SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended March 31, 2008

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934.

Commission File No. 0-29092

PRIMUS TELECOMMUNICATIONS GROUP, INCORPORATED

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

54-1708481
(I.R.S. Employer Identification No.)

7901 Jones Branch Drive, Suite 900,

22102

McLean, VA
(Address of principal executive offices)

(Zip Code)

(703) 902-2800

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding as of
Common Stock \$0.01 par value	April 30, 2008 142,632,540

PRIMUS TELECOMMUNICATIONS GROUP, INCORPORATED

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(UNAUDITED)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated condensed financial statements of Primus Telecommunications Group, Incorporated and subsidiaries (the Company or Primus) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial reporting and Securities and Exchange Commission (SEC) regulations. Certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such principles and regulations. In the opinion of management, the financial statements reflect all adjustments (all of which are of a normal and recurring nature), which are necessary to present fairly the financial position, results of operations, cash flows and comprehensive income (loss) for the interim periods. The results for the three months ended March 31, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The results for the three months ended March 31, 2007 reflect the activities of certain operations as discontinued operations (see Note 10 Discontinued Operations).

The financial statements should be read in conjunction with the Company s audited consolidated financial statements included in the Company s most recently filed Form 10-K.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Liquidity Outlook As of March 31, 2008, the Company has \$55.9 million of cash and cash equivalents. The Company believes that its existing cash and cash equivalents, will be sufficient to fund its debt service requirements, other fixed obligations (such as capital leases, vendor financing and other long-term obligations), and other cash needs for its operations for at least the next twelve months. The Company will continue to have significant debt service obligations on a mid-term and a long-term basis, as disclosed in Note 4. After recent debt buybacks, the Company has \$19.5 million principal amount of 12³/₄% Senior Notes and \$8.6 million principal amount of Step Up Convertible Subordinated Debentures coming due in the second half of 2009. The Company s strategies related to meeting our 2009 obligations and other cash needs are to strengthen the balance sheet opportunistically through potential de-levering transactions and equity capital infusions; to improve the non-sales and marketing cost structure and maintain an aggressive cost management program; to focus on improving sales productivity and margin enhancements by leveraging the network assets and increasing the revenue mix in favor of higher margin growth services; and opportunistically to sell non-strategic assets and businesses and use the proceeds either to accelerate growth of high-margin products or to reduce debt. Although the Company believes that it will have sufficient liquidity to fund its obligations for the next 12 months, there can be no assurance that the Company will be successful in implementing its longer term strategies or obtain new capital at acceptable terms.

Principles of Consolidation The consolidated financial statements include the Company s accounts, its wholly-owned subsidiaries and all other subsidiaries over which the Company exerts control. All intercompany profits, transactions and balances have been eliminated in consolidation. The Company owns 90% of the common stock of Matrix Internet, S.A. (Matrix). In March 2008, the Company sold its minority equity interest in Bekkoame Internet, Inc. (Bekko). The Company used the equity method of accounting for its investment in Bekko.

Presentation of sales taxes collected The Company reports any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between the Company and a customer (including sales, use, value-added and some excise taxes) on a net basis (excluded from revenues).

Table of Contents

Stock-Based Compensation The Company uses a Black-Scholes option valuation model to determine the fair value of stock-based compensation under SFAS No. 123(R), consistent with that used for pro forma disclosures under SFAS No. 123. The Black-Scholes model incorporates various assumptions including the expected term of awards, volatility of stock price, risk-free rates of return and dividend yield. The expected term of an award is no less than the option vesting period and is based on the Company's historical experience. Expected volatility is based upon the historical volatility of the Company's stock price. The risk-free interest rate is approximated using rates available on U.S. Treasury securities with a remaining term similar to the option's expected life. The Company uses a dividend yield of zero in the Black-Scholes option valuation model as it does not anticipate paying cash dividends in the foreseeable future. The Company also had an Employee Stock Purchase Plan, which was suspended on July 27, 2006, and which allowed employees to elect to purchase stock at 85% of fair market value (determined monthly) and was considered compensatory under SFAS No. 123(R).

The Company recorded \$62 thousand and \$58 thousand stock-based compensation expenses for the three months ended March 31, 2008 and 2007, respectively, under guidance in SFAS No. 123(R).

The weighted average fair value at date of grant for options granted during the three months ended March 31, 2008 was \$0.11 per option. No options were granted during the three months ended March 31, 2007. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	For the Three Months Ended March 31, 2008
Expected dividend yield	0%
Expected stock price volatility	96%
Risk-free interest rate	2.2%
Expected option term	4 years

As of March 31, 2008, the Company had 1.6 million unvested awards outstanding of which \$0.3 million of compensation expense will be recognized over the weighted average remaining vesting period of 2.08 years.

Use of Estimates The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of net revenue and expenses during the reporting period. Actual results may differ from these estimates. Significant estimates include allowance for doubtful accounts receivable, accrued interconnection cost disputes, the fair value of embedded derivatives, market assumptions used in estimating the fair values of certain assets and liabilities such as marketable securities and long-term obligations, the calculation used in determining the fair value of the Company's stock options required by SFAS No. 123(R), various tax contingencies, asset impairment write-downs, and purchase price allocations.

Newly Adopted Accounting Principle

Effective January 1, 2008, the Company adopted SFAS No. 157, Fair Value Measurements, for all financial instruments accounted for at fair value on a recurring basis. The Company does not have any non-financial instruments accounted for at fair value on a recurring basis. SFAS No. 157 establishes a new framework for measuring fair value and expands related disclosures. Broadly, the SFAS No. 157 framework requires fair value to be determined based on the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. SFAS No. 157 establishes market or observable inputs as the preferred source of values, followed by assumptions based on hypothetical transactions in the absence of market inputs.

Table of Contents

The valuation techniques required by SFAS No. 157 are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1: Quoted prices for identical instruments in active markets.

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3: Significant inputs to the valuation model are unobservable.

See table below for summary of the Company's financial instruments accounted for at fair value on a recurring basis:

	Fair Value as of March 31, 2008, using:			
	March 31, 2008	Quoted prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash equivalents	\$ 18,947	\$ 18,947		
Derivative	136		\$ 136	
Total	\$ 19,083	\$ 18,947	\$ 136	

New Accounting Pronouncements

In March 2008, the Financial Accounting Standard Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 161, Disclosures about Derivative Instruments and Hedging Activities. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133, Accounting for Derivative Instruments and Hedging with the intent to provide users of financial statements with an enhanced understanding of the use of derivative instruments, how derivative instruments and related hedged items are accounted for, and how derivative instruments and related hedged items affect an entity's financial statements. SFAS No. 161 is effective for financial statements issued for fiscal years after July 1, 2009. The Company anticipates that the adoption of this standard will not have a material impact on its results of operations, financial position and cash flows.

3. GOODWILL AND OTHER INTANGIBLE ASSETS

Acquired intangible assets subject to amortization consisted of the following (in thousands):

	As of March 31, 2008			As of December 31, 2007		
	Gross Carrying Amount	Accumulated Amortization	Net Book Value	Gross Carrying Amount	Accumulated Amortization	Net Book Value
Customer lists	\$ 4,077	\$ (3,027)	\$ 1,050	\$ 4,074	\$ (2,688)	\$ 1,386
Other	1,834	(1,657)	177	1,678	(1,507)	171
Total	\$ 5,911	\$ (4,684)	\$ 1,227	\$ 5,752	\$ (4,195)	\$ 1,557

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

Amortization expense for customer lists and other intangible assets for the three months ended March 31, 2008 and 2007 was \$0.5 million. The Company expects amortization expense for customer lists and other intangible assets for the remainder of 2008 and the year ended December 31, 2009 to be approximately \$1.1 million and \$0.1 million, respectively.

Table of Contents

Acquired intangible assets not subject to amortization consisted of the following (in thousands):

	As of March 31, 2008	As of December 31, 2007
Goodwill	\$ 39,753	\$ 40,134

The changes in the carrying amount of goodwill for the three months ended March 31, 2008 are as follows (in thousands):

	United States	Canada	Asia-Pacific	Total
Balance as of January 1, 2008	\$ 208	\$ 27,287	\$ 12,639	\$ 40,134
Effect of change in foreign currency exchange rates	4	(1,099)	714	(381)
Balance as of March 31, 2008	\$ 212	\$ 26,188	\$ 13,353	\$ 39,753

4. LONG-TERM OBLIGATIONS

Long-term obligations consisted of the following (in thousands):

	March 31, 2008	December 31, 2007
Obligations under capital leases	\$ 6,895	\$ 7,171
Leased fiber capacity	4,457	4,990

Amount Representing Premium (Discount)					(964)	(408)	5,393	4,021
Add: Exchangeable Senior Notes Interest Treated as Long-Term Obligations					7,040			7,040
Book Value of Long Term Obligations	\$ 11,352	\$ 97,000	\$ 35,268	\$ 254,495	\$ 139,650	\$ 8,233	\$ 113,603	\$ 659,601

- (1) For preparation of this table, we have assumed the interest rate of the Senior Secured Term Loan Facility to be 9.5%, which is the interest rate at March 31, 2008.
- (2) For preparation of this table, we have shown separately the cash interest payments of PTHI's (as defined below) 5% Exchangeable Senior Notes as a portion of long-term obligations (see *Senior Notes, Senior Secured Notes, Convertible Senior Notes, Exchangeable Senior Notes, Step Up Convertible Subordinated Debentures and Convertible Subordinated Debentures* below). The interest due on the 5% Exchangeable Senior Notes in 2008, 2009 and 2010 is \$2.8 million, \$2.8 million and \$1.4 million, respectively.

The indentures governing the senior notes, senior secured notes, senior secured term loan facility, convertible senior notes, and step up convertible subordinated debentures, as well as other credit arrangements, contain certain financial and other covenants which, among other things, will restrict the Company's ability to incur further indebtedness and make certain payments, including the payment of dividends and repurchase of subordinated debt held by the Company. The Company was in compliance with the above covenants at March 31, 2008.

Senior Secured Term Loan Facility

In February 2005, a direct wholly-owned subsidiary of the Company, PTHI, entered into a six-year, \$100 million senior secured term loan facility (the *Facility*). Each borrowing made under the Facility may be, at the election of PTHI at the time of the borrowing, a London Inter-Bank Offered Rate (LIBOR) loan (which will bear interest at a rate equal to LIBOR + 6.50%), or a base rate loan (which will bear interest at a rate equal to the greater of the prime rate plus 5.50% or the federal funds effective rate plus 6.0%). The Facility contains no financial maintenance covenants. The Company borrowed \$100 million under this Facility in February 2005.

Table of Contents

The Facility is to be repaid in 24 quarterly installments, which began on June 30, 2005, at a rate of one percent of the original principal per year over the next five years and nine months, and the remaining balance repaid on the sixth anniversary date of the Facility, with early redemption at a premium to par at PTHI's option at any time after February 18, 2006. The Facility is guaranteed by the Company and certain of PTHI's subsidiaries and is secured by certain assets of PTHI and its guarantor subsidiaries and stock pledges.

In February 2007, the Company received unanimous consent to an amendment of its existing \$100 million Facility. This amendment enables IHC, a wholly-owned indirect subsidiary of the Company, to issue and have outstanding up to \$200 million of existing authorized indebtedness in the form of newly authorized secured notes with a second lien security position (14¹/₄% Senior Secured Notes). The amendment allowed for an increase of ¹/₄% to the interest rate of the Facility and adjusted the early call features.

The effective interest rate for the Facility at March 31, 2008 was 9.5%.

Financing Facility

In March 2007, the Company entered into a Senior Secured Credit Agreement (Credit Agreement) with a financial institution, to refinance an existing Canadian credit facility. The Credit Agreement provides for a \$35.0 million non-amortizing loan bearing interest at a rate of LIBOR plus 425 basis points and matures in 2012. The loan proceeds were used to refinance the existing Canadian credit facility, including certain costs related to the transaction, and to finance certain capital expenditures. The Credit Agreement is secured by the assets of the Company's Canadian operations and certain guarantees. In October 2007, the Company entered into a cross-currency principal and interest rate swap agreement, a portion of which was required by the Credit Agreement, which fixed the interest rate at 9.21% starting from October 31, 2007. At March 31, 2008, the Company had an outstanding liability of \$35.0 million.

Senior Notes, Senior Secured Notes, Convertible Senior Notes, Exchangeable Senior Notes, Step Up Convertible Subordinated Debentures and Convertible Subordinated Debentures

In February 2007, subsequent to the effectiveness of the amendment of the Facility, IHC issued in a private transaction \$57.2 million principal amount of the 14¹/₄% Senior Secured Notes, in exchange for \$40.7 million principal amount of the Company's outstanding October 1999 Senior Notes and \$23.6 million in cash. This exchange has been accounted for as a modification of debt with a portion deemed to be a troubled debt restructuring. In March 2007, IHC also issued for cash in private transactions an additional \$51.0 million principal amount of 14¹/₄% Senior Secured Notes with a \$0.3 million discount. Net cash proceeds from the 14¹/₄% Senior Secured Notes issuance, after giving effect to expenses, discounts and fees related to all of the foregoing transactions (including the amendment of the Facility) is \$69.2 million. The Company recorded \$5.1 million in costs associated with the issuance of the 14¹/₄% Senior Secured Notes, which have been recorded as a loss on restructuring of debt. The 14¹/₄% Senior Secured Notes will mature on May 20, 2011 with early redemption at a premium to par at IHC's option at any time after February 2008. During specified periods, IHC may redeem at par up to 35% of the aggregate principal amount of the 14¹/₄% Senior Secured Notes with the net cash proceeds of certain equity offerings of the Company. Accrued interest will be paid each May 31st and November 30th, beginning May 31st, 2007. The effective interest rate for the 14¹/₄% Senior Secured Notes at March 31, 2008 was 12.4% (see Note 12 Guarantor/Non-Guarantor Consolidating Condensed Financial Information.)

In the second quarter 2006, the Company completed the exchange of \$54.8 million principal amount of the Company's 3³/₄% convertible senior notes due 2010 (2003 Convertible Senior Notes) and \$20.5 million in cash for \$56.3 million principal amount of PTHI's 5% Exchangeable Senior Notes. This exchange was deemed a troubled debt restructuring, and accordingly, has been accounted for as a modification of debt, with total future cash payments of \$67.6 million being recorded in long-term obligations. The Company recognized a gain on restructuring of debt of \$4.8 million in connection with this exchange, including the expensing of \$2.9 million of

Table of Contents

financing costs. The 5% Exchangeable Senior Notes mature on June 30, 2010, as a result of the Company increasing its equity (through designated transactions) in the aggregate of \$25 million during June and July 2007. Interest on the 5% Exchangeable Senior Notes is paid at the rate of 5% per annum on each June 30 and December 30, beginning on December 30, 2006. Under certain circumstances, the Company may elect to make interest payments in shares of common stock, although the holders of the 5% Exchangeable Senior Notes were entitled to receive the first two semi-annual interest payments wholly in cash. The 5% Exchangeable Senior Notes are exchangeable, in the aggregate, into 46,935,833 shares of the Company's common stock at a conversion price of \$1.20 per share of common stock, subject to adjustment. If the closing bid price of the Company's common stock, for at least 20 trading days in any consecutive 30 trading-day period, exceeds 150% of the conversion price then in effect, the Company may elect to exchange the senior notes for shares of the Company's common stock at the conversion price, subject to certain conditions, including that no more than 50% of the 5% Exchangeable Senior Notes may be exchanged by the Company within any 30-day period. As of March 31, 2008, such conversion trigger had not been met. In the event of a change in control, as defined, the holders may require the Company to repurchase the 5% Exchangeable Senior Notes at which time the Company has the option to settle in cash or common stock at an adjusted conversion price. The 5% Exchangeable Senior Notes are guaranteed by PTGI (see Note 12 Guarantor/Non-Guarantor Consolidating Condensed Financial Information).

In the first quarter 2006, the Company completed the exchange of \$27.4 million principal amount of the Company's 3/4% convertible subordinated debentures due 2007 (2000 Convertible Subordinated Debentures) for \$27.5 million principal amount of the Company's step up convertible subordinated debentures due August 2009 (Step Up Convertible Subordinated Debentures) through two transactions. The Company recognized a gain on early extinguishment of debt of \$1.5 million in connection with this exchange. The Step Up Convertible Subordinated Debentures will mature on August 15, 2009. Interest will be payable from February 27, 2006 to December 31, 2006 at the rate of 6% per annum; from January 1, 2007 to December 31, 2007 at the rate of 7% per annum; and from January 1, 2008 to maturity at the rate of 8% per annum. Accrued interest will be paid each February 15 and August 15, beginning August 15, 2006, to holders of record on the preceding February 1 and August 1, respectively. The Step Up Convertible Subordinated Debentures are convertible into the Company's common stock at a conversion price of \$1.187 per share of common stock through August 15, 2009. The Indenture permits the Company, at its sole option, to require conversion if the Company's stock trades at 150% of the conversion price for at least 20 days within a 30 day period, subject to certain conditions, including that no more than 25% of the notes may be exchanged within any 30 day trading period. As of March 31, 2008, such conversion trigger had not been met. In the event of a change in control, as defined, the holders may put the instrument to the Company at which time the Company has the option to settle in cash or common stock at an adjusted conversion price. During the quarter ended June 30, 2007, the Company exchanged 6,000,000 shares of the Company's common stock for the extinguishment of \$5.0 million in principal amount of these convertible subordinated debentures. In accordance with SFAS No. 84, Induced Conversion of Convertible Debt, the Company recognized an induced conversion expense of \$1.6 million and \$0.7 million write-off of debt discount and deferred financing costs in connection with this conversion. During the first quarter of 2008, the Company made open market purchases of \$13.8 million principal amount of its Step Up Convertible Subordinated Debentures, resulting in a \$2.1 million gain on early extinguishment of debt including the write-off of related deferred financing costs. The outstanding Step Up Convertible Subordinated Debentures are convertible in the aggregate into 7,279,697 shares of the Company's common stock.

At the time of issuance of the Step Up Convertible Subordinated Debentures, the Company did not have sufficient authorized and unissued shares of common stock to satisfy exercise and conversion of all of its convertible instruments. Accordingly, the Company determined that the Step Up Convertible Subordinated Debentures, the 2000 Convertible Subordinated Debentures and the 2003 Convertible Senior Notes were hybrid instruments with characteristics of a debt host agreement and contained embedded derivative features that had characteristics and risks that were not clearly and closely associated with the debt host. In the first quarter 2006, the conversion options were determined to be derivative instruments to be bifurcated and recorded as a current liability at fair value. In the second quarter 2006, the Company's shareholders voted to approve alternative

Table of Contents

proposals to authorize an amendment to the Company's Certificate of Incorporation to affect a one-for-ten reverse stock split or to authorize an amendment of the Company's Certificate of Incorporation allowing an increase of authorized common stock from 150,000,000 to 300,000,000. Either authorization ensured the Company would have the ability to control whether it has sufficient authorized and unissued shares of common stock to satisfy exercise and conversion of all of its convertible instruments. Therefore, the Company determined that the Step Up Convertible Subordinated Debentures, the 2000 Convertible Subordinated Debentures and the 2003 Convertible Senior Notes did not contain embedded derivative features as of the date of the shareholder vote, June 20, 2006, and added back the June 20, 2006 fair value of the embedded derivative into the debt balance. On July 27, 2006, the Board of Directors determined to increase the authorized shares of the common stock to 300,000,000.

The Company recorded a corresponding debt discount to the Step Up Convertible Subordinated Debentures and the 2003 Convertible Senior Notes in the amount of the fair value of the embedded derivative at the issue date. An additional debt discount of \$1.7 million was recorded for the Step Up Convertible Subordinated Debentures to bring the carrying value to fair value. The carrying value of the Step Up Convertible Subordinated Debentures at issuance was approximately \$14.3 million, and the carrying value of the 2003 Convertible Senior Notes at issuance of the Step Up Convertible Subordinated Debentures was approximately \$127.8 million. The Company is accreting the difference between the face values of the Step Up Convertible Subordinated Debentures and the 2003 Convertible Senior Notes and the corresponding carrying values to interest expense under the effective interest method on a monthly basis over the lives of the Step Up Convertible Subordinated Debentures and the 2003 Convertible Senior Notes. At March 31, 2008, the carrying value of the Step Up Convertible Subordinated Debentures (face value of \$8.6 million) was \$8.2 million, and the carrying value of the 2003 Convertible Senior Notes (face value of \$77.3 million) was \$76.3 million. The effective interest rate of the Step Up Convertible Subordinated Debentures and the 2003 Convertible Senior Notes at March 31, 2008 was 11.1% and 5.4%, respectively.

In January 2004, PTHI, a direct, wholly-owned subsidiary of the Company, completed the sale of \$240 million in aggregate principal amount of 8% senior notes due 2014 (2004 Senior Notes) with semi-annual interest payments due on January 15th and July 15th, with early redemption at a premium to par at PTHI's option at any time after January 15, 2009. The Company recorded \$6.7 million in costs associated with the issuance of the 2004 Senior Notes, which have been recorded as deferred financing costs in other assets. The effective interest rate at March 31, 2008 was 8.4%. During specified periods, PTHI may redeem up to 35% of the original aggregate principal amount with the net cash proceeds of certain equity offerings of the Company. The 2004 Senior Notes are guaranteed by PTGI (see Note 12 – Guarantor/Non-Guarantor Consolidating Condensed Financial Information). During the year ended December 31, 2004, the Company reduced \$5.0 million principal balance of the 2004 Senior Notes through open market purchases.

In September 2003, the Company completed the sale of \$132 million in aggregate principal amount of 2003 Convertible Senior Notes with semi-annual interest payments due on March 15th and September 15th. The Company recorded \$5.2 million in costs associated with the issuance of the 2003 Convertible Senior Notes, which have been recorded as deferred financing costs in other assets. Holders of these notes may convert their notes into the Company's common stock at any time prior to maturity at an initial conversion price of \$9.3234 per share, which is equivalent to an initial conversion rate of 107.257 shares per \$1,000 principal amount of the notes, subject to adjustment in certain circumstances. The outstanding notes are convertible in the aggregate into 8,285,603 shares of the Company's common stock. In the event of a change in control, as defined, the holders may put the instrument to the Company at which time the Company has the option to settle in cash or common stock at an adjusted conversion price. In the second quarter 2006, the Company restructured \$54.8 million principal amount of 2003 Convertible Senior Notes; see prior disclosure regarding the 5% Exchangeable Senior Notes within this footnote.

In October 1999, the Company completed the sale of \$250 million in aggregate principal amount of 12.75% senior notes due 2009 (the October 1999 Senior Notes). The October 1999 Senior Notes are due October 15,

Table of Contents

2009, with semi-annual interest payments due on October 15th and April 15th with early redemption at a premium to par at the Company's option at any time after October 15, 2004 and with an early redemption at par at the Company's option at any time after October 15, 2007. During the years ended December 31, 2002, 2001 and 2000, the Company reduced the principal balance of these senior notes through open market purchases. In June and September 2002, the Company retired all of the October 1999 Senior Notes that it had previously purchased in the principal amount of \$134.3 million in aggregate. The retired principal had been held by the Company as treasury bonds and had been recorded as a reduction of long-term obligations. During the year ended December 31, 2004, the Company retired \$33.0 million principal amount of the October 1999 Senior Notes through open market purchases. During the year ended December 31, 2005, the Company exchanged 5,165,175 shares of the Company's common stock for the extinguishment of \$8.6 million principal amount of these senior notes. During the quarter ended March 31, 2006, the Company exchanged 1,825,000 shares of the Company's common stock for the extinguishment of \$2.5 million principal amount of these senior notes. During the first quarter 2007, the Company restructured \$40.7 million principal amount of the October 1999 Senior Notes; the Company entered into a supplemental indenture, amending the terms to eliminate certain covenants. See prior disclosure regarding the 14 1/4% Senior Secured Notes within this footnote. During the remainder of 2007, the Company retired \$10.5 million principal amount of the October 1999 Senior Notes through open market purchases. In the first quarter of 2008, the Company made open market purchases of \$0.8 million principal amount of its October 1999 Senior Notes, resulting in a \$0.1 million gain on early extinguishment of debt including the write-off of related deferred financing costs.

Leased Fiber Capacity

In December 2000, the Company entered into a financing arrangement to purchase fiber optic capacity in Australia for 51.1 million Australian dollars (AUD) (\$28.5 million at December 31, 2000) from Optus Networks Pty. Limited. As of December 31, 2001, the Company had fulfilled the total purchase obligation. The Company signed a promissory note payable over a four-year term ending in April 2005 bearing interest at a rate of 14.31%. During the three months ended June 30, 2003, the Company renegotiated the payment terms extending the payment schedule through March 2007, and lowering the interest rate to 10.2%. In October 2006, the Company renegotiated the payment terms of its promissory note payable to Optus Networks Pty. Limited to defer principal payments from April 2006 through December 2006 and was obligated to pay the remaining balance in three equal monthly principal payments in the first quarter 2007. In February 2007, the Company again renegotiated the payment terms of its \$8.1 million (10.1 million AUD) promissory note payable to Optus Networks Pty. Limited to extend the payment schedule through December 2008 in 24 equal monthly payments. The interest rate remains 10.2%, and the interest payments continue monthly. At March 31, 2008 and December 31, 2007, the Company had a liability recorded in the amount of \$4.5 million (4.9 million AUD) and \$5.0 million (5.7 million AUD), respectively.

Equipment Financing and Other Long-Term Obligations

In November 2005, Primus Australia entered into a financing arrangement for network equipment. Payments are made over a five-year term ending October 2010. The effective interest rate on the current borrowing is 9.3%. At March 31, 2008 and December 31, 2007, the Company had a liability recorded under this agreement in the amount \$4.7 million (5.1 million AUD) and \$4.7 million (5.4 million AUD), respectively.

Table of Contents**5. COMMITMENTS AND CONTINGENCIES**

Future minimum lease payments under capital leases and leased fiber capacity financing (Vendor Financing), purchase obligations and non-cancelable operating leases as of March 31, 2008 are as follows (in thousands):

Year Ending December 31,	Vendor Financing	Purchase Obligations	Operating Leases
2008 (as of March 31, 2008)	\$ 5,907	\$ 12,598	\$ 11,940
2009	3,370	7,490	13,089
2010	3,162	3,266	10,018
2011	44	2,534	7,288
2012	15	1,567	5,692
Thereafter			12,174
Total minimum lease payments	12,498	27,455	60,201
Less: Amount representing interest	(1,146)		
	\$ 11,352	\$ 27,455	\$ 60,201

The Company has contractual obligations to utilize an external vendor for certain customer support functions and to utilize network facilities from certain carriers with terms greater than one year. The Company does not purchase or commit to purchase quantities in excess of normal usage or amounts that cannot be used within the contract term or at rates below or above market value. The Company made purchases under purchase commitments of \$8.8 million and \$32 thousand for the three months ended March 31, 2008 and 2007, respectively.

Rent expense under operating leases was \$4.4 million and \$3.5 million for the three months ended March 31, 2008 and 2007, respectively.

Litigation

The Company is subject to claims and legal proceedings that arise in the ordinary course of its business. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be decided unfavorably to the Company. The Company believes that any aggregate liability that may result from the resolution of these matters will not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows. (See Note 2 Summary of Significant Accounting Policies).

6. SHARE-BASED COMPENSATION

The Company sponsors an employee stock compensation plan (the Equity Incentive Plan). The total number of shares of common stock authorized for issuance under the Equity Incentive Plan is 13,000,000. Under the Equity Incentive Plan, awards may be granted to key employees or consultants of the Company and its subsidiaries in the form of Incentive Stock Options, Nonqualified Stock Options or Restricted Stock Units. The Equity Incentive Plan allows the granting of options at an exercise price of not less than 100% of the stock's fair value at the date of grant and allows the grant of restricted stock units (RSUs) for no consideration. The options and RSUs vest over a period of up to three years. No option will be exercisable more than ten years from the date it is granted. On June 16, 2004, the stockholders of the Company approved amendments to the Equity Incentive Plan, including (i) renaming the employee stock option plan the Equity Incentive Plan ; (ii) expanding the forms of awards permitted to be granted, including stock appreciation rights, restricted stock awards, stock units and other equity securities, and authorizing a tax deferral feature for executive officers; (iii) prohibiting the repricing of stock options in the future without stockholder approval; and (iv) requiring vesting in full to be not less than three years for restricted stock and stock unit awards, unless accelerated following the first anniversary of the award due to the satisfaction of predetermined performance conditions.

Table of Contents

The Company sponsors a Director Stock Option Plan (the Director Plan) for non-employee directors. Under the Director Plan, an option is granted to each qualifying non-employee director upon election or reelection to purchase 45,000 shares of common stock, which vests in one-third increments as of the grant date and the first and second anniversaries of the grant date, over a two-year period. The option price per share is the fair market value of a share of common stock on the date the option is granted. No option will be exercisable more than five years from the date of grant. On June 16, 2004, the stockholders of the Company approved amendments to the Director Plan to (i) increase the number of shares of common stock issuable pursuant to awards under the Director Plan by 300,000 to a total of 900,000; and (ii) authorize the issuance of restricted stock (in lieu of cash compensation at the discretion of individual Directors).

A summary of stock option activity during the three months ended March 31 is as follows:

	2008		2007	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Options outstanding Beginning of quarter	7,368,262	\$ 2.09	7,919,267	\$ 2.15
Granted	910,000	\$ 0.36		\$
Exercised		\$		\$
Forfeitures	(131,941)	\$ 2.26	(148,455)	\$ 1.81
Outstanding end of quarter	8,146,321	\$ 1.89	7,770,812	\$ 2.16
Eligible for exercise end of quarter	6,597,400	\$ 2.21	6,600,016	\$ 2.39

The following table summarizes information about stock options outstanding at March 31, 2008:

Range of Option Prices	Options Outstanding				Options Exercisable			
	Total Outstanding	Weighted Average Remaining Life in Years	Weighted Average Exercise Price	Intrinsic Value	Total Exercisable	Weighted Average Remaining Life in Years	Weighted Average Exercise Price	Intrinsic Value
\$0.36 to \$0.65	1,139,834	9.13	\$ 0.41	\$	149,167	5.38	\$ 0.61	\$
\$0.73 to \$0.88	729,333	7.43	\$ 0.79	\$	510,997	7.21	\$ 0.78	\$
\$0.90	762,656	3.27	\$ 0.90	\$	762,656	3.27	\$ 0.90	\$
\$0.92	858,496	7.61	\$ 0.92	\$	578,578	7.61	\$ 0.92	\$
\$0.93 to \$0.99	110,000	4.88	\$ 0.98	\$	50,000	5.68	\$ 0.97	\$
\$1.33 to \$1.61	19,500	5.56	\$ 1.47	\$	19,500	5.56	\$ 1.47	\$
\$1.65	1,498,523	4.72	\$ 1.65	\$	1,498,523	4.72	\$ 1.65	\$
\$1.80 to \$2.38	1,723,879	4.75	\$ 1.98	\$	1,723,879	4.75	\$ 1.98	\$
\$3.03 to \$6.30	1,278,500	6.13	\$ 4.99	\$	1,278,500	6.13	\$ 4.99	\$
\$12.31 to \$17.44	17,300	1.30	\$ 15.00	\$	17,300	1.30	\$ 15.00	\$
\$31.94	8,300	1.84	\$ 31.94	\$	8,300	1.84	\$ 31.94	\$
	8,146,321	5.97	\$ 1.89	\$	6,597,400	5.29	\$ 2.21	\$

The number of unvested options expected to vest is 0.7 million shares, with a weighted average remaining life of 8.9 years, a weighted average exercise price of \$0.53, and an intrinsic value of \$0.

In 2007, 100,000 restricted stock units were granted, which is the only grant to date. None have vested as their vesting schedule is to vest 100% three years from grant date. The fair market value of the stock units at the grant date was \$0.40 per share. In the first quarter of 2008, the Company recognized \$3 thousand expense related to this grant.

Table of Contents

In December 1998, the Company established the 1998 Restricted Stock Plan (the Restricted Plan) to facilitate the grant of restricted stock to selected individuals (excluding executive officers and directors of the Company) who contribute to the development and success of the Company. The total number of shares of common stock that may be granted under the Restricted Plan is 750,000. The Company did not issue any restricted stock under the Restricted Plan for three months ended March 31, 2008 and 2007. As of March 31, 2008, 54,000 shares have been issued and none are considered restricted.

7. GAIN OR LOSS ON EARLY EXTINGUISHMENT OF DEBT

In the first quarter 2008, the Company made open market purchases of \$0.8 million of its October 1999 Senior Notes, resulting in a \$0.1 million gain on early extinguishment of debt including the write-off of related deferred financing costs.

In the first quarter 2008, the Company made open market purchases of \$13.8 million principal amount of its Step Up Convertible Subordinated Debentures, resulting in a \$2.1 million gain on early extinguishment of debt including the write-off of related deferred financing costs, discount and effective interest.

8. INCOME TAXES

The Company conducts business globally, and as a result, the Company or one or more of its subsidiaries files income tax returns in the United States federal jurisdiction and various state and foreign jurisdictions. In the normal course of business we are subject to examination by taxing authorities throughout the world.

The following table summarizes the open tax years for each major jurisdiction:

Jurisdiction	Open Tax Years
United States Federal	2000, 2002-2007
Australia	2002-2007
Canada	2000-2007
United Kingdom	2002-2007
Netherlands	2002-2007

The Company is undergoing examination in Canada for the years 2000, 2001, and 2002 with expected completion during the second quarter 2008. The Company is undergoing an examination in the Netherlands for the years 2002, 2003, 2004, and 2005. The Company is also currently under examination in other foreign tax jurisdictions, none of which are individually material.

The Company adopted the provisions of FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. It is expected that the amount of unrecognized tax benefits, reflected in the Company's financial statements as a result of the adoption of FIN No. 48, will change in the next twelve months; however, the Company does not expect the change to have a significant impact on the results of operations or the financial position of the Company.

On an ongoing basis, the Company monitors activity in its 5% shareholder base for substantial changes in ownership as defined under Internal Revenue Code Section 382 (Section 382). In 2007 and the rest of the testing periods under Section 382, the Company has had significant activity in this shareholder base, but upon review of the 13G filings and other available data the Company believes that an ownership change did not occur during 2007 or during the three months ended March 31, 2008. If a change is to occur, the resulting Section 382 limitation would place severe limits on the Company's ability to utilize the United States net operating losses.

Table of Contents**9. OPERATING SEGMENT AND RELATED INFORMATION**

The Company has five reportable operating segments based on management's organization of the enterprise into geographic areas—United States, Canada, Europe and Asia-Pacific, with the wholesale business within each region managed as a separate global segment. The Company evaluates the performance of its segments and allocates resources to them based upon net revenue and income (loss) from operations. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Net revenue by geographic segment is reported on the basis of where services are provided. The Company has no single customer representing greater than 10% of its revenues. Operations and assets of the United States segment include shared corporate functions and assets, which the Company does not allocate to its other geographic segments for management reporting purposes. The wholesale business' assets are indistinguishable from the respective geographic segments. Therefore, any reporting related to the wholesale business for assets, capital expenditures or other balance sheet items is impractical.

Summary information with respect to the Company's segments is as follows (in thousands):

	Three months ended March 31,	
	2008	2007
Net Revenue by Geographic Region		
United States		
<i>United States</i>	\$ 42,659	\$ 45,868

10. DISCONTINUED OPERATIONS

In August 2007, the Company sold its 51% interest in its German telephone installation system subsidiaries. The sale price was \$0.8 million (0.6 million Euros), which included \$0.5 million (0.4 million Euros) in cash and \$0.3 million (0.2 million Euros) for payment of outstanding intercompany debt. For the intercompany debt payment, the Company received \$0.1 million (0.1 million Euros) in cash at closing. The balance owing is represented by a note receivable and will be paid in fifteen equal monthly installment payments. As a result, the Company recorded a \$0.2 million gain from sale of assets. Net assets held for sale were \$0.6 million at the closing date.

In February 2007, the Company sold its Australian domain name registry and web hosting subsidiary, Planet Domain. The sale price was \$6.5 million (\$8.3 million AUD). The Company received \$5.5 million in net cash proceeds from the transaction after closing adjustments. As a result, the Company recorded a \$6.0 million gain from sale of assets. The net assets of Planet Domain were \$0.2 million at the closing date.

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

As a result of these events, the Company's consolidated financial statements reflect the discontinued German subsidiary and Planet Domain operations as discontinued operations for the three months ended

Table of Contents

March 31, 2007. Accordingly, revenue, costs, and expenses of the discontinued operations have been excluded from the respective captions in the consolidated statements of operations. The net operating results of the discontinued operations have been reported, net of applicable income taxes as income from discontinued operations.

Summarized operating results of the discontinued German subsidiary and Planet Domain operations for the three months ended March 31, 2008 and 2007 are as follows (in thousands):

	For the Three Month Ended March 31, 2007	
Net revenue	\$	1,536
Operating expenses		1,374
Income from operations		162
Interest expense		(4)
Interest income and other income		2
Income from discontinued operations	\$	160

11. BASIC AND DILUTED INCOME (LOSS) PER COMMON SHARE

Basic income (loss) per common share is calculated by dividing income (loss) attributable to common stockholders by the weighted average common shares outstanding during the period.

Diluted income per common share adjusts basic income per common share for the effects of potentially dilutive common share equivalents. Potentially dilutive common shares primarily include the dilutive effects of common shares issuable under the Company's stock option compensation plans computed using the treasury stock method and the dilutive effects of shares issuable upon conversion of its 5% Exchangeable Senior Notes, the Step Up Convertible Subordinated Debentures, the 2003 Convertible Senior Notes and the 2000 Convertible Subordinated Debentures.

The Company had no dilutive common share equivalents during the three months ended March 31, 2008. The following could potentially dilute income per common share in the future but were excluded from the calculation of diluted loss per common share for the three months ended March 31, 2008 due to their antidilutive effects:

8.1 million shares issuable under the Company's stock option compensation plans,

46.9 million shares issuable upon conversion of the 5% Exchangeable Senior Notes,

7.3 million shares issuable upon the conversion of the Step Up Convertible Subordinated Debentures, and

8.3 million shares issuable upon conversion of the 2003 Convertible Senior Notes.

The Company had no dilutive common share equivalents during the three months ended March 31, 2007. The following could potentially dilute income per common share in the future but were excluded from the calculation of diluted loss per common share for the three months ended March 31, 2007 due to their antidilutive effects:

7.8 million shares issuable under the Company's stock option compensation plans,

46.9 million shares issuable upon conversion of the 5% Exchangeable Senior Notes,

23.2 million shares issuable upon the conversion of the Step Up Convertible Subordinated Debentures,

8.3 million shares issuable upon conversion of the 2003 Convertible Senior Notes, and

0.2 million shares issuable upon the conversion of the 2000 Convertible Subordinated Debentures.

12. GUARANTOR/NON-GUARANTOR CONDENSED CONSOLIDATED FINANCIAL INFORMATION

Subsequent to the issuance of the 2007 consolidated financial statements, the Company determined that its 2007 disclosures of consolidating financial information incorrectly excluded the intercompany interest and related accrued intercompany receivables and payables that resulted from three intercompany loans between Primus Telecommunications IHC, Inc. (IHC), Primus Telecommunications Group, Incorporated (PTGI) and Primus Telecommunications Holding, Inc. (PTHI). The effects of this correction on the 2007 consolidating condensed financial statements are shown in the table below. The consolidating condensed statements of operations and statements of cash flows for the three months ended March 31, 2007, and the consolidating condensed balance sheets at December 31, 2007 contained herein have been restated to include the effects of the adjustments shown in the tables below as increases (decreases) in the effected line items to correctly reflect intercompany interest charged by IHC to PTGI and PTHI on intercompany notes issued in 2007. The effects of this correction on the consolidating condensed statements of operations and cash flows for the year ended December 31, 2007 and the quarters ended June 30, 2007 and September 30, 2007 will be presented in future filings.

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

In each consolidating presentation, the above described changes are completely offset by corresponding increases in the elimination entries. Accordingly, these changes have no effect on the Company's consolidated financial statements.

Table of Contents

The consolidating condensed statement of cash flows for the quarter ended March 31, 2007 has been restated to correct the presentation of transactions that are settled, on a net basis, through the Company's intercompany payables and receivables between PTGI (parent) and its subsidiaries and between PTHI and its subsidiaries. The Company had previously presented all such transactions as operating activities. Certain of these transactions should have been presented as investing and financing activities. Accordingly, the previous presentation of the statements of cash flows for the quarter ended March 31, 2007 as contained in this Note have been corrected to add the lines entitled Proceeds from intercompany balance to cash flows from investing activities and Proceeds from (payments on) intercompany balance to cash flows from financing activities. In each consolidating presentation, the above described changes are completely offset by corresponding increases in the elimination entries. Accordingly, these changes have no effect on the Company's consolidated financial statements.

Consolidating Financial Statements for PTHI Debt Issuances

PTHI's 2004 Senior Notes and 5% Exchangeable Senior Notes are fully and unconditionally guaranteed by PTGI on a senior basis as of March 31, 2008. PTGI has a 100% ownership in PTHI and no direct subsidiaries other than PTHI. Accordingly, the following consolidating condensed financial information as of March 31, 2008 and 2007 are included for (a) PTGI on a stand-alone basis; (b) PTHI on a stand-alone basis; (c) PTGI's indirect non-guarantor subsidiaries on a combined basis; and (d) PTGI on a consolidated basis.

Consolidating Financial Statements for IHC Debt Issuance

Primus Telecommunications IHC, Inc.'s 14/4% Second Lien Notes are fully, unconditionally, jointly and severally guaranteed by PTGI on a senior basis as of March 31, 2008 and by PTHI, Primus Telecommunications, Inc., TresCom International Inc., Least Cost Routing, Inc., TresCom U.S.A., Inc., iPRIMUS USA, Inc., and iPRIMUS.com, Inc., 100% owned subsidiaries of PTGI (collectively, the "Other Guarantors"). PTGI has a 100% ownership in PTHI and no direct subsidiaries other than PTHI. Accordingly, the following consolidating condensed financial information as of March 31, 2008 and 2007 are included for (a) PTGI on a stand-alone basis; (b) Primus Telecommunications IHC, Inc. (IHC) on a stand-alone basis; (c) the Other Guarantor subsidiaries on a combined basis; (d) PTGI's indirect non-guarantor subsidiaries on a combined basis and (e) PTGI on a consolidated basis.

Investments in subsidiaries are accounted for using the equity method for purposes of the consolidating presentation. The principal elimination entries eliminate investments in subsidiaries, intercompany balances and intercompany transactions.

13. SUBSEQUENT EVENT

In April 2008, the Australian Competition and Consumer Commission (ACCC) issued a Final Determination (FD) concerning access disputes between Primus Australia and Telstra Corporation for unconditioned local loop services (ULLS) connection charges and call diversion charges. These services are key components of high speed broadband services offered by the Company.

The FD takes formal effect on May 12, 2008. The FD pricing directives for ULLS connection charges and call diversion charges are to be retroactively applied to services procured by the Company from Telstra from June 10, 2004 and May 10, 2005, respectively. As a result, the Company expects to receive refunds from Telstra of previous over-payments for the ULLS connection charges and call diversion services plus interest, the total amount of which is still being calculated and confirmed. The effectiveness of the ULLS determination expires on June 30, 2008. Although Telstra cannot directly appeal the FD, it may seek judicial review of the ACCC's decisions. With respect to the ULLS connection charges and call diversion charges, it is expected that ACCC will shortly publish interim pricing to apply beyond June 30, 2008, which the Company can obtain through notifying a new ULLS pricing dispute with the ACCC. Absent changed circumstances, it is expected that such interim prices will broadly reflect the ULLS FD pricing, but there can be no assurances of that outcome.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction and Overview of Operations

We are an integrated facilities based telecommunications services provider offering a portfolio of international and domestic voice, wireless, Internet, voice-over-Internet protocol (VOIP), data and hosting services to customers located primarily in the United States, Australia, Canada, the United Kingdom and western Europe. Our focus is to service the demand for high quality, competitively priced communications services that is being driven by the globalization of the world's economies, the worldwide trend toward telecommunications deregulation and the growth of broadband, Internet, VOIP, wireless and data traffic.

Generally, we price our services competitively with the major carriers and service providers operating in our principal service regions. We seek to generate net revenue through sales and marketing efforts focused on customers with significant communications needs, including small- and medium-sized enterprises (SMEs), multinational corporations, residential customers, and other telecommunications carriers and resellers and through acquisitions.

Our challenge to growing net revenue in recent years has been to overcome declines in long distance voice minutes of use per customer as more customers are using wireless devices and the Internet as alternatives to the use of wireline phones. Also, product substitution (e.g., wireless/Internet for fixed line voice; broadband for dial-up Internet service provider (ISP) services) has resulted in revenue declines in our legacy long distance voice and dial-up ISP businesses. Additionally, we believe that because deregulatory influences have begun to affect telecommunications markets outside the United States, the deregulatory trend is resulting in greater competition from the existing wireline and wireless competitors and from more recent entrants, such as cable companies and VOIP companies, which could continue to affect adversely our net revenue per minute, as well as minutes of use.

In order to manage our traffic network transmission costs, we pursue a flexible approach with respect to the management of our network capacity. In most instances, we optimize the cost of traffic by using the least expensive cost routing; negotiate lower variable usage based costs with domestic and foreign service providers and negotiate additional and lower cost foreign carrier agreements with the foreign incumbent carriers and others; and continue to expand/reduce the capacity of our network when traffic volumes justify such actions.

Our overall margin may fluctuate based on the relative volumes of international versus domestic long distance services; carrier services versus business and residential long distance services; prepaid services versus traditional post-paid voice services; Internet, VOIP and data services versus fixed line voice services; the amount of services that are resold; and the proportion of traffic carried on our network versus resale of other carriers' services. Our margin is also affected by customer transfer and migration fees. We generally pay a charge to install and transfer a new customer onto our network, and to migrate DSL and local customers. However, installing and migrating customers to our own networks, such as the local and DSL networks in Australia and Canada, enable us to increase our margin on such services as compared to resale of services using other carriers' networks.

SG&A expenses are comprised primarily of salaries and benefits, commissions, occupancy costs, sales and marketing expenses, advertising, professional fees, and administrative costs. All SG&A expenses are expensed when incurred. Emphasis on cost containment or the shift of expenditures from non-revenue producing expenses to sales and marketing expenses has been heightened since growth in net revenue has been under significant pressure.

First Quarter 2008 Results and Accomplishments

Overall revenue declined in the first quarter 2008 as compared to the same period a year ago, primarily as a result of the declining usage and pricing in the legacy voice business and the decline in low-margin wholesale

Table of Contents

and prepaid services business. That revenue decline has been partially offset by the continued growth of our broadband, VOIP, local, wireless, data and hosting services revenues. In the first quarter 2008, the annualized net revenue run rate from those services was approximately \$240 million. Our objective is to generate increased contribution from these products, such that, over time, such contribution exceeds the declines in legacy voice and dial-up Internet products. Our future growth and profitability are dependent upon accomplishing that goal.

We are encouraged by the results in the first quarter, particularly the sequential growth in both overall and retail revenue over the prior quarter. While we recognize that a single quarter does not establish a trend, we hope the results are an early indication that our targeted investments in sales and marketing and infrastructure will lead to further progress in stabilizing retail revenues. Improvement in our income from operations will be influenced by the success we achieve in our expanded sales and marketing efforts.

During the first quarter, we accomplished the following: opened new, and expanded existing, data centers in Canada and Australia; expanded the global DSLAM footprint by 5 to a total of 288 to expand the availability of our broadband services; augmented network capacity to offer higher speed DSL services in Australia and Canada; and continued growth of the Company's direct sales force and telemarketing capabilities across its major markets. As the currently available capacity through our infrastructure investment is adequate to meet our 2008 revenue goals, we now expect capital expenditures for the year to be in the \$25 million to \$30 million range, approximately \$5 million lower than our prior guidance.

During the quarter, we purchased and retired \$15 million principal amount of the Company's outstanding debt maturing in the latter half of 2009. We also completed the sales of a minority equity investment in a Japanese entity and surplus fiber assets for an aggregate \$2.6 million in cash proceeds. We continue to pursue other potential sales of select assets to improve our liquidity and narrow our geographical focus to our major franchises in the United States, Canada, Australia and Europe. However, the uncertainty in the capital markets combined with a weak overall economic outlook may extend our time horizon to meet our goal of generating \$50 million cash proceeds from asset sales, particularly if valuations are not at acceptable levels.

PRIMUS 2007-2008 Transformation Strategy

In light of improved operating performance over the course of 2006, we announced a two-year Transformation Strategy as we entered 2007. Our performance during the year of 2007 underscores that, while much has already been accomplished, much is yet to be done. As we move through 2008, we will continue to be guided by our stated strategy.

- A) Strengthen the balance sheet opportunistically through potential deleveraging transactions and equity capital infusions;
- B) Significantly improve our non-sales and marketing cost structure through increased outsourcing and/or off-shoring at lower cost locations globally and maintain an aggressive cost management program;
- C) Focus on improving sales productivity and margin enhancements by leveraging our network assets and increasing the revenue mix in favor of higher margin growth services; and
- D) Opportunistically sell non-strategic assets and businesses and use the proceeds either to accelerate growth of high-margin products or to strengthen the balance sheet.

Subsequent Event

In April 2008, the Australian Competition and Consumer Commission (ACCC) issued a Final Determination (FD) concerning access disputes between Primus Australia and Telstra Corporation for unconditioned local loop services (ULLS) connection charges and call diversion charges. These services are key components of high speed broadband services offered by the Company.

Table of Contents

The FD takes formal effect on May 12, 2008. The FD pricing directives for ULLS connection charges and call diversion charges are to be retroactively applied to services procured by the Company from Telstra from June 10, 2004 and May 10, 2005, respectively. As a result, the Company expects to receive refunds from Telstra of previous over-payments for the ULLS connection charges and call diversion services plus interest, the total amount of which is still being calculated and confirmed. The effectiveness of the ULLS determination expires on June 30, 2008. Although Telstra cannot directly appeal the FD, it may seek judicial review of the ACCC's decisions. With respect to the ULLS connection charges and call diversion charges, it is expected that ACCC will shortly publish interim pricing to apply beyond June 30, 2008, which we can obtain through notifying a new ULLS pricing dispute with the ACCC. Absent changed circumstances, it is expected that such interim prices will reflect the ULLS FD pricing, but there can be no assurances of that outcome.

Foreign Currency

Foreign currency can have a major impact on our financial results. Currently 81% of our net revenue is derived from sales and operations outside the United States. The reporting currency for our consolidated financial statements is the United States dollar (USD). The local currency of each country is the functional currency for each of our respective entities operating in that country. In the future, we expect to continue to derive the majority of our net revenue and incur a significant portion of our operating costs from outside the United States, and therefore changes in exchange rates have had and may continue to have a significant, and potentially adverse, effect on our results of operations. Our primary risk of loss regarding foreign currency exchange rate risk is caused primarily by fluctuations in the following exchange rates: USD/Canadian dollar (CAD), USD/Australian dollar (AUD), USD/British pound (GBP), and USD/Euro (EUR). Due to the large percentage of our revenue derived outside of the United States, changes in the USD relative to one or more of the foregoing currencies could have an adverse impact on our future results of operations. We have agreements with certain subsidiaries for repayment of a portion of the investments and advances made to these subsidiaries. As we anticipate repayment in the foreseeable future, we recognize the unrealized gains and losses in foreign currency transaction gain (loss) on the consolidated statements of operations. We historically have not engaged in hedging transactions. However, during the fourth quarter 2007, we completed a forward currency contract required by the Canadian Credit Agreement and an interest rate swap. The exposure of our income from operations to fluctuations in foreign currency exchange rates is reduced in part because a majority of the costs that we incur in connection with our foreign operations are also denominated in local currencies. Given the recent volatility in exchange rates affecting the functional currencies in our major markets as compared to the USD, we will continue to explore whether hedging activities may provide benefit to us.

We are exposed to financial statement gains and losses as a result of translating the operating results and financial position of our international subsidiaries. We translate the local currency statements of operations of our foreign subsidiaries into USD using the average exchange rate during the reporting period. Changes in foreign exchange rates affect the reported profits and losses and cash flows and may distort comparisons from year to year. By way of example, when the USD strengthens compared to the EUR, there could be a negative or positive effect on the reported results for Europe, depending upon whether Europe is operating profitably or at a loss. It takes more profits in EUR to generate the same amount of profits in USD and a greater loss in EUR to generate the same amount of loss in USD. The opposite is also true. For instance, when the USD weakens there is a positive effect on reported profits and a negative effect on the reported losses for Europe.

Table of Contents

In the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, the USD was weaker on average as compared to the CAD, AUD, GBP and EUR. The following tables demonstrate the impact of currency fluctuations on our net revenue for the three months ended March 31, 2008 and 2007 (in thousands, except percentages):

Net Revenue by Location in USD

	For the three months ended			
	March 31, 2008	March 31, 2007	Variance	Variance %
Canada	\$ 68,449	\$ 62,784	\$ 5,665	9%
Australia	\$ 74,075	\$ 70,201	\$ 3,874	6%
United Kingdom	\$ 17,377	\$ 24,873	\$ (7,496)	(30)%
Europe*	\$ 20,571	\$ 20,350	\$ 221	1%

Net Revenue by Location in Local Currencies

	For the three months ended			
	March 31, 2008	March 31, 2007	Variance	Variance %
Canada (in CAD)	68,763	73,591	(4,828)	(7)%
Australia (in AUD)	81,896	89,383	(7,487)	(8)%
United Kingdom (in GBP)	8,786	13,530	(4,744)	(35)%
Europe* (in EUR)	13,726	15,537	(1,811)	(12)%

* Europe includes only subsidiaries whose functional currency is the Euro dollar.

Critical Accounting Policies

See Management's Discussion and Analysis of Financial Condition and Results of Operations in our Form 10-K for the year ended December 31, 2007 for a detailed discussion of our critical accounting policies. These policies include revenue recognition, determining our allowance for doubtful accounts receivable, accounting for cost of revenue, valuation of long-lived assets and goodwill and accounting for income taxes. No other significant changes in our critical accounting policies have occurred since December 31, 2007.

Results of Operations

Results of operations for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007

Net revenue decreased \$0.4 million or 0.2% to \$226.6 million for the three months ended March 31, 2008 from \$227.0 million for the three months ended March 31, 2007. Our revenue from broadband, VOIP, local, wireless, data and hosting services contributed \$60.0 million for the three months ended March 31, 2008, as compared to \$50.7 million for the three months ended March 31, 2007. Our wholesale carrier and prepaid services contributed \$41.9 million and \$9.5 million, respectively, for the three months ended March 31, 2008, as compared to \$45.0 million and \$13.3 million, respectively, for the three months ended March 31, 2007.

United States: United States net revenue decreased \$2.1 million or 7.7% to \$25.3 million for the three months ended March 31, 2008 from \$27.4 million for the three months ended March 31, 2007. The decrease is primarily attributed to a decrease of \$3.1 million in retail voice services (for residential and small businesses) and a decrease of \$0.4 million in Internet services, partially offset by an increase of \$1.5 million in retail VOIP.

Canada: Canada net revenue increased \$5.7 million or 9.2% to \$68.4 million for the three months ended March 31, 2008 from \$62.7 million for the three months ended March 31, 2007. The increase is primarily attributed to an increase of \$4.4 million in Internet, data and hosting services, an increase of \$2.6 million in local

Table of Contents

service, an increase of \$0.5 million in VOIP services and an increase of \$0.4 million in wireless services. These increases were partially offset by a decrease of \$2.0 million in prepaid services. The strengthening of the CAD against the USD accounted for a \$10.5 million increase to revenue, which is included in the explanations above, and which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007.

The following table reflects net revenue for each major country in North America (in thousands, except percentages):

Revenue by Country (Excluding Wholesale) in USD

	For the three months ended		Year-over-Year	
	March 31, 2008	March 31, 2007	Variance	Variance %
United States	\$ 23,133	\$ 26,248	\$ (3,115)	(12)%
Canada	\$ 68,449	\$ 62,659	\$ 5,790	9%
Other	\$ 2,157	\$ 1,145	\$ 1,012	88%

Europe: European net revenue decreased \$4.8 million or 22.7% to \$16.3 million for the three months ended March 31, 2008 from \$21.1 million for the three months ended March 31, 2007. The decrease is primarily attributable to a \$1.6 million decrease in low margin prepaid services, a \$3.1 million decrease in retail voice services and a \$0.5 million decrease in wireless services. These decreases were partially offset by an increase of \$0.5 million in VOIP services. The strengthening of the European currencies against the USD accounted for a \$1.5 million increase to revenue, which is included in the explanations above, when comparing the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007. The following table reflects net revenue for each major country in Europe (in thousands, except percentages):

Revenue by Country (Excluding Wholesale) in USD

	For the three months ended March 31, 2008		For the three months ended March 31, 2007		Year-over-Year	
	Net Revenue	% of Europe	Net Revenue	% of Europe	Variance	Variance %
United Kingdom	\$ 6,814	42%	\$ 12,150	58%	\$ (5,336)	(44)%
France	3,903	24%	2,110	10%	1,793	85%
Belgium	2,142	13%	2,403	11%	(261)	(11)%
Spain	1,296	8%	1,601	8%	(305)	(19)%
Other	2,131	13%	2,795	13%	(664)	(24)%
Europe Total	\$ 16,286	100%	\$ 21,059	100%	\$ (4,773)	(23)%

Asia-Pacific: Asia-Pacific net revenue increased \$3.8 million or 5.4% to \$74.7 million for the three months ended March 31, 2008 from \$70.9 million for the three months ended March 31, 2007. The increase is primarily attributable to a \$2.1 million increase in Australia DSL services, a \$2.2 million increase in Australia business and residential voice services, and a \$0.4 million increase in wireless services, partially offset by a \$0.8 million decrease in dial-up Internet services. The strengthening of the AUD against the USD accounted for a \$10.7 million increase to revenue, which is included in the explanations above, which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007. The following table reflects net revenue for each major country in Asia-Pacific (in thousands, except percentages):

Table of Contents

Revenue by Country (Excluding Wholesale) in USD

	For the three months ended March 31, 2008		For the three months ended March 31, 2007		Year-over-Year	
	Net Revenue	% of Asia-Pacific	Net Revenue	% of Asia-Pacific	Variance	Variance %
Australia	\$ 74,075	99%	\$ 70,201	99%	\$ 3,874	6%
Japan	646	1%	721	1%	(75)	(10)%
Asia-Pacific Total	\$ 74,721	100%	\$ 70,922	100%	\$ (3,799)	(5)%

Wholesale: Wholesale net revenue decreased \$3.1 million or 7.0% to \$41.9 million for the three months ended March 31, 2008 from \$45.0 million for the three months ended March 31, 2007. The strengthening of the European currencies against the USD accounted for a \$1.9 million increase to revenue, which is included in the above explanation, and which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007. The following table reflects net revenue for each major country (in thousands, except percentages):

Wholesale Revenue by Country in USD

	For the three months ended March 31, 2008		For the three months ended March 31, 2007		Year-over-Year	
	Net Revenue	% of Total Wholesale	Net Revenue	% of Total Wholesale	Variance	Variance %
United States	\$ 19,526	47%	\$ 19,621	44%	\$ (95)	(0)%
United Kingdom	10,563	25%	12,723	28%	(2,160)	(17)%
Germany	4,909	12%	4,916	11%	(7)	(0)%
Spain	2,107	5%	2,273	5%	(166)	(7)%
Italy	2,782	7%	2,859	6%	(77)	(3)%
Other	1,968	4%	2,595	6%	(627)	(24)%
Total	\$ 41,855	100%	\$ 44,987	100%	\$ (3,132)	(7)%

Cost of revenue decreased \$2.6 million to \$142.1 million, or 62.7% of net revenue, for the three months ended March 31, 2008 from \$144.7 million, or 63.7% of net revenue, for the three months ended March 31, 2007. We continue to shed certain low margin revenue while growing revenue from our higher margin services and improve the cost efficiency of our network. We also received certain regulatory benefits in Australia which reduced our cost of revenue.

United States: United States cost of revenue decreased \$0.9 million primarily due to a decrease of \$2.1 million in retail revenue.

Canada: Canada cost of revenue increased \$1.1 million primarily due to an increase of \$4.7 million from the strengthening of the CAD against the USD which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007, offset by declines in line with changes in revenue.

Europe: European cost of revenue decreased by \$1.9 million primarily due to a decrease of \$4.8 million in net revenue.

Asia-Pacific: Asia-Pacific cost of revenue increased \$2.1 million in line with changes in revenue. The strengthening of the AUD against the USD accounted for a \$6.9 million increase to cost of revenue, which is included in the explanations above, and which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007.

Table of Contents

Wholesale: Wholesale cost of revenue decreased \$2.9 million or 6.7% to \$40.5 million for the three months ended March 31, 2008 from \$43.4 million for the three months ended March 31, 2007 in line with the revenue decline. The strengthening of the foreign currencies against the USD accounted for a \$1.9 million increase to cost of revenue, which is included in the above variance, and which reflects changes in the exchange rates for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007.

Selling, general and administrative expenses increased \$1.1 million to \$69.5 million, or 30.6% of net revenue, for the three months ended March 31, 2008 from \$68.3 million, or 30.1% of net revenue, for the three months ended March 31, 2007. The increase in selling, general and administrative expenses is attributable to an increase of \$2.2 million in salaries and benefits, an increase of \$1.2 million in sales and marketing expenses, and an increase of \$1.3 million in occupancy expenses. These increases were partially offset by a decrease of \$3.3 million in professional fees and a decrease of \$0.6 million in general and administrative expenses.

United States: United States selling, general and administrative expenses decreased \$2.5 million to \$13.0 million for three months ended March 31, 2008 from \$15.4 million for the three months ended March 31, 2007. The decrease is attributable to a decrease of \$2.5 million in professional fees as the first quarter 2007 included significant expenses for litigation and FIN No. 48 implementation.

Canada: Canada selling, general and administrative expense increased \$1.3 million due to the strengthening of the CAD, accounting for a \$3.9 million increase to selling, general and administrative expense. This increase was offset by declines in advertising and general and administrative expenses.

Europe: Europe selling, general and administrative expense decreased \$2.1 million to \$6.1 million for the three months ended March 31, 2008 from \$8.2 million for the three months ended March 31, 2007. The decrease is attributable to a decrease of \$1.0 million in sales and marketing expense primarily in prepaid services agent commissions, a decrease of \$0.9 million in salaries and benefits, and a decrease of \$0.3 million in occupancy expenses.

Asia-Pacific: Asia-Pacific selling, general and administrative expense increased \$4.3 million due to the strengthening of the AUD, accounting for a \$2.9 million increase to selling, general and administrative expense and increases in sales and marketing and advertising expenses.

Wholesale: Wholesale selling, general and administrative expense increased \$0.1 million or 2.7% to \$2.1 million for the three months ended March 31, 2008 from \$2.0 million for the three months ended March 31, 2007.

Depreciation and amortization expense increased \$1.4 million to \$8.0 million for the three months ended March 31, 2008 from \$6.6 million for the three months ended March 31, 2007. The increase consists of an increase in depreciation expense of \$1.4 million for assets placed in service as we enhanced our network infrastructure and expanded our data centers.

(Gain) loss on sale or disposal of assets was a \$2.6 million gain for the three months ended March 31, 2008. We recognized a gain of \$0.8 million associated with the sale of certain surplus fiber assets in the US and a gain of \$1.8 million associated with a sale of a minority equity investment in a Japanese entity.

Interest expense and Accretion on debt discount, net increased \$1.5 million to \$15.2 million for the three months ended March 31, 2008 from \$13.7 million for the three months ended March 31, 2007. There was an increase of \$3.3 million mainly resulting from issuance of our 14 1/4% Second Lien Notes, offset by a \$1.5 million decrease mainly resulting from reductions in our October 1999 Senior Notes and Step Up Convertible Subordinated Debentures.

Gain (loss) on early extinguishment or restructuring of debt was a \$2.3 million gain for the three months ended March 31, 2008 compared to a \$6.0 million loss for the three months ended March 31, 2007. In the first quarter 2008, we made open market purchases of \$0.8 million principal amount of our October 1999 Senior

Table of Contents

Notes and \$13.8 million principal amount of our Step Up Convertible Subordinated Debentures, resulting in a \$0.1 million and \$2.1 million gain, respectively, on early extinguishment of debt including the write-off of related deferred financing costs, discount and effective interest. In first quarter 2007, we issued in a private transaction \$57.2 million principal amount of the 14 1/4% Second Lien Notes, in exchange for \$40.7 million principal amount of the Company's outstanding October 1999 Senior Notes and \$23.6 million in cash. This exchange was deemed a debt modification, resulting in a \$5.1 million loss on restructuring of debt for financing costs incurred. The remaining \$0.9 million of expense in the three months ended March 31, 2007, resulted from costs related to the early retirement of a Canadian credit facility.

Foreign currency transaction gain was \$1.7 million for the three months ended March 31, 2008 as compared to \$3.0 million for the three months ended March 31, 2007. This gain is attributable to the impact of foreign currency exchange rate changes on intercompany debt balances and on receivables and payables denominated in a currency other than the subsidiaries' functional currency.

Income tax expense increased to \$2.4 million for the three months ended March 31, 2008 from \$1.0 million for the three months ended March 31, 2007. The expense consists of foreign withholding tax on intercompany interest and royalty fees owed to a United States subsidiary by our Canadian and Australian subsidiaries and charges for uncertain tax positions under FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes.

Liquidity and Capital Resources

Changes in Cash Flows

Our principal liquidity requirements arise from cash used in operating activities, purchases of network equipment including switches, related transmission equipment and capacity, development of back-office systems, expansion of data center facilities, interest and principal payments on outstanding debt and other obligations, repurchase and retirement of debt obligations, taxes and acquisitions. We have financed our growth and operations to date through public offerings and private placements of debt and equity securities, vendor financing, capital lease financing and other financing arrangements.

Net cash used in operating activities was \$7.5 million for the three months ended March 31, 2008 as compared to net cash used in operating activities of \$6.8 million for the three months ended March 31, 2007. For the three months ended March 31, 2008, net loss, net of non-cash operating activity, provided \$1.9 million of cash. In addition, cash was increased by a reduction in prepaid expenses, other current assets and other assets of \$10.1 million and \$0.5 million in accrued income taxes. For the three months ended March 31, 2008, we used \$1.8 million with the increase in our accounts receivable, \$10.8 million to reduce our accounts payable and accrued interconnection costs, \$1.5 million to reduce our accrued interest and \$6.0 million to reduce our accrued expenses, deferred revenue, other current liabilities and other liabilities. For the three months ended March 31, 2007, net income, net of non-cash operating activity, provided \$3.6 million of cash. In addition, cash was increased by a reduction in accounts receivable of \$5.4 million and an increase in accrued expenses, deferred revenue, other current liabilities and other liabilities, and accrued income taxes of \$1.9 million. We used \$3.8 million to increase our prepaid expenses and other assets, \$8.4 million to reduce our accounts payable and accrued interconnection costs and \$5.6 million to reduce accrued interest.

Net cash used in investing activities was \$5.2 million for the three months ended March 31, 2008 compared to \$0.8 million for the three months ended March 31, 2007. Net cash used in investing activities during the three months ended March 31, 2008 included \$6.9 million of capital expenditures and a \$0.9 million increase in restricted cash, offset by \$1.8 million net cash proceeds from the disposition of a minority equity investment in Japan and \$0.8 million from the disposition of surplus fiber assets. Net cash used in investing activities during the three months ended March 31, 2007 included \$6.4 million of capital expenditures, offset by \$5.5 million net cash proceeds from the disposition of our Australian Planet Domain business operations.

Table of Contents

Net cash used in financing activities was \$12.8 million for the three months ended March 31, 2008 as compared to \$47.1 million provided by financing activities for the three months ended March 31, 2007. During the three months ended March 31, 2008, \$11.2 million was used to purchase and retire \$0.8 million principal amount of our October 1999 Senior Notes and \$13.8 million principal amount of our Step Up Convertible Subordinated Debentures and \$1.5 million was used for principal payments on capital leases, leased fiber capacity, financing facilities and other long-term obligations. During the three months ended March 31, 2007, net cash provided by financing activities consisted of \$102.7 million from the issuance of \$75.2 million principal amount of 14 1/4 % Second Lien Notes for \$69.2 million in cash and the issuance of \$33.5 million through a credit facility with a financial institution, net of \$1.5 million in financing costs; partially offset by the retirement in full of the \$22.7 million principal amount of our 2000 Convertible Subordinated Debentures, the repayment in full of a \$29.9 million Canadian loan facility and \$3.0 million in principal payments of capital leases, leased fiber capacity, financing facilities and other long-term obligations.

Short- and Long-Term Liquidity Considerations and Risks

As of March 31, 2008, we had \$55.9 million of cash and cash equivalents. We believe that our existing cash and cash equivalents, will be sufficient to fund our debt service requirements, other fixed obligations (such as capital leases, vendor financing and other long-term obligations), and other cash needs for our operations for at least the next twelve months.

During 2007 we successfully executed a number of liquidity-enhancing initiatives. As a result of these transactions, we have extended our debt maturities and have added financial flexibility, subject to the limitations noted below, to make additional investments in our higher margin growth businesses, as well as to consider potentially attractive acquisitions. Broadband, VOIP, local, wireless, data and hosting services are generating a first quarter 2008 annualized revenue run-rate of \$240 million. To exploit the full potential for these services will require a greater investment in sales and marketing over the next year. Such an investment seems justified given our need for revenue and profitability growth from these services to compensate for the corresponding declines from our high-margin legacy long distance voice and dial-up Internet businesses. However, we expect overall revenue to decline in 2008 as compared to 2007, particularly as a result of expected declines in our legacy voice and dial-up Internet businesses as well as our ongoing program to sell, prune or divest non-core revenue streams. Our challenge is to have contribution from these growth products eclipse the decline in our legacy businesses.

Table of Contents

As of March 31, 2008, we had \$27.5 million in future minimum purchase obligations, \$60.2 million in future operating lease payments and \$659.6 million of indebtedness. As of March 31, 2008, approximately \$119.6 million of unrecognized tax benefits have been recorded in accordance with FIN No. 48. We are uncertain as to if or when such amounts may be settled, so we have not included these amounts in the table below. Payments of principal and interest are due as follows:

Year Ending December 31,	Vendor Financing	Senior Secured Term Loan Facility (1)	Financing Facility and Other	Senior Notes	Convertible and Exchangeable Notes (2)	Step Up Convertible Debentures	Senior Secured Notes	Purchase Obligations	Operating Leases	Total
(amounts in thousands)										
2008 (as of March 31, 2008)	\$ 5,907	\$ 7,614	\$ 2,467	\$ 11,886	\$ 4,265	\$ 346	\$ 15,420	\$ 12,598	\$ 11,940	\$ 72,443
2009	3,370	10,070	3,188	40,781	5,713	9,332	15,420	7,490	13,089	108,453
2010	3,162	9,975	3,170	18,800	137,878		15,420	3,266	10,018	201,689
2011	44	94,250	3,170	18,800			115,920	2,534	7,288	242,006
2012	15		35,777	18,800				1,567	5,692	61,851
Thereafter			62	263,200					12,174	275,436
Total Minimum Principal & Interest Payments	12,498	121,909	47,834	372,267	147,856	9,678	162,180	27,455	60,201	961,878
Less: Amount Representing Interest	(1,146)	(24,909)	(12,566)	(117,772)	(14,282)	(1,037)	(53,970)			(225,682)
Face Value of Long-term Obligations	11,352	97,000	35,268	254,495	133,574	8,641	108,210	27,455	60,201	736,196
Amount Representing Premium (Discount)					(964)	(408)	5,393			4,021
Add: Exchangeable Notes Interest Treated as Long-Term Obligations					7,040					7,040
Total Long-Term Obligation	\$ 11,352	\$ 97,000	\$ 35,268	\$ 254,495	\$ 139,650	\$ 8,233	\$ 113,603	\$ 27,455	\$ 60,201	\$ 747,257

- (1) For preparation of this table, we have assumed the interest rate of the Senior Secured Term Loan Facility to be 9.5%, which is the interest rate at March 31, 2008.
- (2) For preparation of this table, we have shown separately the cash interest payments of PTHI's 5% Exchangeable Senior Notes as a portion of long-term obligations (see *Senior Notes*, *Senior Secured Notes*, *Convertible Senior Notes*, *Exchangeable Senior Notes*, *Step Up Convertible Subordinated Debentures* and *Convertible Subordinated Debentures* below). The interest due on the 5% Exchangeable Senior Notes in 2008, 2009 and 2010 is \$2.8 million, \$2.8 million and \$1.4 million, respectively.

We have contractual obligations to utilize network facilities from certain carriers with terms greater than one year. We generally do not purchase or commit to purchase quantities in excess of normal usage or amounts that cannot be used within the contract term. We have minimum annual purchase obligations of \$12.6 million, \$7.5 million, \$3.3 million, \$2.5 million and \$1.6 million remaining in 2008, 2009, 2010, 2011 and 2012, respectively.

The indentures governing the senior notes, convertible senior notes, exchangeable senior notes, step up convertible subordinated debentures, senior secured notes and the senior secured term loan facility, as well as other credit arrangements, contain certain financial and other covenants which, among other things, will restrict our ability to incur further indebtedness and make certain payments, including the payment of dividends and repurchase of subordinated debt and certain debt issued by us. We were in compliance with the above covenants at March 31, 2008.

We will continue to have significant debt service obligations on a long-term basis. From time to time, we consider the feasibility and timing of transactions that could raise capital for additional liquidity, debt reduction, refinancing of existing indebtedness and for additional working capital and growth opportunities. There can be no assurance we will be successful in any of these efforts to obtain any such financing on acceptable terms or at all. If we are successful in raising additional financing or issuing our securities in exchange for debt, securities comprising a significant percentage of our diluted equity capital may be issued in connection with the completion of such transactions. Additionally, if our

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

plans or assumptions change or prove inaccurate, including those with respect to our debt levels, competitive developments, developments affecting our network or product initiatives, services, operations or cash from operating activities, if we consummate additional investments or acquisitions, if we experience unexpected costs or competitive pressures or if existing cash and any other borrowings prove to be insufficient, we may need to obtain such financing and/or relief sooner than expected. In such

Table of Contents

circumstances, there can be no assurance we will be successful in these efforts to obtain new capital at acceptable terms. Also there can be no assurance that changes in assumptions or conditions, including those referenced under **Legal Proceedings** and **Special Note Regarding Forward-Looking Statements** will not adversely affect our financial condition or short-term or long-term liquidity.

In light of the foregoing, we and/or our subsidiaries will evaluate and determine on a continuing basis, depending on market conditions and the outcome of events described herein under **Special Note Regarding Forward Looking Statements**, the most efficient use of our capital and resources, including investment in our network, systems and growth products, purchasing, refinancing, exchanging, tendering for or retiring certain of our outstanding debt securities in privately negotiated transactions, open market transactions or by other direct or indirect means, issuing our common stock or purchasing our common stock in the open market to the extent permitted by existing covenants.

New Accounting Pronouncements

In March 2008, the Financial Accounting Standard Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 161, **Disclosures about Derivative Instruments and Hedging Activities**. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133, **Accounting for Derivative Instruments and Hedging** with the intent to provide users of financial statements with an enhanced understanding of use of derivative instruments, how derivative instruments and related hedged items are accounted for, and how derivative instruments and related hedged items affect an entity's financial statements. SFAS No. 161 is effective for financial statements issued for fiscal years after July 1, 2009. We anticipate that the adoption of this standard will not have a material impact on our results of operations, financial position and cash flows.

Special Note Regarding Forward Looking Statements

Certain statements in this Quarterly Report on Form 10-Q and elsewhere constitute **forward-looking statements** within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such statements are based on current expectations, and are not strictly historical statements. Forward-looking statements include, without limitation, statements set forth in this document and elsewhere regarding, among other things:

expectations of future growth, creation of shareholder value, revenue, foreign revenue contributions and net income, as well as income from operations, margins, earnings per share, cash flow and cash sufficiency levels, working capital, network development, customer migration and related costs, spending on and success with growth products, including broadband Internet, VOIP, wireless, local, data and hosting services, traffic development, capital expenditures, selling, general and administrative expenses, income tax and withholding tax expense, fixed asset and goodwill impairment charges, service introductions, cash requirements and potential asset sales;

increased competitive pressures, declining usage patterns, and our growth products, bundled service offerings, the pace and cost of customer migration onto our networks, the effectiveness and profitability of the new products;

financing, refinancing, de-leveraging and/or debt repurchase, restructuring, exchange or tender plans or initiatives, and potential dilution of existing equity holders from such initiatives;

liquidity and debt service forecast;

assumptions regarding currency exchange rates;

timing, extent and effectiveness of cost reduction initiatives and management's ability to moderate or control discretionary spending;

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

management's plans, goals, expectations, guidance, objectives, strategies, and timing for future operations, acquisitions, asset dispositions, product plans, performance and results;

Table of Contents

management's assessment of market factors and competitive developments, including pricing actions and regulatory rulings; and

ability to generate net cash proceeds from the disposition of selective assets without material impairment to profitability.

Factors and risks that could cause actual results or circumstances to differ materially from those set forth or contemplated in forward looking statements include those set forth in Risk Factors as well as, without limitation:

changes in business conditions causing changes in the business direction and strategy by management;

heightened competitive pricing and bundling pressures in the markets in which we operate;

accelerated decrease in minutes of use on wireline phones;

fluctuations in the exchange rates of currencies, particularly of the USD relative to foreign currencies of the countries where we conduct our foreign operations;

adverse interest rate developments affecting our variable interest rate debt;

difficulty in maintaining or increasing customer revenues and margins through our product initiatives and bundled service offerings, and difficulties in migrating and provisioning broadband and local customers to DSL networks;

inadequate financial resources to promote and to market product initiatives;

fluctuations in prevailing trade credit terms or revenues due to the adverse impact of, among other things, further telecommunications carrier bankruptcies or adverse bankruptcy related developments affecting our large carrier customers;

the possible inability to raise additional capital when needed, on attractive terms, or at all;

possible claims under our existing debt instruments which could impose constraints and limit our flexibility;

the inability to reduce, repurchase, refinance, exchange, tender for or restructure debt significantly, or in amounts sufficient to conduct regular ongoing operations;

the impact of the delisting of our common stock from the Nasdaq Capital Market which may impair our ability to raise capital;

further changes in the telecommunications or Internet industry, including rapid technological changes, regulatory and pricing changes in our principal markets and the nature and degree of competitive pressure that we may face;

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

adverse tax or regulatory rulings from applicable authorities;

enhanced broadband, DSL, Internet, wireless, VOIP, data and hosting and local and long distance voice telecommunications competition;

changes in financial, capital market and economic conditions;

changes in service offerings or business strategies, including the need to modify business models if performance is below expectations;

difficulty in retaining existing long distance wireline and dial-up ISP customers;

difficulty in migrating or retaining customers associated with acquisitions of customer bases, or integrating other assets;

Table of Contents

difficulty in selling new services in the marketplace;

difficulty in providing broadband, DSL, local, VOIP, data and hosting or wireless services;

changes in the regulatory schemes or requirements and regulatory enforcement in the markets in which we operate;

restrictions on our ability to execute certain strategies or complete certain transactions as a result of our inexperience with new products, or limitations imposed by available cash resources, our capital structure or debt covenants;

risks associated with our limited DSL, Internet, VOIP, data and hosting and wireless experience and expertise, including effectively utilizing new marketing channels such as interactive marketing employing the Internet;

entry into developing markets;

aggregate margin contribution from the new products is not sufficient in amount or timing to offset the margin decline in our legacy long distance voice and dial-up ISP businesses;

the possible inability to hire and/or retain qualified executive management, sales, technical and other personnel;

risks and costs associated with our effort to locate certain activities and functions off-shore;

risks associated with international operations;

dependence on effective information and billing systems;

possible claims for patent infringement on products or processes employed in providing our services;

dependence on third parties for access to their networks to enable us to expand and manage our global network and operations and to offer broadband, DSL, local, VOIP and wireless services, including dependence upon the cooperation of incumbent carriers relating to the migration of customers;

dependence on the performance of our global standard asynchronous transfer mode and Internet-based protocol (ATM+IP) communications network;

adverse regulatory rulings or actions affecting our operations, including the imposition of taxes and fees, the imposition of obligations upon VOIP providers to provide enhanced 911 (E911) services and restricting access to broadband networks owned and operated by others, including the development of a national broadband network in Australia; and

Edgar Filing: PRIMUS TELECOMMUNICATIONS GROUP INC - Form 10-Q

the potential further elimination or limitation of a substantial amount or all of our United States or foreign operating loss carryforwards due to future significant issuances of equity securities, changes in ownership or other circumstances, which carryforwards would otherwise be available to reduce future taxable income.

As such, actual results or circumstances may vary materially from such forward looking statements or expectations. Readers are also cautioned not to place undue reliance on these forward looking statements which speak only as of the date these statements were made. We are not obligated to update or revise any forward looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risk exposures relate to changes in foreign currency exchange rates, valuations of derivatives and to changes in interest rates.

Foreign currency can have a major impact on our financial results. Currently in excess of 81% of our net revenue was derived from sales and operations outside the United States. The reporting currency for our consolidated financial statements is the USD. The local currency of each country is the functional currency for each of our respective entities operating in that country. In the future, we expect to continue to derive the majority of our net revenue and incur a significant portion of our operating costs from outside the United States, and therefore changes in exchange rates have had and may continue to have a significant, and potentially adverse, effect on our results of operations. Our primary risk of loss regarding foreign currency exchange rate risk is caused primarily by fluctuations in the following exchange rates: USD/CAD, USD/AUD, USD/GBP, and USD/EUR. Due to the large percentage of our revenue derived outside of the United States, changes in the USD relative to one or more of the foregoing currencies could have an adverse impact on our future results of operations. We have agreements with certain subsidiaries for repayment of a portion of the investments and advances made to these subsidiaries. As we anticipate repayment in the foreseeable future, we recognize the unrealized gains and losses in foreign currency transaction gain (loss) on the consolidated statements of operations. We historically have not engaged in hedging transactions. However, during the fourth quarter 2007, we completed a forward currency contract required by the Canadian Credit Agreement. The exposure of our income from operations to fluctuations in foreign currency exchange rates is reduced in part because a majority of the costs that we incur in connection with our foreign operations are also denominated in local currencies. Given the current divergence in exchange rates affecting the functional currencies in our major markets as compared to the USD, we will explore whether hedging activities may provide benefit to us.

We are exposed to financial statement gains and losses as a result of translating the operating results and financial position of our international subsidiaries. We translate the local currency statements of operations of our foreign subsidiaries into USD using the average exchange rate during the reporting period. Changes in foreign exchange rates affect the reported profits and losses and cash flows and may distort comparisons from year to year. By way of example, when the USD strengthens compared to the EUR, there could be a negative or positive effect on the reported results for Europe, depending upon whether Europe is operating profitably or at a loss. It takes more profits in EUR to generate the same amount of profits in USD and a greater loss in EUR to generate the same amount of loss in USD. The opposite is also true. For instance, when the USD weakens there is a positive effect on reported profits and a negative effect on reported losses for Europe.

In the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, the USD was weaker on average as compared to the CAD, AUD, GBP and EUR. As a result, our revenue of the subsidiaries whose local currency is CAD, AUD, GBP and EUR decreased (7)%, (8)%, (35)% and (12)% in local currency compared to the three months ended March 31, 2007, but increased (decreased) 9%, 6%, (30)% and 1% in USD, respectively.

Interest rates The majority of our long-term debt obligations are at fixed interest rates at March 31, 2008. In February 2005, we obtained a \$100 million senior secured term loan, which has a variable interest rate feature. In March 2007, we entered into a \$35 million senior secured credit agreement with a variable interest rate. The interest rate on the \$35 million senior secured credit agreement has been fixed effective October 2007 after we completed a cross-currency interest rate swap agreement. We are exposed to interest rate risk as additional financing may be required. Our primary exposure to market risk stems from fluctuations in interest rates.

The interest rate sensitivity table below summarizes our market risks associated with fluctuations in interest rates for the three months ended March 31, 2008 in USD, which is our reporting currency. The table presents principal cash flows and related weighted average interest rates by year of expected maturity for our senior notes, senior secured notes, senior secured term loan, convertible senior notes, exchangeable senior notes, step up

Table of Contents

convertible subordinated debentures, leased fiber capacity, and other long-term obligations in effect at March 31, 2008. In the case of the convertible senior notes, exchangeable senior notes and step up convertible subordinated debentures the table excludes the potential exercise of the relevant redemption and conversion features and excludes an unamortized debt premium (net of discount) of \$4.0 million and future cash interest payments of \$7.0 million from our 5% Exchangeable Senior Notes that are treated as long term obligations (see Note 4 Long-Term Obligations).

	Year of Maturity						Total	Fair Value
	2008	2009	2010	2011	2012	Thereafter		
	(in thousands, except percentages)

Average Interest Rate	9.5%	9.5%	9.5%	9.5%	0.0%	0.0%	9.5%	

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures.**

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, as a result of the material weakness described below, our principal executive officer and our principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were not effective. Disclosure controls and procedures mean our controls and other procedures that are designed to ensure that information required to be disclosed by us in our reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in our reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

As part of our compliance efforts relative to Section 404 of Sarbanes-Oxley Act of 2002, management assessed the effectiveness of internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on the assessment, management identified a material weakness in our internal control over accounting for income taxes. The material weakness in internal control related to a lack of documentation and insufficient historical analysis, and has not been remediated because of insufficient time in the position for the Corporate Tax Director, who started in the position on October 1, 2007. His hiring was part of the remediation efforts related to the material weakness identified as December 31, 2006. This short time period did not allow the new Corporate Tax Director enough time to establish a consistent application of controls surrounding documentation and historical analysis. These deficiencies represent a material weakness in internal control over financial reporting on the basis that there is more than a remote likelihood that a material misstatement in our interim or annual financial statements due to errors in accounting for income taxes could occur and would not be prevented or detected by our internal control over financial reporting.

Changes in Internal Control

Our Principal Executive Officer and our Principal Financial Officer have concluded that there have been no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2008, that have materially affected, or is reasonably likely to affect materially, our internal control over financial reporting, except for the items noted below. We are in the process of completing the remediation efforts with respect to the material weakness described above.

Table of Contents

Our income tax accounting has significant complexity due to our business being property and equipment intensive, our varied types of refinancing and debt transactions, the significant number of foreign subsidiary legal entities and various tax planning strategies. To address this complexity, we restructured the United States tax department and hired both a senior manager of taxation for non-income tax matters and a Corporate Tax Director for oversight of the domestic, foreign and consolidated income tax responsibilities. In addition, we utilize third party tax advisors both to assist in the administrative and consolidation duties of preparing the income tax provision and disclosures and also to advise on matters beyond our in-house expertise. We believe that the personnel hired into these positions have the appropriate knowledge, experience and skills to maintain the proper controls over accounting for income taxes. However, the Corporate Tax Director has been in the position only since October 1, 2007, which, at December 31, 2007 was not enough time to remediate our internal controls over accounting for income taxes. We believe that during 2008, the Corporate Tax Director will have had enough time to remediate the controls related to documentation and historical analysis.

In addition, our United States wholesale billing was migrated to the pre-existing in-house billing system maintained by our Canadian subsidiary. Management believes that the use of the existing controls related to the existing billing system and some additional reconciliation procedures are adequate to maintain proper internal control over financial reporting related to these processes.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is subject to claims and legal proceedings that arise in the ordinary course of its business. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be decided unfavorably to the Company. The Company believes that any aggregate liability that may result from the resolution of these matters will not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

ITEM 1A. RISK FACTORS

A wide range of factors could materially affect our performance. In addition to factors affecting specific business operations and the financial results of those operations identified elsewhere in this report, the following factors, among others, could adversely affect our operations:

Our disclosure controls and procedures and internal control over financial reporting were determined not to be effective as of December 31, 2007, which condition still existed at March 31, 2008, due to the material weakness that existed in our internal control over accounting for income taxes. Our disclosure controls and procedures and internal control over financial reporting may not be effective in future periods, as a result of existing or newly identified material weaknesses in internal control over financial reporting.

In performing an internal control assessment at the end of 2006, our management identified a material weakness in our internal control over financial reporting, which condition still existed at March 31, 2008. A material weakness is a deficiency, or a combination of deficiencies, that adversely affects a company's ability to initiate, authorize, record, process, or report external financial data reliably in accordance with generally accepted accounting principles such that there is a more than remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. For a discussion of the material weakness identified by our management, see Item 4. Controls and Procedures of our Quarterly Report on Form 10-Q for the period ended March 31, 2008. To address the material weakness, we performed additional analysis and other post-closing procedures in order to prepare our consolidated financial statements in accordance with generally accepted accounting principles. These additional procedures were costly, time consuming and required us to dedicate a significant amount of our resources, including the time and attention of our senior management, toward the correction of these problems. Performing these additional procedures in the future, could cause delays in the filing of our periodic and annual reports to the SEC.

The potential delay in the filing of our periodic and annual reports could have other adverse effects on our business, including, but not limited to: (1) civil litigation or an investigation by the SEC or other regulatory authorities, which could require us to incur significant legal expenses and other costs or to pay damages, fines or other penalties; (2) covenant defaults, and potentially events of default, under our senior secured credit facilities and the indentures governing our outstanding debt securities, resulting from our failure to file timely our financial statements; (3) negative publicity; and (4) the loss or impairment of investor confidence in our Company.

If competitive pressures continue or intensify, we may not be able to service our debt or other obligations.

There are substantial risks and uncertainties in our future operating results, particularly as aggressive pricing and bundling strategies by certain incumbent carriers, ILECs and other competitors, including cable companies, have intensified competitive pressures in the markets where we operate. In addition, regulatory decisions could have a material adverse impact on our competitive position, future operations and outlook. See also information under Item 2 MD&A Liquidity and Capital Resources Short- and Long-Term Liquidity Considerations and Risks and in these Risk Factors. If adverse events referenced or described herein or therein were to occur, we may not be able to service our debt or other obligations and could, among other things, be required to seek protection under the bankruptcy laws of the United States or other similar laws in other countries.

Table of Contents

Our high level of debt and liquidity needs may adversely affect our financial and operating flexibility.

We currently have substantial indebtedness and anticipate that we and our subsidiaries may incur additional indebtedness in the future. The level and/or terms of our indebtedness (1) could make it difficult for us to make required payments of principal and interest on our outstanding debt; (2) could limit our ability to obtain any necessary financing in the future for working capital, capital expenditures, debt service requirements or other purposes; (3) requires that a substantial portion of our cash flow, if any, be dedicated to the payment of principal and interest on outstanding indebtedness and other obligations and, accordingly, such cash flow will not be available for use in our business; (4) could limit our flexibility in planning for, or reacting to, changes in our business; (5) results in our being more highly leveraged than many of our competitors, which places us at a competitive disadvantage; (6) will make us more vulnerable in the event of a downturn in our business; and (7) could limit our ability to sell assets or fund our operations due to covenant restrictions. The recent tightening of the credit markets could also influence our ability to raise needed capital.

Our common stock was delisted from the Nasdaq Capital Market, which could make it more difficult to sell our common stock.

Effective at the open of trading on July 28, 2006, our common stock was delisted from the Nasdaq Capital Market. Since this time, our common stock has traded in the over-the-counter (OTC) market, both through listings on the OTC Bulletin Board and in the National Quotation Bureau Pink Sheets, but our common stock is not currently listed or quoted on any recognized national or regional securities exchange or market. As a result, an investor may find it difficult to sell or obtain quotations as to the price of our common stock. Delisting could adversely affect investors perception, which could lead to further declines in the market price of our common stock. Delisting may also make it more difficult, time consuming and expensive for us to raise capital through sales of our common stock or securities convertible into our common stock.

Given our limited experience in delivering individual and bundled local, wireless, broadband, DSL, Internet, data and hosting and VOIP services, we may not be able to operate successfully or expand these parts of our business.

During the third quarter of 2004 we accelerated initiatives to become an integrated wireline, wireless and broadband service provider in order to counter competitive pricing pressures initiated by large incumbent providers in certain of the principal markets where we operate and to stem the loss of certain of our wireline and dial-up ISP customers to our competitors bundled wireless, wireline and broadband service offerings. Our experience in providing these products in certain markets and in providing these bundled service offerings is limited. Our primary competitors include incumbent telecommunications providers, cable companies and other ISPs that have a significant national or international presence. Many of these operators have substantially greater resources, capital and operational experience than we do. We are experiencing increased competition from traditional telecommunications carriers and cable companies and other new entrants that have expanded into the market for broadband, VOIP, Internet services, data and hosting and traditional voice services, and regulatory developments may impair our ability to compete. Therefore, future operations involving these individual or bundled services may not succeed in the competitive environment, and we may not be able to expand successfully; may experience margin pressure; may face quarterly revenue and operating results variability; may have limited resources to develop and to market the new services; and have heightened difficulty in establishing future revenues or results. As a result, there can be no assurance that we will reverse recent revenue declines or maintain or increase revenues or be able to generate sufficient income from operations or net income in the future or on any predictable or timely basis.

We may be exposed to significant liability resulting from our noncompliance with FCC Orders regarding enhanced 911 (E911) services.

In June 2005, the FCC adopted new rules requiring VOIP providers interconnected to the public switched telephone network to provide E911 service in a manner similar to traditional wireline carriers by November

Table of Contents

2005. LINGO, a subsidiary of ours which sells such interconnected VOIP services, was unable, like many interconnected VOIP providers in the industry, to meet this deadline for all of its customers. We sought a waiver from the FCC asking for additional time to complete deploying our E911 service, and the FCC has not yet addressed our waiver petition. As of April 28, 2008, approximately 4.7% of our LINGO customers were without E911 service as required by the FCC's rules. If and to the extent that we are determined to be out of compliance with the FCC order regarding E911 services we may be subject to fines, penalties, and/or cease and desist orders prohibiting LINGO from providing service on the federal and state levels. However, at this time, management has determined the likelihood of incurring such fines or penalties to be remote.

The FCC rules also required interconnected VOIP providers to distribute stickers and labels informing customers of the emergency service limitations associated with the service, as well as to notify and obtain affirmative acknowledgement from customers that they were aware of all of the emergency service limitations associated with the service. The FCC's Enforcement Bureau released an order providing that the Enforcement Bureau will not pursue enforcement against interconnected VOIP providers that have received affirmative acknowledgement from at least 90% of their subscribers. We have received affirmative acknowledgement from substantially all of our customers and have effectively satisfied this requirement of the rule. LINGO's current services are more limited than the 911 services offered by traditional wireline telephone companies. These limitations may cause significant delays, or even failures, in callers' receipt of the emergency assistance. Despite the fact that we have notified our customers and received affirmative acknowledgement from substantially all of our customers that they understand the differences between the access we provide to emergency services as compared to those available through traditional wireline telephony providers, injured customers may attempt to hold us responsible for any loss, damage, personal injury or death suffered as a result of any failure to comply with the FCC mandated E911 service for interconnected VOIP providers. Our resulting liability could be significant.

On June 1, 2007, the FCC released a Notice of Proposed Rulemaking Proceeding considering the imposition of additional VOIP E911 obligations on interconnected VOIP providers, like us. Specifically, the Commission is considering requiring interconnected VOIP providers to determine automatically the physical location of their customer rather than allowing customers to manually register their location. Moreover, the Notice includes a tentative conclusion that all interconnected VOIP service providers that allow customers to use their service in more than one location (nomadic VOIP service providers such as us) must utilize automatic location technology that meets the same accuracy standards applicable to providers of mobile phone service providers. At this time, we are unable to predict the outcome of this proceeding or its impact on us.

The FCC has extended CPNI rules to interconnected VOIP providers, which could limit our marketing efforts.

On April 2, 2007, the FCC extended customer proprietary network information, or CPNI, rules to interconnected VOIP providers, like us. CPNI includes information that appears on customers' bills such as called telephone numbers, the frequency, duration, time and length of calls; and any services or features purchased by the consumer, like caller ID. Pursuant to the CPNI rules, interconnected VOIP providers may not use CPNI without obtaining customer consent except in limited circumstances. Moreover, interconnected VOIP providers are required to adhere to a particular customer approval processes when using CPNI outside of pre-defined limits. Effective December 8, 2007, we were required to adhere to specific CPNI rules when using CPNI for marketing purposes. Accordingly, we had to implement internal processes in order to comply with the FCC's CPNI rules. As required by the new rules, certifications were filed with the FCC regulating our compliance efforts in this regard. We cannot predict the impact of this change on our profitability or retail prices at this time.

We may be exposed to liability resulting from FCC Orders regarding access for people with disabilities.

On June 15, 2007, the FCC applied the disability access requirements of Sections 225 and 255 of the Communications Act to providers of interconnected VOIP services, like us, and to equipment manufacturers that

Table of Contents

make equipment to use with those services. Section 255 of the Communications Act requires, if readily achievable, service providers to ensure that its equipment and service is accessible to and usable by individuals with disabilities. Where readily achievable, the relevant regulations also require service providers to ensure that information and documentation provided in connection with equipment or services be accessible to people with disabilities and that employee training account for accessibility requirements. In addition, the FCC said that interconnected VOIP providers were subject to the requirements of Section 225, including contributing to the Telecommunications Relay Services, or TRS, fund and that they must offer 711 abbreviated dialing for access to relay services. At this time, we are not in compliance with these rules. We may be subject to enforcement actions including, but not limited to, fines, cease and desist orders, or other penalties. On October 10, 2007, the FCC granted a limited waiver of the 711 call handling requirement. While still mandating that interconnected VOIP providers like us are required to transmit 711 calls to a relay center, the FCC waived the requirement until March 31, 2009, insofar as it requires such providers to transmit the 711 call to an appropriate relay center, meaning the relay center(s) serving the state in which the caller is geographically located or the relay center(s) corresponding to the caller's last registered address. We are working on implementing a call routing solution which will route 711 calls to the appropriate relay center as defined in the FCC's order but cannot predict whether we will be in compliance at the end of the waiver period.

Our profitability may be reduced or our retail prices may rise due to increased regulation or the imposition of additional taxes, fees and surcharges.

On August 6, 2007, the FCC released a Report and Order regarding the collection of regulatory fees for Fiscal Year 2007 (Fees Order). Pursuant to the Fees Order, the FCC mandated the collection of such fees from interconnected VOIP service providers like us. The Fees Order mandates that interconnected VOIP providers pay regulatory fees based on reported interstate and international revenues. The Fees Order became effective in mid-November 2007. Regulatory fees for Fiscal Year 2007 will be due in 2008 during a separate filing window yet to be determined. Fiscal Year 2008 fees will also be paid in 2008 during the normal regulatory fee payment window. The assessment of regulatory fees to our service will increase our costs or cause us to increase the price of our retail service offerings and may have an adverse impact on our profitability.

We cannot predict the impact of any future laws, regulations and orders adopted either domestically or abroad on our operations and services. But increased regulation and the imposition of additional taxes, fees and surcharges increases the costs associated with providing our service and such taxes, fees and surcharges may or may not be recoverable from our customers. If we choose to absorb such costs, our profit margins would likely decrease. Moreover, even if such costs are recoverable or if we choose to maintain profitability, we may need to increase the retail price of our service that could result in making our service less competitive both with other providers of interconnected VOIP service providers and traditional providers of telecommunications services. The net effect could reduce the number of our subscribers, our revenue and our profit margin.

We are substantially smaller than our major competitors, whose marketing and pricing decisions, and relative size advantage, could adversely affect our ability to attract and to retain customers and are likely to continue to cause significant pricing pressures that could adversely affect our net revenues, results of operations and financial condition.

The long distance telecommunications, Internet, broadband, DSL, data and hosting and wireless industry is significantly influenced by the marketing and pricing decisions of the larger long distance, Internet access, broadband, DSL, data and hosting and wireless business participants. Prices in the long distance industry have continued to decline in recent years, and as competition continues to increase within each of our service segments and each of our product lines, we believe that prices are likely to continue to decrease. Competitors in our core markets include, among others: AT&T, Verizon, the regional bell operating companies (RBOCs) and the major wireless carriers in the United States; Telstra, SingTel Optus and Telecom New Zealand in Australia; Telus, BCE, Allstream (formerly AT&T Canada) and the major wireless and cable companies in Canada; and BT, Cable & Wireless United Kingdom, Colt Telecom, Energis and the major wireless carriers in the United

Table of Contents

Kingdom. Customers frequently change long distance, wireless, broadband providers, and ISPs in response to the offering of lower rates or promotional incentives, increasingly as a result of bundling of various services by competitors. Moreover, competitors' VOIP and broadband product rollouts have added further customer choice and pricing pressure. As a result, generally, customers can switch carriers and service offerings at any time. Competition in all of our markets is likely to remain intense, or even increase in intensity and, as deregulatory influences are experienced in markets outside the United States, competition in non-United States markets is becoming similar to the intense competition in the United States. Many of our competitors are significantly larger than us and have substantially greater financial, technical and marketing resources, larger networks, a broader portfolio of service offerings, greater control over network and transmission lines, stronger name recognition and customer loyalty, long-standing relationships with our target customers, and lower debt leverage ratios. As a result, our ability to attract and retain customers may be adversely affected. Many of our competitors enjoy economies of scale that result in low cost structures for transmission and related costs that could cause significant pricing pressures within the industry. Several long distance carriers in the United States, Canada and Australia and the major wireless carriers and cable companies, have introduced pricing and product bundling strategies that provide for fixed, low rates for calls. This strategy of our competitors could have a material adverse effect on our net revenue per minute, results of operations and financial condition if our pricing, set to remain competitive, is not offset by similar declines in our costs. Companies emerging out of bankruptcy might benefit from a lower cost structure and might apply pricing pressure within the industry to gain market share. We compete on the basis of price, particularly with respect to our sales to other carriers, and also on the basis of customer service and our ability to provide a variety of telecommunications products and services. If such price pressures and bundling strategies intensify, we may not be able to compete successfully in the future, may face quarterly revenue and operating results variability, and may have heightened difficulty in estimating future revenues or results.

Our repositioning in the marketplace places a significant strain on our resources, and if not managed effectively, could result in operational inefficiencies and other difficulties.

Our repositioning in the marketplace may place a significant strain on our management, operational and financial resources, and increase demand on our systems and controls. To manage this change effectively, we must continue to implement and improve our operational and financial systems and controls, invest in critical network infrastructure to maintain or improve our service quality levels, purchase and utilize other transmission facilities, and train and manage our employee base. If we inaccurately forecast the movement of traffic onto our network, we could have insufficient or excessive transmission facilities and disproportionate fixed expenses. As we proceed with our development, operational difficulties could arise from additional demand placed on customer provisioning and support, billing and management information systems, product delivery and fulfillment, on our support, sales and marketing and administrative resources and on our network infrastructure. For instance, we may encounter delays or cost-overruns or suffer other adverse consequences in implementing new systems when required, such as our off-shoring certain functions. In addition, our operating and financial control systems and infrastructure could be inadequate to ensure timely and accurate financial reporting, which could impact debt covenant compliance as well.

We have experienced significant historical, and may experience significant future, operating losses and net losses which may hinder our ability to meet our debt service or working capital requirements.

As of March 31, 2008, we had an accumulated deficit of \$(1,077.8) million. We incurred net losses of \$(34.6) million in 2002, \$(10.6) million in 2004, \$(149.2) million in 2005, and \$(238.0) million in 2006. During the year ended December 31, 2003 and 2007, we recognized net income of \$54.8 million and \$15.7 million, respectively, of which \$39.4 million and \$32.7 million, respectively are the positive impact of foreign currency transaction gains. We cannot assure that we will recognize net income, or reverse recent net revenue declines in future periods. If we cannot generate net income or sufficient operating profitability, we may not be able to meet our debt service or working capital requirements.

Table of Contents

Integration of acquisitions ultimately may not provide the benefits originally anticipated by management and may distract the attention of our personnel from the operation of our business.

We strive to increase the volume of voice and data traffic that we carry over our existing global network in order to reduce transmission costs and other operating costs as a percentage of net revenue, improve margins, improve service quality and enhance our ability to introduce new products and services. We may pursue acquisitions in the future to further our strategic objectives. Acquisitions of businesses and customer lists, a key element of our historical growth strategy, involve operational risks, including the possibility that an acquisition does not ultimately provide the benefits originally anticipated by management. Moreover, there can be no assurance that we will be successful in identifying attractive acquisition candidates, completing and financing additional acquisitions on favorable terms, or integrating the acquired business or assets into our own. There may be difficulty in migrating the customer base and in integrating the service offerings, distribution channels and networks gained through acquisitions with our own. Successful integration of operations and technologies requires the dedication of management and other personnel, which may distract their attention from the day-to-day business, the development or acquisition of new technologies, and the pursuit of other business acquisition opportunities, and there can be no assurance that successful integration will occur in light of these factors.

We experience intense domestic and international competition which may adversely affect our results of operations, financial condition, and cash flows.

The local and long distance telecommunications, data, broadband, Internet, VOIP, data and hosting and wireless industries are intensely competitive with relatively limited barriers to entry in the more deregulated countries in which we operate and with numerous entities competing for the same customers. Recent and pending deregulation in various countries may encourage new entrants to compete, including ISPs, wireless companies, cable television companies, who would offer voice, broadband, Internet access and television, and electric power utilities who would offer voice and broadband Internet access. For example, the United States and many other countries have committed to open their telecommunications markets to competition pursuant to an agreement under the World Trade Organization which began on January 1, 1998. Further, in the United States, as certain conditions have been met under the Telecommunications Act of 1996, the RBOCs have been allowed to enter the long distance market, and other long distance carriers have been allowed to enter the local telephone services market (although judicial and regulatory developments have diminished the attractiveness of this opportunity), and many entities, including cable television companies and utilities, have been allowed to enter both the local service and long distance telecommunications markets.

A deterioration in our relationships with facilities-based carriers could have a material adverse effect upon our business.

We primarily connect our customers' telephone calls and data/Internet needs through transmission lines that we lease under a variety of arrangements with other facilities-based long distance carriers. Many of these carriers are, or may become, our competitors. Our ability to maintain and expand our business depends on our ability to maintain favorable relationships with the facilities-based carriers from which we lease transmission lines. If our relationship with one or more of these carriers were to deteriorate or terminate, it could have a material adverse effect upon our cost structure, service quality, network diversity, results of operations, financial condition, and cash flows.

Uncertainties and risks associated with international markets and regulatory requirements could adversely impact our international operations.

We have significant international operations and, for the three months ended March 31, 2008, derived 81% of our net revenues by providing services outside of the United States. In international markets, we are smaller than the principal or incumbent telecommunications carrier that operates in each of the foreign jurisdictions

Table of Contents

where we operate. In these markets, incumbent carriers are likely to control access to, and pricing of, the local networks; enjoy better brand recognition and brand and customer loyalty; generally offer a wider range of product and services; and have significant operational economies of scale, including a larger backbone network and more correspondent agreements. Moreover, the incumbent carrier may take many months to allow competitors, including us, to interconnect to our switches within our territory, and we are dependent upon their cooperation in migrating customers onto our network. There can be no assurance that we will be able to obtain the permits and operating licenses required for us to operate; obtain access to local transmission facilities on economically acceptable terms; or market services in international markets.

In addition, operating in international markets generally involves additional risks, including unexpected changes or uncertainties in regulatory requirements, taxes, tariffs, customs and duties. Given the nature of our operations and uncertainties in, or the absence of definitive regulations or interpretations concerning, the taxation of (including value added tax of) certain aspects of our business in certain international jurisdictions in which we conduct (or may be construed by such authorities as conducting or deriving taxable) operations or revenue, we may become subject to assessments for taxes (which may include penalties and interest) which are either unexpected and/or have not been accrued for in our historical results of operations. This circumstance occurred during March 2008, when we concluded it was probable that assessments would be forthcoming concerning past European prepaid calling services operations (see Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations; Results of operations for the year ended December 31, 2007 as compared to the year ended December 31, 2006), and it is possible that tax uncertainties concerning our international operations could arise in the future. Such developments, in addition to the foregoing, could have adverse consequences that could result in restatement of prior period results of operations and unanticipated liquidity demands. Additional operating risks and uncertainties in operating in international markets include trade barriers, difficulties in staffing and managing foreign operations, problems in collecting accounts receivable, political risks, fluctuations in currency exchange rates, restrictions associated with the repatriation of funds, technology export and import restrictions, and seasonal reductions in business activity. Our ability to operate and grow our international operations successfully could be adversely impacted by these risks and uncertainties particularly in light of the fact that we derive such a large percentage of our revenues from outside of the United States.

Because a significant portion of our business is conducted outside the United States, fluctuations in foreign currency exchange rates could adversely affect our results of operations.

A significant portion of our net revenue is derived from sales and operations outside the United States. The reporting currency for our consolidated financial statements is the United States dollar. The local currency of each country is the functional currency for each of our respective entities operating in that country. In the future, we expect to continue to derive a significant portion of our net revenue and incur a significant portion of our operating costs outside the United States, and changes in exchange rates have had and may have a significant, and potentially adverse, effect on our results of operations. Our primary risk of loss regarding foreign currency exchange rate risk is caused by fluctuations in the following exchange rates: United States dollar (USD)/AUD, USD/CAD, USD/British pound (GBP), and USD/EUR. See Quantitative and Qualitative Disclosures about Market Risk. Due to the large percentage of our operations conducted outside of the United States, strengthening or weakening of the USD relative to one or more of the foregoing currencies could have an adverse impact on future results of operations. We historically have not engaged in hedging transactions. During the fourth quarter 2007, we completed a forward currency contract required by a Canadian credit facility. In addition, the operations of affiliates and subsidiaries in foreign countries have been funded with investments and other advances denominated in foreign currencies. Historically, such investments and advances have been long-term in nature, and we accounted for any adjustments resulting from currency translation as a charge or credit to accumulated other comprehensive loss within the stockholders' deficit section of our consolidated balance sheets. In 2002, agreements with certain subsidiaries were put in place for repayment of a portion of the investments and advances made to those subsidiaries. As we anticipate repayment in the foreseeable future of these amounts, we recognize the unrealized gains and losses in foreign currency transaction gain (loss) on the consolidated

Table of Contents

statements of operations, and depending upon changes in future currency rates, such gains or losses could have a significant, and potentially adverse, effect on our results of operations.

The telecommunications industry is rapidly changing, and if we are not able to adjust our strategy and resources effectively in the future to meet changing market conditions, we may not be able to compete effectively.

The telecommunications industry is changing rapidly due to deregulation, privatization, consolidation, technological improvements, availability of alternative services such as wireless, broadband, DSL, Internet, VOIP, data and hosting and wireless DSL through use of the fixed wireless spectrum, and the globalization of the world's economies. In addition, alternative services to traditional fixed wireline services, such as wireless, broadband, Internet and VOIP services, are a substantial competitive threat. If we do not adjust our contemplated plan of development to meet changing market conditions and if we do not have adequate resources, we may not be able to compete effectively. The telecommunications industry is marked by the introduction of new product and service offerings and technological improvements. Achieving successful financial results will depend on our ability to anticipate, assess and adapt to rapid technological changes, and offer, on a timely and cost-effective basis, services including the bundling of multiple services that meet evolving industry standards. If we do not anticipate, assess or adapt to such technological changes at a competitive price, maintain competitive services or obtain new technologies on a timely basis or on satisfactory terms, our financial results may be materially and adversely affected.

The rapid enhancement of VOIP technology may result in increasing levels of traditional domestic and international voice long distance traffic being transmitted over the Internet, as opposed to traditional telecommunication networks. Currently, there are significant capital investment savings and cost savings associated with carrying voice traffic employing VOIP technology, as compared to carrying calls over traditional networks. Thus, there exists the possibility that the price of traditional long distance voice services will decrease in order to be competitive with VOIP. Additionally, competition is expected to be intense to switch customers to VOIP product offerings, as is evidenced by numerous recent market announcements in the United States and internationally from industry leaders and competitive carriers concerning significant VOIP initiatives. Our ability effectively to retain our existing customer base and generate new customers, either through our traditional network or our own VOIP offerings, may be adversely affected by accelerated competition arising as a result of VOIP initiatives, as well as regulatory developments that may impede our ability to compete, such as restrictions on access to broadband networks owned and operated by others and the requirements to provide E911 services. As competition intensifies as a result of deregulatory, market or technological developments, our results of operations and financial condition could be adversely affected.

If we are not able to operate a cost-effective network, we may not be able to grow our business successfully.

Our long-term success depends on our ability to design, implement, operate, manage and maintain a reliable and cost-effective network. In addition, we rely on third parties to enable us to expand and manage our global network and to provide local, broadband Internet, data and hosting and wireless services. If we fail to generate additional traffic on our network, if we experience technical or logistical impediments to our ability to develop necessary network or to migrate traffic and customers onto our network, or if we experience difficulties with our third-party providers, we may not achieve desired economies of scale or otherwise be successful in growing our business.

If we are not able to use and protect intellectual property domestically and internationally, it could have a material adverse effect on our business.

Our ability to compete depends, in part, on our ability to use intellectual property in the United States and internationally. We rely on a combination of trade secrets, trademarks and licenses to protect our intellectual property. We are also subject to the risks of claims and litigation alleging infringement of the

Table of Contents

intellectual property rights of others. The telecommunications industry is subject to frequent litigation regarding patent and other intellectual property rights. We rely upon certain technology, including hardware and software, licensed from third parties. There can be no assurance that the technology licensed by us will continue to provide competitive features and functionality or that licenses for technology currently used by us or other technology that we may seek to license in the future will be available to us on commercially reasonable terms or at all. Although our existing intellectual property are on standard commercial terms made generally available by the companies providing the licenses and, individually, their costs and terms are not material to our business, the loss of, or our inability to maintain existing licenses, could result in shipment delays or reductions until equivalent technology or suitable alternative products could be developed, identified, licensed and integrated and could cause service disruption to our customers. Such delays or reductions in the aggregate could harm our business. We also generally rely on indemnification provisions in licensing contracts to protect against claims of infringement regarding the licensed technology, which indemnification could be affected by, among other things, the financial strength of the licensor.

The loss of key personnel could have a material adverse effect on our business.

The loss of the services of K. Paul Singh, our Chairman and Chief Executive Officer, or the services of our other key personnel, or our inability to attract and retain additional key management, technical and sales personnel, could have a material adverse effect upon us.

We are subject to potential adverse effects of regulation which may have a material adverse impact on our competitive position, growth and financial performance.

Our operations are subject to constantly changing regulation. There can be no assurance that future regulatory changes will not have a material adverse effect on us, or that regulators or third parties will not raise material issues with regard to our compliance or noncompliance with applicable regulations, any of which could have a material adverse effect upon us. As a multinational telecommunications company, we are subject to varying degrees of regulation in each of the jurisdictions in which we provide our services. Local laws and regulations, and the interpretation of such laws and regulations, differ significantly among the jurisdictions in which we operate. Enforcement and interpretations of these laws and regulations can be unpredictable and are often subject to the informal views of government officials. Potential future regulatory, judicial, legislative, and government policy changes in jurisdictions where we operate could have a material adverse effect on us. Domestic or international regulators or third parties may raise material issues with regard to our compliance or noncompliance with applicable regulations, and therefore may have a material adverse impact on our competitive position, growth and financial performance. Regulatory considerations that affect or limit our business include (1) United States common carrier requirements not to discriminate unreasonably among customers and to charge just and reasonable rates; (2) general uncertainty regarding the future regulatory classification of and taxation of VOIP telephony, the need to provide emergency calling services in a manner required by the FCC that is not yet available commercially on a nation-wide basis and the ability to access broadband networks owned and operated by others; as regulators decide that VOIP is a regulated telecommunications service, our VOIP services may be subject to burdensome regulatory requirements and fees, we may be obligated to pay carriers additional interconnection fees and operating costs may increase; (3) general changes in access charges, universal service and regulatory fee payments would affect our cost of providing long distance services; (4) the ultimate regulatory resolution regarding efforts by Telstra in Australia to increase prices and charges; (5) the ultimate outcome of the process launched by the Australian government to help fund the construction of a new national broadband network, including whether and the terms upon which (a) we will have access to such network, and (b) the duration upon which the copper wire based last mile infrastructure needed by us to furnish broadband services using our DSLAM network infrastructure will be continued; (6) general changes in access charges and contribution payments could adversely affect our cost of providing long distance, wireless, broadband, VOIP, local and other services; and (7) regulatory proceedings in Canada determining whether and the extent to which regulation should mandate access to networks and interconnection including intra-exchange transport services

Table of Contents

which we use to interconnect our DSLAM collocation sites and high speed access to business services. Normal (Web), Char,Char;Any adverse developments implicating the foregoing could materially adversely affect our business, financial condition, result of operations and prospects.

Natural disasters may affect the markets in which we operate, our operations and our profitability.

Many of the geographic areas where we conduct our business may be affected by natural disasters, including hurricanes and tropical storms. Hurricanes, tropical storms and other natural disasters could have a material adverse effect on the business by damaging the network facilities or curtailing voice or data traffic as a result of the effects of such events, such as destruction of homes and businesses.

A small group of our stockholders could exercise influence over our affairs.

As of February 29, 2008, funds affiliated with American International Group, Incorporated (AIG Entities) beneficially owned 13% of our outstanding common stock, which was acquired through the conversion of their Series C Preferred Stock. As a result of such share ownership, these holders can exercise influence over our affairs through the provisions of a certain Governance Agreement between such holders and us, dated November 4, 2003, that provide for their right to nominate a candidate for election by our stockholders to the board of directors and nominate one non-voting board observer, in each case subject to the maintenance of certain minimum ownership levels of our common stock and the board's right to exercise its fiduciary duties.

In addition, these holders' significant ownership levels could have an influence on: amendments to our certificate of incorporation; other fundamental corporate transactions such as mergers and asset sales; and the general direction of our business and affairs.

Also, the applicable triggering provisions of our rights agreement with StockTrans, Inc., as Rights Agent, dated December 23, 1998 (as amended, the Rights Agreement) contain exceptions with respect to the acquisition of beneficial ownership of our shares by such holders and the other former holders of Series C Preferred Stock. As a result, such holders could gain additional control over our affairs without triggering the provisions of the Rights Agreement.

Finally, certain stockholders, other than the AIG Entities, have from time to time made filings with the SEC to report beneficial ownership of our common stock at levels in excess of 5%. Such persons have reported beneficial ownership concerning approximately 42.1 million shares, in aggregate, as of December 31, 2007, and as a result, individually or in the aggregate, could potentially exercise influence over our business.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.
