**EXPLANATORY NOTE**

This Amendment No. 1 on Form 10-Q/A to our Quarterly Report on Form 10-Q for the quarter ended December 31, 2008, filed with the Securities and Exchange Commission (SEC) on February 12, 2009 is being filed to restate our consolidated financial statements and other financial information to give effect to adjustments resulting from the identification of errors related to a pricing dispute with a major vendor. We have added a disclosure in Note 2 to our Consolidated Financial Statements that explains the restatement and the impact to our Consolidated Financial Statements that were originally filed. This Form 10-Q/A (Amendment No. 1) amends and restates Part I Items 1, 2 and 4 of the February 12, 2009 filing, in each case to reflect only the adjustments described herein and the filing of restated financial statements as discussed above, and no other information in our February 12, 2009 filing is amended hereby. Except for the foregoing amended information, this Form 10-Q/A (Amendment No. 1) filing does not reflect events occurring after February 12, 2009.

**Table of Contents****CSP INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****THREE MONTHS ENDED DECEMBER 31, 2008 AND 2007****Organization and Business**

CSP Inc. ( CSPI or the Company ) was founded in 1968 and is based in Billerica, Massachusetts. To meet the diverse requirements of its industrial, commercial and defense customers worldwide, CSPI and its subsidiaries develop and market IT integration solutions, messaging and image-processing software, and high-performance cluster computer systems. The Company operates in two segments, its Systems segment and its Service and System Integration segment.

**1. Basis of Presentation**

The accompanying consolidated financial statements have been prepared by the Company, without audit, and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of the interim periods presented. All adjustments were of a normal recurring nature. Certain information and footnote disclosures normally included in the annual financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America, have been condensed or omitted. Accordingly, the Company believes that although the disclosures are adequate to make the information presented not misleading, the unaudited financial statements should be read in conjunction with the footnotes contained in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2008.

**2. Restatement of Financial Statements as of and for the periods ended March 31, 2009 and December 31, 2008**

The Company has restated its financial statements as of and for the period ended December 31, 2008 to reflect adjustments to cost of goods sold, operating expenses and income tax expense, in connection with transactions related to a pricing dispute (the Dispute ) with one of its largest hardware manufacturers (the Hardware Manufacturer ). The Dispute arose through the discovery that Modcomp US was buying some products from the Hardware Manufacturer's distributors at incorrect prices. The prices that were incorrect arose from Modcomp US and three of the Hardware Manufacturer's distributors misapplying discounts that were available for specific products for certain customers to customers for whom these discounts were not available. The adjustments reflect amounts payable by the Company as of December 31, 2008 to the Hardware Manufacturer for transactions which have been resolved, as well as the Company's estimate of amounts that will become payable to the Hardware Manufacturer once the remaining transactions are resolved. These amounts are reflected as increases to cost of goods sold in the restated financial statements because they represent additional cost due to the Hardware Manufacturer because of the misapplied discounts. In addition, the adjustments reflect reductions to sales & marketing expense for commissions recoverable by the Company in connection with the transactions and reductions to income tax expense. The balance sheet and statement of cash flows as of and for the three months ended December 31, 2008 have also been restated to reflect these adjustments. The effect of the restatements referred to above on net income and fully diluted earnings per share ( EPS ) are summarized below:

(Amounts in thousands except per share data)	Three months December 31, 2008
Net Income as reported	\$ 380
Adjustment	(22)
Restated Net Income	\$ 358
Fully diluted EPS as reported	\$ 0.10

### 3. *Use of Estimates*

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates under different assumptions or conditions.

**Table of Contents****4. Earnings Per Share of Common Stock**

Basic net income (loss) per common share is computed by dividing net income (loss) available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted net income (loss) per common share reflects the maximum dilution that would have resulted from the assumed exercise and share repurchase related to dilutive stock options and is computed by dividing net income (loss) by the assumed weighted average number of common shares outstanding.

The reconciliation of the denominators of the basic and diluted net income (loss) per share computations for the Company's reported net income (loss) is as follows:

	For the Three Months Ended December 31,	
	2008 (Restated)	December 31, 2007
	(Amounts in thousands, except per share data)	
Net income (loss)	\$ 358	\$ (259)
Weighted average number of shares outstanding - basic	3,758	3,802
Incremental shares from the assumed exercise of stock options	8	
Weighted average number of shares outstanding - diluted	3,766	3,802
Net income (loss) per share - basic	\$ 0.09	\$ (0.07)
Net income (loss) per share - diluted	\$ 0.09	\$ (0.07)

For the three months ended December 31, 2008, 8,210 options were included in the diluted net income per share calculation and 330,576 options were excluded. SFAS No. 128 requires all anti-dilutive securities, including stock options, to be excluded from the diluted income per share computation. Accordingly, for the three months ended December 31, 2007, due to our net loss, all of our outstanding options of 208,770 were excluded from the diluted loss per share calculation because their inclusion would have been anti-dilutive.

**5. Investments**

	\$ 5,000	\$	\$ 5,000

Our investment in auction rate securities as of December 31, 2008, listed above totaling approximately \$1.5 million has scheduled interest rate auctions in either 7-day or 28-day intervals. Our auction rate securities are currently rated Aaa by Moody's, AAA by Standard & Poor's and/or AAA by Fitch, which are the highest ratings issued by each respective rating agency. There was \$1.1 million of investments which were issued by a state agency and are supported by student loans, for which repayment is substantially guaranteed by the U.S. government under the Federal Family Education Loan Program (FFELP). The remaining \$400 thousand is a closed end, preferred auction security secured by the assets of the closed end fund. These funds are legally required to maintain assets of 200% of the face value of the preferred auction securities. During the year ended September 30, 2008, the Company changed its classification of these securities from held-to-maturity to available-for-sale.

On January 20, 2009, all of the investments listed above, which were held at Merrill Lynch, were redeemed at par value which was our carrying value.

Net unrealized gains or losses on available-for-sale investments are reported as a separate component of shareholders' equity until realized. There were no realized or unrealized gains or losses on available-for-sale investments for the three months ended December 31, 2008 and 2007.

**6. Inventories**

Inventories consist of the following:

	December 31, 2008	September 30, 2008
(Amounts in thousands)		
Raw materials	\$ 1,427	\$ 1,531
Work-in-process	517	202
Finished goods	5,519	6,392
Total	\$ 7,463	\$ 8,125

**7. Accumulated Other Comprehensive Income (Loss)**

The components of Accumulated Other Comprehensive Loss are as follows:

	December 31, 2008	September 30, 2008
(Amounts in thousands)		
Cumulative effect of foreign currency translation	\$ (2,201)	\$ (1,549)
Additional minimum pension liability	(1,738)	(1,738)
Accumulated Other Comprehensive Loss	\$ (3,939)	\$ (3,287)

**8. Pension and Retirement Plans**

In the United Kingdom and Germany, the Company provides defined benefit pension plans and defined contribution plans for the majority of its employees. Domestically, the Company also provides benefits through supplemental retirement plans to certain current and former employees. These supplemental plans provide benefits derived out of cash surrender values relating to current and former employee and officer life insurance policies, equal to the difference between the amounts that would have been payable under the domestic defined benefit pension plans, in the absence of legislation limiting pension benefits and earnings that may be considered in calculating pension benefits, and the amounts actually payable under the defined benefit pension plans. Domestically, the Company provides for officer death benefits through post-retirement plans to certain officers.

**Table of Contents**

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheets.

Our pension plan in the United Kingdom is the only plan with plan assets. The plan assets comprise a diversified mix of assets including corporate equity securities, government securities and corporate debt securities.

The components of net periodic benefit costs related to the U.S. and international plans are as follows:

	For the Three Months Ended December 31,

**9. Line of Credit**

The Company's current line of credit note allows for borrowings of up to \$2.5 million. The line of credit renews annually on June 30. Availability under the facility is reduced by outstanding letters of credit issued there under. Interest on borrowings under the credit facility accrues based upon either the LIBOR rate plus 1.5% (the Libor Option) or at the lender's prime rate (the Prime Rate Option). The Company may choose at its discretion whether interest shall accrue at the Libor Option or the Prime Rate Option, by giving notice to the lender on or before the date that interest is due. The credit note contains financial and non-financial covenants that apply when the Company has borrowings outstanding under the line of credit. The covenants include a requirement to maintain (i) a level of \$25 thousand in operating cash flow for the trailing twelve months from the end of each fiscal quarter; (ii) a minimum debt service coverage ratio of 1.25 and (iii) a minimum current ratio excluding inventory from current assets of 1.5 at the end of each fiscal quarter.

The outstanding balance under this credit facility as of December 31, 2008 and September 30, 2008 was \$0 and \$1.5 million, respectively. The outstanding borrowings under the credit facility during the quarters ended December 31, 2008 and 2007 were \$1.5 million and \$0, respectively.

Profit (loss) from operations is sales less cost of sales, engineering and development, selling, general and administrative expenses but is not affected by either non-operating charges/income or by income taxes. Non-operating charges/ income consist principally of investment income and interest expense. In calculating profit (loss) from operations for individual operating segments, sales and administrative expenses incurred at the corporate level are allocated to each segment based upon their relative sales levels. All intercompany transactions have been eliminated.

The assets include deferred income tax assets and other financial instruments owned by the Company.

The following table lists a customer from which the Company derived revenues in excess of 10% of total revenues for the three month periods ended December 31, 2008 and 2007.

**11. Fair Value Measures**

In September 2006, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* ( SFAS 157 ). SFAS 157 defines fair value, establishes a framework for measuring fair value, and enhances fair value measurement disclosure. Effective October 1, 2008, the Company adopted the measurement and disclosure requirements related to financial assets and financial liabilities. The adoption of SFAS 157 for financial assets and financial liabilities did not have an impact on the Company's results of operations or the fair values of its financial assets and liabilities.

FASB Staff Position 157-2, *Effective Date of FASB Statement No. 157*, ( FSP 157-2 ) delayed the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), until the beginning of fiscal 2010. The Company is currently assessing the impact that the application of SFAS 157 to nonfinancial assets and liabilities will have on its results of operations and financial position.

In October 2008, the FASB issued FSP 157-3 *Determining the Fair Value of a Financial Asset when the Market for that Asset is Not Active*. FSP 157-3 clarifies the application of SFAS No. 157 in a market that is not active, and provides guidance on the key considerations in determining the fair value of a financial asset when the market for that Financial asset is not active.

The Company adopted the measurement and disclosure requirements related to financial assets and financial liabilities. The adoption of SFAS 157 for financial assets and financial liabilities did not have a material impact on the Company's results of operations or the fair values of its financial assets and liabilities.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115* ( SFAS 159 ). Under SFAS 159, a company may choose, at specified election dates, to measure eligible items at fair value and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent

## Edgar Filing: CSP INC /MA/ - Form 10-Q/A

reporting date. Effective October 1, 2008, the Company adopted SFAS 159, but the Company has not elected the fair value option for any eligible financial instruments as of December 31, 2008.

SFAS 157 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

**Table of Contents****(a) Fair Value Hierarchy**

SFAS 157 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. SFAS 157 establishes three levels of inputs that may be used to measure fair value:

*Level 1*

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

*Level 2*

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included within Level 1 that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

*Level 3*

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

**(b) Assets and Liabilities Measured at Fair Value on a Recurring Basis**

Assets and Liabilities measured at fair value on a recurring basis as follows:

	December 31, 2008 Fair Value Measurements Using			Total Balance	Gain or (loss)
	September 30, 2008	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)

<b>Assets:</b>

<b>Total assets measured at fair value</b>	<b>\$ 6,327</b>	<b>\$ 4,584</b>	<b>\$</b>	<b>\$ 4,584</b>	<b>\$</b>

The assets are included in cash and cash equivalents and short term investments in the accompanying consolidated balance sheets.

The money market funds are included in cash and cash equivalents at September 30 and December 31, 2008.

The Company had no liabilities measured at fair value as of December 31, 2008.

The Company had no assets or liabilities measured at fair value on a non recurring basis as of December 31, 2008.

**12. Common Stock Repurchase**

On February 3, 2009, the Board of Directors authorized the Company to purchase up to 350 thousand shares of the Company's outstanding common stock at market price. The Company currently has approximately 53 thousand shares authorized to repurchase under its previous stock repurchase program.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### ***Forward-Looking Statements***

The discussion below contains certain forward-looking statements related to, among others, but not limited to, statements concerning future revenues and future business plans. Actual results may vary from those contained in such forward-looking statements.

Markets for our products and services are characterized by rapidly changing technology, new product introductions and short product life cycles. These changes can adversely affect our business and operating results. Our success will depend on our ability to enhance our existing products and services and to develop and introduce, on a timely and cost effective basis, new products that keep pace with technological developments and address increasing customer requirements. The inability to meet these demands could adversely affect our business and operating results.

#### ***Restatement of Previously Issued Financial Statements***

As discussed more fully in Note 2, Restatement of Financial Statements, in Item 1 of this Form 10-Q/A (Amendment No. 1), we have restated our consolidated financial statements as of and for the three months ended December 31, 2008. This discussion and analysis should be read in conjunction with the restated consolidated financial statements and notes appearing in Item 1 of this Quarterly Report on Form 10-Q/A (Amendment No. 1).

#### ***Critical Accounting Policies***

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate our estimates, including those related to uncollectible receivables, inventory valuation, goodwill, income taxes, deferred compensation and retirement plans, and contingencies. We base our estimates on historical performance and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies is contained in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008 in the Critical Accounting Policies section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

### **Results of Operations**

#### ***Overview of the three months ended December 31, 2008 Results of Operations***

CSP Inc. operates in two segments:

Systems - the Systems segment consists of our MultiComputer division which designs, develops and manufactures signal processing computer platforms which are used primarily in military applications and the process control and data acquisition hardware business of our Modcomp division.

Service and System Integration - the Service and System Integration Segment includes the computer systems maintenance and integration services and third-party computer hardware and software products businesses of our Modcomp subsidiary.

#### ***Highlights include:***

Total revenue for the quarter ended December 31, 2008 was \$24.1 million versus \$17.9 million for the quarter ended December 31, 2007, an increase of approximately \$6.1 million, or 34%.

## Edgar Filing: CSP INC /MA/ - Form 10-Q/A

Operating income for the quarter ended December 31, 2008 was \$465 thousand versus an operating loss of \$529 thousand for the quarter ended December 31, 2007, an improvement of approximately \$1.0 million in operating income over the year-ago 1<sup>st</sup> quarter.

Net income for the quarter ended December 31, 2008 was \$358 thousand versus a net loss of \$259 thousand for the quarter ended December 31, 2007, an improvement of approximately \$617 thousand in net income over the year-ago 1<sup>st</sup> quarter.

Net cash used by operating activities was approximately \$1.5 million for the quarter ended December 31, 2008 compared to net cash used by operating activities for the quarter ended December 31, 2007 of \$757 thousand.

Total	\$ 837	\$ 5,284	\$ 6,121	34%
<b>% increase</b>	<b>95%</b>	<b>31%</b>	<b>34%</b>	

Total revenues for the first quarter of fiscal year 2009 increased by approximately \$6.1 million, or 34%, compared to the first quarter of fiscal year 2008. Approximately \$837 thousand of this increase was in the Systems segment and approximately \$5.3 million of the increase was from the Service and System Integration segment.

Product revenues for the first quarter of fiscal year 2009 increased by \$4.2 million, or 29% compared to the first quarter of fiscal 2008. Service and System Integration segment product revenue increased by approximately \$4.7 million, while Systems segment product revenue decreased by approximately \$560 thousand.

The decrease in the Systems segment product revenue was due to a decrease in product sales to Kyokuto Boeki Kaisha ( KBK ) of \$394 thousand between the first quarter of fiscal year 2009 and the same period in fiscal year 2008, and a decrease in product sales to General Dynamics of approximately \$179 thousand.

**Table of Contents**

The increase in the Service and System Integration segment product sales was primarily due to a \$4.4 million increase in shipments of third-party products in the U.S. division of the segment. This increase was due mainly to large orders sold to three of the division's largest customers. In addition, product sales of the segment's German division increased by approximately \$221 thousand, due to an increase in sales volume of approximately \$683 thousand, that was partially offset by the unfavorable exchange rate fluctuation of the Euro versus the US dollar which resulted in a decrease of \$461 thousand.

Service revenues for the first quarter of fiscal year 2009 increased by approximately \$1.9 million, or 52% compared to the first quarter of fiscal 2008. Service revenues in the Systems segment increased by approximately \$1.4 million due to royalty revenues from Lockheed Martin, which were approximately \$1.4 million in the first quarter of fiscal 2009 and zero in the first fiscal quarter of 2008. Service revenues in the Service and System Integration segment for the first quarter of fiscal year 2009 increased by approximately \$542 thousand compared to the first quarter of fiscal 2008. This increase was due to service revenue from R2 Technologies ( R2 ) which the Company acquired on September 25, 2008. R2 generated \$445 thousand in service revenues for the quarter ended December 31, 2008. In addition, services revenues increased in the legacy business of the US division of the segment due primarily to a large professional services order that was delivered during the quarter.

Our sales by geographic area, based on the location to which the products were shipped or services rendered, are as follows:

	For the Three Months Ended				\$ Increase/ (Decrease)	% Increase (Decrease)
	December 31, 2008	%	December 31, 2007	%		
	(Dollar amounts in thousands)					
North America	\$ 15,542	65%	\$ 9,589	54%	\$ 5,953	62%
Europe	8,491	35%	7,925	44%	566	7%
Asia Pacific	27	%	425	2%	(398)	(94)%
Totals	\$ 24,060	100%	\$ 17,939	100%	\$ 6,121	34%

The increase in North American revenue for the first quarter of 2009 versus the prior year quarter was primarily the result of the increase in royalty revenue to Lockheed Martin of \$1.4 million plus the increase in sales in the US division of the Service and System Integration segment of \$4.8 million. The increase shown above in sales in Europe was the result of higher sales in the German division, the UK division and the US division of the Service and System Integration segment, where sales in Europe increased by \$310 thousand, \$143 thousand and \$113 thousand, respectively. The decreased Asia Pacific sales were the result of the decrease in sales to KBK, described above.

Total cost of sales for the quarter ended December 31, 2008 increased by approximately \$4.8 million for the quarter ended December 31, 2008 compared to the quarter ended December 31, 2007, to \$19.3 million in the current year 1<sup>st</sup> quarter from \$14.6 million in the prior year period. The increase in cost of sales was due, overall, to the increase in sales volume and revenues, reflecting an overall 1% increase in the overall gross

## Edgar Filing: CSP INC /MA/ - Form 10-Q/A

margin to 20% for the current year quarter versus 19% in the prior year quarter. This increase in the overall gross margin was due primarily to the increased gross margin in the Systems segment, which increased by 58% (from 21% to 79%). This was due to \$1.4 million in royalty sales to Lockheed Martin in the 1<sup>st</sup> quarter of fiscal 2009, which carry no cost of sales.

**Table of Contents**

Gross profit margins for the Service and System Integration segment decreased by 4% gross margin from 19% for the prior year quarter to 15% for the current year quarter ended December 31, 2008. This decrease was due primarily to lower product gross margin for this segment due primarily to a number of large orders delivered in the 1<sup>st</sup> quarter of fiscal 2009, which had lower gross margin than the smaller sized orders shipped in the prior year 1<sup>st</sup> quarter. The combination of the 58% increase in gross margin in the Systems segment, offset by the 4% decrease in gross margin in the Service and System Integration segment, resulted in the 1% increase in the overall gross margin.

**Engineering and Development Expenses**

The following table details our engineering and development expenses by operating segment for the three months ended December 31, 2008 and 2007:

	For the three months ended				\$ Decrease	% Decrease
	December 31, 2008	% of Total	December 31, 2007	% of Total		
<b>By Operating Segment:</b>						
Systems	\$ 539	100%	\$ 642	100%	\$ (103)	(16)%
Service and System Integration		%		%		%
Total	\$ 539	100%	\$ 642	100%	\$ (103)	(16)%

Engineering and development expenses for the first quarter of fiscal 2009 decreased by approximately \$103 thousand, or 16%, compared to the first quarter of fiscal 2008. The decrease relates primarily to a decrease in outside consultant expense in connection with the development of the next generation 3000 SERIES product of the MultiComputer division in the Systems segment.

**Selling, General and Administrative**

The following table details our selling, general and administrative (SG&A) expense by operating segment for the three months ended December 31, 2008 and 2007:

	For the Three Months Ended				\$ Increase	% Increase
	December 31, 2008 (Restated)	% of Total	December 31, 2007	% of Total		
<b>By Operating Segment:</b>						
Systems	\$ 951	25%	\$ 913	28%	\$ 38	4%

Total	\$ 3,740	100%	\$ 3,262	100%	\$ 478	15%

Total selling, general and administrative expenses in the first quarter of fiscal 2009 increased by approximately \$478 thousand, or 15%, compared to the corresponding quarter of fiscal 2008. The \$440 thousand increase in the Service and System Integration segment which accounts primarily for the total increase, was the result of higher salary, fringe and other expenses related to the addition of R2 which totaled \$315 thousand and higher commissions in the US division (which includes R2) of \$128 thousand, due to the higher gross profit realized in the current fiscal year quarter versus the prior fiscal year quarter.

**Other Income/Expenses**

The following table details our other income/expenses for the three months ended December 31, 2008 and 2007:

	For the Three Months Ended		\$ Increase (Decrease)
	December 31, 2008	December 31, 2007	
	(Amounts in thousands)

Other expense, net	(6)	(16)	10
<b>Total other income , net</b>	<b>\$ 135</b>	<b>\$ 131</b>	<b>\$ 4</b>

---

## **Table of Contents**

Total other income, net, increased \$4 thousand for the first quarter of fiscal 2009 compared to the first quarter of fiscal 2008. This increase is primarily due to a decrease in interest income related to lower interest rates during the first quarter of fiscal 2009 compared to the first quarter of fiscal 2008. This decrease was offset by an increase in foreign exchange gain primarily related to exchange rate fluctuations between the British Pound and the Euro.

### **Income Taxes**

#### **Income Tax Provision**

The Company recorded an income tax provision of \$242 thousand for the quarter ended December 31, 2008 reflecting an effective income tax rate of 40% compared to an income tax benefit of \$139 thousand for the quarter ended December 31, 2007, which reflected an effective tax benefit rate of 35%. Our benefit for the quarter ended December 31, 2007 was due to the carry back of the loss of our US operation for the quarter.

In assessing the realizability of deferred tax assets, we considered our taxable future earnings and the expected timing of the reversal of temporary differences. Accordingly, we have recorded a valuation allowance which reduces the gross deferred tax asset to an amount which we believe will more likely than not be realized. Our inability to project future profitability beyond fiscal year 2010 in the U.S. and cumulative losses incurred in recent years in the U.K. represent sufficient negative evidence under SFAS 109 to record a valuation allowance against certain deferred tax assets. We maintained a substantial valuation allowance against our U.K. deferred tax assets as we have experienced cumulative losses and do not have any indication that the operation will be profitable in the future to an extent that will allow us to utilize much of our net operating loss carryforwards. To the extent that actual experience deviates from our assumptions, our projections would be affected and hence our assessment of realizability of our deferred tax asset may change.

### **Liquidity and Capital Resources**

Our primary source of liquidity is our cash and cash equivalents and short-term investments, which decreased by approximately \$4.3 million to \$14.2 million as of December 31, 2008 compared to \$18.5 million as of September 30, 2008. At December 31, 2008 the investments consist of auction rate securities which were redeemed at par value in January 2009. The Company's cash equivalents of \$3.1 million are held in money market funds.

The Company used \$1.5 million of cash from operations during the quarter due in part to the following: an increase in accounts receivable primarily from the U.S. Service and Systems Integration segment which increased by \$1.5 million from the increased quarterly revenue, a decrease in account payables and accrued expenses and deferred revenue which was primarily from the Service and Systems Integration segment in Germany that was reduced by \$1.4 million for vendor payments and \$1.3 million in U.S. Service and Systems integration segment, from recognition of the sale to Taylor Bean & Whitaker, that were offset by decreases in the other current assets.

Approximately \$3.3 million of cash was provided from investing activities for the quarter ended December 31, 2008, consisting primarily of \$3.5 million from sales of our auction rate securities, offset by \$109 thousand used to purchase capital equipment and \$61 thousand in life insurance premiums paid.

We used approximately \$1.6 million in financing activities during the quarter ended December 31, 2008 which consisted of \$1.5 million to pay off our line of credit balance and \$216 thousand to buyback CSPI stock, offset by \$79 thousand in proceeds for stock issued through the Employee Stock Purchase Plan.

For the quarter ended December 31, 2008, the effects of foreign exchange rate fluctuations on cash was a use of cash of approximately \$1 million. This was due primarily to the significant reduction in the value of the British Pound versus the US dollar.

If cash generated from operations is insufficient to satisfy working capital requirements, we may need to access funds through bank loans, sale of securities or other means. There is no assurance that we will be able to raise any such capital on terms acceptable to us, on a timely basis or at all. If we are unable to secure additional financing, we may not be able to complete development or enhancement of products, take advantage of future opportunities, respond to competition or continue to effectively operate our business.

Based on our current plans and business conditions, management believes that the Company's available cash and cash equivalents and cash generated from operations and investments will be sufficient to provide for the Company's working capital and capital expenditure requirements for the foreseeable future.

**Inflation and Changing Prices**

Management does not believe that inflation and changing prices had significant impact on sales, revenues or income from continuing operations during the three month periods ended December 31, 2008 and 2007. There is no assurance that our business will not be materially and adversely affected by inflation and changing prices in the future.

*Evaluation of Disclosure Controls and Procedures*

The Company evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2008. Our chief executive officer, our chief financial officer, and other members of our senior management team supervised and participated in this evaluation. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2008, the Company's chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective.

This quarterly report is not required to include, and does not include, a report of management's assessment regarding internal control over financial reporting or an attestation report of the company's registered public accounting firm.

*Changes in Internal Controls over Financial Reporting*

During the quarter ended June 30, 2009, the Company's US Modcomp division (Modcomp US), which is part of the Service and System Integration segment, and one of its largest hardware manufacturers (the Hardware Manufacturer) began working to resolve a pricing dispute (the Dispute). The Dispute arose through the discovery that Modcomp US was buying some products from the Hardware Manufacturer's distributors at incorrect prices. The prices that were incorrect arose from Modcomp US and three of the Hardware Manufacturer's distributors misapplying discounts that were available for specific products for certain customers to customers for whom these discounts were not available.

As a result of the Dispute, the Company has restated its financial statements as of and for the periods ended March 31, 2009 and December 31, 2008 to reflect adjustments to cost of goods sold, operating expenses and income tax expense, in connection with transactions which occurred during those periods, as a result of the Dispute.

As a result of the restatement, management identified a material weakness in internal controls as of June 30, 2009 related to the Company's policies and procedures within its purchasing cycle. Specifically, the Company's policies and procedures did not provide for timely evaluation of and revision to management's approach to assessing whether channel discounts were being applied appropriately. Effective in July 2009, management completed modifications to its internal control structure and procedures in order to remediate this weakness. Specifically, the Company implemented new procedures which require all proposed orders to be reviewed and approved by appropriate accounting personnel prior to a vendor purchase order being generated. In addition, new training points have been added to the Modcomp US sales representatives training and orientation processes, so that all sales representatives are made aware of the appropriate authorized distribution channels for each manufacturer whose products we resell.

Through these steps, the Company believes it has appropriately addressed the material weakness that affected its internal control over financial reporting as disclosed above. However, the effectiveness of any system of internal controls is subject to inherent limitations and there can be no assurance that the Company's internal control over financial reporting will prevent or detect all errors. During the period covered by this report, there have been no changes in the Company's internal control over financial reporting that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting other than those discussed above.
