QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2008

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-3576

COUSINS PROPERTIES INCORPORATED

(Exact name of registrant as specified in its charter)

GEORGIA

(State or other jurisdiction of incorporation or organization)

58-0869052

(I.R.S. Employer Identification No.)

191 Peachtree Street, Suite 3600, Atlanta, Georgia

(Address of principal executive offices)

30303-1740

(Zip Code)

(404) 407-1000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding as of November 4, 2008
Common Stock, \$1 par value per share	51,382,967 shares

FORWARD-LOOKING STATEMENTS

Certain matters contained in this report are forward-looking statements within the meaning of the federal securities laws and are subject to uncertainties and risks. These include, but are not limited to, general and local economic conditions (including the current general recession and state of the credit markets), local real estate conditions (including the overall condition of the residential markets), the activity of others developing competitive projects, the risks associated with development projects (such as delay, cost overruns and leasing/sales risk of new properties), the cyclical nature of the real estate industry, the financial condition of existing tenants, interest rates, the Company's ability to obtain favorable financing or zoning, environmental matters, the effects of terrorism, the ability of the Company to close properties under contract and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission, including the risks identified in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2007. The words believes, expects, anticipates, estimates and similar expressions are intended to identify forward-looking statements. Although the Company believes that its plans, intentions and expectations reflected in any forward-looking statements are reasonable, the Company can give no assurance that such plans, intentions or expectations will be achieved. Such forward-looking statements are based on current expectations and speak as of the date of such statements. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of future events, new information or otherwise.

**COUSINS PROPERTIES INCORPORATED AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2008
(UNAUDITED)**

1. BASIS OF PRESENTATION AND NEW ACCOUNTING PRONOUNCEMENTS

Basis of Presentation

The condensed consolidated financial statements included herein include the accounts of Cousins Properties Incorporated (Cousins) and its consolidated subsidiaries, including Cousins Real Estate Corporation and its subsidiaries (CREC). All of the entities included in the condensed consolidated financial statements are hereinafter referred to collectively as the Company.

Cousins has elected to be taxed as a real estate investment trust (REIT) and intends to, among other things, distribute 100% of its federal taxable income to stockholders, thereby eliminating any liability for federal income taxes under current law. Therefore, the results included herein do not include a federal income tax provision for Cousins. CREC operates as a taxable REIT subsidiary and is taxed separately from Cousins as a C-Corporation. Accordingly, the condensed consolidated statements of income include a provision for, or benefit from, CREC s income taxes.

The condensed consolidated financial statements are unaudited and were prepared by the Company in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and in accordance with the rules and regulations of the Securities and Exchange Commission (the SEC). In the opinion of management, these financial statements reflect all adjustments necessary (which adjustments are of a normal and recurring nature) for the fair presentation of the Company s financial position as of September 30, 2008 and results of operations for the three and nine month periods ended September 30, 2008 and 2007. Results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of results expected for the full year. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC. These condensed financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2007. The accounting policies employed are materially the same as those shown in Note 2 to the consolidated financial statements included in such Form 10-K, with the addition of the following new accounting pronouncements.

New Accounting Pronouncements

Condominium Accounting

On January 1, 2008, the Company adopted Emerging Issues Task Force (EITF) No. 06-8, *Applicability of the Assessment of a Buyer s Continuing Investment under FASB Statement No. 66, Accounting for Sales of Real Estate, for Sales of Condominiums*, which is discussed in Note 2 of the Company s Annual Report on Form 10-K for the year ended December 31, 2007. The adoption of this standard had no effect on financial position or results of operations in the nine months ended September 30, 2008, but the Company anticipates that the accounting under EITF 06-8 could have a material effect on the timing of revenue recognition for future multi-family residential projects.

Fair Value Accounting

On January 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* for non-financial assets and liabilities. Fair value is defined as the price that would be received from the sale of an asset or paid to transfer a liability in an

Table of Contents

orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Company uses various valuation techniques and assumptions when estimating fair value. In accordance with SFAS No. 157, the Company applied the following fair value hierarchy:

Level 1 Assets or liabilities for which the identical item is traded on an active exchange, such as publicly-traded instruments or futures contracts.

Level 2 Assets and liabilities valued based on observable market data for similar instruments.

Level 3 Assets or liabilities for which significant valuation assumptions are not readily observable in the market; instruments valued based on the best available data, some of which is internally-developed, and considers risk premiums that a market participant would require.

When determining the fair value measurements for assets and liabilities required or permitted to be recorded at and/or marked to fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability. When possible, the Company looks to active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, the Company looks to market observable data for similar assets and liabilities. Nevertheless, certain assets and liabilities are not actively traded in observable markets and the Company must use alternative valuation techniques to derive a fair value measurement. The Company applied the provisions of SFAS No. 157 in recording its interest rate swap at fair value (Level 2; swap is discussed further in Note 2 herein). The adoption of SFAS No. 157 did not have a material impact on the Company's results of operations or financial condition.

Accounting for Noncontrolling Interests

The Company consolidates various ventures that are involved in the ownership and/or development of real estate and records the other partner's interest as a minority interest. In December 2007, the Financial Accounting Standards board issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, which will result in amounts formerly reflected as minority interests be classified as noncontrolling interests, in addition to different accounting requirements for these interests. The Company will adopt SFAS 160 on January 1, 2009. During 2008, certain revisions were also made to EITF D-98, *Classification and Measurement of Redeemable Securities*, which clarified that certain minority interests with redemption provisions which are outside the Company's control, commonly referred to as redeemable minority interests, were within the scope of EITF D-98. Certain venture agreements contain provisions which require the Company to purchase the minority partner's interest at fair value, upon demand on or after a future date. The Company estimated the maximum redemption value of these interests at September 30, 2008 and disclosed such on its condensed consolidated balance sheet. The Company is still evaluating the effect the adoption of SFAS 160 will have on its consolidated financial statements. However, the Company has determined that upon adoption, and in conjunction with the requirements of EITF D-98, an adjustment for the then fair value of redeemable minority interests will be required. This adjustment will ultimately increase the carrying value of redeemable minority interests to the redemption value with a corresponding charge to equity. Under EITF D-98, the Company will have a choice of either accreting redeemable minority interest to its redemption value over the redemption period or recognizing changes in the redemption value immediately as they occur. The Company is currently evaluating these options and has not yet concluded as to which approach it will take.

Table of Contents**Reclassifications**

In periods prior to third quarter 2008, the Company included within the general and administrative expense line item amounts which are reimbursed to the Company by third parties or unconsolidated joint ventures under management contracts. Beginning in the third quarter of 2008, these reimbursed costs were segregated on the Condensed Consolidated Statements of Income, and prior period amounts have been revised to conform to the new presentation. The offset for the amounts received as reimbursement of these expenses is included in Fee Income within revenues in the accompanying Condensed Consolidated Statements of Income.

2. NOTES PAYABLE, INTEREST EXPENSE AND COMMITMENTS AND CONTINGENCIES

The following table summarizes the terms and amounts of the notes payable outstanding at September 30, 2008 and December 31, 2007 (\$ in thousands):

Description	Interest Rate	Term/	Maturity	Outstanding at	
		Amortization Period (Years)		September 30, 2008	December 31, 2007
Credit facility (a maximum of \$500,000), unsecured	LIBOR + 0.75% to 1.25%	4/N/A	8/29/11	\$ 221,000	\$ 52,600

Other miscellaneous notes	Various	Various	Various	264	305

\$ 852,771 \$ 676,189

The Company maintains an interest rate swap agreement with a notional amount of \$100 million in order to manage its interest rate risk under the Term Facility. This swap was designated as a cash flow hedge and effectively fixes the underlying LIBOR rate of the Term Facility at 5.01%. The interest rate on the Term Facility is equal to LIBOR plus a spread, as defined by the term loan agreement. At September 30, 2008, the spread over LIBOR was 0.90%. The fair value of the interest rate swap agreement at September 30, 2008 was a liability of approximately \$4.5 million, which is recorded in accounts payable and accrued liabilities on the Condensed Consolidated Balance Sheet. The liability related to the interest rate swap decreased approximately \$201,000 since December 31, 2007. The value of the interest rate swap is also recorded in Accumulated Other Comprehensive Income (OCI) which is included in the equity section of the Condensed Consolidated Balance Sheets. Ineffectiveness is analyzed on a quarterly basis and is recorded in the Condensed

Table of Contents

Consolidated Statements of Income. There was no ineffectiveness during the three or nine months ended September 30, 2008.

Subsequent to quarter-end, the Company entered into two interest rate swap agreements with notional amounts of \$75 million each in order to manage interest rate risk associated with floating-rate, LIBOR-based borrowings. These swaps were designated as cash flow hedges and effectively fix a portion of the underlying LIBOR rate on Company borrowings one at 2.995% and the other at 2.69%. Payments made or received under the interest rate swap agreements will be recorded in interest expense on the Condensed Consolidated Statements of Income. The Company will not be utilizing the shortcut method of accounting for these instruments and will follow the hypothetical derivative method as outlined in the Derivative Implementation Group's No. G7, *Cash Flow Hedges: Measuring the Ineffectiveness of a Cash Flow Hedge under Paragraph 30(b) when the Shortcut Method is not Applied*. Except for any portion of the swap considered to be ineffective, the Company expects the change in value of the interest rate swaps to be recorded in OCI, which is included in the equity section of the Condensed Consolidated Balance Sheet. Ineffectiveness will be analyzed on a quarterly basis and any ineffectiveness recorded in the Condensed Consolidated Statements of Income.

The real estate and other assets of the American Cancer Society Center (the ACS Center) are restricted under the ACS Center loan agreement in that they are not available to settle debts of the Company. However, provided that the ACS Center loan has not incurred any uncured event of default, as defined in the loan agreement, the cash flows from the ACS Center, after payments of debt service, operating expenses and reserves, are available for distribution to the Company.

In June 2008, the Company repaid its mortgage note secured by Lakeshore Park Plaza. In July 2008, the Company executed a new, non-recourse mortgage loan for \$18.4 million secured by the Lakeshore Park Plaza property. This loan matures August 1, 2012 and bears interest at 5.89%.

For the nine months ended September 30, 2008 and 2007, interest expense was as follows (\$ in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Incurred	\$12,100	\$ 8,821	\$ 35,174	\$ 21,999
Capitalized	(3,395)	(5,556)	(12,827)	(18,203)
Expensed	\$ 8,705	\$ 3,265	\$ 22,347	\$ 3,796

At September 30, 2008, the Company had outstanding letters of credit and performance bonds of \$12.3 million. The Company has projects under development and redevelopment for which it estimates total future funding commitments of \$162.1 million at September 30, 2008. Additionally, the Company has future obligations as a lessor under numerous leases to fund approximately \$5.8 million of tenant improvements as of September 30, 2008. As a lessee, the Company has future obligations under ground and office leases of approximately \$16.0 million at September 30, 2008.

3. EARNINGS PER SHARE

Net income per share-basic is calculated as net income available to common stockholders divided by the weighted average number of common shares outstanding during the period. Net income per share-diluted is calculated as net income available to common stockholders divided by the diluted weighted average number of common shares outstanding during the period. Diluted weighted average number of common shares is calculated to reflect the potential dilution under the treasury

Table of Contents

stock method that would occur if stock options, restricted stock or other contracts to issue common stock were exercised and resulted in additional common shares outstanding. The numerator used in the Company's per share calculations is the same for both basic and diluted net income per share.

Weighted average shares-basic and weighted average shares-diluted were as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Weighted average shares-basic	51,209	51,690	51,182	51,744
Dilutive potential common shares:				
Stock options	408		596	1,419
Restricted stock	35		19	51
Weighted average shares-diluted	51,652	51,690	51,797	53,214
Anti-dilutive options not included	3,425	2,936	2,462	919

Because the Company reported a net loss from continuing operations (after preferred stock dividends) for the three months ended September 30, 2007, the effect of all common stock equivalents on per share earnings for that period was anti-dilutive and were, therefore, excluded from the calculation of weighted average shares-diluted.

4. STOCK-BASED COMPENSATION

SFAS No. 123(R), *Share-Based Payment*, requires that companies recognize as compensation expense the grant date fair value of share-based awards over the required service period of the awards. The Company has several types of stock-based compensation—stock options, restricted stock and restricted stock units—which are described in Note 6 of Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. The Company uses the Black-Scholes option-pricing model to value its new stock option grants under SFAS 123(R) and recognizes compensation expense in general and administrative expense in the Condensed Consolidated Statements of Income over the related awards' vesting period. A portion of share-based payment expense is capitalized to projects under development in accordance with SFAS No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*. SFAS 123(R) also requires the Company to estimate forfeitures in calculating the expense related to stock-based compensation, and to reflect the benefits of tax deductions in excess of recognized compensation cost to be reported as both a financing cash inflow and an operating cash outflow.

The Company expensed approximately \$267,000 and \$2.6 million for the three months ended September 30, 2008 and 2007, respectively, and \$3.7 million and \$4.4 million for the nine months ended September 30, 2008 and 2007, respectively, for stock-based compensation, after the effect of capitalization to projects under development and income tax benefit. As of September 30, 2008, the Company had \$10.5 million of estimated total unrecognized compensation cost related to stock-based compensation, which will be recognized over a weighted average period of 1.7 years.

During 2008, the Company granted 48,000 options to its directors. These options have an exercise price of \$24.71 per share, the market value of the Company's stock on the grant date. The Company calculated the fair value of these options on the grant date using the Black-Scholes option-pricing model which requires the Company to provide inputs in calculating the fair value of options on the date of grant. The risk-free interest rate utilized is the interest rate on U.S. Government Bonds and Notes having the same life as the estimated life of the Company's option awards. Expected life of

Table of Contents

the options granted was estimated based on historical data reflecting actual hold periods plus an estimated hold period for unexercised options outstanding. Expected volatility is based on the historical volatility of the Company's stock over a period relevant to the related stock option grant. The assumed dividend yield is based on the annual dividend rate for regular dividends at the time of grant. Below are the Black-Scholes inputs used to calculate the weighted-average fair value of the 2008 option grant:

Assumptions:

Risk free interest rate	2.62%
Expected life	5.76 years
Expected volatility	0.27%
Expected dividend yield	5.04%

Result:

Weighted-average fair value of options granted \$3.74

The following table summarizes stock option activity during the nine months ended September 30, 2008:

	Number of Options (in thousands)	Weighted- Average Exercise Price	Aggregate Intrinsic Value (in thousands)	Weighted- Average Remaining Contractual Life (years)
Outstanding at December 31, 2007	6,732	\$ 23.79		
Granted	48	24.71		
Exercised	(97)	15.98		
Forfeited	(186)	28.40		
Outstanding at September 30, 2008	6,497	\$ 23.78	\$ 22,259	5.74
Exercisable at September 30, 2008	4,497	\$ 21.69	\$ 21,391	4.59

The total intrinsic value of options exercised during the three and nine months ended September 30, 2008 was \$384,000 and \$1.0 million, respectively.

The following table summarizes restricted stock activity during the nine months ended September 30, 2008:

	Number of Shares (in thousands)	Weighted- Average Grant Date Fair Value
Non-vested stock at December 31, 2007	134	\$ 26.77
Granted	6	24.71
Forfeited	(8)	27.14
Non-vested stock at September 30, 2008	132	\$ 26.64

Restricted stock units (RSU) are accounted for as liability awards under SFAS 123(R) and employees are paid cash based upon the value of the Company s stock upon vesting. The following table summarizes RSU activity for the nine months ended September 30, 2008 (in thousands):

12

Table of Contents

Outstanding at December 31, 2007	469

5. PROPERTY TRANSACTIONS

SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, requires that the gains and losses from the disposition of certain real estate assets and the related historical results of operations of certain disposed of or held-for-sale assets be included in a separate section, discontinued operations, in the statements of income for all periods presented. SFAS No. 144 also requires that assets and liabilities of held-for-sale properties, as defined, be separately categorized on the balance sheet in the period that they are deemed held for sale.

In 2007, the Company sold 3301 Windy Ridge Parkway, a 107,000 square foot office building in Atlanta, Georgia, and five ground leased sites at the Company's North Point project.

In October 2008, the Company sold 3100 Windy Hill Road, a 188,000 square foot office building in Atlanta, Georgia for a sales price of \$12.5 million and a gain of approximately \$2.5 million. In accordance with SFAS No. 144, the Company separately classified the cost basis of this property to Property Held for Sale in the Condensed Consolidated Balance Sheet.

The operations of these projects are included in discontinued operations in the accompanying Condensed Consolidated Statements of Income. The following details the components of income from discontinued operations for the three and nine months ended September 30, 2008 and 2007 (\$ in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Rental property revenues	\$ 6	\$ 92	\$ 15	\$ 874
Other revenues		11	2	72
Rental property operating expenses	(299)	(337)	(710)	(1,275)
Depreciation and amortization	(138)	(174)	(486)	(672)
	\$ (431)	\$ (408)	\$ (1,179)	\$ (1,001)

The gain on sale of the applicable properties included in Discontinued Operations for the three and nine months ended September 30, 2007 is comprised of the following:

	Three Months Ended September 30, 2007		Nine Months Ended September 30, 2007	
3301 Windy Ridge Parkway	\$	9,872	\$	9,872
North Point ground-leased sites				8,164
Other				(22)
	\$	9,872	\$	18,014

Edgar Filing: COUSINS PROPERTIES INC - Form 10-Q

In addition to the property transactions described above, the Company sold 70 acres of undeveloped land at its Jefferson Mill project to an entity which is partially owned by a former executive officer of the Company. The Company recognized a gain on this sale in the second quarter of 2008 of \$748,000. In addition, the Company entered into a contract to sell an additional 97 acres at Jefferson Mill and the King Mill project to this same entity. The Company expects to close on the sale of the additional 89 acres on or before December 31, 2009.

Table of Contents**6. INVESTMENT IN UNCONSOLIDATED JOINT VENTURES**

The Company describes its investments in unconsolidated joint ventures in Note 5 to its Annual Report on Form 10-K for the year ended December 31, 2007. The following table summarizes balance sheet data of the Company's unconsolidated joint ventures as of September 30, 2008 and December 31, 2007 (\$ in thousands):

Table of Contents**7. OTHER ASSETS**

Other Assets on the Condensed Consolidated Balance Sheets included the following (\$ in thousands):

	September 30, 2008	December 31, 2007
Investment in Verde	\$ 9,376	\$ 9,376
FF&E and leasehold improvements, net of accumulated depreciation of \$10,844 and \$9,761 as of September 30, 2008 and December 31, 2007, respectively	5,868	6,341
Airplane and related deposit, net of accumulated depreciation of \$674 and \$1,216 as of September 30, 2008 and December 31, 2007, respectively	14,700	14,191
Predevelopment costs and earnest money	14,623	16,692
Lease inducements, net of accumulated amortization of \$722 and \$235 as of September 30, 2008 and December 31, 2007, respectively	14,113	3,735
Loan closing costs, net of accumulated amortization of \$2,621 and \$1,448 as of September 30, 2008 and December 31, 2007, respectively	5,593	6,497
Prepaid expenses and other assets	3,640	2,575
Deferred tax asset	8,329	
Intangible Assets:		
Goodwill	5,530	5,529
Above market leases, net of accumulated amortization of \$8,240 and \$6,028 as of September 30, 2008 and December 31, 2007, respectively	1,601	4,598
In-place leases, net of accumulated amortization of \$2,093 and \$1,589 as of as of September 30, 2008 and December 31, 2007, respectively	721	1,409
	\$ 84,094	\$ 70,943

Investment in Verde relates to a cost method investment in a non-public real estate owner and developer. The Company has evaluated its investment in Verde and determined no impairment adjustment is necessary. Goodwill relates entirely to the Office reportable segment. Above and below market leases are amortized into rental revenues over the remaining lease terms. In-place leases are amortized into depreciation and amortization expense also over remaining lease terms. Amortization expense for intangibles totaled \$1.1 million and \$1.2 million in the three months ended September 30, 2008 and 2007, respectively, and \$3.4 million and \$4.4 million in the nine months ended September 30, 2008 and 2007, respectively. Future aggregate amortization of these intangible assets and liabilities is anticipated to be as follows (\$ in thousands):

	Below Market Rents	Below Market Ground Lease	Above Market Leases	In-Place Leases	Total
Remainder of 2008	\$ (32)	\$ (2)	\$ 870	\$ 178	\$ 1,014
2009	(127)	(9)	197	120	181
2010	(125)	(9)	197	97	160
2011	(116)	(9)	152	79	106
2012	(48)	(9)	16	60	19

Table of Contents**8. SUPPLEMENTAL CASH FLOWS INFORMATION**

The following table summarizes supplemental information related to cash flows (\$ in thousands):

	Nine Months Ended September 30,	
	2008	2007
Interest paid, net of amounts capitalized	\$ 20,869	\$ 1,935
Income taxes refunded	410	105
Non-Cash Transactions		
Transfer from projects under development to operating properties	206,253	154,715
Transfer from other assets to land held for investment	5,694	11,785
Issuance of note receivable for sale of land	5,050	
Transfer from operating properties to projects under development	6,379	
Change in accruals excluded from development, leasing and acquisition expenditures	3,351	2,481
Transfer of income tax receivable to deferred tax asset	9,182	
Transfer from investment in joint venture to land held for investment	1,570	
Transfer from projects under development to land held for investment	667	885
Change in accumulated other comprehensive income	201	1,244
Transfer from operating properties to land held for investment	2,600	2,392
Transfer from operating properties to operating properties held for sale	9,335	
Transfer from land held for investment to projects under development		18,997
Transfer from land held for investment to operating properties		2,868
Transfer from other assets to projects under development		22,064
Transfer from other assets to operating properties		136
Transfer from investment in joint venture to deferred gain		2,227

9. REPORTABLE SEGMENTS

In the second quarter of 2008, the Company reorganized along functional lines and eliminated its division structure, which was based primarily on product type. As a result, the Company revised its segment reporting to reflect this new alignment and to correspond with information as presented to the chief operating decision maker. The following tables reflect these changes, and the reportable segments for the three and nine months ended September 30, 2007 have been restated to be consistent with the current year reporting.

Under its new structure, the Company has five reportable segments: Office, Retail, Land, Third-party Management and Multi-family. The Company's reportable segments are categorized based on the type of product and nature of service. The Office segment includes results of operations for office properties, both consolidated and at joint ventures. The Retail segment includes results of operations for both consolidated and joint venture-owned retail centers. The Land segment includes results of operations for various tracts of land that are held for investment or future development, and single-family residential communities that are parceled into lots and sold to various homebuilders or sold as undeveloped tracts of land. The Third-party Management segment includes results of operations for projects where the Company manages, leases and/or develops properties for other owners. The Multi-family segment includes results of operations for the development and sale of multi-family real estate. Other includes compensation for employees other than those in the specific aforementioned areas, general corporate overhead costs, interest expense for consolidated entities as financing decisions are made at the corporate level (with the exception of joint venture interest expense, which is included in joint venture results), minority interest in income of consolidated subsidiaries, income taxes, depreciation, and preferred dividends, as well as the operations of the Industrial properties, which are not material for separate presentation.

Table of Contents

Company management evaluates the performance of its reportable segments in part based on funds from operations available to common stockholders (FFO). FFO is a supplemental operating performance measure used in the real estate industry. The Company calculated FFO using the National Association of Real Estate Investment Trusts (NAREIT) definition of FFO, which is net income available to common stockholders (computed in accordance with GAAP), excluding extraordinary items, cumulative effect of change in accounting principle and gains or losses from sales of depreciable property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures to reflect FFO on the same basis.

FFO is used by industry analysts, investors and the Company as a supplemental measure of an equity REIT 's operating performance. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. Thus, NAREIT created FFO as a supplemental measure of a REIT 's operating performance that excludes historical cost depreciation, among other items, from GAAP net income. Management believes that the use of FFO, combined with the required primary GAAP presentations, has been fundamentally beneficial, improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful. Company management evaluates the operating performance in part based on FFO. Additionally, the Company uses FFO and FFO per share, along with other measures, to assess performance in connection with evaluating and granting incentive compensation to its officers and other key employees.

Segment net income, a breakout of assets, investment in joint ventures and capital expenditures are not presented in the following tables. Management does not utilize these measures when analyzing its segments or when making resource allocation decisions, and therefore this information is not provided. FFO is reconciled to net income on a total company basis.

Three Months Ended September 30, 2008 (in thousands)	Office	Retail	Land Management	Third Party			Total
				Multi-Family	Other		
Net rental property revenues less rental property operating expenses	\$ 16,147	\$ 6,872	\$	\$	\$	384	\$ 23,403

When reviewing the results of operations for the Company, management analyzes its rental property operations and residential, tract and outparcel sales net of their related costs. Gains on sales of investment properties and the property operations that are classified as discontinued operations are also presented net of costs in the management reporting. These amounts are shown in the segment tables above in the same net manner as shown to management. Certain adjustments are required to reconcile the above segments information to the Company's consolidated revenues. These items are eliminated from the segment reporting tables above as follows:

Reconciliation to Revenues on Consolidated Income Statement	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Net rental property revenues less rental property operating expenses	\$ 23,403	\$ 18,122	\$ 65,988	\$ 46,835
Plus rental property operating expenses	14,641	12,303	42,663	33,111

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview:

Cousins Properties Incorporated, (along with its subsidiaries and affiliates, collectively referred to as the Company), is a real estate development company with experience in the development, leasing, financing and management of office, retail and industrial properties in addition to residential land development and the development and sale of multi-family products. As of September 30, 2008, the Company held interests directly or through joint ventures in 24 office properties totaling 7.6 million square feet, 14 retail properties totaling 4.8 million square feet, and four industrial properties totaling 2.0 million square feet. These interests include office and retail projects under development or redevelopment totaling 3.8 million square feet. The Company had interests in two under-development multi-family projects projected to contain 208 for-sale units. The Company had 24 residential communities in various stages of development directly or through joint ventures in which approximately 10,300 lots remain to be developed and/or sold. In addition, the Company owned directly or through joint ventures approximately 8,300 acres of land.

The Company's strategy is to produce stockholder returns by creating value through the development of high quality, well-located office, retail, industrial, multi-family and residential properties. The Company has developed substantially all of the real estate assets it owns. A key element in the Company's strategy is to actively manage its portfolio of investment properties and, at the appropriate times, to engage in timely and strategic recycling of its capital, either by sales, financings or through contributions to ventures in which the Company retains an ownership interest. These transactions seek to maximize the value of the assets the Company has created, generate capital for additional development properties and return a portion of the value created to the Company's stockholders.

Management continues to assess its opportunities in the current economic environment. Management has seen the number of traditional development opportunities across its product types decrease over the past years and does not expect this trend to change significantly in the next nine to 12 months. Single-family residential markets continue to struggle and management expects the number of lots sold in 2008 will be less than in 2007. Management believes retailers are more reluctant to commit to new leases and management sees few opportunities for traditional office or multi-family development within the next year. Management is optimistic that other, more non-traditional, opportunities may present themselves to the Company. These opportunities could include acquisition of single-family residential, office or retail developments whose developers or lenders are experiencing problems and acquisition of retail or office projects with financing problems. However, there can be no assurance that these non-traditional opportunities will materialize.

Also, in the current economic environment, credit markets are making it difficult for real estate companies to obtain new loans or to refinance maturing obligations. The Company has no significant debt maturities in the remainder of 2008 or 2009. Management believes it has capacity, through cash on hand and availability under its credit facility and construction lines, to complete its ongoing development projects. The Company closely monitors the financial covenants contained in its credit agreements. Development activities could decline and/or rental revenues could decrease due to tenant defaults or lease terminations; however, the Company expects to remain in compliance with its financial covenants for the foreseeable future.

Table of Contents

Significant events during the three months ended September 30, 2008 included the following:

Sold two outparcels ground leased by Red Robin and Men's Wearhouse at The Avenue Carriage Crossing for \$3.3 million, generating a gain of approximately \$1.6 million.

Through its CL Realty, L.L.C. (CL Realty) and Temco Associates, LLC (Temco) joint ventures, sold three land tracts for \$5.3 million, generating gains of \$3.3 million. The Company's share of these gains, pre-tax, was approximately \$1.7 million.

Through its 50 Biscayne joint venture, sold all of the remaining 120 residential units for \$30.3 million. At quarter end, this venture held seven unsold commercial units, three of which closed in October 2008.

Commenced closings of units at its 10 Terminus Place residential project. The Company recognized approximately \$744,000 of pre-tax gain on closings of nine of the 137 units.

Received a pre-tax fee of approximately \$13.5 million from a development contract, partially offset by a commission of approximately \$3.4 million.

Celebrated the grand opening of Tiffany Springs MarketCenter, a 584,000 square foot power center in Kansas City, Missouri, of which the Company owns 246,000 square feet.

Entered into an \$18.4 million mortgage loan secured by the Lakeshore Park Plaza office building. This non-recourse loan matures August 1, 2012 and bears interest at 5.89%.

Other highlights subsequent to quarter-end:

Sold its 3100 Windy Hill Road office building for \$12.5 million. The Company expects to recognize a gain on sale of this building of approximately \$2.5 million in the fourth quarter of 2008.

Entered into two \$75 million interest rate swaps on floating-rate LIBOR-based borrowings that fixes the Company's underlying LIBOR rate at 2.995% and 2.69% for two years. The Company pays a spread in addition to LIBOR on its floating rate borrowings as discussed in Note 2 to the condensed consolidated financial statements.

Results of Operations:

Rental Property Revenues. Rental property revenues increased approximately \$7.7 million (25%) and \$29.1 million (36%) in the three and nine month 2008 periods, respectively, compared to the same 2007 periods. These increases, discussed in detail below, generally resulted from the opening of newly-developed office and retail properties, plus increases in leasing at certain properties.

Rental property revenues from the office portfolio increased approximately \$4.6 million (20%) and \$22.6 million (39%) in the three and nine month 2008 periods, respectively, as a result of the following:

Increase of \$3.0 million and \$13.7 million in the three and nine month 2008 periods, respectively, due to the second quarter 2007 opening of Terminus 100;

Increase of \$154,000 and \$3.6 million in the three and nine month 2008 periods, respectively, related to the American Cancer Society Center (the ACS Center), where average economic occupancy increased;

Increase of \$231,000 and \$2.2 million in the three and nine month 2008 periods, respectively, related to 191 Peachtree Tower, where average economic occupancy increased; and

Table of Contents

Increase of \$1.1 million and \$1.3 million in the three and nine month 2008 periods, respectively, related to One Georgia Center, where average economic occupancy increased.

Rental property revenues from the retail portfolio increased approximately \$3.1 million (45%) and \$6.1 million (31%) in the three and nine month 2008 periods, respectively, as a result of the following:

Increase of \$377,000 and \$1.6 million in the three and nine month 2008 periods, respectively, related to increased average economic occupancy at San Jose MarketCenter, which opened in the first quarter of 2006;

Increase of \$264,000 and \$1.2 million in the three and nine month 2008 periods, respectively, related to increased average economic occupancy at The Avenue Webb Gin, which opened in the third quarter of 2006;

Increase of \$1.7 million and \$2.6 million in the three and nine month 2008 periods, respectively, related to The Avenue Forsyth, which opened in April 2008; and

Increase of \$635,000 for both the three and nine month 2008 periods related to Tiffany Springs MarketCenter, which opened in July 2008.

Rental Property Operating Expenses. Rental property operating expenses increased approximately \$2.3 million (19%) and \$9.6 million (29%) in the three and nine month 2008 periods, respectively, compared to the same 2007 periods as a result of the following:

Increase of \$1.0 million and \$3.6 million in the three and nine month 2008 periods, respectively, related to the opening of Terminus 100;

Increase of \$665,000 and \$985,000 in the three and nine month 2008 periods, respectively, due to the openings of The Avenue Forsyth and Tiffany Springs MarketCenter;

Increase of \$392,000 and \$3.4 million in the three and nine month 2008 periods, respectively, related to the increased occupancy at 191 Peachtree Tower, the ACS Center, One Georgia Center, San Jose MarketCenter, and The Avenue Webb Gin;

Increase of \$21,000 and \$476,000 from the 2007 acquisition of the 221 Peachtree Center Avenue parking deck and increased occupancy at the four North Point office properties; and

Increase of \$128,000 and \$610,000 from the Company's industrial portfolio, which includes several recently developed and opened properties.

Fee Income. Fee income increased \$11.2 million and \$8.7 million in the three and nine month 2008 periods, respectively, compared to the same 2007 periods. Fee income is comprised of management fees, development fees and leasing fees, which the Company performs for joint ventures in which it has an ownership interest and third party property owners. Fee income also includes direct reimbursements of expenses from these owners. Fees and reimbursements vary between quarters, due to the number of contracts with ventures and third party owners and the development and leasing needs at the underlying properties, and could continue to vary in future periods based on volume and composition of activities at the underlying properties.

The increase in fee income between periods is primarily the result of the receipt of a \$13.5 million development fee in the third quarter of 2008. This fee was earned on a contract the Company assumed in an acquisition of an entity several years ago. Pursuant to the contract, the Company shares in the proceeds over cost from the sale of a building that the prior entity developed in Texas. This building was sold in the third quarter for cash and a note from the buyer. The fee recognized represents the Company's share of the cash proceeds. As the buyer makes payments on the note, the Company will share in these payments and anticipates recognizing additional fee income in future

Table of Contents

periods. Partially offsetting the increase in development fees was a decrease of \$875,000 in both the three and nine month 2007 periods related to amounts the Company paid and was reimbursed on behalf of the Ft. Gillem contract. None were incurred or reimbursed in 2008.

Management fees, including expense reimbursements, increased \$369,000 and decreased \$752,000 during the three and nine month 2008 periods, respectively. These amounts fluctuate as contracts are gained and lost. The increase for the three month period is a result of an increase in 2008 of 2.3 million square feet in office buildings or retail centers under management. The decrease in the nine month period is a result of the loss of 3.3 million in office buildings under management in the fourth quarter of 2007.

Leasing fee income decreased \$1.9 million and \$2.8 million in the three and nine month 2008 periods, respectively, compared to the 2007 periods primarily due to changes in the level of rollover and activity at the underlying properties for which the Company performs leasing services.

Multi-family Residential Sales and Cost of Sales. In the third quarter of 2008, the Company commenced the closing of units at its 10 Terminus Place project. Nine units were closed which caused the increase in sales of \$5.4 million for both the three and nine month 2008 periods and the increase in costs of sales of \$4.7 million for both the three and nine month 2008 periods. Given the current state of the condominium market in Atlanta, the Company cannot predict with certainty the timing of closing or pricing for the remaining units at 10 Terminus Place. While management believes that the 10 Terminus Place units are well-positioned from a pricing and quality standpoint, many factors, including the ability of buyers to obtain financing on favorable terms, will affect the remaining unit sales. In addition, the Company regularly reviews all its projects, including 10 Terminus Place, for impairment indicators which could signal that an impairment exists. Management does not believe any indicators exist at this time at this project, but we will continue to evaluate this project and circumstances in the future could result in a different outcome.

Residential Lot and Outparcel Sales and Cost of Sales. Residential lot and outparcel sales and cost of sales are discussed in detail below.

Residential Lot Sales and Cost of Sales The Company's residential lot business consists of projects that are consolidated, for which income is recorded in the residential lot and outparcel sales and cost of sales line items, and projects that are owned through joint ventures in which the Company is a 50% partner with Temco and CL Realty, for which income is recorded in income from unconsolidated joint ventures. The number of lots sold for the nine month periods were as follows:

	2008	2007
Consolidated projects	12	45
Temco	8	65
CL Realty, L.L.C.	145	293
Total	165	403

Demand for residential lots is down significantly as a result of general market conditions and as a result of limited demand in the Company's and its ventures' principal markets in Texas, Florida and metropolitan Atlanta. Builders, the primary customers for such residential lots, have a general oversupply of inventory in the Company's markets and are working to reduce inventory levels before they consider buying additional lots. In addition, many home builders are experiencing serious financial difficulties in the current economic environment, and the recent changes in credit availability for home buyers and homebuilders have made it more difficult to obtain financing for purchasers. Management is closely monitoring market developments but is currently unable to predict when markets will improve. Management expects these market conditions to continue to negatively impact residential lot sales and have an adverse impact on the Company's results of

Table of Contents

operations until such time as the residential lot markets improve. Therefore, consistent with current market trends, the Company anticipates residential lot sales for the rest of 2008, like those year-to-date for 2008 and for 2007, will be lower than those the Company experienced in recent years, both at consolidated projects and at Temco and CL Realty. In addition, the Company expects for the demand for residential lots to continue to be low into 2009.

Despite the economic downturn in the residential lot business, the Company has recorded no impairment charges in 2008. On a quarterly basis, the Company analyzes its consolidated land and lot holdings in accordance with SFAS No. 144 by reviewing these assets for indicators of impairment. If there are indicators of impairment, the Company analyzes the projected undiscounted cash flows to be generated by the assets as it considers substantially all of these assets to be held for use under SFAS No. 144. The Company also analyzes its investment in CL Realty and Temco in accordance with APB No. 18 to determine whether an impairment exists and, if so, whether such impairment is deemed to be temporary or other-than-temporary. In addition, the Company is exposed to its share of any impairment charge on any individual asset at CL Realty and Temco. Given the continuing uncertainty in the residential market, there can be no guarantee that the Company will not record an impairment charge pursuant to SFAS No. 144 or APB No. 18 in the future.

Residential lot sales for consolidated properties decreased \$2.4 million and \$3.9 million between the three and nine month 2008 periods and the same 2007 periods. Residential lot cost of sales decreased \$2.2 million and \$3.6 million between the three and nine month 2008 and 2007 periods. The change in residential lot cost of sales was partially due to the number of lots sold during the periods and partially to fluctuations in gross profit percentages used to calculate the cost of sales for residential lot sales in certain of the residential developments.

Outparcel Sales and Cost of Sales Outparcel sales increased \$1.6 million and \$3.2 million, respectively, between the three and nine month 2008 and 2007 periods, respectively. Outparcel cost of sales increased \$766,000 and \$1.6 million between the three and nine month 2008 and 2007 periods, respectively. Both of these changes are due to three outparcel sales in 2008 (one in the first quarter and two in the third quarter), compared to one outparcel sale in the third quarter of 2007.

Interest and Other. Interest and other income increased \$552,000 (126%) in the three month 2008 period compared to the same 2007 period and decreased \$1.6 million (33%) between the nine month 2008 and 2007 periods as a result of the following:

Termination fees increased \$372,000 and decreased \$3.8 million in the three and nine month 2008 periods, respectively. The increase in the three month period is due to a fee of \$353,000 in the third quarter of 2008 at The Avenue Webb Gin, with no corresponding third quarter 2007 fee. The decrease in the nine month period is due primarily to a \$3.5 million termination fee recognized in the first quarter of 2007 from a lease terminated at the ACS Center;

Increase in interest income of approximately \$200,000 and \$1.2 million in the three and nine month 2008 periods, respectively, due to an increase in notes receivable outstanding; and

Increase in other income of approximately \$832,000 in the nine month 2008 period, mainly due to the sale of certain miscellaneous assets.

General and Administrative Expenses. General and administrative expenses increased \$2.3 million (16%) in the three month 2008 period and decreased \$535,000 (1%) in the nine month 2008 period due to the following:

Increase of \$3.3 million and \$3.0 million in employee leasing commissions in the three and nine month periods, respectively, due to the development fee recognized in the third quarter of 2008, as described in the fee income section above. The arrangement called for a payment to an employee for 25% of any revenues earned, and therefore \$3.4 million of the increase in employee leasing commissions relates to the cost of earning this development income.

Table of Contents

Leasing commission expense otherwise decreased, as leasing activity at third party managed projects, for which the Company earns fee income and pays related commissions to employees, has declined;

Increase in charitable contributions of \$992,000 in both the three and nine month 2008 periods compared to the same 2007 periods as a result of the Company making a \$1.0 million payment to fund its corporate foundation in the third quarter 2008;

Decrease of \$1.5 million and \$1.9 million in stock-based compensation expense for the three and nine month 2008 periods, respectively. The Company recognizes compensation expense for its restricted stock units (RSUs) based either on the current fair market value of its common stock or using certain modeling techniques for its performance-based RSUs. The changes in stock prices, vesting in such awards and the decline in the overall economic conditions result in changes in values from period to period;

Decrease of \$1.5 million in salaries and benefits, net of amounts capitalized to projects under development, in the nine month 2008 period compared to the same 2007 period. The Company reduced staffing and eliminated its Industrial Division at the end of the first quarter of 2008. In addition, salaries, benefits and other expenses reimbursed by third party and joint venture management contracts decreased due to a reduced number of third party contracts between periods. Salaries and benefits, net of amounts capitalized, remain relatively flat between the three month 2008 and 2007 periods. Although salaries and benefits decreased during the three months periods due to reduced staffing, amounts capitalized against the salaries and benefits decreased due to fewer development projects;

Decrease of \$625,000 in rent expense and moving costs in the nine month 2008 period. In the second quarter of 2007, the Company relocated its corporate headquarters to 191 Peachtree Tower, which is owned by the Company, and rent for the Company's corporate headquarters is no longer included in expense; and

Decrease of approximately \$121,000 and \$415,000 in professional fees in the three and nine month 2008 periods, respectively, a large portion of which related to legal fees. In the 2007 periods, the Company incurred higher legal costs for additional work performed in order to comply with new SEC rules and regulations related to proxy filings and related to potential venture formations and other projects.

Depreciation and Amortization. Depreciation and amortization increased approximately \$2.9 million (28%) and \$9.0 million (32%) between the three and nine month 2008 periods, respectively, when compared to the 2007 periods, primarily as a result of the following:

Increase of \$1.2 million and \$5.1 million in the three and nine month 2008 periods, respectively, related to the opening of Terminus 100;

Increase of \$1.0 million and \$1.4 million in the three and nine month 2008 periods, respectively, from the openings of The Avenue Forsyth and Tiffany Springs MarketCenter;

Increase of \$270,000 and \$715,000 in the three and nine month 2008 periods, respectively, from the openings of several industrial properties Lakeside Ranch Business Park, King Mill Distribution Park Building 3B, and Jefferson Mill Business Park Building A; and

Increase of \$325,000 and \$1.4 million in the three and nine month 2008 periods, respectively, from increased amortization of tenant improvements due to the increased occupancy at 191 Peachtree Tower, the ACS Center, One Georgia Center, San Jose MarketCenter, and The Avenue Webb Gin.

Interest Expense. Interest expense increased approximately \$5.4 million and \$18.6 million in the three and nine month 2008 periods, respectively, compared to the same 2007 periods. The increases are partially the result of an increase in interest expense due to the following:

Table of Contents

An increase related to mortgage notes payable entered into in 2007 for Terminus 100, the ACS Center and San Jose MarketCenter; and

The increase in interest expense was partially offset by a decrease in the average amounts drawn on the Company's credit facility from the 2007 to 2008 nine-month periods.

The increases in interest expense are also the result of decreases in capitalized interest for the periods associated with the following:

The completion of several properties in development or lease-up including Terminus 100, The Avenue Webb Gin, The Avenue Forsyth, Tiffany Springs MarketCenter, the 50 Biscayne multi-family project and The Avenue Murfreesboro; and

The suspension of construction on certain residential projects that are wholly-owned or owned in joint ventures.

Other Expense. Other expense increased \$921,000 and \$2.1 million in the three and nine month 2008 periods, respectively, mainly due to an increase in predevelopment expenses during the periods. The Company charged costs related to certain predevelopment projects to expense during 2008 which it determined were no longer probable of being developed.

Benefit for Income Taxes from Operations. Benefit for income taxes from operations decreased approximately \$2.7 million to a provision for income taxes between the three month 2007 and 2008 periods. The benefit increased approximately \$571,000 between the nine month 2008 and 2007 periods. The decrease in the three month period is related to the \$13.5 million development fee noted above as it was recorded in a subsidiary of CREC, which also partially offset the increase in the nine month benefit. The increase in the benefit for the nine month period is a result of the following:

Decrease in leasing fee income; and

Increase in interest expense on borrowings between the Company and CREC, due to an increase in amounts outstanding and interest rates charged.

Income from Unconsolidated Joint Ventures. Income from unconsolidated joint ventures increased approximately \$4.4 million and \$1.6 million in the three and nine month 2008 periods, respectively, compared to the same 2007 periods, due to the following. (All amounts discussed reflect the Company's share of joint venture income based on its ownership interest in each joint venture).

Increase in income from TRG of approximately \$4.3 million and \$513,000 in the three and nine month 2008 periods, respectively. TRG recognized income on its condominium units under contract for sale using the percentage of completion method of accounting during the first half of 2007 and previous years. A portion of previously recognized income was reversed in the third quarter of 2007, when it was determined that all of the requirements for revenue recognition under the percentage of completion method were no longer being met. The income that was generated at TRG in 2008 included revenues from units that closed under the completed contract method of accounting and income from forfeited security deposits on units that did not close. TRG closed substantially all of its residential units in late 2007 and 2008 at a gain, and holds seven commercial units at September 30, 2008 (three of which closed in October 2008).

Increase in income from CL Realty of approximately \$674,000 and \$1.7 million in the three and nine month 2008 periods, respectively, compared to the same 2007 periods. This venture recognized revenue from two mineral rights lease bonus payments in 2008, one in the first quarter and one in the second quarter. In addition, in 2008, the venture recognized income from potential lot buyers forfeiting their deposits, and gains from land tract sales at certain of the venture's residential developments. This increase was partially offset by a decrease in lots sold from 68 in the third quarter 2007 to 48 in the third quarter of 2008, and a decrease from

Table of Contents

293 in the first nine months of 2007 to 145 in the same 2008 period. See additional discussion in the Residential Lot and Outparcel Sales and Cost of Sales section above.

Decrease in income from CP Venture Two LLC of \$1.3 million in both the three and nine month 2008 periods compared to the same 2007 periods due to the third quarter 2007 sale of the Mansell Crossing Phase II retail center, of which the Company's share of gain was \$1.2 million.

Increase in income from Temco of \$714,000 and \$620,000 in the three and nine month 2008 periods, respectively. Temco recognized gains from land tract sales in 2008 compared to no sales in 2007. The increase was partially offset by a decrease in lots sold from 20 in the third quarter of 2007 to no lot sales in the third quarter of 2008, and a decrease from 65 in the first nine months of 2007 to 8 in the same 2008 period.

Gain on Sale of Investment Properties. The \$10.4 million gain for the nine month 2008 period consisted primarily of the following:

Gain from the sale of undeveloped land from the Company's North Point land holdings (\$3.7 million);

Gain from the sale of undeveloped land from the Jefferson Mill project land holdings (\$748,000);

Gain from the sale of undeveloped land adjacent to The Avenue Forsyth project (\$3.6 million);

Gain from a land tract sale at the Cedar Grove residential development (\$163,000);

Gain from the condemnation of land at Cosmopolitan Center (\$619,000);

Gain from the sale of certain of the Company's miscellaneous assets (\$956,000); and

Gain from the sale of the Company's airplane (\$415,000).

The 2007 gain consisted primarily of the sale of undeveloped land near the Company's Avenue Carriage Crossing project.

Discontinued Operations. Income from discontinued operations (including gain on sale of investment properties) decreased \$9.9 million and \$18.2 million in the three and nine month 2008 periods, respectively, compared to the same 2007 periods. Properties treated as discontinued are as follows:

In the first quarter of 2007, the Company sold five sites under ground lease at the Company's North Point project;

In the third quarter of 2007, the Company sold the 3301 Windy Ridge Parkway office building; and

In September 2008, the 3100 Windy Hill Road office building was placed under contract, and is therefore categorized as held-for-sale on the condensed consolidated balance sheet. The results of operations for all periods presented were reclassified to discontinued operations. The contract closed in October 2008 at an estimated gain of \$2.5 million.

Discussion of New Accounting Pronouncements. On January 1, 2008, the Company adopted EITF No. 06-8, *Applicability of the Assessment of a Buyer's Continuing Investment under FASB Statement No. 66, Accounting for Sales of Real Estate, for Sales of Condominiums* (EITF 06-8), which provides guidance for determining the adequacy of a buyer's continuing investment and the appropriate profit recognition in the sale of individual units in a condominium project. EITF 06-8 requires that companies evaluate the adequacy of a buyer's continuing investment in recognizing

Table of Contents

condominium revenues on the percentage of completion method by applying paragraph 12 of Statement No. 66 to the level and timing of deposits received on contracts for condominium sales. This adoption had no effect on financial position or results of operations in the nine months ended September 30, 2008, but the Company anticipates that the accounting under EITF 06-8 could have a material effect on the timing of revenue recognition for future multi-family residential projects.

On January 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* for non-financial assets and liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Company uses various valuation techniques and assumptions when estimating fair value. In accordance with SFAS No. 157, the Company applied the following fair value hierarchy:

Level 1 Assets or liabilities for which the identical item is traded on an active exchange, such as publicly-traded instruments or futures contracts.

Level 2 Assets and liabilities valued based on observable market data for similar instruments.

Level 3 Assets or liabilities for which significant valuation assumptions are not readily observable in the market; instruments valued based on the best available data, some of which is internally-developed, and considers risk premiums that a market participant would require.

When determining the fair value measurements for assets and liabilities required or permitted to be recorded at and/or marked to fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability. When possible, the Company looks to active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, the Company looks to market observable data for similar assets and liabilities. Nevertheless, certain assets and liabilities are not actively traded in observable markets and the Company must use alternative valuation techniques to derive a fair value measurement. The Company applied the provisions of SFAS No. 157 in recording its interest rate swap at fair value (Level 2; discussed further in Note 2 herein). The adoption of SFAS No. 157 did not have a material impact on the Company's results of operations or financial condition.

The Company consolidates various ventures that are involved in the ownership and/or development of real estate and records the other partner's interest as a minority interest. In December 2007, the Financial Accounting Standards board issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, which will result in amounts formerly reflected as minority interests be classified as noncontrolling interests, in addition to different accounting requirements for these interests. The Company will adopt SFAS 160 on January 1, 2009. During 2008, certain revisions were also made to EITF D-98, *Classification and Measurement of Redeemable Securities*, which clarified that certain minority interests with redemption provisions which are outside the Company's control, commonly referred to as redeemable minority interests, were within the scope of EITF D-98. Certain venture agreements contain provisions which require the Company to purchase the minority partner's interest at fair value, upon demand on or after a future date. The Company estimated the maximum redemption value of these interests at September 30, 2008 and disclosed such on its condensed consolidated balance sheet. The Company is still evaluating the effect the adoption of SFAS 160 will have on its consolidated financial statements. However, the Company has determined that upon adoption, and in conjunction with the requirements of EITF D-98, an adjustment for the then fair value of redeemable minority interests will be required. This adjustment will ultimately increase the carrying value of redeemable minority interests to the redemption value with a corresponding charge to equity. Under EITF D-98, the Company will have a choice of either accreting redeemable minority interest to its redemption value over the redemption period or recognizing changes in the redemption value immediately as they occur. The Company is currently evaluating these options and has not yet concluded as to which approach it will take.

Table of Contents

Funds From Operations. The following table shows Funds From Operations Available to Common Stockholders (FFO) and the related reconciliation to net income available to common stockholders for the Company. The Company calculated FFO in accordance with the National Association of Real Estate Investment Trusts (NAREIT) definition, which is net income available to common stockholders (computed in accordance with accounting principles generally accepted in the United States (GAAP)), excluding extraordinary items, cumulative effect of change in accounting principle and gains or losses from sales of depreciable property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures to reflect FFO on the same basis.

FFO is used by industry analysts and investors as a supplemental measure of an equity REIT s operating performance. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. Thus, NAREIT created FFO as a supplemental measure of REIT operating performance that excludes historical cost depreciation, among other items, from GAAP net income. The use of FFO, combined with the required primary GAAP presentations, has been fundamentally beneficial, improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful. Company management evaluates the operating performance of its reportable segments based in part on FFO. Additionally, the Company uses FFO and FFO per share, along with other measures, to assess performance in connection with evaluating and granting incentive compensation to its officers and other key employees.

The reconciliation of net income available to common stockholders to funds from operations is as follows (\$ in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Net Income Available to Common Stockholders	\$ 6,978	\$ 7,849	\$ 11,728	\$ 22,651
Depreciation and amortization:

Table of Contents**Liquidity and Capital Resources:*****Financial Condition.***

The Company had a number of projects in its development pipeline at September 30, 2008, as well as one existing office building included in operating properties on its Condensed Consolidated Balance Sheet that will require significant capital to effect leasing and redevelopment activities. Management believes that the Company has the capacity to complete these projects with cash on hand plus availability under its credit facility and construction lines. The Company does not foresee the need to access the capital markets in order to complete its current projects. In addition, the Company is not exposed to significant debt maturities in 2008 or 2009. Management estimates that the Company has the ability to repay these near-term maturities with the availability noted above. The financial condition of the Company is discussed in further detail below.

At September 30, 2008, the Company was subject to the following contractual obligations and commitments (\$ in thousands):

	Total	Less than 1 Year	1-3 Years	4-5 Years	After 5 years
Contractual Obligations:					
Company long-term debt					
Unsecured notes payable and construction loans	\$ 328,634	\$ 4,921	\$ 223,713	\$ 100,000	\$
Mortgage notes payable	524,137	2,228	121,681	251,846	148,382
Interest commitments under notes payable (1)	216,040	50,771	91,723	37,630	35,916
Operating leases (ground leases)	15,182	93	194	204	14,691
Operating leases (all other)	830	405	381	44	
Total contractual obligations	\$ 1,084,823	\$ 58,418	\$ 437,692	\$ 389,724	\$ 198,989
Commitments:					
Letters of credit	\$ 4,567	\$ 4,567	\$	\$	\$
Performance bonds	7,703	6,450	1,253		
Estimated development commitments	162,147	100,193	58,433	3,521	
Unfunded tenant improvements	5,810	5,810			
Total commitments	\$ 180,227	\$ 117,020	\$ 59,686	\$ 3,521	\$

(1) Interest on variable rate obligations is based on rates effective as of September 30, 2008.

The Company maintains an interest rate swap agreement with a notional amount of \$100 million in order to manage its interest rate risk under the Term Facility. This swap was designated as a cash flow hedge and effectively fixes the underlying LIBOR rate of the Term Facility at 5.01%. The interest rate on the Term Facility is equal to LIBOR plus a spread, as defined by the term loan agreement. At September 30, 2008, the spread over LIBOR was

0.90%. The fair value of the interest rate swap agreement at September 30, 2008 was a liability of approximately \$4.5 million, which is recorded in accounts payable and accrued liabilities on the Condensed Consolidated Balance Sheet. The change in value of the interest rate swap is recorded in Accumulated Other Comprehensive Income (OCI), which is included in the equity section of the Condensed Consolidated Balance Sheet. Ineffectiveness is analyzed on a quarterly basis and is recorded in the Condensed Consolidated Statements of Income. There was no ineffectiveness in the nine months ended September 30, 2008.

Subsequent to quarter-end, the Company entered into two interest rate swap agreements with notional amounts of \$75 million each in order to manage interest rate risk associated with floating-rate LIBOR-based borrowings. These swaps were designated as cash flow hedges and effectively fix a portion of the underlying LIBOR rate on Company borrowings one at 2.995% and the other at 2.69%. Payments made or received under the interest rate swap agreements will be recorded in interest expense on the Condensed Consolidated Statements of Income. The Company will not be utilizing the shortcut method of accounting for these instruments and will follow the hypothetical derivative method as outlined in the Derivative Implementation Group's No. G7, *Cash Flow*

Table of Contents

Hedges: Measuring the Ineffectiveness of a Cash Flow Hedge under Paragraph 30(b) when the Shortcut Method is not Applied. The change in value of the interest rate swaps will be recorded in OCI, which is included in the equity section of the Condensed Consolidated Balance Sheet. Ineffectiveness will be analyzed on a quarterly basis and any ineffectiveness recorded in the Condensed Consolidated Statements of Income.

As of September 30, 2008, the Company had \$221.0 million drawn on its \$500 million credit facility and had \$54.6 million in cash and cash equivalents. The amount available under this credit facility is reduced by outstanding letters of credit, which were approximately \$4.6 million at September 30, 2008. These amounts are available to fund operations, ongoing development activities and capital expenditures, among other things. The Company's interest rate on its credit facility is LIBOR plus a spread based on certain of the Company's ratios and other factors, and interest is due periodically as defined by the loan agreement. As of September 30, 2008, the spread over LIBOR for the credit facility was 0.95%.

The Company expects its credit facility and cash on hand to be the primary funding source for its contractual obligations and commitments in the near term. The Company may obtain long-term mortgage debt on some of its recently developed, unencumbered assets, to the extent available and with acceptable terms, to help fund its commitments.

In June 2008, the Company repaid its mortgage note secured by Lakeshore Park Plaza. In July 2008, the Company executed a new, non-recourse mortgage loan for \$18.4 million secured by the Lakeshore Park Plaza property. This loan matures August 1, 2012 and bears interest at 5.89%.

Additional Financial Condition Information

The Company's mortgage debt is primarily non-recourse fixed-rate mortgage notes secured by various real estate assets. Many of the Company's non-recourse mortgages contain covenants which, if not satisfied, could result in acceleration of the maturity of the debt. The Company expects that it will either refinance the non-recourse mortgages at maturity or repay the mortgages with proceeds from other financings.

As of September 30, 2008, the weighted average interest rate on the Company's consolidated debt was 5.87%, and the Company's consolidated debt to total market capitalization ratio was 37.25%.

The Company may also generate capital through the issuance of securities that includes, but is not limited to, common or preferred stock under an existing shelf registration statement. As of September 30, 2008, the Company had approximately \$100 million available for issuance under this registration statement.

Over the long term, the Company will continue to actively manage its portfolio of income producing properties and strategically sell assets to capture value for stockholders and to recycle capital for future development activities. The Company expects to utilize indebtedness to fund future commitments and to place long-term permanent mortgages on selected assets as well as utilize construction facilities for other development assets. The Company may enter into additional joint venture arrangements to help fund future developments and may enter into additional structured transactions with third parties. While the Company does not presently foresee the need to issue common equity in the future, it will evaluate all public equity sources and select the most appropriate options as capital is required.

The Company's business model is dependent upon raising capital to meet development obligations. If one or more sources of capital are not available when required, the Company may be forced to raise capital on potentially unfavorable terms which could have an adverse effect on the Company's financial position or results of operations.

Table of Contents***Cash Flows.***

Cash Flows from Operating Activities. Net cash provided by operating activities increased \$3.8 million between the nine months ended September 30, 2007 and the corresponding 2008 period. This increase is a result of higher cash flows from operating properties, offset by an increase in interest paid. See rental property revenues and operating expenses sections above for a discussion of the properties which contributed to the increase in cash flows from operating activities and the interest expense section for a discussion of that increase. Further offsetting the increase in cash provided by operating activities was an increase in multi-family development expenditures due to the construction of the Company's 10 Terminus Place condominium project in Atlanta, Georgia.

Cash Flows from Investing Activities. Net cash used in investing activities decreased \$100.5 million between the nine months ended September 30, 2007 and the corresponding 2008 period. Property acquisition and development expenditures decreased \$100.9 million between the 2007 and 2008 periods due to fewer projects under development. Distributions from unconsolidated joint ventures in excess of income increased \$22.9 million primarily due to increased distributions from TRG from the closing of substantially all of its condominium units in 2008. Also, expenditures for other assets decreased \$7.5 million primarily due to a decrease in capitalized predevelopment expenditures and lease inducements paid during the 2007 period. These decreases were partially offset by the \$19.3 million in cash received in 2007 as additional consideration related to the 2006 formation of CP Venture IV LLC. Additionally, contributions to the Company's unconsolidated joint ventures increased \$13.6 million, primarily due to construction-related funding of the Palisades West LLC office buildings in 2008.

Cash Flows from Financing Activities. Net cash provided by financing activities decreased \$61.0 million between the nine months ended September 30, 2007 and the corresponding 2008 period. Proceeds from other notes payable decreased \$144.0 million as a result of the 2007 financing of its American Cancer Society Center property and refinancing of its non-recourse mortgage note payable secured by the 100 and 200 North Point Center Office buildings, totaling \$161.0 million. In 2008, the Company obtained new financing on its Lakeshore Park Plaza mortgage note for approximately \$18.4 million. Repayments of other notes payable decreased by \$13.7 million, primarily due to the repayment of the previous Lakeshore Park Plaza mortgage note in 2008 of \$8.8 million versus the repayment of \$22.4 million in 2007 related to the refinancing of its non-recourse mortgage note payable secured by the 100 and 200 North Point Center Office buildings. The net borrowings under the Company's credit, term and construction facilities increased in 2008 by \$64.5 million, due primarily to the Company obtaining proceeds in 2007 by means other than its facility (as discussed above in other notes payable), and due to the Company drawing on its facility to maintain a higher level of cash on hand. Common stock issued, net of expenses, decreased \$4.1 million due to a decrease in options exercised under the Company's stock option plans. Partially offsetting the decreases in net cash provided by financing activities was the purchase of approximately \$7.7 million of treasury stock in 2007, with no purchases in the 2008 comparable period.

Dividends. During the nine months ended September 30, 2008, the Company paid common and preferred dividends of \$68.4 million, which it funded with cash provided by operating activities, proceeds from investment property sales and distributions from unconsolidated joint ventures in excess of income. During the 2007 period, the Company paid common and preferred dividends of \$69.1 million which it funded with cash provided by operating activities, proceeds from investment property sales and proceeds from venture formation. For the foreseeable future, the Company intends to fund its quarterly distributions to common and preferred stockholders with cash provided by operating activities, proceeds from investment property sales, distributions from unconsolidated joint ventures, and indebtedness, if necessary. The Company reviews, on a quarterly basis, the amount of

Table of Contents

the common dividend in light of current and projected future cash flows from the sources noted above, as well as requirements to maintain its REIT status.

Off Balance Sheet Arrangements

The Company has a number of off balance sheet joint ventures with varying structures. At September 30, 2008, the Company's unconsolidated joint ventures had aggregate outstanding indebtedness to third parties of approximately \$425.3 million of which the Company's share was \$187.7 million. These loans are generally mortgage or construction loans, most of which are non-recourse to the Company. Also, in certain instances, the Company provides non-recourse carve-out guarantees on these non-recourse loans. The Company also has certain guarantees for the repayment of the debt at the CF Murfreesboro Associates and Glenmore Garden Villas LLC ventures, and performance and repayment guarantees at its Terminus 200 LLC venture. See the Company's Annual Report on Form 10-K for the year ended December 31, 2007 for detailed information on these guarantees. An estimate of the liability associated with these guarantees was made upon entering into the guarantee, and there have been no material changes in the Company's estimated liability related to these guarantees in the nine months ended September 30, 2008. The unconsolidated joint ventures also had performance bonds, which the Company guarantees, totaling approximately \$2.3 million at September 30, 2008.

Several of these ventures are involved in the acquisition and development of real estate. As capital is required to fund the acquisition and development of this real estate, the Company must fund its share of the costs not funded by operations or outside financing. As of September 30, 2008, the Company had approximately \$79.2 million in estimated construction commitments for its office and retail unconsolidated joint ventures, anticipated to be funded by partner contributions or outside financing at the venture level. The Company also estimates there will be further acquisition and development expenditures at certain of its residential joint ventures. Based on the nature and timing of activities conducted in these ventures, management cannot estimate with any degree of accuracy amounts that the Company may be required to fund in the short or long-term. However, management does not believe that additional funding of these ventures will have a material adverse effect on its financial condition or results of operations.

Critical Accounting Policies

There has been no material change in the Company's critical accounting policies from those disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. Further description of the Company's analysis of impairment of long-lived assets is as follows:

The Company routinely evaluates its investments in real estate assets on a property by property basis for recoverability. These analyses require significant judgment on the part of management. For assets that are consolidated by the Company, a determination of the intent and ability to hold these assets factors into the type of analyses it performs. If an asset is considered as held-for-use, as described in SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the recoverability of the asset is assessed based on the undiscounted cash flows to be generated by the asset. If the undiscounted cash flows are less than the carrying value of the asset, the impairment loss is measured as the amount by which the carrying amount exceeds its fair value. If an asset is considered to be held-for-sale, as described in SFAS No. 144, the asset is carried at the lower of its carrying amount or fair value less cost to sell. The Company also evaluates the recoverability of its investments in joint ventures using guidelines in Accounting Principles Board (APB) No. 18, *The Equity Method of Accounting for Investments in Common Stock*. Under these rules, if an indicator of impairment exists, the impairment is calculated based on the excess of the carrying value of the investment over the fair value. This impairment is recognized if it is determined to be other-than-temporary.

The Company performs its valuation assessments for real estate based on current market conditions and utilizing assumptions which could differ materially from actual results. These assumptions are highly subjective and susceptible to frequent change. A listing of some common inputs in our analyses are described in the following paragraph.

Table of Contents

The Company estimates rental rates it believes it can obtain at certain properties in the future, cash outlays to generate leases, market capitalization rates for residual values and other estimates. For properties it intends to sell, such as residential developments, sales prices, costs to complete development, carry costs, competitive projects, and other such items are evaluated. Given the current state of the economy and market for real estate, the timing of a market turnaround is a significant estimate and one that requires considerable judgment. Company management reviews similar products in the market in which its assets are held and adjusts its hold period, sales volume, pricing, and other factors as it feels necessary. The cyclical nature of the real estate industry, combined with the current credit market difficulties, availability of existing inventories in the locations of the Company's assets, consumer confidence, retailer health, employment levels and additional factors, all enter into management's judgment while assessing the recoverability of its assets. In addition, the expected use of the Company's assets could change over the coming periods as more information on the market turnaround is obtained. In addition, the discount rates utilized to estimate the fair value of assets can vary greatly on the risk associated with the asset, which normally is affected by the type of project, the stage of its life cycle, and the location of the asset, which can materially change the results of the calculation if that discount rate changes.

A change in any of the factors mentioned above could result in an impairment charge in the future on the Company's real estate assets or investments in joint ventures. Management does not believe any of its assets require an impairment charge at this time, but will continue to monitor the state of the economy and the expected results of its assets.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See additional discussion related to the Company's market risk for its notes payable and notes receivable in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

The market for fixed and variable rate debt of the type in which the Company enters has changed in recent months. The Company estimates that the interest rates it would incur under current market conditions if it were to enter into similar financial instruments would be higher in today's market than the rates obtained on loans closed in recent years. The Company also has certain variable rate debt, where it pays a spread above a reference rate, which is typically LIBOR. The Company believes the spread that it would incur above the variable rate would be higher if it entered into similar debt agreements in today's market. In addition, the Company believes that the loan-to-value ratio that it has received in previous debt arrangements is higher than what the Company would be able to obtain in today's marketplace.

The Company has mitigated a portion of its exposure to interest rate risk by entering into interest rate swaps. The Company currently has a swap in place on its variable rate Term Facility. Subsequent to quarter end, the Company entered into two \$75 million interest rate swaps against its floating-rate, LIBOR-based borrowings. All of these swaps are with Bank of America, and the Company does not believe it has significant counterparty risk under these swaps.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management's control objectives. We also have investments in certain unconsolidated entities. As we do not always control or manage these entities, our disclosure controls and procedures with respect to such

Table of Contents

entities are necessarily more limited than those we maintain with respect to our consolidated subsidiaries.

As of the end of the period covered by this quarterly report, we carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer along with the Chief Financial Officer, of the effectiveness, design and operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15(b) and 15d-15(b). Based upon the foregoing, the Chief Executive Officer along with the Chief Financial Officer concluded that our disclosure controls and procedures are effective at providing reasonable assurance that all material information required to be included in our Exchange Act reports is reported in a timely manner. In addition, based on such evaluation we have identified no changes in our internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

The Company is subject to routine actions for negligence and other claims and administrative proceedings arising in the ordinary course of business, some of which are expected to be covered by liability insurance and all of which collectively are not expected to have a material impact on the financial condition or results of operations of the Company.

Item 1A. Risk Factors

There has been no material change in the Company's risk factors from those outlined in Item 1A in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table contains information about the Company's purchases of its equity securities during the third quarter of 2008:

	PURCHASES RELATED TO OPTIONS		TREASURY STOCK PURCHASES		
	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (1)	Average Price Paid Per Share	Maximum Number of Shares That May Yet Be Purchased Under Plan (1)
July 1 - 31				\$	4,121,500
August 1 - 31					4,121,500
September 1 - 30					4,121,500
Total				\$	4,121,500

(1) On May 9, 2006, the Board of Directors of the Company authorized a

stock repurchase plan, which expires May 9, 2009, of up to 5,000,000 shares of the Company's common stock. The Company has purchased 878,500 shares under this plan, and no purchases occurred during the third quarter of 2008.
