulletin No. 104 *Revenue Recognition*, AICPA Statement of Position No. 97-2 (*SOP 97-2*) *Software Revenue Recognition*, as amended by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, with Respect to Certain Transactions*, and Statement of Financial Accounting Standards (*SFAS*) No. 48 *Revenue Recognition When Right of Return Expires*.

The Company uses the residual method to recognize revenue when an agreement includes one or more elements to be delivered at a future date. If there is an undelivered element under the arrangement, the Company defers revenue based on vendor-specific objective evidence of the fair value of the undelivered element, as determined by the price charged when the element is sold separately. If vendor-specific objective evidence of fair value does not exist for all undelivered elements, the Company defers all revenue until sufficient evidence exists or all elements have been delivered.

Product revenue is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred; the fee is fixed and determinable; collection is probable; and returns can be reasonably estimated. If an acceptance period or other contingency exists, revenue is recognized upon satisfaction of the contingency, customer acceptance or expiration of the acceptance period. Shipment generally occurs and title and risk of loss is transferred when the product is delivered to a common carrier.

We evaluate product sales through our distribution channels and the related reserve requirement to establish an estimate for our sales returns reserve by reviewing detailed point-of-sales and on-hand inventory reports provided to us by our channel partners. Based on a combination of historical return experience, the sales activities to end-user customers by our channel partners and the level of inventories on hand at the channel partners, we determine our returns reserve at the end of each financial period, and increase or reduce the reserve balance accordingly.

We provide standard support to our customers for an initial period of sixty days, which includes advance swap of the defective hardware and software, bug fixes, software upgrades and technical support. In addition to standard support, we also offer our customers the option to purchase extended support at the time of product purchase or anytime thereafter. Extended support covers hardware and software for a period of one year. We have established vendor-specific objective evidence with respect to the fair value of the standard support contracts based on standalone sales and renewals of our one-year extended support contracts. The fair value of our sixty day support contracts included with product sales is determined by pro-rating the related one-year extended support contracts. We

recognize revenue from extended support contracts ratably over the period of the contract based on contract service dates.

3. Net Income Per Share:

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding for such period. Diluted net income per share reflects the potential dilution from the exercise or conversion of other securities into common stock that were outstanding during the period. Diluted net income per share excludes shares that are potentially dilutive if their effect is antidilutive. Dilutive potential shares consist of incremental common shares issuable upon exercise of stock options.

Basic and diluted net income per share is calculated as follows for the quarters and nine months ended September 30, 2005 and 2004 (unaudited, in thousands, except per share amounts):

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Basic:				
Weighted average common shares outstanding	3,940	3,647	3,875	3,573
Net income	\$ 248	\$ 130	\$ 699	\$ 405
Net income per common share basic	\$ 0.06	\$ 0.04	\$ 0.18	\$ 0.11
Diluted:				
Weighted average common shares outstanding	3,940	3,647	3,875	3,573
Common equivalent shares from stock options	627	706	619	841
Shares used in per share calculation diluted	4,567	4,353	4,494	4,414
Net income	\$ 248	\$ 130	\$ 699	\$ 405
Net income per common share diluted	\$ 0.05	\$ 0.03	\$ 0.16	\$ 0.09

The calculation of diluted shares outstanding for the quarter ended September 30, 2005 excludes 34,705 shares of common stock issuable upon exercise of outstanding stock options, as their effect was antidilutive in the period. The calculation of diluted shares outstanding for the nine months ended September 30, 2005 excludes 132,705 shares of common stock issuable upon exercise of outstanding stock options, as their effect was antidilutive in the period.

4. Stock-Based Compensation

We account for our stock-based compensation plans using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). Compensation cost for stock options, if any, is measured by the excess of the quoted market price of our stock at the date of grant over the amount an employee must pay to acquire the stock. No compensation expense has been recognized in the accompanying financial statements

Edgar Filing: CASTELLE \CA\ - Form 10-Q

as the option terms are fixed and the exercise price equals the market price of the underlying stock on the date of grant for all options granted by the Company. SFAS No. 123, Accounting for Stock-Based Compensation, established accounting and disclosure requirements using a fair-value based method of accounting for stock-based employee compensation plans.

Had compensation costs been determined consistent with SFAS No. 123, our net income, net of income taxes, would have been changed to the amounts indicated below (unaudited, in thousands, except per share data):

8

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Net Income as reported	\$ 248	\$ 130	\$ 699	\$ 405
Fair value of stock-based compensation, net of taxes	(69)	(128)	(243)	(382)
Net income pro forma	\$ 179	\$ 2	\$ 456	\$ 23
Net income per share basic as reported	\$ 0.06	\$ 0.04	\$ 0.18	\$ 0.11
Net income per share diluted as reported	\$ 0.05	\$ 0.03	\$ 0.16	\$ 0.09
Net income per share basic pro forma	\$ 0.05	\$ 0.00	\$ 0.12	\$ 0.01
Net income per share diluted pro forma	\$ 0.04	\$ 0.00	\$ 0.10	\$ 0.01

We account for stock-based compensation arrangements with non-employees in accordance with Emerging Issues Task Force (EITF) Abstract No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*. Accordingly, unvested options and warrants held by non-employees are subject to revaluation at each balance sheet date based on the then current fair market value. As of September 30, 2005, all options and warrants held by non-employees were fully vested and expensed.

5. Inventories:

Inventories are stated at the lower of standard cost (which approximates cost on a first-in, first-out basis) or market. Inventory details are as follows (unaudited, in thousands):

	September 30, 2005	December 31, 2004
Raw material	\$ 688	\$ 1,202
Work in process	88	118
Finished goods	543	465
Total inventory	\$ 1,319	\$ 1,785

After the announcement by our component suppliers that new components are available to replace certain of their end-of-life components currently used in our FaxPress products, we purchased approximately two years worth of these end-of-life components over the last two years in an effort to guarantee a smooth supply of our FaxPress Products to our customers. As of September 30, 2005, we have approximately \$435,000 worth of end-of-life components as compared to \$675,000 as of December 31, 2004. We believe that most of these end-of-life components will be utilized in the following one to two years, resulting in insignificant amounts of excessive inventory, or none at all.

Inventories are reduced for excess and obsolete inventories. These write-downs are based on management's review of inventories on hand on a quarterly basis, compared to management's assumptions about future demand, market conditions and anticipated timing of the release of product upgrades or next generation products. If actual market conditions for future demand are less favorable than those projected by us or if product upgrades or next generation products are released earlier than anticipated, additional inventory write-downs may be required. Obsolete products removed from gross inventory are physically scrapped.

6. Segment Information:

We have determined that we operate in one segment. Revenues by geographic area are determined by the location of the customer and are summarized as follows (unaudited, in thousands):

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
United States	\$ 2,335	\$ 2,182	\$ 6,390	\$ 6,572
Europe	116	186	588	518
Pacific Rim	140	265	716	600
Rest of Americas, excluding United States	110	52	447	225
Total Revenues	\$ 2,701	\$ 2,685	\$ 8,141	\$ 7,915

Customers that individually accounted for greater than 10% of net sales are as follows (unaudited, in thousands):

Customer	Quarter Ended				Nine Months Ended			
	September 30, 2005		September 30, 2004		September 30, 2005		September 30, 2004	
	Amount	Percentage	Amount	Percentage	Amount	Percentage	Amount	Percentage
A	\$ 540	20%	\$ 357	13%	\$ 1,411	17%	\$ 1,796	23%
B	\$ 767	28%	\$ 592	22%	\$ 2,243	28%	\$ 1,668	21%

7. Comprehensive Income:

Comprehensive income is the change in equity from transactions and other events and circumstances other than those resulting from investments by owners and distributions to owners. There are no significant components of comprehensive income excluded from net income; therefore, no separate statement of comprehensive income has been presented.

8. Commitments and Contingencies:Contingencies

From time to time, we are involved in various legal proceedings in the ordinary course of business. We are not currently involved in any litigation, which, in our opinion, would have a material adverse effect on our business, operating results, cash flows or financial condition; however, there can be no assurance that any such proceeding will not escalate or otherwise become material to our business in the future.

Lease Commitments

The following represents combined aggregate maturities for all of our financing and commitments under operating and capital leases as of September 30, 2005 (unaudited, in thousands):

Edgar Filing: CASTELLE \CA\ - Form 10-Q

	Operating Leases	Capital Lease Obligations	Total Commitments
Three months ending December 31, 2005	\$ 53	\$ 16	\$ 69
Year ending December 31, 2006	207	1	208
Year ending December 31, 2007	207		207
Year ending December 31, 2008	207		207
Year ending December 31, 2009	86		86
Total Commitments	\$ 760	\$ 17	\$ 777

We have extended our building lease for a term of five years commencing on June 1, 2004 and expiring on May 31, 2009, with one conditional three-year renewal option, which if exercised, would extend the lease to May 31, 2012, commencing with rent at ninety-five percent of fair market value.

We lease certain of our equipment under various operating and capital leases that expire at various dates through 2006. The lease agreements frequently include renewal, escalation clauses and purchase provisions, and require us to pay taxes, insurance and maintenance costs. As of September 30, 2005, we had \$17,000 outstanding under a loan and security agreement, which is subject to an interest rate of 12.8%.

We renewed our line of credit from Silicon Valley Bank in August 2005. This line of credit expires in August 2006. In September, 2005 we increased our line of credit to \$6.0 million from \$4.0 million. No other terms or conditions of our line of credit were changed. Borrowings under this line of credit agreement are collateralized by all of our assets and bear interest at the bank's prime rate plus 0.50%. We are required to maintain certain minimum cash and investment balances with the bank and meet certain other financial covenants. As of September 30, 2005, we have not drawn down on the line of credit and were in compliance with the terms of the agreement.

Product Warranties and Guarantor Arrangements

We offer warranties on certain products and record a liability for the estimated future costs associated with warranty claims, which is based upon historical experience and our estimate of the level of future costs. Warranty costs are reflected in the Statement of Operations as a Cost of Sales. A reconciliation of the changes in our warranty liability is as follows (unaudited, in thousands):

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Balance at beginning of period	\$ 18	\$ 22	\$ 13	\$ 22
Accruals for warranties issued during the period	3		8	2
Actual warranty expense		(5)		(7)
Balance at end of period	\$ 21	\$ 17	\$ 21	\$ 17

As permitted under California law, and under the provisions of our articles of incorporation and by-laws, we are obligated to indemnify our officers and directors for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, we have a director and officer insurance policy that limits our exposure and enables us to recover a portion of any future amounts paid. As a result of our insurance policy coverage, we believe the estimated

fair value of these indemnification agreements is insignificant.

We enter into standard indemnification agreements with our customers in the ordinary course of business. Pursuant to these agreements, we indemnify, hold harmless, and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party, generally our business partners or customers, in connection with any U.S. patent, or any copyright or other intellectual property infringement claim by any third party with respect to our products. The term of these indemnification agreements is generally perpetual following execution of the agreement. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have never incurred claims or costs to defend lawsuits or settle claims related to these indemnification agreements.

9. Recent Accounting Pronouncements:

In November 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 151, Inventory Costs, an amendment to ARB No. 43, Chapter 4, Inventory Pricing . SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company believes there will be no material effect on its financial statements upon adoption of this standard.

In December 2004, the FASB issued SFAS No. 123 (revised 2004) Share-Based Payment, (SFAS 123R) which requires the Company to expense grants made under the Company s stock option program at fair value, rather than using the intrinsic method of valuing share-based payment transactions allowed under APB 25. That cost will be recognized over the vesting period of the plans. SFAS No. 123R is effective for fiscal years beginning after June 15, 2005. The Company is evaluating the alternatives allowed under the standard, which the Company is required to adopt effective for its first quarter of fiscal 2006. At this time, the Company cannot predict the impact on 2006 results as it depends on the level of future option grants prior to the effective date and the elections made by the Company in applying the new stock option expensing rules.

In December 2004, the FASB issued Staff Position SFAS No. 109-1, Application of FASB Statement No. 109, Accounting for Income Taxes (FSP No. 109-1) to the Tax Deduction on Qualified Production Activities Provided by the American Jobs Creation Act of 2004 which was signed into law by the President of the United States on October 22, 2004. Companies that qualify for the recent tax law s deduction for domestic production activities must account for it as a special deduction under SFAS No. 109 and reduce their tax expense in the period or periods the amounts are deductible, according to FSP No. 109-1, effective for the Company in its fiscal year 2005. The FASB s guidance is not expected to have a material impact to the Company s financial results.

SPECIAL NOTE ON FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements that involve risks and uncertainties. Our operating results may vary significantly from quarter to quarter due to a variety of factors, including changes in our product and customer mix, constraints in our manufacturing and assembling operations, shortages or increases in the prices of raw materials and components, changes in pricing policy by us or our competitors, a slowdown in the growth of the networking market, seasonality, timing of expenditures, and economic conditions in the United States, Europe and Asia. Words such as believes, anticipates, expects, intends and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. Unless the context otherwise requires, references in this Form 10-Q to we, us, or the

Company refer to Castle. Readers are cautioned that the forward-looking statements reflect management's analysis only as of the date hereof, and we assume no obligation to update these statements. Actual events or results may differ materially from the results discussed in the forward-looking statements. Factors that might cause such a difference include, but are not limited to the risks and uncertainties discussed herein, as well as other risks set forth under the caption Risk Factors below and in our Annual Report on Form 10-K for the year ended December 31, 2004.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that are subject to many risks and uncertainties that could cause actual results to differ significantly from expectations. For more information on forward-looking statements, refer to the Special Note on Forward-Looking Statements prior to this section. The following discussion should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and the Notes thereto included in Item 1 of this Quarterly Report on Form 10-Q and our Form 10-K for the year ended December 31, 2004.

Critical Accounting Policies

Castelle's financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses. These estimates and assumptions are affected by management's application of accounting policies. Critical accounting policies for us include revenue recognition; distributor programs and incentives; warranty; credit, collection and allowances for doubtful accounts; inventories and related allowance for obsolete and excess inventory; and income taxes, which are discussed in more detail under the caption Critical Accounting Policies in our 2004 Annual Report on Form 10-K.

Consolidated Statements of Operations As a Percentage of Net Sales

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004

Results of Operations*Net Sales (unaudited, in thousands)*

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Net sales				
Products	\$ 1,946	\$ 2,079	\$ 5,955	\$ 6,181
Services	755	606	2,186	1,734
Total Net sales	\$ 2,701	\$ 2,685	\$ 8,141	\$ 7,915

Net sales for the third quarter of 2005 remained relatively flat at \$2.7 million from the same period in 2004. Net sales for the first nine months of 2005 increased 3% to \$8.1 million from \$7.9 million for the same period in 2004.

Product sales of \$1.9 million for the third quarter of 2005 decreased slightly as compared to \$2.1 million for the same period in 2004. Product sales of \$6.0 million for the first nine months of 2005 represent a slight decrease of \$226,000 compared to the first nine months of 2004, or a 4% decrease for that period.

Service revenues are comprised primarily of extended warranty and support programs as well as 60-days of maintenance bundled with initial product sales. Revenue related to these arrangements is recognized ratably over the period of the arrangement. Service revenues in the third quarter of 2005 increased 25% to \$755,000 from \$606,000 in the same period in 2004. For the first nine months of 2005, service revenues increased 26% to \$2.2 million from \$1.7 million in the same period in 2004. The increase in service revenues was primarily due to increased sales of extended warranty contracts due to an increase in our installed customer base resulting from the launch of our FaxPress Premier fax server products in the second half of 2003 and higher rates on FaxPress Premier maintenance contracts.

Revenues by geographic area (unaudited, in thousands)

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
United States	\$ 2,335	\$ 2,182	\$ 6,390	\$ 6,572
Europe	116	186	588	518
Pacific Rim	140	265	716	600
Rest of Americas, excluding United States	110	52	447	225
Total Revenues	\$ 2,701	\$ 2,685	\$ 8,141	\$ 7,915

Sales in the United States in the third quarter of 2005 were \$2.3 million, as compared to \$2.1 million for the same period in 2004, representing 86% and 81% of total net sales in the third quarter of 2005 and 2004, respectively. The increase in net sales in the third quarter of 2005 is mostly due to increases in sales to distribution channels. Sales in the

Edgar Filing: CASTELLE \CA\ - Form 10-Q

United States for the first nine months of 2005 and 2004 were \$6.4 and \$6.6 million, respectively, which represents 78% and 83% of total net sales

in 2005 and 2004, respectively. The decrease in sales is mostly due to lower sales for the FaxPress family of products offset partially by higher service revenues.

International sales (excluding sales to the rest of the Americas) for the third quarter of 2005 were \$256,000 as compared to \$451,000 in the third quarter of 2004. This represents 9% and 17% of net sales for 2005 and 2004, respectively. International sales were \$1.3 million for the first nine months of 2005, as compared to \$1.1 million for the same period in 2004, which represents 16% and 14% of total net sales for 2005 and 2004, respectively. International sales in the third quarter of 2005 show a moderate decrease from the same quarter in 2004 mostly due to lower sales of FaxPress Premier products to Europe and lower sales of FaxPress products to Japan during the quarter. International sales tend to be relatively consistent from period to period. In the first nine months of 2005, the slight increase from the same period in 2004 is due to increased sales of FaxPress Premier fax server products to Japan and Europe.

Sales to the rest of the Americas (excluding the United States) in the third quarter of 2005 were \$110,000 as compared to \$52,000 in the year-ago quarter, representing 4% of total net sales for 2005 and 2% for 2004, respectively. The increase in sales was mostly due to sales of FaxPress Premier products to Latin America. For the nine months ended September 30, sales to the Rest of the Americas were \$447,000 and \$225,000 for 2005 and 2004, respectively, mostly due to higher sales of FaxPress Premier products. This represents 5% and 3% of net sales for 2005 and 2004, respectively.

Cost of Sales; Gross Profit (unaudited, in thousands)

	Three months ended		Nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Products:				
Revenue	\$ 1,946	\$ 2,079	\$ 5,955	\$ 6,181
Cost of product sales	772	674	1,988	1,905
Gross profit	1,174	1,405	3,967	4,276
Gross profit %	60%	68%	67%	69%
Services:				
Revenue	755	606	2,186	1,734
Cost of service sales	250	207	778	621
Gross profit	505	399	1,408	1,113
Gross profit %	67%	66%	64%	64%
Total gross profit	\$ 1,679	\$ 1,804	\$ 5,375	\$ 5,389
Gross profit %	62%	67%	66%	68%

Gross profit was \$1.7 million for the third quarter of 2005 and \$1.8 million for the same quarter in 2004, or 62% and 67% of net sales, respectively. Gross profit for the first nine months of 2005 and 2004 was \$5.4 million, or 66% and 68% of net sales, respectively. The decrease in gross profit percentage for the third quarter and the nine months was mainly due to higher production costs for FaxPress Premier products as compared to the FaxPress family of products. Cost of product sales tend to vary slightly from period to period based on production volume and related overhead absorption in periods during which inventory is produced.

Research & Development

Research and development expenses for the third quarter of 2005 were \$395,000, or 15% of net sales, as compared to \$470,000 or 17% of net sales for the same period in 2004. For the first nine months of 2005 and 2004, research and development expenses were \$1.3 million, or 15% and 17% of net sales respectively. The decrease in Research and Development for the quarter and the nine months ended September 30, 2005 as compared to the same period in 2004, is primarily due to reduced use of outside consultants in 2005. Research and development expenses are not expected to change significantly for fiscal year 2005.

Sales & Marketing

Sales and marketing expenses of \$646,000 or 24% of net sales for the third quarter of 2005 remained relatively consistent with the same period in 2004 for which expenses were \$612,000 or 23% of net sales. Sales and marketing expenses were \$1.9 million for the first nine months of 2005 and 2004 which represents 23% and 24%, respectively, of net sales for the period.

General & Administrative

General and administrative expenses were \$416,000 for the third quarter of 2005 as compared to \$486,000 for the same period in 2004. This represents 15% and 18% of net sales of the third quarter of 2005 and 2004, respectively. The decrease in general and administrative expenses for the third quarter is primarily due to lower accounting and legal fees. For the first nine months of 2005, general and administrative expenses were \$1.6 million, or 20% of net sales, as compared to \$1.5 million, or 18% of net sales for the first nine months of 2004. The increase of \$174,000 for the nine month period ended September 30, 2005, is primarily due to increases in accounting and legal fees related to the restatement of the Company's historical financial statements included in the Company's December 31, 2004 Annual Report on Form 10-K and Castelle's response to a series of comment letters issued by the Division of Corporate Finance of the Securities and Exchange Commission during the first quarter of fiscal 2005. These restatements are discussed in detail in the Company's December 31, 2004 Form 10-K.

Provision for Income Tax

We account for income taxes in accordance with the liability method. Under the liability method, deferred assets and liabilities are recognized based upon anticipated future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases. The provision for income taxes is comprised of the current tax liability and the change in deferred tax assets and liabilities. We establish a valuation allowance to the extent that all or some portion of the deferred tax assets will not be recoverable against future taxable income.

Significant management judgment is required in determining the provision for income taxes, and in particular, any valuation allowance recorded against our deferred tax assets. During 2004 and 2003, we recorded tax benefits of \$1,067,000 and \$537,000, respectively related to the reversal of previously recorded valuation allowance. This portion of the Company's previously recorded valuation allowance was reversed because we determined that it was more likely than not that certain future tax benefits will be realized as a result of projected future income. Due to our limited history of generating taxable income, we recorded a tax provision at an effective rate of approximately 40% during the first three quarters of fiscal 2004. Based in large part on our projected future taxable income we did not record income tax provision in the first three quarters of 2005. We will record a tax provision in future periods when all available non-operating losses and tax credit carryforwards

are fully utilized or the remaining deferred tax assets are deemed to be unrealizable.

At December 31, 2004, we had net operating loss carryforwards of approximately \$12,955,000 and \$2,296,000 available to offset future federal and California taxable income, respectively. These loss carryforwards will expire in varying amounts beginning in 2005 through 2021. In addition, at December 31, 2004, we had federal and California Research and Development credit and alternative minimum tax credit carryforwards of approximately \$1,152,000 and \$728,000, respectively. The federal Research and Development credits expire in varying amounts beginning in 2007. The California Research and Development credits carry-forward indefinitely.

Liquidity and Capital Resources

	September 30, 2005	December 31, 2004
	(dollars in thousands)	
Cash and cash equivalents	\$ 6,291	\$ 5,599
Working capital	\$ 6,535	\$ 5,750
Working capital ratio	3.6	3.0

Since our initial public offering of common stock in December 1995, our principal source of funding has been cash from our operations, with some funding from capital equipment lease lines. As of September 30, 2005, we had \$6.3 million of cash and cash equivalents, an increase of \$692,000 from December 31, 2004. The increase in cash and cash equivalents was primarily attributable to cash provided by operating activities of \$1.1 million and \$178,000 in proceeds from the exercise of employee stock options, off-set by the purchase of \$531,000 of licenses and equipment.

Our operating activities generated cash of \$1.1 million in the first nine months of 2005 primarily due to our increased net income and reduction of inventories as we used a portion of the end-of-life parts and other components purchased during fiscal 2004. Net cash provided by financing activities was \$166,000 and \$274,000 in the first three quarters of 2005 and 2004, respectively, primarily from proceeds from issuance of common stock.

We renewed our line of credit with Silicon Valley Bank in August 2005. In September 2004, we increased our line of credit to \$6.0 million from \$4.0 million. This line of credit expires in August of 2006. The increase in our line of credit affected none of the previous terms of our existing line of credit. The revolving line of credit provides for borrowings of up to \$6.0 million. Borrowings under this line of credit agreement are collateralized by all of our assets and bear interest at the bank's prime rate plus 0.50%. As with our previous facility, we are required to maintain certain minimum cash and investment balances with the bank and meet certain other financial covenants. As of September 30, 2005, we have not drawn down on the line of credit and were in compliance with the terms of the agreement.

We lease certain of our equipment under various operating and capital leases that expire at various dates through 2006. The lease agreements frequently include renewal, escalation clauses and purchase provisions, and require us to pay taxes, insurance and maintenance costs. As of September 30, 2005, we had \$17,000 outstanding under a loan and security agreement, which is subject to an interest rate of 12.8%.

We lease our headquarters in Morgan Hill, California. We have extended our building lease for a term of five years commencing on June 1, 2004 and expiring on May 31, 2009, with one conditional three-year renewal option, which if exercised, would extend the lease to May 31, 2012 commencing with rent at ninety-five percent of fair market value. As of September 30, 2005, future minimum payments under the lease were \$760,000.

The following represents combined aggregate maturities for all our financing and commitments as of September 30, 2005 (unaudited, in thousands):

Contractual Obligations	Payments Due by Period				
	Total	1 Year	2 - 3 Years	4 - 5 Years	More than 5 Years
Capital (Finance) Lease Obligations	\$ 17	\$ 17	\$		
Operating Lease Obligations	\$ 760	\$ 53	\$ 414	\$ 207	\$ 86
Total contractual cash obligations	\$ 777	\$ 70	\$ 414	\$ 207	\$ 86

In addition, because we are dependent on a small number of distributors for a significant portion of the sales of our products, the loss of any of our major distributors or their inability to satisfy their payment obligations to us could have a significant adverse effect on our business, operating results and financial condition.

We believe that, for the periods presented, inflation has not had a material effect on our operations.

Recent Accounting Pronouncements:

In November 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 151, Inventory Costs, an amendment to ARB No. 43, Chapter 4, Inventory Pricing . SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company believes there will be no material effect on its financial statements upon adoption of this standard.

In December 2004, the FASB issued SFAS No. 123 (revised 2004) Share-Based Payment, (SFAS 123R) which requires the Company to expense grants made under the Company s stock option program at fair value, rather than using the intrinsic method of valuing share-based payment transactions allowed under APB 25. That cost will be recognized over the vesting period of the plans. SFAS No. 123R is effective for fiscal years beginning after June 15, 2005. The Company is evaluating the alternatives allowed under the standard, which the Company is required to adopt effective for its first quarter of fiscal 2006. At this time, the Company cannot predict the impact on 2006 results as it depends on the level of future option grants prior to the effective date and the elections made by the Company in applying the new stock option expensing rules.

In December 2004, the FASB issued Staff Position SFAS No. 109-1, Application of FASB Statement No. 109, Accounting for Income Taxes (FSP No. 109-1) to the Tax Deduction on Qualified Production Activities Provided by the American Jobs Creation Act of 2004 which was signed into law by the President of the United States on October 22, 2004. Companies that qualify for the recent tax law s deduction for domestic production activities must account for it as a special deduction under SFAS No. 109 and reduce their tax expense in the period or periods the amounts are deductible, according to FSP No. 109-1, effective for the Company in its fiscal year 2005. The FASB s guidance is not expected to have a material impact to the Company s financial results.

RISK FACTORS

Shareholders or investors considering the purchase of shares of our common stock should carefully consider the following risk factors, in addition to other information in this Quarterly Report on

Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2004. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations

Our revenue and operating results have fluctuated in the past and are likely to fluctuate significantly in the future, particularly on a quarterly basis.

Our operating results may vary significantly from quarter to quarter due to many factors, some of which are outside our control. For example, the following conditions could all affect our results:

- changes in our product sales and customer mix;
- constraints in our manufacturing and assembling operations;
- shortages or increases in the prices of raw materials and components;
- changes in pricing policy by us or our competitors;
- a slowdown in the growth of the networking market;
- seasonality;
- timing of expenditures; and

economic conditions in the United States, Europe and Asia.

Our sales often reflect orders shipped in the same quarter in which they are received. In addition, significant portions of our expenses are relatively fixed in nature, and planned expenditures are based primarily on sales forecasts. Therefore, if we inaccurately forecast demand for our products, the impact on net income may be magnified by our inability to adjust spending quickly enough to compensate for the net sales shortfall.

Other factors contributing to fluctuations in our quarterly operating results include:

- changes in the demand for our products;
- customer order deferrals in anticipation of new versions of our products;
- the introduction of new products and product enhancements by us or our competitors;
- the effects of filling the distribution channels following introductions of new products and product enhancements;
- potential delays in the availability of announced or anticipated products;
- the mix of product and revenue derived from the sale of extended warranty contracts;
- the commencement or conclusion of significant development contracts;
- changes in foreign currency exchange rates; and
- the timing of significant marketing and sales promotions.

Based on the foregoing, we believe that quarterly operating results are likely to vary significantly in the future and that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be viewed as indications of future performance.

We have a history of losses and a large accumulated deficit.

We have experienced significant operating losses and, as of September 30, 2005, had an accumulated deficit of \$19.7 million. Our development and marketing of current and new products will continue to require substantial expenditures. We incurred losses in 2001 but since the third quarter of 2001, we have been profitable. There can be no assurance that growth in net sales will be achieved or profitability sustained in future years.

Recent FASB Exposure Draft on Share-Based Payments may have a significant effect on our Results of Operations, if adopted.

In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004) Share-Based Payment, (SFAS 123R) which requires the Company to expense grants made under the Company s stock option program at fair value, rather than using the intrinsic method of valuing share-based payment transactions allowed under APB 25. That cost will be recognized over the vesting period of the plans. SFAS No. 123R is effective for fiscal years beginning after June 15, 2005. The Company is evaluating the alternatives allowed under the standard, which the Company is required to adopt effective for its first quarter of fiscal 2006.

As permitted by SFAS No. 123, we currently account for share-based payments to employees using APB 25 s intrinsic value method and, as such, generally recognize no compensation cost for employee stock options. Accordingly, the adoption of SFAS 123R fair value method will have an impact on our result of operations, although it will not have an impact on our overall financial or cash position. The impact of SFAS 123R on our operation results cannot be predicted at this time, because that will depend on levels of share-based payments granted in the future. Should we adopt the proposed statement, it may have a significant impact on our consolidated statement of operations as we will be required to expense the fair value of our stock options rather than disclosing the impact on our consolidated net income within our footnotes (see Note 4 of the notes to the condensed consolidated financial statements).

The proposed standard would require the modified prospective method be used, which would require that the fair value of new awards granted from the beginning of the year of adoption plus unvested awards at the date of adoption be expensed over the vesting term. In addition, the proposed statement encourages companies to use the binomial approach to value stock options, as opposed to the Black-Scholes option pricing model that is currently being used for the fair value of our options.

Substantially all of our revenue comes from the sale of fax server products, and a decline in demand for those products would harm our business, operating results and financial condition.

We derive all of our product revenue from the sale of fax server products. Fax server products have accounted for 100% of total sales since 2004. We expect that our current fax server products will continue to account for all of our sales in the near future. A decline in demand for our fax server products as a result of competition, technological change, shortages of components or other factors, or a delay in the development and market acceptance of new features and products, would have a material adverse effect on our business, operating results and financial condition.

We sell our products through a limited number of distributors, and any deterioration in our relationship with those distributors would harm our business, operating results and financial condition.

We sell our products primarily through a two-tier domestic and international distribution network. Our distributors sell our products to VARs, e-commerce vendors and other resellers. The distribution of personal computers and networking products has been characterized by rapid change, including consolidations due to the financial difficulties of distributors and the emergence of alternative distribution channels. An increasing number of companies are competing for access to these channels. Our distributors typically represent other products that are complementary to, or compete with, our products. Our distributors are not contractually committed to future purchases of our products and could discontinue carrying our products at any time for any reason. In addition, because we are dependent on a small number of distributors for a significant portion of the sales of our products, the loss of any of our major distributors or their inability to satisfy their payment obligations to us could have a significant adverse effect on our business, operating results and financial condition. We have a stock rotation policy with certain of our distributors that allows them to return marketable inventory against offsetting orders. If we reduce our prices, we credit certain distributors for the difference between the purchase price of

products remaining in their inventory and our reduced price for these products. In addition, inventory levels of our products held by distributors could become excessive due to industry conditions or the actions of competitors, resulting in product returns and inventory write-downs.

The market for our products is affected by rapidly changing technology and if we fail to predict and respond to customers' changing needs, our business, operating results and financial condition may suffer.

The market for our products is affected by rapidly changing networking technology, evolving industry standards and the Internet and other new communication technologies. We believe that our future success will depend upon our ability to enhance our existing products and to identify, develop, manufacture and introduce new products that:

- conform to or support emerging network telecommunications standards;
- are compatible with a growing array of computer and peripheral devices;
- support popular computer and network operating systems and applications;
- meet a wide range of evolving user needs; and
- achieve market acceptance.

There can be no assurance that we will be successful in these efforts.

We have incurred, and expect to continue to incur, substantial expenses associated with the introduction and promotion of new products. There can be no assurance that the expenses incurred will not exceed research and development cost estimates or that new products will achieve market acceptance and generate sales sufficient to offset development costs. In order to develop new products successfully, we are dependent upon timely access to information about new technological developments and standards. There can be no assurance that we will have such access or will be able to develop new products successfully and respond effectively to technological change or new product announcements by others.

Complex products such as those offered by us may contain undetected or unresolved hardware defects or software errors when they are first introduced or as new versions are released. Changes in our or our suppliers' manufacturing processes or the inadvertent use of defective components could adversely affect our ability to achieve acceptable manufacturing yields and product reliability. We have in the past discovered hardware defects and software errors in certain of our new products and enhancements after their introduction. Replacement of discontinued components used in our products could lead to further defects and errors. There can be no assurance that despite testing by us and by third-party test sites, errors and defects will not be found in future releases of our products, which would result in adverse product reviews and negatively affect market acceptance of these products.

The introduction of new or enhanced products requires us to manage the transition from the older products to the new or enhanced products or versions, both internally and for customers. We must manage new product introductions so as to minimize disruption in customer ordering patterns, avoid excessive levels of older product inventories and ensure that adequate supplies of new products can be delivered to meet customer demands. We have from time to time experienced delays in the shipment of new products. There can be no assurance that we will successfully manage future product transitions.

Our success depends upon the continued contributions of our key management, marketing, product development and operational personnel.

Our success will depend, to a large extent, upon our ability to retain and continue to attract highly skilled personnel in management, marketing, product development and operations. Competition for employees in the computer and electronics industries is intense, and there can be no assurance that we

will be able to attract and retain enough qualified employees. Volatility or lack of positive performance in our stock price may also adversely affect our ability to retain and continue to attract key employees, many of whom have been granted stock options. Our inability to retain and attract key employees could have a material adverse effect on our product development, business, operating results and financial condition. We do not carry key person life insurance with respect to any of our personnel.

The markets for our products are highly competitive and may become more competitive in the future.

The network enhancement products and computer software markets are highly competitive, and we believe that competition will intensify in the future. The competition is characterized by rapid change and improvements in technology along with constant pressure to reduce the prices of products. We currently compete principally in the market for network fax servers, network print servers and fax-on-demand software. Both direct and indirect competition could adversely affect our business and operating results through pricing pressure, loss of market share and other factors. In particular, we expect that, over time, average selling prices for our print server products will continue to decline, as the market for these products becomes increasingly competitive. Any material reduction in the average selling prices of our products would adversely affect gross margins. There can be no assurance we will be able to maintain the current average selling prices of our products or the related gross margins.

The principal competitive factors affecting the market for our products include:

product functionality;

performance;

quality;

reliability;

ease of use;

quality of customer training and support;

name recognition;

price; and

compatibility and conformance with industry standards and changing operating system environments.

Several of our existing and potential competitors have substantially greater financial, engineering, manufacturing and marketing resources than we do. We also experience competition from a number of other software, hardware and service companies. In addition to our current competitors, we may face substantial competition from new entrants into the network enhancement market, including established and emerging computer, computer peripheral, communications and software companies. In the fax server market we compete with companies such as Captaris Inc., Omtool, Ltd. and Esker Software. There can be no assurance that competitors will not introduce products incorporating technology more advanced than the technology used by us in our products. In addition, certain competing methods of communications such as the Internet or electronic mail could adversely affect the market for fax products. Certain of our existing and potential competitors in the print server market are manufacturers of printers and other peripherals, and these competitors may develop closed systems accessible only through their own proprietary servers. There can be no assurance that we will be able to compete successfully or that competition will not have a material adverse effect on our business, operating results and financial condition.

We depend on sales in foreign markets, and political or economic changes in these markets could affect our business, operating results and financial condition.

Sales to customers located outside the United States accounted for approximately 18%, 19% and 21% of our net sales for the years ended December 31, 2004, 2003 and 2002, respectively. We sell our

products in approximately 44 foreign countries through approximately 89 distributors. Our principal Japanese distributor accounted for approximately 39%, 38% and 27% of our international sales in 2004, 2003 and 2002, respectively, and 7%, 7% and 6% of our total net sales in 2004, 2003 and 2002, respectively. We expect that international sales will continue to represent a significant portion of our product revenues and that we will be subject to the normal risks of international sales, such as export laws, currency fluctuations, longer payment cycles, greater difficulties in accounts receivable collections and the requirement of complying with a wide variety of foreign laws. There can be no assurance that we will not experience difficulties resulting from changes in foreign laws relating to the export of our products in the future. In addition, because we primarily invoice foreign sales in U.S. dollars, fluctuations in exchange rates could affect demand for our products by causing prices to be out of line with products priced in the local currency. Additionally, any such difficulties would have a material adverse effect on our international sales and a resulting material adverse effect on our business, operating results and financial condition. We may experience fluctuations in European sales on a quarterly basis because European sales may be weaker during the third quarter than the second quarter due to extended holiday shutdowns in July and August. There can be no assurance that we will be able to maintain the level of international sales in the future. Any fluctuations in international sales will significantly affect our operating results and financial condition.

The introduction of new products may reduce the demand for our existing products and increase returns of existing products.

From time to time, we may announce new products, product versions, capabilities or technologies that have the potential to replace or shorten the life cycles of existing products. The release of a new product or product version may result in the write-down of products in inventory if this inventory becomes obsolete. We have in the past experienced increased returns of a particular product version following the announcement of a planned release of a new version of that product. There can be no assurance that product returns will not exceed our allowance for these returns in the future and will not have a material adverse effect on our business, operating results and financial condition.

If we fail to obtain components of our products from third-party suppliers and subcontractors, our business could suffer.

Our products require components procured from third-party suppliers. Some of these components are available only from a single source or from limited sources. In addition, we subcontract a substantial portion of our manufacturing to third parties, and there can be no assurance that these subcontractors will be able to support our manufacturing requirements. We purchase components on a purchase order basis, and generally have no long-term contracts for these components. If we are unable to obtain a sufficient supply of high-quality components from our current sources, we could experience delays or reductions in product shipments. From time to time, component manufacturers announce the end of life of certain of their products and may or may not have replacement products. If we are unable to secure enough inventories of the end-of-life components or their replacements, we might not be able to deliver our products to our customers and could adversely affect our revenue and net income. Furthermore, a significant increase in the price of one or more of these components or our inability to lower component or sub-assembly prices in response to competitive price reductions could adversely affect our gross margin.

We depend on proprietary technology, and inability to develop and protect this technology or license it from third parties could adversely affect our business, operating results and financial condition.

Our success depends to a certain extent upon our technological expertise and proprietary software technology. We rely upon a combination of contractual rights and copyright, trademark and trade secret

laws to establish and protect our technologies. Despite the precautions taken by us, it may be possible for unauthorized third parties to copy our products or to reverse engineer or obtain and use information that we regard as proprietary. In addition, the laws of some foreign countries either do not protect our proprietary rights or offer only limited protection. Given the rapid evolution of technology and uncertainties in intellectual property law in the United States and internationally, there can be no assurance that our current or future products will not be subject to third-party claims of infringement. Any litigation to determine the validity of any third-party claims could result in significant expense and divert the efforts of our technical and management personnel, whether or not any litigation is determined in favor of us. In the event of an adverse result in litigation, we could be required to expend significant resources to develop non-infringing technology or to obtain licenses to the technology that is the subject of the litigation. There can be no assurance that we would be successful in this development or that any such licenses would be available on commercially reasonable terms. We also rely on technology licensed from third parties. There can be no assurance that these licenses will continue to be available upon reasonable terms, if at all. Any impairment or termination of our relationship with third-party licensors could have a material adverse effect on our business, operating results and financial condition. There can be no assurance that our precautions will be adequate to deter misappropriation or infringement of our proprietary technologies.

We have received, and may receive in the future, communications asserting that our products infringe the proprietary rights of third parties or seeking indemnification against the alleged infringement. There can be no assurance that third parties will not assert infringement claims against us with respect to current or future products or that any assertion may not require us to enter into royalty arrangements or result in costly litigation. Any claims, with or without merit, can be time consuming and expensive to defend. There can be no assurance that any intellectual property litigation will not have a material adverse effect on our business, operating results and financial condition.

Our common stock is listed on the Nasdaq Capital Market, and we have had difficulty satisfying the listing criteria to avoid the delisting of our common stock.

Our common stock has been listed on the Nasdaq SmallCap Market since April 1999. In order to maintain our listing on the Nasdaq SmallCap Market, we must maintain total assets, capital and public float at specified levels, and our common stock generally must maintain a minimum bid price of \$1.00 per share. If we fail to maintain the standards necessary to be quoted on the Nasdaq SmallCap Market, our common stock could become subject to delisting. There can be no assurance that we will be able to maintain the \$1.00 minimum bid price per share of our common stock and thus maintain our listing on the Nasdaq SmallCap Market. We have traded below \$1.00 as recently as December 2002.

If our common stock is delisted, trading in our common stock could be conducted on the OTC Bulletin Board or in the over-the-counter market in what is commonly referred to as the "pink sheets." If this occurs, a shareholder will find it more difficult to dispose of our common stock or to obtain accurate quotations as to the price of our common stock. Lack of any active trading market would have an adverse effect on a shareholder's ability to liquidate an investment in our common stock easily and quickly at a reasonable price. It might also contribute to volatility in the market price of our common stock and could adversely affect our ability to raise additional equity or debt financing on acceptable terms or at all. Failure to obtain desired financing on acceptable terms could adversely affect our business, financial condition and results of operations.

Our stock price has been volatile, and is likely to continue to be volatile in the future.

The price of our common stock has fluctuated widely in the past. Sales of substantial amounts of our common stock, or the perception that sales could occur, could adversely affect prevailing market prices for our common stock. Our management believes past fluctuations may have been caused by the

factors identified above, and that these factors may continue to affect the market price of our common stock. Additionally, stock markets have experienced extreme price volatility in recent years. This volatility has had a substantial effect on the market price of the common stock of us and other high technology companies, often for reasons unrelated to operating performance. We anticipate that prices for our common stock may continue to be volatile. Future stock price volatility may result in the initiation of securities litigation against us, which may divert substantial management and financial resources and have an adverse effect on our business, operating results and financial condition.

We may require additional capital in the future, and may be unable to obtain this capital at all or on commercially reasonable terms.

The development and marketing of products requires significant amounts of capital. If we need additional capital resources, we may be required to sell additional equity or debt securities, secure additional lines of credit or obtain other third party financing. The timing and amount of such capital requirements cannot be determined at this time and will depend on a number of factors, including demand for our existing and new products and changes in technology in the networking industry. There can be no assurance that additional financing will be available on satisfactory terms when needed, if at all. Failure to raise such additional financing, if needed, may result in our inability to achieve our long-term business objectives. The issuance of equity or convertible debt securities to raise additional capital would result in additional dilution to our shareholders.

Government regulation could increase our costs of doing business and adversely affect our gross margin.

Certain aspects of the networking industry in which we compete are regulated both in the United States and in foreign countries. Imposition of public carrier tariffs, taxation of telecommunications services and the necessity of incurring substantial costs and expenditure of managerial resources to obtain regulatory approvals, or the inability to obtain regulatory approvals within a reasonable period of time, could have a material, adverse effect on our business, operating results and financial condition. This is particularly true in foreign countries where telecommunications standards differ from those in the United States. Our products must comply with a variety of equipment, interface and installation standards promulgated by communications regulatory authorities in different countries. Changes in government policies, regulations and interface standards could require the redesign of products and result in product shipment delays which could have a material, adverse impact on our business, operating results and financial condition.

The costs of compliance with recent developments in corporate governance regulation may affect our business, operating results and financial condition in ways that presently cannot be predicted.

Beginning with the enactment of the Sarbanes-Oxley Act of 2002, a significant number of new corporate governance requirements have been adopted or proposed through legislation and regulation by the Securities and Exchange Commission and Nasdaq National Stock Market. We may not be successful in complying with these requirements at all times in the future. Additionally, we expect these developments to increase our legal compliance and accounting costs, and to make some activities more difficult, such as stockholder approval of new stock option plans. We expect these developments to make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These developments could make it more difficult for us to attract and retain qualified members of our Board of Directors, or qualified executive officers. We are presently evaluating and monitoring regulatory developments and cannot estimate the timing or magnitude of additional costs we may incur as a result, or the effect that these increased costs may have on our operating results.

Provisions in our charter documents might deter a company from acquiring us, which could inhibit your ability to receive an acquisition premium for your shares.

Our Board of Directors has authority to issue shares of preferred stock and to fix the rights, including voting rights, of these shares without any further vote or action by the shareholders. The rights of the holders of our common stock will be subject to, and may be adversely affected by, the rights of the holders of any preferred stock that may be issued in the future. The issuance of preferred stock, while providing desirable flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire a majority of our outstanding voting stock, thereby delaying, deferring or preventing a change in control. Furthermore, such preferred stock may have other rights, including economic rights, senior to the common stock, and as a result, the issuance thereof could have a material adverse effect on the market.

Voting control by officers, directors and affiliates may delay, defer or prevent a change of control.

At October 27, 2005, our officers and directors and their affiliates beneficially owned approximately 23% of the outstanding shares of common stock. Accordingly, together they had the ability to significantly influence the election of our directors and other corporate actions requiring shareholder approval. Such concentration of ownership may have the effect of delaying, deferring or preventing a change in control.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We had no holdings of derivative financial or commodity instruments at September 30, 2005. However, we are exposed to financial market risks, including changes in interest rates and foreign currency exchange rates. While much of our revenue is transacted in U.S. dollars, some revenues and capital spending are transacted in Pounds Sterling. These amounts are not currently material to our financial statements. Therefore, we believe that foreign currency exchange rates should not materially affect our overall financial position, results of operations or cash flows. The fair value of our money market accounts or related income would not be significantly impacted by increases or decreases in interest rates due mainly to the highly liquid nature of this investment. However, sharp declines in interest rates could seriously harm interest earnings.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Regulations under the Securities Exchange Act of 1934 require public companies, including our company, to maintain disclosure controls and procedures, which are defined to mean a company's controls and other procedures that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Our Chief Executive Officer and our Chief Financial Officer, based on their evaluation of our disclosure controls and procedures as of the end of the period covered by this report, concluded that our disclosure controls and procedures were effective for this purpose.

Regulations under the Securities Exchange Act of 1934 require public companies, including our company, to evaluate any change in our internal control over financial reporting, which is defined as a process to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. In connection with their evaluation of our disclosure controls and procedures as of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer did not identify any change in our internal control over financial reporting during the three-month period ended September 30, 2005 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

In designing and evaluating our disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and our management necessarily applied its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

In accordance with SEC Release No. 33-8212, Exhibits 32.1 and 32.2 are to be treated as accompanying this report rather than filed as part of the report.

- 10.1 Amendment to Silicon Valley Bank Loan Agreement
- 31.1 Rule 13a-14(a)/15d-14(a) Certification of Principal Executive Officer
- 31.2 Rule 13a-14(a)/15d-14(a) Certification of Principal Financial Officer
- 32.1 Section 1350 Certification of Principal Executive Officer
- 32.2 Section 1350 Certification of Principal Financial Officer

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
