Washington, D.C. 20549

FORM 10-Q

[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended October 31, 2017

Or

[] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number: 0-14939

## AMERICA'S CAR-MART, INC.

(Exact name of registrant as specified in its charter)

Texas63-0851141(State or other jurisdiction of incorporation or organization)(I.R.S. Employer Identification No.)

## 802 Southeast Plaza Ave., Suite 200, Bentonville, Arkansas 72712

(Address of principal executive offices) (zip code)

#### (479) 464-9944

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Title of Each ClassOutstanding at<br/>December 5, 2017Common stock, par value \$.01 per share7,150,061

## Notes to Consolidated Financial Statements (Unaudited) America's Car-Mart, Inc.

## A - Organization and Business

America's Car-Mart, Inc., a Texas corporation (the "Company"), is one of the largest publicly held automotive retailers in the United States focused exclusively on the "Integrated Auto Sales and Finance" segment of the used car market. References to the Company typically include the Company's consolidated subsidiaries. The Company's operations are principally conducted through its two operating subsidiaries, America's Car Mart, Inc., an Arkansas corporation ("Car-Mart of Arkansas"), and Colonial Auto Finance, Inc., an Arkansas corporation ("Colonial"). The Company primarily sells older model used vehicles and provides financing for substantially all of its customers. Many of the Company's customers have limited financial resources and would not qualify for conventional financing as a result of limited credit histories or past credit problems. As of October 31, 2017, the Company operated 140 dealerships located primarily in small cities throughout the South-Central United States.

## **B – Summary of Significant Accounting Policies**

General

The accompanying condensed consolidated balance sheet as of April 30, 2017, which has been derived from audited financial statements, and the unaudited interim condensed financial statements as of October 31, 2017 and 2016, have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six months ended October 31, 2017 are not necessarily indicative of the results that may be expected for the year ending April 30, 2018. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended April 30, 2017.

Principles of Consolidation

The condensed consolidated financial statements include the accounts of America's Car-Mart, Inc. and its subsidiaries. All intercompany accounts and transactions have been eliminated.

## Segment Information

Each dealership is an operating segment with its results regularly reviewed by the Company's chief operating decision maker in an effort to make decisions about resources to be allocated to the segment and to assess its performance. Individual dealerships meet the aggregation criteria for reporting purposes under the current accounting guidance. The Company operates in the Integrated Auto Sales and Finance segment of the used car market, also referred to as the Integrated Auto Sales and Finance industry. In this industry, the nature of the sale and the financing of the transaction, financing processes, the type of customer and the methods used to distribute the Company's products and services, including the actual servicing of the contracts as well as the regulatory environment in which the Company operates, all have similar characteristics. Each of our individual dealerships are similar in nature and only engages in the selling and financing of used vehicles. All individual dealerships have similar operating characteristics. As such, individual dealerships have been aggregated into one reportable segment.

## Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. Significant estimates include, but are not limited to, the Company's allowance for credit losses.

## Concentration of Risk

The Company provides financing in connection with the sale of substantially all of its vehicles. These sales are made primarily to customers residing in Alabama, Arkansas, Georgia, Kentucky, Mississippi, Missouri, Oklahoma, Tennessee, and Texas, with approximately 30% of current period revenues resulting from sales to Arkansas customers.

Periodically, the Company maintains cash in financial institutions in excess of the amounts insured by the federal government. The Company's revolving credit facilities mature in December 2019.

## Restrictions on Distributions/Dividends

The Company's revolving credit facilities generally restrict distributions by the Company to its shareholders. The distribution limitations under the credit facilities allow the Company to repurchase shares of its common stock up to certain limits. Under the current limits, the aggregate amount of repurchases after October 25, 2017 cannot exceed the greater of: (a) \$50 million, net of proceeds received from the exercise of stock options (plus any repurchases made during the first six months after October 25, 2017, in an aggregate amount up to the remaining availability under the \$40 million repurchase limit in effect immediately prior to October 25, 2017, net of proceeds received from the exercise of stock options), provided that the sum of the borrowing bases combined minus the principal balances of all revolver loans after giving effect to such repurchases is equal to or greater than 20% of the sum of the borrowing bases; or (b) 75% of the consolidated net income of the Company measured on a trailing twelve month basis. In addition, immediately before and after giving effect to the Company's stock repurchases, at least 12.5% of the aggregate funds committed under the credit facilities must remain available. Thus, the Company is limited in its ability to pay dividends or make other distributions to its shareholders without the consent of the Company's lenders.

## **Cash Equivalents**

The Company considers all highly liquid debt instruments purchased with original maturities of three months or less to be cash equivalents.

Finance Receivables, Repossessions and Charge-offs and Allowance for Credit Losses

The Company originates installment sale contracts from the sale of used vehicles at its dealerships. These installment sale contracts carry an average interest rate of approximately 16.1% using the simple effective interest method including any deferred fees. In May 2016, the Company increased its retail installment sales contract interest rate from 15.0% to 16.5% in response to continued high levels of credit losses. Contract origination costs are not significant. The installment sale contracts are not pre-computed contracts whereby borrowers are obligated to pay back principal plus the full amount of interest that will accrue over the entire term of the contract. Finance receivables are collateralized by vehicles sold and consist of contractually scheduled payments from installment contracts net of unearned finance charges and an allowance for credit losses. Unearned finance charges represent the balance of interest receivable to be earned over the entire term of the related installment contract, less the earned amount (\$2.3 million at October 31, 2017 and \$2.1 million April 30, 2017 on the Condensed Consolidated Balance Sheets), and as such, have been reflected as a reduction to the gross contract amount in arriving at the principal balance in finance receivables.

An account is considered delinquent when the customer is one day or more behind on their contractual payments. While the Company does not formally place contracts on nonaccrual status, the immaterial amount of interest that may accrue after an account becomes delinquent up until the point of resolution via repossession or write-off, is reserved for against the accrued interest on the Condensed Consolidated Balance Sheets. Delinquent contracts are addressed and either made current by the customer, which is the case in most situations, or the vehicle is repossessed or written off if the collateral cannot be recovered quickly. Customer payments are set to match their payday with approximately 74% of payments due on either a weekly or bi-weekly basis. The frequency of the payment due dates combined with the declining value of collateral lead to prompt resolutions on problem accounts. At October 31, 2017, 4.1% of the Company's finance receivable balances were 30 days or more past due compared to 4.8% at October 31, 2016.

Substantially all of the Company's automobile contracts involve contracts made to individuals with impaired or limited credit histories or higher debt-to-income ratios than permitted by traditional lenders. Contracts made with buyers who are restricted in their ability to obtain financing from traditional lenders generally entail a higher risk of delinquency, default and repossession, and higher losses than contracts made with buyers with better credit.

The Company strives to keep its delinquency percentages low, and not to repossess vehicles. Accounts three days late are contacted by telephone. Notes from each telephone contact are electronically maintained in the Company's computer system. In May 2017, the Company began implementing text messaging notifications at select locations which allows customers to elect to receive late notices via text message. The Company attempts to resolve payment delinquencies amicably prior to repossessing a vehicle. If a customer becomes severely delinquent in his or her payments, and management determines that timely collection of future payments is not probable, the Company will take steps to repossess the vehicle.

Periodically, the Company enters into contract modifications with its customers to extend or modify the payment terms. The Company only enters into a contract modification or extension if it believes such action will increase the amount of monies the Company will ultimately realize on the customer's account and will increase the likelihood of the customer being able to pay off the vehicle contract. At the time of modification, the Company expects to collect amounts due including accrued interest at the contractual interest rate for the period of delay. No other concessions are granted to customers, beyond the extension of additional time, at the time of modifications. Modifications are minor and are made for payday changes, minor vehicle repairs and other reasons. For those vehicles that are repossessed, the majority are returned or surrendered by the customer on a voluntary basis. Other repossessions are performed by Company personnel or third-party repossession agents. Depending on the condition of a repossessed vehicle, it is either resold on a retail basis through a Company dealership, or sold for cash on a wholesale basis primarily through physical or online auctions.

Accounts are charged-off after the expiration of a statutory notice period for repossessed accounts, or when management determines that the timely collection of future payments is not probable for accounts where the Company has been unable to repossess the vehicle. For accounts with respect to which the vehicle was repossessed, the fair value of the repossessed vehicle is charged as a reduction of the gross finance receivables balance charged-off. For the quarter ended October 31, 2017, on average, accounts were approximately 63 days past due at the time of charge-off. For previously charged-off accounts that are subsequently recovered, the amount of such recovery is credited to the allowance for credit losses.

The Company maintains an allowance for credit losses on an aggregate basis at a level it considers sufficient to cover estimated losses inherent in the portfolio at the balance sheet date in the collection of its finance receivables currently outstanding. At October 31, 2017, the weighted average total contract term was 32.5 months with 23.3 months remaining. The reserve amount in the allowance for credit losses at October 31, 2017, \$115.9 million, was 25% of the principal balance in finance receivables of \$492.5 million, less unearned payment protection plan revenue of \$19.0 million and unearned service contract revenue of \$9.9 million.

The estimated reserve amount is the Company's anticipated future net charge-offs for losses incurred through the balance sheet date. The allowance takes into account historical credit loss experience (both timing and severity of losses), with consideration given to recent credit loss trends and changes in contract characteristics (i.e., average amount financed, months outstanding at loss date, term and age of portfolio), delinquency levels, collateral values, economic conditions and underwriting and collection practices. The allowance for credit losses is reviewed at least quarterly by management with any changes reflected in current operations. The calculation of the allowance for credit losses uses the following primary factors:

The number of units repossessed or charged-off as a percentage of total units financed over specific historical periods of time from one year to five years.

•The average net repossession and charge-off loss per unit during the last eighteen months segregat
