PART I

ITEM 1. BUSINESS

General

UMB Financial Corporation (the Company) was organized as a corporation in 1967 under Missouri law for the purpose of becoming a bank holding company registered under the Bank Holding Company Act of 1956 (BHCA). In 2001, the Company elected to become a financial holding company under the Gramm-Leach-Bliley Act of 1999 (GLB Act). The Company owns all of the outstanding stock of four commercial banks, a brokerage company, a community development corporation, a consulting company, a mutual fund servicing company and fourteen other subsidiaries.

The four commercial banks are engaged in general commercial banking business entirely in domestic markets. One of the banks is in Missouri, one bank in Kansas, one bank in Colorado, and one bank in Arizona. The principal subsidiary bank, UMB Bank, n.a., whose principal office is in Missouri, also has branches in Illinois, Kansas, Nebraska and Oklahoma. The banks offer a full range of banking services to commercial, retail, government and correspondent bank customers. In addition to standard banking functions, the principal subsidiary bank, UMB Bank, n.a., provides international banking services, investment and cash management services, data processing services for correspondent banks and a full range of trust activities for individuals, estates, business corporations, governmental bodies and public authorities.

The table below sets forth the names and locations of the Company's affiliate banks, as well as their respective total assets, total loans, deposits and shareholders' equity as of December 31, 2007.

UMB Fund Services, Inc. located in Milwaukee, Wisconsin and Media, Pennsylvania, provides services to nearly 35 mutual fund groups representing approximately 140 funds and administrative and support services for a growing number of alternative investment products.

On a full-time equivalent basis at December 31, 2007, the Company and its subsidiaries employed 3,357 persons.

Segment Information. Financial information regarding the Company's six segments is included in Note 13 to the Consolidated Financial Statements provided in Item 8, pages 74 through 77 of this report.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Competition. The Company faces intense competition from hundreds of financial service providers in the markets served. The Company competes with other traditional and non-traditional financial service providers including banks, thrifts, finance companies, mutual funds, mortgage banking companies, brokerage companies, insurance companies, and credit unions. Customers for banking services and other financial services offered by the Company are generally influenced by convenience of location, quality of service, personal contact, price of services and availability of products. The impact from competition is critical not only to pricing, but also to

Table of Contents

transaction execution, products and services offered, innovation and reputation. Within the Kansas City banking market, the Company ranks third based on the amount of deposits at June 30, 2007, the most recent date for which deposit information is available from the Federal Deposit Insurance Corporation (FDIC). At June 30, 2007, the Company had 7.5 percent of the deposits in the Kansas City metropolitan area, compared to 9.2 percent at June 30, 2006.

Monetary Policy and Economic Conditions. The operations of the Company's affiliate banks are affected by general economic conditions, as well as the monetary policy of the Board of Governors of the Federal Reserve System (the Federal Reserve Board or FRB), which affects interest rates and the supply of money available to commercial banks. Monetary policy measures by the FRB are effected through open market operations in U.S. government securities, changes in the discount rate on bank borrowings and changes in reserve requirements.

Supervision and Regulation. As a bank holding company and a financial holding company, the Company (and its subsidiaries) are subject to extensive regulation and are affected by numerous federal and state laws and regulations.

Supervision. The Company is subject to regulation and examination by the FRB. Its four subsidiary banks are subject to regulation and examination by the Office of the Comptroller of the Currency (OCC). UMB Scout Insurance Services, Inc. is regulated by state agencies in the states in which it operates. Scout Investment Advisors and UMB Fund Services are subject to the rules and regulations of the Securities and Exchange Commission (SEC) and the Financial Industry Regulatory Authority (FINRA) because of the UMB Scout Funds and the servicing of other mutual fund groups and alternative investment products. The FRB possesses cease and desist powers over bank holding companies if their actions represent unsafe or unsound practices or violations of law. In addition, the FRB is empowered to impose civil monetary penalties for violations of banking statutes and regulations. Regulation by the FRB is intended to protect depositors of the Company's banks, not the Company's shareholders. The Company is subject to a number of restrictions and requirements imposed by the Sarbanes-Oxley Act of 2002 relating to internal controls over financial reporting, disclosure controls and procedures, loans to directors or executive officers of the Company and its subsidiaries, the preparation and certification of the Company's consolidated financial statements, the duties of the Company's audit committee, relations with and functions performed by the Company's independent auditors, and various accounting and corporate governance matters. The Company's brokerage affiliate, UMB Financial Services, Inc., is regulated by the SEC, the Financial Industry Regulatory Authority (FINRA), and the Missouri Division of Securities; it is also subject to certain regulations of the various states in which it transacts business. It is subject to regulations covering all aspects of the securities business, including sales methods, trade practices among broker/dealers, capital structure of securities firms, uses and safekeeping of customers' funds and securities, recordkeeping, and the conduct of directors, officers and employees. The SEC and the self-regulatory organizations to which it has delegated certain regulatory authority may conduct administrative proceedings that can result in censure, fines, suspension or expulsion of a broker/dealer, its directors, officers and employees. The principal purpose of regulation of securities broker/dealers is the protection of customers and the securities market, rather than the protection of stockholders of broker/dealers.

Limitation on Acquisitions and Activities. The Company is subject to the Bank Holding Company Act (BHCA), which requires the Company to obtain the prior approval of the Federal Reserve Board to (i) acquire substantially all the assets of any bank, (ii) acquire more than 5% of any class of voting stock of a bank or bank holding company which is not already majority owned, or (iii) merge or consolidate with another bank holding company. The BHCA also imposes significant limitations on the scope and type of activities in which the Company and its subsidiaries may engage. The activities of bank holding companies are generally limited to the business of banking, managing or controlling banks, and other activities that the FRB has determined to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. In addition, under the GLB Act, a bank holding company, all of whose controlled depository institutions are well-capitalized and well-managed (as defined in federal banking regulations) and which obtains satisfactory Community Reinvestment Act (CRA) ratings, may declare itself to be a financial holding company and engage in a broader range of activities.

Table of Contents

A financial holding company may affiliate with securities firms and insurance companies and engage in other activities that are financial in nature or incidental or complementary to activities that are financial in nature. Financial in nature activities include:

securities underwriting, dealing and market making;

sponsoring mutual funds and investment companies;

insurance underwriting and insurance agency activities;

merchant banking; and

activities that the FRB determines to be financial in nature or incidental to a financial activity, or which are complementary to a financial activity and do not pose a safety and soundness risk.

A financial holding company that desires to engage in activities that are financial in nature or incidental to a financial activity but not previously authorized by the FRB must obtain approval from the FRB before engaging in such activity. Also, a financial holding company may seek FRB approval to engage in an activity that is complementary to a financial activity if it shows that the activity does not pose a substantial risk to the safety and soundness of insured depository institutions or the financial system. Under the GLB Act, subsidiaries of financial holding companies engaged in non-bank activities are supervised and regulated by the federal and state agencies which normally supervise and regulate such functions outside of the financial holding company context.

A financial holding company may acquire a company (other than a bank holding company, bank or savings association) engaged in activities that are financial in nature or incidental to activities that are financial in nature without prior approval from the FRB. Prior FRB approval is required, however, before the financial holding company may acquire control of more than 5% of the voting shares or substantially all of the assets of a bank holding company, bank or savings association. In addition, under the FRB's merchant banking regulations, a financial holding company is authorized to invest in companies that engage in activities that are not financial in nature, as long as the financial holding company makes its investment with the intention of limiting the duration of the investment, does not manage the company on a day-to-day basis, and the company does not cross market its products or services with any of the financial holding company's controlled depository institutions. If any subsidiary bank of a financial holding company receives a rating under the CRA of less than satisfactory, then the financial holding company is limited with respect to its engaging in new activities or acquiring other companies, until the rating is raised to at least satisfactory.

Other Regulatory Restrictions & Requirements. A bank holding company and its subsidiaries are prohibited from engaging in certain tie-in arrangements in connection with the extension of credit, with limited exceptions. There are also various legal restrictions on the extent to which a bank holding company and certain of its non-bank subsidiaries can borrow or otherwise obtain credit from its bank subsidiaries. The Company and its subsidiaries are also subject to certain restrictions on issuance, underwriting and distribution of securities. FRB policy requires a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. Under this source of strength doctrine, a bank holding company is expected to stand ready to use its available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity, and to maintain resources and the capacity to raise capital that it can commit to its subsidiary banks. Furthermore, the FRB has the right to order a bank holding company to terminate any activity that the FRB believes is a serious risk to the financial safety, soundness or stability of any subsidiary bank. Also, under cross-guaranty provisions of the Federal Deposit Insurance Act (FDIA), bank subsidiaries of a bank holding company are liable for any loss incurred by the FDIC insurance fund in connection with the failure of any other bank subsidiary of the bank holding company.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The Company's bank subsidiaries are subject to a number of laws regulating depository institutions, including the Federal Deposit Insurance Corporation Improvement Act of 1991, which expanded the regulatory and enforcement powers of the federal bank regulatory agencies. These laws require that such agencies prescribe

Table of Contents

standards relating to internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, and mandated annual examinations of banks by their primary regulators. The Company's bank subsidiaries are also subject to a number of consumer protection laws and regulations of general applicability, as well as the Bank Secrecy Act and USA Patriot Act, which is designed to identify, prevent and deter international money laundering and terrorist financing.

The rate of interest a bank may charge on certain classes of loans is limited by law. At certain times in the past, such limitations have resulted in reductions of net interest margins on certain classes of loans. Federal laws also impose additional restrictions on the lending activities of banks, including the amount that can be loaned to one borrower or related group.

All four of the commercial banks owned by the Company are national banks and are subject to supervision and examination by the OCC. In addition, the national banks are subject to examination by The Federal Reserve System. All such banks are members of, and subject to examination by, the FDIC.

Payment of dividends by the Company's affiliate banks to the Company is subject to various regulatory restrictions. For national banks, the OCC must approve the declaration of any dividends generally in excess of the sum of net income for that year and retained net income for the preceding two years. At December 31, 2007, approximately \$24,265,000 of the equity of the Company's bank and non-bank subsidiaries was available for distribution as dividends to the Company without prior regulatory approval or without reducing the capital of the respective banks below prudent levels.

Each of the Company's subsidiary banks are subject to the CRA and implementing regulations. CRA regulations establish the framework and criteria by which the bank regulatory agencies assess an institution's record of helping to meet the credit needs of its community, including low- and moderate-income neighborhoods. CRA ratings are taken into account by regulators in reviewing certain applications made by the Company and its bank subsidiaries.

Regulatory Capital Requirements Applicable to the Company. The FRB has promulgated capital adequacy guidelines for use in its examination and supervision of bank holding companies. If a bank holding company's capital falls below minimum required levels, then the bank holding company must implement a plan to increase its capital, and its ability to pay dividends and make acquisitions of new bank subsidiaries may be restricted or prohibited. The FRB's capital adequacy guidelines provide for the following types of capital:

Tier 1 capital, also referred to as core capital, calculated as:

common stockholders' equity;

plus, non-cumulative perpetual preferred stock and any related surplus;

plus, minority interests in the equity accounts of consolidated subsidiaries;

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

less, all intangible assets (other than certain mortgage servicing assets, non-mortgage servicing assets and purchased credit card relationships);

less, certain credit-enhanced interest-only strips and non-financial equity investments required to be deducted from capital; and

less, certain deferred tax assets.

Tier 2 capital, also referred to as supplementary capital, calculated as:

allowances for loan and lease losses (limited to 1.25% of risk-weighted assets);

plus, unrealized gains on certain equity securities (limited to 45% of pre-tax net unrealized gains);

Table of Contents

plus, cumulative perpetual and long-term preferred stock (original maturity of 20 years or more) and any related surplus;

plus, auction rate and similar preferred stock (both cumulative and non-cumulative);

plus, hybrid capital instruments (including mandatory convertible debt securities); and

plus, term subordinated debt and intermediate-term preferred stock with an original weighted average maturity of five years or more (limited to 50% of Tier 1 capital).

The maximum amount of supplementary capital that qualifies as Tier 2 capital is limited to 100% of Tier 1 capital.

Total capital, calculated as:

Tier 1 capital;

plus, qualifying Tier 2 capital;

less, investments in banking and finance subsidiaries that are not consolidated for regulatory capital purposes;

less, intentional, reciprocal cross-holdings of capital securities issued by banks; and

less, other deductions (such as investments in other subsidiaries and joint ventures) as determined by supervising authority.

The Company is required to maintain minimum amounts of capital to various categories of assets, as defined by the banking regulators. See Table 13 , Risk-Based Capital, on page 40 for additional detail on the computation of risk-based assets and the related capital ratios.

At December 31, 2007, the Company was required to have minimum Tier 1 capital, Total capital, and leverage ratios of 4.00%, 8.00%, and 4.00% respectively. The Company's actual ratios at that date were 13.74%, 14.58%, and 9.63%, respectively.

Regulatory Capital Requirements Applicable to the Company's Subsidiary Banks. In addition to the minimum capital requirements of the FRB applicable to the Company, there are separate minimum capital requirements applicable to its subsidiary national banks.

Federal banking laws classify an insured financial institution in one of the following five categories, depending upon the amount of its regulatory capital:

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

well-capitalized if it has a total Tier 1 leverage ratio of 5% or greater, a Tier 1 risk-based capital ratio of 6% or greater and a total risk-based capital ratio of 10% or greater (and is not subject to any order or written directive specifying any higher capital ratio);

adequately capitalized if it has a total Tier 1 leverage ratio of 4% or greater (or a Tier 1 leverage ratio of 3% or greater, if the bank has a CAMELS rating of 1), a Tier 1 risk-based capital ratio of 4% or greater, and a total risk-based capital ratio of 8% or greater;

undercapitalized if it has a total Tier 1 leverage ratio that is less than 4% (or a Tier 1 leverage ratio that is less than 3%, if the bank has a CAMELS rating of 1), a Tier 1 risk-based capital ratio that is less than 4% or a total risk-based capital ratio that is less than 8%;

significantly undercapitalized if it has a total Tier 1 leverage ratio that is less than 3%, a Tier 1 risk based capital ratio that is less than 3% or a total risk-based capital ratio that is less than 6%; and

critically undercapitalized if it has a Tier 1 leverage ratio that is equal to or less than 2%.

Federal banking laws require the federal regulatory agencies to take prompt corrective action against undercapitalized financial institutions. The Company's banks must be well-capitalized and well-managed in

Table of Contents

order for the Company to remain a financial holding company. The capital ratios and classifications for the Company and each of the Company's four banks as of December 31, 2007, are set forth below:

Bank	Total Tier 1 Leverage Ratio (5% or greater)	Tier 1 (6% or greater)	Total Risk-Based (10% or greater)
UMB Financial Corporation	9.63%	13.74%	14.58%
UMB Bank, n.a.	7.98%	11.33%	12.13%
UMB Bank Colorado, n.a.	12.17%	14.53%	15.73%
UMB National Bank of America, n.a.	10.28%	20.85%	21.41%
UMB Bank Arizona, n.a.	27.56%	19.46%	20.20%

The Company is required to maintain minimum balances with the FRB for each of its subsidiary banks, and no interest is paid by the FRB on such balances. These balances are calculated from reports filed with the respective FRB for each affiliate. At December 31, 2007, the Company held \$29,014,000 at the FRB.

Deposit Insurance and Assessments. The deposits of each of the Company's four subsidiary banks are insured by an insurance fund administered by the FDIC, in general up to a maximum of \$100,000 per insured deposit (\$250,000 for certain retirement plan deposits). Under federal banking regulations, insured banks are required to pay quarterly assessments to the FDIC for deposit insurance. The FDIC's risk-based assessment system requires members to pay varying assessment rates depending upon the level of the institution's capital and the degree of supervisory concern over the institution. As a result of the Federal Deposit Insurance Reform Act of 2005 (FDIRA) signed into law February 8, 2006; the FDIC assessment is now separated into two parts. The first part is the FDIC Insurance with rates ranging from five cents to 43 cents per \$100 of insured deposits. The second part is the assessment for the Financing Corporation (FICO) with assessment rates that range from zero cents to 27 cents per \$100 of insured deposits. The FDIRA also provided for a one time assessment credit that would be used to pay for the quarterly premiums until the credit is fully used. The Company's one time assessment credit was \$7.3 million, of which \$2.2 million was used for premiums assessed in 2007. As of December 31, 2007, the Company has a \$5.1 million assessment credit outstanding, which will be used to pay future premiums. The FDIC has authority to increase the annual assessment rate and there is no cap on the annual assessment rate which the FDIC may impose.

Limitations on Transactions with Affiliates. The Company and its non-bank subsidiaries are affiliates within the meaning of Sections 23A and 23B of the Federal Reserve Act (FRA). The amount of loans or extensions of credit which a bank may make to non-bank affiliates, or to third parties secured by securities or obligations of the non-bank affiliates, are substantially limited by the FRA and the FDIA. Such acts further restrict the range of permissible transactions between a bank and an affiliated company. A bank and subsidiaries of a bank may engage in certain transactions, including loans and purchases of assets, with an affiliated company only if the terms and conditions of the transaction, including credit standards, are substantially the same as, or at least as favorable to the bank as, those prevailing at the time for comparable transactions with non-affiliated companies or, in the absence of comparable transactions, on terms and conditions that would be offered to non-affiliated companies.

Other Banking Activities. The investments and activities of the Company's subsidiary banks are also subject to regulation by federal banking agencies, regarding investments in subsidiaries, investments for their own account (including limitations in investments in junk bonds and equity securities), loans to officers, directors and their affiliates, security requirements, anti-tying limitations, anti-money laundering, financial privacy and customer identity verification requirements, truth-in-lending, types of interest bearing deposit accounts offered, trust department operations, brokered deposits, audit requirements, issuance of securities, branching and mergers and acquisitions.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Fiscal & Monetary Policies. The Company's business and earnings are affected significantly by the fiscal and monetary policies of the federal government and its agencies. It is particularly affected by the policies of the

Table of Contents

FRB, which regulates the supply of money and credit in the United States. Among the instruments of monetary policy available to the FRB are: conducting open market operations in United States government securities; changing the discount rates of borrowings of depository institutions; imposing or changing reserve requirements against depository institutions' deposits; and imposing or changing reserve requirements against certain borrowings by banks and their affiliates. These methods are used in varying degrees and combinations to directly affect the availability of bank loans and deposits, as well as the interest rates charged on loans and paid on deposits. The policies of the FRB have a material effect on the Company's business, results of operations and financial condition.

Future Legislation. Various legislation, including proposals to change the financial institution regulatory system, is from time to time introduced in Congress. This legislation may change banking statutes and the Company's (and its subsidiaries') operating environment in substantial and unpredictable ways. If enacted, this legislation could increase or decrease the cost of doing business, limit or expand permissible activities, or affect the competitive balance among banks, savings associations, credit unions and other financial institutions. The Company cannot predict whether any of this potential legislation will be enacted and, if enacted, the effect that it, or any implementing regulations, could have on the business, results of operations or financial condition of the Company or its subsidiaries.

The references in the foregoing discussion to various aspects of statutes and regulations are merely summaries which do not purport to be complete and which are qualified in their entirety by reference to the actual statutes and regulations.

Statistical Disclosure. The information required by Guide 3, Statistical Disclosure by Bank Holding Companies, has been included in Items 6, 7, and 7A, pages 17 through 49 of this report.

Executive Officers of the Registrants. The following are the executive officers of the Company, each of whom is elected annually, and there are no arrangements or understandings between any of the persons so named and any other person pursuant to which such person was elected as an officer.

<u>Name</u>	<u>Age</u>	<u>Position with Registrant</u>
J. Mariner Kemper	35	Mr. Kemper has served as the Chairman and CEO of the Company since May 2004, and has served as Chairman and CEO of UMB Bank Colorado, n.a. (a subsidiary of the Company) since 2000. He was President of UMB Bank Colorado from 1997 to 2000.
Peter J. deSilva	46	Mr. deSilva has served as President and Chief Operating Officer of the Company since January 2004 and Chairman and Chief Executive Officer of UMB Bank, n.a. since May 2004. Previously with Fidelity Investments from 1987-2004, the last seven years as Senior Vice President with principal responsibility for brokerage operations.
Peter J. Genovese	61	Mr. Genovese has served as Vice Chairman of the Eastern Region and CEO of St. Louis of UMB Bank, n.a. since January 2004. He previously served as President of the Company from January 2000 to January 2004.

Clyde F. Wendel	60	Mr. Wendel has served as President of the Asset Management Division of UMB Bank, n.a. since June, 2006 and Vice Chairman of UMB Bank, n.a. since June, 2006. Previously he has served as Regional President, Bank of America Private Bank and Senior Bank Executive for Iowa, Kansas, and Western Missouri from 2000-2006.
Daryl S. Hunt	51	Mr. Hunt joined UMB Bank, n.a. in November 2007 as Executive Vice President of Financial Services and Support. Previously, Mr. Hunt worked at Fidelity Investments where he served as Sr. Vice President for Transfer Operations from 2006 to 2007, Sr. Vice President of Customer Processing Operations from 2003 to 2006, and Sr. Vice President of Outbound Mail Operations from 2001 to 2003.
Lawrence G. Smith	60	Mr. Smith has served as Executive Vice President and Chief Organizational Effectiveness officer since March, 2005. Prior to coming to UMB, Mr. Smith was Vice President Human Resources from 1996 to 2005 for Fidelity Investments in Boston, Massachusetts where he was responsible for Fidelity's business group human resource activities.
Dennis R. Rilinger	60	Mr. Rilinger has served as Divisional Executive Vice President and General Counsel of the Company and of UMB Bank, n.a. since 1996.
David D. Kling	61	Mr. Kling has served as Divisional Executive Vice President for Enterprise Services of UMB Bank, n.a. since November, 2007. Previously, he served as Executive Vice President of Financial Services and Support from 1997 to 2007.
Terry W. D. Amore	51	Mr. D. Amore joined UMB Bank, n.a. in 2006. He serves as Executive Vice President, Director of Payment & Technology Solutions Division where he is responsible for sales, service and product management for the Treasury Management, Healthcare, Foreign Exchange, and Merchant Services. Prior to coming to UMB, he served as National Sales and Service Manager for Treasury Management's Corporate Finance Division at PNC Bank in Pittsburgh, Pennsylvania.
Brian J. Walker	36	Mr. Walker joined the Company in June 2007 as Senior Vice President and Corporate Controller (Chief Accounting Officer). From July of 2004 to June 2007 he served as a Certified Public Accountant for KPMG where he worked primarily as an auditor for financial institutions. He worked as a Certified Public Accountant for Deloitte & Touche from November 2002 to July of 2004.

A discussion of past acquisitions is included in Note 16 to the Consolidated Financial Statements provided in Item 8 on page 80 of this report.

The Company makes available free of charge on its website at www.umb.com/investor, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports, as soon as reasonably practicable after it electronically files or furnishes such material with or to the SEC.

Table of Contents

ITEM 1A. RISK FACTORS

Our business routinely encounters and addresses risks. Some of such risks may give rise to occurrences that cause our future results to be materially different than we presently anticipate. In the following paragraphs, we describe our present view of certain important strategic risks, although the risks below are not the only risks we face. If any such risks actually occur, our business, results of operations, financial condition and prospects could be affected materially and adversely. These risk factors should be read in conjunction with our management's discussion and analysis, beginning on page 18 hereof, and our consolidated financial statements, beginning on page 50 hereof.

General economic conditions, such as economic downturns or recessions, could materially impair our customers' ability to repay loans, harm our operating results and reduce our volume of new loans.

Our profitability depends significantly on economic conditions. Economic downturns or recessions, either nationally, internationally or in the states within our footprint, could materially reduce our operating results. An economic downturn could negatively impact demand for our loan and deposit products, the demand for insurance and brokerage products and the amount of credit related losses due to customers who cannot pay interest or principal on their loans. To the extent loan charge-offs exceed our estimates, an increase to the amount of expense provided related to the allowance for loans would reduce income. See

Quantitative and Qualitative Disclosures About Market Risk - Credit Risk in Part II, Item 7A for a discussion of how we monitor and manage credit risk.

General economic conditions, such as a stock market decline, could materially impair the number of investors in the equity and bond markets, the level of assets under management and the demand for our other fee-based services.

Economic downturns or recessions could affect the volume of income from and demand for our other fee-based services. The fee revenue of our asset management segments including income from our Scout Investment Advisors, Inc. and UMB Fund Services, Inc. subsidiaries, are largely dependent on both inflows to, and the fair value of, assets invested in the UMB Scout Funds and the fund clients to whom we provide services. General economic conditions can affect investor sentiment and confidence in the overall securities markets which could adversely affect asset values, net flows to these funds and other assets under management. Our bankcard revenues are dependent on transaction volumes from consumer and corporate spending to generate interchange fees. An economic downturn could negatively affect the amount of such fee income. Our banking services group is affected by corporate and consumer demand for debt securities which can be adversely affected by changes in general economic conditions.

Changes in interest rates could affect our results of operations. A significant portion of our net income is based on the difference between interest earned on earning assets (such as loans and investments) and interest paid on deposits and borrowings. These rates are sensitive to many factors that are beyond our control, such as general economic conditions and policies of various governmental and regulatory agencies, such as the Federal Reserve Board. For example, policies and regulations of the Federal Reserve Board influence, directly and indirectly, the rate of interest paid by commercial banks on their interest-bearing deposits and also may affect the value of financial instruments held by us. The actions of the Federal Reserve Board also determine to a significant degree our cost of funds for lending and investing. In addition, these policies and conditions can adversely affect our customers and counterparties, which may increase the risk that such customers or counterparties default on their obligations to us. Changes in interest rates greatly affect the amount of income earned and the amount of interest paid. Changes in interest rates also affect loan demand, the prepayment speed of loans, the purchase and sale of investment bonds and the generation and retention of customer deposits. A rapid increase in interest rates could result in interest expense increasing faster than interest income because of differences in maturities of assets and liabilities. See Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk in Part II, Item 7A for a discussion of how we monitor and manage interest rate risk.

We rely on our systems, employees and certain counterparties, and certain failures could adversely affect our operations. Our Company is dependent on our ability to process a large number of increasingly complex transactions. If any of our financial, accounting, or other data processing systems fail or have other

Table of Contents

significant shortcomings, we could be adversely affected. We are similarly dependent on our employees. We could be adversely affected if a significant number of our employees are unavailable due to a pandemic, natural disaster, war, act of terrorism, or other reason, or if, an employee causes a significant operational break-down or failure, either as a result of human error, purposeful sabotage or fraudulent manipulation of our operations or systems. Third parties with which we do business could also be sources of operational risk to us, including break-downs or failures of such parties' own systems or employees. Any of these occurrences could result in a diminished ability of the Company to operate, potential liability to clients, reputational damage and regulatory intervention, which could adversely affect us. Operational risk also includes our ability to successfully integrate acquisitions into existing charters as an acquired entity will most likely be on a different system than ours. See "Quantitative and Qualitative Disclosures About Market Risk - Operational Risk" in Part II, Item 7A for a discussion of how we monitor and manage operational risk.

In a firm as large and complex as the Company, lapses or deficiencies in internal control over financial reporting are likely to occur from time to time and there is no assurance that significant deficiencies or material weaknesses in internal controls may not occur in the future.

In addition, there is the risk that our controls and procedures as well as business continuity and data security systems prove to be inadequate. Any such failure could affect our operations and could adversely affect our results of operations by requiring the Company to expend significant resources to correct the defect, as well as by exposing us to litigation or losses not covered by insurance.

If we do not successfully handle issues that may arise in the conduct of our business and operations our reputation could be damaged, which could in turn negatively affect our business. Our ability to attract and retain customers and transact with its counterparties could be adversely affected to the extent our reputation is damaged. The failure of the Company to deal with various issues that could give rise to reputational risk could cause harm to the Company and our business prospects. These issues include, but are not limited to potential conflicts of interest, legal and regulatory requirements, ethical issues, money-laundering, privacy, recordkeeping, sales and trading practices and proper identification of the legal, reputational, credit, liquidity and market risks inherent in our products. The failure to appropriately address these issues could make our clients unwilling to do business with us, which could adversely affect our results.

We face strong competition from other financial services firms, which could lead to pricing pressures that could materially adversely affect our revenue and profitability. In addition to the challenge of competing against local, regional and national banks in attracting and retaining customers, our competitors also include brokers, mortgage bankers, mutual fund sponsors, securities dealers, investment advisors and specialty finance and insurance companies. The financial services industry is intensely competitive, and we expect it to remain so. We compete on the basis of several factors, including transaction execution, products and services, innovation, reputation and price. We may experience pricing pressures as a result of these factors and as some of our competitors seek to increase market share by reducing prices on products and services or increasing rates paid on deposits.

The shift from paper-based to electronic-based payment business may be difficult and negatively affect earnings. In today's payment environment, checks continue to be a payment choice; however, checks as a percent of the total payment volume are declining and the payment volume is shifting to electronic alternatives. Check products are serviced regionally due to the physical constraints of the paper document; however, electronic documents are not bound by the same constraints, thus opening the geographic markets to all providers of electronic services. To address this shift, new systems are being developed and marketed which involve significant software and hardware costs. It is anticipated that we will encounter new competition, and any competitor that attracts the payments business of our existing customers will compete strongly for the remainder of such customers' banking business.

We are subject to extensive regulation in the jurisdictions in which we conduct our businesses. We are subject to extensive state and federal regulation, supervision and legislation that govern most aspects of our

Table of Contents

operations. Laws and regulations, and in particular banking, securities and tax laws, may change from time to time. For example, current federal law prohibits the payment of interest on corporate demand deposit accounts. Although a change to permit interest on corporate accounts would have a favorable impact on service-charge income, it would adversely affect net interest income as the cost of funds would increase. Changes in laws and regulations, lawsuits or actions by regulatory agencies could cause us to devote significant time and resources to compliance and could lead to fines, penalties, judgments, settlements, withdrawal of certain products or services offered in the market or other results adverse to us which could affect our business, financial condition or results of operation, or cause us serious reputational harm.

Our framework for managing our risks may not be effective in mitigating risk and loss to the Company. Our risk management framework is made up of various processes and strategies to manage our risk exposure. Types of risk to which we are subject include liquidity risk, credit risk, price risk, interest rate risk, operational risk, compliance and litigation risk, foreign exchange risk, and reputation risk and fiduciary risk, among others. There can be no assurance that our framework to manage risk, including such framework's underlying assumptions, will be effective under all conditions and circumstances. If our risk management framework proves ineffective, we could suffer unexpected losses and could be materially adversely affected.

Liquidity is essential to our businesses and we rely on the securities market and other external sources to finance a significant portion of our operations. Liquidity affects our ability to meet our financial commitments. Our liquidity could be negatively affected should the need arise to increase deposits or obtain additional funds through borrowing to augment current liquidity sources. Factors that we cannot control, such as disruption of the financial markets or negative views about the general financial services industry could impair our ability to raise funding. If we are unable to raise funding using the methods described above, we would likely need to sell assets, such as our investment and trading portfolios, to meet maturing liabilities. We may be unable to sell some of our assets on a timely basis, or we may have to sell assets at a discount from market value, either of which could adversely affect our results of operations. Our liquidity and funding policies have been designed to ensure that we maintain sufficient liquid financial resources to continue to conduct our business for an extended period in a stressed liquidity environment. If our liquidity and funding policies are not adequate, we may be unable to access sufficient financing to service our financial obligations when they come due, which could have a material adverse franchise or business impact. See **Quantitative and Qualitative Disclosures About Market Risk Liquidity Risk** in Part II, Item 7A for a discussion of how we monitor and manage liquidity risk.

Inability to hire or retain qualified employees could adversely affect our performance. Our people are our most important resource and competition for qualified employees is intense. Employee compensation is our greatest expense. We rely on key personnel to manage and operate our business, including major revenue generating functions such as our loan and deposit portfolios. The loss of key staff may adversely affect our ability to maintain and manage these portfolios effectively, which could negatively affect our results of operations. If compensation costs required to attract and retain employees become unreasonably expensive, our performance, including our competitive position, could be adversely affected.

Changes in accounting standards could impact reported earnings. The accounting standard setting bodies, including the Financial Accounting Standards Board and other regulatory bodies periodically change the financial accounting and reporting standards affecting the preparation of our consolidated financial statements. These changes are not within our control and could materially impact our consolidated financial statements.

Future events may be different than those anticipated by our management assumptions and estimates, which may cause unexpected losses in the future. Pursuant to current Generally Accepted Accounting Principles, we are required to use certain estimates in preparing our financial statements, including accounting estimates to determine loan loss reserves, and the fair value of certain assets and liabilities, among other items. Should our determined values for such items prove substantially inaccurate we may experience unexpected losses which could be material.

Table of Contents

ITEM 1B. UNRESOLVED STAFF COMMENTS

There are no unresolved comments from the staff of the SEC required to be disclosed herein as of the date of this Form 10-K.

ITEM 2. PROPERTIES

The Company's headquarters building, the UMB Bank Building, is located at 1010 Grand Boulevard in downtown Kansas City, Missouri, and opened during July 1986. Of the 250,000 square feet, 218,000 square feet is occupied by departments and customer service functions of UMB Bank n.a. as well as offices of the parent company, UMB Financial Corporation. The remaining 32,000 square feet of space within the building is either leased or available for lease to third parties. Presently, the Company is seeking to lease 9,000 square feet of the headquarters building.

Other main facilities of UMB Bank, n.a. in downtown Kansas City, Missouri are located at 928 Grand Boulevard (185,000 square feet); 906 Grand Boulevard (140,000 square feet); and 1008 Oak Street (180,000 square feet). The 928 Grand and 906 Grand buildings house backroom support functions. The 928 Grand building underwent a major renovation during 2004/2005. The 928 Grand building is connected to the UMB Bank Building (1010 Grand) by an enclosed elevated pedestrian walkway. The 1008 Oak building, which opened during the second quarter of 1999, houses the Company's operations and data processing functions.

UMB Bank, n.a. leases 64,263 square feet in the Equitable Building located in the heart of the commercial sector of downtown St. Louis, Missouri. This location has a full-service banking center and is home to some operational and administrative support functions.

UMB Bank, Colorado, n.a. leases 9,003 square feet on the first and third floors of the 1670 Broadway building located in the financial district of downtown Denver, Colorado. The location has a full-service banking center and is home to the operational and administrative support functions for UMB Bank, Colorado, n.a.

UMB Fund Services, Inc., a subsidiary of the Company, leases 72,135 square feet in Milwaukee, Wisconsin, at which its fund services operation is headquartered.

As of December 31, 2007, the Company's affiliate banks operated a total of four main banking centers with 135 detached branch facilities, the majority of which are owned by the Company.

Additional information with respect to premises and equipment is presented in Note 1 and 8 to the Consolidated Financial Statements in Item 8, pages 56 and 66 of this report.

ITEM 3. LEGAL PROCEEDINGS

In the normal course of business, the Company and its subsidiaries are named defendants in various lawsuits and counter-claims. In the opinion of management, after consultation with legal counsel, none of these lawsuits are expected to have a materially adverse effect on the financial position, results of operations, or cash flows of the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to the shareholders for a vote during the fourth quarter ended December 31, 2007.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's stock is traded on the NASDAQ Stock Market (specifically the NASDAQ Global Select Market) under the symbol UMBF. As of February 21, 2008, the Company had 1,917 shareholders of record. Company stock information for each full quarter period within the two most recent fiscal years is set forth in the table below.

Per Share	Three Months Ended			
	March 31	June 30	Sept. 30	Dec. 31
2007

Total	448,707	40.31	448,707	3,947,171

On April 24, 2007 the Company announced a plan to repurchase up to two million shares of common stock. This plan will terminate on April 24, 2008. The Company has not made any repurchases other than through this

Table of Contents

plan, which permits both open market and privately negotiated transactions. All open market share purchases under the share repurchase plans are intended to be within the scope of Rule 10b-18 promulgated under the Securities Exchange Act of 1934. Rule 10b-18 provides a safe harbor for purchases in a given day if the Company satisfies the manner, timing and volume conditions of the rule when purchasing its own common shares.

On April 25, 2006, the Company announced an amendment to the Company's Articles of Incorporation authorizing an increase in the Company's authorized shares of common stock from 33 million shares to 80 million shares. The Board of Directors subsequently declared a two-for-one stock split of UMB Financial Corporation common stock. On May 30, 2006, 21,430,099 of shares were distributed to shareholders of record on May 16, 2006.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**MANAGEMENT'S DISCUSSION AND ANALYSIS**

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The following presents management's discussion and analysis of the Company's consolidated financial condition, changes in condition, and results of operations. This review highlights the major factors affecting results of operations and any significant changes in financial conditions for the three-year period ended December 31, 2007. It should be read in conjunction with the accompanying Consolidated Financial Statements and other financial statistics appearing elsewhere in the report.

Table of Contents

SPECIAL CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

The information included or incorporated by reference in this report contains forward-looking statements of expected future developments within the meaning of and pursuant to the safe harbor provisions established by Section 21E of the Securities Exchange Act of 1934, as amended by the Private Securities Litigation Reform Act of 1995. These forward-looking statements may refer to financial condition, results of operations, plans, objectives, future financial performance and business of the Company, including, without limitation:

Statements that are not historical in nature;

Statements preceded by, followed by or that include the words believes, expects, may, will, should, could, anticipates, estimates, intends, or similar words or expressions; and

Statements regarding the timing of the closing of branch sales and purchases.

Forward-looking statements are not guarantees of future performance or results. You are cautioned not to put undue reliance on any forward-looking statement which speaks only as of the date it was made. Forward-looking statements reflect management's expectations and are based on currently available data; however, they involve risks, uncertainties and assumptions. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the following factors:

General economic and political conditions, either nationally, internationally or in the Company's footprint, may be less favorable than expected;

Changes in the interest rate environment;

Changes in the securities markets;

Changes in operations;

Competitive pressures among financial services companies may increase significantly;

Changes in technology may be more difficult or expensive than anticipated;

Legislative or regulatory changes may adversely affect the Company's business;

Changes in the ability of customers to repay loans;

Changes in loan demand may adversely affect liquidity needs;

Changes in employee costs; and

Changes in accounting rules.

Any forward-looking statements should be read in conjunction with information about risks and uncertainties set forth in this report and in documents incorporated herein by reference. Forward-looking statements speak only as of the date they are made, and the Company does not intend to review or revise any particular forward-looking statement in light of events that occur thereafter or to reflect the occurrence of unanticipated events.

Results of Operations

Overview

The Company continues to focus on the following five strategies which management believes will improve net income and strengthen the balance sheet.

The first strategy is a focus on net interest income. This is a multi-pronged strategy emphasizing the investment portfolio, loan portfolio and deposit base. During 2007, progress on this strategy was illustrated by an

Table of Contents

increase in net interest income of 7.1 percent from the previous year. This was accomplished through earning asset growth, as well as an overall increase in net interest margin. Average earning assets increased by \$352.1 million, or 5.2 percent, from 2006. Most of this earning asset growth was through average loan growth of \$322.2 million, or 9.0 percent. The mix of earning assets improved as a larger percentage of earning assets consisted of higher yielding loans. In part, the mix was affected by the Company's decision to run-off the indirect auto loan portfolio and focus on higher yielding loan products. Average loans comprised 54.9 percent of average earning assets during 2007 compared to 53.0 percent in the prior year. Further, the average loan-to-deposit ratio was 68.3 percent in 2007 as compared to 65.2 percent in 2006. Net interest margin, on a tax-equivalent basis, increased 6 basis points as compared to 2006. Net interest spread increased 5 basis points from 2006 and the contribution from interest-free-funds increased 1 basis point.

The second strategy is to grow the Company's fee-based businesses. The Company believes this strategy will help compensate for the average loan-to-deposit ratio of the Company's subsidiary banks, which has been, and is expected to continue to be, lower than industry average. The Company continues to emphasize its fee-based operations to help reduce the Company's exposure to changes in interest rates. During 2007, noninterest income increased \$33.8 million, or 13.3 percent, as compared to 2006. The increase in noninterest income was attributable to higher trust and securities processing income and service charges on deposits. Additionally, the increase included a \$7.2 million net gain on the sale of the securities transfer product. The Company continues to emphasize its asset management, credit card, health care services, and payments businesses. The focus in asset management continues to show improvement and is discussed in the fourth strategy below. Trust and securities processing increased \$17.3 million, or 17.6 percent. This increase was primarily due to the increase in total assets under management by the UMB Scout Funds as discussed in the fourth strategy below. Service charges on deposits increased by \$6.3 million, or 8.5 percent during 2007 due mostly to greater individual overdraft and return item charges. The Company also continues to focus on its wholesale health savings and flexible spending account strategy by servicing healthcare providers, third-party administrators and large employers.

The third strategy is to leverage the Company's distribution network. At the end of 2007, the Company had 135 branches. Repositioning and increasing utilization of our regional distribution network remains a priority. In both St. Louis and Denver, the Company hired new leadership and sales support to focus on asset management and corporate trust. The Company's focus is to provide a broad offering of services through our existing branch network. Although the Company decreased branches by a net of 4, the Company's average deposits increased 4.1 percent from 2006.

The fourth strategy is to strengthen the asset management business of the Company. In particular, the focus is to continue growing the UMB Scout Funds (which are a family of proprietary mutual funds managed by a subsidiary of the Company) by adding and offering new products, achieving strong performance, and leveraging distribution networks. The Company continues to develop an investment advisory model. To that end, the Company will continue to evolve proprietary and non-proprietary products and services to support this approach. In addition, the Company continues to integrate private banking, wealth solutions, and brokerage capabilities for our customers. Total assets under management increased 8.6 percent to \$11.0 billion, from \$10.1 billion at the end of 2006. Leading this growth is the Company's proprietary family of mutual funds, which continue to play a key role. Total assets in the UMB Scout Funds increased 16.4 percent from \$5.0 billion at the end of 2006, to \$5.8 billion at the end of 2007. As some of the revenue from the Company's asset management business is the direct result of the market value of its customers' investments, the overall health of the equity and financial markets continues to play an important role in the recognition of fee income as discussed in the Business Segment section on pages 30 through 32 below. Another important part of the Company's asset management strategy is the implementation of an integrated wealth management business model. With twelve client managers, Private Banking has more than \$47 million in loans and nearly \$136 million in deposits. Brokerage fee income has been another strong performer. Brokerage services provided strong results with an increase of \$1.8 million, or 28.8 percent, as compared to 2006.

Table of Contents

The fifth strategy is a focus on capital management. The Company places a significant emphasis on the maintenance of a strong capital position, which management believes promotes investor confidence, provides access to funding sources under favorable terms, and enhances the Company's ability to capitalize on business growth and acquisition opportunities. The Company repurchased 1.1 million shares of common stock at an average price of \$39.37 per share during 2007. Further, the Company increased dividends during 2007 to \$23,854,000 (\$0.57 per share), compared to \$21,978,000 (\$0.52 per share) in 2006. This was a 9.6 percent increase in per share dividends during 2007 as compared to 2006. At the end of 2007, the Company had a total risk-based capital ratio of 14.58 percent, which is substantially higher than the 10 percent regulatory minimum to be considered well-capitalized.

Earnings Summary

The Company recorded consolidated net income of \$74.2 million for the year ended December 31, 2007. This represents a 24.2 percent increase over 2006. Net income for 2006 increased 6.1 percent compared to 2005. Basic earnings per share for the year ended December 31, 2007 were \$1.78 per share compared to \$1.40 per share in 2006 and \$1.31 per share in 2005. Basic earnings per share for 2007 increased 27.1 percent over 2006 per share earnings, which had increased 6.9 percent over 2005. Fully diluted earnings per share for the year ended December 31, 2007, were \$1.77 per share compared to \$1.40 per share in 2006 and \$1.30 per share in 2005.

The Company's net interest income increased to \$232.7 million in 2007 compared to \$217.2 million in 2006 and \$188.3 million in 2005. The \$15.5 million increase in net interest income in 2007 as compared to 2006 is primarily a result of both a favorable rate and volume variance. See Table 1 on page 23. The favorable volume variance was led by a 9.0 percent increase in the average balance of loans and loans held for sale. Net interest spread improved by 5 basis points in 2007 as compared to 2006. The rate variance remained positive and continues to benefit from interest-free funds. The impact of this benefit is illustrated on Table 2 on page 24. The \$28.9 million increase in net interest income in 2006 as compared to 2005 is primarily a result of both a favorable rate and volume variance. The volume variance was mostly driven by a 14.3 percent increase in loans and loans held for sale in 2006 as compared to 2005. Although the net interest spread declined by 7 basis points in 2006 as compared to 2005, the rate variance was positive and benefited from interest-free funds. The current credit environment has made it difficult to anticipate the future of the Company's margins. If rates stay at current levels or continue to decline, the Company anticipates a negative impact to interest income as a result of the repricing of assets and liabilities. The magnitude of this impact will be largely dependent upon the Federal Reserve's policy decisions and market movements. See Table 15 on page 45 for an illustration of the impact of a rate increase or decrease on net interest income as of December 31, 2007.

The Company had an increase of \$33.8 million, or 13.3 percent, in noninterest income in 2007 as compared to 2006 and a \$3.1 million, or 1.2 percent, increase in 2006 compared to 2005. During 2007, the increase in noninterest income is attributable to higher trust and securities processing income, service charges on deposits, and the gain on the sale of the securities transfer product. Trust and securities processing increased \$17.3 million, or 17.6 percent. This increase in trust and securities processing income was primarily due to the increase in total assets under management, which increased 8.6 percent to \$11.0 billion, from \$10.1 billion at the end of 2006. Service charges on deposits increased by \$6.3 million, or 8.5 percent during 2007 due mostly to greater individual overdraft and return item charges. During 2007, the Company recognized a \$7.2 million net gain on the sale of the securities transfer product. The increase in noninterest income in 2007 from 2006, and 2006 from 2005 is illustrated on Table 5 on page 27.

Noninterest expense increased in 2007 by \$25.7 million, or 6.8 percent, compared to 2006 and increased in 2006 by \$23.3 million, or 6.5 percent, compared to 2005. Categories of noninterest expense with the most significant increases in 2007 as compared to 2006 include salaries and employee benefits (due to higher base salaries and increased commissions and bonuses related to our improved financial performance for the year and partially due to increases in employee benefit expenses), a covered litigation provision (due to the Company's

Table of Contents

estimated share of Visa, Inc. s covered litigation), and equipment (primarily due to higher depreciation and maintenance costs associated with technology investments). The increase in noninterest income in 2007 from 2006, and 2006 from 2005 is illustrated on Table 6 on page 29.

Net Interest Income

Net interest income is a significant source of the Company s earnings and represents the amount by which interest income on earning assets exceeds the interest expense paid on liabilities. The volume of interest earning assets and the related funding sources, the overall mix of these assets and liabilities, and the rates paid on each affect net interest income. Table 1 summarizes the change in net interest income resulting from changes in volume and rates for 2007, 2006 and 2005.

Net interest margin is calculated as net interest income on a fully tax equivalent basis (FTE) as a percentage of average earning assets. A critical component of net interest income and related net interest margin is the percentage of earning assets funded by interest free funding sources. Table 2 analyzes net interest margin for the three years ended December 31, 2007, 2006 and 2005. Net interest income, average balance sheet amounts and the corresponding yields earned and rates paid for the years 2005 through 2007 are presented in a table following the footnotes to the Consolidated Financial Statements. Net interest income is presented on a tax-equivalent basis to adjust for the tax-exempt status of earnings from certain loans and investments, which are primarily obligations of state and local governments.

Table of Contents

Table 1

RATE-VOLUME ANALYSIS (in thousands)

This analysis attributes changes in net interest income either to changes in average balances or to changes in average rates for earning assets and interest-bearing liabilities. The change in net interest income is due jointly to both volume and rate and has been allocated to volume and rate in proportion to the relationship of the absolute dollar amount of the change in each. All rates are presented on a tax-equivalent basis and give effect to the disallowance of interest expense for federal income tax purposes, related to certain tax-free assets. The loan average balances and rates include nonaccrual loans.

Average Volume		Average Rate		2007 vs. 2006		Increase (Decrease)		
2007	2006	2007	2006			Volume	Rate	Total

Table 2

ANALYSIS OF NET INTEREST MARGIN (in thousands)

	2007	2006	2005
Average earning assets	\$ 7,108,762	\$ 6,756,641	\$ 6,279,269
Interest-bearing liabilities	5,258,580	4,847,696	4,327,126
Interest-free funds	\$ 1,850,182	\$ 1,908,945	\$ 1,952,143
Free funds ratio (free funds to earning assets)	26.03%	28.25%	31.09%
Tax-equivalent yield on earning assets	6.00%	5.62%	4.49%
Cost of interest-bearing liabilities	3.46	3.13	1.93
Net interest spread	2.54%	2.49%	2.56%
Benefit of interest-free funds	0.90	0.89	0.60
Net interest margin	3.44%	3.38%	3.16%

The Company experienced an increase in net interest income of \$15.5 million, or 7.1 percent, for the year 2007 compared to 2006. This follows an increase of \$28.9 million, or 15.4 percent, for the year 2006 compared to 2005. As illustrated in Table 1, the 2007 increase is due to both a favorable volume and a favorable rate variance. The most significant portion of this favorable volume variance is associated with higher loan balances in both 2007 and 2006. In 2006, the federal funds sold and resell agreements contributed to the favorable volume variance. The favorable volume and rate variances for earning assets were partially offset by corresponding higher volume and rate variances on the liability side of the balance sheet. Deposit gathering campaigns during late 2006 and 2007 increased both deposit balances and the rates paid on those balances. Even though the Company experienced continued rate competition throughout 2007, it only experienced slight rate increases for deposits due primarily to the rate decreases made by the Federal Reserve's Open Market Committee.

The increase in the cost of funds has also increased the favorable impact from the benefit of interest-free funds. The Company has a significant portion of its deposit funding with noninterest-bearing demand deposits. Noninterest-bearing demand deposits represented 32.0 percent, 36.3 percent and 34.7 percent of total outstanding deposits at December 31, 2007, 2006 and 2005, respectively. As illustrated on Table 2, the impact from these interest-free funds was 90 basis points in 2007, compared to 89 basis points in 2006 and 60 basis points in 2005. Although the amount of these deposits has gone down as a percent of total deposits, the increase in the cost of funds causes the overall benefit to increase.

The 2006 increase in net interest income over 2005 is primarily due to both a favorable volume and a favorable rate variance. In addition to the significant favorable volume variance associated with higher loan balances in 2006, federal funds sold and resell agreements contributed to the favorable volume variance. The increase in interest rates during 2006 had a favorable impact on the rate variance for earning assets, which was mostly offset by the increase in rates repricing liabilities.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The Company has experienced a repricing of a majority of its liabilities during the recent interest rate cycle and continues to have its assets reprice. Loans have increased from an average of \$3.6 billion in 2006 to an average of \$3.9 billion in 2007. Loan-related earning assets tend to generate a higher spread than those earned in the Company's investment portfolio. By design, the Company's investment portfolio is relatively short in duration and liquid in its composition of assets. If the Federal Reserve's Open Market Committee maintains rates at current levels or they continue to decline, the Company anticipates a negative impact to interest income as a result of this repricing. The magnitude of this impact will be largely dependent upon the Federal Reserve's policy decisions and market movements.

During 2008, approximately \$615 million of securities are expected to mature and be reinvested. This includes approximately \$182 million which will mature during the first quarter of 2008. In late 2004,

Table of Contents

management adopted a portfolio modification plan designed to improve interest income by extending the average life of its investment portfolio. The Company implemented this extension strategy throughout 2005 and 2006. The total investment portfolio had an average life of 29.3 months and 28.9 months as of December 31, 2007 and December 31, 2006, respectively. It should be noted that the Company has a significant portfolio of extremely short-term discount notes as of the end of both 2007 and 2006. These securities are held due to the seasonal fluctuation related to public fund deposits which are expected to flow out of the bank in a relatively short period. At December 31, 2007, the amount of such discount notes was approximately \$724 million, and without these discount notes, the average life of the core investment portfolio would have been 37.1 months. At December 31, 2006, the amount of such discount notes was approximately \$608 million, and without these discount notes, the average life of the core investment portfolio would have been 35.3 months. Therefore, the core investment portfolio, without the short-term discount notes, had an increase in average life of 1.7 months in 2007.

Provision and Allowance for Loan Losses

The allowance for loan losses (ALL) represents management's judgment of the losses inherent in the Company's loan portfolio as of the balance sheet date. An analysis is performed quarterly to determine the appropriate balance of the ALL. This analysis considers items such as historical loss trends, a review of individual loans, migration analysis, current economic conditions, loan growth and characteristics, industry or segment concentration and other factors. This analysis is performed separately for each bank as regulatory agencies require that the adequacy of the ALL be maintained on a bank-by-bank basis. After the balance sheet analysis is performed for the ALL, the provision for loan losses is computed as the amount required to adjust the ALL to the appropriate level.

As illustrated on Table 4 below, the ALL slightly declined to 1.17% of total loans as of December 31, 2007 compared to 1.20% of total loans as of December 31, 2006. Based on the factors above, management of the Company expensed an additional \$0.6 million, or 6.9 percent, related to the provision for loan losses in 2007 as compared to 2006. This compares to a \$3.0 million, or 51.2 percent increase in the provision for loan losses in 2006 as compared to 2005.

As shown in Table 3, the ALL has been allocated to various loan portfolio segments. The Company manages the ALL against the risk in the entire loan portfolio and therefore, the allocation of the ALL to a particular loan segment may change in the future. Management of the Company believes the present ALL is adequate considering the Company's loss experience, delinquency trends and current economic conditions, and does not anticipate material increases in the ALL or in the level of provisions to the ALL in the near future. Future economic conditions and borrowers' ability to meet their obligations, however, are uncertainties which could affect the Company's ALL and/or need to change its current level of provision.

Table 3

ALLOCATION OF ALLOWANCE FOR LOAN LOSSES (in thousands)

This table presents an allocation of the allowance for loan losses by loan categories. The breakdown is based on a number of qualitative factors; therefore, the amounts presented are not necessarily indicative of actual future charge-offs in any particular category.

Noninterest Income

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

A key objective of the Company is the growth of noninterest income to enhance profitability and provide steady income, as fee-based services are typically non-credit related and are not generally affected by fluctuations in interest rates. Noninterest income increased \$33.8 million, or 13.3 percent, in 2007 as compared to 2006. During 2007, the Company recognized a \$7.2 million net gain on the sale of the securities transfer product. However, the majority of the increase is attributable to higher trust and securities processing income and service charges on deposits. Trust and securities processing increased \$17.3 million, or 17.6 percent. This increase in trust and securities processing income was primarily due to the increase in total assets under management, which increased 8.6 percent to \$11.0 billion, from \$10.1 billion at the end of 2006. Service charges on deposits increased by \$6.3 million, or 8.5 percent, during 2007 due mostly to greater individual overdraft and return item

Table of Contents

charges. Brokerage services also provided strong results with an increase of \$1.8 million, or 28.8 percent, as compared to 2006.

The Company's fee-based services provide the opportunity to offer multiple products and services to customers which management believes will more closely align the customer with the Company. The Company's ongoing focus is to continue to develop and offer multiple products and services to its customers. The Company is currently emphasizing fee-based services including trust and securities processing, bankcard, securities trading/brokerage and cash/treasury management. Management believes that it can offer these products and services both efficiently and profitably, as most of these have common platforms and support structures. An example of this support structure is the implementation of an integrated wealth management business model. With twelve client managers, Private Banking has more than \$47 million in loans and nearly \$136 million in deposits. These Private Banking relationships provide an excellent opportunity to offer the client the Company's fee-based services.

Table 5

SUMMARY OF NONINTEREST INCOME (in thousands)

	Year Ended December 31						
	2007	2006	2005	Dollar Change		Percent Change

Other	14,991	15,052	17,003	(61)	(1,951)	(0.4)	(11.5)
Total noninterest income	\$ 288,788	\$ 254,945	\$ 251,873	\$ 33,843	\$ 3,072	13.3%	1.2%

Noninterest income and the year-over-year changes in noninterest income are summarized in Table 5 above. The dollar change and percent change columns highlight the respective net increase or decrease in the categories of noninterest income in 2007 as compared to 2006 and in 2006 as compared to 2005.

Trust and securities processing income consists of fees earned on personal and corporate trust accounts, custody of securities services, trust investments and money management services, and mutual fund assets servicing. These fees increased year-over-year for the past two years by

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

17.6 percent and 19.2 percent, respectively. The increase in trust and securities processing fees in 2007 as compared to 2006 was primarily a result of a \$6.4 million increase in management fees earned by Scout Investment Advisors, Inc. (a subsidiary of the Company) and specifically related to the UMB Scout Funds, which are a family of proprietary mutual funds managed by Scout Investment Advisors, Inc. These fees are related to the total assets under management of these funds. The total assets under management for the UMB Scout Funds were \$5.8 billion at December 31, 2007 as compared to \$5.0 billion at December 31, 2006. Additionally, there was approximately a \$6.0 million increase in

Table of Contents

fund administration fees earned by UMB Fund Services. Trust and securities processing fees and fund administration fees were also the primary reasons for the respective increases in this category in 2006 as compared to 2005. As the income from these two services is highly correlated to the market value of assets, the related income will be affected by changes in the securities markets. Management continues to emphasize sales of services to both new and existing clients as well as increasing and improving the distribution channels which lead to increased inflows into the UMB Scout Funds.

Service charges on deposit accounts increased by 8.5 percent in 2007 as compared to 2006, whereas this category decreased by 7.3 percent in 2006 as compared to 2005. The increase in 2007 is due mostly to the greater individual overdrafts and return item charges. Pricing increases and changes (such as improved technology) in overdraft and collection procedures have been the primary reasons for this increase in 2007. The decrease in 2006 is primarily attributable to a decline in corporate service charge income, which was partially offset by an increase in overdraft and return item charges.

Brokerage fees increased \$1.8 million, or 28.8 percent, and \$0.3 million, or 5.0 percent, in 2007 and 2006, respectively. Management's continued focus on its distribution network and the commercial customer base has yielded these improved results. The increase in brokerage fees in 2006 as compared to 2005 was primarily attributable to institutional money market and other asset-backed fee income.

Bankcard fees increased by 3.1 percent and 16.2 percent in 2007 and 2006, respectively. The increase in both years reflects both higher card volume and a greater average transaction dollar amount. In 2005, the credit card rebate programs were modified to encourage increased usage by both consumer and commercial customers. To illustrate the success of this program, commercial cardholder volume increased 22.6 percent in 2007.

During the third quarter of 2007, the Company sold the security transfer product to a third party for a net gain of \$6.9 million. The agreement included residual payments not to exceed an additional \$1.9 million, which the Company can receive if certain revenue targets are met over the twelve month period after the sale date. The agreement also included the sharing of certain revenues and expenses related to the transition of services and employees. During the fourth quarter of 2007, a residual payment of \$0.7 million was received.

Other income decreased by 11.5 percent in 2006 as compared to 2005. This decrease was primarily a result of several reductions in miscellaneous fee income for such items as consulting fees with correspondent banks, home banking fees due to the switch to free on-line bill pay products, and a decrease in net fees related to selling mortgage loans. This category of income remained flat in 2007 as compared to 2006.

Noninterest Expense

Noninterest expense increased in both 2007 and 2006 as compared to the respective prior years. Table 6 below summarizes the components of noninterest expense and the respective year-over-year changes for each category.

Table of Contents

Table 6

SUMMARY OF NONINTEREST EXPENSE (in thousands)

	Year Ended December 31						
	2007	2006	2005	Dollar Change		Percent Change	
				07-06	06-05	07-06	06-05

Salaries and employee benefits expense increased by 6.7 percent and 2.0 percent in 2007 and 2006, respectively. The increase in 2007 is primarily due to higher base salaries and an increase in commissions, bonuses and stock compensation expenses related to our improved financial performance for the year. During 2007, the Company also experienced increases in employee benefit expenses to include a \$1.1 million increase in the Company match of the 401(k) and profit sharing plan and a \$0.7 million increase in health insurance costs associated with the Company's self-funded insurance plan. This increase in 2006 is attributable to several items including a \$1.3 million increase in equity-based compensation as a result of the implementation of Statement of Financial Accounting Standards (SFAS) No. 123 (R), Share-Based Payment; a \$1.8 million increase in the Company match of the 401(k) and profit sharing plan in 2006; and a \$1.6 million increase in health insurance costs associated with the Company's self-funded insurance plan.

Equipment costs increased by 7.6 percent and 11.2 percent in 2007 and 2006, respectively. For both years, the equipment costs increased primarily due to additional depreciation, amortization and maintenance on major software upgrades and acquisitions implemented during 2005, 2006 and early 2007. These projects include Check 21 imaging software, WebExchangeSM commercial treasury management software upgrades, voice-over internet protocol software, interactive voice response software upgrades, customer relationship management software, and the umb.com upgrade. Management anticipates that although the investment in technology will continue during 2008, it will occur at a decreasing rate.

Processing fees increased by 5.5 percent and 19.9 percent in 2007 and 2006, respectively. The increase in both years is primarily attributable to an increase in shareholder servicing and other administration fees paid to investment advisors related to the UMB Scout Funds as a result of increases in assets under management for both years. The amount of such fees paid in future years is dependent upon assets under management (affected by both fund inflows as well as market values), and is expected to generally correlate to trends in the equity markets. Additional

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

processing fee increases in 2007 as compared to 2006 are attributable to third party custodial fees related to international transactions from mutual fund clients.

During the fourth quarter of 2007, the Company, as a member of Visa U.S.A. Inc. (Visa USA), received shares of restricted stock in Visa, Inc. (Visa) as a result of its participation in the global restructuring of Visa U.S.A., Visa Canada Association, and Visa International Service Association, in preparation for an initial public offering. Based on this participation, the Company and other Visa USA member banks became aware of an

Table of Contents

obligation to provide indemnification to Visa in connection with its potential losses resulting from covered litigation as described in Visa's Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC) on December 21, 2007.

The Company has recorded a pre-tax provision of \$4.6 million as an estimate of its contingent indemnification liability to Visa, based upon its proportionate interest in Visa. Of this amount, \$2.8 million relates to covered litigation which Visa has already settled. The remaining portion of the provision represents the Company's estimate of the fair value of its contingent indemnification liability relating to the covered litigation which has not yet been settled or resolved. In accordance with generally accepted accounting principles, the Company's estimates have been established based on available information with regard to Visa's covered litigation. As new information becomes available, the Company will make any necessary adjustments to the provision.

As disclosed in Visa's Form 8-K filed with the SEC on November 9, 2007, Visa intends that payments related to the covered litigation will be funded by Visa from an escrow account to be established with a portion of the proceeds from its planned initial public offering. However, there is no assurance that an initial public offering will occur or that the escrowed funds will be sufficient to relieve the covered litigation liability.

Other expenses increased in both 2007 and 2006. The increase in 2006 as compared to 2005 is primarily due to a \$2.4 million increase in miscellaneous operational charge-offs. The remaining increase was mostly due to higher directors' fees in 2006 as compared to 2005. During 2007, other expenses increased slightly as compared to 2006.

Income Taxes

Income tax expense totaled \$30.8 million, \$22.3 million and \$20.0 million in 2007, 2006 and 2005, respectively. These amounts equate to effective rates of 29.3 percent, 27.1 percent, and 26.2 percent for 2007, 2006 and 2005, respectively. The primary reason for the difference between the Company's effective tax rate and the statutory tax rate is the effect of non-taxable income from municipal securities and state and federal tax credits realized. The increase in the effective tax rate in 2007 and 2006 was primarily a result of tax-exempt income representing a smaller percentage of pre-tax net income.

Business Segments

The Company's operations are strategically aligned into six major segments: Commercial Banking and Lending, Payment and Technology Solutions, Banking Services, Consumer Services, Asset Management, and Investment Services Group. The segments are differentiated by both the customers served and the products and services offered. Note 13 to the Consolidated Financial Statements describes how these segments are identified and presents financial results of the segments for the years ended December 31, 2007, 2006 and 2005. The Treasury and Other Adjustments category includes items not directly associated with any other segment.

Commercial Banking and Lending's 2007 pre-tax net income increased from 2006 by \$1.8 million, or 8.3 percent, to \$23.7 million. In 2006, the pre-tax net income increased from 2005 by \$2.2 million, or 11.2 percent, to \$21.9 million. For 2007, the increase in net income was driven primarily by a greater net interest income of \$2.5 million due mostly to higher loan volume and increased margin. The provision for loan losses decreased \$2.0 million as the allowance for loan losses in this segment was adequately funded for the inherent risk in the loan portfolio. Noninterest expense increased \$3.4 million, or 12.4 percent, from 2006. The increase was mostly attributable to increases in salary expense and to allocated technology costs associated with a customer relationship management system that aids in sales management, the identification of

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

cross sale opportunities, and overall knowledge of a client's banking relationship. The increase in pre-tax net income in 2006 as compared to 2005 was primarily a result of a \$4.8 million increase in net interest income as a result of increased loan volume and increased margin. This was offset by an increase of \$2.3 million in provision for loan losses and a \$1.2

Table of Contents

million increase in noninterest expense. Management anticipates continued competition for commercial loans in 2008 and, therefore, expects income growth in this segment to be at a measured pace during 2008.

Payment and Technology Solutions pre-tax net income increased \$11.0 million, or 33.9 percent, to \$43.4 million in 2007, as compared to an increase of \$5.0 million, or 18.3 percent, to \$32.4 million in 2006. A component of the increase in 2007 was the net gain on the sale of the securities transfer product, which contributed \$7.2 million. The remainder of the increase in 2007 and the increase in 2006 was largely due to higher net interest income related to higher margins and improved noninterest income due to volume in the healthcare and commercial card services products. Net interest income increased by \$5.3 million, or 9.5 percent, in 2007 as compared to 2006, and increased by \$9.1 million, or 19.6 percent, in 2006 as compared to 2005. The increases in net interest income were primarily attributable to higher fund transfer pricing rates on deposits from this segment. In 2006, noninterest income within this segment decreased primarily from a reduction in deposit service charge income, but was partially offset by significant percentage increases in both healthcare income and commercial card income. In 2007, the healthcare income and commercial card income continued to improve as evidenced by the improvement in noninterest income. Challenges for this segment arise from competitive pressures, as well as the technological challenges due to the movement from paper to electronic processing. The Company has focused significant resources into creating and enhancing products and services to keep the Company in step with the clients changing needs. The primary example of this investment was the introduction of WebExchangeSM, an upgraded online banking software for businesses, in 2006. Investments in technology have helped this segment focus on product delivery and management anticipates these technologies will create efficiencies and customer satisfaction in the coming year.

Banking Services pre-tax net loss was \$1.4 million for 2007, which was a \$3.3 million decrease from 2006 pre-tax income of \$1.9 million. The 2006 pre-tax net income for this segment was flat compared to 2005. For 2007, the decrease in pre-tax net income was primarily attributable to a decrease in noninterest income of \$2.6 million, or 9.3 percent, from 2006. Inventory positions in fixed income securities were reduced substantially throughout the last half of the year as a part of management's efforts to limit risks associated with the abnormal market volatility. Increases in lending by community banks reduced the volume of security purchases from the banking segment, also reducing trading income. Management believes that these continuing economic factors will make it difficult to increase net interest margin, deposit service charges, and trading income in this segment in 2008.

Consumer Services pre-tax net income decreased by \$2.4 million to \$1.1 million in 2007 as compared to 2006. The primary drivers of the decrease in pre-tax net income within this segment were increases in provision for loan losses and noninterest expense in 2007 as compared to 2006. Net interest income grew primarily because of a greater funds transfer pricing credit corresponding to higher rates and higher deposit levels within this segment. Noninterest income increased \$4.6 million, primarily due to an increase in individual return item and overdraft activity. Noninterest expense increased in 2007 by \$7.7 million, or 5.1 percent, and was attributable to increased salaries and bonuses to associates, telephone data line expense, and increased allocation of corporate technology costs. This segment has also been impacted by the decision to run-off the indirect loan portfolio and will continue to be impacted during 2008. See **Loans** on page 33 for additional discussion about indirect loans. In 2006, the decline in pre-tax net income is a direct result of noninterest expenses increasing at a greater rate than net interest income. This increase in noninterest expense in 2006 is mostly related to greater bankcard expense (related to the growth of the bankcard product); greater depreciation expense from new branch facilities, higher ATM network charges, marketing cost increases due to deposit gathering and consumer loan campaigns and increased allocations of corporate technology costs. The increase in noninterest expense was partially offset by a \$12.6 million increase in net interest income. The increase in the net interest income occurred as assets repriced faster than liabilities in a higher interest rate environment. Management believes Consumer Services' ability to maintain or grow net interest income levels in 2008 will depend upon its ability to grow deposits and higher yielding consumer loans.

Asset Management's pre-tax net income in 2007 was \$25.5 million, which is an increase of \$11.6 million, or 83.4 percent, from 2006. This compares to a \$5.0 million, or 55.8 percent, increase in pre-tax net income in 2006

Table of Contents

as compared to 2005. The increase in pre-tax net income for both years was primarily attributable to increases in noninterest income, partially offset by increases in noninterest expense. Noninterest income increased mostly due to fees associated with the UMB Scout Funds, corporate and personal trust income, and brokerage service fees. Noninterest expense also increased because of higher distribution fees from the funds resulting from the increased asset base in the funds. Salaries and benefits were higher because increased base salaries, increased commissions, and the addition of strategic sales associates. Net flows to the UMB Scout Funds were \$60 million for 2007 compared to \$691 million for 2006. Management will continue to focus sales efforts to increase net flows to the UMB Scout Funds during 2008. The ability of the Company to maintain or grow the fee income from this segment is also related to the overall health of the equity and financial markets because a significant portion of the fee income from this segment is related to total assets under management. The assets under management in this segment are diversified across multiple asset classes with approximately 36 percent in the international class, 28 percent in the fixed income class, 20 percent in the U.S. large capital class, 9 percent in the short term investment class, and 7 percent in the small and middle capital class. Management believes this diversification helps provide protection against significant market changes in any one asset class. The revenues of the corporate trust business increased over 2006 by \$1.1 million, or 8.0 percent, primarily because of growth in the bond market and the overall health of the economy.

Investment Services Group's pre-tax net income increased in both 2007 and 2006 as compared to the respective prior years. Pre-tax net income increased by \$5.2 million, or 53.6 percent, in 2007 as compared to 2006 primarily due to higher noninterest income partially offset by greater noninterest expense. Noninterest income was higher due to an increased mutual fund client base and higher asset based fees in 2007. Noninterest expense increased mostly due to higher third party custodian fees related to international transactions from mutual fund clients. For 2006, the increase in pre-tax net income is mostly due to a \$4.1 million increase in noninterest income offset by a \$2.3 million increase in noninterest expense.

The net loss before tax for the Treasury and Other Adjustments category was \$2.3 million for 2007, compared to a net loss of \$1.3 million for 2006 and a net gain of \$3.1 million for 2005.

Balance Sheet Analysis

Loans and Loans Held For Sale

Loans represent the Company's largest source of interest income. Loan balances increased by \$161.8 million in 2007 due to management's continued efforts to focus on new commercial and consumer loan relationships. Commercial, commercial real estate and residential real estate loans had the most significant growth in outstanding balances in 2007 as compared to 2006. These increases were offset by a decrease in consumer loans primarily related to the Company's decision to run-off the indirect auto portfolio.

Included in Table 7 is a five-year breakdown of loans by type. Business-related loans continue to represent the largest segment of the Company's loan portfolio, comprising approximately 68.3 percent and 63.9 percent of total loans and loans held for sale at the end of 2007 and 2006, respectively. The Company targets customers that will utilize multiple banking services and products.

Total loans and loans held for sale	100.00%	100.00%	100.00%	100.00%	100.00%

Commercial loans represent the largest percent of total loans. Commercial loans increased in volume and as a percentage of total loans compared to 2006. The volume increase was a result of management's continued efforts to focus on new loan relationships.

As a percentage of total loans, commercial real estate and real estate construction loans now comprise 23.1% of total loans, compared to 22.2% at the end of 2006. Generally, these loans are made for working capital or expansion purposes and are primarily secured by real estate with a maximum loan-to-value of 80%. Many of these properties are owner-occupied and have other collateral or guarantees as security.

Bankcard loans have increased in 2007 as compared to 2006, both in balances outstanding and as a percentage of total loans. The increase in bankcard loans is due primarily to increased promotional activity and rewards programs. Bankcard loans continue to be an area of emphasis for the Company.

Table of Contents

Other consumer installment loans have decreased in total amount outstanding and as a percentage of loans. During the third quarter of 2007, the Company made the decision to allow the indirect auto loan portfolio to run-off. This is part of a strategy to enhance asset yields. The Company will continue to service existing loans until maturity or payoff.

Real estate residential loans, although low in overall balances, have grown more rapidly than overall loan growth. The growth in these loans was primarily attributable to home equity lines of credits (HELOC). The HELOC growth was a result of the success of multiple promotions, as well as market penetration within the Company's current customer base through its current distribution channels. Continued expansion of this portfolio is anticipated.

Nonaccrual, past due and restructured loans are discussed under "Credit Risk" within the Quantitative and Qualitative Disclosure about Market Risk in Item 7A on pages 47 and 48 of this report.

Securities

The Company's security portfolio provides liquidity as a result of the composition and average life of the underlying securities. This liquidity can be used to fund loan growth or to offset the outflow of traditional funding sources. In addition to providing a potential source of liquidity, the security portfolio can be used as a tool to manage interest rate sensitivity. The Company's goal in the management of its securities portfolio is to maximize return within the Company's parameters of liquidity goals, interest rate risk and credit risk. The Company maintains high liquidity levels while investing in only high-grade securities. The security portfolio generates the Company's second largest component of interest income.

Securities available for sale and securities held to maturity comprised 42.4% of earning assets as of December 31, 2007, compared to 41.4% at year-end 2006. Total investment securities totaled \$3.5 billion at December 31, 2007, compared to \$3.4 billion at year-end 2006. Management expects collateral pledging requirements for public funds and loan demand to be the primary factors impacting changes in the level of security holdings.

Securities available for sale comprised 97.1% of the Company's investment securities portfolio at December 31, 2007, compared to 96.3% at year-end 2006. In order to improve the yields of the securities portfolio, the Company has altered the mix and duration of its portfolio. The mix has changed by reducing the outstanding balances of U.S. Treasury Notes and moving to Mortgage-Backed Securities of U.S. Agencies and State and Political Subdivisions. Securities available for sale had a net unrealized gain of \$19.3 million at year-end, compared to a net unrealized loss of \$27.3 million the preceding year. These amounts are reflected, on an after-tax basis, in the Company's other comprehensive income in shareholders' equity, as an unrealized gain of \$12.2 million at year-end 2007 compared to an unrealized loss of \$17.3 million for 2006.

The securities portfolio achieved an average yield on a tax-equivalent basis of 4.8% for 2007, compared to 4.4% in 2006 and 3.3% in 2005. The increase in yield is due to the replacement of lower yielding securities with higher yielding securities, as well as a small increase in the average life of the portfolio. A significant portion of the investment portfolio must be reinvested each year as a result of its liquidity. The average life of the securities portfolio was 29.3 months at December 31, 2007 compared to 28.9 months at year-end 2006. Management expects to continue to hold the average life of the investment portfolio at approximately the same level in 2008.

Included in Tables 8 and 9 are analyses of the cost, fair value and average yield (tax equivalent basis) of securities available for sale and securities held to maturity.

Table of Contents

The securities portfolio contains securities that have unrealized losses and are not deemed to be other-than-temporarily impaired (see the table of these securities in Note 4 to the Consolidated Financial Statements on pages 62 through 64 of this document). There are U.S. Treasury obligations, federal agency mortgage backed securities, and municipal securities that have had unrealized losses for greater than 12 months. These unrealized losses resulted from interest rate volatility in the markets and were not related to the credit quality of the investments. The Company has the ability and intent to hold these investments until a recovery of fair value is achieved, which may be maturity. Therefore, management does not consider these securities to be other-than-temporarily impaired at December 31, 2007.

Other Earning Assets

Federal funds transactions essentially are overnight loans between financial institutions, which allow for either the daily investment of excess funds or the daily borrowing of another institution's funds in order to meet short-term liquidity needs. The net sold position was \$202.7 million at December 31, 2007 and \$515.3 million at December 31, 2006.

Table of Contents

The Investment Banking Division of the Company's principal affiliate bank buys and sells federal funds as agent for non-affiliated banks. Because the transactions are pursuant to agency arrangements, these transactions do not appear on the balance sheet and averaged \$634.4 million in 2007 and \$472.4 million in 2006.

At December 31, 2007, the Company held securities bought under agreements to resell of \$509.3 million compared to \$333.6 million at year-end 2006. The Company used these instruments as short-term secured investments, in lieu of selling federal funds, or to acquire securities required for a repurchase agreement. These investments averaged \$224.0 million in 2007 and \$209.7 million in 2006.

The Investment Banking Division also maintains an active securities trading inventory. The average holdings in the securities trading inventory in 2007 were \$57.0 million, compared to \$54.8 million in 2006, and were recorded at market value. As discussed at Quantitative and Qualitative Disclosures About Market Risk - Trading Account in Part II, Item 7A on page 46 below, the Company offsets the trading account securities by the sale of exchange-traded financial futures contracts, with both the trading account and futures contracts marked to market daily.

Deposits and Borrowed Funds

Deposits represent the Company's primary funding source for its asset base. In addition to the core deposits garnered by the Company's retail branch structure, the Company continues to focus on its cash management services, as well as its asset management and mutual fund servicing segments in order to attract and retain additional core deposits. Deposits totaled \$6.6 billion at December 31, 2007 and \$6.3 billion at year-end 2006. Deposits averaged \$5.1 billion in 2007 and \$5.5 billion in 2006. The Company continually strives to expand, improve and promote its cash management services in order to attract and retain commercial funding customers.

Noninterest bearing demand deposits averaged \$1.9 billion in 2007 and \$1.8 billion in 2006. These deposits represented 36.5% of average deposits in 2007, compared to 33.5% in 2006. The Company's large commercial customer base provides a significant source of noninterest bearing deposits. Many of these commercial accounts do not earn interest; however, they receive an earnings credit to offset the cost of other services provided by the Company.

Securities sold under agreements to repurchase and fed funds purchased totaled \$1.7 billion at December 31, 2007, and \$1.6 billion at December 31, 2006. This liability averaged \$1.3 billion in 2007 and \$1.1 billion in 2006. Repurchase agreements are transactions involving the exchange of investment funds by the customer for securities by the Company, under an agreement to repurchase the same issues at an agreed-upon price and date. The Company enters into these transactions with its downstream correspondent banks, commercial customers, and various trust, mutual fund and local government relationships.

Table of Contents

The Company has twelve fixed-rate advances at December 31, 2007, from the Federal Home Loan Bank at rates of 3.80% to 7.13%. These advances, collateralized by the Company's securities, are used to offset interest rate risk of longer-term fixed-rate loans.

Capital Resources and Liquidity

The Company places a significant emphasis on the maintenance of a strong capital position, which promotes investor confidence, provides access to funding sources under favorable terms, and enhances the Company's ability to capitalize on business growth and acquisition opportunities. The Company is not aware of any trends, demands, commitments, events or uncertainties that would materially change its capital position or affect its liquidity in the foreseeable future. Capital is managed for each subsidiary based upon its respective risks and growth opportunities as well as regulatory requirements.

Total shareholders' equity was \$890.6 million at December 31, 2007, compared to \$848.9 million one year earlier. During each year, management has the opportunity to repurchase shares of the Company's stock if it concludes that the repurchases would enhance overall shareholder value. During 2007 and 2006, the Company acquired 1,099,998 and 850,997 shares, respectively, of its common stock.

Risk-based capital guidelines established by regulatory agencies establish minimum capital standards based on the level of risk associated with a financial institution's assets. A financial institution's total capital is required to equal at least 8% of risk-weighted assets. At least half of that 8% must consist of Tier 1 core capital, and the remainder may be Tier 2 supplementary capital. The risk-based capital guidelines indicate the specific risk weightings by type of asset. Certain off-balance-sheet items (such as standby letters of credit and binding loan commitments) are multiplied by credit conversion factors to translate them into balance sheet equivalents before assigning them specific risk weightings. Due to the Company's high level of core capital and substantial portion of earning assets invested in government securities, the Tier 1 capital ratio of 13.74% and total capital ratio of 14.58% substantially exceed the regulatory minimums.

For further discussion of capital and liquidity, see the Liquidity Risk section of Item 7A, Quantitative and Qualitative Disclosures about Market Risk on page 48 of this report.

For further discussion of regulatory capital requirements, see note 10, Regulatory Requirements with the Notes to Consolidated Financial Statements under Item 8 on pages 68 and 69.

Commitments, Contractual Obligations and Off-balance Sheet Arrangements

The Company's main off-balance sheet arrangements are loan commitments, commercial and standby letters of credit, futures contracts and forward exchange contracts, which have maturity dates rather than payment due dates. These commitments and contingent liabilities are not required to be recorded on the Company's balance sheet. Since commitments associated with letters of credit and lending and financing arrangements may expire unused, the amounts shown do not necessarily reflect the actual future cash funding requirements. See Table 14 below, as well as Note 15, Commitments, Contingencies and Guarantees in the Notes to Consolidated Financial Statements under Item 8 on pages 78 and 79 for detailed information and further discussion of these arrangements. Management does not anticipate any material losses from its off-balance sheet arrangements.

Table of Contents

Table 14

COMMITMENTS, CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS (in thousands)

The table below details the contractual obligations for the Company as of December 31, 2007. The Company has no capital leases or long-term purchase obligations.

	Payments due by period

On January 1, 2007, the Company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes. As of December 31, 2007, our total liabilities for unrecognized tax benefits were \$1,477 million. We cannot reasonably estimate the timing of the future payments of these liabilities. Therefore, these liabilities have been excluded from the table above. See Note 17 to the consolidated financial statements for information regarding the liabilities associated with unrecognized tax benefits.

The table below details the commitments, contingencies and guarantees for the Company as of December 31, 2007.

	Maturities due by Period

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of financial condition and results of operations discusses the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets

Table of Contents

and liabilities and the disclosure of contingent liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to customers and suppliers, allowance for loan losses, bad debts, investments, financing operations, long-lived assets, taxes, other contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which have formed the basis for making such judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Under different assumptions or conditions, actual results may differ from the recorded estimates.

Management believes that the Company's critical accounting policies are those relating to: allowance for loan losses, goodwill and other intangibles, revenue recognition and accounting for stock-based compensation.

Allowance for Loan Losses

The Company's allowance for loan losses represents management's judgment of the loan losses inherent in the loan portfolio. The allowance is maintained and computed at each bank at a level that such individual bank management considers adequate. The allowance is reviewed quarterly, considering such factors as historical trends, internal ratings, migration analysis, current economic conditions, loan growth and individual impairment testing.

Larger commercial loans are individually reviewed for potential impairment. For larger commercial loans, if management deems it probable that the borrower cannot meet its contractual obligations with respect to payment or timing, such loans are deemed to be impaired under Statement of Financial Accounting Standards (SFAS) No. 114, Accounting by Creditors for Impairment of a Loan. Such loans are then reviewed for potential impairment based on management's estimate of the borrower's ability to repay the loan given the availability of cash flows, collateral and other legal options. Any allowance related to the impairment of an individually impaired loan is based on the present value of discounted expected future cash flows, the fair value of the underlying collateral, or the fair value of the loan. Based on this analysis, some loans that are classified as impaired under SFAS 114 do not have a specific allowance and there is no related impairment as the discounted expected future cash flows or the fair value of the underlying collateral exceeds the Company's basis in the impaired loan.

The Company also maintains an internal risk grading system for other loans not subject to individual impairment. An estimate of the inherent loan losses on such risk-graded loans is based on a migration analysis which computes the net charge-off experience related to each risk category.

An estimate of inherent losses is computed on remaining loans based on the type of loan. Each type of loan is segregated into a pool based on the nature of such loans. This includes remaining commercial loans that have a low risk grade, as well as homogenous loans. Homogenous loans include automobile loans, credit card loans and other consumer loans. Allowances are established for each pool based on the loan type using historical loss rates, certain statistical measures and loan growth.

An estimate of the total inherent loss is based on the above three computations. From this an adjustment not to exceed 10 percent can be made based on other factors management considers to be important in evaluating the probable losses in the portfolio such as general economic conditions, loan trends, risk management and loan administration and changes in internal policies.

Goodwill and Other Intangibles

Goodwill is tested annually for impairment. Goodwill is assigned to various reporting units based on which units were expected to benefit from the synergies of the combination at the time of the acquisition. The Company tests impairment at the reporting unit level by estimating the fair value of the reporting unit. If management s

Table of Contents

estimate of the fair value of the reporting unit exceeds the carrying amount of the goodwill, there is no impairment. In order to estimate the fair value of the reporting units, management uses multiples of earnings and assets from recent acquisition of similar banking and fund servicing entities as such entities have comparable operations and economic characteristics. The Company has performed annual impairment tests of goodwill since the inception of SFAS 142, *Accounting for Goodwill*. As a result of such impairment tests, the Company has not recognized an impairment charge.

For customer-based identifiable intangibles, the Company amortizes the intangibles over their estimated useful lives of up to seventeen years.

Revenue Recognition

Revenue recognition includes the recording of interest on loans and securities and is recognized based on rate multiplied by the principal amount outstanding. Interest accrual is discontinued when, in the opinion of management, the likelihood of collection becomes doubtful, or the loan is past due for a period of ninety days or more unless the loan is both well-secured and in the process of collection. Other noninterest income is recognized as services are performed or revenue-generating transactions are executed.

Accounting for Stock-Based Compensation

Pursuant to the requirements of SFAS 123(R), *Accounting for Stock Based Compensation*, the amount of compensation recognized is based primarily on the value of the awards on the grant date. To value stock options, the Company uses the Black-Scholes model which requires the input of several variables. The expected option life is derived from historical exercise patterns and represents the amount of time that options granted are expected to be outstanding. The expected volatility is based on a combination of historical and implied volatilities of the Company's stock. The interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The fair value of the stock on the grant date is used to value awards of restricted stock. Forfeitures are estimated at the grant date and reduce the expense recognized. The forfeiture rate is adjusted annually based on experience. The value of the awards, adjusted for forfeitures, is amortized using the straight-line method over the requisite service period. Management of the Company believes that it is probable that all current performance-based awards will achieve the performance target. Please see the discussion of the *Accounting for Stock-Based Compensation* under Note 1 in the Notes to the Consolidated Financial Statements under Item 8 on pages 57 and 58.

Accounting for Uncertainty in Income Taxes

Under FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109, the Company records the financial statement effects of an income tax position when it is more likely than not, based on the technical merits, that it will be sustained upon examination. A tax position that meets the more-likely-than-not recognition threshold is measured and recorded as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority. Previously recognized tax positions are derecognized in the first period in which it is no longer more likely than not that the tax position will be sustained. The benefit associated with previously unrecognized tax positions are generally recognized in the first period in which the more-likely-than-not threshold is met at the reporting date, the tax matter is ultimately settled through negotiation or litigation or when the related statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired. The recognition, derecognition and measurement of tax positions are based on management's best judgment given the facts, circumstance and information available at the reporting date. See the discussion of *Liabilities Associated with Unrecognized Tax Benefits* under Note 17 in the Notes to the Consolidated Financial Statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Risk Management

Market risk is a broad term for the risk of economic loss due to adverse changes in the fair value of a financial instrument. These changes may be the result of various factors, including interest rates, foreign exchange prices, commodity prices or equity prices. Financial instruments that are subject to market risk can be classified either as held for trading or held for purposes other than trading.

The Company is subject to market risk primarily through the effect of changes in interest rates of its assets held for purposes other than trading. The following discussion of interest risk, however, combines instruments held for trading and instruments held for purposes other than trading because the instruments held for trading represent such a small portion of the Company's portfolio that the interest rate risk associated with them is immaterial.

Interest Rate Risk

In the banking industry, a major risk exposure is changing interest rates. To minimize the effect of interest rate changes to net interest income and exposure levels to economic losses, the Company manages its exposure to changes in interest rates through asset and liability management within guidelines established by its Funds Management Committee (FMC) and approved by the Company's Board of Directors. The FMC has the responsibility for approving and ensuring compliance with asset/liability management policies, including interest rate exposure. The Company's primary method for measuring and analyzing consolidated interest rate risk is the Net Interest Income Simulation Analysis. The Company also uses a Net Portfolio Value model to measure market value risk under various rate change scenarios and a gap analysis to measure maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time. The Company does not use hedges or swaps to manage interest rate risk except for limited use of futures contracts to offset interest rate risk on certain securities held in its trading portfolio.

Overall, the Company attempts to manage interest rate risk by positioning the balance sheet to maximize net interest income while maintaining an acceptable level of interest rate and credit risk, remaining mindful of the relationship among profitability, liquidity, interest rate risk and credit risk.

Net Interest Income Modeling

The Company's primary interest rate risk tool, the Net Interest Income Simulation Analysis, measures interest rate risk and the effect of interest rate changes on net interest income and net interest margin. This analysis incorporates all of the Company's assets and liabilities together with forecasted changes in the balance sheet and assumptions that reflect the current interest rate environment. Through these simulations, management estimates the impact on net interest income of a 200 basis point upward or downward gradual change (e.g. ramp) of market interest rates over a one year period. Assumptions are made to project rates for new loans and deposits based on historical analysis, management outlook and repricing strategies. Asset prepayments and other market risks are developed from industry estimates of prepayment speeds and other market changes. Since the results of these simulations can be significantly influenced by assumptions utilized, management evaluates the sensitivity of the simulation results to changes in assumptions.

Table of Contents

Table 15 shows the net interest income increase or decrease over the next twelve months as of December 31, 2007 and 2006.

Table 15

MARKET RISK (in thousands)

Rates in Basis Points	Net Interest Income	
	December 31, 2007 Amount of Change	December 31, 2006 Amount of Change
200	\$ (4,441)	\$ (1,445)
100	(2,221)	(723)
Static		
(100)	(37)	1,971
(200)	(74)	3,943

The Company is slightly liability sensitive at December 31, 2007 to increases or decreases in rates. A decrease in interest rates will have little impact on net interest income. Increases in interest rates will cause slightly larger decreases in net interest income than in the declining rate environment. The Company's average life of the investment portfolio has lengthened slightly and the Company's loan portfolio has grown with a slightly higher percentage of total loans being fixed rate as compared to 2006. These scenarios cause interest income from these assets to be less sensitive to rate changes because they reprice less frequently. The Company also has a greater percentage of interest expense from overnight liabilities and shorter rate sensitivity from deposits which contribute to interest expense from liabilities to reprice more frequently and be more sensitive to rate changes than assets. The Company is positioned with the current low rate environment to be very neutral to further interest rate decreases.

Repricing Mismatch Analysis

The Company also evaluates its interest rate sensitivity position in an attempt to maintain a balance between the amount of interest-bearing assets and interest-bearing liabilities which are expected to mature or reprice at any point in time. While a traditional repricing mismatch analysis (gap analysis) provides a snapshot of interest rate risk, it does not take into consideration that assets and liabilities with similar repricing characteristics may not, in fact, reprice at the same time or the same degree. Also, it does not necessarily predict the impact of changes in general levels of interest rates on net interest income.

Management attempts to structure the balance sheet to provide for the repricing of approximately equal amounts of assets and liabilities within specific time intervals. Table 16 is a static gap analysis, which presents the Company's assets and liabilities, based on their repricing or maturity characteristics. This analysis shows that the Company is in a positive gap position because assets maturing or repricing exceed liabilities.

Trading Account

The Company's subsidiary UMB Bank, n.a. carries taxable governmental securities in a trading account that is maintained according to Board-approved policy and procedures. The policy limits the amount and type of securities that can be carried in the trading account, requires compliance with any limits under applicable law and regulations, and mandates the use of a value at risk methodology to manage price volatility risks within financial parameters. The risk associated with the carrying of trading securities is offset by the sale of exchange-traded financial futures contracts, with both the trading account and futures contracts marked to market daily.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

This account had a balance of \$43.9 million as of December 31, 2007, compared to \$64.5 million as of December 31, 2006.

The Manager of the Investment Banking Division of UMB Bank, n.a. presents documentation of the methodology used in determining value at risk at least annually to the Board for approval in compliance with OCC Banking Circular 277, Risk Management of Financial Derivatives, and other banking laws and regulations. The aggregate value at risk is reviewed quarterly. The aggregate value at risk in the trading account was negligible as of December 31, 2007 and 2006.

Table of Contents

Other Market Risk

The Company does not have material commodity price risks or derivative risks.

Credit Risk

Credit risk represents the risk that a customer or counterparty may not perform in accordance with contractual terms. Credit risk is inherent in the financial services business and results from extending credit to customers. The Company utilizes a centralized credit administration function, which provides information on affiliate bank risk levels, delinquencies, an internal ranking system and overall credit exposure. Loan requests are centrally reviewed to insure the consistent application of the loan policy and standards. In addition, the Company has an internal loan review staff that operates independently of the affiliate banks. This review team performs periodic examinations of each bank's loans for credit quality, documentation and loan administration. The respective regulatory authority of each affiliate bank also reviews loan portfolios.

Another means of ensuring loan quality is diversification of the portfolio. By keeping its loan portfolio diversified, the Company has avoided problems associated with undue concentrations of loans within particular industries. Commercial real estate loans comprise only 21.0% of total loans, with no history of significant losses. The Company has no significant exposure to highly-leveraged transactions and has no foreign credits in its loan portfolio.

The allowance for loan losses (ALL) is discussed on pages 25 and 26. Also, please see Table 4 for a five-year analysis of the ALL. The adequacy of the ALL is reviewed quarterly, considering such items as historical loss trends including a migration analysis, a review of individual loans, current economic conditions, loan growth and characteristics, industry or segment concentration and other factors. A primary indicator of credit quality and risk management is the level of nonperforming loans. Nonperforming loans include both nonaccrual loans and restructured loans. The Company's nonperforming loans were flat at December 31, 2007, compared to an increase of \$1.1 million a year earlier. The Company's nonperforming loans have not exceeded 0.47% of total loans in any of the last five years. While the Company plans to increase its loan portfolio, management does not intend to compromise the Company's high credit standards as it grows its loan portfolio. The impact of future loan growth on the allowance for loan losses is uncertain as it is dependent on many factors including asset quality and changes in the overall economy.

The Company had \$1.2 million in other real estate owned as of December 31, 2007. There was \$0.3 million of other real estate owned at December 31, 2006. Loans past due more than 90 days totaled \$2.9 million at December 31, 2007, compared to \$4.0 million at December 31, 2006.

A loan is generally placed on nonaccrual status when payments are past due 90 days or more and/or when management has considerable doubt about the borrower's ability to repay on the terms originally contracted. The accrual of interest is discontinued and recorded thereafter only when actually received in cash.

Certain loans are restructured to provide a reduction or deferral of interest or principal due to deterioration in the financial condition of the respective borrowers. The Company had \$144,000 of restructured loans at December 31, 2007, and \$24,000 at December 31, 2006.

Liquidity Risk

Liquidity represents the Company's ability to meet financial commitments through the maturity and sale of existing assets or availability of additional funds. The Company believes that the most important factor in the preservation of liquidity is maintaining public confidence that facilitates the retention and growth of a large, stable supply of core deposits and wholesale funds. Ultimately, public confidence is generated through profitable operations, sound credit quality and a strong capital position. The primary source of liquidity for the Company is regularly scheduled payments on and maturity of assets, which include \$3.4 billion of high-quality securities available for sale. The liquidity of the Company and its affiliate banks is also enhanced by its activity in the federal funds market and by its core deposits.

Another factor affecting liquidity is the amount of deposits and customer repurchase agreements that have pledging requirements. All customer repurchase agreements require collateral in the form of a security. U.S. Government, other public entities, and certain trust depositors require the Company to pledge securities if their deposit balances are greater than the FDIC-insured deposit limitations. These pledging requirements affect liquidity risk in that the related security cannot otherwise be disposed due to the pledging restriction. At December 31, 2007, approximately 78.2 percent of the securities available-for-sale were pledged or used as collateral; as compared to 79.3 percent at December 31, 2006.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Neither the Company nor its subsidiaries are active in the debt market. The traditional funding source for the Company's subsidiary banks has been core deposits. The Company has not issued any debt since 1993 when \$15 million of medium-term notes were issued to fund bank acquisitions. Prior to being paid off in February 2003, these notes were rated A3 by Moody's Investor Service and A- by Standard and Poor's.

The Company also has other commercial commitments that may impact liquidity. These commitments include unused commitments to extend credit, standby letters of credit, and commercial letters of credit. The total amount of these commercial commitments at December 31, 2007, was \$2.6 billion. The Company believes that

Table of Contents

since many of these commitments expire without being drawn upon, the total amount of these commercial commitments does not necessarily represent the future cash requirements of the Company.

The Company's cash requirements consist primarily of dividends to shareholders, debt service and treasury stock purchases. Management fees and dividends received from subsidiary banks traditionally have been sufficient to satisfy these requirements and are expected to be sufficient in the future. The Company's subsidiary banks are subject to various rules regarding payment of dividends to the Company. For the most part, all banks can pay dividends at least equal to their current year's earnings without seeking prior regulatory approval. From time to time, approvals have been requested to allow a subsidiary bank to pay a dividend in excess of its current earnings. All such requests have been approved.

Operational Risk

The Company is exposed to numerous types of operational risk. Operational risk generally refers to the risk of loss resulting from the Company's operations, including, but not limited to: the risk of fraud by employees or persons outside the Company; the execution of unauthorized transactions by employees or others, errors relating to transaction processing and systems, and breaches of the internal control system and compliance requirements. This risk of loss also includes the potential legal or regulatory actions that could arise as a result of an operational deficiency, or as a result of noncompliance with applicable regulatory standards. Included in the legal and regulatory issues with which the Company must comply are a number of recently imposed rules resulting from the enactment of the Sarbanes-Oxley Act of 2002.

The Company operates in many markets and places reliance on the ability of its employees and systems to properly process a high number of transactions. In the event of a breakdown in the internal control systems, improper operation of systems or improper employee actions, the Company could suffer financial loss, face regulatory action and suffer damage to its reputation. In order to address this risk, management maintains a system of internal controls with the objective of providing proper transaction authorization and execution, safeguarding of assets from misuse or theft, and ensuring the reliability of financial and other data.

The Company maintains systems of controls that provide management with timely and accurate information about the Company's operations. These systems have been designed to manage operational risk at appropriate levels given the Company's financial strength, the environment in which it operates, and considering factors such as competition and regulation. The Company has also established procedures that are designed to ensure that policies relating to conduct, ethics and business practices are followed on a uniform basis. In certain cases, the Company has experienced losses from operational risk. Such losses have included the effects of operational errors that the Company has discovered and included as expense in the statement of income. While there can be no assurance that the Company will not suffer such losses in the future, management continually monitors and works to improve its internal controls, systems and corporate-wide processes and procedures.

ITEM 8. CONSOLIDATED FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of UMB Financial Corporation & Subsidiaries:

We have audited the accompanying consolidated balance sheets of UMB Financial Corporation and Subsidiaries (the Company) as of December 31, 2007 and 2006, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of UMB Financial Corporation and Subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the Consolidated Financial Statements, in 2007 the Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, and in 2006 the Company changed its method of accounting for stock-based compensation.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2008 expressed an unqualified opinion on the Company's internal control over financial reporting.

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF ACCOUNTING POLICIES

UMB Financial Corporation (the Company) is a multi-bank holding company, which offers a wide range of banking and other financial services to its customers through its branches and offices in the states of Missouri, Kansas, Colorado, Illinois, Oklahoma, Arizona, Nebraska, Wisconsin and Pennsylvania. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. These estimates and assumptions also impact reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Following is a summary of the more significant accounting policies to assist the reader in understanding the financial presentation.

Consolidation

The Company and its subsidiaries are included in the consolidated financial statements (references hereinafter to the Company in these Notes to Consolidated Financial Statements include wholly-owned subsidiaries). Intercompany accounts and transactions have been eliminated.

Revenue Recognition

Interest on loans and securities is recognized based on rate times the principal amount outstanding. Interest accrual is discontinued when, in the opinion of management, the likelihood of collection becomes doubtful. Other noninterest income is recognized as services are performed or revenue-generating transactions are executed.

Cash and Due From Banks

Cash on hand, cash items in the process of collection, and amounts due from correspondent banks and the Federal Reserve Bank are included in cash and due from banks.

Loans and Loans Held for Sale

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

A loan is considered to be impaired when management believes it is probable that it will be unable to collect all principal and interest due according to the contractual terms of the loan. If a loan is impaired, the Company records a loss valuation allowance equal to the carrying amount of the loan in excess of the present value of the estimated future cash flows discounted at the loan's effective rate, based on the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Consumer loans are collectively evaluated for impairment. Commercial loans are generally evaluated for impairment on a loan-by-loan basis.

The adequacy of the allowance for loan losses is based on management's continuing evaluation of the pertinent factors underlying the quality of the loan portfolio, including actual loan loss experience, current economic conditions, detailed analysis of individual loans for which full collectibility may not be assured, determination of the existence and realizable value of the collateral and guarantees securing such loans. The actual losses, notwithstanding such considerations, however, could differ from the amounts estimated by management.

Loans held for sale are carried at the lower of aggregate cost or market value. Loan fees (net of certain direct loan origination costs) on loans held for sale are deferred until the related loans are sold or repaid. Gains or losses on loan sales are recognized at the time of sale and determined using the specific identification method.

Table of Contents

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Securities

Debt securities available for sale principally include U.S. Treasury and agency securities and mortgage-backed securities. Securities classified as available for sale are measured at fair value. Unrealized holding gains and losses are excluded from earnings and reported in accumulated other comprehensive income/(loss) until realized. Realized gains and losses on sales are computed by the specific identification method at the time of disposition and are shown separately as a component of noninterest income.

Securities held to maturity are carried at amortized historical cost based on management's intention, and the Company's ability, to hold them to maturity. The Company classifies certain securities of state and political subdivisions as held to maturity. Certain significant unforeseeable changes in circumstances may cause a change in the intent to hold these securities to maturity. For example, such changes may include deterioration in the issuer's credit-worthiness that is expected to continue or a change in tax law that eliminates the tax-exempt status of interest on the security.

Trading securities, generally acquired for subsequent sale to customers, are carried at market value. Market adjustments, fees and gains or losses on the sale of trading securities are considered to be a normal part of operations and are included in trading and investment banking income.

On the Consolidated Statements of Shareholders' Equity, Accumulated Other Comprehensive Income/(Loss) consists only of unrealized gain (loss) on securities.

Goodwill and Other Intangibles

Goodwill on purchased affiliates represents the cost in excess of net tangible assets acquired. The Company has elected November 30 as its annual measurement date for testing impairment and as a result of the impairment tests of goodwill performed on that date in 2007, 2006 and 2005, no impairment charge was recorded. Other intangible assets are amortized over a period of up to 17 years.

Bank Premises and Equipment

Bank premises and equipment are stated at cost less accumulated depreciation, which is computed primarily on the straight line method. Bank premises are depreciated over 20 to 40 year lives, while equipment is depreciated over lives of 3 to 20 years. Gains and losses from the sale of bank premises and equipment are included in gains on sales of assets and deposits, net.

Impairment of Long-Lived Assets

Long-lived assets, including premises and equipment, are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or group of assets may not be recoverable. The impairment review includes a comparison of future cash flows expected to be generated by the asset or group of assets to their current carrying value. If the carrying value of the asset or group of assets exceeds expected cash flows (undiscounted and without interest charges), an impairment loss is recognized to the extent the carrying value exceeds fair value.

Taxes

The Company recognizes certain income and expenses in different time periods for financial reporting and income tax purposes. The provision for deferred income taxes is based on the liability method and represents the change in the deferred income tax accounts during the year excluding the tax effect of the change in net unrealized gain/(loss) on securities available for sale.

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company adopted the provisions of FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, on January 1, 2007. This Interpretation clarifies the accounting and reporting for uncertainties in income tax law. It prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions. Differences between a tax position taken or expected to be taken in the Company's tax returns and the amount of benefit recognized and measured in the financial statements result in unrecognized tax benefits, which are recorded in the balance sheet as either a liability for unrecognized tax benefits or reductions to recorded tax assets, as applicable.

The Company recognizes accrued interest related to unrecognized tax benefits in interest expense and penalties in other noninterest expense. For the year ended December 31, 2007, the Company has recognized an immaterial amount in interest and penalties related to the unrecognized tax benefits.

Per Share Data

Basic income per share is computed based on the weighted average number of shares of common stock outstanding during each period. Diluted year-to-date income per share includes the dilutive effect of 293,820; 220,602; and 203,198 shares issueable upon the exercise of stock options granted by the Company at December 31, 2007, 2006, and 2005, respectively.

Options issued under employee benefit plans to purchase 512,312; 380,661; and 153,438 shares of common stock were outstanding at December 31, 2007, 2006, and 2005, respectively, but were not included in the computation of diluted earnings per share because the options were anti-dilutive.

On May 30, 2006, the Company's common stock was split 2-for-1 in the form of a stock dividend. Stockholders received one additional share for every share owned. The Board of Directors declared the stock split April 25, 2006 and the record date was May 16, 2006. All share and per share amounts (including stock options and restricted stock) in the Consolidated Financial Statements and accompanying notes were restated to reflect the split.

Accounting for Stock-Based Compensation

Effective with the first quarter of 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123 (R) *Share Based Payment*. SFAS No. 123 (R) establishes accounting standards for all transactions in which the Company exchanges its equity instruments for goods and services. SFAS No. 123 (R) focuses primarily on accounting for transactions with employees, and carries forward, without change, prior guidance for share-based payments for transactions with non-employees.

SFAS No. 123 (R) eliminates the intrinsic value measurement objective in APB Opinion No. 25 and generally requires the Company to measure the cost of employee services received in exchange for an award of equity instruments based on the fair value of the award on the date of the grant. The standard requires the grant date fair value to be estimated using either an option-pricing model which is consistent with the terms of the award or a market observed price, if such a price exists. Such cost is generally recognized over the vesting period during which an employee is required to provide service in exchange for the award. The standard also requires the Company to estimate the number of instruments that will ultimately be issued, rather than accounting for forfeitures as they occur.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company uses the Black-Scholes pricing model to determine the fair value of its options. The assumptions for stock-based awards in the past three years utilized in the model are shown in the table below.

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Black-Scholes pricing model:			
Weighted average fair value of the granted options	\$ 8.77	8.60	8.03
Weighted average risk-free interest rate	4.34%	4.72%	4.32%
Expected option life in years	6.77	6.50	7.97
Expected volatility	15.71%	16.13%	18.62%
Expected dividend yield	1.46%	1.50%	1.53%

The expected option life is derived from historical exercise patterns and represents the amount of time that options granted are expected to be outstanding. The expected volatility is based on historical volatilities of the Company's stock. The interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The modified prospective method of adoption was chosen by the Company. This method requires the provisions of SFAS No. 123 (R) to be generally applied to share based awards granted or modified after the adoption of the new standard. In addition, compensation expense must be recognized for any unvested awards outstanding as of the date of adoption on a straight-line basis over the remaining vesting period. The financial statements for periods prior to the adoption of SFAS No. 123 (R) are not changed under this method.

As noted above, prior to adoption of SFAS No. 123 (R), forfeitures were recognized as they actually occurred. Under the current standard an estimate of forfeitures is made for all share based compensation outstanding and applied to compensation expense starting at the initial grant date. Forfeiture adjustments are required over the term of each grant's service period to account for changes in the Company's actual forfeitures of share based instruments. The Company recognized a transition adjustment of \$0.2 million in 2006 upon adoption of SFAS No. 123 (R).

The Company recognized \$1.2 million and \$0.7 million in expense related to outstanding stock options and \$2.1 million and \$1.0 million in expense related to outstanding restricted stock grants for the years ended December 31, 2007 and 2006, respectively. The Company has \$4.4 million of unrecognized compensation expense related to the outstanding options and \$4.9 million of unrecognized compensation expense related to outstanding restricted stock grants at December 31, 2007.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table illustrates the effect on net income and earnings per share, if the Company had applied the fair value recognition provisions of SFAS No. 123 (R) to stock-based employee compensation in 2005 (in thousands):

	Year Ended December 31 2005
Net income, as reported	\$ 56,318
Add: Stock based compensation expense included in reported net income, net of tax	268
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	1,095
Pro forma net income	\$ 55,491
Earnings per share:	
Basic-as reported	1.31
Basic-pro forma	1.29
Diluted-as reported	1.30
Diluted-pro forma	1.28

2. NEW ACCOUNTING PRONOUNCEMENTS

Accounting for Uncertainty in Income Taxes – an Interpretation of Financial Accounting Standards Board (FASB) Statement No. 109 In June 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or to be taken on a tax return. This interpretation also provides additional guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company adopted the provisions of FIN 48 effective January 1, 2007 (See Note 17).

Fair Value Measurement In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurement. The Statement establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosure about fair value measurements. This Statement is applicable under other accounting pronouncements that require fair value recognition. It does not create new fair value measurements; however, it provides increased consistency in the application of various fair value measurements. This Statement is effective for all financial instruments acquired or issued after January 1, 2008. The Company does not expect the adoption of this Statement to have a material effect on its consolidated financial statements.

The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115 In February 2007, the FASB issued SFAS No. 159 The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Statement No. 115 . This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. For calendar year companies, the Statement is effective for all financial instruments acquired or issued after January 1, 2008. The Company does not expect the adoption of this Statement will have a material effect on its consolidated financial statements.

Business Combinations In December 2007, the FASB issued SFAS No. 141 (revised 2007) Business Combinations . The purpose of this statement is to improve the information that a reporting entity provides in its

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

financial reports about a business combination and its effects. This Statement establishes principles and requirements for how the acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. It also retains from the original pronouncement, SFAS 141, the requirement that the acquisition method (purchase method) be used in all business combinations and the guidance for identifying and recognizing intangible assets separately from goodwill. This Statement applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply it before that date. The Company does not expect the adoption of this Statement to have a material effect on its consolidated financial statements.

Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51 In December 2007, FASB issued SFAS 160, *Noncontrolling Interest in Consolidated Financial Statements – an amendment of ARB No. 51*. This statement amends Accounting Research Bulletin (ARB) 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. It eliminates the former minority interest presentation. This statement also requires that parent recognize a gain or loss in net income when a subsidiary is deconsolidated. This statement is effective for fiscal years, and interim periods within those years beginning on or after December 15, 2008. Earlier adoption is prohibited. The Company does not expect the adoption of this Statement to have a material effect on its consolidated financial statements.

3. LOANS AND ALLOWANCE FOR LOAN LOSSES

This table provides a summary of the major categories of loans as of December 31, 2007 and 2006 (in thousands):

Total	\$ 3,265,760	\$ 3,481	\$ (30,593)	\$ 3,238,648

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents contractual maturity information for securities available for sale at December 31, 2007 (in thousands):

	<u>Amortized Cost</u>	<u>Fair Value</u>
Due in 1 year or less	\$ 808,851	\$ 809,580
Due after 1 year through 5 years	1,236,264	1,256,818
Due after 5 years through 10 years	216,485	218,134
Due after 10 years	51,837	51,976
	<u>2,313,437</u>	<u>2,336,508</u>
Total	2,313,437	2,336,508
Mortgage-backed securities	1,052,304	1,049,444
	<u>1,052,304</u>	<u>1,049,444</u>
Total securities available for sale	<u>\$ 3,365,741</u>	<u>\$ 3,385,952</u>

Securities may be disposed of before contractual maturities due to sales by the Company or because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

During 2007, proceeds from the sales of securities available for sale were \$67,929,000 compared to \$3,895,000 for 2006. Securities transactions resulted in gross realized gains of \$1,201,000 for 2007, \$130,000 for 2006 and \$8,000 for 2005. The gross realized losses were \$191,000 for 2007, \$13,000 for 2006 and \$233,000 for 2005.

Trading Securities

The net unrealized gains on trading securities at December 31, 2007, 2006, and 2005 were \$67,335, \$62,214, and \$12,600 respectively, and were included in trading and investment banking income.

Securities Held to Maturity

The table below provides detailed information for securities held to maturity at December 31, 2007 and 2006 (in thousands):

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

December 31

<u>2007</u>	<u>Amortized Cost</u>	<u>Unrealized Gains</u>	<u>Unrealized Losses</u>	<u>Fair Value</u>
State and political subdivisions	\$ 37,658	\$ 4,551	\$	\$ 42,209
<u>2006</u>				
State and political subdivisions	\$ 44,781	\$ 38	\$	\$ 44,819

The following table presents contractual maturity information for securities held to maturity at December 31, 2007 (in thousands):

	<u>Amortized Cost</u>	<u>Fair Value</u>
Due in 1 year or less	\$ 1,423	\$ 1,593
Due after 1 year through 5 years	8,006	8,974
Due after 5 years through 10 years	16,780	18,809
Due after 10 years	11,449	12,833
Total securities held to maturity	\$ 37,658	\$ 42,209

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

There were no sales of securities held to maturity during 2007 and 2006.

Securities available for sale and held to maturity with a market value of \$3,206,222,000 at December 31, 2007, and \$3,004,335,000 at December 31, 2006, were pledged to secure U.S. Government deposits, other public deposits and certain Trust deposits as required by law.

The following table shows the Company's available for sale investments' gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2007 and 2006 (in thousands).

2007	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Description of Securities

Municipal securities available for sale	44,821	(327)	152,196	(861)	197,017	(1,188)
Total temporarily-impaired debt securities available for sale	\$ 679,454	\$ (2,447)	\$ 528,341	\$ (4,881)	\$ 1,207,795	\$ (7,328)
2006	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Description of Securities						
U.S. Treasury obligations	\$ 109,452	\$ (400)	\$ 162,898	\$ (1,582)	\$ 272,350	\$ (1,982)
Direct obligations of U.S. government agencies	55,282	(266)	356,281	(3,256)	411,563	(3,522)
Federal agency mortgage backed securities	174,393	(1,138)	673,389	(18,582)	847,782	(19,720)
Municipal securities available for sale	184,421	(815)	282,713	(4,554)	467,134	(5,369)
	\$ 523,548	\$ (2,619)	\$ 1,475,281	\$ (27,974)	\$ 1,998,829	\$ (30,593)

Total temporarily-impaired debt securities available for sale

The unrealized losses in the Company's investments in U.S. Treasury obligations; direct obligations of U.S. government agencies; federal agency mortgage backed securities and municipal securities were caused by interest rate risk. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2007.

5. SECURITIES PURCHASED UNDER AGREEMENTS TO RESELL

The Company regularly enters into agreements for the purchase of securities with simultaneous agreements to resell (resell agreements). The agreements permit the Company to sell or repledge these securities. Resell

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

agreements were \$509,287,000 and \$333,597,000 at December 31, 2007 and 2006, respectively. Of the \$509,287,000 amount, \$450,000,000 represented sales of securities in which securities were received under reverse repurchase agreements (resell agreements) during 2007. All of the \$333,597,000 represented sales of securities in which securities were received under reverse repurchase agreements (resell agreements) during 2006.

6. LOANS TO OFFICERS AND DIRECTORS

Certain Company and principal affiliate bank executive officers and directors, including companies in which those persons are principal holders of equity securities or are general partners, borrow in the normal course of business from affiliate banks of the Company. All such loans have been made on the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with unrelated parties. In addition, all such loans are current as to repayment terms.

For the years 2007 and 2006, an analysis of activity with respect to such aggregate loans to related parties appears below (in thousands):

	Year Ended December 31	
	2007	2006
Balance beginning of year	\$ 195,071	\$ 228,381
New loans	164,053	164,581
Repayments	(151,820)	(197,891)
Balance end of year	\$ 207,304	\$ 195,071

7. GOODWILL AND OTHER INTANGIBLES

Changes in the carrying amount of goodwill for the years ended December 31, 2007 and 2006 by operating segment are as follows (in thousands):

Consumer Services	Asset Management	Commercial Banking and Lending	Investment Services Group	<u>Total</u>
----------------------	---------------------	--------------------------------------	---------------------------------	--------------

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Balances as of January 1, 2006	\$ 14,556	\$ 10,479	\$ 20,187	\$ 14,505	\$ 59,727
Acquisition of Mountain States Bank	16,426		16,566		32,992
Additional earn-out payment for 2001 acquisition of Sunstone Financial Group, Inc.				1,004	1,004
Balances as of December 31, 2006	\$ 30,982	\$ 10,479	\$ 36,753	\$ 15,509	\$ 93,723
Balances as of January 1, 2007	\$ 30,982	\$ 10,479	\$ 36,753	\$ 15,509	\$ 93,723
Acquisition of Mountain States Bank adjustments	393		396		789
Balances as of December 31, 2007	\$ 31,375	\$ 10,479	\$ 37,149	\$ 15,509	\$ 94,512

During 2007, the Company changed the methodology for allocation of goodwill recognized prior to the adoption of SFAS No. 142 Goodwill and Other Intangible Assets . A \$20.2 million reclassification was made from Consumer Services to Commercial Banking and Lending. For comparability purposes, amounts in prior periods are reported based on the methodologies in effect as of December 31, 2007 consistent with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information .

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

During 2007, additional purchase accounting adjustments were made relating to the September 15, 2006 purchase of Mountain States Bancorporation, Inc. in Denver, Colorado. See additional disclosure about the acquisition in Note 16.

Following are the intangible assets that continue to be subject to amortization as of December 31, 2007 and 2006 (in thousands):

	As of December 31, 2007		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core deposit intangible assets	\$ 33,586	\$ 19,810	\$ 13,776
Other intangible assets	7,222	4,596	2,626
Other intangible assets acquired during period	97	36	61
Total other intangible assets	7,319	4,632	2,687
Total intangible assets	\$ 40,905	\$ 24,442	\$ 16,463

	As of December 31, 2006		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core deposit intangibles assets	\$ 33,586	\$ 17,643	\$ 15,943
Other intangible assets	7,222	3,856	3,366
Total intangible assets	\$ 40,808	\$ 21,499	\$ 19,309

Amortization expense for the years ended December 31, 2007, 2006 and 2005 was \$2,943, \$1,600 and \$741, respectively. The following table discloses the estimated amortization expense of intangible assets in future years:

For the year ended December 31, 2008	\$ 2,851
For the year ended December 31, 2009	2,705
For the year ended December 31, 2010	2,519
For the year ended December 31, 2011	1,940
For the year ended December 31, 2012	1,412

8. BANK PREMISES AND EQUIPMENT

Bank premises and equipment consisted of the following (in thousands):

	December 31	
	2007	2006
Land	\$ 42,531	\$ 42,530
Buildings and leasehold improvements	250,303	250,714
Equipment	119,950	152,667
Software	81,729	85,934
	<u>494,513</u>	<u>531,845</u>
Accumulated depreciation	(210,498)	(233,742)
Accumulated amortization	(48,487)	(54,887)
	<u><u>\$ 235,528</u></u>	<u><u>\$ 243,216</u></u>

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Consolidated rental and operating lease expenses were \$6,054,000 in 2007, \$5,993,000 in 2006 and \$5,664,000 in 2005. Consolidated bank premises and equipment depreciation and amortization expenses were \$34,442,000 in 2007, \$33,331,000 in 2006 and \$30,215,000 in 2005. Minimum future rental commitments as of December 31, 2007 for all non-cancelable operating leases are: 2008 \$4,817,000; 2009 \$4,703,000; 2010 \$3,556,000; 2011 \$2,673,000; 2012 \$2,223,000; and thereafter \$21,650,000.

9. BORROWED FUNDS

The components of the Company's short-term and long-term debt are as follows (in thousands):

	December 31	
	2007	2006
Short-term debt:		
U. S. Treasury demand notes and other	\$ 33,753	\$ 17,881

Federal Home Loan Bank 4.53% due 2018	1,345	1,445
Federal Home Loan Bank 4.56% due 2019	847	902
Federal Home Loan Bank 4.75% due 2018	1,195	1,285
Federal Home Loan Bank 4.86% due 2019	4,731	5,020
Federal Home Loan Bank 4.92% due 2019	614	651
Federal Home Loan Bank 5.00% due 2019	1,290	1,375
Federal Home Loan Bank 5.14% due 2020	98	103
Federal Home Loan Bank 5.47% due 2020	15,700	16,577
Federal Home Loan Bank 5.54% due 2021	1,428	1,495
Federal Home Loan Bank 5.97% due 2017		1,878
Federal Home Loan Bank 5.89% due 2014	2,157	2,419
Federal Home Loan Bank 7.13% due 2010	508	710
Kansas Equity Fund IV, L.P. 0% due 2014	893	950
Kansas Equity Fund V, L.P. 0% due 2016	495	
Kansas City Equity Fund, L.L.C. 0% due 2014	980	
St. Louis Equity Fund 2005 LLC 0% due 2010	668	848
St. Louis Equity Fund 2006 LLC 0% due 2010	240	280
St. Louis Equity Fund 2007 LLC 0% due 2010	910	
Total long-term debt	36,032	38,020
Total borrowed funds	\$ 69,785	\$ 55,901

Aggregate annual repayments of long-term debt at December 31, 2007 are as follows (in thousands):

2008	\$ 4,336
2009	3,712
2010	3,227
2011	2,667
2012	2,640
Thereafter	19,450
Total	<u>\$ 36,032</u>

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

All of the Federal Home Loan Bank notes are secured by investment securities of the Company. Federal Home Loan Bank notes require monthly principal and interest payments and may require a penalty for payoff prior to the maturity date.

The Company enters into sales of securities with simultaneous agreements to repurchase (repurchase agreements). The amounts received under these agreements represent short-term borrowings and are reflected as a separate item in the consolidated balance sheets. The amount outstanding at December 31, 2007, was \$2,155,335,000 (with accrued interest payable of \$566,493). This amount consists of \$450,000,000 representing sales of securities in which securities were received under reverse repurchase agreements (resell agreements) and \$1,705,335,000 of sales of U.S. Treasury and Agency securities from the Company's securities portfolio. The amount outstanding at December 31, 2006, was \$1,916,130,000 (with accrued interest payable of \$1,140,940). This amount consists of \$333,597,000 representing sales of securities in which securities were received under reverse repurchase agreements (resell agreements) and \$1,582,533,000 of sales of U.S. Treasury and Agency securities from the Company's securities portfolio.

The carrying amounts and market values of the securities and the related repurchase liabilities and weighted average interest rates of the repurchase liabilities (grouped by maturity of the repurchase agreements) were as follows as of December 31, 2007 (in thousands):

<u>Maturity of the Repurchase Liabilities</u>	<u>Securities Market Value</u>	<u>Repurchase Liabilities</u>	<u>Weighted Average Interest Rate</u>
On Demand	\$ 22,323	\$ 21,978	3.98%
2 to 30 days	1,973,194	1,683,357	4.28
Total	\$ 1,995,517	\$ 1,705,335	4.28%

10. REGULATORY REQUIREMENTS

Payment of dividends by the affiliate banks to the parent company is subject to various regulatory restrictions. For national banks, the governing regulatory agency must approve the declaration of any dividends generally in excess of the sum of net income for that year and retained net income for the preceding two years. At December 31, 2007, approximately \$24,265,000 of the equity of the affiliate banks and non-bank subsidiaries was available for distribution as dividends to the parent company without prior regulatory approval or without reducing the capital of the respective affiliate banks below minimum levels.

Certain affiliate banks maintain reserve balances with the Federal Reserve Bank as required by law. During 2007, this amount averaged \$13,963,000, compared to \$34,266,000 in 2006.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The Company is required to maintain minimum amounts of capital to total risk weighted assets, as defined by the banking regulators. At December 31, 2007, the Company is required to have minimum Tier 1 and Total capital ratios of 4.0% and 8.0%, respectively. The Company's actual ratios at that date were 13.7% and 14.6%, respectively. The Company's leverage ratio at December 31, 2007, was 9.6%.

As of December 31, 2007, the most recent notification from the Office of Comptroller of the Currency categorized all of the affiliate banks as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized all of the Company's affiliate banks must maintain total risk-based, Tier 1 risk-based and Tier 1 leverage ratios of 10.0%, 6.0% and 5.0%, respectively. There are no conditions or events since that notification that management believes have changed the affiliate banks' category.

The UMB Bank, Warsaw, n.a. based affiliate was merged into the UMB Bank, n.a. affiliate during the fourth quarter of 2007. Therefore, no risk based capital information is reported for UMB Bank, Warsaw, n.a. at December 31, 2007.

11. EMPLOYEE BENEFITS

The Company has a discretionary noncontributory profit sharing plan, which features an employee stock ownership plan. This plan is for the benefit of substantially all eligible officers and employees of the Company and its subsidiaries. The Company has accrued and anticipates making a discretionary payment of \$1,954,041 in March, 2008 for 2007. A \$1,234,529 contribution was paid in 2007 for 2006. No contributions were accrued for 2005 under this discretionary plan.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company has a qualified 401(k) profit sharing plan that permits participants to make contributions by salary deduction. The Company made a matching contribution to this plan of \$2,448,105 in 2007 for 2006 and \$1,907,966 in 2006 for 2005. The Company has accrued and anticipates making a matching contribution of \$2,610,653 in March 2008 for 2007.

On April 18, 2002, the shareholders of the Company approved the 2002 Incentive Stock Options Plan (the 2002 Plan), which provides incentive options to certain key employees to receive up to 2,000,000 common shares of the Company. All options that are issued under the 2002 plan are in effect for 10 years (except for any option granted to a person holding more than 10 percent of the Company's stock, in which case the option is in effect for five years). All options issued prior to 2005 under the 2002 plan cannot be exercised until at least four years 11 months after the date they are granted. Options issued in 2005, 2006, and 2007 under the 2002 plan have a vesting schedule of 50 percent after three years; 75 percent after four years and 100 percent after four years and eleven months. Except under circumstances of death, disability or certain retirements, the options cannot be exercised after the grantee has left the employment of the Company or its subsidiaries. The exercise period for an option may be accelerated upon the optionee's qualified disability, retirement or death. All options expire at the end of the exercise period. Prior to 2006, the Company made no recognition in the balance sheet of the options until such options were exercised and no amounts applicable thereto were reflected in net income as all options were granted at strike prices at the then current fair value of the underlying shares. For options granted after January 1, 2006, SFAS No. 123 (R) requires compensation expense to be recognized on unvested options outstanding. Options are granted at exercise prices of no less than 100 percent of the fair market value of the underlying shares based on the fair value of the option at date of grant. The plan terminates April 17, 2012.

The table below discloses the information relating to option activity in 2007 under the 2002 plan:

Stock Options	Number of Shares	Weighted Average Price Per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Under the 2002 Plan				
Outstanding December 31, 2006	656,068	\$ 29.04		
Granted	152,700	38.48		
Canceled	(69,700)	29.22		
Exercised	(4,100)	21.38		
Outstanding December 31, 2007	734,968	31.02	7.6	\$ 5,394,112
Exercisable or expected to be exercisable December 31, 2007	724,136	30.06	7.3	6,007,309

The weighted average grant-date fair value of options granted during the years 2007, 2006, and 2005 was \$8.98, \$8.88 and \$8.37, respectively. The total intrinsic value of options exercised during the year ended December 31, 2007 and 2005 was \$158,704 and \$12,176. No options were exercised during 2006. As of December 31, 2007, there was \$2,645,267 of unrecognized compensation cost related to the nonvested shares. The cost is expected to be recognized over a period of 4.0 years.

On April 16, 1992, the shareholders of the Company approved the 1992 Incentive Stock Option Plan (the 1992 plan), which provides incentive options to certain key employees for up to 1,000,000 common shares of the Company. Of the options granted prior to 1998, 40 percent are exercisable two years from the date of the grant and are thereafter exercisable in 20 percent increments annually, or for such periods or vesting increments as the Board of Directors, or a committee thereof, specify (which may not exceed 10 years or in the case of a recipient holding more than 10 percent of the Company's stock, five years), provided that the optionee has remained in the employment of the Company or its subsidiaries. None of the options granted during or after 1998 are exercisable

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

until four years eleven months after the grant date. The exercise period may be accelerated for an option upon the optionee's qualified disability, retirement or death. All options expire at the end of the exercise period. Prior to 2006, the Company made no recognition in the balance sheet of the options until such options were exercised and no amounts applicable thereto were reflected in net income because options were granted at exercise prices of no less than 100 percent of the fair market value of the underlying shares at date of grant. No further options may be granted under the 1992 plan.

The table below discloses the information relating to option activity in 2007 under the 1992 plan:

Stock Options	Number of Shares	Weighted Average Price Per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Under the 1992 Plan				
Outstanding December 31, 2006	216,910	\$ 18.91		
Granted				
Canceled	(5,424)	19.03		
Exercised	(49,969)	20.15		
Outstanding December 31, 2007	161,517	18.52	2.8	\$ 3,204,432
Exercisable or expected to be exercisable December 31, 2007	161,517	18.52	2.8	3,204,432

There were no options granted under the plan during the years 2007, 2006, and 2005. The total intrinsic value of options exercised during the years ended December 31, 2007, 2006, and 2005 was \$2,017,266, \$637,516 and \$701,072, respectively. As of December 31, 2007, there was no unrecognized compensation expense to be recognized for this plan.

On May 4, 2004, the Company entered into an agreement with Peter J. deSilva, President and Chief Operating Officer of the Company to issue 8,000 shares of common stock of the Company. The shares vest 20 percent per year of employment through January 20, 2009. These restricted shares are automatically enrolled in the dividend reinvestment plan of the Company. Dividends paid on the restricted shares are used to purchase new shares which contain the same restriction. If Mr. deSilva terminates employment all non-vested shares are forfeited.

The table below discloses the status of the restricted shares during 2007:

Restricted Stock	Number of Shares	Weighted Average Grant Date Fair
-------------------------	-------------------------	---

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

		<u>Value</u>
Nonvested December 31, 2006	4,800	\$ 25.52
Granted		
Canceled		
Vested	(1,600)	25.52
Nonvested December 31, 2007	3,200	\$ 25.52

As of December 31, 2007, there was \$43,126 of unrecognized compensation cost related to the nonvested shares. The cost is expected to be recognized over a period of 1.0 years. Total fair value of shares vested during the years ended December 31, 2007, 2006, and 2005 was \$57,224, \$40,832 and \$40,832, respectively.

At the April 26, 2005, shareholders meeting, the shareholders approved the UMB Financial Corporation Long-Term Incentive Compensation Plan (LTIP) which became effective as of January 1, 2005. The Plan permits the issuance to selected officers of the Company service based restricted stock grants, performance-based

Table of Contents

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

restricted stock grants and non-qualified stock options. Service-based restricted stock grants will contain a service requirement. The performance-based restricted grants will contain performance and service requirements. The non-qualified stock options will contain a service requirement.

The Plan reserves up to 1,200,000 shares of the Company's stock. Of the total, no more than 400,000 shares can be issued as restricted stock. These two requirements will be in effect with the 2006 LTIP issuance. In 2005, the service and performance based restricted stock grants were issued out of treasury stock. No one eligible employee may receive more than \$1,000,000 in benefits under the Plan during any one fiscal year taking into account the value of all stock options and restricted stock received during such fiscal year.

The service-based restricted stock grants contain a service requirement. The vesting requirement is 50 percent of the shares after three years of service, 75 percent after four years of service and 100 percent after five years of service.

The performance-based restricted stock grants contain a service and a performance requirement. The performance requirement is based on a pre-determined performance requirement over a three year period. The service requirement portion is a three year cliff vesting. If the performance requirement is not met, the executives do not receive the shares.

The dividends on service and performance-based restricted stock grants are treated as two separate transactions. First, cash dividends are paid on the restricted stock. Those cash dividends are then paid to purchase additional shares of restricted stock. The dividends paid on the stock are recorded as a reduction to retained earnings (similar to all dividend transactions).

The table below discloses the status of the service based restricted shares during 2007:

Service Based Restricted Stock	Number of Shares	Weighted Average Grant Date Fair Value
Nonvested December 31, 2006	90,815	\$ 31.10
Granted	68,246	38.66
Canceled	(7,356)	34.18
Vested	(4,906)	
Nonvested December 31, 2007	146,799	34.36

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

As of December 31, 2007, there was \$3,594,106 of unrecognized compensation cost related to the nonvested shares. The cost is expected to be recognized over a period of 3.1 years. Total fair value of shares vested during the year ended December 31, 2007 was \$189,998. No shares have vested in 2006 and 2005.

The table below discloses the status of the performance based restricted shares during 2007:

Performance Based Restricted Stock	Number of Shares	Weighted Average Grant Date Fair Value
Nonvested December 31, 2006	68,674	\$ 31.05
Granted	35,024	38.75
Canceled	(5,476)	34.12
Vested		
Nonvested December 31, 2007	98,222	33.66

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of December 31, 2007, there was \$1,304,925 of unrecognized compensation cost related to the nonvested shares. The cost is expected to be recognized over a period of 1.9 years. No shares have vested in 2007 and 2006.

The non-qualified stock options carry a service requirement and will vest 50 percent after three years, 75 percent after four years and 100 percent after five years.

The table below discloses the information relating to option activity in 2007 under the LTIP:

<u>Stock Options Under the LTIP</u>	<u>Number of Shares</u>	<u>Weighted Average Price Per Share</u>	<u>Weighted Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value</u>
Outstanding December 31, 2006	222,467	\$ 30.53		
Granted	143,328	38.92		
Canceled	(17,887)	32.35		
Exercised				
Outstanding December 31, 2007	347,908	33.90	8.1	\$ 1,552,971
Exercisable or expected to be exercisable December 31, 2007	342,660	33.46	8.0	1,677,434

The weighted average grant-date fair value of options granted during the years 2007, 2006, and 2005 was \$8.56, \$8.21 and \$7.63. No options were exercised during 2007 and 2006. As of December 31, 2007, there was \$1,770,016 million of unrecognized compensation cost related to the nonvested shares. The cost is expected to be recognized over a period of 3.3 years.

Cash received from options exercised under all share based compensation plans was \$1,094,669, \$636,872 and \$942,557 for the years ended December 31, 2007, 2006, and 2005, respectively. The tax benefit realized for stock options exercised was inconsequential for 2007, 2006, and 2005.

The Company has no specific policy to repurchase common shares to mitigate the dilutive impact of options; however, the Company has historically made adequate discretionary purchases to satisfy stock option exercise activity. See a description of the Company's share repurchase plan in Note 14 to the Consolidated Financial Statements provided in Item 8, pages 77 and 78 of this report.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

With the acquisition of Mountain States Bank in the third quarter of 2006, the Company assumed the liability associated with the Mountain States Bank Retirement Plan, a defined benefit plan. As of August 31, 2006, the Mountain States Bank Retirement Plan had a plan curtailment. This plan curtailment suspended future accruals of benefits under the plan so that the employees do not earn additional defined benefits for future services. Under SFAS 88, *Employer's Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, the Company has recorded a minimum pension liability of approximately \$0.8 million at December 31, 2006. An application was filed with the Internal Revenue Service to terminate the plan, liquidate the plan assets and make required distributions to plan participants as of August 31, 2006.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. OTHER COMPREHENSIVE INCOME (LOSS)**

The table below discloses the Company's component of other comprehensive income (loss) during the periods presented, which is comprised of unrealized gains (losses) on available for sale securities (in thousands):

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Unrealized holding gains (losses)	\$ 47,592	\$ 6,879	\$ (17,569)
Reclassification adjustments for gains (losses) included in net income	(1,010)	(117)	225
Net unrealized holding gains (losses)	<u>46,582</u>	<u>6,762</u>	<u>(17,344)</u>
Income tax expense (benefit)	(17,077)	(2,471)	6,413
Other comprehensive income (loss)	<u>\$ 29,505</u>	<u>\$ 4,291</u>	<u>\$ (10,931)</u>

13. BUSINESS SEGMENT REPORTING

The Company has strategically aligned its operations into six major segments, as shown below (collectively, Business Segments). The Business Segments are differentiated based on the products and services provided. Business segment financial results produced by the Company's internal management accounting system are evaluated regularly by the Executive Committee in deciding how to allocate resources and assess performance per individual Business Segment. The management accounting system assigns balance sheet and income statement items to each business segment using methodologies that are refined on an ongoing basis. For comparability purposes, amounts in all periods are based on methodologies in effect at December 31, 2007 consistent with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information .

In determining revenues and expenses associated with each individual business segment, the Company utilizes a funds transfer pricing model. This model records cost of funds or credit for funds using matched maturity funding for certain assets and liabilities, or a blended rate based on various maturities for the remaining assets and liabilities. The allowance for loan losses is allocated using specifically identified reserves assigned to loans where available, with general reserves assigned to the remaining loan portfolio based on historical losses, economic outlook and other factors. The related loan loss provision is assigned based on the amount necessary to maintain reserves adequate for each segment. Noninterest income and noninterest expense directly attributable to a segment is assigned to that segment. Direct expenses incurred by areas whose services support the overall Company are allocated to the Business Segments based on standard unit costs applied to actual volume measurements. Administrative expenses are allocated based on the estimated time expended for each segment. Any remaining expenses, such as corporate overhead, are assigned based on the ratio of an individual business segment's noninterest expense to total noninterest expense incurred by all business lines. Virtually all interest rate risk is assigned to the Treasury and Other business segment that is the offset to the funds transfer pricing charges and credits assigned to each business segment.

The following summaries provide information about the activities of each segment:

Commercial Banking and Lending serves the commercial lending and leasing as well as the capital markets needs of the Company's mid-market businesses and governmental entities by offering various products and services. The commercial loan and leasing group provides commercial loans and lines of credit, letters of credit, and loan syndication services. Capital markets provide consultative services and offers a variety of financing for companies that need non-traditional banking services. The services provided by capital markets include asset

Table of Contents

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

based financing, asset securitization, equity and mezzanine financing, factoring, private and public placement of senior debt, as well as merger and acquisition consulting.

Payment and Technology Solutions meets the treasury management and healthcare services needs of our commercial clients. Treasury management products and services include account reconciliation services, automated clearing house, controlled disbursements, lockbox services, foreign exchange, and various card products and services. Healthcare services include health savings account and flexible savings account products for healthcare providers, third-party administrators and large employers.

Banking Services provides products and services mainly to the Company's correspondent bank customer network in the Midwest. Products and services include bond trading transactions, cash letter collections, FiServ account processing, investment portfolio accounting and safekeeping, reporting for asset/liability management, and Fed funds transactions. Banking Services includes the bank dealer function in which competitive and negotiated underwritings of municipal securities as well as underwritings of government agency securities are performed.

Consumer Services delivers products and services through the Company's bank branches, call center, internet banking and ATM network. These services are distributed over a seven state area, as well as through on-line and telephone banking. Consumer Services is a major provider of funds and assets for the Company. This segment offers a variety of consumer products, including deposit accounts, installment loans, credit cards, home equity lines of credit, residential mortgages, small business loans, and insurance services for individuals.

Asset Management provides a full spectrum of investment advisory, trust, and custody services to both personal and institutional clients of the Company focusing on estate planning, trust, retirement planning and investment management and private banking services. The Company's investment advisory services provided to the Company's proprietary funds, the UMB Scout Funds, are also included in this segment. Corporate trust services include serving as corporate and municipal bond trustee, serving as the paying agent/registrar for issued bonds and notes, and providing escrow services.

Investment Services Group provides a broad array of services for mutual funds, partnerships, funds of funds and commingled funds to a wide range of investment advisors, independent money managers, broker/dealers, banks, third-party administrators, insurance companies and other financial service providers. Services provided include fund administration and accounting, investor services and transfer agency, cash management, marketing and distribution, custody and alternative investment services.

Treasury and Other Adjustments includes asset and liability management activities and miscellaneous other items of a corporate nature not allocated to specific business lines. The assets within this segment include the Company's investment portfolio. Corporate eliminations are also allocated to this segment.

Purchase of Treasury Stock		(1,099,998)
Sale of Treasury Stock		12,950
Issued for stock options & restricted stock		148,631
Balance December 31, 2007	55,056,730	(13,729,106)

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

On April 24, 2007 the Company announced a plan to repurchase up to two million shares of common stock. This plan will terminate on April 24, 2008. The Company has not made any repurchases other than through this plan, which permits both open market and privately negotiated transactions. All open market share purchases under the share repurchase plans are intended to be within the scope of Rule 10b-18 promulgated under the Securities Exchange Act of 1934. Rule 10b-18 provides a safe harbor for purchases in a given day if the Company satisfies the manner, timing and volume conditions of the rule when purchasing its own common shares.

On May 30, 2006, the Company's common stock was split 2-for-1 in the form of a stock dividend. Stockholders received one additional share for every share owned. The Board of Directors declared the stock split April 25, 2006 and the record date was May 16, 2006. All share and per share amounts (including stock options and restricted stock) in the Consolidated Financial Statements and accompanying notes were restated to reflect the split.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Basic earnings per share are computed by dividing income available to common shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share gives effect to all potential common shares that were outstanding during the year.

The shares used in the calculation of basic and diluted earnings per share, are shown below:

	For the Years Ended December 31		
	2007	2006	2005
Weighted average basic common shares outstanding	41,712,223	42,592,960	43,109,536
Dilutive effect of stock options and restricted stock	293,820	220,602	203,198
Weighted average diluted common shares outstanding	42,006,043	42,813,562	43,312,734

15. COMMITMENTS, CONTINGENCIES AND GUARANTEES

In the normal course of business, the Company is a party to financial instruments with off-balance-sheet risk in order to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit, commercial letters of credit, standby letters of credit, and futures contracts. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The contract or notional amount of those instruments reflects the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for commitments to extend credit, commercial letters of credit, and standby letters of credit is represented by the contract or notional amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the agreement. These conditions generally include, but are not limited to, each customer being current as to repayment terms of existing loans and no deterioration in the customer's financial condition. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The interest rate is generally a variable rate. If the commitment has a fixed interest rate, the rate is generally not set until such time as credit is extended. For credit card customers, the Company has the right to change or terminate terms or conditions of the credit card account at any time. Since a large portion of the commitments and unused credit card lines are never actually drawn upon, the total commitment amount does not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on an individual basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

credit evaluation. Collateral held varies but may include accounts receivable, inventory, real estate, plant and equipment, stock, securities and certificates of deposit.

Commercial letters of credit are issued specifically to facilitate trade or commerce. Under the terms of a commercial letter of credit, as a general rule, drafts will be drawn when the underlying transaction is consummated as intended.

Standby letters of credit are conditional commitments issued by the Company payable upon the non-performance of a customer's obligation to a third party. The Company issues standby letters of credit for terms ranging from three months to three years. The Company generally requires the customer to pledge collateral to support the letter of credit. The maximum liability to the Company under standby letters of credit at

Table of Contents

UMB FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2007 and 2006 was \$291.7 million and \$291.9 million, respectively. As of December 31, 2007 and 2006, standby letters of credit totaling \$63.1 million and \$43.1 million, respectively were with related parties to the Company.

The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities. The Company holds collateral supporting those commitments when deemed necessary. Collateral varies but may include such items as those described for commitments to extend credit.

Futures contracts are contracts for delayed delivery of securities or money market instruments in which the seller agrees to make delivery at a specified future date, of a specified instrument, at a specified yield. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in securities values and interest rates. Instruments used in trading activities are carried at market value and gains and losses on futures contracts are settled in cash daily. Any changes in the market value are recognized in trading and investment banking income.

The Company uses contracts to offset interest rate risk on specific securities held in the trading portfolio. Open futures contract positions averaged \$30.2 million and \$44.2 million during the years ended December 31, 2007 and 2006, respectively. Net futures activity resulted in losses of \$1.0 million for 2007 and gains of \$0.4 million for 2006 and \$0.6 million for 2005. The Company controls the credit risk of its futures contracts through credit approvals, limits and monitoring procedures.

The Company also enters into foreign exchange contracts on a limited basis. For operating purposes, the Company maintains certain balances in foreign banks. Foreign exchange contracts are purchased on a monthly basis to avoid foreign exchange risk on these foreign balances. The Company will also enter into foreign exchange contracts to facilitate foreign exchange needs of customers. The Company will enter into a contract to buy or sell a foreign currency at a future date only as part of a contract to sell or buy the foreign currency at the same future date to a customer. During 2007, contracts to purchase and to sell foreign currency averaged approximately \$13.8 million compared to \$17.1 million during 2006. The net gains on these foreign exchange contracts for 2007, 2006 and 2005 were \$1.9 million, \$1.6 million and \$1.5 million, respectively.

With respect to group concentrations of credit risk, most of the Company's business activity is with customers in the states of Missouri, Kansas, Colorado, Oklahoma, Nebraska and Illinois. At December 31, 2007, the Company did not have any significant credit concentrations in any particular industry.

In the normal course of business, the Company and its subsidiaries are named defendants in various lawsuits and counter-claims. In the opinion of management, after consultation with legal counsel, none of these lawsuits are expected to have a materially adverse effect on the financial position, results of operations, or cash flows of the Company.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The following table summarizes the Company's off-balance sheet financial instruments as described above.

	Contract or Notional Amount December 31	
	2007	2006
	(in thousands)	
Commitments to extend credit for loans (excluding credit card loans)	\$ 1,302,101	\$ 1,438,855
Commitments to extend credit under credit card loans	1,013,317	906,179
Commercial letters of credit	6,155	7,082
Standby letters of credit	291,661	291,904
Futures contracts	14,900	33,000
Forward foreign exchange contracts	10,295	6,803
Spot foreign exchange contracts	17,475	2,828

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****16. ACQUISITIONS**

The following acquisition, which is not considered to be a material business combination, was completed during the third quarter of 2006:

On September 15, 2006, UMB Financial Corporation completed the acquisition of Mountain States Bancorporation, Inc., a bank holding company headquartered in Denver, Colorado which had consolidated assets of \$284.1 million at the time of the merger. Total cash consideration in this transaction amounted to \$81.3 million. Mountain States Bancorporation, and its subsidiary, Mountain States Bank were merged with and into UMB Bank Colorado on September 15, 2006. Mountain States Bank operated from a single location in Denver, Colorado. Initial goodwill, subject to the completion of appraisals and valuation of the assets acquired and liabilities assumed, amounted to \$33.0 million. Identifiable intangible assets including core deposit intangibles, non-compete agreements, and commercial loan customer lists amounted to \$13.9 million. The goodwill and intangibles resulting from this transaction are not deductible for tax purposes.

On April 19, 2001, the Company acquired Sunstone Financial Group, Inc. (now known as UMB Fund Services, Inc.) located in Milwaukee, Wisconsin. The purchase price of Sunstone is directly connected to gross revenue targets. The Company paid an initial amount of \$8.0 million on April 19, 2001. Subsequently, the Company has made a \$2.7 million payment in 2003, a \$1.5 million payment in 2004, a \$0.8 million payment in 2005 and a \$1.0 million payment in 2006. This acquisition was recorded as a purchase and was funded with existing working capital.

17. INCOME TAXES

Income taxes as set forth below produce effective income tax rates of 29.3% in 2007, 27.1% in 2006, and 26.2% in 2005. These percentages are computed by dividing total income tax by the sum of such tax and net income.

Income taxes include the following components (in thousands):

	Year Ended December 31		
	2007	2006	2005
Current			
Federal provision	\$ 28,290	\$ 22,875	\$ 19,143
State benefit	1,219	(55)	(2,401)

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Total current tax provision	29,509	22,820	16,742
Deferred			
Federal provision (benefit)	517	(1,247)	1,305
State provision (benefit)	736	678	1,954
	<u>1,253</u>	<u>(569)</u>	<u>3,259</u>
Total deferred tax provision (benefit)	1,253	(569)	3,259
	<u>1,253</u>	<u>(569)</u>	<u>3,259</u>
Total tax provision	\$ 30,762	\$ 22,251	\$ 20,001
	<u>\$ 30,762</u>	<u>\$ 22,251</u>	<u>\$ 20,001</u>

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The reconciliation between the income tax provision and the amount computed by applying the statutory federal tax rate of 35% to income taxes is as follows (in thousands):

	Year Ended December 31		
	2007	2006	2005
Provision at statutory rate	\$ 36,741	\$ 28,706	\$ 26,712
Tax-exempt interest income	(7,676)	(6,859)	(6,291)
State and local income taxes, net of federal tax benefits	1,497	739	741
Federal tax credits	(122)	(18)	(700)
Sale of state tax credits			(946)
Other	322	(317)	485
Total tax provision	\$ 30,762	\$ 22,251	\$ 20,001

Investment tax credits are recorded as a component of tax expense in the period that the National Park Service approves such credits. Investment tax credits related to the acquisition of assets reduce the tax basis of the associated assets and tax depreciation is calculated on this reduced amount. A deferred tax liability is established for the difference between the book and tax basis of such assets.

In 2005, state tax credits received for the renovation of an office building were sold under a program with the taxing authority that issued such credits. The sale of these tax credits was recorded as a component of tax expense and a deferred tax liability was established for the gain on the sale of the tax credits.

In preparing its tax returns, the Company is required to interpret complex tax laws and regulations to determine its taxable income. Periodically, the Company is subject to examinations by various taxing authorities that may give rise to differing interpretations of these complex laws. The Company is not in the examination process with any tax jurisdictions at December 31, 2007. However, upon examination, agreement of tax liabilities between the Company and the multiple tax jurisdictions in which the Company files tax returns may ultimately be different.

The Company has various state net operating loss carryforwards (NOL) of approximately \$17 million, \$19 million, and \$11 million for 2007, 2006, and 2005, respectively. These net operating losses expire at various times through 2026. The Company acquired a state NOL of approximately \$14 million in connection with the 2006 acquisition of Mountain States Bank resulting in an overall increase in state NOL from 2005 to 2006.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Deferred income tax expense (benefit) results from differences between assets and liabilities measured for financial reporting and for income tax return purposes. During 2006 and 2007, adjustments to the deferred tax liability were recorded to reflect the purchase accounting adjustments related to the acquisition of Mountain States Bank.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The significant components of deferred tax assets and liabilities are reflected in the following table (in thousands):

	December 31,	
	2007	2006
Deferred tax assets:		
Allowance for loan losses	\$ 18,548	\$ 17,110
Net unrealized loss on securities available for sale		10,065
Accrued expenses	5,124	2,986
Miscellaneous	3,441	3,269
	<u>27,113</u>	<u>33,430</u>
Deferred tax liabilities:		
Net unrealized gain on securities transfer available for sale	(7,012)	
Land, building, and equipment	(22,831)	(20,150)
Intangibles	(8,219)	(7,719)
Miscellaneous	(7,545)	(7,014)
	<u>(45,607)</u>	<u>(34,883)</u>
Net deferred tax liability	<u>\$ (18,494)</u>	<u>\$ (1,453)</u>

The net deferred tax liability at December 31, 2007 and December 31, 2006 is included in other liabilities. The net deferred tax asset at December 31, 2005 is included in other assets.

Liabilities Associated With Unrecognized Tax Benefits

The Company adopted the provisions of FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, on January 1, 2007. This Interpretation clarifies the accounting and reporting for uncertainties in income tax law. It prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions. Differences between a tax position taken or expected to be taken in the Company's tax returns and the amount of benefit recognized and measured in the financial statements result in unrecognized tax benefits, which are recorded in the balance sheet as either a liability for unrecognized tax benefits or reductions to recorded tax assets, as applicable.

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

The Company files income tax returns in the U.S. federal jurisdiction and various states. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2004 in the jurisdictions in which it files. Upon implementation of FIN 48, the Company's unrecognized tax benefit was \$0.9 million. The Company's adoption of FIN 48 resulted in a reclassification of certain recorded liabilities accrued for under SFAS No. 5, *Accounting for Contingencies*, to Liability for Unrecognized Tax Benefits. Therefore, a cumulative adjustment to retained earnings was not necessary. The Company does not expect any significant increase or decrease in the amount of unrecognized tax benefits over the next 12 months.

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Unrecognized tax benefits	opening balance	925
Gross increases	tax positions in prior period	
Gross decreases	tax positions in prior period	
Gross increases	current-period tax positions	552
Settlements		
Lapse of statute of limitations		
		1,477
Unrecognized tax benefits	ending balance	1,477

If recognized, the full amount of unrecognized tax benefits, net of the associated deferred tax benefit, would affect the effective tax rate. The unrecognized tax benefit relates to state tax positions that, if recognized, would result in the recognition of a deferred tax asset for the corresponding federal tax benefit.

18. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Cash and Short-Term Investments The carrying amounts of cash and due from banks, federal funds sold and resell agreements are reasonable estimates of their fair values.

Securities Available for Sale and Investment Securities Fair values are based on quoted market prices or dealer quotes, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Trading Securities Fair values for trading securities (including financial futures), are based on quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices for similar securities.

Loans Fair values are estimated for portfolios with similar financial characteristics. Loans are segregated by type, such as commercial, real estate, consumer, and credit card. Each loan category is further segmented into fixed and variable interest rate categories. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit

rating and for the same remaining maturities.

Deposit Liabilities The fair value of demand deposits and savings accounts is the amount payable on demand at December 31, 2007 and 2006. The fair value of fixed-maturity certificates of deposit is estimated by discounting the future cash flows using the rates that are currently offered for deposits of similar remaining maturities.

Short-Term Debt The carrying amounts of federal funds purchased, repurchase agreements and other short-term debt are reasonable estimates of their fair value because of the short-term nature of their maturities.

Long-Term Debt Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

Other Off-Balance Sheet Instruments The fair value of loan commitments and letters of credit are determined based on the fees currently charged to enter into similar agreements, taking into account the

Table of Contents**UMB FINANCIAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

remaining terms of the agreement and the present creditworthiness of the counterparties. Neither the fees earned during the year on these instruments nor their fair value at year-end are significant to the Company's consolidated financial position.

The estimated fair value of the Company's financial instruments at December 31, 2007 and 2006 are as follows (in millions):

	December 31			
	2007		2006	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
FINANCIAL ASSETS				
Cash and short-term investments	\$ 1,520.4	\$ 1,520.4	\$ 1,380.1	1,380.1
Securities available for sale	3,386.0	3,386.0	3,238.6	3,238.6
Securities held to maturity	37.7	42.2	44.8	44.8
Federal Reserve Bank and other stock	17.5	17.5	15.5	15.5
Trading securities	43.9	43.9	64.5	64.5
Loans (exclusive of allowance for loan loss)	3,929.4	3,910.2	3,767.6	3,692.3
FINANCIAL LIABILITIES				
Demand and savings deposits	5,053.5	5,053.5	4,937.2	4,937.2
Time deposits	1,497.3	1,527.3	1,371.7	1,381.2
Federal funds and repurchase agreements	1,734.7	1,734.7	1,620.9	1,620.9
Short-term debt	33.8	33.8	17.9	17.9
Long-term debt	36.0	38.0	38.0	35.6
OFF-BALANCE SHEET ARRANGEMENTS				
Commitments to extend credit for loans		2.8		3.3
Commercial letters of credit		0.2		0.3
Standby letters of credit	291.7	2.3	291.9	1.7

The fair value estimates presented herein are based on pertinent information available to management as of December 31, 2007 and 2006. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these consolidated financial statements since those dates and, therefore, current estimates of fair value may differ significantly from the amount presented herein.

20. FDIC ONE-TIME ASSESSMENT CREDIT

Edgar Filing: UMB FINANCIAL CORP - Form 10-K

Effective November 17, 2006, the FDIC implemented a one time credit of \$4.7 billion to eligible institutions. The purpose of the credit was to recognize contributions made by certain institutions to capitalize the Bank Insurance Fund and Savings Association Insurance Fund, which have now been merged into the Deposit Insurance Fund. The affiliate banks of the Company are eligible institutions and have received notice from the FDIC that their remaining share of the credit is approximately \$5.1 million at December 31, 2007. This amount is not reflected in the accompanying financial statements as it represents contingent future credits against future insurance assessment payments. As such, the timing of the one-time credit may change.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures At the end of the period covered by this report on Form 10-K, the Company's Chief Executive Officer and Chief Financial Officer have each evaluated the effectiveness of the

Table of Contents

Company's Disclosure Controls and Procedures (as defined in Rule 13a-15(e) or 15d-15(e) of the Exchange Act) and have concluded that the Company's Disclosure Controls and Procedures are reasonably designed to be effective for the purposes for which they are intended and were effective as of the end of the period covered by this report on Form 10-K.

Disclosure Controls and Procedures cannot provide absolute assurance of achieving disclosure objectives because of their inherent limitations. Disclosure Controls and Procedures is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Because of such limitations, there is a risk that errors in meeting the Company's reporting and disclosure obligations may not be prevented or detected on a timely basis by Disclosure Controls and Procedures. However, these inherent limitations are known features of the disclosure process. Therefore it is possible to design into the process safeguards to reduce, although not eliminate, this risk. The Company's Disclosure Controls and Procedures include such safeguards. Projections of any evaluation of effectiveness of Disclosure Controls and Procedures in future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or because the degree of compliance with the Company's policies and procedures may deteriorate.

Management's Report on Internal Control Over Financial Reporting Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934. Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer of the Company, and effected by the Company's Board of Directors, management and other personnel, an evaluation of the effectiveness of internal control over financial reporting was conducted based on the Committee of Sponsoring Organizations of the Treadway Commission's *Internal Control - Integrated Framework*.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore it is possible to design into the process safeguards to reduce, although not eliminate, this risk. The Company's internal control over financial reporting includes such safeguards. Projections of any evaluation of effectiveness of internal control over financial reporting in future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or because the degree of compliance with the Company's policies and procedures may deteriorate.

Based on the evaluation under the framework in *Internal Control - Integrated Framework*, the Company's Chief Executive Officer and Chief Financial Officer have each concluded that internal control over financial reporting was effective at the end of the period covered by this report on Form 10-K. Deloitte & Touche LLP, the independent registered public accounting firm that audited the financial statements included within this report, has issued an attestation report on management's assessment of the effectiveness of internal control over financial reporting at the end of the period covered by this report. Deloitte & Touche LLP's attestation report is set forth below.

Changes in Internal Control Over Financial Reporting No changes in the Company's internal control over financial reporting occurred that has materially affected, or is reasonably likely to materially affect, such controls during the last quarter of the period covered by this report.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of UMB Financial Corporation & Subsidiaries:

We have audited the internal control over financial reporting of UMB Financial Corporation & Subsidiaries (the Company) as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Because management's assessment and our audit were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of the Company's internal control over financial reporting included controls over the preparation of the schedules equivalent to the basic financial statements in accordance with the instructions for the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's consolidated balance sheets as of December 31, 2007 and 2006, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2007, and our report dated February 27, 2008 expressed an unqualified opinion on those financial statements, containing an explanatory paragraph regarding changes in accounting methods.
