Capital actions

Management developed a capital plan designed to help ensure strong regulatory capital and tangible equity levels, positioning the bank to absorb losses and provisions significantly in excess of current levels and environmental conditions through 2009

Revising Tier 1 capital target range to 8-9%

Total capital target raised

Tangible equity/tangible assets

Strengthening Fifth Third s capital position through the following capital actions:

Capital issuance

Subject to market conditions, plan to issue $1 billion
of Tier 1 capital in the form of convertible preferred securities -
achieves
new Tier 1 target immediately

Dividend reduction
-
Reducing quarterly common dividend by $166
million, from $0.44 to $0.15

Asset sales/dispositions
Near-term sale of non-core businesses to
supplement common equity capital, if successfully completed, by
additional $1 billion or more
Capital actions assume further deterioration of credit and economic environment
and are intended to maintain a Tier 1 ratio within target range through credit cycle
without further issuance

28

Summary and priorities

While credit conditions continue to deteriorate, Fifth Third is taking aggressive steps to ensure it is well positioned to weather a challenging environment

Delivery of strong operating results remains a hallmark of Fifth Third despite sluggish economy

Active credit monitoring and management is top priority of the organization
Management s credit loss projections reflect an expectation of a continuing deterioration in the credit environment and incorporate significant stress

Expected credit losses in 2008 and potential 2009 scenarios assume significant stress relative to 1H08 levels

Provisions significantly exceed net charge-offs, building allowance to absorb portfolio losses
Actions and plans will materially enhance the company s capital position and provide cushion for significant additional stress beyond current expectations
