SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER

PURSUANT TO RULE 13a-16 OR 15d-16

UNDER THE SECURITIES EXCHANGE ACT OF 1934

FOR THE MONTH OF December 2003

COMMISSION FILE NUMBER: 1-07628

HONDA GIKEN KOGYO KABUSHIKI KAISHA

(Name of registrant)

HONDA MOTOR CO., LTD.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

(Translation of registrant's name into English)

1-1, Minami-Aoyama 2-chome, Minato-ku, Tokyo 107-8556, Japan

(Address of principal executive officers)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

Form 20-F * Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

**Honda Announces Development of
HF118 Turbofan Aircraft Engine**

December 16, 2003 Honda Motor Co., Ltd. announced today the development of its compact, lightweight, fuel-efficient, low-emission HF118 Turbofan Engine for the HondaJet Honda's experimental business jet.

Honda used its proprietary computational fluid dynamics software to optimize airflow within the compact engine, maximizing performance. The engine's simple, high-performance combustion chamber keeps emission levels low enough to meet the requirements of anticipated standards for compact jets.

On the basis of electronic control technology originally developed for automotive applications, Honda has created the first ultra-compact Full Authority Digital Electronic Control (FADEC) system for this class of engine, which provides superior engine operation and reliability without variable mechanisms.

Development of this engine began in 1999, and it has been submitted to comprehensive testing, including required tests such as the 150-hour endurance test. The engine has now logged more than 110 hours of flight-testing on other manufacturers' aircraft, confirming its reliability.

Key Specifications

Engine Type	2-Spool Turbofan		
	One-Stage Fan, Two-Stage Compressor, Two-Stage Turbine		
Take-off thrust	757 kgf (1,670 lbf)	Take-off fuel consumption	0.49 kg/hr/kgf (0.49 lb/hr/lbf)
Cruise thrust	191 kgf (420 lbf)	Cruising fuel consumption	0.75 kg/hr/kgf (0.75 lb/hr/lbf)
Dry weight	178 kg (392 lb)	Bypass ratio	2.9
Fan diameter	441 mm (17.4 inches)	Total length	1,384 mm (54.5 inches)

Flight Tests of Honda Experimental Business Jet Begin

December 16, 2003 Honda Motor Co., Ltd. announced today that the HondaJet, its new experimental compact business jet equipped with Honda-developed HF118 jet engines, successfully completed initial flight tests this month at Piedmont Triad Airport in North Carolina, US.

Compared with conventional jets, this experimental aircraft offers superior fuel efficiency and remarkable cabin space. The engines are optimally positioned on the upper surface of the main wing in a unique configuration that reduces drag at high speeds and increases cruising efficiency. This layout also eliminates the need for structural engine mounts in the fuselage, creating over 30% more cabin space than in a conventional aircraft.

The fuselage is a compact and lightweight co-cured carbon composite structure, yet realizes the largest cabin in its class. The main wing, which features aluminum skin panels formed from single sheets of aluminum that provide a smoother surface than conventional wing configurations, along with Honda's proprietary turbulence-reducing laminar airfoil, work together to significantly improve aerodynamic performance. Additional drag-reducing technologies include the fuselage nose, which is designed to generate laminar flow. These features, in combination with Honda's fuel-efficient HF118 Turbofan Engine, achieve fuel efficiency over 40% higher than conventional aircraft.

The HondaJet taking off

The HondaJet on the ground

This experimental aircraft is also outfitted with a state-of-the-art glass cockpit with an integrated avionics system, as well as an autopilot function, anti-icing equipment, and other systems. The jet is scheduled to undergo approximately 200 hours of flight-testing to demonstrate and verify the operability and performance characteristics of its various systems.

Honda began research into compact business jets in 1986, using engines provided by other manufacturers. The HF118 Turbofan Engine-equipped HondaJet experimental compact jet is the first Honda developed aircraft to be outfitted with a Honda engine, a milestone of significance for the company and the industry.

Table of Contents

Main Specifications

Provisional name	HondaJet
Seating	6 (2 crew + 4 passengers or 1 + 5)
Engine	Honda HF118 Turbofan Engine
Maximum take-off thrust (kgf (lbf))	757 (1,670) x 2
Maximum take-off weight (kgf (lbf))	4,173 (9,200)
Length x width x height (m (ft))	12.5 x 12.2 x 4.1 (41.1 x 39.9 x 13.2)
Maximum speed (km/hr (knots))	778 (420)
Service ceiling (m(ft))	12,497 (41,000)
Range (km (nm))	2,037 (1,100)
Fuel consumption (km/kg (nm/lb))	3.3 (0.8)
Take-off distance (m (ft))	807 (2,647)
Landing distance(m (ft))	694 (2,277)

Table of Contents

=Supplement=

<New Technologies Employed in the HondaJet>

Honda SMH-1 Natural Laminar Flow Wing Section

Wing shape test on T-33 aircraft

IR analysis of air flow

Honda's proprietary SMH-1 achieves low drag and excellent performance at high speeds despite its relative thickness.

Laminar Flow Nose Section

The optimal design of the fuselage nose generates a laminar flow that reduces drag on the fuselage.

Visualization of flow around the nose section during a wind tunnel test

Over-the-Wing Engine - Mount

Optimal placement of the engine nacelles over the main wing improves aerodynamic performance at high speeds.

Computer - calculated pressure distribution around the over-the-wing mounted engine

Co-cured Composite Fuselage

The co-cured composite and honeycomb sandwich structure combine to create a new composite structure that enables Honda to develop a lightweight fuselage with more interior space.

Strength testing of the co - cured composite material

Aluminum Main Wing

The use of an integrally stiffened skin produces a smooth wing surface that promotes laminar flow.

Structural configuration of the aluminum main wing

Glass Cockpit

The aircraft is equipped with a state-of-the-art Garmin G1000 glass cockpit system. Information is efficiently presented on flat-panel flight displays.

Honda Strengthens Function of Regional Operation Center in China

Tokyo, December 17, 2003 Honda Motor Co., Ltd. today announced that it will establish a new wholly-owned subsidiary in China Honda Motor (China) Investment Co., Ltd. with the objective of strengthening the function of its regional operation center there. The new company will be responsible for developing Honda's overall business strategy in China and representing Honda group companies in various areas including corporate communications, and intellectual property management. The company is expected to begin operations in February 2004.

Honda currently has 11 joint ventures and subsidiaries in China for its motorcycle, automobile and power equipment businesses. In April 2003, Honda established its sixth regional operation worldwide in order to manage Honda's growing operations in China more comprehensively. The new company will consolidate the regional headquarters functions and ensure that management decision-making is deeply-rooted in local market conditions and the needs of the customer. This strategy enables Honda to optimize its businesses to respond quickly to changes in the business environment of this rapidly growing market.

The new company will serve as a holding company with various stakes in each Honda company in China. In this way, the company can make timely decisions on the allocation of business resources within the region. The specific investment of Honda Motor (China) Investment Co. in each business subsidiary is to be determined.

Since 1994, Honda managed its global operations through a matrix system including both regional operations and its major business line operations. Under this system, Honda's six regional operations Japan, North America, South America, Europe, Asia/Oceania, and China are empowered to make strategic decisions in various business areas including product line-up, manufacturing, sales and investments. At the same time, headquarters functions for each business line automobile, motorcycle, power equipment, and parts make cross-regional decisions and strategic adjustments to optimize the efficiency of Honda operations globally.

About the new company

Name of company:	Honda Motor (China) Investment Co., Ltd.
Establishment:	January, 2004 (tentative)
Start of operations:	February, 2004 (tentative)
Capital:	US\$30million
Shareholder:	100% owned by Honda Motor Co., Ltd.
Representative (CEO):	Atsuyoshi Hyogo
Location:	Beijing, China
Number of associates:	approximately 35

Honda Overseas Production Up 5.5% In November

December 25, 2003 Honda Motor Co., Ltd., announced today that overseas production grew 5.5% in November, mostly because of increased output in Asia. It was the 35th consecutive month of overseas production increases at Honda. For the first 11 months of 2003, overseas production is up 17.8%, predominantly due to a surge of 59.2% in Asia-based production.

November's domestic sales fell 22.1% overall, but sales of mini-vehicles were up 18.5%, the second consecutive monthly increase. Honda's Life mini-vehicle (17,692 units) was the best seller, followed by Fit (11,116), the new Odyssey (6,643 units).

Exports in November were down 19.9%, the fifth straight month of decline, because of decreased shipments to North America.

Honda Fit Meets 2005 Emission Regulations

December 25, 2003 Honda Motor Co., Ltd. has announced that the 1.3L version of the Fit, a car widely acclaimed for its advanced packaging, excellent fuel economy, innovative styling, and popularity amongst a broad age range of customers, has been certified as achieving emission levels which are 75% lower («««« low emission vehicle), than the 2005 emission regulation standards established by the Japanese Ministry of Land, Infrastructure and Transport. This Fit model will be on sale at Honda automobile dealerships nationwide from January 13, 2004.

The Fit 1.5L version has been certified as achieving emission level 50% lower (««« low emission vehicle), than the 2005 standards realizing extremely high environmental friendly emission levels for the Fit lineup.

In addition to the Fit, the Honda Inspire and Odyssey^{T1} models are certified as («««« low emission vehicle) and the Life and Stream^{T2} models are certified as (««« low emission vehicle). By the end of the first half of 2004, Honda plans to bring its entire automobile lineup in compliance with the 2005 emission regulations realizing an even broader lineup of environmentally friendly vehicles.

Table of Contents**EXPLANATORY NOTES**

Honda Motor Co., Ltd. and Subsidiaries

1. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States because the Company has issued American Depositary Receipts listed on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission. All segment information, however, is prepared in accordance with a Ministerial Ordinance under the Securities and Exchange Law of Japan.

2. The average exchange rates for the fiscal second quarter ended September 30, 2003 were ¥117.60=U.S.\$1 and ¥132.26=euro1. The average exchange rates for the corresponding period last year were ¥119.24=U.S.\$1 and ¥117.32=euro1.

3. United States dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥111.25=U.S.\$1, the mean of the telegraphic transfer selling exchange rate and the telegraphic transfer buying exchange rate prevailing on the Tokyo foreign exchange market on September 30, 2003.

4. The Company's Common Stock-to-ADR exchange rate was changed from two shares of Common Stock to one ADR to one share of Common Stock to two ADRs, effective January 10, 2002.

5. The Company has adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 130, Reporting Comprehensive Income. The following table represents components of the Company's comprehensive income. Other comprehensive income (loss) consists of changes in adjustments from foreign currency translation, net unrealized gains on marketable equity securities and minimum pension liabilities adjustment.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

These forecasts are based on the assumption that the exchange rates for the yen to the U.S. dollar and the euro for the current fiscal year will average ¥115 and ¥127, respectively. This announcement contains forward-looking statements within the meaning of Section 21E of the U.S. Securities Exchange Act of 1934. Honda's actual results could materially differ from those contained in these forward-looking statements as a result of numerous factors outside of Honda's control. Such factors include general economic conditions in Honda's principal markets, and foreign exchange rates between the Japanese yen and other major currencies, as well as other factors detailed from time to time in Honda's reports filed with the U.S. Securities and Exchange Commission.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

For the six months ended September 30, 2002 and 2003 and the year ended March 31, 2003

(1) General and Summary of Significant Accounting Policies

(a) Financial Statements

The accompanying semiannual consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (such as Accounting Principles Board Opinions and Statements of Financial Accounting Standards), which is permitted by Regulations Concerning Terminology, Forms and Preparation methods of Semiannual Consolidated Financial Statements (Ordinance of Ministry of Finance No. 24 of 1999), Article 81. In addition, the segment information is prepared based on the Regulations Concerning Terminology, Forms and Preparation methods of Semiannual Consolidated Financial Statements (Ordinance of Ministry of Finance No. 24 of 1999), Article 14. In the opinion of management, all adjustments which are necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results which may be expected for any other interim period or for the year. For further information, refer to the March 31, 2003 consolidated financial statements and notes thereto included in Honda Motor Co., Ltd. and Subsidiaries Annual Report for the year ended March 31, 2003. Consolidated financial statements ended March 31, 2003 are derived from the audited consolidated financial statements, while consolidated financial statements ended September 30, 2002 and 2003 are unaudited.

(b) Description of Business

Honda Motor Co., Ltd. (the Company) and its subsidiaries (collectively Honda) develop, manufacture, distribute and provide financing for the sale of its motorcycles, automobiles and power products. Honda's manufacturing operations are principally conducted in 25 separate factories, 5 of which are located in Japan. Principal overseas manufacturing facilities are located in the United States of America, Canada, the United Kingdom, France, Italy, Spain, India, Pakistan, the Philippines, Thailand, Vietnam, Brazil and Mexico.

Net sales and other operating revenue by category of activity for the 6 months ended September 30, 2003 were derived from: motorcycle business 11.8%, automobile business 81.2%, financial services 3.1%, and power product and other businesses 3.9%. Operating income by category of activity for the 6 months ended September 30, 2003 was derived from: motorcycle business 2.7%, automobile business 82.4%, financial services 13.5%, and power product and other businesses 1.4%.

Honda sells motorcycles, automobiles and power products in most countries in the world. For the 6 months ended September 30, 2003, 78.4% of net sales and other operating revenue (¥3,154,349 million) was derived from subsidiaries operating outside Japan (2002: ¥2,864,466 million). Net sales and other operating revenue for the 6 months ended September 30, 2003 was geographically broken down based on the location of customers as follows: Japan 18.6%, North America 57.4%, Europe 9.4%, Asia 9.9% and others 4.7%. For the 6 months ended September 30, 2003, 73.6% of operating income (¥222,154 million) was generated from foreign subsidiaries, disregarding the effect of elimination of unrealized profits between domestic operations and foreign operations (2002: ¥224,377 million).

(c) Basis of Presenting Consolidated Financial Statements

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan, and its foreign subsidiaries generally maintain their books of account in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein have been prepared in a manner and reflect the adjustments which are necessary to conform them with accounting principles generally accepted in the United States of America.

(Continued)

Table of Contents

2

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(d) Consolidation Policy

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. Investments in 20% to 50% owned affiliates in which the Company has the ability to exercise significant influence over their operating and financial policies are stated at their underlying equity value.

Minority interests in net assets and income are not significant and, accordingly, are not presented separately in the accompanying consolidated balance sheets and statements of income.

(e) Use of Estimates

Management of Honda has made a number of estimates and assumptions relating to the reporting of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities to prepare these consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. Significant items subject to such estimates and assumptions include allowance for credit losses, allowance for losses on lease residual values, valuation allowance for inventories and deferred tax assets, impairment of long-lived assets, product warranty, and assets and obligations related to employee benefits. Actual results could differ from those estimates.

(f) Revenue Recognition

Sales of manufactured products are recognized when persuasive evidence of an arrangement exists, delivery has occurred, title and risk of loss have passed to the customers, the sales price is fixed or determinable, and collectibility is probable. Revenues are recognized net of discounts, cash sales incentives and rebates granted.

Interest income from finance receivables is recognized using the interest method. Finance receivable origination fees and certain direct origination costs are deferred, and the net fee or cost is recognized using the interest method over the contractual life of the finance receivables.

Finance subsidiaries of the Company periodically sell finance receivables. Gain or loss is recognized equal to the difference between the cash proceeds received and the carrying value of the receivables sold and is recorded in the period in which the sale occurs. Honda allocates the recorded investment in finance receivables between the portion(s) of the receivables sold and portion(s) retained based on the relative fair values of those portions on the date the receivables are sold. Honda recognizes gains or losses attributable to the change in the fair value of the retained

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

interests, which are recorded at estimated fair value and accounted for as trading securities. Honda determines the value of the retained interest by discounting the future cash flows. Those cash flows are net of estimated credit losses and are discounted at a rate which Honda believes is commensurate with the risks involved. A servicing asset or liability is amortized in proportion to and over the period of estimated net servicing income. Servicing assets and servicing liabilities at September 30, 2002 and 2003 and March 31, 2003 were not significant.

3

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(g) Cash Equivalents

Honda considers all highly liquid debt instruments with an original maturity of three months or less to be cash equivalents.

(h) Inventories

Inventories are stated at the lower of cost, determined principally by the first-in, first-out method, or market.

(i) Investments in Securities

Honda classifies its debt and equity securities in one of three categories: available-for-sale, trading, or held-to-maturity. Debt securities that are classified as held-to-maturity securities are reported at amortized cost. Debt and equity securities classified as trading securities are reported at fair value, with unrealized gains and losses included in earnings. Other debt and equity securities are classified as available-for-sale securities and are reported at fair value, with unrealized gains or losses, net of deferred taxes included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets. Honda did not hold any trading securities at September 30, 2002 or 2003 or March 31, 2003, except for retained interests in the sold pools of finance receivables, which are accounted for as trading securities and included in finance receivables. Honda did not hold any held-to-maturity securities at September 30, 2002 or 2003 or March 31, 2003.

(j) Goodwill

On April 1, 2002, Honda adopted Statement of Financial Accounting Standards (SFAS) No. 142, "Goodwill and Intangible Assets" and ceased amortizing its goodwill at that time. SFAS No. 142 requires that goodwill be not amortized, but instead be tested for impairment at least annually. Honda completed its transitional impairment test of goodwill effective April 1, 2002 and its annual test effective March 31, 2003 as prescribed by SFAS No. 142 and concluded no impairment needed to be recognized. The carrying amount of goodwill at September 30, 2002 and 2003 and March 31, 2003 were ¥15,809 million, ¥17,532 million and ¥15,566 million, respectively.

(k) Depreciation

Depreciation of property, plant and equipment is calculated principally by the declining-balance method based on estimated useful lives of the respective assets.

The estimated useful lives used in computing depreciation of property, plant and equipment are as follows:

<u>Asset</u>	<u>Life</u>
Buildings	Up to 50 years
Machinery and equipment	2 to 20 years

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(l) Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of

Honda applies the provisions of Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets .

Honda's long-lived assets and certain identifiable intangibles having finite useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows (undiscounted and without interest charges) expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value less costs to sell.

(m) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date.

(n) Product-Related Expenses

Advertising and sales promotion costs are expensed as incurred. Provisions for estimated costs related to product warranty are made at the time of sale. Estimated warranty expenses are provided based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs. Included in warranty expenses accruals are costs for general warranties on vehicles Honda sells, product recalls and service actions outside the general warranties.

(o) Basic Net Income per Common Share

Basic net income per common share has been computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during each period. The weighted average number of common shares outstanding during the 6 months ended September 30, 2002, 2003 and for the year ended March 31, 2003 was 973,972,176, 959,257,426 and 970,952,677, respectively. There

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

were no potentially dilutive shares outstanding during the 6 months ended September 30, 2002 or 2003 or for the year ended March 31, 2003.

Table of Contents

5

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(p) Foreign Currency Translation

Foreign currency financial statement amounts are translated into Japanese yen on the basis of the period-end rate for all assets and liabilities and the weighted average rate for the period for all income and expense amounts. Translation adjustments resulting therefrom are included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets.

(q) Derivative Financial Instruments

The Company and certain of its subsidiaries have entered into foreign exchange agreements and interest rate agreements to manage currency and interest rate exposures. These instruments include foreign currency forward contracts, currency swap agreements, currency option contracts and interest rate swap agreements.

Honda applies the provisions of Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities and SFAS No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities, an amendment of FASB Statement No. 133. Both standards establish accounting and reporting standards for derivative instruments and for hedging activities, and require that an entity recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value. Changes in the fair value of derivatives are recorded each period in current earnings or other comprehensive income (loss), depending on whether a derivative is designated as part of a hedge transaction and the type of hedge transaction. The ineffective portion of all hedges is immediately recognized in earnings.

Because Honda has not elected to apply hedge accounting subsequent to the adoption of SFAS No.133 and SFAS No. 138, changes in the fair value of its derivative instruments are recognized in earnings in the period of the change. The amount recognized in earnings included in other expenses other during the 6 months ended September 30, 2002 and for the year ended March 31, 2003 were ¥31,929 million and ¥19,910 million, respectively, while included in other income other during the 6 months ended September 30, 2003 was ¥67,937 million.

(r) Shipping and Handling Costs

Shipping and handling costs are included in selling, general and administrative expenses, and are charged to earnings as incurred.

Notes to Consolidated Financial Statements

(s) New Accounting Pronouncements

In January 2003, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. (FIN) 46, Consolidation of Variable Interest Entities, an interpretation of ARB No. 51, which clarifies the application of the consolidation rules to certain variable interest entities. FIN 46 established a new multi-step model for the consolidation of variable interest entities when a company has a controlling financial interest based either on voting interests or variable interests. Consolidation based on variable interests is required by the primary beneficiary if the equity investors lack essential characteristics of a controlling financial interest or if the equity investment at risk is not sufficient for the entity to finance its activities without additional subordinated financial support from other parties. FIN 46 also provides disclosure requirements related to investments in variable interest entities, whether or not those entities are consolidated.

On October 9, 2003, the FASB issued FASB Staff Position FIN 46-6 (FSP FIN 46-6), Effective Date of FASB Interpretation No. 46, Consolidation of Variable Interest Entities. FSP FIN 46-6 defers the effective date for applying the provisions of FIN 46 for interests held by public entities in variable interest entities or potential variable interest entities created before February 1, 2003, to the first period ending after December 15, 2003. Honda is required to apply FIN 46 immediately for variable interest entities created subsequent to January 31, 2003, however, there were no significant variable interest entities created after this date that were required to be consolidated by Honda. The initial effect of the adoption of FIN 46 for potential variable interest entities created prior to February 1, 2003, if any, will be reflected as the cumulative effect of a change in accounting principle in Honda's consolidated statement of income for the quarter ending December 31, 2003.

Honda is continuing its analysis of potential variable interest entities created prior to February 1, 2003, which may require consolidations. These potential variable interest entities include special purpose entities, interests in investments accounted for under the equity method, including joint ventures, or cost method of accounting, dealerships, vendors and service providers. Honda believes that the implementation of FIN 46 for these potential variable interest entities is not expected to have a significant effect on Honda's consolidated financial statements.

In January 2003, the Emerging Issues Task Force reached a final consensus on Issue No. 03-2 Accounting for the Transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities (EITF 03-2). EITF 03-2 addresses accounting for a transfer to the Japanese government of a substitutional portion of an Employees' Pension Fund (EPF) plan, which is a defined benefit pension plan established under the Welfare Pension Insurance Law. EITF 03-2 requires employers to account for the separation process of the substitutional portion from the entire EPF plan (which includes a corporation portion) upon completion of the transfer to the government of the substitutional portion of the benefit obligation and related plan assets. The separation process is considered the culmination of a series of steps in a single settlement transaction. Under this approach, the difference between the fair value of the obligation and the assets required to be transferred to the government should be accounted for and separately disclosed as a subsidy. The Company has not decided whether it will transfer the substitutional portion to the government. Accordingly, the effect on Honda's consolidated financial statements, if any, cannot be determined until a decision is made and the substitutional portion of the benefit obligation and plan assets are transferred to the government.

Notes to Consolidated Financial Statements

(t) Reclassifications

Certain reclassifications have been made to the prior years' consolidated financial statements to conform to the presentation used for the 6 months ended September 30, 2003.

(2) Finance Subsidiaries - Receivables

Finance subsidiaries-receivables represent finance receivables generated by finance subsidiaries. Finance receivables include wholesale financing to dealers and retail financing and direct financing leases to consumers.

The allowance for credit losses is maintained at an amount management deems adequate to cover estimated losses on finance receivables. The allowance is based on management's evaluation of many factors, including current economic trends, industry experience, inherent risks in the portfolio and the borrower's ability to pay.

Finance subsidiaries of the Company purchase insurance to cover a substantial amount of the estimated residual value of vehicles leased to customers. The allowance for losses on lease residual values is maintained at an amount management deems adequate to cover estimated losses on the uninsured portion of the vehicles' lease residual values. The allowance is also based on management's evaluation of many factors, including current economic conditions, industry experience and the finance subsidiaries' historical experience with residual value losses.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

- (c) The fair values of interest rate swap agreements are included in other assets/liabilities and other current liabilities in the consolidated balance sheets as follows:

	Yen		
	(millions)		
	September	September	March
	30, 2002	30, 2003	31, 2003
Other assets	¥ 143	¥ 3,016	¥ 572
Other current liabilities	(52,111)	(32,782)	(43,344)
Other liabilities	(118)	(90)	(154)
	<u>¥ (52,086)</u>	<u>¥ (29,856)</u>	<u>¥ (42,926)</u>

The estimated fair value amounts have been determined using relevant market information and appropriate valuation methodologies. However, these estimates are subjective in nature and involve uncertainties and matters of significant judgement and, therefore, cannot be determined with precision. The effect of using different assumptions and/or estimation methodologies may be significant to the estimated fair value amounts.

The methodologies and assumptions used to estimate the fair values of financial instruments are as follows:

Cash and cash equivalents, trade receivables and trade payables

The carrying amounts approximate fair values because of the short maturity of these instruments.

Finance subsidiaries-receivables

The fair values of retail receivables and term loans to dealers were estimated by discounting future cash flows using the current rates for these instruments of similar remaining maturities. Given the short maturities of wholesale receivables, the carrying amount of such receivables approximates fair value.

Marketable equity securities

The fair value of marketable equity securities was estimated using quoted market prices.

Debt

The fair values of bonds and notes were estimated based on the quoted market prices for the same or similar issues. The fair value of long-term loans was estimated by discounting future cash flows using rates currently available for loans of similar terms and remaining maturities. The carrying amounts of short-term bank loans and commercial paper approximate fair values because of the short maturity of these instruments.

Foreign exchange and interest rate instruments

The fair values of foreign currency forward contracts and foreign currency option contracts were estimated by obtaining quotes from banks. The fair values of currency swap agreements and interest rate swap agreements were estimated by discounting future cash flows using rates currently available for these instruments of similar terms and remaining maturities.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(10) Risk Management Activities and Derivative Financial Instruments

The Company and certain of its subsidiaries are parties to derivative financial instruments in the normal course of business to reduce their exposure to fluctuations in foreign exchange rates and interest rates. Currency swap agreements are used to convert long-term debt denominated in a certain currency to long-term debt denominated in other currencies. Foreign currency forward contracts and purchased option contracts are normally used to hedge sale commitments denominated in foreign currencies (principally U.S. dollars). Foreign currency written option contracts are entered into in combination with purchased option contracts to offset premium amounts to be paid for purchased option contracts. Interest rate swap agreements are mainly used to convert floating rate financing, such as commercial paper, to (normally three-five years) fixed rate financing in order to match financing costs with income from finance receivables. These instruments involve, to varying degrees, elements of credit, exchange rate and interest rate risks in excess of the amount recognized in the consolidated balance sheets.

The aforementioned instruments contain an element of risk in the event the counterparties are unable to meet the terms of the agreements. However, Honda minimizes the risk exposure by limiting the counterparties to major international banks and financial institutions meeting established credit guidelines. Management does not expect any counterparty to default on its obligations and, therefore, does not expect to incur any losses due to counterparty default. Honda generally does not require or place collateral for these financial instruments.

Foreign currency forward contracts and currency swap agreements are agreements to exchange different currencies at a specified rate on a specific future date. Foreign currency option contracts are contracts that allow the holder of the option the right but not the obligation to exchange different currencies at a specified rate on a specific future date. At September 30, 2002 and 2003 and March 31, 2003, the total amounts of foreign currency forward contracts, currency swap agreements and foreign currency option contracts outstanding were ¥851,571 million, ¥857,937 million and ¥1,175,166 million, respectively.

Interest rate swap agreements generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amount. At September 30, 2002 and 2003 and March 31, 2003, the notional principal amounts of interest rate swap agreements were ¥1,892,057 million, ¥2,471,313 million and ¥2,287,736 million, respectively.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(11) Commitments and Contingent Liabilities

At September 30, 2003, Honda had commitments for purchases of property, plant and equipment of approximately ¥35,564 million.

Honda has entered into various guarantee and indemnification agreements. Honda has guaranteed approximately ¥82,330 million of bank loan of employees for their housing costs. If an employee defaults on his/her loan payments, Honda is required to perform under the guarantee. The undiscounted maximum amount of Honda's obligation to make future payments in the event of defaults is approximately ¥82,330 million. As of September 30, 2003, no amount has been accrued for any estimated losses under the obligations, as it is probable that the employees will be able to make all scheduled payments.

Honda warrants its vehicles for specific periods of time. Product warranties vary depending upon the nature of the product, the geographic location of its sale and other factors.

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and reserves. Punitive damages are claimed in certain of these lawsuits. Honda is also subject to potential liability under other various lawsuits and claims. After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the overall results of such lawsuits and pending claims should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position and results of operations.

(12) Leases

Honda has several operating leases, primarily for office and other facilities, and certain office equipment.

Future minimum lease payments under noncancelable operating leases that have initial or remaining lease terms in excess of one year at September 30, 2003 are as follows:

Yen

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

	<u>(millions)</u>
Within one year	¥ 24,608
Over one year	82,904
	<u> </u>
Total minimum lease payments	¥ 107,512

Rental expenses under operating leases for the 6 months ended September 30, 2002 and 2003 and for the year ended March 31, 2003 were ¥25,116 million, ¥24,846 million and ¥46,877 million, respectively.

Explanatory notes:

1. Segmentation of Business

Business segment is based on Honda's business organization and the similarity of the principal products included within each segment as well as the relevant markets for such products.

2. Principal products of each segment

Business	Sales	Principal Products
Motorcycle	Motorcycles, all-terrain vehicles (ATV), personal water craft and relevant parts	Large-size motorcycles, mid-size motorcycles, motorized bicycles, all-terrain vehicles (ATV), personal water craft
Automobile	Automobiles and relevant parts	Compact cars, sub-compact cars, minivehicles
Financial Services	Financial and insurance services	N/A
Power Product & Other businesses	Power products and relevant parts, and others	Power tillers, generators, general purpose engines, lawn mowers, outboard engines

3. The Company changed the title of Other Businesses to Power Product and Other Businesses because the new title results in a better presentation of the Company's business.

Significant Basic Information for Preparation of the Semi-annual Financial Statements

1. Basis of accounting for assets and method of cost determination

(1) Securities

Investments in subsidiaries and affiliates

Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving average method.

Other securities

Marketable securities

Marketable securities classified as other securities are stated at fair value based on market prices at the closing date of the semi-annual period and similar. Any changes in unrealized holding gains or losses, net of applicable income taxes, are included directly in shareholders' equity and the cost of securities sold is determined using the moving average method.

Non-marketable securities

Non-marketable securities classified as other securities are stated at cost, which is determined by the moving average method.

(2) Inventories

Finished goods, auto parts for sale, raw materials, work in process and supplies are stated at the lower of the last purchase cost or market.

(3) Derivative financial instruments

Derivative financial instruments are stated at fair value.

2. Method of depreciation of fixed assets

- (1) Depreciation of tangible fixed assets is computed using the declining-balance method.
- (2) Amortization of intangible assets is computed using the straight-line method. In addition, amortization of software intended for internal use is based on an estimated useful life of 5 years.

Table of Contents

3. Basis of accounting for provisions and reserves

(1) Allowance for doubtful accounts

The allowance for doubtful accounts is provided for possible bad debts at an amount determined based on the historical experience of bad debts for normal receivables, in addition, an estimate of uncollectible amounts is made by reference to specific doubtful receivables from customers which are experiencing financial difficulties.

(2) Accrued product warranty

Accrued product warranty has been provided as a total of the following:

- (1) an estimate of warranty costs to be incurred during the remaining warranty periods based on historical warranty claim experiences and an estimate of the probability of future warranty costs; and
- (2) an estimate of future warranty claims mainly associated with regulatory reporting and similar.

(3) Accrued bonuses

Accrued bonuses are provided for payments of bonuses to employees based on the amount of the estimated bonus payments which is attributable to the semi-annual period.

(4) Accrued employees' retirement benefits

Accrued employees' retirement benefits are provided for payments of retirement benefits at an estimated amount incurred during the half year calculated based on the retirement benefit obligation and the fair value of the pension plan assets at year-end.

The net retirement benefit obligation at transition is amortized by the straight-line method over 15 years.

Prior service costs are amortized by the straight-line method over the average remaining years of service of the employees.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Actuarial gains or losses are amortized in the years following the year in which the gain or loss is recognized by the straight-line method over the average remaining years of service of the employees.

Table of Contents

(5) Accrued officers' retirement benefits

Accrued officers' retirement benefits are provided for the payment of retirement benefits to directors and statutory auditors at the amount which would be required to be paid if all directors and statutory auditors retired at the end of the semi-annual period in accordance with the internal rules of the Company.

4. Leases

Finance lease transactions except for those under which the ownership of leased assets is transferred to the lessee, are accounted for as operating leases.

5. Other significant basic information for preparing the semi-annual financial statements

Accounting for consumption tax

Transactions subject to consumption taxes are recorded at amounts exclusive of consumption taxes.

Consumption tax refund receivable is included in other current assets.

Changes to the Significant Basic Information for Preparation of the Semi-annual Financial Statements

Basis of Accounting for Royalty Income

Prior to the year ended March 31, 2003, royalty income for the Company's industrial property rights and know-how had been recognized when receipts became due. Effective April 1, 2003, the Company changed the method of recognizing royalty income to recognize such income at the end of the royalty calculation period in accordance with each contract.

This change was made because the new method results in a better recognition of income in each period given the increased significance of royalty income to the Company's operation since royalty income increased during the half year ended September 30, 2003, mainly due to the expansion of production capacity in the North American region, and the Company expects royalty income will continue to increase due to expanding overseas production.

The effect of this change for the half year ended September 30, 2003 is an increase in sales, gross profit, operating income, ordinary income and income before income taxes of ¥27,225 million, respectively.

Additional Information

Accounting Standard for Treasury Stock and Reduction of Legal Reserves (Accounting Standards Board of Japan, Financial Accounting Standards No.1, February 21, 2002) was adopted from the half year ended September 30, 2002. The effect of this change was immaterial to the statement of income.

In addition, the stockholders' equity section of the semi-annual balance sheet as of September 30, 2002 is presented to comply with the amendments made to Regulations Concerning Terminology, Forms and Preparation Methods of Semi-annual Financial Statements due to the revision of Regulations Concerning Terminology, Forms and Preparation Methods of Semi-annual Financial Statements.

Accordingly, from the half year ended September 30, 2002, treasury stock, which was included in the other current assets section of the semi-annual balance sheet as of September 30, 2001, is presented as a reduction of the stockholders' equity in the bottom line of the stockholders' equity section.
