Filed Pursuant to Rule 424(b)(1)
Registration No. 333-132257

PROSPECTUS

29,500,000 Shares

Continental Resources, Inc.

Common Stock

This is our initial public offering of common stock. We are offering 8,850,000 shares of our common stock. The selling shareholder identified in this prospectus is offering 20,650,000 shares of our common stock. We will not receive any proceeds from the sale of the shares by the selling shareholder.

Prior to this offering, there has been no public market for our common stock. Our common stock has been approved for listing on the New York Stock Exchange, subject to official notice of issuance, under the symbol CLR.

Investing in our common stock involves a high degree of risk. See Risk Factors beginning on page 11.

	<u>Per share</u>	<u>Total</u>
Initial public offering price	\$ 15.00	\$ 442,500,000

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Underwriting discount	\$ 0.90	\$ 26,550,000
Proceeds to Continental Resources, Inc.(1)	\$ 14.10	\$ 124,785,000
Proceeds to selling shareholder(1)	\$ 14.10	\$ 291,165,000

(1) Expenses, other than underwriting discounts related to the shares sold by the selling shareholder, associated with the offering will be paid by us.

The selling shareholder has granted the underwriters an option for a period of 30 days to purchase up to 4,425,000 additional shares of common stock to cover overallotments, if any. If such option is exercised in full, the total underwriting discount will be \$30,532,500 and the total proceeds to the selling shareholder will be \$353,557,500.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of common stock to investors on May 18, 2007.

Cautionary Statement Regarding Forward-Looking Statements

This prospectus contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond our control. All statements, other than statements of historical fact included in this prospectus, regarding our strategy, future operations, financial position, estimated revenues and losses, projected costs, prospects, plans and objectives of management are forward-looking statements. When used in this prospectus, the words could, believe, anticipate, intend, estimate, expect, project and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words.

Forward-looking statements may include statements about our:

business strategy;

reserves;

technology;

financial strategy;

oil and natural gas realized prices;

timing and amount of future production of oil and natural gas;

the amount, nature and timing of capital expenditures;

drilling of wells;

competition and government regulations;

marketing of oil and natural gas;

exploitation or property acquisitions;

costs of exploiting and developing our properties and conducting other operations;

general economic conditions;

uncertainty regarding our future operating results; and

plans, objectives, expectations and intentions contained in this prospectus that are not historical.

All forward-looking statements speak only as of the date of this prospectus. You should not place undue reliance on these forward-looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by the forward-looking statements we make in this prospectus are reasonable, we can give no assurance that these plans, intentions or expectations will be achieved. We disclose important factors that could cause our actual results to differ materially from our expectations under **Risk Factors** and **Management's Discussion and Analysis of Financial Condition and Results of Operations** and elsewhere in this prospectus. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf.

Prospectus Summary

This summary highlights information contained elsewhere in this prospectus. You should read this entire prospectus carefully, including Risk Factors and our historical consolidated financial statements and the notes to those historical consolidated financial statements included elsewhere in this prospectus. Unless the context otherwise requires, references in this prospectus to Continental Resources, we, us, our, ours or company refer to Continental Resources, Inc. and its subsidiary.

We have provided definitions for the oil and natural gas terms used in this prospectus in the Glossary of Oil and Natural Gas Terms beginning on page A-1 of this prospectus. Unless otherwise indicated, the information contained in this prospectus assumes that the underwriters do not exercise their over-allotment option to purchase additional shares.

Our Business

We are an independent oil and natural gas exploration and production company with operations in the Rocky Mountain, Mid-Continent and Gulf Coast regions of the United States. We focus our exploration activities in large new or developing plays that provide us the opportunity to acquire undeveloped acreage positions for future drilling operations. We have been successful in targeting large repeatable resource plays where horizontal drilling, advanced fracture stimulation and enhanced recovery technologies provide the means to economically develop and produce oil and natural gas reserves from unconventional formations. As a result of these efforts, we have grown substantially through the drillbit, adding 96.2 MMBoe of proved oil and natural gas reserves through extensions and discoveries from January 1, 2001 through December 31, 2006 compared to 5.1 MMBoe added through proved reserve purchases during that same period.

As of December 31, 2006, our estimated proved reserves were 118.3 MMBoe, with estimated proved developed reserves of 87.1 MMBoe, or 74% of our total estimated proved reserves. Crude oil comprised 83% of our total estimated proved reserves. At December 31, 2006, we had 1,772 scheduled drilling locations on the 1,775,000 gross (1,071,000 net) acres that we held. For the year ended December 31, 2006, we generated revenues of \$483.7 million, and operating cash flows of \$417.0 million. For the first quarter of 2007, daily production averaged approximately 28,000 Boe per day.

Table of Contents**Index to Financial Statements**

The following table summarizes our total estimated proved reserves, PV-10 and net producing wells as of December 31, 2006, average daily production for the three months ended December 31, 2006 and the reserve-to-production ratio in our principal regions. Our reserve estimates as of December 31, 2006 are based primarily on a reserve report prepared by Ryder Scott Company, L.P., our independent reserve engineers. In preparing its report, Ryder Scott Company, L.P. evaluated properties representing approximately 83% of our PV-10. Our technical staff evaluated properties representing the remaining 17% of our PV-10.

	At December 31, 2006				Average daily production		
	Proved reserves (MBoe)	Percent of total	PV-10(1) (in millions)	Net producing wells	Fourth quarter 2006 (Boe per day)	Percent of total	Annualized reserve/production index(2)
Rocky Mountain:							
Red River units	66,527	56%	\$ 791	201	11,732	44%	15.5
Bakken field	25,623	22%	441	66	7,905	30%	8.9
Other	9,077	8%	104	233	1,717	7%	14.5
Mid-Continent	16,894	14%	244	672	4,280	16%	10.8
Gulf Coast	228		4	19	869	3%	0.7
Total	118,349	100%	\$ 1,584	1,191	26,503	100%	12.2

- (1) PV-10 is a non GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future net revenues. However, our PV-10 and our Standardized Measure are equivalent because we are a subchapter S-corporation. In connection with the closing of this offering, we will convert to a subchapter C-corporation. Our pro-forma Standardized Measure, assuming our conversion to a subchapter C-corporation, was \$1.0 billion at December 31, 2006. Neither PV-10 nor Standardized Measure represents an estimate of the fair market value of our oil and gas properties. We and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies without regard to the specific tax characteristics of such entities.
- (2) The Annualized Reserve/Production Index is the number of years proved reserves would last assuming current production continued at the same rate. This index is calculated by dividing annualized fourth quarter 2006 production into the proved reserve quantity at December 31, 2006.

The following table provides additional information regarding our key development areas:

	At December 31, 2006				2007 Budget		
	Developed acres		Undeveloped acres		Scheduled drilling locations(1)	Wells planned for drilling	Capital expenditures (in millions)
	Gross	Net	Gross	Net			
Rocky Mountain:							
Red River units	144,309	128,484			133	51	\$ 151
Bakken field	81,761	60,176	581,846	342,321	804	58	145
Other	49,010	38,534	375,185	213,516	66	12	13
Mid-Continent	147,681	94,214	335,982	175,780	762	151	122

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Gulf Coast	41,450	11,869	17,368	6,360	7	3	6
Total	464,211	333,277	1,310,381	737,977	1,772	275	\$ 437

- (1) Scheduled drilling locations represent total gross locations specifically identified and scheduled by management as an estimate of our future multi-year drilling activities on existing acreage. Of the total locations shown in the table, 249 are classified as PUDs. As of April 12, 2007, we have commenced drilling 116 locations shown in the table, including 67 PUD locations. Our actual drilling activities may change depending on oil and natural gas prices, the availability of capital, costs, drilling results, regulatory approvals and other factors. See Risk Factors Risks Relating to the Oil and Natural Gas Industry and Our Business.

Table of Contents

Index to Financial Statements

Our Business Strategy

Our goal is to increase shareholder value by finding and developing crude oil and natural gas reserves at costs that provide an attractive rate of return on our investment. The principal elements of our business strategy are:

Growth Through Drilling. Substantially all of our annual capital expenditures are invested in drilling projects and acreage and seismic acquisitions.

Internally Generate Prospects. Our technical staff has internally generated substantially all of the opportunities for the investment of our capital. Because we have been an early entrant in new or emerging plays, our costs to acquire undeveloped acreage have generally been less than those of later entrants into a developing play.

Focus on Unconventional Oil and Natural Gas Resource Plays. Our experience with horizontal drilling, advanced fracture stimulation and enhanced recovery technologies allows us to commercially develop unconventional oil and natural gas resource plays, such as the Red River B dolomite, Bakken Shale and Woodford Shale formations.

Acquire Significant Acreage Positions in New or Developing Plays. Our technical staff is focused on identifying and testing new unconventional oil and natural gas resource plays where significant reserves could be developed if commercial production rates can be achieved through advanced drilling, fracture stimulation and enhanced recovery techniques.

Our Business Strengths

We have a number of strengths that we believe will help us successfully execute our strategies:

Large Drilling and Acreage Inventory. Our large number of identified drilling locations in all of our areas of operations provide for a multi-year drilling inventory.

Horizontal Drilling and Enhanced Recovery Experience. In 1992, we drilled our initial horizontal well, and we have drilled over 350 horizontal wells since that time. We also have substantial experience with enhanced recovery methods and currently serve as the operator of 48 waterflood units and eight high-pressure air injection units.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Control Operations Over a Substantial Portion of our Assets and Investments. As of December 31, 2006, we operated properties comprising 95% of our PV-10. By controlling operations, we are able to more effectively manage the cost and timing of exploration and development of our properties.

Experienced Management Team. Our senior management team has extensive expertise in the oil and gas industry. Our seven senior officers have an average of 26 years of oil and gas industry experience.

Strong Financial Position. As of May 8, 2007, we had outstanding borrowings under our credit facility of approximately \$252.5 million. We believe that our planned exploration and development activities will be funded substantially from our operating cash flows. After giving effect to this offering and the application of the net proceeds we will receive in this offering, we expect to have borrowings of approximately \$129.6 million outstanding under our credit facility.

Table of Contents

Index to Financial Statements

Recent Events

Cash Dividends. On January 10, 2007, we declared a cash dividend of approximately \$18.8 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared, of which \$16.9 million was paid to our principal shareholder. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On April 12, 2007, we paid \$33.1 million of the dividend declared, of which \$30.0 million was paid to our principal shareholder. We are currently a subchapter S-corporation under the rules and regulations of the Internal Revenue Service. As a result, income taxes attributable to our federal and state income are payable by our shareholders. The dividends have been paid to shareholders to fund their taxes due and estimated tax payments. In connection with the completion of this offering, we will convert from a subchapter S-corporation to a subchapter C-corporation, and we do not anticipate paying any additional cash dividends on our common stock in the foreseeable future. The selling shareholder has received dividends of approximately \$13.5 million, \$1.8 million, \$79.0 million and \$46.9 million in 2004, 2005, 2006 and 2007, respectively. The total net proceeds to the selling shareholder in this offering will be approximately \$291.2 million, or approximately \$353.6 million if the underwriters exercise their overallotment option in full.

Risk Factors

Investing in our common stock involves risks that include the speculative nature of oil and natural gas exploration, competition, volatile oil and natural gas prices and other material factors. You should read carefully the section entitled **Risk Factors** beginning on page 11 for an explanation of these risks before investing in our common stock. In particular, the following considerations may offset our business strengths or have a negative effect on our business strategy as well as on activities on our properties, which could cause a decrease in the price of our common stock and result in a loss of all or a portion of your investment:

A substantial or extended decline in oil and natural gas prices may adversely affect our business, financial condition or results of operations and our ability to meet our capital expenditure obligations and financial commitments.

Drilling for and producing oil and natural gas are high risk activities with many uncertainties that could adversely affect our business, financial condition or results of operations.

Reserve estimates depend on many assumptions that may turn out to be inaccurate. Any material inaccuracies in these reserve estimates or underlying assumptions will materially affect the quantities and present value of our reserves.

Our use of enhanced recovery methods creates uncertainties that could adversely affect our results of operations and financial condition.

Our development and exploitation projects require substantial capital expenditures. We may be unable to obtain needed capital or financing on satisfactory terms, which could lead to a decline in our oil and natural gas reserves.

If oil and natural gas prices decrease, we may be required to take write-downs of the carrying values of our oil and natural gas properties.

Table of Contents

Index to Financial Statements

Unless we replace our oil and natural gas reserves, our reserves and production will decline, which would adversely affect our cash flows and results of operations.

The unavailability or high cost of additional drilling rigs, equipment, supplies, personnel and oilfield services could adversely affect our ability to execute our exploration and development plans within our budget and on a timely basis.

We may incur substantial losses and be subject to substantial liability claims as a result of our oil and natural gas operations; we may not be insured for, or our insurance may be inadequate to protect us against, these risks.

Prospects that we decide to drill may not yield oil or natural gas in commercially viable quantities.

Our identified drilling locations are scheduled out over several years, making them susceptible to uncertainties that could materially alter the occurrence or timing of their drilling.

Following this offering, our Chairman and Chief Executive Officer will own approximately 73.2% of our outstanding common stock, giving him influence and control in corporate transactions and other matters.

For a discussion of other considerations that could negatively affect us, including risks related to this offering and our common stock, see Risk Factors and Cautionary Statement Regarding Forward-Looking Statements.

Corporate History and Information

Continental Resources, Inc. is incorporated under the laws of the State of Oklahoma. We were originally formed in 1967 to explore, develop and produce oil and natural gas properties in Oklahoma. Through 1993, our activities and growth remained focused primarily in Oklahoma. In 1993, we expanded our activity into the Rocky Mountain and Gulf Coast regions. Through drilling success and strategic acquisitions, approximately 86% of our estimated proved reserves as of December 31, 2006 are located in the Rocky Mountain region.

We are currently a subchapter S-corporation under the rules and regulations of the Internal Revenue Service. However, upon the consummation of this offering, we will have more shareholders than the IRS rules and regulations governing S-corporations allow, and, therefore, we will convert automatically from a subchapter S-corporation to a subchapter C-corporation. In connection with this conversion, we will record a charge to earnings (estimated to be approximately \$175.7 million as if the conversion occurred on December 31, 2006) to recognize deferred taxes.

In addition, concurrent with the closing of this offering, we will effect an 11 for 1 stock split of our shares in the form of a stock dividend.

Our principal executive offices are located at 302 N. Independence, Enid, Oklahoma 73701, and our telephone number at that address is (580) 233-8955.

Index to Financial Statements

The Offering

Common Stock Offered:

By Continental Resources, Inc.: 8,850,000 shares

By the selling shareholder: 20,650,000 shares

Overallotment option granted by the selling shareholder: 4,425,000 shares

Common stock to be owned by the selling shareholder after the offering: 122,980,608 shares (or 118,555,608 shares if the underwriters overallotment option is exercised in full)

Common stock to be outstanding after the offering: 168,018,636 shares

Use of Proceeds:

We will receive approximately \$122.9 million of net proceeds from the sale of the common stock offered by us, after deducting underwriting discounts and estimated offering expenses. We intend to use all of the net proceeds we receive from this offering to repay a portion of borrowings outstanding under our credit facility. We will not receive any proceeds from the sale of the shares of common stock by the selling shareholder. See Use of Proceeds.

Dividend Policy:

We do not anticipate paying any cash dividends on our common stock. See Dividend Policy.

New York Stock Exchange Symbol:

CLR

Other Information About This Prospectus:

Unless specifically stated otherwise, the information in this prospectus:

is adjusted to reflect an 11 for 1 stock split of our shares of common stock to be effected in the form of a stock dividend concurrent with the consummation of this offering; and

assumes no exercise of the underwriters' overallotment option to purchase additional shares.

Table of Contents**Index to Financial Statements****Summary Historical and Pro Forma Consolidated Financial Data**

This section presents our summary historical and pro forma consolidated financial data. The summary historical consolidated financial data presented below is not intended to replace our historical consolidated financial statements.

The following historical consolidated financial data, as it relates to each of the fiscal years ended December 31, 2004 through 2006, has been derived from our audited historical consolidated financial statements for such periods. You should read the following summary historical consolidated financial data in connection with Capitalization, Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical consolidated financial statements and related notes included elsewhere in this prospectus. The summary historical consolidated results are not necessarily indicative of results to be expected in future periods.

The summary pro forma financial data reflect the tax effects of our conversion, concurrent with the closing of this offering, from a subchapter S-corporation to a subchapter C-corporation and the earnings per share impact of our 11 for 1 stock split to be effected in the form of a stock dividend concurrent with the closing of this offering. The pro forma earnings per share adjustments for 2006 also give effect to the number of shares to be issued in this offering whose net proceeds would be sufficient to pay the \$52.1 million of cash dividends declared in 2007.

Table of Contents

Index to Financial Statements

- (1) Our 2006 consolidated financial statements were restated due to increased stock-based compensation as a result of adjustments that reflected an increased historical fair value of our common stock for financial reporting purposes. See Note 1 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.
- (2) Crude oil marketing and trading captions consist of our marketing activities under which crude oil production was sold at the wellhead and transported to a local hub where we purchased the barrels back to exchange at Cushing, Oklahoma in order to minimize pricing differentials with the NYMEX oil futures contract. We adopted Emerging Issues Task Force (EITF) 04-13 on January 1, 2005, which allowed certain purchase and sales transactions with the same counterparty to be combined and accounted for as a single transaction under the guidance of Accounting Principles Board Opinion No. 29. In 2005, we netted \$39.8 million of crude oil marketing and trading revenues and \$39.7 million of crude oil marketing and trading expenses under oil and natural gas sales. Prior to the adoption of EITF 04-13, we presented crude oil marketing and trading revenues and expenses gross under the guidance provided by EITF 99-19, Reporting Revenues Gross as a Principal and/or Net as an Agent. Effective March 2005, we ceased marketing our crude oil production under these arrangements. Thereafter, we have sold our crude oil at the wellhead. Certain of these sales have been to our affiliates, as described under Certain Relationships and Related Party Transactions.
- (3) We have included stock-based compensation of \$2.0 million, \$13.7 million and \$10.9 million in general and administrative expenses for the years ended December 31, 2004, 2005 and 2006, respectively. See Management's Discussion and Analysis of Financial Condition and Results of Operations as well as Note 9 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.
- (4) Properties owned by us at May 31, 1997, the date we converted into a subchapter S-corporation from a subchapter C-corporation, may be subject to federal taxation if sold for an amount in excess of the then tax basis for the sold assets. During 2005, we incurred federal taxes due to the sale of assets acquired prior to May 31, 1997. The benefit recorded during 2006 reflects a change in estimate of the original provision recorded for federal taxes incurred.
- (5) In July 2004, we sold all of the outstanding stock in Continental Gas, Inc., a wholly owned subsidiary, to our shareholders. The Continental Gas, Inc. assets included seven gas gathering systems and three gas-processing plants. These assets represented our entire gas gathering, marketing and processing segment. We have accounted for these operations as discontinued operations.
- (6) EBITDAX represents earnings before interest expense, income taxes (when applicable), depreciation, depletion, amortization and accretion, property impairments, exploration expense and non-cash compensation expense. EBITDAX is not a measure of net income or cash flow as determined by generally accepted accounting principles (GAAP). EBITDAX should not be considered as an alternative to, or more meaningful than, net income or cash flow as determined in accordance with GAAP or as an indicator of a company's operating performance or liquidity. Certain items excluded from EBITDAX are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure, as well as the historic costs of depreciable assets, none of which are components of EBITDAX. Our computations of EBITDAX may not be comparable to other similarly titled measures of other companies. We believe that EBITDAX is a widely followed measure of operating performance and may also be used by investors to measure our ability to meet future debt service requirements, if any. Our credit facility requires that we maintain a total debt to EBITDAX ratio of no greater than 3.75 to 1 on a rolling four-quarter basis. Our credit facility defines EBITDAX consistently with the definition of EBITDAX utilized and presented by us. At December 31, 2005 and 2006, this ratio was approximately 0.5 to 1 and 0.4 to 1, respectively. The following table represents a reconciliation of our net income to EBITDAX:

	Year ended December 31,		
	2004	2005	2006
			(as restated)
			(in thousands)
Net income	\$ 27,864	\$ 194,307	\$ 253,088
Interest expense	23,617	14,220	11,310
Provision (benefit) for income taxes		1,139	(132)
Depreciation, depletion, amortization and accretion	38,627	49,802	65,428
Property impairments	11,747	6,930	11,751
Exploration expense	12,633	5,231	19,738
Equity compensation	2,010	13,715	10,932
EBITDAX	\$ 116,498	\$ 285,344	\$ 372,115

Table of Contents**Index to Financial Statements****Summary Reserve, Production and Operating Data**

The following table presents summary data with respect to our estimated net proved oil and natural gas reserves as of the dates indicated. Our reserve estimates as of December 31, 2004, 2005 and 2006 are based primarily on reserve reports prepared by Ryder Scott Company, L.P., our independent reserve engineers. In preparing its reports, Ryder Scott Company, L.P. evaluated properties representing approximately 83% of our PV-10 as of the end of each period. Our technical staff evaluated our remaining properties. A copy of Ryder Scott Company, L.P.'s summary report as of December 31, 2006 is included in this prospectus beginning on page B-1. All calculations of estimated net proved reserves have been made in accordance with the rules and regulations of the Securities and Exchange Commission, or the SEC. For additional information regarding our reserves, see Business and Properties Proved Reserves.

	As of December 31,		
	2004	2005	2006
Proved reserves:			
Oil (MBbls)	80,602	98,645	98,038
Natural gas (MMcf)	60,620	108,118	121,865
Oil equivalents (MBoe)	90,705	116,665	118,349
Proved developed reserves percentage	83%	69%	74%
PV-10 (in millions)(1)	\$ 1,114	\$ 2,204	\$ 1,584
Estimated reserve life (in years)	17.6	16.2	13.1
Costs incurred (in thousands):			
Property acquisition costs	\$ 12,456	\$ 16,763	\$ 36,534
Exploration costs	30,867	9,289	68,686
Development costs	53,036	117,837	221,286
Total	\$ 96,359	\$ 143,889	\$ 326,506

- (1) PV-10 is a non GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future net revenues. However, our PV-10 and our Standardized Measure are equivalent because we are a subchapter S-corporation. In connection with the closing of this offering, we will convert to a subchapter C-corporation. Our pro-forma Standardized Measure, assuming our conversion to a subchapter C-corporation, was \$1.0 billion at December 31, 2006. Neither PV-10 nor Standardized Measure represents an estimate of the fair market value of our oil and gas properties. We and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies without regard to the specific tax characteristics of such entities.

The following table sets forth summary data with respect to our production results, average sales prices and production costs on a historical basis for the periods presented:

	Year ended December 31,		
	2004	2005	2006
(as restated)			
Net production volumes:			

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Oil (MBbls)(1)	3,688	5,708	7,480
Natural gas (MMcf)	8,794	9,006	9,225
Oil equivalents (MBoe)	5,154	7,209	9,018
Average prices(1):			
Oil, without hedges (\$/Bbl)	\$ 38.85	\$ 52.45	\$ 55.30
Oil, with hedges (\$/Bbl)	37.12	52.45	55.30
Natural gas (\$/Mcf)	5.06	6.93	6.08
Oil equivalents, without hedges (\$/Boe)	36.45	50.19	52.09
Oil equivalents, with hedges (\$/Boe)	35.20	50.19	52.09
Costs and expenses(1):			
Production expense (\$/Boe)	\$ 8.49	\$ 7.32	\$ 6.99
Production tax (\$/Boe)	2.39	2.22	2.48
General and administrative (\$/Boe)	2.41	4.34	3.45
DD&A expense (\$/Boe)(2)	7.02	6.50	6.91

(1) Oil sales volumes are 21 MBbls less than oil production volumes for the year ended December 31, 2006. Average prices and per unit costs have been calculated using sales volumes.

(2) Rate is determined based on DD&A expense derived from oil and natural gas assets.

Risk Factors

You should carefully consider each of the risks described below, together with all of the other information contained in this prospectus, before deciding to invest in shares of our common stock. If any of the following risks develop into actual events, our business, financial condition or results of operations could be materially adversely affected, the trading price of your shares could decline and you may lose all or part of your investment.

Risks Relating to the Oil and Natural Gas Industry and Our Business

A substantial or extended decline in oil and natural gas prices may adversely affect our business, financial condition or results of operations and our ability to meet our capital expenditure obligations and financial commitments.

The price we receive for our oil and natural gas production heavily influences our revenue, profitability, access to capital and future rate of growth. Oil and natural gas are commodities and, therefore, their prices are subject to wide fluctuations in response to relatively minor changes in supply and demand. Historically, the markets for oil and natural gas have been volatile. These markets will likely continue to be volatile in the future. The prices we receive for our production, and the levels of our production, depend on numerous factors beyond our control. These factors include the following:

changes in global supply and demand for oil and natural gas;

the actions of the Organization of Petroleum Exporting Countries, or OPEC;

the price and quantity of imports of foreign oil and natural gas;

political conditions in or affecting other oil-producing and natural gas-producing countries, including the current conflicts in the Middle East and conditions in South America and Russia;

the level of global oil and natural gas exploration and production;

the level of global oil and natural gas inventories;

localized supply and demand fundamentals and transportation availability;

weather conditions;

technological advances affecting energy consumption; and

the price and availability of alternative fuels.

Lower oil and natural gas prices will reduce our cash flows and borrowing ability. See Our development and exploitation projects require substantial capital expenditures. We may be unable to obtain needed capital or financing on satisfactory terms, which could lead to a decline in our oil and natural gas reserves. Lower oil and natural gas prices may also reduce the amount of oil and natural gas that we can produce economically. Substantial decreases in oil and natural gas prices would render uneconomic a significant portion of our exploitation projects. This may result in our having to make significant downward adjustments to our estimated proved reserves. As a result, a substantial or extended decline in oil or natural gas prices may materially and adversely affect our future business, financial condition, results of operations, liquidity or ability to finance planned capital expenditures.

In addition, because our producing properties are geographically concentrated in the Rocky Mountain region, we are vulnerable to fluctuations in pricing in that area. In particular, 81% of our production during the fourth quarter of 2006 was from the Rocky Mountain region. As a result of this concentration, we may be disproportionately exposed to the impact of regional supply and demand factors, transportation capacity

Table of Contents

Index to Financial Statements

constraints, curtailment of production or interruption of transportation of oil produced from the wells in these areas. Such factors can cause significant fluctuation in our realized oil and natural gas prices. For example, the company-wide difference between the average NYMEX oil price and our average realized oil price for the year ended December 31, 2005 was \$5.24 per Bbl, whereas the company-wide difference between the NYMEX oil price and our realized oil price for the year ended December 31, 2006 was \$11.04 per Bbl. The increase in the difference was caused by higher oil imports and production in the Rocky Mountain region, lower demand by local Rocky Mountain refineries due to downtime for maintenance and reduced seasonal demand for gasoline and downstream transportation capacity constraints. We are unable to predict when, or if, the difference will revert back to pre-2006 levels. If such significant price differentials continue, our future business, financial condition and results of operations may be materially adversely affected.

Drilling for and producing oil and natural gas are high risk activities with many uncertainties that could adversely affect our business, financial condition or results of operations.

Our future financial condition and results of operations will depend on the success of our exploitation, exploration, development and production activities. Our oil and natural gas exploration and production activities are subject to numerous risks beyond our control, including the risk that drilling will not result in commercially viable oil or natural gas production. We expect to invest approximately 45% of our exploration and development capital during 2007 in two relatively new unconventional projects, the Bakken Shale in western North Dakota and the Woodford Shale in eastern Oklahoma. Due to limited production history from the relatively few number of wells drilled in these projects, we are unable to predict with certainty the quantity of future production from wells to be drilled in those projects. Our decisions to purchase, explore, develop or otherwise exploit prospects or properties will depend in part on the evaluation of data obtained through geophysical and geological analyses, production data and engineering studies, the results of which are often inconclusive or subject to varying interpretations. For a discussion of the uncertainty involved in these processes, see Reserve estimates depend on many assumptions that may turn out to be inaccurate. Any material inaccuracies in these reserve estimates or underlying assumptions will materially affect the quantities and present value of our reserves. Our cost of drilling, completing and operating wells is often uncertain before drilling commences. For example, our exploration expenses increased more significantly than we had expected in 2006 to \$19.7 million, primarily due to increased dry hole expenses in each of the Rocky Mountain, Mid-Continent and Gulf Coast regions as a result of a higher level of drilling in 2006. In addition, impairment provisions for our developed oil and natural gas properties increased to \$6.3 million for the year ended December 31, 2006 as a result of developmental well dry holes and properties where the associated field level reserves were not sufficient to recover capitalized drilling and completion costs. Overruns in budgeted expenditures are common risks that can make a particular project uneconomical.

Further, many factors may curtail, delay or cancel our scheduled drilling projects, including the following:

delays imposed by or resulting from compliance with regulatory requirements;

pressure or irregularities in geological formations;

shortages of or delays in obtaining equipment and qualified personnel;

equipment failures or accidents;

adverse weather conditions, such as hurricanes and tropical storms;

reductions in oil and natural gas prices;

title problems; and

limitations in the market for oil and natural gas.

Table of Contents

Index to Financial Statements

Reserve estimates depend on many assumptions that may turn out to be inaccurate. Any material inaccuracies in these reserve estimates or underlying assumptions will materially affect the quantities and present value of our reserves.

We estimate that our proved reserves as of December 31, 2006 were 118.3 MMBoe with a PV-10 of approximately \$1,584 million. The process of estimating oil and natural gas reserves is complex. It requires interpretations of available technical data and many assumptions, including assumptions relating to economic factors. Any significant inaccuracies in these interpretations or assumptions could materially affect our estimated quantities and present value of our reserves. See **Business and Properties Proved Reserves** for information about our estimated oil and natural gas reserves and the PV-10 and standardized measure of discounted future net cash flows as of December 31, 2006.

In order to prepare our estimates, we must project production rates and timing of development expenditures. We must also analyze available geological, geophysical, production and engineering data. The extent, quality and reliability of this data can vary. The process also requires economic assumptions about matters such as oil and natural gas prices, drilling and operating expenses, capital expenditures, taxes and availability of funds.

Actual future production, oil and natural gas prices, revenues, taxes, development expenditures, operating expenses and quantities of recoverable oil and natural gas reserves most likely will vary from our estimates. Any significant variance could materially affect the estimated quantities and present value of our reserves. In addition, we may adjust estimates of proved reserves to reflect production history, results of exploration and development, prevailing oil and natural gas prices and other factors, many of which are beyond our control.

For example, our initial well in the Bakken Field was completed in August 2003. As of December 31, 2006, we had 16.4 MMBoe of proved producing reserves assigned to 121 producing wells and 9.2 MMBoe of proved undeveloped reserves assigned to 48 undrilled locations. The Bakken Field contained 22% of our total proved reserves and 30% of our total proved undeveloped reserves as of December 31, 2006. Due to the limited production history of our wells in the Bakken Field, the estimates of future production associated with such properties may be subject to greater variance to actual production than would be the case with properties having a longer production history.

You should not assume that the present value of future net revenues from our proved reserves is the current market value of our estimated oil and natural gas reserves. In accordance with SEC requirements, we generally base the estimated discounted future net cash flows from our proved reserves on prices and costs on the date of the estimate. Actual future prices and costs may differ materially from those used in the present value estimate. If oil prices decline by \$1.00 per Bbl, then our PV-10 as of December 31, 2006 would decrease from \$1,584 million to \$1,536 million. If natural gas prices decline by \$0.10 per Mcf, then our PV-10 as of December 31, 2006 would decrease from \$1,584 million to \$1,582 million.

Our use of enhanced recovery methods creates uncertainties that could adversely affect our results of operations and financial condition.

One of our business strategies is to commercially develop unconventional oil and natural gas resource plays using enhanced recovery technologies. For example, we inject water and high-pressure air into formations on some of our properties to increase the production of oil and natural gas. The additional production and reserves attributable to the use of these enhanced recovery methods are inherently difficult to predict. If our enhanced recovery programs do not allow for the extraction of oil and natural gas in the manner or to the extent that we anticipate, our future results of operations and financial condition could be materially adversely affected.

Table of Contents

Index to Financial Statements

Our development and exploitation projects require substantial capital expenditures. We may be unable to obtain needed capital or financing on satisfactory terms, which could lead to a decline in our oil and natural gas reserves.

The oil and natural gas industry is capital intensive. We make and expect to continue to make substantial capital expenditures in our business for the development, exploitation, production and acquisition of oil and natural gas reserves. We invested approximately \$326.6 million for capital and exploration expenditures in 2006. Our budgeted capital expenditures for 2007 are expected to increase approximately 34% over the \$326.6 million invested during 2006. To date, these capital expenditures have been financed with cash generated by operations and through borrowings from banks and from our principal shareholder. The actual amount and timing of our future capital expenditures may differ materially from our estimates as a result of, among other things, actual drilling results, the availability of drilling rigs and other services and equipment, and regulatory, technological and competitive developments. We intend to finance our future capital expenditures primarily through cash flow from operations and through borrowings under our revolving credit facility; however, our financing needs may require us to alter or increase our capitalization substantially through the issuance of debt or equity securities. The issuance of additional debt will require that a portion of our cash flow from operations be used for the payment of interest and principal on our debt, thereby reducing our ability to use cash flow to fund working capital, capital expenditures and acquisitions. The issuance of additional equity securities could have a dilutive effect on the value of your common stock.

Our cash flow from operations and access to capital are subject to a number of variables, including:

our proved reserves;

the level of oil and natural gas we are able to produce from existing wells;

the prices at which our oil and natural gas are sold; and

our ability to acquire, locate and produce new reserves.

If our revenues or the borrowing base under our credit facility decrease as a result of lower oil or natural gas prices, operating difficulties, declines in reserves or for any other reason, we may have limited ability to obtain the capital necessary to sustain our operations at current levels. If additional capital is needed, we may not be able to obtain debt or equity financing. If cash generated by operations or cash available under our revolving credit facility is not sufficient to meet our capital requirements, the failure to obtain additional financing could result in a curtailment of our operations relating to development of our prospects, which in turn could lead to a decline in our oil and natural gas reserves, and could adversely affect our business, financial condition and results of operations.

If oil and natural gas prices decrease, we may be required to take write-downs of the carrying values of our oil and natural gas properties.

Accounting rules require that we review periodically the carrying value of our oil and natural gas properties for possible impairment. Based on specific market factors and circumstances at the time of prospective impairment reviews, and the continuing evaluation of development plans, production data, economics and other factors, we may be required to write down the carrying value of our oil and natural gas properties. A write-down constitutes a non-cash charge to earnings. We may incur impairment charges in the future, which could have a material adverse

effect on our results of operations for the periods in which such charges are taken.

Unless we replace our oil and natural gas reserves, our reserves and production will decline, which would adversely affect our cash flows and results of operations.

Unless we conduct successful development, exploitation and exploration activities or acquire properties containing proved reserves, our proved reserves will decline as those reserves are produced. Producing oil and

Table of Contents

Index to Financial Statements

natural gas reservoirs generally are characterized by declining production rates that vary depending upon reservoir characteristics and other factors. Our future oil and natural gas reserves and production, and therefore our cash flow and results of operations, are highly dependent on our success in efficiently developing and exploiting our current reserves and economically finding or acquiring additional recoverable reserves. We may not be able to develop, exploit, find or acquire sufficient additional reserves to replace our current and future production. If we are unable to replace our current and future production, the value of our reserves will decrease, and our business, financial condition and results of operations would be adversely affected.

The unavailability or high cost of additional drilling rigs, equipment, supplies, personnel and oilfield services could adversely affect our ability to execute our exploration and development plans within our budget and on a timely basis.

Shortages or the high cost of drilling rigs, equipment, supplies, personnel or oilfield services could delay or cause us to incur significant expenditures that are not provided for in our capital budget, which could have a material adverse effect on our business, financial condition or results of operations.

We may incur substantial losses and be subject to substantial liability claims as a result of our oil and natural gas operations; we may not be insured for, or our insurance may be inadequate to protect us against, these risks.

We are not insured against all risks. Losses and liabilities arising from uninsured and underinsured events could materially and adversely affect our business, financial condition or results of operations. Our oil and natural gas exploration and production activities are subject to all of the operating risks associated with drilling for and producing oil and natural gas, including the possibility of:

environmental hazards, such as uncontrollable flows of oil, natural gas, brine, well fluids, toxic gas or other pollution into the environment, including groundwater and shoreline contamination;

abnormally pressured formations;

mechanical difficulties, such as stuck oilfield drilling and service tools and casing collapse;

fires, explosions and ruptures of pipelines in connection with our high-pressure air injection operations;

personal injuries and death; and

natural disasters.

Any of these risks could adversely affect our ability to conduct operations or result in substantial losses to our company as a result of:

injury or loss of life;

damage to and destruction of property, natural resources and equipment;

pollution and other environmental damage;

regulatory investigations and penalties;

suspension of our operations; and

repair and remediation costs.

Table of Contents

Index to Financial Statements

We may elect not to obtain insurance if we believe that the cost of available insurance is excessive relative to the risks presented. In addition, pollution and environmental risks generally are not fully insurable. The occurrence of an event that is not fully covered by insurance could have a material adverse effect on our business, financial condition and results of operations.

Prospects that we decide to drill may not yield oil or natural gas in commercially viable quantities.

Prospects that we decide to drill that do not yield oil or natural gas in commercially viable quantities will adversely affect our result of operations and financial condition. In this prospectus, we describe some of our current prospects and our plans to explore those prospects. Our prospects are in various stages of evaluation, ranging from a prospect which is ready to drill to a prospect that will require substantial additional seismic data processing and interpretation. There is no way to predict in advance of drilling and testing whether any particular prospect will yield oil or natural gas in sufficient quantities to recover drilling or completion costs or to be economically viable. The use of seismic data and other technologies and the study of producing fields in the same area will not enable us to know conclusively prior to drilling whether oil or natural gas will be present or, if present, whether oil or natural gas will be present in commercial quantities. We cannot assure you that the analogies we draw from available data from other wells, more fully explored prospects or producing fields will be applicable to our drilling prospects.

Our identified drilling locations are scheduled out over several years, making them susceptible to uncertainties that could materially alter the occurrence or timing of their drilling.

Our management has specifically identified and scheduled drilling locations as an estimation of our future multi-year drilling activities on our existing acreage. As of December 31, 2006, we had identified and scheduled 1,772 gross drilling locations. These scheduled drilling locations represent a significant part of our growth strategy. Our ability to drill and develop these locations depends on a number of uncertainties, including oil and natural gas prices, the availability of capital, costs, drilling results, regulatory approvals and other factors. The North Dakota Bakken Shale and Woodford Shale projects comprise 1,417 gross drilling locations. Due to limited production history on the relatively few number of wells drilled in these projects, we are unable to predict with certainty the quantity of future production from wells to be drilled in these projects. If future drilling results in these projects do not establish sufficient reserves to achieve an economic return, we may curtail drilling in these projects. Because of these uncertainties, we do not know if the numerous potential drilling locations we have identified will ever be drilled or if we will be able to produce oil or natural gas from these or any other potential drilling locations. In addition, unless production is established within the spacing units covering the undeveloped acres on which some of the locations are identified, the leases for such acreage will expire. As of December 31, 2006, we had 134,088, 174,169 and 178,399 net acres expiring in 2007, 2008 and 2009, respectively. As such, our actual drilling activities may materially differ from those presently identified, which could adversely affect our business.

Market conditions or operational impediments may hinder our access to oil and natural gas markets or delay our production.

Market conditions or the unavailability of satisfactory oil and natural gas transportation arrangements may hinder our access to oil and natural gas markets or delay our production. The availability of a ready market for our oil and natural gas production depends on a number of factors, including the demand for and supply of oil and natural gas and the proximity of reserves to pipelines and terminal facilities. Our ability to market our production depends in substantial part on the availability and capacity of gathering systems, pipelines and processing facilities owned and operated by third parties. Our failure to obtain such services on acceptable terms could materially harm our business. We may be required to shut in wells due to lack of a market or inadequacy or unavailability of crude oil or natural gas pipeline or gathering system capacity. If that were to occur, then we would be unable to realize revenue from those wells until production arrangements were made to deliver to market.

Table of Contents

Index to Financial Statements

We have been an early entrant into new or emerging plays; as a result, our drilling results in these areas are uncertain, and the value of our undeveloped acreage will decline if drilling results are unsuccessful.

While our costs to acquire undeveloped acreage in new or emerging plays have generally been less than those of later entrants into a developing play, our drilling results in these areas are more uncertain than drilling results in areas that are developed and producing. Since new or emerging plays have limited or no production history, we are unable to use past drilling results in those areas to help predict our future drilling results. As a result, our cost of drilling, completing and operating wells in these areas may be higher than initially expected, and the value of our undeveloped acreage will decline if drilling results are unsuccessful.

We are subject to complex federal, state, local, provincial and other laws and regulations that could adversely affect the cost, manner or feasibility of conducting our operations or expose us to significant liabilities.

Our oil and natural gas exploration, production and transportation operations are subject to complex and stringent laws and regulations. In order to conduct our operations in compliance with these laws and regulations, we must obtain and maintain numerous permits, approvals and certificates from various federal, state, local and provincial governmental authorities. We may incur substantial costs in order to maintain compliance with these existing laws and regulations. In addition, our costs of compliance may increase if existing laws and regulations are revised or reinterpreted, or if new laws and regulations become applicable to our operations. Such costs could have a material adverse effect on our business, financial condition and results of operations.

Our business is subject to federal, state, local and provincial laws and regulations as interpreted and enforced by governmental authorities possessing jurisdiction over various aspects of the exploration for, and the production and transportation of, oil and natural gas. Failure to comply with such laws and regulations, as interpreted and enforced, could have a material adverse effect on our business, financial condition and results of operations. See Business and Properties Environmental, Health and Safety Regulation and Business and Properties Regulation of the Oil and Natural Gas Industry for a description of the laws and regulations that affect us.

Strict, joint and several liability may be imposed under certain environmental laws, which could cause us to become liable for the conduct of others or for consequences of our own actions that were in compliance with all applicable laws at the time those actions were taken. In addition, claims for damages to persons or property, including natural resources, may result from our operations.

New laws, regulations or enforcement policies could be more stringent and impose unforeseen liabilities or significantly increase compliance costs. If we were not able to recover the resulting costs through insurance or increased revenues, our business, financial condition or results of operations could be adversely affected.

Competition in the oil and natural gas industry is intense, making it more difficult for us to acquire properties, market oil and natural gas and secure trained personnel.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Our ability to acquire additional prospects and to find and develop reserves in the future will depend on our ability to evaluate and select suitable properties and to consummate transactions in a highly competitive environment for acquiring properties, marketing oil and natural gas and securing trained personnel. Also, there is substantial competition for capital available for investment in the oil and natural gas industry. Many of our competitors possess and employ financial, technical and personnel resources substantially greater than ours. Those companies may be able to pay more for productive oil and natural gas properties and exploratory prospects and to evaluate, bid for and purchase a greater number of properties and prospects than our financial or personnel resources permit. The recent trend in the formation of publicly traded exploration and production master limited partnerships has increased the competition for producing property acquisitions. In addition, companies may be able to offer better compensation packages to attract and retain qualified personnel than we are able to offer. The cost to attract and retain qualified personnel has increased over the past three years due to competition and may

Table of Contents

Index to Financial Statements

increase substantially in the future. We may not be able to compete successfully in the future in acquiring prospective reserves, developing reserves, marketing hydrocarbons, attracting and retaining quality personnel and raising additional capital, which could have a material adverse effect on our business.

The loss of senior management or technical personnel could adversely affect operations.

We depend on the services of our senior management and technical personnel. The loss of the services of our senior management or technical personnel, including Harold G. Hamm, our Chairman and Chief Executive Officer, could have a material adverse effect on our operations. We do not maintain, nor do we plan to obtain, any insurance against the loss of any of these individuals.

Terrorist attacks aimed at our energy operations could adversely affect our business.

The continued threat of terrorism and the impact of military and other government action has led and may lead to further increased volatility in prices for oil and natural gas and could affect these commodity markets or financial markets used by us. In addition, the U.S. government has issued warnings that energy assets may be a future target of terrorist organizations. These developments have subjected our oil and natural gas operations to increased risks. Any future terrorist attack on our facilities, those of our customers and, in some cases, those of other energy companies, could have a material adverse effect on our business.

Seasonal weather conditions and lease stipulations adversely affect our ability to conduct drilling activities in some of the areas where we operate.

Oil and natural gas operations in the Rocky Mountains are adversely affected by seasonal weather conditions and lease stipulations designed to protect various wildlife. In certain areas, including parts of Montana, North Dakota, South Dakota, Utah and Wyoming, drilling and other oil and natural gas activities can only be conducted during the spring and summer months. This limits our ability to operate in those areas and can intensify competition during those months for drilling rigs, oilfield equipment, services, supplies and qualified personnel, which may lead to periodic shortages. These constraints and the resulting shortages or high costs could delay our operations and materially increase our operating and capital costs.

Our credit facility contains certain covenants that may inhibit our ability to make certain investments, incur additional indebtedness and engage in certain other transactions, which could adversely affect our ability to meet our future goals.

Our credit facility includes certain covenants that, among other things, restrict:

our investments, loans and advances and the paying of dividends and other restricted payments;

our incurrence of additional indebtedness;

the granting of liens, other than liens created pursuant to the credit facility and certain permitted liens;

mergers, consolidations and sales of all or substantial part of our business or properties;

the hedging, forward sale or swap of our production of crude oil or natural gas or other commodities;

the sale of assets; and

our capital expenditures.

Our credit facility requires us to maintain certain financial ratios, such as leverage ratios. All of these restrictive covenants may restrict our ability to expand or pursue our business strategies. Our ability to comply with these and other provisions of our credit facility may be impacted by changes in economic or business conditions, results of operations or events beyond our control. The breach of any of these covenants could result in a default under our credit facility, in which case, depending on the actions taken by the lenders thereunder or

Table of Contents

Index to Financial Statements

their successors or assignees, such lenders could elect to declare all amounts borrowed under our credit facility, together with accrued interest, to be due and payable. If we were unable to repay such borrowings or interest, our lenders could proceed against their collateral. If the indebtedness under our credit facility were to be accelerated, our assets may not be sufficient to repay in full such indebtedness.

Increases in interest rates could adversely affect our business.

We are exposed to changes in interest rates as a result of borrowings outstanding under our credit facility. After giving effect to this offering and the application of the net proceeds received by us to repay borrowings outstanding under our credit facility, we expect to have total indebtedness outstanding under our credit facility of approximately \$129.6 million. The impact of a 1% increase in interest rates on this amount of debt would result in increased interest expense of approximately \$1.3 million and a corresponding decrease in our net income.

The inability of our significant customers to meet their obligations to us may adversely affect our financial results.

We are subject to credit risk due to concentration of our crude oil and natural gas receivables with several significant customers. The two largest purchasers of our oil and natural gas during the twelve months ended December 31, 2006 accounted for 19% and 14% of our total oil and natural gas sales revenues. We do not require our customers to post collateral. The inability of our significant customers to meet their obligations to us may adversely affect our financial results.

Risks Relating to the Offering and Our Common Stock

The initial public offering price of our common stock may not be indicative of the market price of our common stock after this offering. In addition, our stock price may be volatile.

Prior to this offering, there has been no public market for our common stock. An active market for our common stock may not develop or may not be sustained after this offering. The initial public offering price of our common stock was determined by negotiations between us, our selling shareholder and representatives of the underwriters, based on numerous factors which we discuss in the Underwriting section of this prospectus. This price may not be indicative of the market price for our common stock after this initial public offering. The market price of our common stock could be subject to significant fluctuations after this offering, and may decline below the initial public offering price. You may not be able to resell your shares at or above the initial public offering price. The following factors could affect our stock price:

our operating and financial performance and prospects;

quarterly variations in the rate of growth of our operational and financial indicators, such as net income per share, production, net income and revenues;

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

changes in revenue or earnings estimates or publication of reports by equity research analysts;

speculation in the press or investment community;

sales of our common stock by us, Harold G. Hamm or other shareholders, or the perception that such sales may occur;

general market conditions, including fluctuations in commodity prices; and

domestic and international economic, legal and regulatory factors unrelated to our performance.

The stock markets in general have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock.

Table of Contents

Index to Financial Statements

Following this offering, our Chairman and Chief Executive Officer will own approximately 73.2% of our outstanding common stock, giving him influence and control in corporate transactions and other matters, including a sale of our company.

As of the closing of this offering, Harold G. Hamm, our Chairman and Chief Executive Officer, will beneficially own 122,980,608 shares of our outstanding common stock (assuming no exercise of the underwriters' overallotment option), representing approximately 73.2% of our outstanding common stock. As a result, Mr. Hamm will continue to be our controlling shareholder and will continue to be able to control the election of our directors, determine our corporate and management policies and determine, without the consent of our other shareholders, the outcome of certain corporate transactions or other matters submitted to our shareholders for approval, including potential mergers or acquisitions, asset sales and other significant corporate transactions. As controlling shareholder, Mr. Hamm could cause, delay or prevent a change of control of our company. The interests of Mr. Hamm may not coincide with the interests of other holders of our common stock.

Several affiliated companies controlled by Mr. Hamm provide oilfield, gathering and processing, marketing and other services to us. We expect these transactions will continue in the future and may result in conflicts of interest between Mr. Hamm's affiliated companies and us. We can provide no assurance that any such conflicts will be resolved in our favor.

Purchasers of common stock in this offering will experience immediate and substantial dilution of \$12.25 per share.

Purchasers of our common stock in this offering will experience an immediate and substantial dilution of \$12.25 per share in the net tangible book value per share of common stock from the initial public offering price, and our pro forma net tangible book value as of December 31, 2006 was \$2.75 per share. See "Dilution" for a complete description of the calculation of net tangible book value.

The requirements of being a public company, including compliance with the reporting requirements of the Exchange Act and the requirements of the Sarbanes-Oxley Act, may strain our resources, increase our costs and distract management; and we may be unable to comply with these requirements in a timely or cost-effective manner.

As a public company with listed equity securities, we will need to comply with new laws, regulations and requirements, certain corporate governance provisions of the Sarbanes-Oxley Act of 2002, related regulations of the SEC and the requirements of the New York Stock Exchange (NYSE) with which we are not required to comply as a private company. Complying with these statutes, regulations and requirements will occupy a significant amount of time of our board of directors and management and will increase our costs and expenses. We will need to:

institute a more comprehensive compliance function;

design, establish, evaluate and maintain a system of internal controls over financial reporting in compliance with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 and the related rules and regulations of the SEC and the Public Company Accounting Oversight Board;

comply with rules promulgated by the NYSE;

prepare and distribute periodic public reports in compliance with our obligations under the federal securities laws;

establish new internal policies, such as those relating to disclosure controls and procedures and insider trading;

involve and retain to a greater degree outside counsel and accountants in the above activities; and

establish an investor relations function.

Table of Contents

Index to Financial Statements

In addition, we also expect that being a public company subject to these rules and regulations will require us to accept less director and officer liability insurance coverage than we desire or to incur substantial costs to obtain coverage. These factors could also make it more difficult for us to attract and retain qualified members of our board of directors, particularly to serve on our audit committee, and qualified executive officers. As a result, compliance with the requirements of the Sarbanes-Oxley Act could have a material adverse effect on our business.

Failure by us to achieve and maintain effective internal control over financial reporting in accordance with the rules of the SEC could harm our business and operating results and/or result in a loss of investor confidence in our financial reports, which could have a material adverse effect on our business and stock price.

We are in the process of evaluating our internal controls systems to allow management to report on, and our independent auditors to audit, our internal controls over financial reporting. We are also in the process of performing the system and process evaluation and testing (and any necessary remediation) required to comply with the management certification and auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002. We will be required to comply with Section 404 for the year ending December 31, 2008. However, we cannot be certain as to the timing of completion of our evaluation, testing and remediation actions or the impact of the same on our operations. Furthermore, upon completion of this process, we may identify control deficiencies of varying degrees of severity under applicable SEC and Public Company Accounting Oversight Board rules and regulations that remain unremediated. As a public company, we will be required to report, among other things, control deficiencies that constitute a material weakness or changes in internal controls that, or that are reasonably likely to, materially affect internal controls over financial reporting. A material weakness is a significant deficiency or combination of significant deficiencies that results in more than a remote likelihood that a material misstatement of the annual or interim consolidated financial statements will not be prevented or detected. If we fail to implement the requirements of Section 404 in a timely manner, we might be subject to sanctions or investigation by regulatory authorities such as the SEC. In addition, failure to comply with Section 404 or the report by us of a material weakness may cause investors to lose confidence in our consolidated financial statements, and our stock price may be adversely affected as a result. If we fail to remedy any material weakness, our consolidated financial statements may be inaccurate, we may face restricted access to the capital markets and our stock price may be adversely affected.

We have no plans to pay dividends on our common stock, and therefore, you may not receive funds without selling your shares.

On January 10, 2007, we declared a cash dividend of approximately \$18.8 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared, of which \$16.9 million was paid to our principal shareholder. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On April 12, 2007, we paid \$33.1 million of the dividend declared, of which \$30.0 million was paid to our principal shareholder. We do not anticipate paying any additional cash dividends on our common stock in the foreseeable future. We currently intend to retain future earnings, if any, to finance the expansion of our business. Our future dividend policy is within the discretion of our board of directors and will depend upon various factors, including our business, financial condition, results of operations, capital requirements and investment opportunities.

We are a controlled company within the meaning of NYSE rules and, as a result, we will qualify for, and may rely on, exemptions from certain corporate governance requirements.

Because Harold G. Hamm will beneficially own in excess of 50% of our outstanding shares of common stock after the completion of this offering, he will be able to control the composition of our board of directors

Table of Contents

Index to Financial Statements

and direct our management and policies. We also will be deemed to be a controlled company under the rules of the NYSE. Under these rules, we are not required to comply with certain corporate governance requirements of the NYSE, including:

the requirement that a majority of our board of directors consist of independent directors;

the requirement that we have a nominating/corporate governance committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and

the requirement that we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities.

Following this offering, we may utilize some or all of these exemptions. Accordingly, you may not have the same protections afforded to shareholders of companies that are subject to all of the corporate governance requirements of the NYSE. Mr. Hamm's significant ownership interest could adversely affect investors' perceptions of our corporate governance.

Provisions in our organizational documents and under Oklahoma law could delay or prevent a change in control of our company, which could adversely affect the price of our common stock.

We are an Oklahoma corporation. The existence of some provisions in our organizational documents, which we will amend and restate prior to the closing of this offering, and under Oklahoma law could delay or prevent a change in control of our company, which could adversely affect the price of our common stock. The provisions in our amended and restated certificate of incorporation and bylaws that could delay or prevent an unsolicited change in control of our company include a staggered board of directors, board authority to issue preferred stock and advance notice provisions for director nominations or business to be considered at a shareholder meeting. See [Description of Capital Stock](#) [Anti-Takeover Effects of Provisions of Our Certificate of Incorporation and Bylaws](#) and [Oklahoma Law](#).

Table of Contents

Index to Financial Statements

Use of Proceeds

We will receive net proceeds of approximately \$122.9 million from the sale of the 8,850,000 shares of common stock in this offering, after deducting underwriting discounts and estimated offering expenses. We expect to use the net proceeds of this offering to repay a portion of the borrowings outstanding under our credit facility incurred in connection with recent capital expenditures and cash dividends to our current shareholders. As of May 8, 2007, total borrowings under our credit facility were \$252.5 million. Our credit facility has a maturity date in April 2011 and currently bears interest at a rate of 6.45%.

We will not receive any proceeds from the sale of the shares of common stock by the selling shareholder. The selling shareholder will receive net proceeds of approximately \$291.2 million from the sale of the 20,650,000 shares of our common stock in this offering. We will pay all expenses relating to this offering, other than underwriting discounts related to the shares sold by the selling shareholder. If the underwriters overallotment option to purchase additional shares is exercised in full, the selling shareholder's net proceeds will be approximately \$353.6 million.

Dividend Policy

On January 10, 2007, we declared a cash dividend of approximately \$18.8 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared, of which \$16.9 million was paid to our principal shareholder. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On April 12, 2007, we paid \$33.1 million of the dividend declared, of which \$30.0 million was paid to our principal shareholder. We are currently a subchapter S-corporation under the rules and regulations of the Internal Revenue Service. As a result, income taxes attributable to our federal and state income are payable by our shareholders. The dividends have been paid to shareholders to fund their taxes due and estimated tax payments. In connection with the completion of this offering, we will convert from a subchapter S-corporation to a subchapter C-corporation, and we do not anticipate paying any additional cash dividends on our common stock in the foreseeable future. The selling shareholder has received dividends of approximately \$13.5 million, \$1.8 million, \$79.0 million and \$46.9 million in 2004, 2005, 2006 and 2007, respectively. We currently intend to retain future earnings, if any, to finance the expansion of our business. Our future dividend policy is within the discretion of our board of directors and will depend upon various factors, including our results of operations, financial condition, capital requirements and investment opportunities.

Table of ContentsIndex to Financial Statements**Capitalization**

The following table shows our capitalization as of December 31, 2006:

on a historical basis; and

on a pro forma basis to reflect our conversion, concurrent with the closing of this offering, from a subchapter S-corporation to a subchapter C-corporation; reclassification of equity compensation accruals; the effect of an 11 for 1 stock split to be effected as a stock dividend prior to the consummation of this offering and other transactions for which pro forma presentation is necessary in conjunction with this offering and to reflect this offering at the initial public offering price of \$15.00 per share and the application of the net proceeds therefrom as described under Use of Proceeds.

We derived this table from, and it should be read in conjunction with and is qualified in its entirety by reference to, the historical consolidated financial statements and the accompanying notes included elsewhere in this prospectus. You should read this information in conjunction with these consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations.

	As of December 31, 2006	
	Historical(1)	Pro forma
	(as restated)	
	(in thousands)	
Cash and cash equivalents(2)	\$ 7,018	\$ 7,941
Long-term debt, including current maturities(2)	140,000	
Shareholders' equity:		
Common stock, \$.01 par value; 20,000,000 shares historical, 500,000,000 shares pro forma authorized, 14,464,204 shares historical, 167,956,244 pro forma issued and outstanding(3)	144	1,680
Additional paid-in capital(4)	27,087	394,753
Retained earnings(4)	463,255	65,140
Accumulated other comprehensive loss, net of taxes	(25)	(25)
Total shareholders' equity	490,461	461,548
Total capitalization	\$ 630,461	\$ 461,548

(1) Our 2006 consolidated financial statements were restated due to increased stock-based compensation as a result of adjustments that reflected an increased historical fair value of our common stock for financial reporting purposes. See Note 1 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.

(2) Pro forma adjustment to reflect use of proceeds in connection with this offering to reduce debt with the remainder increasing cash.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

- (3) Pro forma adjustment to reflect the reclassification of \$1.4 million from additional paid-in capital to common stock in order to adjust for the 11 for 1 stock split to be effected as a stock dividend in connection with the consummation of the offering and par value for newly issued shares.

- (4) Pro forma adjustments as described in the table below.

Table of Contents**Index to Financial Statements**

The following table reconciles historical additional paid-in capital and retained earnings to the pro forma amounts:

	Additional	
	Paid-In	Retained
	Capital	Earnings
	(in thousands)	
Historical (as restated)	\$ 27,087	\$ 463,255
Underwriting discount	(7,965)	
Reclassification of liability for equity compensation(1)	22,502	
Proceeds of offering	132,661	
Offering costs(2)	(150)	(350)
Deferred taxes on C-corporation conversion(3)		(175,700)
Reclassification of additional paid-in-capital(4)	(1,447)	
Reclassification of undistributed earnings	222,065	(222,065)
Pro forma	\$ 394,753	\$ 65,140

(1) Pro forma adjustment to reflect the reclassification of the liability for equity compensation to additional paid-in capital.

(2) Pro forma adjustment for offering costs not already recognized in historical results. Offering costs consist principally of legal, accounting and printing costs associated with our initial public offering and are estimated to total approximately \$1.9 million. Approximately \$1.4 million of the costs have already been incurred and reflected in the historical shareholders' equity. These costs have been expensed to date because we were not planning to sell stock in the offering. We now intend to sell shares representing approximately 30% of the total offering and will not expense that percentage of offering costs incurred in the future. The balance of offering costs incurred in the future will be expensed.

(3) Pro forma adjustment to charge earnings to recognize deferred taxes upon our conversion from a non-taxable subchapter S-corporation to a taxable subchapter C-corporation.

(4) Pro forma adjustment to reflect the reclassification of \$1.4 million from additional paid-in capital to common stock in order to adjust for the 11 for 1 stock split to be effected as a stock dividend in connection with the consummation of this offering.

Table of ContentsIndex to Financial Statements

Dilution

Dilution is the amount by which the offering price paid by purchasers of common stock sold in this offering will exceed the net tangible book value per share of common stock after the offering. As of December 31, 2006, on a pro forma basis, after giving effect to adjustments to convert from a subchapter S-corporation to a subchapter C-corporation and reclassification of compensation accruals, our net tangible book value would have been \$337.3 million, or \$2.12 per share. After giving effect to the sale of common stock offered by us pursuant to this prospectus and the receipt of the estimated net proceeds, after deducting underwriting discounts and estimated offering expenses, our net tangible book value at December 31, 2006 would have been \$2.75 per share. This represents an immediate and substantial increase in the net tangible book value of \$0.63 per share to existing shareholders and an immediate dilution of \$12.25 per share to new investors purchasing common stock in this offering, resulting from the difference between the offering price and the net tangible book value after this offering. The following table illustrates the per share dilution to new investors who purchase common stock in the offering:

Offering price per share:	\$ 15.00
Pro forma net tangible book value per share at December 31, 2006	\$ 2.12
Increase per share attributable to new investors	0.63
	<hr/>
Pro forma net tangible book value per share after this offering	2.75
	<hr/>
Dilution per share to new investors	\$ 12.25
	<hr/>

The following table sets forth, on a pro forma as adjusted basis as of December 31, 2006, the number of shares of common stock purchased from us, the book value of the total consideration paid to us and the book value of the average consideration per share paid to us by our existing shareholders and by the new investors in this offering at the initial public offering price of \$15.00 per share after deducting underwriting discounts and estimated offering expenses.

	Shares Issued		Book Value of Total Consideration		Book Value of Average Consideration Per Share
	Number	%	Amount (000s)	%	
New investors	8,850,000	5%	\$ 124,285	27%	\$ 14.04
Existing shareholders	159,106,244	95%	\$ 337,263	73%	\$ 2.12
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total	167,956,244	100%	\$ 461,548	100%	\$ 2.75

Selected Historical and Pro Forma Consolidated Financial Information

This section presents our selected historical and pro forma consolidated financial data. The selected historical consolidated financial data presented below is not intended to replace our historical consolidated financial statements.

The following historical consolidated financial data, as it relates to each of the fiscal years ended December 31, 2002 through 2006, has been derived from our audited historical consolidated financial statements for such periods. You should read the following selected historical consolidated financial data in connection with Capitalization, Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical consolidated financial statements and related notes included elsewhere in this prospectus. The selected historical consolidated results are not necessarily indicative of results to be expected in future periods.

The selected pro forma financial data reflect the tax effects of our conversion, concurrent with the closing of this offering, from a subchapter S-corporation to a subchapter C-corporation and the earnings per share impact of our 11 for 1 stock split to be effected in the form of a stock dividend concurrent with the closing of this offering. The pro forma earnings per share adjustments for 2006 also give effect to the number of shares to be issued in this offering whose net proceeds would be sufficient to pay the \$52.1 million of cash dividends declared in 2007.

- (1) Our 2006 consolidated financial statements were restated due to increased stock-based compensation as a result of adjustments that reflected an increased historical fair value of our common stock for financial reporting purposes. See Note 1 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.
- (2) Crude oil marketing and trading captions consist of our marketing activities under which crude oil production was sold at the wellhead and transported to a local hub where we purchased the barrels back to exchange at Cushing, Oklahoma in order to minimize pricing differentials with the NYMEX oil futures contract. We adopted Emerging Issues Task Force (EITF) 04-13 on January 1, 2005, which allowed certain purchase and sales transactions with the same counterparty to be combined and accounted for as a single transaction under the guidance of Accounting Principles Board Opinion No. 29. In 2005, we netted \$39.8 million of crude oil marketing and trading revenues and \$39.7 million of crude oil marketing and trading expenses under oil and natural gas sales. Prior to the adoption of EITF 04-13, we presented crude oil marketing and trading revenues and expenses gross under the guidance provided by EITF 99-19, Reporting Revenues Gross as a Principal and/or Net as an Agent. Effective March 2005, we ceased marketing our crude oil production under these arrangements. Thereafter, we have sold our crude oil at the wellhead. Certain of these sales have been to our affiliates, as described under Certain Relationships and Related Party Transactions.
- (3) We have included stock-based compensation of \$0.2 million, \$0.2 million, \$2.0 million, \$13.7 million and \$10.9 million in general and administrative expenses for the years ended December 31, 2002, 2003, 2004, 2005 and 2006, respectively. See Management's Discussion and Analysis of Financial Condition and Results of Operations as well as Note 9 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.
- (4) Properties owned by us at May 31, 1997, the date we converted into a subchapter S-corporation from a subchapter C-corporation, may be subject to federal taxation if sold for an amount in excess of the then tax basis for the sold assets. During 2005, we incurred federal taxes

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

due to the sale of assets acquired prior to May 31, 1997. The benefit recorded during 2006 reflects a change in estimate of the original provision recorded for federal taxes incurred.

Table of Contents**Index to Financial Statements**

- (5) In July 2004, we sold all of the outstanding stock in Continental Gas, Inc., a wholly owned subsidiary, to our shareholders. The Continental Gas, Inc. assets included seven gas gathering systems and three gas-processing plants. These assets represented our entire gas gathering, marketing and processing segment. We have accounted for these operations as discontinued operations.
- (6) We adopted Statement of Financial Accounting Standards No. 143, Accounting for Asset Retirement Obligations and recorded the cumulative effect of the change in accounting principle on January 1, 2003.
- (7) EBITDAX represents earnings before interest expense, income taxes (when applicable), depreciation, depletion, amortization and accretion, property impairments, exploration expense and non-cash compensation expense. EBITDAX is not a measure of net income or cash flow as determined by generally accepted accounting principles (GAAP). EBITDAX should not be considered as an alternative to, or more meaningful than, net income or cash flow as determined in accordance with GAAP or as an indicator of a company's operating performance or liquidity. Certain items excluded from EBITDAX are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure, as well as the historic costs of depreciable assets, none of which are components of EBITDAX. Our computations of EBITDAX may not be comparable to other similarly titled measures of other companies. We believe that EBITDAX is a widely followed measure of operating performance and may also be used by investors to measure our ability to meet future debt service requirements, if any. Our credit facility requires that we maintain a total debt to EBITDAX ratio of no greater than 3.75 to 1 on a rolling four-quarter basis. Our credit facility defines EBITDAX consistently with the definition of EBITDAX utilized and presented by us. At December 31, 2005 and 2006, this ratio was approximately 0.5 to 1 and 0.4 to 1, respectively. The following table represents a reconciliation of our net income (loss) to EBITDAX:

	Year ended December 31,				
	2002	2003	2004	2005	2006
					(as restated)
					(in thousands)
Net income (loss)	\$ (20,032)	\$ 2,340	\$ 27,864	\$ 194,307	\$ 253,088
Interest expense	18,216	19,761	23,617	14,220	11,310
Provision (benefit) for income taxes				1,139	(132)
Depreciation, depletion, amortization and accretion	29,010	40,256	38,627	49,802	65,428
Property impairments	25,686	8,975	11,747	6,930	11,751
Exploration expense	10,229	17,221	12,633	5,231	19,738
Equity compensation	179	197	2,010	13,715	10,932
EBITDAX	\$ 63,288	\$ 88,750	\$ 116,498	\$ 285,344	\$ 372,115

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our historical consolidated financial statements and notes, as well as the selected historical consolidated financial data included elsewhere in this prospectus.

Overview

We are engaged in oil and natural gas exploration and exploitation activities in the Rocky Mountain, Mid-Continent and Gulf Coast regions of the United States. Crude oil comprised 83% of our 118.3 MMBoe of estimated proved reserves as of December 31, 2006 and 83% of our 9,018 MBoe of production for the year then ended. We seek to operate wells in which we own an interest, and we operated wells that accounted for 95% of our PV-10 and 82% of our 1,589 gross wells as of December 31, 2006. By controlling operations, we are able to more effectively manage the cost and timing of exploration and development of our properties, including the drilling and fracture stimulation methods used.

Our business strategy has focused on reserve and production growth through exploration and development. For the three-year period ended December 31, 2006, we added 50,421 MBoe of proved reserves through extensions and discoveries, compared to 780 MBoe added through purchases. During this period, our production increased from 5,154 MBoe in 2004 to 9,018 MBoe in 2006. An aspect of our business strategy has been to acquire large undeveloped acreage positions in new or developing resource plays. As of December 31, 2006, we held approximately 1,310,000 gross (738,000 net) undeveloped acres, including 342,000 net acres in the Bakken field in Montana and North Dakota and 162,000 net acres in the New Albany Shale, Lewis Shale, Marfa Basin and Woodford Shale projects. As an early entrant in new or emerging plays, our costs to acquire undeveloped acreage have generally been less than those of later entrants into a developing play. As an example of the cost advantage of entering a play early, our per acre costs for our lease acquisitions in the North Dakota Bakken field during 2003 and 2004 were approximately 80% lower than the per acre costs paid by third parties and by us in the federal and state lease auctions for acreage near our holdings in that area during 2005. However, as an early entrant, we are exposed to the risk that the value of our undeveloped acreage is diminished by unsuccessful drilling results.

How We Evaluate Our Operations

We use a variety of financial and operational measures to assess our performance. Among these measures are the following:

- (1) Volumes of oil and natural gas produced;
- (2) Oil and natural gas prices realized;

- (3) Volumetric operating and administrative costs; and

- (4) EBITDAX.

Volumes of Oil and Natural Gas Produced

For our operated properties in the Red River units and the Bakken field, we receive daily production estimates that enable us to monitor our production on a current basis. We believe the timeliness of this information and the control we exert as an operator enables us to respond promptly to production difficulties. Over the past three years our equivalent production volumes have increased 75% or 3,864 MBoe due primarily to

Table of Contents**Index to Financial Statements**

a 103% increase in oil production. The following table presents our production volumes for each of the three years ended December 31, 2006:

	Year Ended December 31,			Three-year period	
	2004	2005	2006	Volume increase (decrease)	Percent increase (decrease)
MBbls	3,688	5,708	7,480	3,792	103%
MMcf	8,794	9,006	9,225	431	5%
MBoe	5,154	7,209	9,018	3,864	75%

The increase in our production has been the result of a favorable response to additional field development and enhanced recovery efforts in our Red River units coupled with exploration and development within our other producing areas, primarily the Montana Bakken field.

Oil and Natural Gas Prices Realized

We market our oil and natural gas production to a variety of purchasers based on regional pricing. A significant portion of our oil and natural gas production has been marketed to affiliates as discussed under Certain Relationships and Related Party Transactions.

The following table presents the NYMEX oil and natural gas prices, our realized oil and natural gas prices, exclusive of the effects of hedging, and the differences for each of the three years ended December 31, 2006. The NYMEX oil price was determined each month as the calendar month average of the prompt NYMEX crude oil futures contract price and, the NYMEX natural gas price, as the average of the last three trading days of the prompt NYMEX natural gas futures contract price. The NYMEX natural gas futures contract price is quoted on an MMBtu basis. For purposes of comparison, in the table below, the NYMEX natural gas price was converted to an Mcf basis at a one-to-one conversion:

	Year ended December 31,		
	2004	2005	2006
NYMEX oil price (\$/Bbl)	\$ 41.95	\$ 57.69	\$ 66.34
Realized oil price before hedging (\$/Bbl)	38.85	52.45	55.30
Difference	\$ 3.10	\$ 5.24	\$ 11.04
NYMEX natural gas price (\$/Mcf)	\$ 6.10	\$ 8.54	\$ 7.24

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Realized natural gas price (\$/Mcf)	5.06	6.93	6.08
Difference	\$ 1.04	\$ 1.61	\$ 1.16

The differences are subject to variability due to quality and location pricing fluctuations caused by localized supply and demand fundamentals and transportation availability. The increase in the difference between the NYMEX oil price and our realized oil price during 2006 was attributable to higher oil imports and production in the Rocky Mountain region, lower demand by local Rocky Mountain refineries due to downtime for maintenance and reduced seasonal demand for gasoline and downstream transportation capacity constraints. We are unable to predict when, or if, the difference will revert back to pre-2006 levels.

Our revenues and net income are sensitive to oil and natural gas prices. A \$1.00 per Bbl change in realized oil prices would change our reported 2006 revenues and net income by approximately \$7.5 million and \$7.1 million, respectively. Similarly, a \$0.10 per Mcf change in realized natural gas prices would change our reported 2006 revenues and net income by approximately \$923,000 and \$879,000, respectively.

Table of Contents**Index to Financial Statements**

For the year ended December 31, 2004, we realized oil hedging losses of \$6.4 million. As a result of our limited bank borrowings and strong operational cash flows, we did not enter into any hedges for our 2005 and 2006 production, and we do not currently have plans to hedge any of our 2007 production.

Volumetric Operating and Administrative Costs

Two other measures that we monitor and analyze are production expense per Boe sold and general and administrative expense per Boe sold. We believe these are important measures because they are indicators of operating cost efficiency.

The following table presents our production expense and general and administrative expense, inclusive of stock-based compensation, per Boe sold for each of the three years ended December 31, 2006:

	Year ended December 31,		
	2004	2005	2006
Production expense (\$/Boe)	\$ 8.49	\$ 7.32	\$ 6.99
General and administrative expense (\$/Boe)	2.41	4.34	3.45

Our per unit production expense was higher during 2004 due to the start of our enhanced recovery project in the Red River units which initially lowered volumes and increased production expense. Our per unit production expense declined in 2005 and 2006 as we are experiencing higher production volumes due to continued drilling and higher production in conjunction with the completion of the enhanced recovery program. Generally as production increases, we will see increased production expense due to additional well costs, such as lifting and workover costs, and additional personnel costs although these costs may be lower on a volumetric basis due to higher production. The increase in our per unit general and administrative expense in 2005 was primarily due to higher compensation expense. The largest component of the increase was equity compensation, which contributed \$2.0 million, \$13.7 million and \$10.9 million during the years ended December 31, 2004, 2005 and 2006, respectively. The annual increases in equity compensation through 2005 were attributable to additional equity grants. The decline in equity compensation during 2006 was attributable to a lower number of equity grants. We compete with other companies for personnel, particularly in the operational and technical (engineering and geologic) aspects of our business. To remain competitive, we compare the compensation we pay our employees to that of our competitors through surveys, employee feedback and other means. We have experienced higher compensation expense due to competitive pressures, normal merit increases and incentive compensation. Our incentive compensation for 2004 was \$413,000 compared to \$4.0 million in 2005 and \$2.9 million in 2006.

EBITDAX

We calculate and define EBITDAX as net income before interest expense, income taxes (when applicable), depreciation, depletion, amortization and accretion, property impairments, exploration expense and non-cash compensation expense. EBITDAX is used as a financial measure by our management team and by other users of our consolidated financial statements such as our commercial bank lenders, investors, research analysts and others to assess:

Our operating performance and return on capital in comparison to other independent exploration and production companies, without regard to financial or capital structure;

The financial performance of our assets and valuation of the entity without regard to financing methods, capital structure or historical cost basis; and

Our ability to generate cash sufficient to pay interest costs and support our indebtedness.

Table of Contents**Index to Financial Statements**

The following table presents our EBITDAX for each of the three years ended December 31, 2006 (in thousands):

	<u>Year ended December 31,</u>		
	<u>2004</u>	<u>2005</u>	<u>2006</u>
EBITDAX	\$ 116,498	\$ 285,344	\$ 372,115

EBITDAX is a financial measure that is reported to our lenders each calendar quarter. Our credit facility requires that our total debt to EBITDAX ratio be no greater than 3.75 to 1 on a rolling four quarter basis. This ratio was 0.4 to 1 at December 31, 2006. Our credit facility defines EBITDAX consistently with the definition of EBITDAX utilized and presented by us. EBITDAX is not and should not be considered as an alternative to net income, operating income, cash flows from operating activities or any other measure of financial performance presented in accordance with GAAP. For a reconciliation of our consolidated net income to EBITDAX, see footnote (5) to Summary Historical and Pro Forma Consolidated Financial Data.

Recent Events

Cash Dividends. On January 10, 2007, we declared a cash dividend of approximately \$18.8 million, to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared, of which \$16.9 million was paid to our principal shareholder. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million to our shareholders of record and, subject to forfeiture, to holders of unvested restricted stock. On April 12, 2007, we paid \$33.1 million of the dividend declared, of which \$30.0 million was paid to our principal shareholder. We are currently a subchapter S-corporation under the rules and regulations of the Internal Revenue Service. As a result, income taxes attributable to our federal and state income are payable by our shareholders. The dividends have been paid to shareholders to fund their taxes due and estimated tax payments and not in connection with our contemplated initial public offering or conversion to a subchapter C-corporation. Upon the consummation of this offering, we will have more shareholders than the IRS rules and regulations governing S-corporations allow and, therefore, we will convert automatically from a subchapter S-corporation to a subchapter C-corporation. In connection with this conversion, we will record a charge to earnings (estimated to be approximately \$175.7 million if the conversion had occurred on December 31, 2006) to recognize deferred taxes. We do not anticipate paying any additional cash dividends on our common stock in the foreseeable future.

Table of Contents**Index to Financial Statements****Results of Operations**

The following tables present selected financial and operating information for each of the three years ended December 31, 2006:

	Year ended December 31,		
	2004	2005	2006
			(as restated)
	(in thousands, except price data)		
Oil and natural gas sales	\$ 181,435	\$ 361,833	\$ 468,602
Total revenues(1)	418,910	375,764	483,652
Operating costs and expenses(1)	365,284	166,965	221,128
Other expense	26,810	13,353	9,568
Income from continuing operations before income taxes	26,816	195,446	252,956
Provision (benefit) for income taxes		1,139	(132)
Income from continuing operations	26,816	194,307	253,088
Discontinued operations	1,680		
Loss on sale of discontinued operations	(632)		
Net income	\$ 27,864	\$ 194,307	\$ 253,088
Sales volumes:			
Oil (MBbl)(2)	3,688	5,708	7,459
Natural gas (MMcf)	8,794	9,006	9,225
Oil equivalents (MBoe)	5,154	7,209	8,997
Average prices(2):			
Oil, without hedges (\$/Bbl)	\$ 38.85	\$ 52.45	\$ 55.30
Oil, with hedges (\$/Bbl)	37.12	52.45	55.30
Natural gas (\$/Mcf)	5.06	6.93	6.08
Oil equivalents, without hedges (\$/Boe)	36.45	50.19	52.09
Oil equivalents, with hedges (\$/Boe)	35.20	50.19	52.09

(1) Revenues for 2004 include \$226,664,000 for crude oil marketing and trading, and operating expenses include \$227,210,000 for crude oil marketing and trading.

(2) Oil sales volumes are 21 MBbls less than oil production volumes for the year ended 2006. Average prices have been calculated using sales volumes.

Restatement

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Subsequent to March 7, 2006, the date on which we first filed the registration statement of which this prospectus forms a part, management determined that, for financial reporting purposes, the amount of stock-based compensation expense related to restricted stock and stock options should be adjusted to reflect the fair value of our restricted stock and stock options in accordance with SFAS 123(R). For calculating stock-based compensation expense for financial reporting purposes, we adjusted the fair value to \$11.96 per share from \$8.84 per share for restricted stock and to \$10.49 per share from \$5.90 per share for stock options at December 31, 2006. As a result, our consolidated financial statements as of and for the year ended December 31, 2006 have been restated from the amounts previously reported to reflect the changes in stock-based compensation expense. Those changes resulted in net income being reduced by \$8.1 million for the year ended December 31, 2006. See Notes 1 and 9 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus for additional information. Management's Discussion and Analysis of Financial Condition and Results of Operations reflects this restatement.

Table of Contents**Index to Financial Statements*****Year Ended December 31, 2006 Compared to the Year Ended December 31, 2005******Revenues.***

Oil and natural gas sales. Oil and natural gas sales for the year ended December 31, 2006 were \$468.6 million, a 30% increase over sales of \$361.8 million for the comparable period of 2005. Increased sales resulted from additional sales volumes, which increased 25%, and an increase of \$1.90 in our realized price per Boe from \$50.19 to \$52.09. During 2006, we experienced an increase in the differential between NYMEX prices and our realized crude oil prices. The differential per barrel for the twelve months ended December 31, 2006 was \$11.04 as compared to \$5.24 for the comparable period of 2005. We realized a crude oil differential in December 2006 of \$13.32 per Bbl compared to a high of \$14.25 per Bbl in March 2006. Among the factors contributing to the higher differentials were higher Canadian oil imports, increases in production in the Rocky Mountain region, refinery downtime in the Rocky Mountain region, downstream transportation capacity constraints, and reduced seasonal demand for gasoline. We are unable to predict when, or if, the differential will revert back to pre-2006 levels.

The following tables reflect our production by product and region for the periods presented.

	Year ended December 31,				
	2005		2006		Percent increase
	Volume	Percent	Volume	Percent	
Oil (MBbl)(1)	5,708	79%	7,480	83%	31%
Natural Gas (MMcf)	9,006	21%	9,225	17%	2%
Total (MBoe)	7,209	100%	9,018	100%	25%

	Year ended December 31,				
	2005		2006		Percent increase (decrease)
	MBoe	Percent	MBoe	Percent	
Rocky Mountain	5,410	75%	7,159	79%	32%
Mid-Continent	1,361	19%	1,497	17%	10%
Gulf Coast	438	6%	362	4%	(17)%
Total MBoe	7,209	100%	9,018	100%	25%

(1) Oil sales volumes are 21 MBbls less than oil production volumes for the year ended December 31, 2006.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Oil production volumes increased 31% during the year ended December 31, 2006 in comparison to the year ended December 31, 2005. Production increases in the Bakken field contributed incremental volumes in excess of 2005 levels of 815 MBbls, and the Red River units contributed 865 MBbls of incremental production. Initial production commenced in the Bakken field in August 2003 and has increased thereafter, as we have continued exploration and development activities within the field. Favorable results from the enhanced recovery program and additional field development have been the primary contributors to production growth in the Red River units.

Oil and Natural Gas Service Operations. Our oil and natural gas service operations consist primarily of sales of high-pressure air and the treatment and sale of lower quality crude oil, or reclaimed oil. We initiated the sale of high-pressure air from our Red River units to a third party in 2004 and recorded revenues of \$3.1 million during 2006 and \$3.0 million during 2005. Higher prices for reclaimed oil sold from our central treating unit in 2006 increased oil and natural gas service operations revenues by \$0.8 million to \$9.4 million at year end 2006. Associated oil and natural gas service operations expenses increased \$0.2 million to \$8.2 million during the year ended December 31, 2006 from \$8.0 million during 2005 due mainly to an increase in the costs of purchasing and treating oil for resale.

Table of Contents**Index to Financial Statements***Operating Costs and Expenses*

Production Expense and Tax. Production expense increased \$10.1 million or 19% during the year ended December 31, 2006 to \$62.9 million from \$52.8 million during the year ended December 31, 2005. The increase in 2006 was due to increases of \$3.8 million in workovers, \$1.4 million in energy and chemical costs, \$1.5 million in repairs, \$1.1 million in overhead, \$0.6 million in outside operated well costs, \$0.5 million in saltwater disposal expenses, \$0.4 million in contract labor costs, and as a result of new wells drilled.

Production taxes increased \$6.3 million during the year ended December 31, 2006 to \$22.3 million from \$16.0 million during 2005. The majority of the production tax increase was \$5.9 million in the Rocky Mountain region. Production tax as a percentage of oil and natural gas sales was 4.4% for the year ended December 31, 2005 compared to 4.8% for the year ended December 31, 2006. Production taxes are based on the wellhead values of production and vary by state. Additionally, some states offer exemptions or reduced production tax rates for wells that produce less than a certain quantity of oil or gas and to encourage certain activities, such as horizontal drilling and enhanced recovery projects. In Montana, new horizontal wells qualify for a tax incentive and are taxed at 0.76% during the first 18 months of production. After the 18 month incentive period expires, the tax rate increases to 9.26%. In 2006, 33 new producing wells were added in Montana at a tax rate of 0.76% and 21 wells reached the end of their exemption period and their tax rate was increased to 9.26%. Also in the Rocky Mountain region, 8 wells were added in North Dakota at a rate of 11.5%. As production tax incentives we currently receive for horizontal wells in Montana continue to reach the end of the 18 month incentive period, our overall rate is expected to increase.

On a unit of sales basis, production expense and production taxes were as follows:

	Year ended		Percent increase (decrease)
	December 31,		
	2005	2006	
Production expense (\$/Boe)	\$ 7.32	\$ 6.99	(5)%
Production tax (\$/Boe)	2.22	2.48	12%
Production expense and tax (\$/Boe)	\$ 9.54	\$ 9.47	(1)%

Exploration Expense. Exploration expenses consist primarily of dry hole costs and exploratory geological and geophysical costs that are expensed as incurred. Exploration expenses increased \$14.5 million in 2006 to \$19.7 million due primarily to an increase in dry hole expense of \$11.9 million and an increase in seismic expenses of \$2.0 million. The Rocky Mountain region contributed 54% of the dry hole costs, 24% was in the Mid-Continent region and the remaining 22% was in the Gulf Coast region. The increase in dry hole expense was due to a higher level of drilling during 2006. Exploration capital expenditures were \$68.7 million in 2006 compared to \$9.3 million in 2005.

Depreciation, Depletion, Amortization and Accretion (DD&A.) DD&A on oil and gas properties increased \$15.3 million in 2006 due to increased production and additional properties being added through our drilling program. The DD&A rate on oil and gas properties for 2005 was \$6.50 per Boe compared to \$6.91 per Boe for 2006. Accretion expense increased \$0.1 million to \$1.7 million during 2006 from \$1.6 million during 2005.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Property Impairments. Property impairments increased during 2006 by \$4.9 million to \$11.8 million compared to \$6.9 million for 2005. Non-producing properties consist of undeveloped leasehold costs and costs associated with the purchase of certain proved undeveloped reserves. Individually significant non-producing properties are periodically assessed for impairment of value and a loss is recognized at the time of impairment by providing an impairment allowance. Other non-producing properties are amortized on a composite method based on our estimated experience of successful drilling and the average holding period. Impairment of non-producing properties increased \$1.0 million during 2006 to \$5.4 million compared to \$4.4 million for 2005.

Table of Contents

Index to Financial Statements

Impairment provisions for developed oil and gas properties were approximately \$2.5 million for the year ended December 31, 2005 and \$6.3 million for the year ended December 31, 2006. The increase in 2006 impairment expense resulted primarily from developmental well dry holes and properties where the associated field level reserves were not sufficient to recover capitalized drilling and completion costs.

General and Administrative Expense. General and administrative expense decreased primarily due to a \$2.8 million decrease in equity compensation expense net of a charge of \$1.2 million associated with our President's non-equity compensation plan as described under Management Summary Compensation Table, associated with restricted stock grants and stock options under our long-term incentive plans. The decrease in equity compensation was attributable to a reduction in the number of equity grants in 2006. On a volumetric basis, general and administrative expense was \$3.45 per Boe for 2006 compared to \$4.34 per Boe for 2005. We have granted stock options and restricted stock to our employees. The terms of the grants require that, while we are a private company, we are required to purchase vested options and restricted stock at each employee's request at a per share amount derived from our shareholders' equity value adjusted quarterly for our PV-10. The obligation to purchase the options is eliminated in the event we become a reporting company under Section 12 of the Exchange Act.

Gain on Sale of Assets. During 2005, we realized a gain of \$6.1 million on the sale of oil and gas wells and a loss of \$3.1 million on the termination of compressor capital leases. Gains in 2006 amounted to approximately \$0.3 million on miscellaneous asset sales.

Interest Expense. Interest expense decreased 20% for 2006 due to a lower average outstanding debt balance on our credit facility of \$156.6 million compared to \$184.0 million for 2005 even though the weighted average interest rate on our credit facility was 6.36% for the year ended December 31, 2006 compared to 5.10% for the year ended December 31, 2005. Additionally, in 2005, we had an outstanding balance due to our principal shareholder for \$48.0 million which was paid in full during December 2005. We paid \$2.9 million in interest on this note during 2005 at a rate of 6%.

Table of Contents**Index to Financial Statements*****Year Ended December 31, 2005 Compared to Year Ended December 31, 2004****Revenues*

Oil and Natural Gas Sales. Oil and natural gas sales increased \$180.4 million or 99% to \$361.8 million in 2005. The increase was attributable to higher production volumes and higher oil and natural gas prices. During 2004, our average wellhead oil price was \$38.85 per Bbl and our wellhead natural gas price was \$5.06 per Mcf, compared to \$52.45 per Bbl for oil and \$6.93 per Mcf for natural gas during 2005. The increases in our wellhead prices were due to general industry price escalations in our producing regions. Our oil sales in 2004 were reduced by a \$6.4 million loss in our hedging activities. We did not hedge our production during 2005. The following tables reflect our production by product and region for the periods presented:

	Year ended December 31,				Percent increase
	2004		2005		
	Volume	Percent	Volume	Percent	
Oil (MBbl)	3,688	72%	5,708	79%	55%
Natural Gas (MMcf)	8,794	28%	9,006	21%	2%
Total (MBoe)	5,154	100%	7,209	100%	40%

	Year ended December 31,				Percent increase (decrease)
	2004		2005		
	MBoe	Percent	MBoe	Percent	
Rocky Mountain	3,279	64%	5,410	75%	65%
Mid-Continent	1,461	28%	1,361	19%	(7)%
Gulf Coast	414	8%	438	6%	6%
Total MBoe	5,154	100%	7,209	100%	40%

Production increases in our Bakken field and Red River units in the Rocky Mountain region of 1,226 MBoe and 1,051 MBoe, respectively, accounted for the growth in production for 2005. We commenced drilling our initial well in the Bakken field in May 2003 and completed it as a producing well in August 2003. Our well count in the Bakken field rose from 25 gross (14.5 net) wells at December 31, 2004 to 60 gross (34.2 net) wells at December 31, 2005. Favorable response to the enhanced recovery program was the primary factor in the production growth in the Red River units.

Crude Oil Marketing and Trading. During 2004 and the first three months of 2005, we purchased barrels back from certain of our wellhead purchasers downstream of the initial sales point to exchange at the Cushing, Oklahoma hub in order to minimize pricing differentials with the

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

NYMEX oil futures contract. In 2005, revenues of \$39.8 million and expenses of \$39.7 million pertaining to these marketing activities were netted as provided by Emerging Issues Task Force (EITF) 04-13, which we adopted as of January 1, 2005. We presented these purchase and sale activities gross in the 2004 income statement as crude oil marketing and trading revenues of \$226.7 million and crude oil marketing and trading expenses of \$227.2 million under the guidance provided by EITF 99-19, Reporting Revenues Gross as a Principal and/or Net as an Agent. We ceased marketing our production in this manner in March 2005 and now generally market our production at the wellhead.

Oil and Natural Gas Service Operations. Our oil and natural gas service operations consist primarily of sales of high-pressure air and the treatment and sale of lower quality crude oil (reclaimed oil). We initiated the sale of high-pressure air from our Red River units to a third party in 2004, and recorded revenues of \$2.0 million and \$3.0 million during 2004 and 2005, respectively. Higher prices for reclaimed oil sold from our central treating unit in 2005 increased oil and natural gas service operations revenues by \$2.2 million to \$8.8 million. Associated oil and natural gas service operations expenses increased \$2.0 million from 2004 compared to 2005 due principally to an increase in the costs of purchasing and treating oil for resale.

Table of Contents**Index to Financial Statements***Operating Costs and Expenses*

Production Expense and Tax. Our production expense increased \$9.0 million or 21%. This increase was primarily due to production expense associated with the 80 gross (45.4 net) productive wells drilled during 2005, industry inflation and higher energy costs in the Red River units. On a unit of production basis, production expense fell from \$8.49 per Boe in 2004 to \$7.32 per Boe in 2005.

Energy costs in the Red River units increased \$3.0 million to \$9.9 million in 2005. The increased energy costs were mainly due to higher electrical costs, resulting from higher production volumes, to run compressors for the high-pressure air injection and other enhanced recovery operations in the field. Workovers in this field also increased from \$0.2 million in 2004 to \$1.8 million in 2005.

Production tax increased \$3.7 million or 30% in 2005 compared to the 99% increase in oil and gas sales. As a percentage of oil and natural gas revenues, production tax was 4.4% in 2005 compared to 6.8% in 2004. In the state of Montana, a horizontal well qualifies for a 0.76% production tax rate on oil and natural gas sales for the first 18 months of production. Thereafter, the production tax rate is 9.26%. All of the wells we drilled in the Montana Bakken field qualified for the reduced production tax rate.

Our oil and natural gas revenues from the Montana Bakken field increased to approximately \$93.3 million in 2005 from \$19.1 million in the prior year. The addition of approximately \$74.2 million in oil and gas revenues at a 0.76% production tax rate was the principal reason production tax increased 30% compared to the 99% increase in oil and gas sales.

On a unit of sales basis, production expense and production tax were as follows:

	Year ended December 31,		Percent decrease
	2004	2005	
Production expense (\$/Boe)	\$ 8.49	\$ 7.32	(14)%
Production tax (\$/Boe)	2.39	2.22	(7)%
Production expense and tax (\$/Boe)	\$ 10.88	\$ 9.54	(12)%

Exploration Expense. Exploration expense decreased from 2004 to 2005 as a result of a reduction primarily in our dry hole expense from \$9.5 million in 2004 to \$1.4 million in 2005. The higher dry hole expense during 2004 was primarily attributable to dry holes in the Gulf Coast region with a higher per well cost.

Depreciation, Depletion, Amortization and Accretion (DD&A). The DD&A rate per Boe decreased from \$7.02 per Boe in 2004 to \$6.50 per Boe in 2005. The reduction in the DD&A rate per Boe was mainly due to the addition of 32,427 MBoe of proved reserves during 2005. The

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

amount of DD&A attributable to oil and gas properties increased by \$10.6 million in 2005 due to increased production volumes. Accretion expense associated with our asset retirement obligations was \$1.0 million and \$1.6 million in 2004 and 2005, respectively.

Property Impairments. We evaluate our properties on a field-by-field basis, as may be necessary, when facts and circumstances such as downward reserve revisions or lower oil and natural gas prices indicate that their carrying amounts may not be recoverable. We recorded a \$6.2 million impairment in 2004 compared to a \$2.5 million impairment in 2005 on producing properties. The decrease from 2004 to 2005 was due to higher impairment charges on Gulf Coast region properties during 2004. We also evaluate our undeveloped leasehold cost and adjust the acreage valuation quarterly based on our assessment of the potential for the acreage to be developed and the market value of the acreage. Undeveloped leasehold cost is expensed over the life of the lease or transferred to the associated producing properties. Individually significant non-producing properties are periodically assessed for impairment of value and a loss is recognized if necessary. During 2004 we impaired \$5.5 million of undeveloped leasehold cost compared to \$4.4 million during 2005.

Table of Contents

Index to Financial Statements

General and Administrative Expense. The majority of the increase in general and administrative expense for 2005 was the result of higher wages and bonuses paid to our employees. The number of employees increased from 275 at year-end 2004 to 286 at year-end 2005, which, combined with salary adjustments and cash bonus increases, increased payroll and other employee-related expenses by \$5.3 million during 2005. On a volumetric basis, our general and administrative expense, including equity compensation of \$2.0 million and \$13.7 million, respectively, was \$2.41 per Boe and \$4.34 per Boe for the years ended December 31, 2004 and 2005, respectively.

Equity compensation expense increased from \$2.0 million in 2004 to \$13.7 million in 2005 primarily due to additional equity grants and a higher per share valuation resulting from the increase in our PV-10.

Interest Expense. Interest expense declined from \$23.6 million in 2004 to \$14.2 million in 2005. The decline in interest expense was attributable to a lower average bank indebtedness during 2005. At December 31, 2004, we had \$230.0 million outstanding on our bank credit facility with an effective interest rate of 4.36% compared to \$143.0 million outstanding at December 31, 2005, with an effective interest rate of 6.08%. We incurred \$6.8 million and \$9.3 million in interest on our credit facility in 2004 and 2005, respectively. On November 22, 2004, we signed a note with our principal shareholder for \$50.0 million due March 31, 2008. The annual rate of interest was 6.00% and interest payments were due on the last day of each calendar quarter beginning December 31, 2004. We paid \$308,000 and \$2.9 million in interest in 2004 and 2005, respectively on this note to our principal shareholder. In December 2005, we paid the note in full to our principal shareholder. During November 2004, we utilized available borrowing capacity under our credit facility to redeem \$119.5 million of our outstanding Senior Subordinated 10.25% Notes and paid a premium of \$4.1 million due on the early redemption of the Notes. Total interest expense on the Senior Subordinated Notes during 2004 was \$11.4 million.

Provision for Income Taxes. We recognized income tax expense of \$1.1 million during the three months ended March 31, 2005 in connection with the sale of assets acquired prior to our conversion to a subchapter S-corporation from a subchapter C-corporation on May 31, 1997. These assets had Built in gains, as defined by Section 1374 of the Internal Revenue Code, which resulted in a taxable event for us.

Discontinued Operations. In July 2004, we completed the sale of all of the outstanding stock in Continental Gas Inc. (CGI) to our shareholders for \$22.6 million in cash. The sales price was representative of the fair value of the net assets based on an appraisal by an independent third party who also provided us with an opinion of the fairness from a financial point of view, of the sale of CGI to the shareholders. The CGI assets included seven natural gas gathering systems and three natural gas-processing plants. These assets represented our entire natural gas gathering, marketing and processing segment and have been classified as discontinued operations for all periods presented.

Liquidity and Capital Resources

Our primary sources of liquidity have been cash flows generated from operating activities and financing provided by our bank credit facility and principal shareholder. In November 2004, we signed a note with our principal shareholder for \$50 million due March 31, 2008. In January 2005, our principal shareholder contributed \$2.0 million of the previously loaned amount to us. We paid the \$48.0 million outstanding balance due on the note in December 2005. We believe that funds from operating cash flows and the bank credit facility should be sufficient to meet our cash requirements inclusive of, but not limited to, normal operating needs, debt service obligations, planned capital expenditures, and commitments and contingencies for the next 12 months. We intend to fund our longer term cash requirements beyond 12 months through operating cash flows, commercial bank borrowings and access to equity and debt capital markets. Although our longer term needs may be impacted by factors discussed in the section entitled Risk Factors, such as declines in oil and natural gas prices, drilling

Table of Contents

Index to Financial Statements

results, ability to obtain needed capital on satisfactory terms, and other risks which could negatively impact production and our results of operations, we currently anticipate that we will be able to generate or obtain funds sufficient to meet our long-term cash requirements. During 2006, we declared cash dividends totaling \$87.6 million to existing shareholders and, subject to forfeiture, to holders of unvested restricted stock. Of this amount, \$298,000 was charged to compensation expense related to the restricted stock liability. During 2006, we paid cash dividends of \$87.4 million. The unpaid balance of \$218,000 relates to dividends associated with unvested restricted stock and will be paid as the restricted stock vests. On January 10, 2007, we declared a cash dividend of approximately \$18.8 million to our shareholders for tax purposes and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million payable in April 2007 to our shareholders of record as of March 15, 2007, for tax purposes and, subject to forfeiture, to holders of unvested restricted stock. In connection with the completion of this offering, we will convert from a subchapter S-corporation to a subchapter C-corporation, and we do not anticipate paying any additional cash dividends on our common stock in the foreseeable future. At December 31, 2005 and 2006, we had cash and cash equivalents of \$6.0 million and \$7.0 million, respectively, and available borrowing capacity on our credit facility of \$107.0 million and \$160.0 million, respectively.

Cash Flow from Operating Activities

Our net cash provided by operating activities was \$93.9 million, \$265.3 million and \$417.0 million for the years ended December 31, 2004, 2005 and 2006, respectively. The increases in operating cash flows in 2005 and 2006 were principally due to increased production and higher oil and natural gas prices. Additionally, hedging losses were \$6.4 million in 2004. There were no hedges in place during 2005 and 2006.

Cash Flow from Investing Activities

During the years ended December 31, 2004, 2005 and 2006 we invested \$94.3 million, \$144.8 million and \$326.6 million, respectively, in our capital program, inclusive of dry hole and seismic costs. The increases in our capital program in 2005 and 2006 were due to the implementation of enhanced recovery and increased density drilling in our Red River units and additional exploration and development drilling.

Cash Flow from Financing Activities

Net cash used in financing activities was \$7.2 million for 2004, \$141.5 million for 2005 and \$91.5 million for 2006. In 2004, cash used in financing activities was primarily attributable to the repurchase of our Senior Subordinated Notes. In 2005, cash used in financing activities was primarily attributable to the repayment of long-term debt. During 2006, cash used in financing activities was primarily attributable to the payment of cash dividends. Our long-term debt, including the current portion and capital leases, was \$290.5 million, \$143.0 million and \$140.0 million at December 31, 2004, 2005 and 2006, respectively.

Credit Facility

We had \$143.0 million and \$140.0 million outstanding under our bank credit facility at December 31, 2005 and 2006, respectively. During 2006, capital expenditures of \$326.6 million and dividends of \$87.4 million were funded principally by \$417.0 million in cash provided by operating activities, which benefited from an increase of \$77.4 million in our trade accounts payable for the year ended December 31, 2006. As of May 8,

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

2007, the amount outstanding under our credit facility has increased by \$112.5 million to \$252.5 million. The increase is largely due to borrowings to fund cash dividends of approximately \$52.0 million paid in 2007 and borrowings for the reduction in our accounts payable trade balance which had increased by \$50.4 million in the fourth quarter

Table of Contents**Index to Financial Statements**

due to the increase in our fourth quarter capital expenditures. Our fourth quarter 2006 capital expenditures were approximately \$105.3 million. After giving effect to this offering and the application of the net proceeds we will receive in this offering, we expect to have borrowings of approximately \$129.6 million outstanding under our credit facility.

The credit facility matures on April 12, 2011, and borrowings under our credit facility bear interest, payable quarterly, at (a) a rate per annum equal to the London Interbank Offered Rate for one, two, three or six months as offered by the lead bank plus an applicable margin ranging from 100 to 175 basis points, depending on the percentage of our borrowing base utilized or (b) the lead bank's reference rate. The credit facility has a note amount of \$750.0 million, a borrowing base of \$600.0 million, subject to semi-annual redetermination, and a commitment level of \$300.0 million. Our next semi-annual redetermination is during October 2007. The terms of the credit facility allow us to determine the commitment level at any level up to the borrowing base.

The credit facility contains restrictive covenants that may limit our ability to, among other things, incur additional indebtedness, sell assets, make loans to others, make investments, enter into mergers, change material contracts, incur liens and engage in certain other transactions without the prior consent of the lenders. The facility also requires us to maintain certain ratios as defined and further described in our credit facility: a Current Ratio of not less than 1.0 to 1.0 (adjusted for available borrowing capacity), a Total Funded Debt to EBITDAX, as defined, of no greater than 3.75 to 1.0. As of December 31, 2006, we were in compliance with all covenants.

Capital Expenditures and Commitments

We evaluate opportunities to purchase or sell oil and natural gas properties in the marketplace and could participate as a buyer or seller of properties at various times. We seek acquisitions that utilize our technical expertise or offer opportunities to expand our existing core areas.

We invested approximately \$326.6 million for capital and exploration expenditures in 2006 as follows (in millions):

	Amount
Exploration and development drilling	\$ 248.6
Purchase of properties	6.6
Dry holes	13.3
Capital facilities, workovers and recompletions	21.1
Land costs	26.1
Seismic	3.9
Vehicles, computers and other equipment	7.0
	<hr/>
	\$ 326.6

Expenditures for exploration and development of oil and natural gas properties are the primary use of our capital resources. We anticipate investing approximately \$437.0 million for capital and exploration expenditures in 2007 as follows (in millions):

	Amount
Exploration and development drilling	\$ 363
Capital facilities, workovers and recompletions	31
Land costs	32
Seismic	7
Vehicles, computers & other equipment	4
	<hr/>
	\$ 437

Table of Contents

Index to Financial Statements

Our budgeted capital expenditures are expected to increase approximately 34% over the \$326.6 million invested during 2006. We plan to invest approximately \$209 million in development drilling. In the Red River units, we plan to invest approximately \$151 million to drill infill wells and extend horizontal laterals on existing wells to increase production and sweep efficiency of the enhanced recovery projects. Most of the remaining development drilling budget is expected to be invested in the drilling of development wells in the Montana Bakken field. We have budgeted approximately \$173 million for exploratory drilling with approximately \$71 million and \$82 million allocated to drilling exploratory wells in the North Dakota Bakken field and the Woodford Shale project, respectively.

Although we cannot provide any assurance, assuming successful implementation of our strategy, including the future development of our proved reserves and realization of our cash flows as anticipated, we believe that our remaining cash balance, cash flows from operations and borrowings available under our credit facility will be sufficient to satisfy our 2007 capital budget. The actual amount and timing of our capital expenditures may differ materially from our estimates as a result of, among other things, actual drilling results, the availability of drilling rigs and other services and equipment, and regulatory, technological and competitive developments.

Shareholder Distribution

In 2004, we made a distribution of \$14.9 million to our shareholders and in 2005 we made a \$2.0 million distribution to our shareholders. During 2006, we declared cash dividends totaling \$87.6 million to existing shareholders and, subject to forfeiture, to holders of unvested restricted stock. Of this amount, \$298,000 was charged to compensation expense related to the restricted stock liability. During 2006, we paid cash dividends of \$87.4 million. The unpaid balance of \$218,000 relates to dividends associated with unvested restricted stock and will be paid as the restricted stock vests. On January 10, 2007, we declared a cash dividend of approximately \$18.8 million to our shareholders and, subject to forfeiture, to holders of unvested restricted stock. On January 31, 2007, we paid \$18.7 million of the dividend declared, of which \$16.9 million was paid to our principal shareholder. On March 6, 2007, we declared a cash dividend of approximately \$33.3 million to our shareholders of record and, subject to forfeiture, to holders of unvested restricted stock. On April 12, 2007, we paid \$33.1 million of the dividend declared, of which \$30.0 was paid to our principal shareholder. In connection with the completion of this offering, we will convert from a subchapter S-corporation to a subchapter C-corporation, and we do not anticipate paying any additional cash dividends on our common stock in the foreseeable future. See [Overview](#) [Recent Events](#).

Expenses to be Recognized Following Completion of the Offering

We expect to recognize a charge to earnings (estimated to be approximately \$175.7 million if the conversion had occurred on December 31, 2006) to record deferred taxes as a result of our conversion to a C-corporation upon completion of this offering. This charge represents taxes provided on the difference between the book and tax basis of our assets.

Hedging

We account for derivative instruments in accordance with SFAS No. 133 [Accounting for Derivative Instruments and Hedging Activities](#). The specific accounting treatment for changes in the market value of the derivative instruments used in hedging activities is determined based on the designation of the derivative instruments as a cash flow or fair value hedge and effectiveness of the derivative instruments.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

In 2004, we utilized fixed-price contracts and zero-cost collars to reduce exposure to unfavorable changes in oil and natural gas prices that are subject to significant and often volatile fluctuation. Under the fixed price

Table of Contents**Index to Financial Statements**

physical delivery contracts we received the fixed price stated in the contract. Under the zero-cost collars, if the market price of crude oil was less than the ceiling strike price and greater than the floor strike price, we received market price. If the market price of crude oil exceeded the ceiling strike price or fell below the floor strike price, we received the applicable collar strike price. We recognized hedging losses of \$6.4 million during 2004.

We did not hedge any of our oil or natural gas production during 2005 and 2006 and have not entered into any such hedges from January 1, 2007 through the date of this filing. We do not currently have plans to hedge any of our 2007 production.

Obligations and Commitments

We have the following contractual obligations and commitments as of December 31, 2006:

	Payments due by period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
	(in thousands)				
Bank credit facility(1)	\$ 140,000	\$	\$	\$ 140,000	\$
Operating lease obligations(2)	11,067	5,296	5,754	17	
Asset retirement obligations(3)	41,273	2,528	7,377	1,232	30,136
Total contractual cash obligations	\$ 192,340	\$ 7,824	\$ 13,131	\$ 141,249	\$ 30,136

(1) Payments on the bank credit facility listed in the table exclude interest.

(2) Operating leases consist of compressors utilized in field operations, vehicles and office equipment.

(3) Amounts represent expected asset retirements by period.

Critical Accounting Policies and Practices

Our historical consolidated financial statements and notes to our historical consolidated financial statements contain information that is pertinent to our management's discussion and analysis of financial condition and results of operations. Preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that our management make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. However, the accounting principles used by us generally do not change our reported cash flows or liquidity. Interpretation of the existing rules must be done and judgments made on how the specifics of a given rule apply to us.

In management's opinion, the more significant reporting areas impacted by management's judgments and estimates are revenue recognition, the choice of accounting method for oil and natural gas activities, oil and natural gas reserve estimation, asset retirement obligations and impairment of assets. Management's judgments and estimates in these areas are based on information available from both internal and external sources, including engineers, geologists and historical experience in similar matters. Actual results could differ from the estimates, as additional information becomes known.

Revenue Recognition

We derive substantially all of our revenues from the sale of oil and natural gas. Oil and gas revenues are recorded in the month the product is delivered to the purchaser and title transfers. We generally receive payment from one to three months after the sale has occurred. Each month we estimate the volumes sold and the price at which they were sold to record revenue. Variances between estimated revenue and actual amounts are recorded in the month payment is received.

Table of Contents

Index to Financial Statements

Successful Efforts Method of Accounting

We utilize the successful efforts method of accounting for our oil and natural gas exploration and development activities. Exploration expenses, including geological and geophysical costs, rentals and exploratory dry holes, are charged against income as incurred. Costs of successful wells and related production equipment and developmental dry holes are capitalized and amortized on an individual property, field or unit basis using the unit-of-production method as oil and natural gas is produced. This accounting method may yield significantly different results than the full cost method of accounting.

Depreciation, depletion and amortization, or DD&A, of capitalized drilling and development costs of oil and natural gas properties are generally computed using the unit of production method on an individual property, field or unit basis based on total estimated proved developed oil and natural gas reserves. Amortization of producing leasehold is based on the unit-of-production method using total estimated proved reserves. In arriving at rates under the unit-of-production method, the quantities of recoverable oil and natural gas are established based on estimates made by our geologists and engineers and independent engineers. Service properties, equipment and other assets are depreciated using the straight-line method over estimated useful lives of 5 to 40 years. Upon sale or retirement of depreciable or depletable property, the cost and related accumulated DD&A are eliminated from the accounts and the resulting gain or loss is recognized.

Non-producing properties consist of undeveloped leasehold costs and costs associated with the purchase of certain proved undeveloped reserves. Undeveloped leasehold cost is expensed over the life of the lease or transferred to the associated producing properties. Individually significant non-producing properties are periodically assessed for impairment of value.

Equity Compensation

We account for employee stock option grants and restricted stock grants in accordance with SFAS 123(R). The terms of the restricted stock grants and stock option grants stipulate that, until we become a reporting company under Section 12 of the Exchange Act, we are required to purchase the vested restricted stock and stock acquired from stock option exercises at each employee's request based upon the purchase price as determined by a formula specified in each award agreement. Additionally, we have the right to purchase vested restricted stock and stock acquired from stock option exercises at the same price upon termination of employment for any reason and for a period of two years subsequent to leaving our employment. Therefore, the awards are accounted for as liability awards in accordance with SFAS 123(R). We measure compensation cost for the awards based upon fair value. Restricted stock and stock option values represent intrinsic value prior to 2006 and fair value after March 7, 2006, the date on which we first filed the registration statement of which this prospectus forms a part and as a result became a public entity for purposes of SFAS 123(R). Fair value of stock options is determined using the Black-Scholes option valuation model. See Note 9 to the Notes to Consolidated Financial Statements included elsewhere in this prospectus.

The right to sell and requirement to purchase will lapse when we become a reporting company under Section 12 of the Exchange Act. Therefore, the liability for equity compensation will be reclassified to additional paid in capital upon becoming a public reporting company.

The value of granted stock options and restricted stock until March 7, 2006 was based on each grant's intrinsic value. Since March 7, 2006, we have recognized stock-based compensation expense at fair value. We did not prepare or obtain contemporaneous valuations by an unrelated valuation specialist during 2006 because we did not consider it necessary to value our stock options and restricted stock.

Table of Contents

Index to Financial Statements

During 2007, we reassessed the 2006 valuations of our stock option and restricted stock grants. We utilized the probability-weighted expected return method to estimate the value of our stock option and restricted stock grants. Fair value under this method is estimated based upon an analysis of future values for the grants based upon the probability of various outcomes and the rights of each share class. We considered numerous future outcomes and determined that the outcomes with the highest probability were completion of the initial public offering within one year discounted back to the applicable valuation dates (March 31, 2006 and December 31, 2006) and termination of the initial public offering and continuing as a privately held entity. These alternatives were deemed to be equally likely at March 31, 2006 and December 31, 2006.

Determining the fair value of our stock based compensation requires making complex and subjective judgments, which are inherently uncertain. The assumptions underlying our estimates are consistent with our understanding and evaluation of different alternatives during 2006 and our discussion of these alternatives with our board of directors, investment bankers and other interested parties. Valuations would have been different had different estimates been utilized. Our assumptions are more fully discussed under Note 9 to the Notes to the Consolidated Financial Statements included elsewhere in this prospectus.

In calculating the value of stock option grants, we utilized the Black-Scholes option-pricing method. This method requires that we make estimates of the volatility of our equity securities and assess the timing of future events, as previously described. As there has been no readily available market for our stock, we have based our volatility assumptions on available information on the volatility of the publicly traded stocks of other exploration and production companies considered to be similar in size and operations to us. Had we used different assumptions for volatility, estimated amounts would be different.

Several principal factors contribute to a difference between the fair value of \$10.49 per share for stock options and \$11.96 per share for restricted stock at December 31, 2006 and the initial public offering price of \$15.00 per share. Subsequent to December 31, 2006, stocks for other exploration and production companies similar in size and operations to us appreciated 20.5% (through May 2, 2007) relative to their 2006 closing prices. Additionally, we noted a general improvement in oil and natural gas commodity prices relative to December 31, 2006. During April 2007, we met with our investment bankers who advised us that market conditions had improved dramatically and that higher valuations could be expected over those deemed available at December 31, 2006. Accordingly, we have noted an increase in the fair value of our common stock during 2007 and as a result, we expect to record additional compensation expense of approximately \$5.8 million in the first quarter of 2007 and approximately \$1.8 million in the second quarter of 2007. We expect that upon completion of this offering, our fair value will be equivalent to the initial public offering price of \$15.00 per share due to increased liquidity and marketability.

Oil and Natural Gas Reserves and Standardized Measure of Future Cash Flows

Our independent engineers and technical staff prepare the estimates of our oil and natural gas reserves and associated future net cash flows. Current accounting guidance allows only proved oil and natural gas reserves to be included in our financial statement disclosures. The SEC has defined proved reserves as the estimated quantities of crude oil and natural gas which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Even though our independent engineers and technical staff are knowledgeable and follow

Table of Contents

Index to Financial Statements

authoritative guidelines for estimating reserves, they must make a number of subjective assumptions based on professional judgments in developing the reserve estimates. Reserve estimates are updated at least annually and consider recent production levels and other technical information about each field. Periodic revisions to the estimated reserves and future cash flows may be necessary as a result of a number of factors, including reservoir performance, new drilling, oil and natural gas prices, cost changes, technological advances, new geological or geophysical data, or other economic factors. We cannot predict the amounts or timing of future reserve revisions. If such revisions are significant, they could significantly alter future DD&A and result in impairment of assets that may be material.

Asset Retirement Obligations

In June 2001, the FASB issued SFAS No. 143, which applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and the normal operation of a long-lived asset. The primary impact of this standard on us relates to oil and natural gas wells on which we have a legal obligation to plug and abandon. SFAS No. 143 requires us to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred and a corresponding increase in the carrying amount of the related long-lived asset. The determination of the fair value of the liability requires us to make numerous judgments and estimates, including judgments and estimates related to the future salvage value of well equipment, future costs to plug and abandon wells, future inflation rates and estimated lives of the related assets.

Impairment of Assets

All of our long-lived assets are monitored for potential impairment when circumstances indicate that the carrying value of an asset may be greater than its future net cash flows, including cash flows from risk adjusted proved reserves. The evaluations involve a significant amount of judgment since the results are based on estimated future events, such as future sales prices for oil and natural gas, future costs to produce these products, estimates of future oil and natural gas reserves to be recovered and the timing thereof, the economic and regulatory climates and other factors. The need to test a field for impairment may result from significant declines in sales prices or downward revisions to oil and natural gas reserves. Any assets held for sale are reviewed for impairment when we approve the plan to sell. Estimates of anticipated sales prices are highly judgmental and subject to material revision in future periods. Because of the uncertainty inherent in these factors, we cannot predict when or if future impairment charges will be recorded.

Off-Balance Sheet Arrangements

Currently, we do not have any off-balance sheet arrangements.

Recent Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123(R), *Share-Based Payment*, which is a revision of SFAS No. 123, *Accounting for Stock-Based Compensation*. SFAS No. 123(R) supersedes APB 25 and amends SFAS No. 95, *Statement of Cash Flows*. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R)

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

requires all share-based payments to employees, including grants of employee stock options, be recognized in the consolidated financial statements based on their estimated fair values. Pro forma disclosures are no longer an alternative.

We adopted SFAS 123(R) effective January 1, 2006. So long as we are not a reporting company under Section 12 of the Exchange Act, we have an obligation to purchase shares acquired through the exercise of stock

Table of Contents

Index to Financial Statements

options and vested restricted shares at a formula price set forth in the award agreements. As a result of this offering, we will no longer have this purchase obligation, and the liability will be reclassified to additional paid-in capital.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*. The interpretation is effective for fiscal years beginning after December 15, 2006. The adoption of FIN 48 is not expected to have a material impact on our consolidated financial position or results of operations.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin (SAB) No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Current Year Misstatements*. SAB No. 108 requires analysis of misstatements using both an income statement (rollover) approach and a balance sheet (iron curtain) approach in assessing materiality and provides for a one-time cumulative effect transition adjustment. We have applied the guidance of SAB No. 108 as of December 31, 2006. The application of this SAB had no effect on the consolidated financial statements.

In September 2006, the FASB finalized SFAS No. 157, *Fair Value Measurements* which will become effective in 2008. This Statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements; however, it does not require any new fair value measurements. The provisions of SFAS No. 157 will be applied prospectively to fair value measurements and disclosures in our Consolidated Financial Statements beginning in the first quarter of 2008. The adoption of SFAS No. 157 is not expected to have a material impact on our consolidated financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115* . This Statement provides entities with an option to choose to measure eligible items at fair value at specified election dates. If elected, an entity must report unrealized gains and losses on the item in earnings at each subsequent reporting date. The fair value option: may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; is irrevocable (unless a new election date occurs); and is applied only to entire instruments and not to portions of instruments. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. Management does not believe that the implementation of SFAS No. 159 will have a material impact on our financial statements.

Inflation

Historically, general inflationary trends have not had a material effect on our operating results. However, we have experienced inflationary pressure on technical staff compensation and the cost of oilfield services and equipment due to the increase in drilling activity and competitive pressures resulting from higher oil and natural gas prices in recent years.

Quantitative and Qualitative Disclosures About Market Risk

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

We are exposed to a variety of market risks including credit risk, commodity price risk and interest rate risk. We address these risks through a program of risk management which may include the use of derivative instruments.

Credit Risk. We monitor our risk of loss due to non-performance by counterparties of their contractual obligations. Our principal exposure to credit risk is through the sale of our oil and natural gas production, which we market to energy marketing companies, refineries and affiliates, as described under Certain relationships and

Table of Contents**Index to Financial Statements**

related party transactions. We monitor our exposure to these counterparties primarily by reviewing credit ratings, financial statements and payment history. We extend credit terms based on our evaluation of each counterparty's credit worthiness. Although we have not generally required our counterparties to provide collateral to support trade receivables owed to us, we routinely require prepayment of working interest holders' proportionate share of drilling costs. For such prepayments, a liability is recorded and subsequently reduced as the associated work is performed. In this manner, we reduce credit risk.

Commodity Price Risk. We are exposed to market risk as the prices of crude oil and natural gas are subject to fluctuations resulting from changes in supply and demand. To partially reduce price risk caused by these market fluctuations, we have hedged in the past, and may hedge in the future, through the utilization of derivatives, including zero-cost collars and fixed price contracts, a portion of our production. We had no hedging contracts in place during 2005 and 2006 and do not currently plan to hedge any of our 2007 production. See the commodity price sensitivity analysis included in Management's Discussion and Analysis of Financial Condition Oil and Natural Gas Prices Realized.

Interest Rate Risk. Our exposure to changes in interest rates relates primarily to long-term debt obligations. We manage our interest rate exposure by limiting our variable-rate debt to a certain percentage of total capitalization and by monitoring the effects of market changes in interest rates. We may utilize interest rate derivatives to alter interest rate exposure in an attempt to reduce interest rate expense related to existing debt issues. Interest rate derivatives are used solely to modify interest rate exposure and not to modify the overall leverage of the debt portfolio. We are exposed to changes in interest rates as a result of our credit facility. We had total indebtedness of \$252.5 million outstanding under our credit facility at May 8, 2007. The impact of a 1% increase in interest rates on this amount of debt would result in increased interest expense of approximately \$2.5 million and a corresponding decrease in net income. The fair value of long-term debt is estimated based on quoted market prices and management's estimate of current rates available for similar issues. The following table itemizes our long-term debt maturities and the weighted-average interest rates by maturity date:

	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>Total</u>
	(in thousands)						
Variable rate debt:							
Credit facility:							
Principal amount	\$	\$	\$	\$	\$	\$ 252,500	\$ 252,500
Weighted-average interest rate						6.45%	6.45%

Table of ContentsIndex to Financial Statements**Business and Properties****Our Business**

We are an independent oil and natural gas exploration and production company with operations in the Rocky Mountain, Mid-Continent and Gulf Coast regions of the United States. We focus our exploration activities in large new or developing plays that provide us the opportunity to acquire undeveloped acreage positions for future drilling operations. We have been successful in targeting large repeatable resource plays where horizontal drilling, advanced fracture stimulation and enhanced recovery technologies provide the means to economically develop and produce oil and natural gas reserves from unconventional formations. As a result of these efforts, we have grown substantially through the drillbit, adding 96.2 MMBoe of proved oil and natural gas reserves through extensions and discoveries from January 1, 2001 through December 31, 2006 compared to 5.1 MMBoe added through proved reserve purchases during that same period.

As of December 31, 2006, our estimated proved reserves were 118.3 MMBoe, with estimated proved developed reserves of 87.1 MMBoe, or 74% of our total estimated proved reserves. Crude oil comprised 83% of our total estimated proved reserves. At December 31, 2006, we had 1,772 scheduled drilling locations on the 1,775,000 gross (1,071,000 net) acres that we held. For the year ended December 31, 2006, we generated revenues of \$483.7 million, and operating cash flows of \$417.0 million. For the first quarter of 2007, daily production averaged approximately 28,000 Boe per day.

The following table summarizes our total estimated proved reserves, PV-10 and net producing wells as of December 31, 2006, average daily production for the three months ended December 31, 2006 and the reserve-to-production ratio in our principal regions. Our reserve estimates as of December 31, 2006 are based primarily on a reserve report prepared by Ryder Scott Company, L.P., our independent reserve engineers. In preparing its report, Ryder Scott Company, L.P. evaluated properties representing approximately 83% of our PV-10. Our technical staff evaluated properties representing the remaining 17% of our PV-10.

	At December 31, 2006				Average daily production		Annualized reserve/ production index(2)
	Proved reserves (MBoe)	Percent of total	PV-10(1) (in millions)	Net producing wells	fourth quarter 2006 (Boe per day)	Percent of total	
Rocky Mountain:							
Red River units	66,527	56%	\$ 791	201	11,732	44%	15.5
Bakken field	25,623	22%	441	66	7,905	30%	8.9
Other	9,077	8%	104	233	1,717	7%	14.5
Mid-Continent	16,894	14%	244	672	4,280	16%	10.8
Gulf Coast	228		4	19	869	3%	0.7
Total	118,349	100%	\$ 1,584	1,191	26,503	100%	12.2

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

- (1) PV-10 is a non GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future net revenues. However, our PV-10 and our Standardized Measure are equivalent because we are a subchapter S-corporation. In connection with the closing of this offering, we will convert to a subchapter C-corporation. Our pro-forma Standardized Measure, assuming our conversion to a subchapter C-corporation, was \$1.0 billion at December 31, 2006. Neither PV-10 nor Standardized Measure represents an estimate of the fair market value of our oil and gas properties. We and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies without regard to the specific tax characteristics of such entities.
- (2) The Annualized Reserve/Production Index is the number of years proved reserves would last assuming current production continued at the same rate. This index is calculated by dividing annualized fourth quarter 2006 production into the proved reserve quantity at December 31, 2006.

Table of Contents**Index to Financial Statements**

The following table provides additional information regarding our key development areas:

	At December 31, 2006				2007 Budget		
	Developed acres		Undeveloped acres		Scheduled drilling locations(1)	Wells planned for drilling	Capital expenditures (in millions)
	Gross	Net	Gross	Net			
Rocky Mountain:							
Red River units	144,309	128,484			133	51	\$ 151
Bakken field	81,761	60,176	581,846	342,321	804	58	145
Other	49,010	38,534	375,185	213,516	66	12	13
Mid-Continent	147,681	94,214	335,982	175,780	762	151	122
Gulf Coast	41,450	11,869	17,368	6,360	7	3	6
Total	464,211	333,277	1,310,381	737,977	1,772	275	\$ 437

- (1) Scheduled drilling locations represent total gross locations specifically identified and scheduled by management as an estimate of our future multi-year drilling activities on existing acreage. Of the total locations shown in the table, 249 are classified as PUDs. As of April 12, 2007, we have commenced drilling 116 locations shown in the table, including 67 PUD locations. Our actual drilling activities may change depending on oil and natural gas prices, the availability of capital, costs, drilling results, regulatory approvals and other factors. See Risk Factors Risks Relating to the Oil and Natural Gas Industry and Our Business.

Our Business Strategy

Our goal is to increase shareholder value by finding and developing crude oil and natural gas reserves at costs that provide an attractive rate of return on our investment. The principal elements of our business strategy are:

Growth Through Low-Cost Drilling. Substantially all of our annual capital expenditures are invested in drilling projects and acreage and seismic acquisitions. From January 1, 2001 through December 31, 2006, proved oil and natural gas reserve additions through extensions and discoveries were 96.2 MMBoe compared to 5.1 MMBoe of proved reserve purchases.

Internally Generate Prospects. Our technical staff has internally generated substantially all of the opportunities for the investment of our capital. Because we have been an early entrant in new or emerging plays, our costs to acquire undeveloped acreage have generally been less than those of later entrants into a developing play. As an example of the cost advantage of entering a play early, our per acre costs for our lease acquisitions in the North Dakota Bakken field during 2003 and 2004 were approximately 80% lower than the per acre costs paid by third parties and by us in the federal and state lease auctions for acreage near our holdings in that area during 2005.

Focus on Unconventional Oil and Natural Gas Resource Plays. Our experience with horizontal drilling, advanced fracture stimulation and enhanced recovery technologies allows us to commercially develop unconventional oil and natural gas resource plays, such as the Red River B

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

dolomite, Bakken Shale and Woodford Shale formations. Production rates in the Red River units also have been increased through the use of enhanced recovery technology. Our production from the Red River units and the Bakken field comprised approximately 74% of our total oil and natural gas production during the three months ended December 31, 2006.

Acquire Significant Acreage Positions in New or Developing Plays. In addition to the 402,000 net acres held in the Montana and North Dakota Bakken field, we held 162,000 net acres in other oil and natural gas shale plays as of December 31, 2006. Our technical staff is focused on identifying and testing new unconventional oil and natural gas resource plays where significant reserves could be developed if commercial production rates can be achieved through advanced drilling, fracture stimulation and enhanced recovery techniques.

Table of Contents

Index to Financial Statements

Our Business Strengths

We have a number of strengths that we believe will help us successfully execute our strategies:

Large Drilling and Acreage Inventory. Within the Bakken field, we owned approximately 342,000 net undeveloped acres and had identified over 800 drilling locations as of December 31, 2006. We plan to allocate approximately 38% of our current year capital expenditure budget towards developing our Bakken acreage position. Our large number of identified drilling locations provide for a multi-year drilling inventory.

Within other unconventional plays such as the Lewis Shale in Wyoming, the Woodford Shale in Oklahoma, the New Albany Shale in Kentucky and Indiana and the Marfa Basin in Texas, we owned approximately 162,000 net undeveloped acres as of December 31, 2006.

Additionally, at December 31, 2006, we owned approximately 330,000 net undeveloped acres in other projects, including 35,000 net undeveloped acres in Roosevelt County, Montana on which we are planning a 38-square mile 3-D seismic shoot in 2007, 27,000 net undeveloped acres in the Big Horn Basin in Wyoming, on which we plan to drill 4 wells in 2007, and 24,000 net undeveloped acres in Bowman County, North Dakota, on which we plan to drill 3 horizontal Red River B wells in 2007.

Within the Red River units, we plan to drill 127 horizontal wells and 36 horizontal extensions of existing wellbores over the next two to three years in order to increase the density of both producing and injection wellbores. We believe these operations will increase production and sweep efficiency. Production in the Red River units, as projected by our proved reserve report for the year ended December 31, 2006, is expected to peak in October 2008 at approximately 19,000 net Boe per day. During the three months ended December 31, 2006, production in the Red River units averaged approximately 11,732 net Boe per day.

Horizontal Drilling and Enhanced Recovery Experience. In 1992, we drilled our initial horizontal well, and we have drilled over 350 horizontal wells since that time, which represented more than one-half of our total wells drilled during that period. We also have substantial experience with enhanced recovery methods and currently serve as the operator of 48 waterflood units. Additionally, we operate eight high pressure air injection floods in the United States.

Control Operations Over a Substantial Portion of Our Assets and Investments. As of December 31, 2006, we operated properties comprising 95% of our PV-10. By controlling operations, we are able to more effectively manage the cost and timing of exploration and development of our properties, including the drilling and fracture stimulation methods used.

Experienced Management Team. Our senior management team has extensive expertise in the oil and gas industry. Our Chief Executive Officer, Harold G. Hamm, began his career in the oil and gas industry in 1967. Our seven senior officers have an average of 26 years of oil and gas industry experience. Additionally, our technical staff, which includes 19 petroleum engineers, 12 geoscientists and seven landmen, has an average of more than 19 years experience in the industry.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Strong Financial Position. As of May 8, 2007, we had outstanding borrowings under our credit facility of approximately \$252.5 million. We believe that our planned exploration and development activities will be funded substantially from our operating cash flows. After giving effect to this offering and the application of the net proceeds we will receive in this offering, we expect to have borrowings of approximately \$129.6 million outstanding under our credit facility. As a result of our limited borrowings under our credit facility and strong operational cash flows, we did not enter into any oil or natural gas price hedges for our 2006 production, and we do not currently have plans to hedge any of our 2007 production.

Table of Contents**Index to Financial Statements****Conversion to Subchapter C-Corporation**

We are currently a subchapter S-corporation under the rules and regulations of the Internal Revenue Service. However, upon the consummation of this offering, we will have more shareholders than the IRS rules and regulations governing S-corporations allow, and therefore, we will convert automatically from a subchapter S-corporation to a subchapter C-corporation. In connection with this conversion, we will record a charge to earnings (estimated to be approximately \$175.7 million if the conversion had occurred on December 31, 2006) to recognize deferred taxes.

Proved Reserves

The following table sets forth our estimated proved oil and natural gas reserves, the PV-10 and standardized measure of discounted future net cash flows as of December 31, 2006 by reserve category. Ryder Scott Company, L.P., our independent petroleum engineers, evaluated properties representing approximately 83% of our PV-10, and our technical staff evaluated the remaining properties. Oil and natural gas prices in effect at December 31, 2006, \$61.05 per Bbl and \$6.30 per MMBtu adjusted for location and quality by field, were used in the computation of future net cash flows.

	<u>Oil (MBbls)</u>	<u>Gas (MMcf)</u>	<u>Total (MBoe)</u>	<u>PV-10(1)</u> <u>(in millions)</u>
Proved developed producing	71,951	69,896	83,600	\$ 1,262
Proved developed non-producing	3,385	524	3,472	19
Proved undeveloped	22,702	51,445	31,277	303
Total proved	98,038	121,865	118,349	\$ 1,584
Standardized Measure(2)				\$ 1,584
Pro Forma Standardized Measure(2)				\$ 1,027

- (1) PV-10 is a non GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future net revenues. However, our PV-10 and our Standardized Measure are equivalent because we are a subchapter S-corporation. In connection with the closing of this offering, we will convert to a subchapter C-corporation. Our pro-forma Standardized Measure, assuming our conversion to a subchapter C-corporation, was \$1.0 billion at December 31, 2006. Neither PV-10 nor Standardized Measure represents an estimate of the fair market value of our oil and gas properties. We and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies without regard to the specific tax characteristics of such entities.
- (2) As of December 31, 2006, Continental Resources was structured as a subchapter S-corporation. Accordingly, no provision for federal or state corporate income taxes has been provided because taxable income is passed through to our shareholders. Pro Forma Standardized Measure assumes Continental Resources was restructured as a subchapter C-corporation as of December 31, 2006.

The following table sets forth our estimated proved reserves, percent of total proved reserves that are proved developed and PV-10 as of December 31, 2006 by region:

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

	<u>Oil (MBbls)</u>	<u>Gas (MMcf)</u>	<u>Total (MBoe)</u>	<u>% Proved developed</u>	<u>PV-10(1) (in millions)</u>
Rocky Mountain:					
Red River units	60,697	34,980	66,527	75%	\$ 791
Bakken field	23,132	14,946	25,623	64%	441
Other	8,039	6,226	9,077	65%	104
Mid-Continent	6,127	64,605	16,894	85%	244
Gulf Coast	43	1,108	228	100%	4
Total	98,038	121,865	118,349	74%	\$ 1,584

- (1) PV-10 is a non GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future net revenues. However, our PV-10 and our Standardized Measure are equivalent because we are a subchapter S-corporation. In connection with the closing of this offering, we will convert to a subchapter C-corporation. Our pro-forma Standardized Measure, assuming our conversion to a subchapter C-corporation, was \$1.0 billion at December 31, 2006. Neither PV-10 nor Standardized Measure represents an estimate of the fair market value of our oil and gas properties. We and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies without regard to the specific tax characteristics of such entities.

Table of Contents**Index to Financial Statements****Production and Price History**

The following table sets forth summary information concerning our production results, average sales prices and production costs for the years ended December 31, 2004, 2005 and 2006:

	Year ended December 31,		
	2004	2005	2006
			(as restated)
Net production volumes:			
Oil (MBbls)(1)	3,688	5,708	7,480
Natural gas (MMcf)	8,794	9,006	9,225
Oil equivalents (MBoe)	5,154	7,209	9,018
Average prices(1):			
Oil, without hedges (\$/Bbl)	\$ 38.85	\$ 52.45	\$ 55.30
Oil, with hedges (\$/Bbl)	37.12	52.45	55.30
Natural gas (\$/Mcf)	5.06	6.93	6.08
Oil equivalents, without hedges (\$/Boe)	36.45	50.19	52.09
Oil equivalents, with hedges (\$/Boe)	35.20	50.19	52.09
Costs and expenses(1):			
Production expense (\$/Boe)	\$ 8.49	\$ 7.32	\$ 6.99
Production tax (\$/Boe)	2.39	2.22	2.48
General and administrative (\$/Boe)	2.41	4.34	3.45
DD&A expense (\$/Boe)(2)	7.02	6.50	6.91

(1) Oil sales volumes are 21 MBbls less than oil production volumes for the year ended December 31, 2006. Average prices and per unit costs have been calculated using sales volumes.

(2) Rate is determined based on DD&A expense derived from oil and natural gas assets.

The following table sets forth information regarding our average daily production during the fourth quarter of 2006:

	Average daily production fourth quarter 2006		
	Bbls	Mcf	Boe
Rocky Mountain			
Red River units	11,661	428	11,732
Bakken field	7,154	4,506	7,905
Other	1,277	2,638	1,717
Mid-Continent	1,717	15,377	4,280
Gulf Coast	219	3,898	869

Total	22,028	26,847	26,503
-------	--------	--------	--------

Productive Wells

The following table presents the total gross and net productive wells by region and by oil or gas completion as of December 31, 2006:

	Oil wells		Natural gas wells		Total wells	
	Gross	Net	Gross	Net	Gross	Net
Rocky Mountain:						
Red River units	220	201			220	201
Bakken field	116	66			116	66
Other	259	232	3	1	262	233
Mid-Continent	703	546	253	126	956	672
Gulf Coast	7	4	28	15	35	19
Total	1,305	1,049	284	142	1,589	1,191

Table of Contents**Index to Financial Statements**

Gross wells are the number of wells in which a working interest is owned and net wells are the total of our fractional working interests owned in gross wells. As of December 31, 2006, we owned interests in no wells containing multiple completions.

Developed and Undeveloped Acreage

The following table presents the total gross and net developed and undeveloped acreage by region as of December 31, 2006:

	Developed acres		Undeveloped acres		Total acres	
	Gross	Net	Gross	Net	Gross	Net
Rocky Mountain:						
Red River units	144,309	128,484			144,309	128,484
Bakken field	81,761	60,176	581,846	342,321	663,607	402,497
Other	49,010	38,534	375,185	213,516	424,195	252,050
Mid-Continent	147,681	94,214	335,982	175,780	483,663	269,994
Gulf Coast	41,450	11,869	17,368	6,360	58,818	18,229
Total	464,211	333,277	1,310,381	737,977	1,774,592	1,071,254

The following table sets forth the number of gross and net undeveloped acres as of December 31, 2006 that will expire over the next three years by region unless production is established within the spacing units covering the acreage prior to the expiration dates:

	2007		2008		2009	
	Gross	Net	Gross	Net	Gross	Net
Rocky Mountain:						
Red River units						
Bakken field	99,135	58,471	185,639	100,167	224,382	130,912
Other	82,483	52,036	87,567	44,979	37,997	17,188

Total	224,315	134,088	347,692	174,169	331,128	178,399

Drilling Activity

During the three years ended December 31, 2006, we drilled exploratory and development wells as set forth in the table below:

	2004		2005		2006	
	Gross	Net	Gross	Net	Gross	Net
Exploratory wells:						
Oil	12	5.6	13	5.9	17	8.4
Gas	5	0.9	2	1.3	25	4.9
Dry	17	10.5	11	6.9	17	9.4
Total exploratory wells	34	17.0	26	14.1	59	22.7
Development wells:						
Oil	14	8.3	50	30.6	83	57.0
Gas	13	5.7	15	7.6	34	14.5
Dry	4	2.6	3	3.0	7	4.3
Total development wells	31	16.6	68	41.2	124	75.8
Total wells	65	33.6	94	55.3	183	98.5

Table of Contents

Index to Financial Statements

As of December 31, 2006, there were 27 gross (15.6 net) development wells and 31 gross (14.2 net) exploratory wells in the process of drilling. As of April 12, 2007, 25 gross (15.0 net) wells of the development wells in process as of December 31, 2006, were completed as producers, and 2 gross (0.6 net) wells were in the process of completion. As of April 12, 2007, 15 gross (4.3 net) wells of the exploratory wells in process as of December 31, 2006 were completed as producers, 1 gross (1.0 net) well was a dry hole and the remaining exploratory wells were drilling or in the process of completion.

As of April 25, 2007, we operated 18 rigs on our properties and have plans to add additional rigs during the next six months. There can be no assurance, however, that additional rigs will be available to us at an attractive cost. See **Risk Factors** The unavailability or high cost of additional drilling rigs, equipment, supplies, personnel and oilfield services could adversely affect our ability to execute our exploration and development plans within our budget and on a timely basis.

Summary of Oil and Natural Gas Properties and Projects

Rocky Mountain Region

Our properties in the Rocky Mountain region represented 84% of our PV-10 as of December 31, 2006. During the three months ended December 31, 2006, our average production from such properties was 20,092 net Bbls of oil and 7,572 net Mcf of natural gas per day. Our principal producing properties in this region are in the Red River units, the Bakken field and the Big Horn Basin. Additionally, we have prospective acreage for the Lewis Shale in southern Wyoming, another unconventional resource play in the Rocky Mountain Region.

For the six month period ended October 31, 2006, we ranked second among all oil companies in terms of gross operated crude oil production within the Rocky Mountain states of Montana, North Dakota, South Dakota and Wyoming.

Red River Units

Our Red River units represented 59% of our PV-10 in the Rocky Mountain Region as of December 31, 2006 and 55% of our average daily Rocky Mountain Region equivalent production for the three months ended December 31, 2006. The eight units comprising the Red River units are located along the Cedar Hills Anticline in North Dakota, South Dakota and Montana and produce oil and natural gas from the Red River B formation, a thin, continuous, dolomite formation at depths of 8,000 to 9,500 feet. Our Red River units comprise a portion of the Cedar Hills field, listed by the Energy Information Administration in 2004 as the 23rd largest field in the United States ranked by liquids proved reserves.

Cedar Hills Units. The Cedar Hills North unit (CHNU) is located in Bowman and Slope Counties, North Dakota. We drilled the initial horizontal well in the CHNU, the Ponderosa 1-15, in April 1995. As of December 31, 2006, we had drilled 154 horizontal wells within this 49,700-acre unit, with 90 producing wellbores and the remainder serving as injection wellbores. We operate and own a 98% working interest in the CHNU.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

The Cedar Hills West unit (CHWU), in Fallon County, Montana, is contiguous to the northern portion of CHNU. As of December 31, 2006, this 7,800-acre unit contained ten horizontal producing wells and four HPAI wells. We operate and own a 100% working interest in the CHWU.

In January 2003, we commenced enhanced recovery in the two Cedar Hills units, with HPAI used throughout most of the area and water injected generally along the boundary of the CHNU. Under HPAI, compressed air injected into a reservoir oxidizes residual oil and produces flue gases (primarily carbon dioxide and nitrogen) that mobilize and sweep the crude oil into producing wellbores. In response to the HPAI and water injection, production from the Cedar Hills units increased to 9,561 net Boe per day in December 2006 from 2,185 net Boe per day in November 2003. As of December 31, 2006, the average density in the Cedar Hill units was

Table of Contents**Index to Financial Statements**

approximately one producing wellbore each 575 acres. We currently plan to drill 83 new horizontal wellbores and 9 horizontal extensions of existing wellbores in the Cedar Hills units during the next two to three years, increasing the density of both the producing and injection wellbores. We believe this operation will increase production and sweep efficiency. Production in the two units, as projected by our proved reserves report for the year ended December 31, 2006, is expected to peak in late 2008 at approximately 15,400 net Boe per day. In 2007, we plan to invest approximately \$95 million drilling in the Cedar Hills units.

On November 8, 2005, we entered into a contract with Hiland Partners, LP (Hiland) for the processing and treatment of gas produced from the CHNU and CHWU. Under the terms of the contract we agree to deliver low pressure gas to Hiland for compression, treatment and processing at a facility to be constructed by Hiland. Nitrogen and carbon dioxide must be removed from the gas production associated with the increasing oil production from CHNU and CHWU for the gas production to be marketable. Under the terms of the contract, we pay \$0.60 per Mcf in gathering and treating fees, and 50% of the electrical costs attributable to compression and plant operation and receive 50% of the proceeds from residue gas and plant product sales. After we deliver 36 Bcf of gas, the \$0.60 per Mcf gathering and treating fee is eliminated. If the average composite volume of carbon dioxide is less than 10%, we pay an additional \$0.10 per Mcf treating fee, otherwise the treating fee is \$0.20 per Mcf. The plant is currently expected to be operational in May 2007.

Medicine Pole Hills Units. The Medicine Pole Hills units (MPHU) are approximately five miles east of the southern portion of the CHNU. We acquired the Medicine Pole Hills unit in 1995. At that time, the 9,600- acre unit consisted of 18 vertical producing wellbores and four injection wellbores under HPAI producing 525 net Bbbls of oil per day. We have since drilled 33 horizontal wellbores extending production to the west with the formation of the 15,000-acre Medicine Pole Hills West unit and to the south, with the 11,500-acre Medicine Pole Hills South unit. All three units are under HPAI. We operate and own an average 77% working interest in the three units. Production from the units averaged 1,105 net Bbbls of oil and 184 net Mcf of natural gas per day in December 2006. We currently plan to drill 16 new horizontal wellbores and seven horizontal extensions of existing wellbores during the next two years, increasing the density of both producing and injection wellbores. We believe these operations will increase production and sweep efficiency. In 2007, we plan to invest approximately \$15 million for drilling in MPHU.

Buffalo Red River Units. The three contiguous Buffalo Red River units (Buffalo, West Buffalo and South Buffalo) are located in Harding County, South Dakota, approximately 21 miles south of the MPHU. When we purchased the units in 1995, there were 73 vertical producing wellbores and 38 injection wellbores under HPAI producing approximately 1,906 net Bbbls of oil per day. We operate and own an average working interest of 95% in the 32,900 acres comprising the three units. During 2005 and 2006, we re-entered 23 existing vertical wells and drilled horizontal laterals to increase production and sweep efficiency. Production for the month of December 2006 was 1,443 net Bbbls of oil per day compared to an average of 1,162 net Bbbls of oil per day for the first half of 2005. We currently plan to drill 20 horizontal extensions of existing wellbores and 28 new horizontal wellbores in the Buffalo Red River units over the next three years. We believe these operations will increase production and sweep efficiency. In 2007, we plan to invest \$16 million for drilling in the Buffalo Red River units.

Bakken Field

Our properties within the Bakken field in Montana and North Dakota represented 33% of our PV-10 in the Rocky Mountain Region as of December 31, 2006 and 37% of our average daily Rocky Mountain Region equivalent production for the three months ended December 31, 2006. The Bakken formation is widespread and relatively uniform in development throughout the Montana and North Dakota portions of the Williston Basin. The Bakken formation consists of three lithologic members the upper shale, middle member and locally a lower shale. The shales are highly organic, thermally mature and overpressured and act as both a source and

Table of Contents

Index to Financial Statements

reservoir for the oil. The middle member is also productive locally and varies in composition from a silty dolomite, to shaley limestone or sand across the Williston Basin. Horizontal drilling and advanced fracture stimulation technologies have enabled commercial recovery from this historically non-commercial reservoir. Generally, the Bakken formation is drilled horizontally on 1,280-acre units to vertical depths ranging from 9,000 to 10,500 feet with opposing horizontal laterals each extending approximately 4,500 feet, for a total drilled footage of approximately 18,000 to 21,000 feet. The wells are typically fracture stimulated to maximize recovery and economic returns.

Richland County, Montana. Commercial production data available on wells completed after February 2001 in the Bakken formation by various operators in Richland County, Montana report 433 productive wells with cumulative production as of October 2006 of 43 MMBbls of oil and 25 Bcf of natural gas. Daily production from these wells for the month of October 2006 was approximately 52 MBbls of oil and 36 MMcf of natural gas.

Our initial well in the Richland County, Montana portion of the Bakken field, the Goss #34-26 completed in August 2003, has produced approximately 218,000 gross Bbls of oil and 100,000 gross Mcf of natural gas as of December 31, 2006 and averaged 75 gross Bbls of oil and 52 gross Mcf of natural gas per day during the month of December 2006. Our average daily rate from 100 gross (59 net) wells in this field was approximately 6,737 net Bbls of oil and 4,372 net Mcf of natural gas during the month of December 2006. Substantially all of our wells have been horizontally drilled on 1,280-acre units within the middle dolomite member, which is well developed under our leasehold in Richland County. In 2006, we drilled several second horizontal wells in 1,280-acre units and plan to drill a horizontal well in 2007 to test the incremental reserves of a third well in a 1,280-acre unit.

As of December 31, 2006, we held 104,000 gross (79,000 net) undeveloped acres in the Richland County, Montana portion of the Bakken field with 39 proved undeveloped and 58 additional scheduled drilling locations. We currently have five operated drilling rigs in this part of the field and plan to invest \$57 million in the drilling of 21 horizontal Bakken wells in Montana during 2007.

North Dakota Bakken. Encouraged by the results in Richland County, Montana, operators have begun drilling horizontal wells in the Bakken formation in North Dakota. Since this play is in the early stages of development, results are limited but encouraging. As of December 31, 2006, production data had been reported to the North Dakota Oil and Gas Commission on 86 horizontal North Dakota Bakken wells completed since March 2004. The initial production rates on the 86 wells ranged up to 1,355 Boe per day and averaged 192 Boe per day per well. Cumulative and daily production from the 86 wells as of December 31, 2006 was 2.0 MMBoe and 5,863 Boe, respectively.

As in Richland County, Montana, the upper Bakken shale in western North Dakota is highly organic, thermally mature and over-pressured. Within our North Dakota acreage, the formation is found at vertical depths ranging from 8,500 to 11,000 feet. In North Dakota, the Bakken formation gross interval ranges up to 130 feet compared to about 30 feet in Richland County, Montana. Similarly, the upper Bakken shale thickness ranges up to 20 feet in North Dakota compared to about 7 feet in Richland County, Montana. The middle dolomite member of the Bakken formation in the southern portion of our North Dakota acreage is similar to that present in the Richland County, Montana producing area. Moving north on our acreage, the middle dolomite member increases in thickness but diminishes in reservoir quality. We believe the loss of quality of the middle member is offset by the increasing thickness of the upper and lower shales as one moves north and the strategic position of our acreage along the axis of the Nesson anticline.

In March 2004, we served as contract operator on a well completed in the Bakken formation near the northern border of our acreage. We drilled a 4,376-foot single horizontal lateral within the middle dolomite member of the Bakken Shale in an abandoned dry hole. The well has produced approximately 58,000 gross Boe

Table of Contents

Index to Financial Statements

through December 31, 2006 and is estimated to ultimately produce approximately 219,000 gross Boe. The well, initially owned by our principal shareholder and his family, was acquired by us in August 2005.

In October 2004, we completed a well in the Bakken formation on the extreme southeastern edge of our North Dakota acreage in a well originally planned as a shallower Lodgepole formation test. This well is over 120 miles south of our initial test. The well was unsuccessful in the Lodgepole formation and was deepened to test the Bakken formation at this location. The middle dolomite member significantly thins along the southern edge of our acreage and, in this test well, the middle member was essentially not present. The well has produced approximately 17,000 gross Boe through December 31, 2006 from a single 6,199-foot horizontal lateral and is estimated ultimately to produce approximately 32,000 gross Boe.

In 2005, we participated with a small working interest in two non-operated Bakken formation tests in North Dakota. One is expected to ultimately produce about 12,000 gross Boe and the other, 121,000 gross Boe.

In 2006, we participated in 9 gross (4.8 net) operated and 10 gross (1.6 net) non-operated horizontal Bakken Shale wells in North Dakota. Of these, 16 gross (5.2 net) have been completed as producers and the remaining are awaiting completion. Initial production rates for the 16 producing wells ranged from 182 Boe to 1,355 Boe per day.

In June 2006, we entered into an agreement with ConocoPhillips Company to form an area of mutual interest (AMI) within Dunn, McKenzie, Mountrail and Williams Counties, North Dakota and jointly drill wells to test the Bakken formation. Within the AMI, we own approximately 97,000 net acres. Initial wells proposed under the agreement establish exploration blocks covering the 1,280-acre spacing unit for the initial well and two adjacent 1,280-acre spacing units. Each party has the right to acquire from the other party an undivided 50% interest in the exploration block acreage owned by the other party at \$500 per net acre. ConocoPhillips Company has proposed and we have agreed to participate in the initial three wells to be drilled under the agreement. As of April 12, 2007, ConocoPhillips Company had three drilling rigs operating within the AMI and we had two drilling rigs operating on our North Dakota Bakken acreage outside the AMI.

As of December 31, 2006, we held 478,000 gross (263,000 net) undeveloped acres in contiguous counties in North Dakota across the state border from the Richland County, Montana drilling activity. During 2007, we plan to invest approximately \$71 million in the drilling of 37 horizontal Bakken wells on our acreage in North Dakota.

Big Horn Basin and Other

Our wells within the Big Horn Basin in northern Wyoming and other areas within the Rocky Mountain region represented 8% of our PV-10 in the Rocky Mountain Region as of December 31, 2006 and 8% of our average daily Rocky Mountain Region equivalent production for the three months ended December 31, 2006. During the three months ended December 31, 2006, we produced an average of 1,277 net Bbls of oil and 2,638 net Mcf of natural gas per day from our wells in the Big Horn Basin and other areas within the Rocky Mountain region. Our principal property in the Big Horn Basin, the Worland field, produces primarily from the Phosphoria formation. We have 41 additional proved undeveloped drilling locations in the Worland field. During 2007, we plan to invest approximately \$2 million in the drilling of 4 wells in this region.

Lewis Shale Project

As of December 31, 2006, we owned approximately 123,000 gross (31,000 net) undeveloped acres in the Washakie Basin in Carbon and Sweetwater Counties, Wyoming. Our objective is the Lewis Shale, a shale formation up to 1,500 feet thick with thin interbedded and discontinuous siltstones and sandstones. Underlying our acreage, the Lewis Shale is over-pressured, fractured and gas charged with the potential to develop into an economic unconventional gas resource play. Previous drilling in the area has encountered gas from the thick,

Table of Contents

Index to Financial Statements

fractured shale, but only the thin, isolated sands within the shale have been produced. As of October 2006, the Triton field, located in the center of our acreage block, has produced a total of 6.7 Bcf of natural gas from 5 wells with up to 40 feet of perforations in thin sands within the Lewis Shale. We plan to produce the entire Lewis Shale sequence with the expectation that ultimate recoveries per well will be greater than previous results.

During 2006, we participated in the drilling of 4 gross (1.3 net) productive wells in the Lewis Shale project. The first well, the CEPO Federal 20-17, was completed in September 2006, has produced approximately 600,000 Mcf of natural gas through March 2007 and produced at an average rate of approximately 4,300 Mcf of natural gas per day in March 2007. The well is producing from the first of two productive sands encountered in the well. The second sand tested at rates of 2,000 Mcf of natural gas per day with flowing pressures of 1,000 pounds per square inch and will be produced at a later date. The second well, the Neptune 13-11, began producing at a rate of approximately 1,200 Mcf of natural gas per day after fracture stimulation in August 2006. The well has produced approximately 173,000 Mcf of natural gas through March 2007 and produced at an average rate of approximately 320 Mcf of natural gas per day in March 2007. The third well, the Barricade 44-1, was completed in December 2006 and produced at an average rate of approximately 320 Mcf of natural gas per day in March 2007. The fourth well, the CEPO Lewis 23-17, is currently being completed and produced at a rate of approximately 4,450 Mcf of natural gas per day on April 12, 2007. We participated in the drilling of a fifth well in the project in 2007 which was abandoned during drilling operations due to mechanical problems. During 2007, we plan to invest approximately \$1 million in the drilling of two Lewis Shale wells.

Mid-Continent Region

Our properties in the Mid-Continent Region represented 15% of our PV-10 as of December 31, 2006. During the three months ended December 31, 2006, our average production from such properties was 1,717 net Bbls of oil and 15,377 net Mcf of natural gas per day. Our principal producing properties in this region are located in the Anadarko Shelf of western Oklahoma and the Illinois Basin. We have also acquired acreage in three unconventional resource plays: the Woodford Shale, New Albany Shale and Marfa Basin.

Anadarko Shelf

Our properties within the Anadarko Basin represent 64% of our PV-10 in the Mid-Continent Region as of December 31, 2006 and 63% of our average daily Mid-Continent Region equivalent production for the three months ended December 31, 2006. Our wells within the Anadarko Basin produce from a variety of sands and carbonates in both stratigraphic and structural traps. In 2007, we plan to invest approximately \$9 million in the drilling of 6 wells in the Anadarko Basin.

Illinois Basin

Our properties within the Illinois Basin represent 36% of the PV-10 in the Mid-Continent Region as of December 31, 2006 and 37% of our average daily Mid-Continent Region equivalent production for the three months ended December 31, 2006. Our wells within the Illinois Basin produce primarily crude oil from units comprised of shallow sand formations under water injection. In 2007, we plan to invest approximately \$4 million in the drilling of 22 wells in the Illinois Basin.

Woodford Shale Project

We owned approximately 91,000 gross (30,000 net) undeveloped acres and had a total of 710 scheduled drilling locations in Atoka, Coal, Hughes and Pittsburg Counties, Oklahoma as of December 31, 2006. We continue to add to our acreage position and owned approximately 42,000 net acres in the Woodford Shale project at April 25, 2007. Our drilling objective is the 100 to 175-foot thick Woodford Shale at vertical depths of 6,000 to 12,500 feet. We believe horizontal drilling, combined with advanced fracture stimulation technology, may

Table of Contents

Index to Financial Statements

provide the means for commercial development of this organic rich, gas-bearing shale. This play is in the early stages of development and data is limited. However, we are encouraged by recent drilling results. A total of 72 horizontal Woodford Shale completions have been reported within Atoka, Coal, Hughes and Pittsburg Counties during the past three years with reported initial production rates ranging from 125 to 8,700 Mcf of natural gas per day. The number of rigs drilling horizontal Woodford wells in these counties has increased to 38 as of April 12, 2007. During 2006, we participated in 4 gross (1.3 net) operated and 35 gross (1.8 net) non-operated horizontal Woodford Shale wells. Of these 39 wells, 30 gross (1.6 net) wells have been completed as producers, 7 gross (1.2 net) are drilled and awaiting completion and 2 gross (0.3 net) are being drilled. Initial production rates for the 30 producing wells ranged from 705 Mcf to 8,700 Mcf of natural gas per day and averaged 3,139 Mcf of natural gas per day. In July 2006, we completed a 19 square mile 3D seismic survey over portions of our acreage to identify prospective drilling locations. As of April 12, 2007, we had three operated rigs drilling horizontal Woodford Shale wells and plan to add a fourth rig in May 2007. As of April 12, 2007, we also have working interests in five non-operated wells that are in the process of drilling. We anticipate investing approximately \$82 million in the drilling of 123 Woodford Shale wells in 2007.

Marfa Basin Shale Project

In April 2006, we purchased a 50% working interest in approximately 135,000 acres in the Marfa Basin, a lightly explored basin located in Presidio and Brewster Counties, Texas. The Marfa Basin is geologically similar to other gas-prone basins along the Ouachita Overthrust belt, such as the Fort Worth and Arkoma Basins, and is located adjacent to the Delaware Basin where exploration for gas from Barnett equivalent shales is underway by several companies in Culberson County. We are targeting a highly organic and thermally mature sequence of shales up to 600 feet thick that contains Woodford and Barnett equivalent shales. There are no wells producing gas from these shales in the basin. In 2006, we re-entered an existing cased wellbore and tested the productivity of the shales. The well produced natural gas, but at a noncommercial rate. We have not yet determined our 2007 plans for this project.

New Albany Shale Project

We owned approximately 42,000 gross (34,000 net) undeveloped acres in Kentucky and Indiana as of December 31, 2006. Our drilling objective is the New Albany Shale, an organically rich, gas-bearing Devonian age shale equivalent to the prolific Antrim Shale in Michigan. The New Albany Shale averages 100 feet thick under our acreage and is found at vertical depths of 1,500 to 4,500 feet. We believe the potential exists for the New Albany Shale to be an economic unconventional natural gas resource play. In December 2005, we completed our initial horizontal well in the New Albany Shale as an uncommercial producer. We plan to use the core and production data from this well and drilling results of other operators in the play to develop our future drilling plans.

Gulf Coast Region

During the three months ended December 31, 2006, our average production from our Gulf Coast properties was 219 net Bbls of oil and 3,898 net Mcf of natural gas per day. Our principal producing properties in this region are located in South Texas and Louisiana. In 2007, we plan to invest approximately \$4 million in the drilling of 3 wells in the Texas and Louisiana Gulf Coast.

Marketing and Major Customers

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

We principally sell our oil and natural gas production to end users, marketers and other purchasers that have access to nearby pipeline facilities. In areas where there is no practical access to pipelines, oil is transported by truck to storage facilities. Our marketing of oil and natural gas can be affected by factors beyond our control, the

Table of Contents

Index to Financial Statements

effects of which cannot be accurately predicted. For a description of some of these factors, see [Risk factors](#). Market conditions or operational impediments may hinder our access to oil and natural gas markets or delay our production.

For the year ended December 31, 2006, oil sales to Banner and Nexen Marketing U.S.A. Inc. accounted for approximately 14% and 19%, respectively, of our total oil and natural gas sales. No other purchasers accounted for more than 10% of our total oil and gas sales. Banner was an affiliate of ours as described under [Certain Relationships and Related Party Transactions](#). In February 2006, we decided to market the majority of our crude oil in the Rocky Mountain region directly or through a wholly owned subsidiary rather than through an affiliate, and, as Banner has existing contacts and relationships with crude oil purchasers, we decided to purchase Banner. On March 30, 2006, we acquired Banner for approximately \$8.8 million, the book value of working capital, principally cash, accounts receivable, crude oil inventory and accounts payable. We believe that the loss of any of these purchasers would not have a material adverse effect on our operations, as there are a number of alternative crude oil purchasers in our producing regions.

Title to Properties

As is customary in the oil and gas industry, we initially conduct only a cursory review of the title to our properties on which we do not have proved reserves. Prior to the commencement of drilling operations on those properties, we conduct a thorough title examination and perform curative work with respect to significant defects. To the extent title opinions or other investigations reflect title defects on those properties, we are typically responsible for curing any title defects at our expense. We generally will not commence drilling operations on a property until we have cured any material title defects on such property. We have obtained title opinions on substantially all of our producing properties and believe that we have satisfactory title to our producing properties in accordance with standards generally accepted in the oil and gas industry. Prior to completing an acquisition of producing oil and natural gas leases, we perform title reviews on the most significant leases and, depending on the materiality of properties, we may obtain a title opinion or review previously obtained title opinions. Our oil and natural gas properties are subject to customary royalty and other interests, liens to secure borrowings under our credit facility, liens for current taxes and other burdens which we believe do not materially interfere with the use or affect our carrying value of the properties.

Competition

We operate in a highly competitive environment for acquiring properties, marketing oil and natural gas and securing trained personnel. Our competitors vary within the regions in which we operate, and some of our competitors may possess and employ financial, technical and personnel resources substantially greater than ours, which can be particularly important in the areas in which we operate. Those companies may be able to pay more for productive oil and natural gas properties and exploratory prospects and to evaluate, bid for and purchase a greater number of properties and prospects than our financial or personnel resources permit. In addition, shortages or the high cost of drilling rigs could delay or adversely affect our development and exploration operations. Our ability to acquire additional prospects and to find and develop reserves in the future will depend on our ability to evaluate and select suitable properties and to consummate transactions in a highly competitive environment. Also, there is substantial competition for capital available for investment in the oil and natural gas industry.

Regulation of the Oil and Natural Gas Industry

Regulation of Transportation of Oil

Sales of crude oil, condensate and natural gas liquids are not currently regulated and are made at negotiated prices. Nevertheless, Congress could reenact price controls in the future.

Table of Contents

Index to Financial Statements

Our sales of crude oil are affected by the availability, terms and cost of transportation. The transportation of oil in common carrier pipelines is also subject to rate regulation. The Federal Energy Regulatory Commission, or the FERC, regulates interstate oil pipeline transportation rates under the Interstate Commerce Act. In general, interstate oil pipeline rates must be cost-based, although settlement rates agreed to by all shippers are permitted and market-based rates may be permitted in certain circumstances. Effective January 1, 1995, the FERC implemented regulations establishing an indexing system (based on inflation) for transportation rates for oil that allowed for an increase or decrease in the cost of transporting oil to the purchaser. A review of these regulations by the FERC in 2000 was successfully challenged on appeal by an association of oil pipelines. On remand, the FERC in February 2003 increased the index slightly, effective July 2001. Intrastate oil pipeline transportation rates are subject to regulation by state regulatory commissions. The basis for intrastate oil pipeline regulation, and the degree of regulatory oversight and scrutiny given to intrastate oil pipeline rates, varies from state to state. Insofar as effective interstate and intrastate rates are equally applicable to all comparable shippers, we believe that the regulation of oil transportation rates will not affect our operations in any way that is of material difference from those of our competitors.

Further, interstate and intrastate common carrier oil pipelines must provide service on a non-discriminatory basis. Under this open access standard, common carriers must offer service to all similarly situated shippers requesting service on the same terms and under the same rates. When oil pipelines operate at full capacity, access is governed by prorationing provisions set forth in the pipelines' published tariffs. Accordingly, we believe that access to oil pipeline transportation services generally will be available to us to the same extent as to our competitors.

Regulation of Transportation and Sale of Natural Gas

Historically, the transportation and sale for resale of natural gas in interstate commerce have been regulated pursuant to the Natural Gas Act of 1938, the Natural Gas Policy Act of 1978 and regulations issued under those Acts by the FERC. In the past, the federal government has regulated the prices at which natural gas could be sold. While sales by producers of natural gas can currently be made at uncontrolled market prices, Congress could reenact price controls in the future. Deregulation of wellhead natural gas sales began with the enactment of the Natural Gas Policy Act. In 1989, Congress enacted the Natural Gas Wellhead Decontrol Act which removed all Natural Gas Act and Natural Gas Policy Act price and non-price controls affecting wellhead sales of natural gas effective January 1, 1993.

FERC regulates interstate natural gas transportation rates and service conditions, which affects the marketing of natural gas that we produce, as well as the revenues we receive for sales of our natural gas. Since 1985, the FERC has endeavored to make natural gas transportation more accessible to natural gas buyers and sellers on an open and non-discriminatory basis. The FERC has stated that open access policies are necessary to improve the competitive structure of the interstate natural gas pipeline industry and to create a regulatory framework that will put natural gas sellers into more direct contractual relations with natural gas buyers by, among other things, unbundling the sale of natural gas from the sale of transportation and storage services. Beginning in 1992, the FERC issued Order No. 636 and a series of related orders to implement its open access policies. As a result of the Order No. 636 program, the marketing and pricing of natural gas have been significantly altered. The interstate pipelines' traditional role as wholesalers of natural gas has been eliminated and replaced by a structure under which pipelines provide transportation and storage service on an open access basis to others who buy and sell natural gas. Although the FERC's orders do not directly regulate natural gas producers, they are intended to foster increased competition within all phases of the natural gas industry.

In 2000, the FERC issued Order No. 637 and subsequent orders, which imposed a number of additional reforms designed to enhance competition in natural gas markets. Among other things, Order No. 637 effected

Table of Contents

Index to Financial Statements

changes in FERC regulations relating to scheduling procedures, capacity segmentation, penalties, rights of first refusal and information reporting. Most pipelines' tariff filings to implement the requirements of Order No. 637 have been accepted by the FERC and placed into effect.

We cannot accurately predict whether the FERC's actions will achieve the goal of increasing competition in markets in which our natural gas is sold. Additional proposals and proceedings that might affect the natural gas industry are pending before the FERC and the courts. The natural gas industry historically has been very heavily regulated. Therefore, we cannot provide any assurance that the less stringent regulatory approach recently established by the FERC will continue. However, we do not believe that any action taken will affect us in a way that materially differs from the way it affects other natural gas producers.

Gathering service, which occurs upstream of jurisdictional transmission services, is regulated by the states onshore and in state waters. Although its policy is still in flux, FERC has reclassified certain jurisdictional transmission facilities as non-jurisdictional gathering facilities, which has the tendency to increase our costs of getting gas to point of sale locations.

Intrastate natural gas transportation is also subject to regulation by state regulatory agencies. The basis for intrastate regulation of natural gas transportation and the degree of regulatory oversight and scrutiny given to intrastate natural gas pipeline rates and services varies from state to state. Insofar as such regulation within a particular state will generally affect all intrastate natural gas shippers within the state on a comparable basis, we believe that the regulation of similarly situated intrastate natural gas transportation in any states in which we operate and ship natural gas on an intrastate basis will not affect our operations in any way that is of material difference from those of our competitors. Like the regulation of interstate transportation rates, the regulation of intrastate transportation rates affects the marketing of natural gas that we produce, as well as the revenues we receive for sales of our natural gas.

Regulation of Production

The production of oil and natural gas is subject to regulation under a wide range of local, state and federal statutes, rules, orders and regulations. Federal, state and local statutes and regulations require permits for drilling operations, drilling bonds and reports concerning operations. All of the states in which we own and operate properties have regulations governing conservation matters, including provisions for the unitization or pooling of oil and natural gas properties, the establishment of maximum allowable rates of production from oil and natural gas wells, the regulation of well spacing, and plugging and abandonment of wells. The effect of these regulations is to limit the amount of oil and natural gas that we can produce from our wells and to limit the number of wells or the locations at which we can drill, although we can apply for exceptions to such regulations or to have reductions in well spacing. Moreover, each state generally imposes a production or severance tax with respect to the production and sale of oil, natural gas and natural gas liquids within its jurisdiction.

The failure to comply with these rules and regulations can result in substantial penalties. Our competitors in the oil and natural gas industry are subject to the same regulatory requirements and restrictions that affect our operations.

Environmental, Health and Safety Regulation

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

General. Our operations are subject to stringent and complex federal, state, local and provincial laws and regulations governing environmental protection, health and safety, including the discharge of materials into the environment. These laws and regulations may, among other things:

require the acquisition of various permits before drilling commences;

Table of Contents

Index to Financial Statements

restrict the types, quantities and concentration of various substances that can be released into the environment in connection with oil and natural gas drilling, production and transportation activities;

limit or prohibit drilling activities on certain lands lying within wilderness, wetlands and other protected areas; and

require remedial measures to mitigate pollution from former and ongoing operations, such as requirements to close pits and plug abandoned wells.

These laws and regulations may also restrict the rate of oil and natural gas production below the rate that would otherwise be possible. The regulatory burden on the oil and gas industry increases the cost of doing business in the industry and consequently affects profitability. Additionally, Congress and federal and state agencies frequently revise environmental, health and safety laws and regulations, and any changes that result in more stringent and costly waste handling, disposal and cleanup requirements for the oil and gas industry could have a significant impact on our operating costs.

The following is a summary of some of the existing environmental, health and safety laws and regulations to which our business operations are subject.

Waste Handling. The Resource Conservation and Recovery Act, or RCRA, and comparable state statutes, regulate the generation, transportation, treatment, storage, disposal and cleanup of hazardous and non-hazardous wastes. Under the auspices of the federal Environmental Protection Agency, or EPA, the individual states administer some or all of the provisions of RCRA, sometimes in conjunction with their own, more stringent requirements. Drilling fluids, produced waters and most of the other wastes associated with the exploration, development and production of crude oil or natural gas are currently regulated under RCRA's non-hazardous waste provisions. However, it is possible that certain oil and natural gas exploration and production wastes now classified as non-hazardous could be classified as hazardous wastes in the future. Any such change could result in an increase in our costs to manage and dispose of wastes, which could have a material adverse effect on our results of operations and financial position.

Comprehensive Environmental Response, Compensation and Liability Act. The Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, also known as the Superfund law, imposes joint and several liability, without regard to fault or legality of conduct, in connection with the release of a hazardous substance into the environment. Persons potentially liable under CERCLA include the current or former owner or operator of the site where the release occurred and anyone who disposed or arranged for the disposal of a hazardous substance to the site where the release occurred. Under CERCLA, such persons may be subject to joint and several liability for the costs of cleaning up the hazardous substances that have been released into the environment, damages to natural resources and the costs of certain health studies. In addition, it is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the hazardous substances released into the environment.

We currently own, lease or operate and have formerly owned, leased or operated numerous properties that have been used for oil and natural gas exploitation and production for many years. Although we believe that we have utilized operating and waste disposal practices that were standard in the industry at the time, hazardous substances may have been, and may in the future be, released on, at or under the properties owned, leased or operated by us, or on, at or under other locations, including off-site locations, where such substances have been taken for disposal. In addition, some of our properties have been operated by third parties or by previous owners or operators whose handling, treatment and disposal of hazardous substances were not under our control. These properties and the substances disposed or released on, at or under them may be subject to CERCLA, RCRA and analogous state laws. Pursuant to such laws, we have in the past performed remediation of spills and releases resulting from our operations. In certain circumstances, we could be required to remove previously disposed

Table of Contents

Index to Financial Statements

substances and wastes, remediate contaminated property or perform remedial plugging or pit closure operations to prevent future contamination. In addition, federal and state trustees can also seek substantial compensation for damages to natural resources resulting from spills or releases.

Water Discharges. The Federal Water Pollution Control Act, or the Clean Water Act, and analogous state laws, impose restrictions and strict controls with respect to the discharge of pollutants, including oil and other substances generated by our operations, into waters of the United States or state waters. Under these laws, the discharge of pollutants into regulated waters is prohibited except in accordance with the terms of a permit issued by the EPA or an analogous state agency. Federal and state regulatory agencies can impose administrative, civil and criminal penalties for non-compliance with discharge permits or other requirements of the Clean Water Act and analogous state laws and regulations.

The Safe Drinking Water Act, or SDWA, and analogous state laws impose requirements relating to our underground injection activities. Under these laws, the EPA and state environmental agencies have adopted regulations relating to permitting, testing, monitoring, record-keeping and reporting of injection well activities, as well as prohibitions against the migration of injected fluids into underground sources of drinking water. We currently own and operate a number of injection wells, used primarily for re-injection of produced waters, that are subject to SDWA requirements.

Air Emissions. The Federal Clean Air Act and comparable state laws regulate emissions of various air pollutants through air emissions permitting programs and the imposition of other requirements. In addition, EPA and certain states in which we operate have developed and continue to develop stringent regulations governing emissions of toxic air pollutants at specified sources. Federal and state regulatory agencies can impose administrative, civil and criminal penalties for non-compliance with air permits or other requirements of the Federal Clean Air Act and analogous state laws and regulations.

The Kyoto Protocol to the United Nations Framework Convention on Climate Change became effective in February 2005. Under the Protocol, participating nations are required to implement programs to reduce emissions of certain gases, generally referred to as greenhouse gases, that are suspected of contributing to global warming. The United States is not currently a participant in the Protocol. However, Congress is actively considering legislation directed at reducing greenhouse gas emissions and the EPA may be required to regulate greenhouse gas emissions from mobile sources as a result of a recent U.S. Supreme Court decision even if Congress does not specifically adopt greenhouse gas legislation. Additionally, there has been support in various regions of the country for legislation that requires reductions in greenhouse gas emissions, and many states have already adopted legislation or undertaken regulatory initiatives addressing greenhouse gas emissions from various sources. The oil and natural gas industry is a direct source of certain greenhouse gas emissions, namely carbon dioxide and methane, and future restrictions on such emissions could impact our future operations. At this time, although it is not possible to accurately estimate how potential future laws or regulations addressing greenhouse gas emissions would impact our business, passage of such laws or regulations affecting areas in which we conduct business could have an adverse effect on our operations.

National Environmental Policy Act. Oil and natural gas exploration and production activities on federal lands are subject to the National Environmental Policy Act, or NEPA. NEPA requires federal agencies, including the Department of Interior, to evaluate major agency actions that have the potential to significantly impact the environment. In the course of such evaluations, an agency will prepare an Environmental Assessment that assesses the potential direct, indirect and cumulative impacts of a proposed project and, if necessary, will prepare a more detailed Environmental Impact Statement that may be made available for public review and comment. All of our current exploration and production activities, as well as proposed exploration and development plans, on federal lands require governmental permits that are subject to the requirements of NEPA. This process has the potential to delay the development of oil and natural gas projects.

Table of Contents

Index to Financial Statements

Health, Safety and Disclosure Regulation. We are subject to the requirements of the federal Occupational Safety and Health Act, or OSHA, and comparable state statutes. The OSHA hazard communication standard, the Emergency Planning and Community Right to Know Act and similar state statutes require that we organize and/or disclose information about hazardous materials stored, used or produced in our operations.

We have incurred in the past, and expect to incur in the future, capital and other expenditures related to environmental compliance. Such expenditures, however, are included within our overall capital and operating budgets and are not separately accounted for. Although we believe that our continued compliance with existing requirements will not have a material adverse impact on our financial condition and results of operations, we cannot assure you that the passage of more stringent laws or regulations in the future will not have a negative impact on our financial position or results of operations.

Employees

As of December 31, 2006, we employed 299 people, including 166 employees in drilling and production, 45 in financial and accounting, 29 in land, 15 in exploration, 10 in reservoir engineering, 23 in administrative and 11 in information technology. Our future success will depend partially on our ability to attract, retain and motivate qualified personnel. We are not a party to any collective bargaining agreements and have not experienced any strikes or work stoppages. We consider our relations with our employees to be satisfactory. From time to time we utilize the services of independent contractors to perform various field and other services.

Legal Proceedings

We are not a party to any material pending legal proceedings, other than ordinary course litigation incidental to our business. While the ultimate outcome and impact of any proceeding cannot be predicted with certainty, our management believes that the resolution of any proceeding will not have a material adverse effect on our financial condition or results of operations.

Table of ContentsIndex to Financial Statements

Management

Executive Officers and Directors

The following table sets forth names, ages and titles of our executive officers and directors:

<u>Name</u>	<u>Age</u>	<u>Title</u>
Harold G. Hamm(1)(3)	61	Chairman, Chief Executive Officer and Director
Mark E. Monroe(5)	52	President, Chief Operating Officer and Director
John D. Hart	39	Vice President, Chief Financial Officer and Treasurer
Jeffrey B. Hume	55	Senior Vice President Operations
Tom E. Luttrell	49	Senior Vice President Land
Jack H. Stark(4)	52	Senior Vice President Exploration and Director
Gene R. Carlson	53	Vice President Resource Development
Richard H. Straeter	49	President Illinois Division
Robert J. Grant(2)(5)	68	Director
George S. Littell(3)	62	Director
Lon McCain(1)(2)(5)	59	Director
H. R. Sanders, Jr.(1)(2)(4)	75	Director

(1) Member of the compensation committee.

(2) Member of the audit committee.

(3) Term expires in 2007.

(4) Term expires in 2008.

(5) Term expires in 2009.

Harold G. Hamm has served as Chief Executive Officer and a director since our inception in 1967 and currently serves as Chairman of the board of directors. He serves as Chairman of the board of directors of the general partner of Hiland Partners LP, one of our affiliates and a NASDAQ

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

publicly traded midstream master limited partnership, and he serves as Chairman of the board of directors of the general partner of Hiland Holdings GP, LP (Hiland Holdings), also publicly traded on NASDAQ. Hiland Holdings owns the general partner interest and units in Hiland Partners LP. In connection with the resignation of the President and Chief Executive Officer of Hiland Partners LP and Hiland Holdings, on April 16, 2007, Mr. Hamm became the interim President and Chief Executive Officer of both entities until a successor is named. He also serves as a director of Complete Production Services, Inc., an NYSE publicly traded oil and gas service company. Mr. Hamm serves as Chairman of the Oklahoma Independent Petroleum Association. He was President of the National Stripper Well Association and founder and Chairman of Save Domestic Oil, Inc. and served on the Board of the Oklahoma Energy Explorers.

Mark E. Monroe became President and Chief Operating Officer in October 2005 and has served as a member of our board of directors since November 2001. He was Chief Executive Officer and President of Louis Dreyfus Natural Gas Corp. prior to its merger with Dominion Resources, Inc. in October 2001. After the merger, Mr. Monroe was a consultant and served as a member of the board of directors of Unit Corporation, an NYSE publicly traded onshore drilling and oil and gas exploration and production company from October 2003 through October 2005. Prior to the formation of Louis Dreyfus Natural Gas Corp. in 1990, he was Chief Financial Officer of Bogert Oil Company. He has served as Chairman of the Oklahoma Independent Petroleum Association, served on the Domestic Petroleum Council and the National Petroleum Council and on the boards of the Independent Petroleum Association of America, the Oklahoma Energy Explorers and the Petroleum Club of Oklahoma City. Mr. Monroe is a Certified Public Accountant and received his Bachelor of Business Administration degree from the University of Texas at Austin.

Table of Contents

Index to Financial Statements

John D. Hart became Vice President, Chief Financial Officer and Treasurer in November 2005. Prior to joining us, he was a Senior Audit Manager with Ernst & Young LLP. Mr. Hart was employed by Ernst & Young LLP from April 1998 to November 2005 and by Arthur Andersen LLP from December 1991 to April 1998. He is a member of the American Institute of Certified Public Accountants, Oklahoma Society of Certified Public Accountants and the Oklahoma Independent Petroleum Association. Mr. Hart graduated from Oklahoma State University with a Masters of Science in Accounting in December 1991.

Jeffrey B. Hume became our Senior Vice President of Operations in November 2006. He was previously elected as Senior Vice President of Resource and Business Development in October 2005, Senior Vice President of Resource Development in July 2002 and served as Vice President of Drilling Operations from 1996 to 2002. Prior to joining us in May 1983 as Vice President of Engineering and Operations, Mr. Hume held various engineering positions with Sun Oil Company, Monsanto Company and FCD Oil Corporation. Mr. Hume is a Registered Professional Engineer and member of the Society of Petroleum Engineers, Oklahoma Independent Petroleum Association and the Oklahoma and National Professional Engineering Societies. Mr. Hume graduated from Oklahoma State University with a Bachelor of Science degree in Petroleum Engineering Technology in 1975.

Tom E. Luttrell joined us as Senior Landman in April 1991 and was promoted to Senior Vice President Land in February 1997. Prior to joining us, Mr. Luttrell was a Senior Landman for Alexander Energy Corp. and Pacific Enterprises Oil Corp. Mr. Luttrell is currently a member of the Oklahoma Independent Petroleum Association legislative affairs committee. He is also a member of the Oklahoma Energy Explorers, American Association of Petroleum Landmen and several regional landman associations. Mr. Luttrell graduated from East Central Oklahoma State University in 1980 with a Bachelor of Business Administration. Mr. Luttrell is a past Chairman of the Northern Alliance of Independent Producers.

Jack H. Stark became Senior Vice President Exploration and a director in May 1998. Prior to joining us as Vice President of Exploration in June 1992, he was the exploration manager for the Western Mid-Continent Region for Pacific Enterprises. From 1978 to 1988, he held various staff and middle management positions with Cities Service Co. and TXO Production Corp. He is a member of the American Association of Petroleum Geologists, Oklahoma Independent Petroleum Association, Rocky Mountain Association of Geologists, Houston Geological Society and Oklahoma Geological Society. Mr. Stark holds a Masters degree in Geology from Colorado State University.

Gene R. Carlson became Vice President Resource Development in October 2005. He was an oil and gas consultant from March 2003 to October, 2005 and a founder and Chief Operating Officer for Encore Acquisition Company from its inception in April 1998 to March 2003. Mr. Carlson graduated from Texas A&M University with a Bachelor of Science degree in Mechanical Engineering.

Richard H. Straeter became President Illinois Division in October 2006. He was previously elected as President of Continental Resources of Illinois, Inc. (CRII) in April 2002. Prior to joining CRII, Mr. Straeter was employed by Barger Engineering, Inc. for 18 years as an engineering consultant and Vice President. He is a Registered Professional Engineer in Indiana, Illinois, Kentucky and Tennessee. Mr. Straeter is a past Chairman of the Illinois Basin Society of Petroleum Engineers and serves as a member of the National Petroleum Council, the Illinois Oil & Gas Association Board and the Ohio, Indiana, Kentucky and Michigan Oil and Gas Associations. Mr. Straeter earned his Bachelor of Science degree in Petroleum Engineering in 1983 and a Professional Engineering Degree (Honorary Masters) in 2004 from the University of Missouri-Rolla.

Robert J. Grant has been a director since January 2006. He was an audit partner of Deloitte & Touche LLP and a predecessor firm from 1969 to 2000. He served as partner in charge of the Dallas, Texas office audit department for ten years and a member of the firm's audit management group for twelve years. He has been a member of the Independent Petroleum Association of America, the American Petroleum Institute and the Texas Independent Producers and Royalty Owners Association and currently is a member of the American Institute of

Table of Contents

Index to Financial Statements

Certified Public Accountants and the Texas Society of Certified Public Accountants. Mr. Grant graduated from the University of Detroit with a MBA and BA in accounting.

George S. Littell has been a director since November 2004. He is a partner in the firm of Groppe, Long & Littell, a petroleum consulting firm. Prior to joining the firm in 1975, he held various positions in the natural gas, refining, supply and distribution and gas liquids departments of Mobil Oil Corporation. Mr. Littell received a Bronze Star for his service as an officer in the US Army, Vietnam in 1968-1969. He is a member of the International Association for Energy Economics, an Eagle Scout and a director of the Sam Houston Area Council for the Boy Scouts of America. Mr. Littell graduated from Yale University in 1966 and earned an MBA degree from New York University and a law degree from La Salle Extension University.

Lon McCain has been a director since February 2006. He was appointed a director of Cheniere Energy Partners, GP, LLC, the general partner of Cheniere Energy Partners, L.P., a publicly traded partnership, since April 2007. He was Vice President, Treasurer and Chief Financial Officer of Westport Resources Corporation, a publicly traded exploration and production company, from 2001 until the sale of Westport to Kerr McGee Corporation and his retirement in 2004. From 1992 until joining Westport in 2001, Mr. McCain was Senior Vice President and Principal of Petrie Parkman & Co., an investment banking firm specializing in the oil and gas industry. From 1978 until joining Petrie Parkman, Mr. McCain held senior financial management positions with Presidio Oil Company, Petro-Lewis Corporation and Ceres Capital. He was an Adjunct Professor of Finance at the University of Denver from 1982 through 2005. Mr. McCain currently serves on the board of Crimson Exploration, Inc., a domestic exploration and production company traded on the OTC Bulletin Board, and TransZap, Inc., a privately held provider of accounting software. Mr. McCain received a Bachelor of Business Administration and a Masters of Business Administration/Finance from the University of Denver.

H. R. Sanders, Jr. has been a director since November 2001. He served as a board member of Devon Energy Corporation from 1981 through 2000. In addition, he held the position of Executive Vice President for Devon Energy from 1981 until his retirement in 1997. From 1970 to 1981, Mr. Sanders was a Senior Vice President for Republic Bank of Dallas, N.A. with direct responsibility for independent oil, gas and mining loans. Mr. Sanders is a former member of the Independent Petroleum Association of America, Texas Independent Producers and Royalty Owners Association and Oklahoma Independent Petroleum Association, and a former director of Triton Energy Corporation. He currently serves on the board of Toreador Resources Corporation, a NASDAQ publicly traded oil and gas company with principal operations in France, Romania and Turkey.

Governance Matters

Our board of directors currently consists of seven members. Our directors are divided into three classes serving staggered three-year terms. Class I, Class II and Class III directors will serve until our annual meetings of shareholders in 2007, 2008 and 2009, respectively. At each annual meeting of shareholders, directors will be elected to succeed the class of directors whose terms have expired. This classification of our board of directors could have the effect of increasing the length of time necessary to change the composition of a majority of the board of directors. In general, at least two annual meetings of shareholders will be necessary for shareholders to effect a change in a majority of the members of the board of directors.

After the closing of this offering, we will be a controlled company within the meaning of the listing standards of the NYSE. Consequently, we will not be required to comply with certain of the NYSE's listed company requirements, such as the requirement to have a majority of independent directors on our board or the requirement to have compensation and governance committees comprised entirely of independent directors. However, we will still be required to have an independent audit committee under the NYSE's listed company requirements and will

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

still be subject to SEC rules and regulations governing audit committees. As such, we will be required to have an audit committee consisting of independent directors as defined under the listing standards of the NYSE and under SEC rules and regulations. In addition, at least one member of the audit

Table of Contents

Index to Financial Statements

committee of our board of directors must meet the definition of an audit committee financial expert as defined under the SEC rules and regulations.

Board Committees

Our board of directors currently has an audit committee and a compensation committee. Our board may establish other committees from time to time to facilitate our management. Our full board will be responsible for overseeing director nomination and other governance functions.

Audit Committee. The principal functions of the audit committee are to assist the board in monitoring the integrity of our consolidated financial statements, the independent auditor's qualifications and independence, the performance of our independent auditors and our compliance with legal and regulatory requirements. The audit committee will have the sole authority to retain and terminate our independent auditors and to approve the compensation paid to our independent auditors. The audit committee also will be responsible for overseeing our internal audit function. The audit committee currently consists of Messrs. Grant, McCain and Sanders, with Mr. Grant acting as the Chairman. Messrs. Grant, McCain and Sanders are independent under the listing standards of the NYSE and under SEC rules and regulations.

Compensation Committee. The principal functions of the compensation committee are to determine awards to employees of stock or other equity compensation, establish performance criteria for and evaluate the performance of the chief executive officer and approve compensation of all senior executives and directors. The compensation committee is currently comprised of Messrs. Hamm, McCain and Sanders, with Mr. Sanders acting as the Chairman.

Compensation Committee Interlocks and Insider Participation

None of our executive officers has served as a member of a compensation committee (or if no committee performs that function, the board of directors) of any other entity that has an executive officer serving as a member of our board of directors.

Director Compensation

Directors who are not our employees are paid an annual retainer of \$25,000 and \$1,500 for each regular board of directors meeting attended. The Chairman of the audit committee is paid an additional annual retainer of \$10,000, each Chairman of the other committees is paid an annual retainer of \$2,500 and committee members other than the Chairman are paid an additional retainer of \$1,000. A fee of \$750 is paid for each special board meeting and \$500 for each committee meeting attended.

Non-employee directors are also annually granted restricted stock with an approximate market value of \$40,000 to vest over one year. In January 2006, 3,300 shares of restricted stock were granted each to Messrs. Grant, Littell and Sanders. In February 2006, 3,300 shares of restricted stock were granted to Mr. McCain. In January 2007, 3,300 shares of restricted stock were granted each to Messrs. Grant, Littell, Sanders, and McCain.

2006 Director Compensation Table

The following table sets forth the compensation of our outside directors for the year ended December 31, 2006.

Name	Fees Earned or Paid in Cash(\$)	Stock Awards\$(1)	Total(\$)
Robert J. Grant	\$44,083	\$ 39,468	\$ 83,551
George S. Littell	31,000	39,468	70,468
Lon McCain	32,499	36,179	68,678
H. R. Sanders Jr.	40,772	39,468	80,240

(1) Stock awards represent the value of restricted stock recognized during 2006.

Management members of the board of directors are not compensated separately for their board service.

Compensation Discussion and Analysis

Overview. Prior to the completion of this offering, we have operated as a private company controlled by Harold G. Hamm, our founder, principal shareholder, Chairman of the Board and Chief Executive Officer. From our inception until the formation of the compensation committee in February 2006, Mr. Hamm had been solely responsible for reviewing and approving all compensation decisions relating to our executive officers, including those executive officers named in the Summary Compensation Table under Summary Compensation Table below. Mr. Hamm currently serves as a member of our compensation committee, which is responsible for implementing and administering all aspects of our benefit and compensation plans and programs, as well as developing specific policies regarding compensation of our executive officers.

Compensation Objectives. We are engaged in oil and natural gas exploration and exploitation activities in the Rocky Mountain, Mid-Continent and Gulf Coast regions of the United States. Our primary business goal is to increase shareholder value by finding and developing crude oil and natural gas reserves at costs that provide an attractive rate of return on our investment. We operate in a highly competitive environment for acquiring properties, marketing oil and natural gas and securing trained personnel. We believe that the loss of the services of our senior management or technical personnel could have a material adverse effect on our operations. Accordingly, we have designed our executive compensation program to attract, retain and motivate experienced, talented individuals to achieve our business goal, using the business strategies discussed in greater detail in this prospectus. Please read Business and Properties Our Business Strategy.

Implementing Our Objectives.

Determining Compensation. We rely upon our judgment in making compensation decisions, after reviewing the performance of the company and carefully evaluating an executive's contribution to that performance, including his business responsibilities, current compensation arrangements and long-term potential to enhance shareholder value. Specific operational and financial factors affecting compensation decisions for our named executive officers include reserve additions, finding and development costs, production volume and costs, earnings, cash flow, operating income and return on equity. We have not assigned specific individual goals to our executive officers that are used by the compensation committee in the determination of compensation for such officers.

We do not adhere to rigid formulas in determining the amount and mix of compensation elements. As described below, we rely on the formulaic achievement of financial goals only when establishing the aggregate bonus pool from which bonuses may be paid to all employees. We consider competitive market compensation paid by other companies similar in size and operations to us but we do not attempt to maintain a certain target percentile within that peer group or otherwise exclusively rely on those data to determine executive compensation. We incorporate flexibility into our compensation programs and in the assessment process to respond to and adjust for the evolving business environment.

Peer Compensation Group. The companies included in our compensation peer group (the Peer Group) are Bill Barrett Corporation, Denbury Resources Inc., Encore Acquisition Company, Quicksilver Resources Inc., Range Resources Corp., Southwestern Energy Company and St. Mary Land and Exploration Company. We selected these companies because they are publicly traded exploration and production companies similar in size and operations to us.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Elements of Compensation. The principal elements of the compensation program are a base salary, an annual cash bonus and a long-term incentive award. All cash bonus and equity awards for executive officers have been determined on a discretionary basis and have not been linked to the achievement of specific corporate goals or objectives.

Base Salary. The objective of the base salary component is to pay a competitive wage commensurate with such officer's experience, skills and responsibilities. From January 1, 1999 until September 15, 2004,

Table of Contents

Index to Financial Statements

Mr. Hamm elected not to receive a salary or annual bonus. In September 2004, he began to draw an annual salary of \$350,000. On January 1, 2006, Mr. Hamm's annual salary was increased to \$700,000 after a review of salary amounts paid to the chief executive officers of our Peer Group. The average cash compensation (salary and bonus) paid in 2005 to the highest paid named executive officer as reported in the proxy statements of the Peer Group was approximately \$1.3 million compared to \$986,539 paid to our CEO in 2006. Mr. Monroe's total compensation, as set forth below under Summary Compensation Table, is materially more than the other named executive officers' total compensation due principally to the accrual for a long-term incentive bonus payable to him if he remains employed by us through October 2008. No other executive officer has been granted a long-term incentive bonus. Mr. Monroe's base salary, as well as the long-term incentive bonus, was established through negotiations with him in connection with his hiring in October 2005. Mr. Monroe was recruited by us in anticipation of our initial public offering. His background includes experience as a chief executive officer of a public NYSE-traded exploration and production company with operations and proved reserves larger than our current size. None of our other executive officers has similar experience. Mr. Monroe's base has not been adjusted since such time.

With respect to our other executive officers, Mr. Hamm recommends to the compensation committee for approval the base salaries of the other executive officers generally after completion of an annual performance review conducted after each officer's anniversary hire date. In establishing the base salaries for the other executive officers during 2006, Mr. Hamm and our compensation committee considered the compensation paid to named executive officers by the Peer Group. However, we do not attempt to maintain a certain target percentile within that Peer Group or otherwise rely on those data to determine our executive compensation. The aggregate base salaries for our named executive officers, excluding Messrs. Hamm and Monroe, were increased 7.81% during 2006 in order to satisfy our objective of paying salaries at competitive levels. As reported in the proxy statements of the Peer Group, the average base salary paid in 2005 was approximately \$247,000 with respect to the third highest paid named executive officer, \$234,000 with respect to the fourth highest paid named executive officer and \$204,000 with respect to the fifth highest paid named executive officer. This compares to a base salary range of \$225,577 to \$232,500 paid to our third through fifth highest paid named executive officers. In the future, we expect that the base salaries of the executive officers will be reviewed on an annual basis and adjusted as necessary to remain competitive. We expect that future base salary adjustments for executive officers will be comparable to future adjustments made to executive officer base salaries by the Peer Group.

Annual Cash Bonus. Our executives may earn annual cash bonuses as a reward for our subjective evaluation of their individual contribution to the achievement of annual financial and operating results. The individual cash bonuses paid to executive officers for 2006 and prior years have been determined on a discretionary basis. Annual cash bonus differences are due to the compensation committee's subject evaluation of the relative individual contribution to the achievement of our annual financial and operating results.

Annual cash bonuses are paid from a bonus pool that is equal to 0.375% of net income. Net income is reduced by 35 percent as an adjustment for income taxes not charged against book income because of our S-corporation status. If the conditions described below are met, the annual aggregate bonus pool for executive officers will be equal to 0.375% of earnings before interest expense, depreciation, depletion, amortization and accretion, property impairments, exploration expense and non-cash compensation expense (EBIDA), which results in a larger cash pool from which bonuses may be paid. We consider EBIDA to be a strong indicator of operating performance. The conditions that must be satisfied for the bonus pool to be established based on EBIDA rather than adjusted net income are:

an increase in equivalent production for the current year compared to the prior year, and

proved reserve additions from drilling activities of at least 120 percent of production.

Table of Contents

Index to Financial Statements

During 2006, the first condition was satisfied as production increased 25% over 2005 levels. However, the second condition was not fully achieved as reserve additions from drilling activities were only 111% of production. In January 2007, we elected, with the approval of the compensation committee, to fund the bonus pool at 119% of the EBIDA level. In approving the larger bonus pool, our compensation committee considered several operational and financial criteria, including reserve additions, finding and development costs, production volume and costs, earnings, cash flow, operating income and return on equity. The criteria considered are not weighted, but are viewed collectively. The decision to waive the proved reserve condition was consistent with our compensation philosophy of examining several operational and financial criteria in determining annual cash bonuses.

We expect the compensation committee will modify the formal terms of our current bonus plan to be consistent with our compensation philosophy as described below. Therefore, we expect that our annual cash bonus pool will be funded on the basis of EBIDA if warranted by our overall operational, financial and stock performance even though one or both of the current bonus plan conditions are not satisfied. As a result, satisfaction of the criteria required for funding the bonus pool on the basis of EBIDA may be waived frequently in the future.

The bonus amount for each executive officer is determined at the discretion of the compensation committee. In addition, the compensation committee may elect to award annual cash bonuses to executive officers in an aggregate amount that exceeds the amount calculated from net income or EBIDA. Annual cash bonuses for executive officers are determined after completion of the year-end audited financial statements and reserve report. We have not adopted a policy regarding the adjustment or recovery of previously paid annual cash bonuses in the event our net income or EBIDA, as applicable, are restated or otherwise adjusted in a manner that would have the effect of reducing the size of the aggregate annual cash bonus pool.

In addition to the discretionary annual cash bonus awards made to our executive officers in 2006, an amount of \$1,227,085 was accrued for the long-term incentive bonus to be paid to Mr. Monroe in October 2008 pursuant to his employment agreement, which is described in detail below in Employment Agreement. The total amount of the long-term incentive bonus will be paid to Mr. Monroe if he remains employed by us through October 2008. The formula for calculating the long-term incentive bonus was determined through employment agreement negotiations with Mr. Monroe and is reflected in the Non-Equity Incentive Plan Compensation column of the Summary Compensation Table below in Summary Compensation Table.

Long-term Incentive Awards. We did not grant any long-term incentive awards to our executive officers during 2006. We expect that restricted stock awards will be granted in 2007 to executive officers upon completion of our initial public offering approximating the number of prior awards vesting in 2006. Long-term incentive awards have been established to further our goals of retaining and motivating our executive officers. The awards granted to executive officers have been in the form of stock options and restricted stock designed to motivate the executive officers to increase the value of our common stock. The vesting provisions of the awards encourage our officers to remain in our employ in order to realize these forms of compensation. A description of our 2005 Long-Term Incentive Plan and the type of awards that may be granted is discussed below under Employee Benefit Plans. Each of our named executive officers was granted restricted stock vesting over a three-year period during 2005. The number of restricted shares, vesting period and other terms of the 2005 grants to individual executive officers was determined based upon the judgment of Mr. Hamm taking into account the factors described above under Implementing Our Objectives Determining Compensation. The value of unvested equity awards held by an individual was considered in the determination of the 2005 restricted stock awards and we expect that the value of unvested equity awards will be a factor in future awards.

Table of Contents

Index to Financial Statements

Although our 2005 Long-Term Incentive Plan allows for various equity instruments, we currently intend to make future grants in the form of restricted stock. We intend to grant restricted stock because we believe restricted stock is a stronger motivational tool for employees. Restricted shares provide some value to an employee during periods of stock market volatility, while stock options may have a limited perceived value and may do little to retain and motivate employees when the current value of our stock is less than the option price. We have not established a policy with respect to the timing of long-term incentive awards to executive officers. We have also not adopted any common stock ownership requirements for our executive officers or policies regarding hedging the economic risk of such ownership.

The stock option awards provide for immediate vesting in the event of a change in control of the company, as defined by the 2000 Stock Option Plan, or the death of Mr. Hamm, so long as he holds 35% or more of our stock. The restricted stock awards provide for immediate vesting upon a change in control, as defined by the 2005 Long-Term Incentive Plan. Employees who remain in our employment after a change in control will immediately vest in their stock option and restricted stock awards. We would likely need the assistance of several key employees to successfully conclude a transaction that would result in a change of control. We believe that immediately vesting the awards may serve to reduce concerns, other than continued employment, that such employees may have with respect to any potential change in control transaction and may motivate them to complete the transaction. The termination or change-in-control provisions contained in the President's employment agreement are described below under Employment Agreement.

Our 2005 Long-Term Incentive Plan allows for the award of performance units and bonuses that vest upon the achievement of performance targets. The performance targets are based upon operational, financial and stock performance criteria, such as reserve additions, finding and development costs, production volume and costs, earnings, cash flow, operating income, return on equity, stock price appreciation and relative stock price performance. We have not awarded performance units or bonuses under the 2005 Long-Term Incentive Plan and have not determined if we will do so in the future.

Other. We provide automobiles to most executive officers and certain other employees for business and personal use. The personal use is valued according to IRS guidelines and reported as taxable income to the individuals. We value vehicle usage for disclosure in our public filings based on the aggregate incremental cost to us adjusted to reflect each individual's personal use of the vehicle.

We allow Mr. Hamm to use the corporate aircraft for personal trips. The value of such trips is calculated according to IRS guidelines and reported as taxable income to him. Aircraft usage is valued for disclosure in our public filings based on the aggregate incremental cost to us.

We have a defined contribution retirement plan (401(K)) covering all our full-time employees, including our executive officers. Our contributions to the plan are discretionary and based on a percentage of eligible compensation, excluding bonuses. Our contribution to the plan for each eligible employee during 2006 was 5% of such employee's covered compensation up to a maximum of \$11,000. We currently plan to maintain the contribution level at 5% for 2007 and future years.

All full-time employees, including our executive officers, may participate in our health and welfare benefit programs, including medical, dental and vision care insurance and disability insurance. We provide all full time employees, including our executive officers, with life insurance coverage of the lesser of 1.5 times base salary or \$50,000 and allow them to purchase incremental amounts above this. We do not sponsor any qualified or non-qualified defined benefit plans.

Indemnification Agreements

All of our directors and officers have entered into customary indemnification agreements with us, pursuant to which we have agreed to indemnify our directors and officers to the fullest extent permitted by law.

Table of Contents**Index to Financial Statements****Summary Compensation Table**

The following table sets forth the compensation of our Principal Executive Officer, Principal Finance Officer, and the other three most highly compensated executive officers. We refer to these five individuals collectively as the named executive officers.

Name and Principal Position	Year	Salary(\$)	Bonus(\$)	Stock Awards\$(1)	Option Awards	Non- Equity Incentive Plan Compen- sation(\$)	Change in Pension	All other Compensation\$(2)	Total(\$)
							Value and Nonqualified Deferred Compensation Earnings(\$)		
Harold G. Hamm	2006	\$ 686,539	\$ 200,000	\$ 1,353,485				\$ 95,597	\$ 2,335,621
Chairman, Chief Executive Officer and Director (Principal Executive Officer)									
Mark E. Monroe	2006	450,000	175,000	1,192,796		1,227,085(3)		49,537	3,094,418
President, Chief Operating Officer and Director									
John D. Hart	2006	225,577	125,000	259,415				22,764	632,756
Vice President, Chief Financial Officer and Treasurer (Principal Financial Officer)

Senior Vice President of Operations									
Jack H. Stark	2006	232,500	155,000	160,009				27,094	574,603
Senior Vice President and Director of Exploration									

(1) Stock Award amounts represent the fair value of restricted stock vesting during 2006. The associated grants were made during 2005 and vest 33.3 percent on each anniversary beginning in 2006. While we are a private company, we are required to purchase vested restricted stock at each employee's request at a per share amount derived from our shareholders' equity value adjusted quarterly for our PV-10 as described in Notes 1 and 9 to the Notes to Consolidated Financial Statements included elsewhere in this prospectus.

(2) All other compensation includes the following elements:

	Personal use of Company Airplane\$(a)	Personal use of Company Vehicle\$(b)	Company Contributions to 401(K) Plan(\$)	Cash Dividends Paid on Restricted Stock(\$)	Total(\$)
Harold G. Hamm	\$ 36,527	\$ 7,670	\$ 11,000	\$ 40,400	\$ 95,597
Mark E. Monroe		2,934	11,000	35,603	49,537

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

John D. Hart	8,165	6,519	8,080	22,764
Jeffrey B. Hume	1,798	11,000	6,060	18,858
Jack H. Stark	10,034	11,000	6,060	27,094

- (a) We calculate the incremental cost to the company of any personal use of the corporate aircraft based on the cost of fuel, trip-related maintenance, crew travel expenses, on-board catering, landing fees, trip-related hangar and parking costs, and smaller variable costs. Since the company-owned aircraft are used primarily for business travel, we do not include the fixed costs that do not change based on usage, such as pilots' salaries and the purchase costs of the company-owned aircraft.
- (b) We calculate the incremental cost to the company of any personal use of the company vehicles, including fuel, maintenance, insurance, lease payments and depreciation, as the vehicles are used primarily for personal use.
- (3) Under the terms of his employment agreement, as described below under Employment Agreement, Mr. Monroe is entitled to receive a long-term incentive bonus on October 2, 2008. The bonus is determined by multiplying 193,875 by the excess of \$30.91 over the fair market value of our common stock as of October 2, 2008. We value this obligation over the vesting period by the excess of \$30.91 over the per share amount derived from our shareholders' equity value adjusted quarterly for our PV-10. Upon becoming a public company, we will compare \$30.91 to the publicly reported price at which our stock closes at each period end. Subject to certain conditions as described herein under Employment Agreement, Mr. Monroe is required to be employed on October 2, 2008, otherwise the bonus is forfeited.

Table of Contents**Index to Financial Statements*****Outstanding Equity Awards at December 31, 2006***

The following table sets forth information regarding stock option and restricted stock held by the named executive officers at December 31, 2006.

Name	Option Awards				Stock Awards	
	Number of Securities				Number of Shares or Units of Stock that Have Not Vested(#)(2)	Market Value of Shares of Stock That Have Not Vested(\$)(2)
	Underlying Unexercised					
	Options(1)		Option Exercise Price(\$)	Option Expiration Date		
Exercisable(#)	Unexercisable(#)					
Harold G. Hamm(3)					146,674	\$ 1,754,221

	220,000		\$ 1.27	October 1, 2010		
	88,000		\$ 0.71	April 1, 2012		

(1) None of the named executive officers received grants or exercised stock options during 2006.

(2) Unvested shares will vest ratably on October 3, 2007 and 2008 for Mr. Monroe, October 5, 2007 and 2008, for Messrs Hamm, Hume and Stark, and November 30, 2007 and 2008 for Mr. Hart.

(3) None of the named executive officers are subject to an equity incentive plan.

Option Exercises and Restricted Stock Vested During 2006

The following table sets forth information regarding shares of restricted stock held by the named executive officers which vested during 2006. No options were exercised by the named executive officers during 2006.

Name	Number of Shares Acquired on Vesting(#)	Value Realized on Vesting(\$)(1)
-------------	--	---

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Harold G. Hamm	73,333	\$	995,129
Mark E. Monroe	64,625		876,961
John D. Hart	14,663		198,977
Jeffrey B. Hume	11,000		149,270
Jack H. Stark	11,000		149,270

- (1) Our named executive officers and other recipients of stock grants are only allowed to sell vested grants to us at a formula derived value per share, so long as we are a private company. Value realized on vesting is the fair value at the time of vesting.

Employee Benefit Plans

2005 Long-Term Incentive Plan

General. In October 2005 and as amended in April 2006, our board of directors and shareholders adopted and approved the Continental Resources, Inc. 2005 Long-Term Incentive Plan (the 2005 Plan). The purpose of the 2005 Plan is to provide our directors and our employees, advisors and consultants additional incentives that are designed to motivate them to put forth maximum effort toward the success and growth of the company and to enable the company and our affiliates to attract and retain experienced individuals. The 2005 Plan provides for the granting of incentive stock options intended to qualify under Section 422 of the Internal Revenue Code, options that do not constitute incentive stock options, restricted stock awards, stock appreciation rights, performance units and performance bonuses.

Table of Contents

Index to Financial Statements

Administration. Our board of directors has appointed the compensation committee thereof to administer the 2005 Plan. In general, the compensation committee is authorized to select the recipients of awards, establish the terms and conditions of those awards, accelerate the vesting, exercise or payment of an award or the performance period of an award, and determine to what extent a performance bonus may be deferred. In connection with the adoption of the 2005 Plan, our board of directors terminated our 2000 Stock Option Plan, described below.

Shares Subject to the 2005 Plan and Award Limits. The number of shares of our common stock that may be issued under the 2005 Plan may not exceed 5,500,000, subject to adjustment as described below. Shares of common stock that are attributable to awards that have expired, terminated or been canceled or forfeited, or have otherwise terminated without the issuance of an award, are available for issuance or use in connection with future awards. The maximum number of shares of common stock that may be subject to options and stock appreciation rights granted under the 2005 Plan to any one individual during any calendar year may not exceed 220,000 shares. The maximum number of shares of common stock that may be subject to restricted stock awards and performance unit awards granted under the 2005 Plan to any one individual during any calendar year may not exceed 220,000 shares. The maximum amount of compensation that may be paid under all performance bonuses under the 2005 Plan granted to any one individual during any calendar year may not exceed \$1,000,000.

Options. The price at which a share of common stock may be purchased upon exercise of an option granted under the 2005 Plan, whether the option is an incentive stock option or an option that does not constitute an incentive stock option, will be determined by our board of directors or, with respect to awards granted to employees and consultants, the compensation committee, but the purchase price will not be less than the fair market value of a share of common stock on the date the option is granted. Options may be granted independently or in tandem with stock appreciation rights.

Stock Appreciation Rights. Our board of directors may grant stock appreciation rights independently of or in tandem with options to purchase common stock. A stock appreciation right allows the holder to receive, upon exercise of the right, an amount equal to the difference between the fair market value of the shares of our common stock on the exercise date and the exercise price stated in the award. The exercise price of a stock appreciation right can never be less than the fair market value of our common stock on the day of the award. The amount to be received upon exercise of a stock appreciation right will be paid in shares of our common stock.

Restricted Stock. Shares of common stock that are the subject of a restricted stock award under the 2005 Plan will be subject to restrictions on disposition by the holder of such award and an obligation of such holder to forfeit and surrender the shares to us under certain circumstances (the forfeiture restrictions). The forfeiture restrictions will be determined by our board of directors or the compensation committee, as applicable, and may provide that the forfeiture restrictions will lapse upon (a) continuous employment with, or in the case of an award granted to a director or consultant, service to, us or our affiliates, for a specified period of time, (b) the attainment of one or more operational, financial and/or stock performance criteria (the performance criteria) established by the board of directors or the compensation committee, as applicable, that are based on (1) reserve additions or replacements, (2) finding and development costs, (3) production volume, (4) production costs, (5) earnings (including net income or earnings before interest, taxes, depreciation and amortization (EBITDA)), (6) earnings per share, (7) cash flow, (8) operating income, (9) general and administrative expenses, (10) debt to equity ratio, (11) debt to cash flow ratio, (12) debt to EBITDA ratio, (13) EBITDA to interest ratio, (14) return on assets, (15) return on equity, (16) return on invested capital, (17) profit returns/margins, (18) stock price appreciation, (19) total shareholder return, and (20) relative stock price performance, or (c) a combination of any of the foregoing. In addition to acceleration of restricted stock awards upon a change of control of the company, our board of directors or compensation committee, as applicable, may provide that an award accelerates upon an eligible employee s retirement on or after his attainment of age 62, death or disability. Our board of directors may provide that a restricted stock award granted to a director or consultant will accelerate upon his resignation.

Table of Contents

Index to Financial Statements

Performance Units. A performance unit award under the 2005 Plan is an award of a monetary unit that may be earned based on performance during a performance period of one year or more. At the time of the grant of a performance unit award, our board of directors or the compensation committee, as applicable, will establish the target, maximum and minimum value of each performance unit, the applicable performance criteria, and time period over which the performance will be measured. Payment of a performance unit award may be in cash or shares of common stock, as determined in the sole discretion of our board of directors.

Performance Bonuses. A performance bonus under the 2005 Plan is an award that provides for a payment that may be earned based on a performance during a period of one year or more. At the time of the grant of a performance bonus under the 2005 plan, our board of directors or the compensation committee, as applicable, will establish the amount that may be earned as a performance bonus under the award and the applicable performance criteria. Payment of a performance bonus award may be in cash or shares of common stock, as determined in the sole discretion of our board of directors or compensation committee, as applicable.

Change of Control. All awards under the 2005 Plan become fully vested, fully earned and exercisable upon the occurrence of a change of control of the company, as defined in the 2005 Plan. The value of the affected awards for our named executive officers as of December 31, 2006 is set forth under Outstanding Equity Awards at December 31, 2006. Additionally, Mr. Monroe is subject to an employment agreement which provides for payment of 2 years of salary and bonus under certain circumstances as described under Employment Agreement.

Amendment and Termination of the 2005 Plan and Awards. The maximum term of any award under the 2005 Plan is 10 years. No awards under the 2005 Plan may be granted after 10 years from its effective date (October 3, 2005). The 2005 Plan will remain in effect until all awards granted under the 2005 Plan have been settled. Our board of directors, in its discretion, may terminate the 2005 Plan at any time with respect to any shares of our common stock for which awards have not been granted. Our board of directors may amend the 2005 Plan in any manner, but any amendment to increase the maximum aggregate number of shares that may be issued under the 2005 Plan (except by operation of the 2005 Plan's adjustment provision), materially modify the class of individuals eligible to receive awards under the 2005 Plan, or materially increase the benefits to participants under the 2005 Plan requires the approval of our shareholders. No change in any award previously granted under the 2005 Plan may be made which would impair the rights of the holder of such award without the consent of the holder. Our board of directors is prohibited from canceling, reissuing or modifying an award under the 2005 Plan if such action will have the effect of repricing the award.

Adjustments. The maximum numbers of shares of common stock that may be issued under the 2005 Plan, and the number of shares subject to any award that has been granted under the 2005 Plan, are subject to adjustment to reflect stock dividends, stock splits, recapitalizations and similar changes in our capital structure. Under the 2005 Plan, we will not make such adjustments unless they would cause at least a 1% increase or decrease in the number of shares subject to any award available under the 2005 Plan.

2000 Stock Option Plan

General. In October 2000, our board of directors and shareholders adopted and approved the Continental Resources, Inc. 2000 Stock Option Plan (the 2000 Plan). In connection with the adoption of the 2005 Plan, our board of directors terminated the 2000 Plan, except with respect to unexercised options outstanding under the 2000 Plan. The purpose of the 2000 Plan was to provide our directors and employees and employees of our affiliates additional incentives that are designed to motivate them to put forth maximum effort toward the success and growth of the company and to enable us and our affiliates to attract and retain experienced individuals. The 2000 Plan provided for the granting of incentive stock options intended to qualify under Section 422 of the Internal Revenue Code and options that do not constitute incentive stock options.

Table of Contents

Index to Financial Statements

Administration. In February 2006, our board of directors authorized the compensation committee to administer the 2000 Plan for the purposes of awards previously granted to our employees and employees of our affiliates and consultants. In general, our compensation committee is authorized to select the recipients of options, establish the options terms and conditions, and accelerate such options when to do so would be in the best interest of the company.

Options Granted Under the 2000 Plan. Up to 11,220,000 shares of common stock were originally made available for issuance under the 2000 plan, subject to adjustment as described below. Prior to the termination of the 2000 Plan, options to purchase a total of 2,387,000 shares of common stock were issued. Our board of directors determined the price at which a share of common stock may be purchased upon exercise of an option granted under the 2000 Plan at the time of the grant. In the case of an option that does not constitute an incentive stock option, the exercise price could not be less than 50% of the fair market value of the common stock on the date the option was granted. In the case of an incentive stock option, the exercise price could not be less than 100% of the fair market value of the common stock on the date the option was granted. At the time of the grant of any option or at any time thereafter up until the time of any dividend payment by us, our board of directors could choose to include as part of such award the right to receive dividends or dividend equivalents with respect to such award. The compensation committee has discretion to accelerate the vesting of an option upon the death, disability or termination of the grantee's service to the company under special circumstances (as determined by the compensation committee).

Merger, Dissolution, Change of Control, Death of Harold G. Hamm. If we merge, sell substantially all of our assets or dissolve or liquidate and provision is not made in such transaction for the surviving, resulting or acquiring corporation to assume or substitute our outstanding options, such options will automatically vest and become fully exercisable prior to such transaction. If we undergo a change of control (as defined under the 2000 Plan) or Mr. Hamm dies at a time when 35% or more of the total voting power of our voting stock is beneficially owned by Mr. Hamm (individually and as trustee of his revocable inter vivos trust established in April 1984), then all outstanding options will automatically fully vest.

Amendment and Termination of the 2000 Plan and Awards. The maximum term of any award under the 2000 Plan is 10 years. No change in any option previously granted under the 2000 Plan may be made that would be adverse to the holder of such option without the consent of the holder.

Adjustments. The number of shares subject to any award that has been granted under the 2000 Plan is subject to adjustment to reflect stock dividends, stock splits, recapitalizations and similar changes in our capital structure. Under the 2000 Plan, we will not make such adjustments unless they would cause at least a 1% increase or decrease in the number of shares subject to any option granted under the 2000 Plan.

Employment Agreement

We have entered into an employment agreement with Mark E. Monroe, our President and Chief Operating Officer. The agreement provides for a minimum annual salary of \$450,000 during each of the years ended October 2, 2006, 2007 and 2008.

The agreement provides for a long-term incentive bonus payable if Mr. Monroe remains continuously employed by the company through the term of the agreement. The long-term incentive bonus is determined by multiplying 193,875 by the excess of \$30.91 over the fair market value of our common stock as of October 2, 2008.

On October 3, 2005, we granted Mr. Monroe 193,875 shares of restricted stock, which vest ratably over a three-year period.

Table of Contents

Index to Financial Statements

Payments in the Event of Termination

The employment agreement with Mr. Monroe requires that we pay to him, in a single lump-sum payment (payable as soon as practicable following termination and in compliance with section 409A of the Code), an amount equal to sum of (a) two times his average annual compensation (defined below), and (b) his termination long term bonus amount (as defined below) in the event we terminate him without cause (as defined below) or he resigns for good reason (as defined below).

Mr. Monroe's average annual compensation is the average of his annualized compensation, base salary and bonus, paid under his employment agreement for the two year period of employment (or if employed less than two years, then the period of employment) immediately preceding his date of termination. As of December 31, 2006, Mr. Monroe's average annual compensation was \$630,000. As result, under clause (a), Mr. Monroe would have been entitled to a lump-sum payment of \$1.26 million as of December 31, 2006.

Mr. Monroe's termination long term bonus amount is the amount equal to the product of (a) 193,875, and (b) the excess of \$30.91 over the value of the company's common stock. Until our stock becomes publicly traded, the value of our common stock is the internal valuation based on the book value of our shareholders' equity adjusted for PV-10 as of each calendar quarter, which was \$8.84 per share as of December 31, 2006. As a result, as of December 31, 2006, Mr. Monroe's termination long term bonus amount would have been \$4.28 million.

In addition, we will maintain for the benefit of Mr. Monroe (and his spouse and/or his dependents, as applicable) for a period of 18 months the medical, hospitalization, and dental programs in which he (and his spouse and/or dependents, as applicable) participated immediately prior to his date of termination; provided, however, that if Mr. Monroe (his spouse and/or his dependents, as applicable) is eligible for Medicare or a similar type of governmental medical benefit, such benefit shall be the primary provider before our medical benefits are provided; and provided further, if Mr. Monroe (and his spouse and/or his dependents, as applicable) cannot continue to participate in our programs providing such benefits (e.g., the terms of the plans do not permit participation by former employees), then we will arrange to provide Mr. Monroe (and his spouse and/or his dependents, as applicable) with the economic equivalent of such benefits. Notwithstanding, if Mr. Monroe becomes reemployed with another employer and is eligible to receive medical, hospitalization and dental benefits under another employer-provided plan, the benefits described above will be secondary to those provided under such other plan during the applicable period. As of December 31, 2006, the value of this benefit would have been approximately \$24,000.

In the event of the termination of Mr. Monroe's employment as a result of his death or disability he is entitled to his termination long term bonus amount as soon as practicable following such termination.

Mr. Monroe's employment agreement defines "cause" as: (a) his conviction by a federal or state court of competent jurisdiction of a felony which relates to his employment at the company; (b) an act or acts of dishonesty taken by him and intended to result in substantial personal enrichment to him at the expense of the company; or (c) his willful failure to follow a direct, reasonable and lawful written directive from his supervisor or the board of directors, within the reasonable scope of his duties, which failure is not cured to the satisfaction of the board of directors within thirty (30) days. For purposes of this definition of "cause": (x) no act or omission by Mr. Monroe will be deemed "willful" unless done, or omitted by him in bad faith and without reasonable belief that his action or omission was in the best interest of the company; and (y) Mr. Monroe will not be deemed to have been terminated for cause unless and until the company delivers to him a copy of the resolution duly adopted by the affirmative vote of not less than three-fourths (3/4ths) of the entire membership of the board of directors, at a meeting of the board of directors called and held for such purpose (after reasonable notice to him and an opportunity for him, together with his counsel, to be heard before the board of directors), finding that in the good faith opinion of the board of directors, he was guilty of conduct set forth in clauses (a), (b), or (c) above and specifying the particulars thereof in detail.

Table of Contents

Index to Financial Statements

Mr. Monroe's employment agreement defines "good reason" as: (a) the company's assignment to him of any duties inconsistent in any respect with his position (including status, offices, titles and reporting requirements), authority, duties or responsibilities; (b) the reduction of the rate of his base salary below \$450,000 other than as a part of a compensation reduction program which applies equally to all executives at the vice president and above levels; (c) the company requiring him to be based at any office or location outside of the greater Enid, Oklahoma, metropolitan area, except for travel reasonably required in the performance of his responsibilities; or (d) any failure by the company to provide indemnification to him in same manner as provided to other executive officers.

Mr. Monroe's employment agreement also contains standard confidentiality and non-solicitation provisions. In the event of Mr. Monroe's termination by us without cause or by him for good reason, the non-solicitation provision is effective so long as Mr. Monroe is receiving benefits or payments under the employment agreement.

Payments in the Event of Change in Control

In the event of a change in control of the company (as defined below), the unvested shares of restricted stock held by our executive officers will fully vest. This offering will not constitute a change in control of the company.

A "change in control" means:

(a) any transaction in which shares of voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the company are issued by the company, or sold or transferred by the shareholders of the company as a result of which those persons and entities who beneficially owned voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the company immediately prior to such transaction cease to beneficially own voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the company immediately after such transaction;

(b) the merger or consolidation of the company with or into another entity as a result of which those persons and entities who beneficially owned voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the company immediately prior to such merger or consolidation cease to beneficially own voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the surviving corporation or resulting entity immediately after such merger or consolidation; or

(c) the sale of all or substantially all of the company's assets to an entity of which those persons and entities who beneficially owned voting securities of the company representing more than 50% of the total combined voting power of all outstanding voting securities of the company immediately prior to such asset sale do not beneficially own voting securities of the purchasing entity representing more than 50% of the total combined voting power of all outstanding voting securities of the purchasing entity immediately after such asset sale.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Listed in the following table is the value of unvested shares of restricted stock held by our named executive officers as of December 31, 2006, which would fully vest in the event of a change of control. The per share value is the fair value as of December 31, 2006. Also included in the table is the value of termination payments due to Mr. Monroe pursuant to his employment agreement as described under Payments in the Event of Termination.

Selling Shareholder and Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information regarding the beneficial ownership of our common stock prior to and as of the closing of this offering by:

the selling shareholder and each other person who will beneficially own more than 5% of our common stock then outstanding;

each of our named executive officers;

each of our directors; and

all of our directors and executive officers as a group.

All information with respect to beneficial ownership has been furnished by the respective directors, officers or 5% or more shareholders, as the case may be. The information in the following table gives effect to our 11 for 1 stock split to be effected in the form of a stock dividend concurrent with the consummation of this offering and assumes that the underwriters do not exercise their overallotment option:

Name of Beneficial Owner	Shares beneficially owned prior to offering				Shares offered hereby	Shares of common stock beneficially owned after offering

Certain Relationships and Related Party Transactions

In February 2006, our board of directors amended the audit committee charter to require that the audit committee review all related party transactions (as defined below) and recommend approval or disapproval to the board of any such transaction. A related party transaction is a transaction, proposed transaction, or series of similar transactions, in which (a) we are a participant, (b) the amount involved exceeds \$120,000 and (c) a related person (as defined below) has or will have a direct or indirect material interest. A related person is (a) any person who is, or at any time since the beginning of our last fiscal year was, a director, executive officer, or nominee to become a director, (b) a person known to be the 5% beneficial owner of any class of our voting securities, (c) an immediate family member of any of the foregoing persons, which means any child, stepchild, parent, stepparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of such director, executive officer, nominee for director or more than 5% beneficial owner, and (d) any person (other than a tenant or employee) sharing the household of such director, executive officer, nominee for director or more than 5% beneficial owner. The audit committee considers the adequacy of disclosure and fairness to us of the matters considered. The audit committee adopted a written policy which includes factors for committee members to consider in exercising their judgment including (a) terms of the transaction with the related party, (b) availability of comparable products or services from unrelated third parties, (c) terms available from unrelated third parties and (d) the benefits to us. The audit committee will recommend for approval only those related party transactions that are, in their judgment, in our best interests and on terms no less favorable to us than we could have achieved with an unaffiliated party.

Crude Oil Sales

During the years ended December 31, 2005 and 2006, we sold approximately 1.3 MMBbls and 1.2 MMBbls of oil from properties located in North Dakota and Montana to Banner Pipeline Company, L.L.C. (Banner) for \$67.6 million and \$61.5 million, respectively. Our principal shareholder and his family trusts owned 100% of the common stock of Banner. Our sales to Banner were based on market prices and considered to be on terms equivalent to arms length transactions. In February 2006, we decided to market the majority of our crude oil in the Rocky Mountain region directly or through a wholly owned subsidiary rather than through an affiliate, and, as Banner has existing contacts and relationships with crude oil purchasers, we decided to purchase Banner. On March 30, 2006, we acquired Banner for approximately \$8.8 million, the book value of working capital, principally cash, accounts receivable, crude oil inventory and accounts payable.

During the years ended December 31, 2004 and 2005, we sold approximately 351 MBbls of oil from properties located in Wyoming to Independent Trading & Transportation Company I, L.L.C. or a subsidiary thereof (ITT) for \$10.8 million and 263 MBbls for \$11.0 million, respectively. Our principal shareholder and his family own 100% of the common stock of ITT. Effective March 2006, we ceased selling oil to ITT. We sold 97 MBbls of oil for \$3.7 million during 2006 prior to the cessation of sales to ITT.

We operated crude oil gathering lines in North Dakota and Wyoming on behalf of ITT for which they paid us approximately \$236,000, \$344,000 and \$836,000 during the years ended December 31, 2004, 2005 and 2006, respectively. We paid ITT approximately \$398,000, \$692,000 and \$854,000 for crude oil gathering services in North Dakota during the years ended December 31, 2004, 2005 and 2006, respectively. We believe that our transactions with ITT have been on terms equivalent to arm s-length transactions.

Natural Gas Sales

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

During the years ended December 31, 2004, 2005 and 2006, we sold approximately 2,394 MMcf for \$8.2 million, 4,733 MMcf for \$30.3 million and 5,240 MMcf for \$29.1 million, respectively, to affiliated natural gas gathering and processing companies owned by our principal shareholder and previous executive officers.

Table of Contents

Index to Financial Statements

Additionally, we paid approximately \$2.6 million, \$10.5 million and \$8.4 million for reclaimed oil and residue fuel gas from such companies during the years ended December 31, 2004, 2005 and 2006, respectively. The affiliated natural gas gathering and processing companies were combined into Hiland Partners, LP (Hiland), a publicly traded midstream master limited partnership, in October 2004. Our principal shareholder and his family trusts own the majority of the total outstanding units of Hiland and control its general partner. Our principal shareholder also serves as the Chairman of the Board of Directors of Hiland's general partner. Our sales to and purchases from Hiland are based on market prices and considered to be on terms equivalent to arm's-length transactions. We are generally prohibited, under the terms of an agreement with Hiland, from engaging in the gathering, treating, processing and transportation of natural gas in North America and buying or selling any assets related to the forgoing businesses until February 15, 2010.

On November 8, 2005, we entered into a contract with Hiland for the processing and treatment of gas produced from the CHNU and CHWU. Under the terms of the contract, we agree to deliver low pressure gas to Hiland for compression, treatment and processing at a facility to be constructed by Hiland. Nitrogen and carbon dioxide must be removed from the gas production associated with the increasing oil production from CHNU and CHWU for the gas production to be marketable. Under the terms of the contract, we pay \$0.60 per Mcf in gathering and treating fees, and 50% of the electrical costs attributable to compression and plant operation and receive 50% of the proceeds from residue gas and plant product sales. After we deliver 36 Bcf of gas, the \$0.60 per Mcf gathering and treating fee is eliminated. If the average composite volume of carbon dioxide is less than 10%, we pay an additional \$0.10 per Mcf treating fee, otherwise the treating fee is \$0.20 per Mcf. In April 2007, Hiland agreed to lower the treating fees by \$0.007 per Mcf to adjust for settlement differences on the predecessor contract. Through December 31, 2006, we have invested \$1.7 million and anticipate investing approximately \$4.3 million during 2007 to construct gas gathering from each well to central tank battery delivery points. The plant is currently expected to be operational in April 2007. The terms of our contract with Hiland were determined following arm's-length negotiations between our representatives and representatives of Hiland. We believe the terms contained in this agreement are comparable to those we would receive from an unaffiliated third party.

Oilfield Services

During the years ended December 31, 2004, 2005 and 2006, we paid approximately \$14.5 million, \$20.4 million and \$31.4 million, respectively, to affiliated service companies for oilfield services such as saltwater hauling and workover rigs. A portion of such amount was billed to other interest owners. Prior to October 2004, our principal shareholder owned a majority of the common stock of the affiliated service companies. After such date, the assets of the affiliated service companies were conveyed to Complete Production Services, Inc. (Complete). Our principal shareholder serves on the board of directors of Complete and trusts formed by him currently own approximately 7% of the stock of Complete. We believe that our transactions with the affiliated service companies have been on terms no less favorable to us than we could have achieved with an unaffiliated party.

Pursuant to a strategic customer relationship agreement with Complete, we agree to use commercially reasonable efforts to provide the service companies a first right to provide services or supplies required in our operations so long as such services or supplies can be provided on a timely basis and at competitive market prices. The service companies agree to use commercially reasonable efforts to provide us with requested supplies and services ahead of and before any such supplies and services would otherwise be provided to any other customer who is not then being provided supplies and services pursuant to a binding agreement. The strategic customer relationship agreement can be terminated by either party on or after October 2009.

During the years ended December 31, 2004, 2005 and 2006, we paid for costs of approximately \$1.2 million, \$3.1 million and \$5.6 million, respectively, for daywork drilling rig services provided by United Drilling Co. (United). A portion of such amounts was billed to other interest owners. United provided daywork drilling rig services for four wells in 2004, eight wells in 2005 and 11 wells in 2006. Our principal shareholder owns

Table of Contents

Index to Financial Statements

100% of the common stock of United. We believe that our transactions with United have been on terms no less favorable to us than we could have achieved with an unaffiliated party.

We signed a Compression Services Agreement effective as of January 28, 2005 with Hiland covering the Cedar Hills North and South Medicine Pole Hills Units whereby Hiland agrees to provide to us on a monthly basis the quantities of compressed air and pressurized water that we request. We have agreed to provide, at no cost to Hiland, all fuel, whether gas or electric, and water, in the quantities necessary for Hiland to provide such services. The term of the contract is for four years from the effective date at a cost of approximately \$402,000 per month. In 2004, we were responsible for operating and maintaining the compression equipment and paid Hiland and a predecessor affiliated gas gathering and processing company \$3.8 million for rental of the compression equipment. The annual cost of renting the compression equipment was compared against proposals submitted by third parties and the compression equipment rental terms are considered to be no less favorable than we could have achieved with an unaffiliated party. The incremental annual cost of approximately \$1 million being paid under the new contract represented our estimate of the annual wages and overhead associated with our eleven employees that operated the compression equipment and the annual cost of maintaining the compression equipment. Under the agreement, Hiland is responsible for operating and maintaining the compression equipment. We did not seek bids from third parties for the operation and maintenance of the compression equipment.

We also signed a Compression Services Agreement effective as of January 28, 2005 with Hiland Partners, GP, LLC (Hiland GP) covering the Medicine Pole Hills Unit and West Medicine Pole Hills Unit whereby Hiland GP agrees to provide compression services. Hiland GP is the general partner of Hiland and our principal shareholder and family trusts own the majority of Hiland GP. We have agreed to provide, at no cost to Hiland GP, all fuel, whether gas or electric, for compression services only, in the quantities necessary for Hiland GP to provide such services. The term is for one year from effective date and automatically renews for additional one-month terms unless terminated by either party upon 15 days notice. During the years ended December 31, 2005 and 2006, we paid \$372,000 and \$339,000, respectively, to Hiland GP in reimbursement of actual costs incurred by Hiland GP in providing the services. This contract terminated effective June 28, 2006, and we are now providing those services with our employees. Because amounts paid are the actual costs incurred by Hiland GP for the services provided by them, we believe the terms of this agreement were more favorable than the terms we would have received from an unaffiliated party.

During the years ended December 31, 2004, 2005 and 2006, we paid approximately \$445,000, \$596,000 and \$877,000, respectively, for roustabout services to a company owned by a family member of the principal shareholder. During the years ended December 31, 2004, 2005 and 2006, we paid approximately \$379,000, \$222,000 and \$618,000, respectively, to Water Tech LLC, a company majority owned by our principal shareholder, for reclaimed oil and contract labor. We believe that our transactions with these affiliated service companies have been on terms no less favorable to us than we could have achieved with an unaffiliated party.

Sales to Shareholders

In July 2004, we sold all of the outstanding stock in our wholly owned subsidiary Continental Gas Inc. (CGI) to our shareholders for \$22.6 million. The sales price was representative of the fair value of the net assets based on an appraisal by an independent third party who also provided us with an opinion of the fairness from a financial point of view of the sale of CGI to the shareholders. These assets represented our entire gas gathering, marketing and processing segment.

Commercial Property Transactions

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

We lease approximately 67,000 square feet of office space from a company owned by our principal shareholder. Rents under these leases totaled approximately \$506,000, \$556,000 and \$638,000 during the years

Table of Contents

Index to Financial Statements

ended December 31, 2004, 2005 and 2006, respectively. The current leases covering this space expire at the end of February 2008 and provide for a total annual rent of approximately \$673,000. We believe that our office leases are on terms no less favorable to us than we could have achieved with an unaffiliated party. In December 2005, we paid \$253,000 to our principal shareholder to acquire an office building and triplex in Baker, Montana, for which we had previously paid \$2,300 per month to lease.

Royalty and Common Ownership

Minerals Acquisitions, LLC (Minerals), wholly owned by our principal shareholder and his wife, owns royalty interests in the Cedar Hills North Unit operated by us. During the years ended December 31, 2004, 2005 and 2006, we paid net oil and gas royalties of approximately \$67,000, \$155,000 and \$31,000, respectively, to Minerals. Effective December 1, 2005 the royalty interests were transferred to the Revocable InterVivos Trust of Harold G. Hamm. Minerals also owns 100% of Jolette Oil (USA) LLC (Jolette), a company formed to acquire undeveloped acreage in the North Dakota Bakken area. In August 2005, we purchased all the assets of Jolette at their book value of \$4.5 million. These assets consisted of undeveloped acreage and one producing well in the North Dakota Bakken area.

Wheatland Oil Co. (Wheatland) is owned 75% by our principal shareholder and 25% by another executive officer. Wheatland participates in several of our oil and gas properties with interests generally ranging between 5% and 10% of our interest. During the years ended December 31, 2004, 2005 and 2006, we paid net oil and gas revenues of approximately \$1.7 million, \$5.4 million and \$7.9 million, respectively, and billed costs of approximately \$1.4 million, \$4.2 million and \$5.2 million, respectively, to Wheatland.

Registration Rights Agreement

In connection with the closing of this offering, we will enter into a registration rights agreement with our principal shareholder and the two trusts established for the benefit of Mr. Hamm's children pursuant to which we will grant to our principal shareholder and the trusts certain demand and piggyback registration rights.

Under the registration rights agreement, our principal shareholder and the trusts will each have the right to require us to file a registration statement for the public sale of all of the shares of common stock owned by him or it any time after six months following the date the SEC declares the registration statement of which this prospectus forms a part effective. In addition, if we sell any shares of our common stock in a registered underwritten offering, each of our principal shareholder and the trusts will have the right to include his or its shares in that offering. The underwriters of any such offering will have the right to limit the number of shares to be included in such sale.

We will pay all expenses relating to any demand or piggyback registration, except for underwriters' or brokers' commission or discounts. The securities covered by the registration rights agreement will no longer be registrable under the registration rights agreement if they have been sold to the public either pursuant to a registration statement or under Rule 144 promulgated under the Securities Act.

Shareholder Note

On November 22, 2004, we entered into a subordinated note with our principal shareholder for \$50.0 million at an annual rate of 6.00% interest. During the years ended December 31, 2004 and 2005, we paid approximately \$308,000 and \$2.9 million in interest on the note, respectively. During 2005, our principal shareholder forgave \$2.0 million of the principal amount of the note. The outstanding balance was paid by us in full in December 2005.

After the completion of this offering, the ongoing related party transactions described above and any future additional related party transactions will be reviewed by our audit committee on a regular basis.

Description of Capital Stock

Concurrent with the closing of this offering, Continental Resources, Inc. will amend and restate its certificate of incorporation and bylaws to increase its authorized capital stock, provide for an 11 for 1 stock split in the form of a stock dividend and add certain other provisions as described below. We will effect the stock split concurrent with the closing of this offering. The information in this section describes our amended and restated certificate of incorporation and bylaws that will be in effect following the closing of this offering and assumes that the stock split has taken place.

The following summary of the capital stock and amended and restated certificate of incorporation and bylaws of Continental Resources, Inc. does not purport to be complete and is qualified in its entirety by reference to the provisions of applicable law and to our amended and restated certificate of incorporation and bylaws, forms of which are filed as exhibits to the registration statement of which this prospectus is a part.

The authorized capital stock of Continental Resources, Inc. will consist of 500,000,000 shares of common stock, \$.01 par value per share, and 25,000,000 shares of preferred stock, \$.01 par value per share.

Common Stock

As of May 8, 2007, we have 7,902,906 shares of voting common stock and 151,265,730 shares of non-voting common stock outstanding. After this offering, we will have 168,018,636 shares of common stock outstanding, all of which will be voting common stock.

Holders of our common stock will be entitled to one vote for each share held on all matters submitted to a vote of shareholders and do not have cumulative voting rights. Accordingly, holders of a majority of the shares of our common stock entitled to vote in any election of directors may elect all of the directors standing for election.

Holders of our common stock are entitled to receive proportionately any dividends if and when such dividends are declared by our board of directors, subject to any preferential dividend rights of outstanding preferred stock. Upon the liquidation, dissolution or winding up of our company, the holders of our common stock are entitled to receive ratably our net assets available after the payment of all debts and other liabilities and subject to the prior rights of any outstanding preferred stock. Holders of our common stock have no preemptive, subscription, redemption or conversion rights. The rights, preferences and privileges of holders of our common stock are subject to, and may be adversely affected by, the rights of the holders of shares of any series of preferred stock that we may designate and issue in the future.

Our common stock has been approved for listing on the NYSE, subject to official notice of issuance, under the symbol CLR.

Preferred Stock

Under the terms of our amended and restated certificate of incorporation, our board of directors will be authorized to designate and issue shares of preferred stock in one or more series without shareholder approval. Our board of directors has discretion to determine the rights, preferences, privileges and restrictions, including voting rights, dividend rights, conversion rights, redemption privileges and liquidation preferences, of each series of preferred stock. It is not possible to state the actual effect of the issuance of any shares of preferred stock upon the rights of holders of the common stock until the board of directors determines the specific rights of the holders of the preferred stock. However, these effects might include:

restricting dividends on the common stock;

diluting the voting power of the common stock;

Table of Contents

Index to Financial Statements

impairing the liquidation rights of the common stock; and

delaying or preventing a change in control of our company.

We have no present plans to issue any shares of preferred stock.

Limitations on Liability and Indemnification of Officers and Directors

Our amended and restated certificate of incorporation will provide that none of our directors shall be personally liable to us or our shareholders for monetary damages for breach of fiduciary duty as a director, except liability for:

any breach of the director's duty of loyalty to us or our shareholders;

acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law;

the payment of unlawful dividends and certain other actions prohibited by the Oklahoma General Corporation Act (the "OGCA"); and

any transaction from which the director derived any improper personal benefit.

The effect of this provision of our certificate of incorporation will be to eliminate our right and the rights of our shareholders to recover monetary damages against a director for breach of the director's fiduciary duty of care, including breaches resulting from negligent or grossly negligent behavior, except in the situations described above. This provision will not limit or eliminate our rights or the rights of any shareholder to seek non-monetary relief, such as an injunction or rescission in the event of a breach of a director's duty of care.

Our amended and restated bylaws also will provide that we will indemnify officers and directors against losses that they may incur in investigations and legal proceedings resulting from their services to us.

Our amended and restated bylaws also will provide that:

we will be required to indemnify our directors and officers to the fullest extent permitted by Oklahoma law;

we may indemnify our other employees and agents to the extent that we indemnify our officers and directors, unless otherwise required by law, our certificate of incorporation, our bylaws or agreements to which we are a party; and

we will be required to advance expenses, as incurred, to our directors and officers in connection with a legal proceeding to the fullest extent permitted by law.

We also have entered into indemnification agreements with each of our current directors and officers to give them additional contractual assurances regarding the scope of the indemnification set forth in our certificate of incorporation and bylaws and to provide additional procedural protections. See Management Indemnification Agreements for a description of such agreements. At present, there is no material pending litigation or proceeding involving any of our directors, officers or employees for which indemnification from us is sought. We are not aware of any threatened litigation that may result in claims for indemnification from us.

We are currently in the process of obtaining liability insurance for our directors and officers that will be effective upon the consummation of this offering.

Anti-takeover Effects of Provisions of Our Certificate of Incorporation and Bylaws and of Oklahoma Law

Our amended and restated certificate of incorporation and bylaws will contain the following additional provisions, some of which are intended to enhance the likelihood of continuity and stability in the composition of our board of directors and in the policies formulated by our board of directors. In addition, some provisions of the OGCA, if applicable to us, may hinder or delay an attempted takeover without prior approval of our board of directors.

Provisions of our amended and restated certificate of incorporation and bylaws and of the OGCA could discourage attempts to acquire us or remove incumbent management. These provisions could, therefore, prevent shareholders from receiving a premium over the market price for the shares of common stock they hold.

Classified Board. Our amended and restated certificate of incorporation and bylaws will provide that our board of directors be divided into three classes of directors, with the classes to be as nearly equal in number as possible. As a result, approximately one-third of our board of directors will be elected each year. The classification of directors will have the effect of making it more difficult for shareholders to change the composition of our board. Our amended and restated certificate of incorporation and bylaws also will provide that the number of directors will be fixed from time to time exclusively pursuant to a resolution adopted by the board.

Filling Board of Directors Vacancies; Removal. Our amended and restated certificate of incorporation will provide that vacancies and newly created directorships resulting from any increase in the authorized number of directors or any vacancies resulting from death, resignation, retirement, disqualification, removal from office or other cause, may be filled by the affirmative vote of a majority of our directors then in office, though less than a quorum. Each director will hold office until his or her successor is elected and qualified, or until the director's earlier death, resignation, retirement or removal from office. Any director may resign at any time upon written notice to us.

Our amended and restated certificate of incorporation and bylaws will provide that, for so long as Harold G. Hamm, our Chairman, Chief Executive Officer and principal shareholder, and his affiliates own 50% or more of our outstanding shares of common stock, directors may be removed, with or without cause, by the affirmative vote of the holders of a majority of our outstanding shares of common stock. However, from and after the date on which Mr. Hamm and his affiliates cease to own 50% or more of our outstanding shares of common stock, directors may be removed only for cause by affirmative vote of the holders of a majority of our outstanding shares of common stock.

Shareholder Action by Written Consent. Our amended and restated certificate of incorporation will provide that, for so long as Mr. Hamm and his affiliates own 50% or more of our outstanding shares of capital stock entitled to vote in the election of directors, any action required or permitted to be taken by our shareholders may be taken at a duly called meeting of shareholders or by the written consent of shareholders owning the minimum number of shares required to approve the action. However, from and after the date on which Mr. Hamm and his affiliates cease to own 50% or more of our outstanding shares of common stock, shareholders will not be permitted to act by written consent.

Call of Special Meetings. Our amended and restated certificate of incorporation and bylaws will provide that special meetings of our shareholders may be called at any time by the board of directors acting pursuant to a resolution adopted by the board and may not be called by the shareholders.

Table of Contents

Index to Financial Statements

Advance Notice Requirements for Shareholder Proposals and Director Nominations. Our amended and restated bylaws will provide that shareholders seeking to bring business before or to nominate candidates for election as directors at an annual meeting of shareholders must provide timely notice of their proposal in writing to the corporate secretary. With respect to the nomination of directors, to be timely, a shareholder's notice must be delivered to or mailed and received at our principal executive offices (i) with respect to an election of directors to be held at an annual meeting of shareholders, not later than 90 days nor more than 120 days prior to the anniversary date of the proxy statement for the immediately preceding annual meeting of shareholders of the company and (ii) with respect to an election of directors to be held at a special meeting of shareholders, not earlier than 90 days prior to such special meeting and not later than the close of business on the later of the seventieth day prior to such special meeting or the tenth day following the day on which public announcement of the date of the special meeting is first made. With respect to other business to be brought before an annual meeting of shareholders, to be timely, a shareholder's notice must be delivered to or mailed and received at our principal executive offices not later than 90 days nor more than 120 days prior to the anniversary date of the proxy statement for the immediately preceding annual meeting of shareholders of the company. Our amended and restated bylaws also will specify requirements as to the form and content of a shareholder's notice. These provisions may preclude shareholders from bringing matters before an annual meeting of shareholders or from making nominations for directors at an annual meeting of shareholders or may discourage or defer a potential acquirer from conducting a solicitation of proxies to elect its own slate of directors or otherwise attempting to obtain control of us.

No Cumulative Voting. The OGCA provides that shareholders are not entitled to the right to cumulate votes in the election of directors unless our certificate of incorporation provides otherwise. Our amended and restated certificate of incorporation will not expressly provide for cumulative voting. Under cumulative voting, a minority shareholder holding a sufficient percentage of a class of shares may be able to ensure the election of one or more directors.

Authorized but Unissued Shares. Our amended and restated certificate of incorporation will provide that the authorized but unissued shares of common stock and preferred stock are available for future issuance without shareholder approval, subject to various limitations imposed by the New York Stock Exchange. These additional shares may be utilized for a variety of corporate purposes, including future public offerings to raise additional capital, corporate acquisitions and employee benefit plans. The existence of authorized but unissued shares of common stock and preferred stock could make it more difficult or discourage an attempt to obtain control of our company by means of a proxy contest, tender offer, merger or otherwise.

Certificate of Incorporation and Bylaws. Pursuant to the OGCA, our amended and restated certificate of incorporation may not be adopted, repealed or amended, in whole or in part, without the approval of the holders of at least a majority of the outstanding shares of our capital stock. In addition, after such time as Mr. Hamm and his affiliates cease to own 50% or more of our outstanding shares of capital stock entitled to vote in the election of directors, the provision of our certificate of incorporation relating to the classification of our board of directors may not be repealed or amended without the approval of the holders of at least 80% of the outstanding shares of our capital stock entitled to vote in the election of directors.

Our amended and restated certificate of incorporation will permit our board of directors to adopt, amend and repeal our bylaws. Our amended and restated bylaws will provide that our bylaws can be amended by either our board of directors or, as long as Mr. Hamm and his affiliates own 50% or more of our outstanding shares of capital stock entitled to vote in the election of directors, the affirmative vote of the holders of at least a majority of the outstanding shares of our capital stock entitled to vote in the election of directors.

Oklahoma Business Combination Statute. Under the terms of our amended and restated certificate of incorporation and as permitted under the OCGA, we will elect not to be subject to Section 1090.3 of the OGCA,

Table of Contents

Index to Financial Statements

Oklahoma's anti-takeover law. In general this section prevents an interested shareholder from engaging in a business combination with us for three years following the date the person became an interested shareholder, unless:

prior to the date the person became an interested shareholder, our board of directors approved the transaction in which the interested shareholder became an interested shareholder or approved the business combination;

upon consummation of the transaction that resulted in the interested shareholder becoming an interested shareholder, the interested shareholder owns stock having at least 85% of all voting power at the time the transaction commenced, excluding stock held by our directors who are also officers and stock held by certain employee stock plans; or

on or subsequent to the date of the transaction in which the person became an interested shareholder, the business combination is approved by our board of directors and authorized at a meeting of shareholders by the affirmative vote of the holders of two-thirds of all voting power not attributable to shares owned by the interested shareholder.

An interested shareholder is defined, generally, as any person that owns stock having 15% or more of all of our voting power, any person that is an affiliate or associate of us and owned stock having 15% or more of all of our voting power at any time within the three-year period prior to the time of determination of interested shareholder status, and any affiliate or associate of such person.

A business combination includes:

any merger or consolidation involving us and an interested shareholder;

any sale, lease, exchange, mortgage, pledge, transfer or other disposition to or with an interested shareholder of 10% or more of our assets;

subject to certain exceptions, any transaction that results in the issuance or transfer by us of any of our stock to an interested shareholder;

any transaction involving us that has the effect of increasing the proportionate share of the stock of any class or series or voting power owned by the interested shareholder;

the receipt by an interested shareholder of any loans, guarantees, pledges or other financial benefits provided by or through us; or

any share acquisition by the interested shareholder pursuant to Section 1090.1 of the OGCA.

Because we will opt out of the Oklahoma anti-takeover law, any interested shareholder could pursue a business combination transaction that is not approved by our board of directors.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Oklahoma Control Share Statute. Under the terms of our amended and restated certificate of incorporation and as permitted under the OGCA, we will elect not to be subject to Sections 1145 through 1155 of the OGCA, Oklahoma's control share acquisition statute. In general, Section 1145 of the OGCA defines "control shares" as our issued and outstanding shares that, in the absence of the Oklahoma control share statute, would have voting power, when added to all of our other shares that are owned, directly or beneficially, by an acquiring person or over which the acquiring person has the ability to exercise voting power, that would entitle the acquiring person, immediately after the acquisition of the shares to exercise, or direct the exercise of, such voting power in the election of directors within any of the following ranges of voting power:

one-fifth (1/5) or more but less than one-third (1/3) of all voting power;

Table of Contents

Index to Financial Statements

one-third (1/3) or more but less than a majority of all voting power; or

a majority of all voting power.

A control share acquisition means the acquisition by any person of ownership of, or the power to direct the exercise of voting power with respect to, control shares. After a control share acquisition occurs, the acquiring person is subject to limitations on the ability to vote such control shares. Specifically, Section 1149 of the OGCA provides that under most control share acquisition scenarios, the voting power of control shares having voting power of one-fifth (1/5) or more of all voting power is reduced to zero unless the shareholders of the issuing public corporation approve a resolution . . . according the shares the same voting rights as they had before they became control shares. Section 1153 of the OGCA provides the procedures for obtaining shareholder consent of a resolution of an acquiring person to determine the voting rights to be accorded the shares acquired or to be acquired in the control share acquisition.

Because we will opt out of the Oklahoma control share statute, any shareholder holding control shares will have the right to vote his or its shares in full in the election of directors.

Registration Rights

In connection with the closing of this offering, we will enter into a registration rights agreement with our principal shareholder and the two trusts established for the benefit of Mr. Hamm's children covering all of the shares of common stock owned by our principal shareholder and the trusts after the closing of this offering. For a description of the registration rights agreement, see Certain Relationships and Related Party Transactions Registration Rights Agreement.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is American Stock Transfer & Trust Company.

Table of Contents

Index to Financial Statements

Shares Eligible for Future Sale

General

Prior to this offering, there has been no public market for our common stock. Sales of substantial amounts of common stock in the open market, including shares issued upon exercise of outstanding options, or the perception that those sales could occur, could adversely affect prevailing market prices and could impair our ability to raise capital in the future through the sale of our equity securities.

Upon completion of the offering, we will have outstanding 168,018,636 shares of our common stock, and outstanding options to purchase 1,401,840 shares of our common stock. All of the 29,500,000 shares sold in the offering, or the 33,925,000 shares if the underwriters exercise their overallotment option in full, will be freely tradable without restriction under the Securities Act, except for any shares purchased by one of our affiliates, as that term is defined under Rule 144 under the Securities Act. All of our outstanding shares other than the shares sold in this offering (a total of 138,518,636 shares, or 134,093,636 shares if the underwriters exercise their overallotment option to purchase additional shares in full) will be restricted securities within the meaning of Rule 144 under the Securities Act and may not be sold other than through registration under the Securities Act or pursuant to an exemption from registration, subject to the restrictions on transfer contained in the lock-up agreements described below and in Underwriting.

Persons who may be deemed affiliates generally include individuals or entities that control, are controlled by or are under common control with us and may include our officers, directors and significant shareholders.

Lock-up Agreements

In connection with this offering, we, Harold G. Hamm, the Harold Hamm DST Trust and the Harold Hamm HJ Trust have agreed that, during the period beginning from the date of this prospectus and continuing to and including the date 180 days after the date of this prospectus, neither we nor any of them will, directly or indirectly, offer, sell, offer to sell, contract to sell or otherwise dispose of any shares of our common stock without the prior written consent of J.P. Morgan Securities Inc. and Merrill Lynch, Pierce, Fenner & Smith Incorporated, with limited exceptions as described under Underwriting. We have been informed by J.P. Morgan Securities Inc. and Merrill Lynch, Pierce, Fenner & Smith Incorporated that they have no present intention to consent to the release of the lock-up restrictions described above. This lock-up will not apply to approximately 2,283,193 shares of restricted stock that are currently held by our employees and directors or issuable upon the exercise of options outstanding under our long-term incentive plan, up to an additional 1,100,000 shares covered by grants that we are permitted to award under our existing long-term incentive plan during the 180-day lock-up period and any shares of common stock purchased by our directors, officers, employees and other persons pursuant to the directed share program. We have directed the underwriters to reserve up to 2,250,000 shares of common stock for sale to such persons at the initial public offering price through the directed share program. See Underwriting for a description of these lock-up arrangements. Upon the expiration of these lock-up agreements, 137,628,109 shares, or 133,203,109 shares if the underwriters exercise their overallotment option in full, will be eligible for sale in the public market under Rule 144 of the Securities Act, subject to volume limitations and other restrictions contained in Rule 144.

Table of Contents

Index to Financial Statements

Rule 144

In general, under Rule 144 as currently in effect, beginning 90 days after the date of this prospectus, a person, or persons whose shares are aggregated, who has beneficially owned restricted shares for at least one year, including the holding period of any prior owner (other than an affiliate of ours) would be entitled to sell within any three-month period a number of shares that does not exceed the greater of:

1% of the number of shares of common stock then outstanding; or

the average weekly reported trading volume of the common stock on the NYSE during the four calendar weeks preceding the filing of a Form 144 with respect to the sale.

Sales under Rule 144 also are subject to manner of sale provisions and notice requirements and to the availability of current public information about us.

Rule 144(k)

Under Rule 144(k), a person who is not deemed to have been an affiliate of ours at any time during the three months preceding a sale and who has beneficially owned the shares proposed to be sold for at least two years, including the holding period of any prior owner (other than an affiliate of ours) is entitled to sell those shares without complying with the manner of sale, public information, volume limitation or notice provisions of Rule 144.

Registration Rights

In connection with the closing of this offering, we will enter into a registration rights agreement with our principal shareholder and the two trusts established for the benefit of Mr. Hamm's children covering all of the shares of common stock owned by our principal shareholder and the trusts after the closing of this offering. For a description of the registration rights agreement, see Certain Relationships and Related Party Transactions Registration Rights Agreement.

Material U.S. Federal Tax Consequences for Non-U.S. Holders of Our Common Stock

The following is a general discussion of the material U.S. federal income and estate tax consequences to non-U.S. Holders with respect to the acquisition, ownership and disposition of our common stock. In general, a Non-U.S. Holder for purposes of this discussion is any beneficial owner of our common stock other than the following:

an individual citizen or resident of the U.S., including an alien individual who is a lawful permanent resident of the U.S. or meets the substantial presence test under section 7701(b)(3) of the Internal Revenue Code of 1986, as amended (the Code);

a corporation (or an entity treated as a corporation) created or organized in the U.S. or under the laws of the U.S., any state thereof, or the District of Columbia;

a partnership (or an entity treated as a partnership);

an estate, the income of which is subject to U.S. federal income tax regardless of its source; or

a trust, if a U.S. court can exercise primary supervision over the administration of the trust and one or more U.S. persons can control all substantial decisions of the trust, or certain other trusts that have a valid election to be treated as a U.S. person pursuant to the applicable Treasury Regulations.

This discussion is based on current provisions of the Code, final, temporary and proposed Treasury Regulations, judicial opinions, published positions of the Internal Revenue Service, or IRS, and all other applicable administrative and judicial authorities, all of which are subject to change, possibly with retroactive effect. This discussion does not address all aspects of U.S. federal income and estate taxation or any aspects of state, local, or non-U.S. taxation, nor does it consider any specific facts or circumstances that may apply to particular Non-U.S. Holders that may be subject to special treatment under the U.S. federal income tax laws including, but not limited to, insurance companies, real estate investment trusts, regulated investment companies, persons holding our common stock as part of a hedging or conversion transaction or a straddle or other risk-reduction transaction, tax-exempt organizations, pass-through entities, banks or financial institutions, brokers, dealers in securities, and U.S. expatriates. If a partnership or other entity treated as a partnership for U.S. federal income tax purposes is a beneficial owner of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. This discussion assumes that the Non-U.S. Holder will hold our common stock as a capital asset, which generally is property held for investment.

Prospective investors are urged to consult their tax advisors regarding the U.S. federal, state and local, and non-U.S. income and other tax considerations of acquiring, holding and disposing of shares of common stock.

Dividends

In general, dividends paid to a Non-U.S. Holder (to the extent paid out of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles) will be subject to U.S. withholding tax at a rate equal to 30% of the gross amount of the dividend, or a lower rate prescribed by an applicable income tax treaty, unless the dividends are effectively connected with a trade or business carried on by the Non-U.S. Holder within the U.S. Under applicable Treasury regulations, a Non-U.S. Holder will be required to satisfy certain certification requirements, generally on IRS Form W-8BEN, or any successor form, directly or through an intermediary, in order to claim a reduced rate of withholding under an applicable income tax treaty. If tax is withheld in an amount in excess of the amount applicable under an income tax treaty, a refund of the excess amount may generally be obtained by filing an appropriate claim for refund with the IRS.

Table of Contents

Index to Financial Statements

Dividends that are effectively connected with a U.S. trade or business (and, where an income tax treaty applies, are attributable to a U.S. permanent establishment of the Non-U.S. Holder) generally will not be subject to U.S. withholding tax if the Non-U.S. Holder files the properly completed required forms, including IRS Form W-8ECI, or any successor form, with the payor of the dividend, but instead generally will be subject to U.S. federal income tax on a net income basis in the same manner as if the Non-U.S. Holder were a resident of the U.S. A corporate Non-U.S. Holder that receives effectively connected dividends may be subject to an additional branch profits tax at a rate of 30%, or a lower rate prescribed by an applicable income tax treaty, on its effectively connected earnings and profits, subject to adjustments.

Gain on Sale or Other Disposition of Common Stock

In general, a Non-U.S. Holder will not be subject to U.S. federal income tax on any gain realized upon the sale or other taxable disposition of the Non-U.S. Holder's shares of common stock unless:

the gain is effectively connected with a trade or business carried on by the Non-U.S. Holder within the U.S. (and, where an income tax treaty applies, is attributable to a U.S. permanent establishment of the Non-U.S. Holder), in which case the branch profits tax discussed above may also apply if the Non-U.S. Holder is a corporation;

the Non-U.S. Holder is an individual who holds shares of common stock as capital assets and is present in the U.S. for 183 days or more in the taxable year of disposition and certain other conditions are met; or

we are or have been a U.S. real property holding corporation for U.S. federal income tax purposes during specified periods.

A Non-U.S. Holder described in the first and third bullet points above will be subject to tax on the net gain derived from the sale under regular graduated U.S. federal income tax rates. A Non-U.S. Holder described in the second bullet point above will be subject to a 30% tax on the gain derived from the sale, which may be offset by U.S. source capital losses.

Because of the oil and natural gas properties and other real property assets we own, we may be a U.S. real property holding corporation. The determination of whether we are a U.S. real property holding corporation is fact specific and depends on the composition of our assets. Generally, a corporation is a U.S. real property holding corporation if the fair market value of its U.S. real property interests, as defined in the Internal Revenue Code and applicable regulations, equals or exceeds 50% of the aggregate fair market value of its worldwide real property interests and its other assets used or held for use in a trade or business. If we are, have been, or become, a U.S. real property holding corporation, and our common stock is regularly traded on an established securities market, a Non-U.S. Holder who (actually or constructively) holds or held (at anytime during the shorter of the five year period preceding the date of dispositions or the holder's holding period) more than five percent of our common stock would be subject to U.S. federal income tax on a disposition of our common stock, but other Non-U.S. Holders generally would not be. If our common stock is not so traded, all Non-U.S. Holders would be subject to U.S. federal income tax on disposition of our common stock.

You are encouraged to consult your own tax advisor regarding our possible status as a U.S. real property holding corporation and its possible consequences in your particular circumstances.

Information Reporting and Backup Withholding

Generally, we must report annually to the IRS the amount of dividends paid, the name and address of the recipient, and the amount, if any, of tax withheld. A similar report is sent to the recipient. These information reporting requirements apply even if withholding was not required because the dividends were effectively

Table of Contents

Index to Financial Statements

connected dividends or withholding was reduced by an applicable income tax treaty. Under income tax treaties or other agreements, the IRS may make its reports available to tax authorities in the recipient's country of residence.

Dividends paid to a Non-U.S. Holder that is not an exempt recipient generally will be subject to backup withholding, currently at a rate of 28% of the gross proceeds, unless a Non-U.S. Holder certifies as to its foreign status, which certification may be made on IRS Form W-8BEN.

Proceeds from the disposition of common stock by a Non-U.S. Holder effected by or through a U.S. office of a broker will be subject to information reporting and backup withholding, currently at a rate of 28% of the gross proceeds, unless the Non-U.S. Holder certifies to the payor under penalties of perjury as to, among other things, its address and status as a Non-U.S. Holder or otherwise establishes an exemption. Generally, U.S. information reporting and backup withholding will not apply to a payment of disposition proceeds if the transaction is effected outside the U.S. by or through a non-U.S. office. However, if the broker is, for U.S. federal income tax purposes, a U.S. person, a controlled foreign corporation, a foreign person who derives 50% or more of its gross income for specified periods from the conduct of a U.S. trade or business, specified U.S. branches of foreign banks or insurance companies or a foreign partnership with various connections to the U.S., information reporting, but not backup withholding, will apply unless:

the broker has documentary evidence in its files that the holder is a Non-U.S. Holder and certain other conditions are met; or

the holder otherwise establishes an exemption.

Backup withholding is not an additional tax. Rather, the amount of tax withheld is applied as a credit to the U.S. federal income tax liability of persons subject to backup withholding. If backup withholding results in an overpayment of U.S. federal income taxes, a refund may be obtained, provided the required documents are timely filed with the IRS.

Estate Tax

Our common stock owned or treated as owned by an individual who is not a citizen or resident of the U.S. (as specifically defined for U.S. federal estate tax purposes) at the time of death will be includible in the individual's gross estate for U.S. federal estate tax purposes, unless an applicable estate tax treaty provides otherwise.

Table of ContentsIndex to Financial Statements

Underwriting

We and the selling shareholder are offering the shares of common stock described in this prospectus through a number of underwriters. J.P. Morgan Securities Inc. and Merrill Lynch, Pierce, Fenner & Smith Incorporated are acting as joint book-running managers of the offering and as representatives of the underwriters. We and the selling shareholder have entered into an underwriting agreement with the underwriters. Subject to the terms and conditions of the underwriting agreement, we and the selling shareholder have severally agreed to sell to the underwriters, and each underwriter has severally agreed to purchase, at the public offering price less the underwriting discount set forth on the cover page of this prospectus, the number of shares of common stock listed next to its name in the following table:

<u>Name</u>	<u>Number of shares</u>
J.P. Morgan Securities Inc.	9,587,500
Merrill Lynch, Pierce, Fenner & Smith Incorporated	9,587,500
Citigroup Global Markets Inc.	2,950,000
UBS Securities LLC	2,950,000
Deutsche Bank Securities Inc.	2,212,500
Raymond James & Associates, Inc.	2,212,500
Total	29,500,000

The underwriters are committed to purchase all the shares of common stock offered by us and the selling shareholder if they purchase any shares. The underwriting agreement provides that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may be increased or the offering may be terminated. The underwriting agreement also provides that the obligations of the underwriters are subject to certain conditions precedent, including the absence of any material adverse change in our business and the receipt of certain certificates, opinions and letters from us, the selling shareholder, our counsel and our independent auditors.

The underwriters propose to offer the shares of common stock directly to the public at the initial public offering price set forth on the cover page of this prospectus and to certain dealers at that price less a concession not in excess of \$0.54 per share. Any such dealers may resell shares to certain other brokers or dealers at a discount of up to \$0.10 per share from the initial public offering price. After the initial public offering of the shares, the offering price and other selling terms may be changed by the underwriters. Sales of shares made outside of the United States may be made by affiliates of the underwriters. The representatives have advised us and the selling shareholder that the underwriters do not intend to confirm discretionary sales in excess of 5% of the shares of common stock offered in this offering.

The underwriters have an option to buy up to 4,425,000 additional shares of common stock from the selling shareholder to cover sales of shares by the underwriters which exceed the number of shares specified in the table above. The underwriters have 30 days from the date of this prospectus to exercise this overallotment option. If any shares are purchased with this overallotment option, the underwriters will purchase shares in approximately the same proportion as shown in the table above. If any additional shares of common stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered.

Table of Contents**Index to Financial Statements**

The underwriting fee is equal to the public offering price per share of common stock less the amount paid by the underwriters per share of common stock. The underwriting fee is \$0.90 per share. The following table shows the per share and total underwriting discount that we and the selling shareholder will pay to the underwriters assuming both no exercise and full exercise of the underwriters' overallotment option to purchase additional shares:

	Without overallotment exercise	With full overallotment exercise
Per share	\$ 0.90	\$ 0.90
Total	\$ 26,550,000	\$ 30,532,500

We estimate that the total expenses of this offering, including registration, filing and listing fees, printing fees and legal and accounting expenses, but excluding the underwriting discount, will be approximately \$1.9 million, all of which will be paid by us.

We have directed the underwriters to reserve up to 2,250,000 shares of common stock for sale to our directors, officers, employees and other persons at the initial public offering price through a directed share program. The number of shares of common stock available for sale to the general public in the public offering will be reduced to the extent these persons purchase any reserved shares. Any shares not so purchased will be offered by the underwriters to the general public on the same basis as other shares offered hereby.

A prospectus in electronic format may be made available on the web sites maintained by one or more underwriters, or selling group members, if any, participating in the offering. Other than the prospectus in electronic format, the information on such web sites is not part of this prospectus. The underwriters may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives to underwriters and selling group members that may make Internet distributions on the same basis as other allocations.

We, Harold G. Hamm, the Harold Hamm DST Trust and the Harold Hamm HJ Trust have agreed that, without the prior written consent of J.P. Morgan Securities Inc. and Merrill Lynch, Pierce, Fenner & Smith Incorporated, neither we nor any of them will, with limited exceptions as described below, during the period ending 180 days after the date of this prospectus,

offer, pledge, announce the intention to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, any shares of our common stock (including, without limitation, common stock which may be deemed to be beneficially owned by such shareholders in accordance with the rules and regulations of the SEC and securities which may be issued upon exercise of a stock option or warrant) or any securities convertible into or exercisable or exchangeable for common stock; or

request or demand that we file a registration statement related to the common stock; or

enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of the common stock,

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

whether any such transaction described above is to be settled by delivery of common stock or such other securities, in cash or otherwise. Notwithstanding the foregoing, we will be able to grant awards under our existing long-term incentive plan covering up to 1,100,000 shares of our common stock during the lock-up period. These shares will not be subject to the lock-up restrictions described above.

In the event that (1) during the last 17 days of the 180-day restricted period, we issue an earnings release or material news or a material event relating to our company occurs; or (2) prior to the expiration of the 180-day restricted period, we announce that we will release earnings results during the 16-day period beginning on the

Table of Contents

Index to Financial Statements

last day of the 180-day period, the restrictions described above shall continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event.

We have been informed by J.P. Morgan Securities Inc. and Merrill Lynch, Pierce, Fenner & Smith Incorporated that they have no present intention to consent to the release of the lock-up restrictions described above.

We and the selling shareholder have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933.

Our common stock has been approved for listing on the New York Stock Exchange, subject to official notice of issuance, under the symbol CLR.

In connection with this offering, the underwriters may engage in stabilizing transactions, which involve making bids for, purchasing and selling shares of common stock in the open market for the purpose of preventing or retarding a decline in the market price of the common stock while this offering is in progress. These stabilizing transactions may include making short sales of the common stock, which involve the sale by the underwriters of a greater number of shares of common stock than they are required to purchase in this offering, and purchasing shares of common stock on the open market to cover positions created by short sales. Short sales may be covered shorts, which are short positions in an amount not greater than the underwriters' over-allotment option referred to above, or may be naked shorts, which are short positions in excess of that amount. The underwriters may close out any covered short position either by exercising their over-allotment option, in whole or in part, or by purchasing shares in the open market. In making this determination, the underwriters will consider, among other things, the price of shares available for purchase in the open market compared to the price at which the underwriters may purchase shares through the over-allotment option. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the common stock in the open market that could adversely affect investors who purchase in this offering. To the extent that the underwriters create a naked short position, they will purchase shares in the open market to cover the position.

The underwriters have advised us that, pursuant to Regulation M under the Securities Exchange Act of 1934, they may also engage in other activities that stabilize, maintain or otherwise affect the price of the common stock, including the imposition of penalty bids. This means that if the representatives of the underwriters purchase common stock in the open market in stabilizing transactions or to cover short sales, the representatives can require the underwriters that sold those shares as part of this offering to repay the underwriting discount received by them.

These activities may have the effect of raising or maintaining the market price of the common stock or preventing or retarding a decline in the market price of the common stock, and, as a result, the price of the common stock may be higher than the price that otherwise might exist in the open market. Neither we nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our common stock. If the underwriters commence these activities, they may discontinue them at any time. The underwriters may carry out these transactions on the New York Stock Exchange, in the over-the-counter market or otherwise.

Prior to this offering, there has been no public market for our common stock. The initial public offering price was determined by negotiation by us, the selling shareholder and the representatives of the underwriters. In determining the initial public offering price, we, the selling shareholder and the representatives of the underwriters considered a number of factors including:

the information set forth in this prospectus and otherwise available to the representatives;

our prospects and the history and prospects for the industry in which we compete;

Table of Contents

Index to Financial Statements

an assessment of our management;

our prospects for future earnings;

the general condition of the securities markets at the time of this offering; and

the recent market prices of, and demand for, publicly traded common stock of generally comparable companies.

None of the underwriters, our company or the selling shareholder can assure investors that an active trading market will develop for our shares of common stock, or that the shares will trade in the public market at or above the initial public offering price.

Certain of the underwriters and their affiliates have provided in the past to us and our affiliates and may provide from time to time in the future certain commercial banking, financial advisory, investment banking and other services for us and such affiliates in the ordinary course of their business, for which they have received and may continue to receive customary fees and commissions. In addition, from time to time, certain of the underwriters and their affiliates may effect transactions for their own account or the account of customers, and hold on behalf of themselves or their customers, long or short positions in our debt or equity securities or loans, and may do so in the future.

Legal Matters

The validity of the shares of common stock offered by this prospectus will be passed upon for us by Crowe & Dunlevy, A Professional Corporation, Oklahoma City, Oklahoma. Certain other legal matters will be passed upon for us by Vinson & Elkins L.L.P., Houston, Texas. Certain legal matters with respect to the offering will be passed upon for the underwriters by Davis Polk & Wardwell, New York, New York. Vinson & Elkins L.L.P. and Davis Polk & Wardwell will rely upon Crowe & Dunlevy, A Professional Corporation as to all matters of Oklahoma law.

Experts

The consolidated financial statements of Continental Resources, Inc. and subsidiary as of December 31, 2005 and 2006 and for each of the three years in the period ended December 31, 2006, included in this prospectus and elsewhere in the registration statement have been audited by Grant Thornton LLP, independent registered public accountants, as indicated in their reports with respect thereto, and are included herein in reliance upon the authority of said firm as experts in accounting and auditing.

Estimates of the oil and gas reserves of Continental Resources, Inc. and related future net cash flows and the present values thereof as of December 31, 2004, 2005 and 2006 included herein were based in part upon reserve reports prepared by Ryder Scott Company, L.P., independent petroleum engineers. We have incorporated these estimates in reliance on the authority of such firm as an expert in such matters.

Where You Can Find More Information

We have filed with the SEC under the Securities Act a registration statement on Form S-1 with respect to the common stock offered by this prospectus. This prospectus, which constitutes part of the registration statement, does not contain all the information set forth in the registration statement or the exhibits and schedules which are part of the registration statement, portions of which are omitted as permitted by the rules and regulations of the SEC. Statements made in this prospectus regarding the contents of any contract or other document are summaries of the material terms of the contract or document. With respect to each contract or document filed as an exhibit to the registration statement, reference is made to the corresponding exhibit. For further information pertaining to us and the common stock offered by this prospectus, reference is made to the registration statement, including the exhibits and schedules thereto, copies of which may be inspected without charge at the public reference facilities of the SEC at 100 F. Street, N.E., Washington, D.C. 20549. Copies of all or any portion of the registration statement may be obtained from the SEC at prescribed rates. Information on the public reference facilities may be obtained by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains a web site that contains reports, proxy and information statements and other information that is filed through the SEC's EDGAR System. The web site can be accessed at <http://www.sec.gov>.

Report of Independent Registered Public Accounting Firm

Board of Directors

Continental Resources, Inc.

We have audited the accompanying consolidated balance sheets of Continental Resources, Inc. and Subsidiary as of December 31, 2005 and 2006, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Continental Resources, Inc. and Subsidiary as of December 31, 2005 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, the 2006 consolidated financial statements have been restated to reflect stock-based compensation in accordance with the fair value provisions of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*.

Notes to Consolidated Financial Statements

1. Organization and Summary of Significant Accounting Policies

Description of Company

Continental Resources, Inc. (Continental or the Company) was incorporated in Oklahoma on November 16, 1967, as Shelly Dean Oil Company. On September 23, 1976, the name was changed to Hamm Production Company. In January 1987, the Company acquired all of the assets and assumed the debt of Continental Trend Resources, Inc. and affiliated entities J.S. Aviation and Wheatland Oil Co., which were merged into Hamm Production Company, and the corporate name was changed to Continental Trend Resources, Inc. In 1991, the Company's name was changed to Continental Resources, Inc. Effective June 1, 1997, the Company converted to an S-corporation under subchapter S of the Internal Revenue Code.

On July 21, 2004, the Company completed the sale of all of the outstanding stock of its subsidiary Continental Gas, Inc. (CGI) to the Company's shareholders, for \$22.6 million in cash. The sales price was representative of the fair value of the net assets based on an appraisal by an independent third party who also provided the Company with an opinion of the fairness from a financial point of view of the sale of CGI to the shareholders. The CGI assets included seven gas gathering systems and three gas-processing plants. The results of operations of CGI prior to its disposition are included in income from discontinued operations for the year ended December 31, 2004 and represent revenues of \$51.0 million and income from discontinued operations of \$1.7 million.

Continental had one wholly owned subsidiary, Continental Resources of Illinois, Inc. (CRII) at December 31, 2004 and 2005. CRII was incorporated in June 2001 for the purpose of acquiring the assets of Farrar Oil Company and Har-Ken Oil Company. Continental acquired Banner Pipeline Company, L.L.C. (Banner) on March 30, 2006 for approximately \$8.8 million, which represented the book value of working capital, principally cash, accounts receivable, crude oil inventory and accounts payable. CRII was merged into Continental on October 12, 2006. Banner was Continental's only subsidiary at December 31, 2006.

Continental's principal business is oil and natural gas exploration, development and production. As of December 31, 2006, the Company had interests in approximately 1,589 wells and serves as the operator of 1,302 of these wells. The Company's operations are primarily in the Rocky Mountain, the Mid-Continent and the Gulf Coast regions of the United States.

Basis of presentation

All significant inter-company accounts and transactions have been eliminated in the consolidated financial statements.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Of the estimates and assumptions that affect reported results, the estimate of the Company's oil and natural gas reserves, which is used to compute depreciation, depletion, amortization and impairment on producing oil and gas properties, is the most significant.

Restatement

Subsequent to March 7, 2006, the date on which the Company first filed the registration statement of which this prospectus forms a part, management determined that, for financial reporting purposes, the amount of stock-

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

based compensation expense related to restricted stock and stock options issued to employees should be adjusted to reflect the fair value of our restricted stock and stock options in accordance with SFAS 123(R). For calculating stock-based compensation expense for financial reporting purposes, the Company adjusted the fair value to \$11.96 per share from \$8.84 per share for restricted stock and to \$10.49 per share from \$5.90 per share for stock options at December 31, 2006. As a result, the consolidated financial statements of the Company as of and for the year ended December 31, 2006 have been restated from the amounts previously reported to reflect the changes in stock-based compensation expense. Those changes resulted in net income being reduced by \$8.1 million for the year ended December 31, 2006. See Note 9 for additional information. A summary of the significant effects of the restatement follows:

	As of December 31, 2006

Continental Resources, Inc. and Subsidiary
Notes to Consolidated Financial Statements (continued)

Revenue recognition

Oil and natural gas sales result from undivided interests held by the Company in oil and natural gas properties. Sales of oil and natural gas produced from oil and natural gas operations are recognized when the product is delivered to the purchaser and title transfers to the purchaser. The Company uses the sales method of accounting for natural gas imbalances in those circumstances where it has under-produced or over-produced its ownership percentage in a property. Under this method, a receivable or liability is recognized only to the extent that an imbalance cannot be recouped from the reserves in the underlying properties. The Company's aggregate imbalance positions at December 31, 2005 and 2006 were not material. Charges for gathering and transportation are included in production expenses.

During 2004 and the first three months of 2005, the Company purchased barrels of oil back from certain of its wellhead purchasers downstream of the initial sales point to exchange at the Cushing, Oklahoma hub in order to minimize pricing differentials with the NYMEX oil futures contract. In 2005, revenues of \$39.8 million and expenses of \$39.7 million pertaining to these marketing activities were netted as provided by Emerging Issues Task Force (EITF) 04-13, which the Company adopted as of January 2005. The Company presented this purchase and sale activity gross in the 2004 income statement as crude oil marketing and trading revenues of \$226.7 million and crude oil marketing and trading expenses of \$227.2 million under the guidance provided by EITF 99-19, Reporting Revenues Gross as a Principal and/or Net as an Agent. The Company ceased marketing its production in this manner in March 2005 and now generally markets its production at the wellhead.

Cash and cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. The Company maintains its cash and cash equivalents in accounts that may not be federally insured. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk.

At December 31, 2005 and 2006, the Company's cash included approximately \$301,000 and \$216,000, respectively, in a Canadian bank, which was converted to US dollars using the exchange rates in effect at December 31, 2005 and 2006.

Table of ContentsIndex to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

Accounts receivable

The Company operates exclusively in oil and natural gas exploration and production related activities. Oil and natural gas sales and joint interest receivables are generally unsecured. Accounts receivable are due within 30 days and considered delinquent after 60 days. The Company determines its allowance for doubtful accounts by considering a number of factors, including the length of time accounts are past due, the Company's loss history, and the customer or working interest owner's ability to pay. The Company writes off specific accounts when they become uncollectible and any payments subsequently received on these receivables are credited to the allowance for doubtful accounts. The following table presents the allowance for doubtful accounts at December 31, 2004, 2005 and 2006 and changes in the allowance for these years:

	Balance at beginning of period	Additions charged to costs and expenses	Deductions	Balance at end of period
Year ended December 31, 2004	\$ 229,972	\$ 23,000	\$	\$ 252,972
Year ended December 31, 2005	252,972	59,378	(140,899)	171,451
Year ended December 31, 2006	171,451	68,178	(46,303)	193,326

Concentration of credit risk

The Company is subject to credit risk resulting from the concentration of its crude oil and natural gas receivables with several significant customers. The largest purchasers of the Company's oil and gas production accounted for 56% (three purchasers), 60% (three purchasers) and 33% (two purchasers) of total oil and natural gas sales revenues for 2004, 2005 and 2006 respectively. These purchasers constituted all purchasers with oil and natural gas sales in excess of 10% of total oil and natural gas sales. The Company does not require collateral. While the Company believes its recorded receivables will be collected, in the event of default the Company would follow normal collection procedures. The Company does not believe the loss of any single purchaser would materially impact its operating results, as oil and natural gas are fungible products with well-established markets and numerous purchasers.

Debt issuance costs

Costs incurred in connection with the issuance of long-term debt are capitalized and amortized over the term of the related debt. The Company had capitalized costs of \$2.0 million and \$2.2 million (net of accumulated amortization of \$3.8 million and \$4.5 million) relating to the issuance of its long-term debt at December 31, 2005 and 2006, respectively. During the years ended December 31, 2004, 2005 and 2006, the Company recognized associated amortization expense of \$4.8 million, \$1.7 million and \$0.9 million, respectively.

Inventories

Inventories are stated at the lower of cost or market. Inventory consists primarily of tubular goods and production equipment, which totaled approximately \$4.8 million and \$4.2 million at December 31, 2005 and 2006, respectively, and crude oil line fill of approximately \$3.6 million at December 31, 2006. The Company had no crude oil in inventory at December 31, 2005.

F-10

Table of ContentsIndex to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

Property and equipment

Property and equipment are capitalized and stated at cost, while maintenance and repairs are expensed as incurred.

Depreciation and amortization are provided in amounts sufficient to expense the cost of depreciable assets to operations over their estimated useful lives using the straight-line method. Estimated useful lives are as follows:

Property and Equipment	Useful Lives in Years
Furniture and fixtures	10
Automobiles	5
Machinery and equipment	10-20
Office and computer equipment	5
Building and improvements	10-40

Oil and gas properties

The Company uses the successful efforts method of accounting for oil and gas properties whereby costs to acquire mineral interests in oil and gas properties, drill and equip exploratory wells that find proved reserves and to drill and equip development wells are capitalized. Geological and geophysical costs, seismic costs, lease rentals and costs associated with unsuccessful exploratory wells are expensed as incurred. Maintenance and repairs are expensed as incurred, except that the cost of replacements or renewals that expand capacity or improve production are capitalized.

The Company reports capitalized exploratory drilling costs on the balance sheet according to Statement of Financial Accounting Standards (SFAS) No. 19, Financial Accounting and Reporting by Oil and Gas Producing Companies (SFAS No. 19). On a monthly basis, the Company capitalizes the costs of drilling exploratory wells pending determination of whether the well has found proved reserves. The Company capitalizes costs associated with the acquisition or construction of support equipment and facilities with the drilling and development costs to which they relate. If proved reserves are found by an exploratory well, associated capitalized costs become part of well equipment and facilities; however, if proved reserves are not found, the capitalized costs associated with the well are expensed, net of any salvage value. Total capitalized exploratory drilling costs, as of December 31, 2005 and 2006, pending the determination of proved reserves were \$1.9 million and \$10.0 million, respectively. None of these costs were suspended beyond one year.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Production expenses are those costs incurred by the Company to operate and maintain its oil and natural gas properties and associated equipment and facilities. Production expenses include labor costs to operate the Company's properties, repairs and maintenance, and materials and supplies utilized in the Company's operations.

The Company accounts for its asset retirement obligations pursuant to SFAS No. 143, *Accounting for Asset Retirement Obligations* which requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred and a corresponding increase in the carrying amount of the related long-lived asset. Subsequently, the asset retirement costs are charged to expense using a systematic and rational method and the liability is accreted to the expected abandonment amount over the asset's life.

F-11

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

The Company's primary asset retirement obligations relate to future plugging and abandonment expenses on its oil and natural gas properties and related facilities disposal. The following table summarizes the changes in the Company's future abandonment liability from January 1, 2005 through December 31, 2006 (in thousands):

	<u>2004</u>	<u>2005</u>	<u>2006</u>
Asset retirement obligation liability at January 1,	\$ 26,608	\$ 34,192	\$ 34,353
Asset retirement obligation accretion expense	1,036	1,596	1,680
Plus: Revisions	6,726		4,391
Additions for new assets	516	1,031	2,480
Less: Plugging costs and sold assets	(694)	(2,466)	(1,631)
Asset retirement obligation liability at December 31,	<u>\$ 34,192</u>	<u>\$ 34,353</u>	<u>\$ 41,273</u>

As of December 31, 2005 and 2006, property and equipment included \$21.9 million and \$27.7 million, respectively, of net asset retirement costs. The Company considered the impact of FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* and determined that it did not have a material effect on the Company's results of operations or financial condition.

Depreciation, depletion, amortization, accretion and impairment

Depreciation, depletion, and amortization (DD&A) of capitalized drilling and development costs, including related support equipment and facilities, of producing oil and gas properties are computed using the units of production method on an individual property, field or unit basis based on total estimated proved developed oil and gas reserves. Amortization of producing leasehold is based on the unit-of-production method using total estimated proved reserves. In arriving at rates under the unit-of-production method, the quantities of recoverable oil and natural gas are established based on estimates made by the Company's geologists, engineers and independent reserve engineers. Upon sale or retirement of properties, the cost and related accumulated DD&A are eliminated from the accounts and the resulting gain or loss is recognized. Unit of production rates are revised whenever there is an indication of a need, but at least twice annually in conjunction with its semi-annual reserve reports. Revisions are accounted for prospectively as changes in accounting estimates.

Non-producing properties consist of undeveloped leasehold costs and costs associated with the purchase of proved undeveloped reserves. Individually significant non-producing properties are periodically assessed for impairment of value and a loss is recognized at the time of impairment by providing an impairment allowance. Other non-producing properties are amortized on a composite method based on the Company's estimated experience of successful drilling and the average holding period. Impairment of non-producing properties was \$5.5 million, \$4.4 million and \$5.4 million for 2004, 2005, and 2006 respectively.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

In accordance with the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, the Company recognizes impairment expenses for developed oil and gas properties and other long-lived assets when indicators of impairment are present and the undiscounted cash flows from proved and risk-adjusted probable reserves are not sufficient to recover the assets' carrying amount. The impairment loss is measured by comparing the fair value of the asset to its carrying amount. Fair values are based on discounted future cash flows. The Company's oil and gas properties are reviewed for indicators of impairment on a field-by-field basis, resulting in the recognition of impairment provisions of \$6.2 million, \$2.5 million and \$6.3 million, respectively, for 2004, 2005 and 2006. The majority of the impairment recognized in these years relates to fields comprised of a small number of properties or single wells on which the Company does not expect sufficient future net cash flows to recover its carrying cost.

F-12

Table of Contents

Index to Financial Statements

Continental Resources, Inc. and Subsidiary
Notes to Consolidated Financial Statements (continued)

The costs of retired, sold, or abandoned properties that constitute part of an amortization base are charged or credited, net of proceeds received, to the accumulated depletion, depreciation and amortization reserve. Gains or losses from the disposal of other properties are recognized in the current period. Effective July 1, 2005, the Company adopted SFAS No. 153, Exchanges of Nonmonetary Assets, an Amendment of APB Opinion No. 29 (SFAS No. 153), for the exchanges of nonmonetary assets occurring after the implementation date. Prior to implementing SFAS No. 153, the Company generally did not recognize gains on nonmonetary exchanges involving oil and gas properties. According to the provisions of SFAS No. 153, all nonmonetary asset exchanges that have commercial substance, as defined, will be measured at fair value with gain or loss recognized in earnings. Values of historical nonmonetary asset exchanges have not been material.

Income taxes

Effective June 1, 1997, the Company converted to an S-corporation under Subchapter S of the Internal Revenue Code. As a result, income taxes attributable to federal and state taxable income of the Company after May 31, 1997, if any, are payable by the shareholders of the Company. Certain properties held by the Company at the time of the conversion may be subject to federal taxation on the excess of the S-corporation conversion date fair market value over the assets then taxable basis if sold within 10 years of the conversion to an S-corporation. These taxes are payable by the Company. In 2005, the Company recorded federal income tax expense of \$1.1 million attributable to such gains on sales of properties according to section 1374 of the Internal Revenue Code. The benefit recorded during 2006 reflects a change in estimate of the original provision recorded.

Pro forma information (unaudited)

Pro forma adjustments are reflected on the 2006 consolidated balance sheet to adjust for \$52.1 million of dividends declared after December 31, 2006 and the reclassification of undistributed earnings between retained earnings and additional paid-in capital in connection with the Company's conversion from an S-corporation to a C-corporation in connection with its planned initial public offering as if the conversion had occurred on December 31, 2006.

Pro forma adjustments are reflected on the consolidated statements of income to provide for income taxes in accordance with SFAS No. 109 as if the Company had been a C-corporation for all periods presented. For unaudited pro forma income tax calculations, deferred tax assets and liabilities were recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities were measured using enacted tax rates expected to apply to taxable income in the years in which the Company expects to recover or settle those temporary differences. A statutory Federal tax rate of 35% and effective state tax rate of 3% (net of Federal income tax effects) were used for the pro forma enacted tax rate for all periods. The pro forma tax effects are based upon currently available information. Management believes that these assumptions provide a reasonable basis for representing the pro forma tax effects.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Pro forma adjustments are reflected on the consolidated statements of income to adjust earnings per share for the effect of the Company's planned 11 for 1 stock split to be effected as a stock dividend in connection with the consummation of the Company's planned initial public offering. The pro forma earnings per share adjustments for 2006 also give effect to the number of shares to be issued in the Company's planned initial public offering whose net proceeds would be sufficient to pay the \$52.1 million of cash dividends declared in 2007 (approximately 3.7 million shares).

F-13

Table of ContentsIndex to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

Issued and outstanding shares, inclusive of restricted stock, at December 31, 2005 and 2006 on a historical and pro forma basis, were as follows:

	December 31,	
	2005	2006
Outstanding shares (historical)	14,458,966	14,464,204
Outstanding shares (pro forma)	159,048,626	159,106,244

The following table sets forth the computation of shares used in the pro forma basic and diluted earnings per share computations for the years ended December 31, 2004, 2005 and 2006:

	Year ended December 31,		
	2004 Shares	2005 Shares	2006 Shares
Shares used in basic earnings per share	158,058,109	158,058,109	161,864,431
Effect of dilutive securities:			
Restricted stock		160,094	299,508
Employee stock options	1,180,817	1,087,812	1,247,939
Shares used in diluted earnings per share	159,238,926	159,306,015	163,411,878

The pro forma information should be read in conjunction with the related historical information and is not necessarily indicative of the results that would have been attained had the transactions actually taken place.

Comprehensive income

The Company classifies other comprehensive income (loss) items by their nature in the consolidated financial statements and displays the accumulated balance of other comprehensive income (loss) separately in the shareholders' equity section of the balance sheet. Accumulated other comprehensive income (loss) at December 31, 2005 and 2006 consists of foreign currency translation.

Earnings per common share

Basic earnings per common share is computed by dividing net income by the weighted-average number of shares outstanding for the period. Diluted earnings per share reflects the potential dilution of nonvested restricted stock awards and dilutive stock options, which are calculated using the treasury stock method as if these options were exercised. The following tables set forth earnings per share and the computation of shares used in the basic and diluted earning per share computations for the years ended December 31, 2004, 2005 and 2006:

	Year ended December 31,		
	2004	2005	2006
Basic income per share:			
From continuing operations	\$ 1.87	\$ 13.52	\$ 17.61
From discontinued operations	0.11		
Loss on sale of discontinued operations	(0.04)		
Net income per share	\$ 1.94	\$ 13.52	\$ 17.61

Shares used in diluted earnings per share	14,476,266	14,482,365	14,514,776

Accounting for derivatives

The Company had no open hedges at December 31, 2005 or 2006. In 2004, the Company utilized derivative contracts to hedge the commodity price risk associated with specifically identified purchase or sales contracts, oil and gas production or operational needs. The Company accounted for its non-trading derivative activities under the guidance provided by SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, and recognized all of its derivative instruments as assets or liabilities in the balance sheet at fair value with such amounts classified as current or long-term based on their anticipated settlement. The accounting for the changes in fair value of a derivative depends on the intended use of the derivative and resulting designation.

Fair value of financial instruments

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

The Company's financial instruments consist primarily of cash, trade receivables, trade payables and long-term debt. The carrying value of cash, trade receivables and trade payables are considered to be representative of their respective fair values, due to the short maturity of these instruments.

The fair value of long-term debt approximates its carrying value based on the borrowing rates currently available to the Company for bank loans with similar terms and maturities. The estimated fair value of long-term debt is \$143.0 million and \$140.0 million at December 31, 2005 and 2006, respectively.

Equity compensation

The Company accounts for employee stock option grants and restricted stock grants in accordance with SFAS 123(R). The terms of the restricted stock grants and stock option grants stipulate that, while the Company is a private company, it is required to purchase the vested restricted stock and stock acquired from stock option exercises at each employee's request based upon the purchase price as determined by a formula specified in each award agreement. Additionally, the Company has the right to purchase vested restricted stock and stock acquired from stock option exercises at the same price upon termination of employment for any reason and for a period of two years subsequent to leaving the employment of the Company. Therefore, the awards are accounted for as

Table of Contents

Index to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

liability awards in accordance with SFAS 123(R). The Company measures compensation cost for the awards based upon fair value. Restricted stock and stock option values represent intrinsic value prior to 2006 and fair value after March 6, 2006, when the Company became a public entity under SFAS 123(R). Fair value of stock options is determined using the Black-Scholes option valuation model. See Note 9.

The right to sell and requirement to purchase will lapse when the Company becomes a reporting company under Section 12 of the Exchange Act. Therefore, the liability for equity compensation will be reclassified to additional paid in capital upon becoming a public reporting company.

Recent accounting pronouncements

In December 16, 2004, the FASB issued SFAS 123(R), Share-Based Payment, a revision of SFAS 123, and APB Opinion 25, Accounting for Stock Issued to Employees. SFAS 123(R) requires that the fair value of share-based payment transactions (including those with employees and non-employees) be recognized in the financial statements. SFAS 123(R) applies to all share-based payment transactions in which an entity acquires goods or services by issuing (or offering to issue) its shares, share options or other equity instruments (except for those held by an ESOP) or by incurring liabilities (1) in amounts based on the price of the entity's shares or other equity instruments or (2) that require (or may require) settlement by the issuance of an entity's share or other equity instruments. SFAS 123(R) is effective for the Company in the first annual reporting period after December 15, 2005. The Company implemented SFAS 123(R) on January 1, 2006 using the modified prospective application. The adoption of SFAS 123(R) did not have a material effect on the Company's consolidated financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin (SAB) No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Current Year Misstatements*. SAB No. 108 requires analysis of misstatements using both an income statement (rollover) approach and a balance sheet (iron curtain) approach in assessing materiality and provides for a one-time cumulative effect transition adjustment. The Company has applied the guidance of SAB No. 108 effective December 31, 2006. The application of this SAB had no effect on the consolidated financial statements.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*. The interpretation is effective for fiscal years beginning after December 15, 2006. The adoption of FIN 48 is not expected to have a material impact on the Company's consolidated financial position or results of operations.

In September 2006, the FASB finalized SFAS No. 157, Fair Value Measurements which will become effective in 2008. This Statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements; however, it does not require any new fair value measurements. The provisions of SFAS No. 157 will be applied prospectively to fair value measurements and disclosures in the Company's Consolidated Financial Statements beginning in the first quarter of 2008. The adoption of SFAS No. 157 is not expected to have a material impact on the Company's consolidated financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 . This Statement provides entities

F-16

Table of ContentsIndex to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

with an option to choose to measure eligible items at fair value at specified election dates. If elected, an entity must report unrealized gains and losses on the item in earnings at each subsequent reporting date. The fair value option may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; is irrevocable (unless a new election date occurs); and is applied only to entire instruments and not to portions of instruments. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. Management does not believe that the implementation of SFAS No. 159 will have a material impact on the Company's financial statements.

2. Hedging Contracts

The Company has utilized fixed-price contracts and zero-cost collars in the past to reduce exposure to unfavorable changes in oil and gas prices that are subject to significant and often volatile fluctuation. Under the fixed price delivery contracts the Company received the fixed price stated in the contract. Under the zero-cost collars, if the market price of crude oil exceeded the ceiling strike price or fell below the floor strike price, then the Company received the applicable collar strike price. If the market price was between the floor strike price and the ceiling strike price, the Company received market price.

The Company was not a party to any open hedge contracts at December 31, 2005 or 2006. Charges in the amount of \$6.4 million for hedging activities are reported as a reduction in oil and gas sales in the income statement for the year ended December 31, 2004. The Company was not a party to any hedging activities during 2005 or 2006. The Company recognized no significant amounts due to hedge ineffectiveness in 2004.

3. Long-term Debt

The Company had the following long-term debt outstanding as of the dates shown (in thousands):

	December 31,	
	2005	2006
Credit Agreement due April 12, 2011	\$ 143,000	\$ 140,000

On November 22, 2004, the Company executed a Fifth Amended and Restated Credit Agreement (Credit Agreement, as amended) in which a group of lenders agreed to provide a \$400.0 million senior secured revolving credit facility with a commitment of \$250.0 million as of

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

December 31, 2005. Borrowings under the credit facility are secured by liens on substantially all oil and gas properties and associated assets of the Company.

On March 23, 2005, the Company executed an amendment to the Credit Agreement and revised the pricing grid, which lowered the Utilization Percentage and the LIBOR margins. On December 7, 2005, the Company executed an amendment to the Credit Agreement in order to terminate certain covenants including a requirement to hedge certain quantities of its production under various conditions.

At that time, borrowings under the credit facility bore interest, payable quarterly, at a rate per annum equal to the London Interbank Offered Rate (LIBOR) for one, two, three or six months, as elected by the Company, plus a margin ranging from 125 to 200 basis points, or at the lead banks reference rate plus an applicable margin ranging from 25 to 50 basis points.

On April 12, 2006, the Company amended the Credit Agreement. The amended facility matures on April 12, 2011. At the Company's election, the maturity date can be extended for up to two one-year periods. Borrowings

F-17

Table of Contents

Index to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

under the facility bear interest, payable quarterly, at a rate per annum equal to the London Interbank Offered Rate for one, two, three or six months, as elected by the Company, plus a margin ranging from 100 to 175 basis points, depending on the percentage of its borrowing base utilized, or the lead banks reference rate. The amended facility has a note amount of \$750.0 million, a borrowing base of \$500.0 million, subject to semi-annual redetermination, and a commitment level of \$300.0 million. Under the terms of the amended facility, the Company is allowed to set the commitment level at any level up to the borrowing base.

The amended facility contains certain covenants including that the Company maintain a current ratio of not less than 1.0 to 1.0 (inclusive of availability under the Credit Agreement) and a Total Funded Debt to EBITDAX, as defined, of no greater than 3.75 to 1.0. The Company was in compliance with these covenants at December 31, 2006.

The Company had \$160.0 million available under the Credit Agreement at December 31, 2006 and incurred approximately \$200,000 in commitment fees during 2006. These fees are 0.2% of the daily average excess of the commitment amount over the outstanding credit balance. Fees are payable five business days after the end of each quarter. The Company paid approximately \$1.1 million in debt issuance fees for the new credit facility, which was capitalized and is being amortized on a straight-line basis, the use of which approximates the effective interest method, over the life of the credit facility. The Company's weighted average interest rate was 6.42% at December 31, 2006.

The Company redeemed \$119.5 million of Senior Subordinated 10.25% Notes during November 2004 and paid a premium of \$4.1 million due to early redemption of the notes.

On November 22, 2004, the Company signed a note with its principal shareholder for \$50.0 million. The annual rate of interest was 6.00% and interest payments were due the last day of each calendar quarter beginning December 31, 2004. The maturity date of the note was March 31, 2008. A subordination agreement was executed making the \$50.0 million note to the Company subordinate to the Credit Agreement discussed above. The Company paid the outstanding balance in December 2005. (Note 11)

At December 31, 2006, the Company had \$2.0 million of outstanding letters of credit that expire during 2007.

4. Cash Flow Information

Net cash provided by operating activities reflects cash payments as follows (in thousands):

	December 31,		
	2004	2005	2006
Interest paid	\$ 29,313	\$ 14,598	\$ 10,875
Income taxes paid			1,007

Noncash investing and financing activities are as follows (in thousands):

	December 31,		
	2004	2005	2006
Capital contribution note payable forgiven by shareholder	\$	\$ 2,000	\$
Cancellation of capital leases		10,058	
Asset retirement obligations	7,242	1,031	6,871

5. Property, Plant, and Equipment

Property, plant and equipment includes the following at December 31, 2005 and 2006 (in thousands):

	<u>2005</u>	<u>2006</u>
Proved oil and gas properties	\$ 753,841	\$ 1,032,108
Unproved oil and gas properties	32,785	57,309
Service properties, equipment and other	19,790	25,668
	<u>806,416</u>	<u>1,115,085</u>
Total property and equipment	806,416	1,115,085
Accumulated depreciation, depletion and amortization	(297,023)	(363,338)
	<u>509,393</u>	<u>751,747</u>
Net property and equipment	\$ 509,393	\$ 751,747

6. Accrued Liabilities

Accrued liabilities includes the following at December 31, 2005 and 2006 (in thousands):

	<u>2005</u>	<u>2006</u>
		(as restated)
Equity compensation	\$ 12,186	\$ 22,502
Production taxes and income taxes	9,417	7,369
Drilling cost advances from third parties	2,295	7,235
Interest	652	989
Other	4,245	4,917
	<u>28,795</u>	<u>43,012</u>
Total accrued liabilities	\$ 28,795	\$ 43,012

7. Lease Commitments

The Company leases office space under operating leases from the principal shareholder (See Note 11).

The Company had a capital lease arrangement to lease compressors in place at December 31, 2004 from a related party. The assets related to these capital leases totaled \$16.8 million at December 31, 2004, with accumulated depreciation of \$3.5 million at December 31, 2004. In 2005, the capital lease contract was cancelled and the Company executed an operating lease effective January 28, 2005. The Company recorded a loss of \$3.1 million on the termination of the capital lease. The Company pays approximately \$400,000 per month under the operating lease. The term of the operating lease is through January 28, 2009.

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

Lease expense associated with the Company's operating leases for the years ended December 31, 2004, 2005 and 2006, was \$0.7 million, \$5.3 million and \$5.9 million, respectively. At December 31, 2006, including leases renewed and entered into subsequent to December 31, 2006, the minimum future rental commitments under operating leases having non-cancelable lease terms in excess of one year, including leases from related parties, are as follows (in thousands):

Year	Leases with Related Parties	Leases with Non-Related Parties	Total Amount
2007	\$ 4,936	\$ 360	\$ 5,296
2008	4,819	313	5,132
2009	402	141	543
2010		79	79
2011		17	17
Total obligations	\$ 10,157	\$ 910	\$ 11,067

8. Shareholders' Equity

On December 8, 2004, the Company's Amended and Restated Certificate of Incorporation was amended to convert 1,000,000 shares of common stock to voting common stock, par value \$.01 per share, and 19,000,000 shares of common stock to non-voting common stock, par value \$.01 per share. Each share of common stock, par value \$.01 per share, outstanding was converted and reclassified into 5% voting common stock and 95% non-voting stock. At December 31, 2005 and 2006, there were 718,446 voting shares and 13,740,520 and 13,745,758 of non-voting shares, respectively.

During 2006, the Company declared cash dividends totaling \$87.6 million to existing shareholders and, subject to forfeiture, to holders of unvested restricted stock. Of this amount, \$298,000 was charged to compensation expense related to the restricted stock liability. During 2006, the Company paid cash dividends of \$87.4 million. The unpaid balance of \$218,000 relates to dividends associated with unvested restricted stock and will be paid as the restricted stock vests.

9. Stock Compensation

Effective October 1, 2000, the Company adopted the Continental Resources, Inc. 2000 Stock Option Plan (2000 Plan) and granted options to eligible employees. These options were either Incentive Stock Options, Nonqualified Stock Options or a combination of both. The granted stock

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

options vest either over a five-year period at the rate of 20% each year or over a three year period at the rate of 33 1/3% both commencing on the first anniversary of the grant date and expire ten years from date of grant. The maximum number of shares covered consisted of 1,020,000 shares of the Company's common stock, par value \$.01 per share. On November 10, 2005, the 2000 Plan was terminated and 152,000 shares of common stock, par value \$0.01 per share, remained reserved for unexercised stock options previously granted under the 2000 Plan. As of December 31, 2006, options covering 67,060 shares had been exercised.

F-20

Table of ContentsIndex to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

The Company's stock option grants under the 2000 plan are as follows:

	Outstanding		Exercisable	
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
Outstanding December 31, 2003	172,000	\$ 10.79	114,933	\$ 10.34
Granted	20,000	43.62		
Exercised	(25,000)	12.60		
Canceled				
Outstanding December 31, 2004	167,000	14.45	118,866	10.39
Granted	25,000	62.82		
Exercised	(40,000)	10.50		
Canceled				
Outstanding December 31, 2005	152,000	23.44	109,667	12.59
Granted				
Exercised	(2,060)	13.82		
Canceled	(6,667)	43.62		
Outstanding December 31, 2006	143,273	\$ 22.64	124,606	\$ 17.51

The total intrinsic value of options exercised during the years ended December 31, 2004, 2005 and 2006 was \$0.7 million, \$3.2 million and \$0.1 million, respectively. The intrinsic value of a stock option is the amount by which the formula derived value of the underlying stock exceeds the exercise price of the option. At December 31, 2006, the outstanding options had a weighted average life of 5.22 years and an aggregate intrinsic value of \$6.2 million. At December 31, 2006, the exercisable options had a weighted average life of 4.80 years and an aggregate intrinsic value of \$6.1 million. As of December 31, 2006, there was \$368,000 of unrecognized compensation expense related to non-vested stock options. The expense is expected to be recognized over a weighted average period of 0.9 years.

The recorded liability associated with the exercise of options during 2004 and 2005 was settled in cash. Shares of common stock were issued in 2006 and the Company's outstanding common stock changed as a result of the options exercised.

The following table summarizes information about stock options outstanding at December 31, 2006:

	Options Outstanding			Options Exercisable	
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
\$7.00 - \$7.77	56,940	4.53 years	\$ 7.38	54,940	\$ 7.36
\$14.00	48,000	3.75 years	14.00	48,000	14.00
\$43.62	13,333	7.58 years	43.62	13,333	43.62
\$62.82	25,000	8.33 years	62.82	8,333	62.82
	143,273		\$ 22.64	124,606	\$ 17.51

On October 3, 2005, the Company adopted the Continental Resources, Inc. 2005 Long-Term Incentive Plan (2005 Plan) and reserved a maximum of 500,000 shares of non-voting common stock that may be issued

Table of Contents

Index to Financial Statements

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

pursuant to the 2005 Plan. As of December 31, 2006, the Company had outstanding 71,037 shares of restricted stock granted to directors, officers and key employees under the 2005 Plan. All grants were made on or after October 3, 2005. Restricted stock is awarded in the name of the recipient and except for the right of disposal, constitutes issued and outstanding shares of the Company's common stock for all corporate purposes during the period of restriction including the right to receive dividends, subject to forfeiture. Restricted stock grants vest over periods ranging from one to three years.

Pursuant to the award agreements the Company has the right to purchase vested restricted shares and shares acquired by option exercise at all times the employee remains in the employment of the Company and for a period of two years subsequent to leaving the employment of the Company and grantees have the right to require the Company to purchase vested restricted shares and shares acquired by option exercise, each at a purchase price as determined by a formula specified in each award agreement. All grants of stock options were issued with an exercise price equal to the then estimated formula purchase price of the Company's stock determined according to the plans. In accordance with the plans, the Company calculates the formula purchase price quarterly based on shareholders' equity adjusted for the excess of period end PV-10 oil and gas reserve valuation over the book value of oil and gas properties. The amounts reflected on the accompanying consolidated balance sheets as liabilities are \$12.2 million and \$22.5 million as of December 31, 2005 and 2006, respectively. The Company's associated compensation expense, as included in general and administrative expense, was \$2.0 million, \$13.7 million and \$10.9 million during 2004, 2005 and 2006, respectively.

Effective January 1, 2006, the Company adopted SFAS 123(R), using the modified-prospective transition method. The adoption did not have a material effect on the Company's consolidated financial statements. In connection with the filing of a registration statement with the Securities and Exchange Commission on March 7, 2006, for the public offering of common stock, the Company became a public entity for purposes of SFAS 123(R). For public entities, stock option liability awards are required to be valued using the Black-Scholes or similar option valuation model. In connection therewith, the Company changed from the intrinsic value method to the fair value method of accounting for its stock options and restricted stock, the effect of which was \$4.8 million and \$8.1 million of additional compensation expense at March 31, 2006 and December 31, 2006, respectively. In determining the fair value of the vested stock options and compensation expense as of and for the year ended December 31, 2006, the Company utilized the Black-Scholes option pricing value model based on a fair value for stock option grants of \$131.56 per share, weighted average expected life of 2.38 years, expected volatility of 38%, weighted average risk-free interest rate of 4.75% and a dividends yield of zero. The expected life is based on management's expectations of option exercises. The volatility is based on the average volatility of our peer group for a period approximating the expected life of the options. The risk-free interest rate is based on 10-year treasury rates in effect at the end of the year commensurate with the expected life of the stock options.

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)***Restricted Stock*

The Company issued 90,047 shares of restricted stock during 2005. During 2005 there were no forfeitures or vesting. A summary of changes in the non-vested restricted shares at December 31, 2006, is presented below:

	Number of Non-vested Shares	Weighted Average Grant-Date Fair Value
	<u> </u>	<u> </u>
Non-vested restricted shares as of December 31, 2005	90,047	\$ 147.42
Granted	18,252	146.00
Vested	(27,703)	147.42
Forfeited	(9,559)	147.94
	<u> </u>	<u> </u>
Non-vested restricted shares as of December 31, 2006	71,037	\$ 146.99

The fair value of the restricted shares that vested during 2006 at their vesting date was \$3.8 million. As of December 31, 2006, there was \$5.4 million of unrecognized compensation expense related to non-vested restricted shares. The expense is expected to be recognized over a weighted average period of 2.3 years.

10. Commitments and Contingencies

During the three years ended December 31, 2006, the Company maintained a defined contribution retirement plan for its employees and makes discretionary contributions to the plan based on a percentage of eligible employees compensation, excluding bonuses. During 2004, 2005 and 2006, contributions to the plan were 5% of eligible employees compensation, excluding bonuses. Expense for the years ended December 31, 2004, 2005 and 2006, was \$431,000, \$663,000 and \$790,000, respectively.

The Company and other affiliated companies participate in a self-insurance pool (the Pool) covering health and workers compensation claims made by employees up to the first \$100,000 and \$250,000, respectively, per claim. Any amounts paid above these are reinsured through third-party providers. Allocations between the Company and other affiliated companies are based on estimated costs per employee of the Pool. Beginning with 2007, the Company will be segregated from the affiliates at the same limits described above. The Company accrues for claims that have been incurred but not yet reported based on a review of claims filed versus expected claims based on claims history. At December 31, 2005 and 2006 the accrued liability for health claims was \$238,000 and \$629,000, respectively.

Property and general liability insurance is maintained through third-party providers with a \$250,000 deductible on each policy. In combination with excess liability coverage the Company has insurance up to \$35 million in place. The Company had no pending claims at December 31, 2006.

The Company is involved in various legal proceedings in the normal course of business, none of which, in the opinion of management, will have a material adverse effect on the financial position or results of operations of the Company. As of December 31, 2005 and 2006, the Company has provided a reserve of \$520,000 and \$670,000, respectively, for various matters none of which are believed to be individually significant.

Due to the nature of the oil and gas business, the Company is exposed to possible environmental risks. The Company is not aware of any material environmental issues or claims.

Continental Resources, Inc. and Subsidiary

Notes to Consolidated Financial Statements (continued)

11. Related Party Transactions

The Company currently markets a portion of its natural gas sales to an affiliate. Previously, the Company marketed a portion of its oil sales to an affiliate. During the years ended December 31, 2004, 2005, and 2006, these sales were approximately \$19.0 million, \$108.9 million, and \$94.3 million. The Company also contracts for field services such as compression and drilling rig services and purchases residue fuel gas and reclaimed oil from certain affiliates. Production expense attributable to these affiliates was \$7.0 million, \$13.0 million and \$17.2 million for the years ended December 31, 2004, 2005 and 2006, respectively. The total amount paid to these companies, a portion of which was billed to other interest owners, was approximately \$23.4 million, \$38.6 million and \$52.9 million during the years ended December 31, 2004, 2005 and 2006, respectively. At December 31, 2005 and 2006, approximately \$42.1 million and \$7.7 million was due from affiliates and approximately \$3.1 million and \$13.7 million was due to affiliates, respectively.

Affiliates of the Company, owned by the Company's principal shareholder and in one instance by an officer of the Company, also own working and royalty interests in wells operated by the Company. The Company paid revenues, including royalties, of approximately \$1.8 million, \$5.6 million, and \$7.9 million and billed expenses of \$1.4 million, \$4.2 million, and \$5.2 million during the years ended December 31, 2004, 2005, and 2006 to these affiliates and this officer.

The Company leases office space under operating leases from a company owned by the Company's principal shareholder. Rents paid associated with these leases totaled approximately \$506,000, \$556,000 and \$638,000 for the years ended December 31, 2004, 2005 and 2006, respectively. The term of these leases is through February 2008 at an annual rate of approximately \$673,000.

On November 22, 2004, the Company entered into a subordinated note with the principal shareholder, which required the Company to make quarterly interest payments beginning December 31, 2004. Interest paid during 2004 and 2005 was \$308,000 and \$2.9 million, respectively. During 2005, the principal shareholder forgave \$2.0 million of this note and a contribution to paid-in capital was recorded. The outstanding balance of \$48.0 million was paid on December 27, 2005. (Note 3).

12. Oil and Gas Property Information

The following table sets forth the Company's results of operations from oil and natural gas producing activities for the years ended December 31, 2004, 2005 and 2006 (in thousands):

December 31,

	<u>2004</u>	<u>2005</u>	<u>2006</u>
Oil and gas sales	\$ 181,435	\$ 361,833	\$ 468,602
Production expense and tax	(56,051)	(68,785)	(85,196)
Exploration expense	(12,633)	(5,231)	(19,738)
Accretion of asset retirement obligation	(1,029)	(1,596)	(1,680)
Depreciation, depletion and amortization	(36,193)	(46,829)	(62,130)
Property impairments	(11,747)	(6,930)	(11,751)
	<u> </u>	<u> </u>	<u> </u>
Results from oil and gas producing activities	\$ 63,782	\$ 232,462	\$ 288,107

F-24

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

	December 31,		
	2004	2005	2006
Pro forma presentation for income tax (unaudited)			
Results from oil and gas producing activities before pro forma income tax	\$ 63,782	\$ 232,462	\$ 288,107
Pro forma income tax	(24,237)	(88,336)	(109,481)
Results from oil and gas producing activities after pro forma income tax	\$ 39,545	\$ 144,126	\$ 178,626

Costs incurred in oil and gas activities

Costs incurred, both capitalized and expensed, in connection with the Company's oil and gas acquisition, exploration and development activities for the three years ended December 31, 2004, 2005 and 2006 are shown below (in thousands).

	2004	2005	2006
Property acquisition costs:			
Proved	\$ 756	\$ 2,267	\$ 6,564
Unproved	11,700	14,496	29,970
Total property acquisition costs	12,456	16,763	36,534
Exploration costs	30,867	9,289	68,686
Development costs	53,036	117,837	221,286
Total	\$ 96,359	\$ 143,889	\$ 326,506

Exploration costs above include asset retirement costs of \$244,000, \$305,000 and \$214,000 and development costs above include asset retirement costs of \$6,998,000, \$726,000 and \$6,658,000 for the years 2004, 2005 and 2006, respectively.

Aggregate capitalized costs

Aggregate capitalized costs relating to the Company's oil and gas producing activities, and related accumulated depreciation, depletion and amortization, as of December 31, 2005 and 2006 are as follows (in thousands):

	<u>2005</u>	<u>2006</u>
Proved oil and gas properties	\$ 753,841	\$ 1,032,108
Unproved oil and gas properties	32,785	57,309
	<u>786,626</u>	<u>1,089,417</u>
Total	786,626	1,089,417
Less-accumulated DD&A	(283,036)	(349,192)
	<u>503,590</u>	<u>740,225</u>
Net capitalized costs	\$ 503,590	\$ 740,225

Under the successful efforts method of accounting, the costs of drilling an exploratory well are capitalized pending determination of whether proved reserves can be attributed to the discovery. When initial drilling operations are complete, management determines whether the well has discovered oil and gas reserves and, if so, whether those reserves can be classified as proved. Often, the determination of whether proved reserves can be recorded under strict Securities and Exchange Commission (SEC) guidelines cannot be made when drilling is completed. In those situations where management believes that commercial hydrocarbons have not been discovered, the exploratory drilling costs are reflected in the Consolidated Statement of Income as dry hole costs

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

(a component of exploration expense). Where sufficient hydrocarbons have been discovered to justify further exploration or appraisal activities, exploratory drilling costs are deferred on the Consolidated Balance Sheet pending the outcome of those activities.

At the end of each quarter, operating and financial management review the status of all deferred exploratory drilling costs in light of ongoing exploration activities in particular, whether the Company is making sufficient progress in its ongoing exploration and appraisal efforts. If management determines that future appraisal drilling or development activities are not likely to occur, any associated exploratory well costs are expensed in that period.

The following table presents the amount of capitalized exploratory drilling costs pending evaluation at December 31 for each of the last three years and changes in those amounts during the years then ended (in thousands):

	<u>2004</u>	<u>2005</u>	<u>2006</u>
Balance, January 1	\$ 814	\$ 3,237	\$ 1,874
Additions to capitalized exploratory well costs pending determination of proved reserves	30,024	8,984	65,721
Reclassification to proved oil and gas properties based on the determination of proved reserves	(18,112)	(8,915)	(44,203)
Capitalized exploratory well costs charged to expense	(9,489)	(1,432)	(13,343)
	<u> </u>	<u> </u>	<u> </u>
Balance, December 31	\$ 3,237	\$ 1,874	\$ 10,049
	<u> </u>	<u> </u>	<u> </u>
Number of projects	2	13	26

13. Supplemental Oil and Gas Information (Unaudited)

The following table shows estimates of proved reserves prepared by the Company's technical staff and independent external reserve engineers in accordance with SEC definitions. Ryder Scott Company prepared reserve estimates for properties comprising 83% of the Company's standardized measure of discounted future net cash flows as of December 31, 2004, 2005 and 2006. Remaining reserve estimates were prepared by the Company's technical staff. Substantially all reserves stated here are located in the United States of America.

Proved reserves are estimated quantities of crude oil and natural gas which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

There are numerous uncertainties inherent in estimating quantities of proved oil and natural gas reserves. Oil and natural gas reserve engineering is a subjective process of estimating underground accumulations of oil and natural gas that cannot be precisely measured, and estimates of engineers other than the Company's might differ materially from the estimates set forth herein. The accuracy of any reserve estimate is a function of the quality of available data and of engineering and geological interpretation and judgment. Results of drilling, testing and production subsequent to the date of the estimate may justify revision of such estimate. Accordingly, reserve estimates are often different from the quantities of oil and gas that are ultimately recovered.

Gas imbalance receivables and liabilities for each of the three years ended December 31, 2004, 2005 and 2006, were not material and have not been included in the reserve estimates.

F-26

Notes to Consolidated Financial Statements (continued)

Proved oil and gas reserves

	Natural Gas	Crude Oil
	(MMcf)	(MBbls)
Proved reserves as of December 31, 2003	67,096	73,000
Revisions of previous estimates	1,257	3,172
Extensions, discoveries and other additions	554	7,918
Production	(8,794)	(3,688)
Sale of minerals in place		
Purchase of minerals in place	507	200
Proved reserves as of December 31, 2004	60,620	80,602
Revisions of previous estimates	1,431	1,653
Extensions, discoveries and other additions	54,823	23,290
Production	(9,006)	(5,708)
Sale of minerals in place		(1,292)
Purchase of minerals in place	250	100
Proved reserves as of December 31, 2005	108,118	98,645
Revisions of previous estimates	(307)	416
Extensions, discoveries and other additions	23,235	6,111
Production	(9,225)	(7,480)
Sale of minerals in place		
Purchase of minerals in place	44	346
Proved reserves as of December 31, 2006	121,865	98,038

The following reserve information sets forth the estimated quantities of proved developed and proved undeveloped oil and natural gas reserves of the Company as of December 31, 2004, 2005 and 2006:

Proved Developed Reserves	Natural Gas (MMcf)	Crude Oil (MBbls)	Oil Equivalent (MBoe)
December 31, 2004	56,733	65,594	75,050
December 31, 2005	54,257	71,259	80,302
December 31, 2006	70,420	75,336	87,073

Proved Undeveloped Reserves

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

	Natural Gas (MMcf)	Crude Oil (MBbls)	Oil Equivalent (MBoe)
December 31, 2004	3,887	15,008	15,656
December 31, 2005	53,861	27,386	36,363
December 31, 2006	51,445	22,702	31,276

Proved developed reserves are proved reserves expected to be recovered through existing wells with existing equipment and operating methods. Proved undeveloped reserves are proved reserves that require incremental capital expenditures to recover. Natural gas is converted to barrels of oil equivalent using a conversion factor of six thousand cubic feet per barrel.

F-27

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

Standardized measure of discounted future net cash flows relating to proved oil and gas reserves

The standardized measure of discounted future net cash flows presented in the following table was computed using year-end prices and costs and a 10% discount factor. However, the Company cautions that actual future net cash flows may vary considerably from these estimates. Although the Company's estimates of total proved reserves, development costs and production rates were based on the best available information, the development and production of the oil and gas reserves may not occur in the periods assumed. Actual prices realized, costs incurred and production quantities may vary significantly from those used. Therefore, such estimated future net cash flows computations should not be considered to represent the Company's estimate of the expected revenues or the current value of existing proved reserves.

	December 31,		
	2004	2005	2006
	(in thousands)		
Historical			
Future cash inflows	\$ 3,562,595	\$ 6,332,258	\$ 5,244,078
Future production costs	(1,280,180)	(1,808,654)	(1,763,573)
Future development and abandonment costs	(113,390)	(434,249)	(466,057)
Future net cash flows	2,169,025	4,089,355	3,014,448
10% annual discount for estimated timing of cash flows	(1,054,705)	(1,884,980)	(1,429,976)
Standardized measure of discounted future net cash flows	\$ 1,114,320	\$ 2,204,375	\$ 1,584,472
Pro forma for income tax			
Future cash inflows	\$ 3,562,595	\$ 6,332,258	\$ 5,244,078
Future production costs	(1,280,180)	(1,808,654)	(1,763,573)
Future development and abandonment costs	(113,390)	(434,249)	(466,057)
Future income taxes	(775,620)	(1,497,230)	(1,061,163)
Future net cash flows pro forma for income taxes	1,393,405	2,592,125	1,953,285
10% annual discount for estimated timing of cash flows	(677,450)	(1,194,834)	(926,588)
Standardized measure of discounted future net cash flows	\$ 715,955	\$ 1,397,291	\$ 1,026,697

The year-end weighted average oil price utilized in the computation of future cash inflows was \$40.46, \$55.87, and \$47.85 per barrel at December 31, 2004, 2005 and 2006, respectively. The year-end weighted average natural gas price utilized in the computation of future cash inflows was \$4.97, \$7.60, and \$4.54 per Mcf at December 31, 2004, 2005 and 2006, respectively. Future cash flows are reduced by estimated future costs to develop and to produce the proved reserves, as well as certain abandonment costs, based on year-end cost estimates assuming continuation of existing economic conditions.

Table of ContentsIndex to Financial Statements**Continental Resources, Inc. and Subsidiary****Notes to Consolidated Financial Statements (continued)**

Income taxes were not computed at December 31, 2004, 2005 or 2006, as the Company elected S-corporation status effective June 1, 1997. The changes in the aggregate standardized measure of discounted future net cash flows attributable to the Company's proved oil and gas reserves are presented below for each of the past three years (in thousands):

	<u>2004</u>	<u>2005</u>	<u>2006</u>
Standardized measure of discounted future net cash flows at the beginning of the year	\$ 815,224	\$ 1,114,320	\$ 2,204,375

Revisions of previous quantity estimates	57,525	43,338	5,455
Changes in estimated future development and abandonment costs	(44,323)	(317,286)	(139,623)
Purchase (sales) of minerals in place	1,311	(8,714)	5,953
Net changes in prices and production costs	210,323	870,255	(520,756)
Accretion of discount	81,522	111,432	220,438
Sales of oil and gas produced, net of production costs	(125,850)	(287,817)	(383,405)
Development costs incurred during the period	12,604	48,894	123,971
Change in timing of estimated future production, and other	(2,650)	63,095	(70,055)
	<u>299,096</u>	<u>1,090,055</u>	<u>(619,903)</u>
Standardized measure of discounted future net cash flows at the end of the year	\$ 1,114,320	\$ 2,204,375	\$ 1,584,472

14. Recent Events (Unaudited)

Concurrent with a proposed initial public offering, the Company will convert from a subchapter S-corporation to a subchapter C-corporation. In connection with this conversion, a charge to earnings (estimated to be \$175.7 million if the conversion occurred as of December 31, 2006) will be recorded to recognize deferred taxes.

On January 10, 2007, the Company declared cash dividends of approximately \$18.8 million to its shareholders for tax purposes and, subject to forfeiture, to holders of unvested restricted stock. Of this amount, \$124,000 was charged to compensation expense related to its restricted stock liability. On January 31, 2007, the Company paid \$18.7 million of the dividends declared. The unpaid balance of \$86,000 relates to unvested restricted stock and is accrued and will be paid as the restricted stock vests.

On March 6, 2007 the Company declared a cash dividend of approximately \$33.3 million payable in April 2007 to its shareholders of record as of March 15, 2007, for tax purposes and, subject to forfeiture, to holders of unvested restricted stock.

Table of Contents

Glossary of Oil and Natural Gas Terms

The terms defined in this section are used throughout this prospectus:

Bbl. One stock tank barrel, of 42 U.S. gallons liquid volume, used herein in reference to crude oil, condensate or natural gas liquids.

Bcf. One billion cubic feet of natural gas.

Boe. Barrels of oil equivalent, with six thousand cubic feet of natural gas being equivalent to one barrel of oil.

British thermal unit. The heat required to raise the temperature of a one-pound mass of water from 58.5 to 59.5 degrees Fahrenheit.

Basin. A large natural depression on the earth's surface in which sediments generally brought by water accumulate.

Completion. The process of treating a drilled well followed by the installation of permanent equipment for the production of natural gas or oil, or in the case of a dry hole, the reporting of abandonment to the appropriate agency.

Developed acreage. The number of acres that are allocated or assignable to productive wells or wells capable of production.

Development well. A well drilled within the proved area of a natural gas or oil reservoir to the depth of a stratigraphic horizon known to be productive.

Dry hole. A well found to be incapable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of such production exceed production expenses and taxes.

Enhanced recovery. The recovery of oil and natural gas through the injection of liquids or gases into the reservoir, supplementing its natural energy. Enhanced recovery methods are often applied when production slows due to depletion of the natural pressure.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Environmental Assessment (EA). An environmental assessment, a study that can be required pursuant to federal law to assess the potential direct, indirect and cumulative impacts of a project.

Environmental Impact Statement (EIS). An environmental impact statement, a more detailed study that can be required pursuant to federal law of the potential direct, indirect and cumulative impacts of a project that may be made available for public review and comment.

Exploratory well. A well drilled to find and produce natural gas or oil reserves not classified as proved, to find a new reservoir in a field previously found to be productive of natural gas or oil in another reservoir or to extend a known reservoir.

Field. An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature or stratigraphic condition. The field name refers to the surface area, although it may refer to both the surface and the underground productive formations.

Formation. A layer of rock which has distinct characteristics that differ from nearby rock.

Horizontal drilling. A drilling technique used in certain formations where a well is drilled vertically to a certain depth and then drilled at a right angle within a specified interval.

A-1

Table of Contents

Index to Financial Statements

Infill wells. Wells drilled into the same pool as known producing wells so that oil or natural gas does not have to travel as far through the formation.

MBbl. One thousand barrels of crude oil, condensate or natural gas liquids.

Mcf. One thousand cubic feet of natural gas.

MMBbl. One million barrels of crude oil, condensate or natural gas liquids.

MMBoe. One million Boe.

MMBtu. One million British thermal units.

MMcf. One million cubic feet of natural gas.

NYMEX. The New York Mercantile Exchange.

Net acres. The percentage of total acres an owner has out of a particular number of acres, or a specified tract. An owner who has 50% interest in 100 acres owns 50 net acres.

Overpressured. A subsurface formation that exerts an abnormally high formation pressure on a wellbore drilled into it.

PUD. Proved undeveloped.

PV-10. When used with respect to oil and natural gas reserves, PV-10 means the estimated future gross revenue to be generated from the production of proved reserves, net of estimated production and future development and abandonment costs, using prices and costs in effect at the determination date, before income taxes, and without giving effect to non-property-related expenses, discounted to a present value using an annual discount rate of 10% in accordance with the guidelines of the SEC. PV-10 is a non-GAAP financial measure. However, our PV-10 and our standardized measure of discounted future net cash flows (the most directly comparable measure calculated and presented in accordance with GAAP) are equivalent because we are a subchapter S-corporation until the closing date of this offering.

Primary recovery. The period of production in which oil moves from its reservoir through the wellbore under naturally occurring reservoir pressure.

Productive well. A well that is found to be capable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of the production exceed production expenses and taxes.

Proved developed reserves. Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

Proved reserves. The estimated quantities of oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be commercially recoverable in future years from known reservoirs under existing economic and operating conditions.

Proved undeveloped reserves (PUD). Proved reserves that are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion.

Recompletion. The process of re-entering an existing wellbore that is either producing or not producing and completing new reservoirs in an attempt to establish or increase existing production.

Reservoir. A porous and permeable underground formation containing a natural accumulation of producible natural gas and/or oil that is confined by impermeable rock or water barriers and is separate from other reservoirs.

Table of Contents

Index to Financial Statements

Spacing. The distance between wells producing from the same reservoir. Spacing is often expressed in terms of acres, e.g., 40-acre spacing, and is often established by regulatory agencies.

Standardized Measure. Discounted future net cash flows estimated by applying year-end prices to the estimated future production of year-end proved reserves. Future cash inflows are reduced by estimated future production and development costs based on period-end costs to determine pre-tax cash inflows. Future income taxes, if applicable, are computed by applying the statutory tax rate to the excess of pre-tax cash inflows over our tax basis in the oil and gas properties. Future net cash inflows after income taxes are discounted using a 10% annual discount rate.

Unit. The joining of all or substantially all interests in a reservoir or field, rather than a single tract, to provide for development and operation without regard to separate property interests. Also, the area covered by a unitization agreement.

Waterflood. The injection of water into an oil reservoir to push additional oil out of the reservoir rock and into the wellbores of producing wells. Typically an enhanced recovery process.

Wellbore. The hole drilled by the bit that is equipped for oil or gas production on a completed well. Also called well or borehole.

Working interest. The right granted to the lessee of a property to explore for and to produce and own oil, gas, or other minerals. The working interest owners bear the exploration, development, and operating costs on either a cash, penalty, or carried basis.

Table of Contents**Index to Financial Statements**

February 19, 2007

Continental Resources, Inc.

302 North Independence

Enid, Oklahoma 73702

Gentlemen:

At your request we have prepared an estimate of the proved reserves and future production and income attributable to certain leasehold interests of Continental Resources, Inc. as of December 31, 2006. The properties evaluated by Ryder Scott Company, L. P. (Ryder Scott) were selected by Continental Resources, and account for approximately 82.9 percent of the future net income discounted at 10 percent attributable to the proved reserves as of December 31, 2006. The income data have been estimated using the Securities and Exchange Commission (SEC) guidelines for future cost and price parameters.

The estimated reserve quantities and future income quantities presented in this report are related to hydrocarbon prices. December 31, 2006 hydrocarbon prices were used in the preparation of this report; however, actual future prices may vary significantly from December 31, 2006 prices due to a combination of economic and political forces. Therefore, quantities of reserves actually recovered and quantities of income actually received may differ significantly from the estimated quantities presented in this report. The results are summarized as follows:

SEC PARAMETERS

Estimated Proved Net Reserve and Income Data

Certain Leasehold Interests of

Continental Resources, Inc.*As of December 31, 2006*

Evaluated by Ryder Scott	86,682	70,226	\$ 2,499,633	\$ 1,313,670

Edgar Filing: CONTINENTAL RESOURCES INC - Form 424B1

Evaluated by				
Continental Resources	11,356	51,639	\$ 514,815	\$ 270,802
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total Proved Reserves	98,038	121,865	\$ 3,014,448	\$ 1,584,472

* Ryder Scott has not reviewed the reserves and cashflow projections for those properties evaluated by Continental Resources, Inc. Ryder Scott has included these values at the request of Continental Resources, Inc. and expresses no opinion as to the reasonableness of these values.

** From TRC Consultants : PhdWin Decline Analysis

Liquid hydrocarbons are expressed in standard 1000 barrels. All gas volumes are sales gas expressed in millions of cubic feet (MMCF) at the official temperature and pressure bases of the areas where the gas reserves are located. No attempt has been made to quantify or otherwise account for any accumulated gas production imbalances that may exist.

Table of Contents

Index to Financial Statements

Reserves Included in This Report

The *proved reserves* included herein conform to the definition as set forth in the Securities and Exchange Commission's Regulation S-X Part 210.4-10 (a) as clarified by subsequent Commission Staff Accounting Bulletins.

Estimates of Reserves

In general, the reserves included herein were estimated by performance methods or the volumetric method; however, other methods were used in certain cases where characteristics of the data indicated such other methods were more appropriate in our opinion. The reserves estimated by the performance method utilized extrapolations of various historical data in those cases where such data were definitive. Reserves were estimated by the volumetric method in those cases where there were inadequate historical performance data to establish a definitive trend or where the use of production performance data as a basis for the reserve estimates was considered to be inappropriate.

The reserves included in this report are estimates only and should not be construed as being exact quantities. They may or may not be actually recovered, and if recovered, the revenues therefrom and the actual costs related thereto could be more or less than the estimated amounts. Moreover, estimates of reserves may increase or decrease as a result of future operations.

Projection Rates

Initial production rates are based on the current producing rates for those reservoirs now on production. Test data and other related information was used to estimate the anticipated initial production rates for those wells or locations, which are not currently producing. If no production decline trend has been established, future production rates were held constant, or adjusted for the effects of curtailment where appropriate, until a decline in ability to produce was anticipated. The future anticipated decline was then applied to depletion of the reserves. If a decline trend has been established, this trend was used as the basis for estimating future production rates. For reserves not yet on production, sales were projected to commence at an anticipated date of delivery, which was furnished by Continental Resources, Inc.

The future production rates from reservoirs now on production may be more or less than estimated because of changes in market demand or allowables set by regulatory bodies. Wells or locations, which are not currently producing, may start producing earlier or later than anticipated in our estimates of their future production rates.

Hydrocarbon Prices

Continental Resources, Inc. has utilized hydrocarbon prices in effect at December 29, 2006, the crude oil price was \$61.05 per barrel and the spot gas price was \$6.30 per MMBTU. Product prices, which were actually used for each property, reflect adjustment from the above stated

prices for gravity, quality, local conditions, and/or distance from market. These prices were held constant to depletion of the properties. In accordance with Securities and Exchange Commission guidelines, changes in hydrocarbon prices subsequent to December 29, 2006 were not considered in this report. Ryder Scott has not performed a detailed study of the product prices and makes no warranty for the product prices utilized in this report.

Costs

Continental Resources, Inc supplied operating costs for the leases and wells in this report. When applicable, the operating costs include a portion of general and administrative costs allocated directly to the leases and wells

B-2

Table of Contents

Index to Financial Statements

under terms of operating agreements. Development costs were furnished by Continental Resources, Inc. and are based on authorizations for expenditure for the proposed work or actual costs for similar projects. The current operating and development costs were held constant throughout the life of the properties. Continental Resources, Inc. has used an estimate of zero abandonment costs after salvage value for all properties in this report. Ryder Scott has not performed a detailed study of the operating and development costs and makes no warranty for the costs utilized in this report.

General

Ryder Scott Company performed the reserve analysis and generated the projection of future production presented in this report. However, at the request of Continental Resources, Inc., the economic analyses were performed using TRC Consultants' PhdWin Decline Analysis. Ryder Scott Company, L. P. has made every attempt to confirm that the values used for scheduling production were correct. However, the internal calculations of this program were accepted without verification. In addition, Ryder Scott Company has accepted the ownership interests; costs and prices supplied by Continental Resources, Inc. as correct and have not attempted to verify those values. Ryder Scott Company has not attempted to verify the accuracy of the economic output from TRC Consultants' PhdWin Decline Analysis.

As prepared by Continental Resources, Inc., the tables presented in this report are generated by TRC Consultants' PhdWin Decline Analysis and are located behind the Appendix tab. The summary report contains individual tables of estimated production and income by year beginning January 1, 2007 by reserve category for the properties evaluated by Ryder Scott. These tables are located behind the tab titled Grand Summary Projections. A one-line summary of net reserves and income data for each of the subject properties is presented behind the tab titled One-Line Summaries. A one-line summary of reserves and income data ranked by BTAX cashflow discounted at 10 percent is behind the Property Ranking tab.

While it may reasonably be anticipated that the prices received by Continental Resources, Inc. for the sale of its production may be higher or lower than the prices used in this evaluation as described above, and the operating costs relating to such production may also increase above existing levels, such increases or decreases in prices and costs were, in accordance with rules adopted by the SEC, omitted from consideration in making this evaluation.

The reserve estimates presented herein are based upon a detailed study of the top valued properties in which Continental Resources, Inc. owns an interest; however, we have not made any field examination of the properties. Continental Resources, Inc. has informed us that they have furnished us all of the accounts, records, geological and engineering data and reports and other data required for this investigation. The production data, ownership interests, prices, costs and other factual information furnished to Ryder Scott Company, L. P. by Continental Resources, Inc. in connection with this investigation were accepted without independent verification.

Neither Ryder Scott Company, L. P., nor any of its employees has any interest in the subject properties and neither the employment to make this study nor the compensation is contingent on our estimates of reserves and future income for the subject properties.

You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information different from that contained in this prospectus. We and the selling shareholder are offering to sell, and seeking offers to buy, shares of common stock only in jurisdictions where offers and sales are permitted. The information contained in this prospectus is accurate only as of the date of this prospectus, regardless of the time of delivery of this prospectus or of any sale of our common stock.

No action is being taken in any jurisdiction outside the United States to permit a public offering of the common stock or possession or distribution of this prospectus in that jurisdiction. Persons who come into possession of this prospectus in jurisdictions outside the United States are required to inform themselves about and to observe any restrictions as to this offering and the distribution of this prospectus applicable to that jurisdiction.

Until June 8, 2007, all dealers that buy, sell or trade in our common stock, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.
