Notes to Editors

The detailed results of the capital exercise as well as information on RBS exposures to central, regional and local governments in the EEA are available via the link below.

Background on the EBA capital exercise

The EBA Recommendation on the creation of temporary capital buffers to restore market confidence was adopted by the Board of Supervisors on 8 December 2011 to address the difficult situation in the EU banking system, especially with regard to the sovereign exposures, by restoring stability and confidence in the markets. The Recommendation was part of a suite of measures agreed at EU level.

The Recommendation called on National Authorities to require banks included in the sample to strengthen their capital positions by building up an exceptional and temporary buffer such that their Core Tier 1 capital ratio reaches a level of 9% by the end of June 2012. In addition, banks were required to hold an exceptional and temporary capital buffer against sovereign debt exposures to reflect market prices as at the end of September 2011. The amount of the sovereign capital buffer has not been revised.

The initial sample of the Capital Exercise included 71 banks. However, the 6 Greek banks were treated separately as the country is currently under an EU/IMF assistance programme. Moreover, four banks (Österreichische Volksbank AG, Dexia, WestLB AG and Bankia) from the original sample have been identified as undergoing a significant restructuring process, and are being monitored separately. Therefore, the final assessment published today refers to 61 banks.
