Limited, MODERN MIND TECHNOLOGY LIMITED and its wholly-owned subsidiary ChipMOS TECHNOLOGIES (Shanghai) LTD., and ThaiLin Semiconductor Corp.

S.J. Cheng, Chairman and Chief Executive Officer of ChipMOS, said, "This was another impressive quarter for us with impressive revenue growth, margin improvement, a higher overall utilization level, more favorable pricing and a return to profitability. Our active customer diversification and new business programs led to a 61% increase in revenue compared to the first quarter 2009. We currently have sufficient capacity on hand to support customer forecasts and expected higher utilization levels as we move through the year both of which we expect to help drive further improvements in our gross margin. It has been a challenging downturn but we emerged in a strong position. Our efforts last year to restructure our balance sheet now give us the ability to support our expected growth in 2010. We are also gaining increased confidence in our outlook as we continue to benefit from the broader rebound in the semiconductor sector. We remain committed to these programs and efforts that we expect to help drive a higher valuation for all of our shareholders.

S.K. Chen, Chief Financial Officer of ChipMOS, said, "We continue to lower operating costs and CapEx wherever opportunities exist, while concurrently working to enhance the efficiency of our operations and utilization levels with profitable loading programs. In the first quarter 2010, total capacity utilization improved to 72% from 66% in the fourth quarter 2009, with the most significant increase in LCD driver utilization to 79% in the first quarter 2010 from 50% in the fourth quarter 2009. Our balance of cash and cash equivalents improved to US\$159.5 million as of March 31, 2010.

**Second Quarter 2010 Outlook**

Mr. Cheng continued, Looking into the second quarter, we currently expect revenue to increase 17% to 23% compared to the first quarter 2010, with revenue growth in all of our product segments. We currently expect gross margin on a consolidated basis for the second quarter of 2010 to be in the range between -3% to +3%. The improvement in gross margin compared to the first quarter is primarily due to the significant growth in revenue. Our outlook is based on customer forecasts and the overall market environment. We continue to gain momentum in our business led by our new customer and business diversification efforts, and a previously major customer coming online again. We expect further improvements in our balance sheet as we focus on sustained profitability and when we receive the second tranche of cash consideration related to the sale of our Spansion claim. Overall, we are optimistic in our outlook for the second half of the year. We expect our business is capable of maintaining quarter on quarter growth throughout 2010 as we bring on additional LCD driver capacity from our previously announced transaction with Siliconware Precision Industries Co., Ltd, and as we benefit from forecast higher demand levels in our testing business.

**Use of Non-GAAP Financial Information**

To supplement our consolidated income statement (unaudited) for the three months ended Mar. 31, 2010 on a US GAAP basis, the Company uses a non-GAAP measure of net income (loss) attributable to ChipMOS, which is US GAAP net income (loss) attributable to ChipMOS adjusted to exclude two non-cash items referred to as special items. The two non-cash items excluded are changes in the fair value of the embedded derivative liabilities and amortization of discount on convertible notes. These items are considered by the management to be outside of the Company's core operating results. For example, changes in the fair value of the embedded derivative liabilities relate heavily to the Company's stock price, interest rate and volatility, all of which are difficult to predict and outside of the control of the Company and its management.

For these reasons, management uses non-GAAP adjusted measures of net income (loss) attributable to ChipMOS and non-GAAP earnings (loss) per share attributable to ChipMOS to evaluate the performance of our core businesses and to estimate future core performance. In addition, this information facilitates our management's internal comparisons to our historical operating results as well as to the operating results of our competitors.

The Company's management finds these supplemental non-GAAP measures to be useful, and we believe these non-GAAP measures are useful to investors in enabling them to perform additional analyses of past, present and future operating performance and as a supplemental means to evaluate our core operating results. However, readers are reminded that non-GAAP numbers are merely a supplement to, and not a replacement for, US GAAP financial measures. They should be read in conjunction with the US GAAP financial measures. It should be noted as well that our non-GAAP information may be different from the non-GAAP information provided by other companies.
