**Notes to Schedule of Investments (amounts in thousands\*, except number of contracts):**

**Security Valuation** For purposes of calculating the net asset value ( NAV ), portfolio securities and other assets for which market quotes are readily available are valued at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Domestic and foreign fixed income securities and non-exchange traded derivatives are normally valued on the basis of quotes obtained from brokers and dealers or pricing services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to market daily until settlement at the forward settlement date. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost. Exchange traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies, the Fund's NAV will be calculated based upon the NAVs of such investments. The Fund will normally use pricing data for domestic equity securities received shortly after the New York Stock Exchange ( NYSE ) Close and do not normally take into account trading, clearances or settlements that take place after the NYSE Close.

Securities and other assets for which market quotes are not readily available are valued at fair value as determined in good faith by the Board of Directors or persons acting at their direction. The Board of Directors has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to Pacific Investment Management Company LLC ( PIMCO ) the responsibility for applying the valuation methods. For instance, certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board of Directors, with reference to other securities or indices. In the event that market quotes are not readily available, and the security or asset cannot be valued pursuant to one of the valuation methods, the value of the security or asset will be determined in good faith by the Valuation Committee of the Board of Directors, generally based upon recommendations provided by PIMCO.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/asked information, broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of the Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade, do not open for trading for the entire day and no other market prices are available. The Board of Directors is responsible for monitoring significant events that may materially affect the values of the Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events.

When the Fund uses fair value pricing to determine its NAV, securities will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board of Directors or persons acting at their direction believe accurately reflects fair value. Fair value pricing may require subjective determinations about the value of a security. While the Fund's policy is intended to result in a calculation of the Fund's NAV that fairly reflects security values as of the time of pricing, the Fund cannot ensure that fair values determined by the Board of Directors or persons acting at their direction would accurately reflect the price that the Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by the Fund may differ from the value that would be realized if the securities were sold.

- (i) Effective February 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* ( FAS 157 ). In accordance with FAS 157, fair value is defined as the price that the Fund would receive or pay to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 establishes and requires disclosure of a fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels based upon inputs using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3). Valuation levels are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the fair valuations according to the inputs used as of April 30, 2008 in valuing the Fund's assets and liabilities:

Fair Valuations at 04/30/2008 using				
	Quoted Prices in Active Markets for Identical Investments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Value at 04/30/2008
Investments, at value	\$ 8	\$900,190	\$186	\$900,384
Other Financial Instruments*	486	35,748		36,234
<b>Total</b>	<b>\$494</b>	<b>\$935,938</b>	<b>\$186</b>	<b>\$936,618</b>

For fair valuations using significant unobservable inputs (Level 3), FAS 157 requires a reconciliation of the beginning to ending balances for reported market values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in/out of the Level 3 category during the period. The following is a reconciliation of the fair valuations using significant unobservable inputs for the Fund during the period ending April 30, 2008:

	Beginning balance 01/31/2008	Net purchases (sales)	Accrued discounts (premiums)	Total realized and unrealized gains (losses)	Transfers in (out) of Level 3	Ending balance 04/30/2008
Investments, at value	\$194	\$(2)	\$	\$(6)	\$	\$186
Other Financial Instruments*						
<b>Total</b>	<b>\$194</b>	<b>\$(2)</b>	<b>\$</b>	<b>\$(6)</b>	<b>\$</b>	<b>\$186</b>

\* Other financial instruments include open futures contracts, swap contracts, written options, short sales, and foreign currency contracts.
