Form 6-K

REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

FOR THE MONTH OF July 2011

COMMISSION FILE NUMBER 333-04906

SK Telecom Co., Ltd.

(Translation of registrant's name into English)

11, Euljiro2-ga, Jung-gu

Seoul 100-999, Korea

Edgar Filing: SK TELECOM CO LTD - Form 6-K

(Address of principal executive offices)

(Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.)

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submission to furnish a report or other document that the registration foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's home country), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the Registrant in connection with Rule 12g3-2(b): 82-

QUARTERLY BUSINESS REPORT

(From January 1, 2011 to March 31, 2011)

THIS IS A SUMMARY OF THE QUARTERLY BUSINESS REPORT ORIGINALLY PREPARED IN KOREAN AND IS IN SUCH FORM AS REQUIRED BY THE KOREAN FINANCIAL SERVICES COMMISSION.

IN THE TRANSLATION PROCESS, SOME PARTS OF THE REPORT WERE REFORMATTED, REARRANGED OR SUMMARIZED FOR THE CONVENIENCE OF READERS.

UNLESS EXPRESSLY STATED OTHERWISE, ALL INFORMATION CONTAINED HEREIN IS PRESENTED ON A CONSOLIDATED BASIS IN ACCORDANCE WITH THE INTERNATIONAL FINANCIAL REPORTING STANDARDS ADOPTED FOR USE IN KOREA, OR K-IFRS, WHICH DIFFER IN CERTAIN RESPECTS FROM GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN CERTAIN OTHER COUNTRIES, INCLUDING THE UNITED STATES. WE HAVE MADE NO ATTEMPT TO IDENTIFY OR QUANTIFY THE IMPACT OF THESE DIFFERENCES.

I. COMPANY OVERVIEW**1. Company Overview**

Starting in the first quarter of 2011, SK Telecom Co., Ltd. (the Company) prepares and reports its financial statements under the International Financial Reporting Standards as adopted for use in Korea (K-IFRS). The transition date of the Company and its consolidated companies to K-IFRS is January 1, 2010 and the adoption date is January 1, 2011. The Company's quarterly business report for the quarter ended March 31, 2011 includes the following consolidated subsidiaries:

Name	Date of Establishment	Principal Business	Total Asset as of Dec. 31, 2010 (millions of Won)	Material Subsidiary

2. Company History

March 2008: Purchased shares of SK Broadband Co., Ltd. (formerly Hanaro Telecom)

May 2009: Participated in the public share offering of SK Broadband Co., Ltd.

September 2009: Acquired leased line and related other business of SK Networks Co., Ltd.

February 2010: Purchased shares of Hana Card Co., Ltd.

A. Location of Headquarters

22 Dohwa-dong, Mapo-gu, Seoul (July 11, 1988)

16-49 Hangang-ro 3-ga, Yongsan-gu, Seoul (November 19, 1991)

267 Namdaemun-ro 5-ga, Jung-gu, Seoul (June 14, 1995)

99 Seorin-dong, Jongro-gu, Seoul (December 20, 1999)

11 Euljiro 2-ga, Jung-gu, Seoul (December 13, 2004)

B. Significant Changes in Management

At the 27th General Shareholders Meeting held on March 11, 2011, (1) Sung Min Ha and Jin Woo So were elected as inside directors, (2) Rak Yong Uhm, Jay Young Chung and Jae Ho Cho were re-elected as independent directors, and (3) Jay Young Chung and Jae Ho Cho were re-elected as members of the audit committee. Man Won Jung and Ki Haeng Cho resigned from the Board on March 11, 2011.

C. Change in Company Name

On September 22, 2008, SK Broadband, one of our material consolidated subsidiaries, changed its name to SK Broadband Co., Ltd. from Hanaro Telecom Co., Ltd. to facilitate the sharing of SK Group's corporate culture and brand. Similarly, on September 22, 2008, Broadband Media Co., Ltd., another of our material consolidated subsidiaries, changed its name to Broadband Media Co., Ltd. from Hanaro Media Co., Ltd.

D. Mergers, Acquisitions and Restructuring

SK Telink Co., Ltd.

(1) Merger

On July 22, 2010, the board of directors approved the merger of TU Media Corp. into SK Telink Co., Ltd. effective as of November 1, 2010. In connection with this merger, SK Telink issued 256,763 shares of its common stock.

SK Communications Co., Ltd.

(1) Merger

On June 25, 2007, the board of directors resolved to cause SK Communications Co., Ltd. to merge into Empas Corp., effective as of November 1, 2007. We believe this merger helped to strengthen our competitiveness in the portal services market. In the merger, one share of the former SK Communications was converted into 3.5732182 shares of Empas.

(2) Spin off

On August 6, 2008, the board of directors resolved to spin off its video education business to create Etoos Co., Ltd., effective as of November 1, 2008. The spin off was intended to help the Company to better focus on its core businesses and to give each of our business divisions greater autonomy in making operational decisions based on technical expertise specific to the respective business division.

(3) Acquisition

1. Acquisition of publishing business division

On April 10, 2009, SK Communications sold its publishing business division to Etoos for Won 4,785 million in accordance with the resolution of our board of directors of March 5, 2009.

2. Acquisition of the KUKU division

On July 1, 2009, SK Communications purchased the KUKU division from SK I-Media Co., Ltd., a subsidiary of ours, for a purchase price of Won 1,157 million, in accordance with the June 25, 2009 resolution of our board of directors.

3. Acquisition of the Spicus division

Pursuant to the July 23, 2009 resolution of our board of directors, SK Communications sold the Spicus division, the Company's telephone English education division, to Spicus Inc., a subsidiary of Altos Ventures on August 1, 2009 for a purchase price of Won 1,493 million.

4. Disposition of shares

SK Communications sold all of its shares in Etoos to Cheong Sol pursuant to a resolution of our board of directors of October 19, 2009 and, as consideration, received Won 50,000 million principal amount of convertible bonds.

E. Other Important Matters related to Management Activities

SK Broadband, a material consolidated subsidiary of ours, acquired subscriberships of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for our broadband Internet service and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved purchase of subscriberships, we did not believe such acquisitions rose to the level of purchasing an entire business line from another company or likely to have a material impact on our business, and therefore we believed that such acquisitions did not require resolution of our shareholders.

3. Total Number of Shares

A. Total number of shares

(As of March 31, 2011)

(Unit: shares)

Classification	Share type		Remarks
	Common shares	Total	
I. Total number of authorized shares	220,000,000	220,000,000

	Preferred share			

* Total cash dividend of Won 680,043 million for the year ended December 31, 2009 includes the total interim dividend amount of Won 72,345 million, and the cash dividend amount per share of Won 9,400 includes the interim cash dividend amount of Won 1,000.

* Total cash dividend of Won 669,534 million for the year ended December 31, 2010 includes the total interim dividend amount of Won 72,345 million, and the cash dividend amount per share of Won 9,400 includes the interim cash dividend amount of Won 1,000.

II. BUSINESS

Each company in consolidated entity is separate as a legal entity providing independent services and products. The business is majorly distinguished as a wireless telecommunication business consisting of mobile phone, wireless data, information telecommunication, a fixed line telecommunication business consisting of PSTN, high speed Internet, data and network lease service etc. and other telecommunication business composing of Internet portal service, game etc.

1. Business Overview

[Wireless Business]

A. Industry Characteristics

As of March 31, 2011, the number of domestic mobile phone subscribers reached 51.36 million and, with more than 100% penetration rate, the Korean mobile communication market can be considered to have reached its maturation stage. However, the penetration rate is expected to increase further due to increased use of mobile phones by corporate users resulting from the rapid growth of smart phone markets, as well as the increasing popularity of high-tech mobile devices based on wireless data services such as tablet PC.

The Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced handsets including various smart phones which enable the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite Digital Multimedia Broadcasting (DMB), digital home services, connected workforce services and other related services. In addition, through HSPA+ network commercialized in October 2010 and the LTE network expected to be introduced from July 2011, the B2B business directly resulting in the enhancement of productivity, such as the corporate connected workforce business, is expected to grow rapidly.

B. Growth Potential

(Unit: 1,000 persons)

Classification		As of March 31,		As of December 31,		
		2011	2010	2009	2008	2007
	SK Telecom	25,989	25,705	24,270	23,032	21,968
Number of subscribers	Others (KT, LGU+)	25,376	25,062	23,675	22,575	21,529
	Total	51,365	50,767	47,944	45,607	43,497

(Source: Korea Communications Commission website)

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Although demand has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. In addition, sales revenue related to data services is expected to increase due to the increasing popularity of smart phones and wireless Internet. Business-to-business segment that creates added values by adding additional solutions and applications is also growing. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

Historical market share of the Company:

(As of March 31, 2011)

(Unit: %)

D. Business Overview and Competitive Strengths

We provide wireless telecommunications services, characterized by our competitive strengths in handheld device, affordable pricing, network coverage and an extensive contents library. With the scheduled commencement of services employing LTE technology, we expect to be able to provide our wireless subscribers with access to high-quality video contents and services, interactive multimedia games and other new services. We are also actively fostering the growth of 11th Street, T Store and commerce markets that we believe have a strong growth potential in open platform environments. We are also exploring new business opportunities with strong growth potential, such as message services, SNS services, N Screen-based Personal Media and other services. In the business-to-business services, we are planning to strengthen strategic alliances to develop and commercialize industry-specific custom solutions in healthcare, education and other industries.

As of March 31, 2011, we had approximately 26.0 million wireless subscribers throughout Korea and our share of the Korean wireless market was approximately 50.6%. On April 16, 2011, we became the first in Korea to launch pilot LTE services in the 800 MHz band and we are making preparations to commence commercial LTE services by July 2011. We expect that the faster data transmission speed of the LTE network will allow us to offer significantly improved wireless data transmission services, allowing us to more efficiently handle the fast growing data traffic and provide our subscribers with access to high-quality video contents and services, interactive multimedia games and other new services that thus far have been accessible only in fixed-line environments. In addition, we continue to expand our WCDMA network capacity as well to meet continually growing consumer demand, including by phased expansion of our 6FA coverage areas, data transmission-only FA and 6 sector solution areas.

As for our platform business, which has been identified as one of our key growth areas, we are pursuing the growth of T Store and commerce markets that we believe have a strong growth potential in open platform environments. 11th Street, an online shopping mall launched by us in 2008, has shown strong growth and we believe it may be possible for 11th Street to reach a break-even point this year. In addition, with the increased use of smartphones, we plan to launch a mobile version of 11th Street to further exploit the m-Commerce opportunities, as well as exploring new business opportunities with strong growth potential, such as message services, SNS services, N Screen-based Personal Media and other services.

[Fixed Line Business]

A. Industry Characteristics

The Korean telecommunications industry is currently characterized by the introduction of smartphones, tablet computers and other devices with enhanced mobility and the advent of cloud computing, mobile offices and other information and communications technology. In addition, mergers among fixed-line operators and wireless operators have accelerated the convergence within the telecommunications sector, creating a market structure in which groups with both fixed-line and wireless capabilities compete for greater market share to secure a more solid footing in the market. Spurred on by the introduction of various bundled products, growth in the subscriber base for IP TV services and a paradigm shift in the voice telephone market towards Internet-based telephone services, the broadband and fixed-line telecommunications market is playing a key role in the accelerated consolidation of the service providers as well as heightened competition in a growing market. The increased usage of smartphones has greatly increased the demand for wireless data transmissions, thereby putting into greater relief the importance of fixed-line networks.

We believe the transition to digital media-based TV services will accelerate in 2012 when analog open air TV broadcast will come to an end. We expect stronger competition in new services such as smart TVs and various convergence products, such as smartphones and N Screen services employing tablet computers.

B. Growth Potential

C. Domestic and Overseas Market Conditions

The broadband and fixed-line telecommunications market comprises all residents in Korea who have a need for broadband Internet, telephone, IP TV or other fixed-line services, regardless of their sex, age and income levels, and extends to all geographical areas in Korea. Most foreign countries deem fixed-line telecommunications services as part of their national infrastructure, and therefore at this moment reliance on domestic service providers is near 100%. The broadband Internet market and telephone services market are near saturation, but there is a steady increase in number of subscribers. In addition, there has been a strong growth in the market for IP TV, smart office services and other integrated convergence products that are becoming the new media platform in the market, resulting in faster growth in the business-to-business market.

D. Business Overview and Competitive Strengths

Our broadband and fixed-line services are largely carried out by SK Broadband, which is a material consolidated subsidiary of SK Telecom. SK Broadband is engaged in providing telecommunications, broadcasting and new media services and various other services that are permitted to be carried out by SK Broadband under relevant regulations, as well as business activities that are directly or indirectly related to providing those services. With the adoption of K-IFRS in 2011, our broadband and fixed-line services segment also includes the following services provided by certain other subsidiaries of SK Telecom subject to consolidation under K-IFRS: multimedia services and IP TV services (Broadband Media Co., Ltd.); telemarketing services (Broadband CS Co., Ltd.); and telecommunications-related construction and lease services (Broadband D&M Co., Ltd.).

SK Broadband, which in 1999 became the first company in the world to commence commercial ADSL services, has strengthened its co-marketing efforts with SK Telecom. The co-marketing efforts and the enhanced competitiveness of the bundled products have resulted in expanded subscriber base across all of our businesses, including broadband Internet, telephone and IP TV. In particular, we have positioned ourselves to focus on corporate customer services as one of the key strategic areas for mid- to long-term growth, and our efforts to exploit new information and communications technology based businesses have led to revenue growth and strengthening of our competitiveness in the emerging business-to-business market.

SK Telink, a material consolidated subsidiary of ours, provides international telecommunications service. SK Telink has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. We launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed us to expand our international calling services to fixed-line international calling services. In addition, in 2010, we were again ranked first in the four major independent customer satisfaction surveys, including the Korea Nation Customer Satisfaction Index, after having been ranked first in 2009. The revenue from our international calling services in 2010 was Won 323.4 billion, which represents a 7% growth from 2009.

[Other Business]

A. Industry Characteristics

Although the number of Internet subscribers and penetration rate of Internet services in general have remained stagnant, Internet advertising has seen continued growth despite such constraints in growth potential of the Internet services market. We believe the growth of the Internet display advertising market owes in large part to its cost effectiveness compared to traditional off-line advertising, the increase in Internet advertising budgets among corporate advertisers, development of new Internet advertising products and increases in Internet advertising fees. In addition, search-based Internet advertising has continued its growth as a result of increase in pay-per-click pricing due to heightened demand by a growing number of advertisers and the increase in the overall number of clicks.

B. Growth Potential

In the past 10 years, the number of Internet subscribers in Korea increased by approximately 18 million from approximately 19.0 million in 2000 to approximately 37.0 million in 2010, representing a 7.1% compounded annual growth rate. The number of Internet subscribers saw an annual growth rate of at least 5.0% in the first half of the decade; however, starting in 2006, the annual growth rate dropped to around 1% as the market became more mature and stable. To be more specific, the number of Internet subscribers increased by 28.0% in 2001 as compared to 2000, and the annual growth rate in 2002 was 7.8%, in 2003, 11.2%. In 2004, which recorded an growth rate of 8.1%, the total Internet subscribership surpassed 30 million for the first time. In contrast, the annual growth rate in 2007, 2008, 2009 and 2010 were 1.9%, 1.7%, 1.1% and 1.2%, respectively. (Source: Korea Internet & Security Agency).

C. Domestic and Overseas Market Conditions

(1) Market Characteristics

As more Internet subscribers are going beyond being passive consumers of information to active creators of contents, portal service providers are becoming more focused on providing services customized to such subscribers' individual characteristics and usage patterns. In addition, the mobile Internet services market is growing with the increased usage of smartphones, which we believe would lead to increased production and dissemination of mobile contents. We plan to continue developing various services that would heighten the masses of Internet subscribers and their activities on the Internet.

(2) Competition

Internet portal service providers provide more or less identical types of services, including search, social networking sites, email service, news and other contents. However, for each type of service, a small number of service providers with specialized expertise are enjoying relatively large market shares. However, the portal services market has a relatively light entry barrier and there is increased competition from new entrants. In addition, the ease of access to services provided by competitive foreign providers is also adding to a strongly competitive market environment. We plan to continue to playing a leading role in this market by building on our Cyworld network, which is the largest social networking site in Korea, and its contents library, the brand power of NATE portal service, which is our integrated wired and wireless Internet platform, the instant text and multimedia message services provided through NATE-ON and other key areas in which we believe we have the competitive advantage.

D. Business Overview and Competitive Strengths

SK Communications, a material consolidated subsidiary of SK Telecom, provides integrated portal services through NATE, social networking services through Cyworld and instant messaging services through NATE-ON. Key sources of revenue for SK Communications is display advertising, search engine-based advertising, and contents and other services. Display advertising consists of image, video and Flash-based multimedia advertising carried on NATE, Cyworld and NATE-ON and aims to give greater exposure to the advertiser's brand name to the public. The increased effectiveness of on-line media as an advertising outlet has resulted in greatly expanded advertiser base, and the increasing variety in the format of advertising have all contributed to the growth of display advertising. Search engine-based advertising refers to the type of advertising that embeds advertisements within search results produced by searches of certain keywords on the NATE portal site. Search engine-based advertising has a certain appeal to small and medium-sized advertisers. Contents and other services include sales of on-line items to be used on Cyworld, contents sales and providing certain types of services. Revenues from contents and other services are generated through sales of on-line digital items through fixed-line Cyworld services and revenues generated by usage of mobile Cyworld services, which are shared with mobile phone service operators, as well as revenues from NATE-ON instant messaging, custom decorations for mobile phones, cartoon strips, fortunetelling, games and other contents services. In addition, SK Communications receives revenue from its services agreement with SK Telecom in connection with operation of WAP wireless NATE services. SK I-Media, Co., Ltd., a subsidiary of SK Communications, is engaged in software development and distribution, Internet contents services, and providing Internet systems solutions.

SK Communications was able to record a positive net income in 2010 as a result of increased synergy from convergence of a variety of new and existing services and its continued business restructuring measures. SK Communications' revenue in 2010 was Won 242.3 billion, which was the largest in its history and represented a 21% increase from 2009.

2011 will be a year in which SK Communications will aim to take big strides in its growth as it builds on the results of 2010 and strive to become the leading Internet service provider in Korea. Key strategic goals for SK Communications in 2011 are to strengthen its social networking site, Cyworld, and to become the service provider with the largest market share in the smart device contents market. We will aim to further strengthen our competitiveness by taking such initiatives as integrating the wide range of services provided through NATE and NATE-ON to our social networking services, and adding a social networking search service in our NATE search engine. Furthermore, we will pursue expansion into foreign markets by further exploiting the advantages of our social networking services that are unique to Cyworld, as well as improving its user interface to make it accessible to users all around the world, with an aim to establishing regional hubs for our social networking services.

5. Derivative TransactionsSK Telecom Co., Ltd.

A. Currency Swap

(1) Purpose of Contracts: Hedging of risks related to fluctuations in currency exchange rates and interest rates

(2) Contract Terms

Currency swap contract applying cash flow risk hedge accounting

The Company has entered into a currency and interest rate swap contract with Credit Agricole Corporate & Investment Bank to hedge the foreign currency risk and the interest rate risk of U.S. dollar denominated floating rate long-term borrowings with face amounts totaling US\$100,000,000 borrowed on October 10, 2006. As of March 31, 2011, in connection with this unsettled currency and interest rate swap contract, an accumulated loss on valuation of derivatives amounting to Won 3,186,132,000 (excluding tax effect totaling Won 456,795,000 and foreign exchange translation loss arising from U.S. dollar denominated long-term borrowings totaling Won 15,920 million) was accounted for as accumulated other comprehensive loss.

In addition, the Company has entered into a currency and interest rate swap contract with two banks including HSBC in order to hedge the foreign currency risk and the interest rate risk of unguaranteed Japanese yen denominated bonds (56-2) with face amounts totaling JPY 12,500,000,000 issued on November 13, 2007. As of March 31, 2011, in connection with this unsettled currency and interest rate swap contracts, an accumulated gain on valuation of derivatives amounting to Won 1,822,556,000 (excluding tax effect totaling Won 1,012,592,000 and foreign exchange translation loss arising from unguaranteed Japanese yen denominated bonds totaling Won 62,442,968,000) was accounted for as accumulated other comprehensive gain.

In addition, the Company has entered into a currency and interest rate swap contract with Mizuho Corporate Bank in order to hedge the foreign currency risk and the interest rate risk of unguaranteed Japanese yen denominated bonds (59-2) with face amounts totaling JPY 3,000,000,000 issued on January 22, 2009. As of March 31, 2011, in connection with this unsettled currency and interest rate swap contract, an accumulated gain on valuation of derivatives amounting to Won 2,413,651,000 (excluding tax effect totaling Won 680,774,000 and foreign exchange translation gain arising from unguaranteed Japanese yen denominated bonds totaling Won 6,171,748,000) was accounted for as accumulated other comprehensive gain.

In addition, the Company has entered into a currency and interest rate swap contract with The Bank of Tokyo-Mitsubishi in order to hedge the foreign currency risk and the interest rate risk of unguaranteed Japanese yen denominated bonds (60-2) with face amounts totaling JPY 5,000,000,000 issued on March 5, 2009. As of March 31, 2011, in connection with this unsettled currency and interest rate swap contract, an accumulated gain on valuation of derivatives amounting to Won 1,101,418,000 (excluding tax effect totaling Won 310,657,000 and foreign exchange translation gain arising from unguaranteed Japanese yen denominated bonds totaling Won 12,013,476,000) was accounted for as accumulated other comprehensive gain.

In addition, the Company has entered into a currency swap contract with six banks including Morgan Stanley to hedge the foreign currency risk of unguaranteed U.S. dollar denominated bonds (with face amounts totaling US\$400,000,000) issued on July 20, 2007, and has applied cash flow risk hedge accounting to this foreign currency swap contract starting from May 12, 2010. Accordingly, as of March 31, 2011, in connection with this unsettled foreign currency swap contract, an accumulated loss on valuation of currency swap of Won 27,259,253,000 that has accrued since May 12, 2010 (excluding tax effect totaling Won 7,688,507,000 and foreign exchange translation gain arising from unguaranteed U.S. dollar denominated bonds totaling Won 14,397,710,000) was accounted for as accumulated other comprehensive loss. Meanwhile, a loss on valuation of currency swap of Won 129,806,021,000 incurred prior to the date of applying cash flow risk hedge accounting was charged to current operations.

B. Interest Rate Swap

(1) Purpose of Contracts: Hedging of risks related to fluctuations in interest rates

(2) Contract Terms

Interest rate swap contract to which the cash flow risk hedge accounting is applied:

The Company has entered into an interest rate swap contract with three banks including Nonghyup Bank in order to hedge the interest rate risk of long-term borrowings (totaling Won 500 billion) during the period between July 28, 2008 and August 12, 2011. As of March 31, 2011, in connection with unsettled interest rate swap contract to which the cash flow risk hedge accounting is applied, an accumulated loss on valuation of derivatives amounting to Won 2,641,683,000 (excluding tax effect totaling Won 843,387,000) was accounted for as accumulated other comprehensive loss.

Interest rate swap contract to which the hedge accounting is not applied

The Company has entered into an interest rate swap contract with two banks including DBS in order to hedge the interest rate risk of floating rate foreign currency bonds with face amounts totaling US\$220,000,000 issued on April 29, 2009. In connection with this unsettled interest rate swap contract, gain on valuation of interest rate swap of Won 1,262,898,000 and loss on valuation of interest rate swap of Won 1,642,154,000 for the three month periods ended March 31, 2011 and March 31, 2010, respectively, were charged to current operations.

SK Broadband Co., Ltd.

SK Broadband has entered into a currency swap contract with six financial institutions including the Korea Development Bank to hedge the foreign currency risk of U.S. dollar denominated bonds (with face amounts totaling US\$500,000,000) issued on February 1, 2005, and has applied cash flow risk hedge accounting to this foreign currency swap contract.

2. Contingent Liabilities

[SK Telecom]

- A. Material Legal Proceedings
- (1) Claim for Copyright License Fees regarding Coloring Services

Edgar Filing: SK TELECOM CO LTD - Form 6-K

On May 7, 2010, Korea Music Copyright Association (KOMCA) filed a lawsuit with the court demanding that the Company pay KOMCA license fees for the Company's Coloring services. The court rendered a judgment on February 18, 2011 against the Company ordering the Company to pay Won 570 million to KOMCA. The Company appealed the judgment to the appellate court on February 28, 2011. The Company plans to vigorously defend itself in the appellate court by emphasizing the character of service fees for Coloring services and the abuse of copyright by monopolistic or oligopolistic businesses. While the Company does not expect immediate impact on its business and financial condition from the litigation because the judgment amount is Won 570 million and the final outcome of the litigation has not been decided, the Company may be required to pay on-going license fees in the future if it loses in the final judgment.

* Actual impact on the Company's business and financial condition from the litigation may be different from the Company's expectation stated above.

B. Other Matters

The Company has no other blank bills, mortgage bills, assumption of debt agreement or other contingent liabilities.

[SK Broadband]

A. Material Legal Proceedings

(Unit: thousand won)

Description of Proceedings	Date of Commencement of Proceedings	Amount of Claim	Status
Claim for Cancellation of Korea Fair Trade Commission's Penalty Reassessment	September 2009	1,810,000	On appeal

Other claims and proceedings		301,155	

(Won)

3,721,149

B. Other contingent Liabilities

(1) As of March 31, 2011, SK Broadband has a credit facility of up to Won 200 billion with Hana Bank and three other financial institutions.

(2) SK Broadband is subject to various restrictions under the indentures and other documents governing outstanding series of bonds. Under the documents governing some of outstanding series of bonds issued in Korea, SK Broadband must maintain a leverage ratio of 1,000% or less and is restricted from selling, transferring, leasing or otherwise disposing of assets that, in the aggregate, exceed 20 times its capital in any fiscal year.

In addition, under the indentures governing some of the series of bonds issued outside of Korea, SK Broadband is subject to a change of control put provision which is triggered if both of the following occurs: (i) any person (other than the AIG-Newbridge-TVG consortium) acquires 45% or more of SK Broadband's outstanding capital stock and (ii) in connection with such changes of control, S&P or Moody's downgrades SK Broadband's credit rating. Upon the occurrence of such change of control event, SK Broadband is obligated to make an offer to purchase all of the outstanding bonds for a purchase price of 101% of principal amount. As of March 31, 2011, SK Broadband is in compliance with the provisions of the indentures governing such series of bonds.

(3) During the three months ended March 31, 2011, in connection with Broadband Media Co., Ltd.'s financing, SK Broadband granted security interest to the lenders with respect to its real estate assets and certain short-term investment securities, including certificates of deposit, for a period of 1 year to secure Broadband Media's obligations under its financing arrangements. As of March 31, 2011, Hana Bank, Woori Bank, Kookmin Bank and KEB have security interest over SK Broadband's real estate assets in the amounts of Won 65 billion, Won 52 billion, Won 52 billion and Won 26 billion, respectively, and KEB, Hana Bank, NH Bank and Woori Bank have security interests over SK Broadband's short-term investment securities in the amounts of Won 65 billion, Won 35 billion, Won 34 billion and Won 20 billion, respectively.

In addition, during the three months ended March 31, 2011, SK Broadband agreed to grant security interest in its real estate assets to secure up to Won 16.9 billion to Kookmin Bank in connection with its loan to Broadband CS Co., Ltd.

(4) With respect to finance leases of Broadband Media Co., Ltd., an affiliate of SK Broadband, SK Broadband has repurchase obligations owed to KDB Capital, Cisco Systems Capital Korea, Macquarie Capital Korea and KEB Capital in the amounts of Won 5.7 billion, Won 35.6 billion, Won 10.4 billion and Won 2.3 billion, respectively.

(5) SK Broadband has obtained the approval of its board of directors for the granting of security interest in certain of its bank deposits and financial assets in connection with providing financing assistance to the employees for their contributions to the Employee Stock Ownership Association. As of March 31, 2011, SK Broadband has granted security interest in Won 7.4 billion of financial assets.

(6) In connection with office building leases, SK Broadband has granted a kyun mortgage on certain of its real estate assets to secure up to Won 21.8 billion.

(7) SK Broadband has leases with, among others, Seoul Metro, Seoul Metropolitan Rapid Transit Corp., LG U+, KEPCO and Dreamline for use of subway facilities, optical cable facilities, dedicated cables and other related telecommunications facilities. The lease expenses associated with such leases are accounted for as current expense.

(8) SK Broadband has services agreement with respect to operation of dedicated cable lines and other telecommunications business agreements with SK Telecom.

3. Status of sanctions, etc.

[SK Telecom]

Due to the Company's ineffective measures taken with respect to phone numbers that are used for sending illegal unsolicited bulk messages, the Korea Communications Commission, on April 23, 2009, ordered the Company to improve its work procedures. The Company completed the upgrade of the related computer system to prevent illegal messages on October 10, 2009.

On September 2, 2009, the Korea Communications Commission ordered the Company to improve its work procedures in a case relating to the obstruction of subscribers' utilization of wireless Internet services. The Company completed the improvement of the procedures in consultation with the Korea Communications Commission by December 8, 2009.

On October 13, 2009, the Korea Communications Commission imposed on the Company a fine of Won 140 million and a newspaper notice order in a case relating to the subscription for mobile telephone services using national identification numbers of the deceased and the Company's failure to verify the required documents. The Company implemented the improved work procedures to strengthen identification process at the time of subscription for mobile telephone services in January 2010.

On December 2, 2010, the Korea Communications Commission imposed on the Company a fine of Won 6.2 billion and issued a correction order in a case relating to the obstruction of subscribers' utilization of wireless Internet services. The Company paid the fine and completed the improvement of the procedures in consultation with the Korea Communications Commission by March 9, 2011.

In addition, on January 21, 2009, the Company was sanctioned for unfair business practices with a fine of Won 1,268 million by the Fair Trade Commission of Korea along with a correctional order of its policy of restricting certain rate plan subscribers from using third party portal contents. The Company has paid the fine and has taken efforts to educate applicable divisions of the issue and to improve the level of the voluntary compliance program to comply with fair trade laws to prevent a repeat of the same violation.

Also on February 3, 2009, the Company received a correctional order and a fine of Won 500 million from the Fair Trade Commission of Korea involving an unfair trade interference practice including refusal of applications for subscription for certain PDA phones distributed by third party manufacturers. The Company filed a suit at the Seoul High Court, which found in favor of the Company and cancelled the Fair Trade Commission's correctional order and fine. On August 19, 2010, the Supreme Court of Korea rejected the appeal by the Fair Trade Commission of Korea and finally confirmed the Seoul High Court's decision. Accordingly, the Fair Trade Commission's correctional order was cancelled and the Company was refunded the fine and interest in the amount of Won 538 million.

On April 8, 2010, the Company received a correctional order from the Fair Trade Commission of Korea for a violation of the Act on Fair Labeling and Advertising relating to 11th Street (the Company's online shopping mall). In response thereto, the Company has been taking efforts to prevent a repetitive violation including thorough pre-review of the advertisement and marketing activities of 11th Street and appropriate education for relevant employees.

On February 28, 2011, the Company received a correctional order from the Fair Trade Commission of Korea for violation of Article 19 of the Korean Monopoly Regulation and Fair Trade Act, or the Fair Trade Act, and was imposed a fine of Won 1,964 million with respect to providing Non-DRM on-line music content services. We plan to publicly disclose details of our response after receiving the official order.

On April 22, 2011, the Company received a correctional order for violation of Article 21 of the Electronic Commerce Act and was imposed a fine of Won 5 million. The Company intends to implement the correctional order.

[SK Broadband]

On July 22, 2009, SK Broadband received a warning from the Financial Supervisory Service of Korea with respect to its omission to state a material fact that could affect investors' investment decision when it responded to the Korea Exchange's request for disclosure regarding SK Telecom's acquisition of SK Broadband shares from AIG-Newbridge-TVG consortium, then-largest shareholder of SK Broadband.

In addition, on January 21, 2009, SK Broadband was sanctioned for unfair business practices with a fine of Won 1,268 million by the Fair Trade Commission of Korea along with a correctional order of its policy of restricting certain rate plan subscribers from using third party portal contents. SK Broadband has paid the fine and has taken efforts to educate applicable divisions of the issue and to improve the level of the voluntary compliance program to comply with fair trade laws to prevent a repeat of the same violation.

[Loen Entertainment]

On February 2, 2011, Loen Entertainment Inc. received a correctional order from the Fair Trade Commission of Korea for violation of Article 19 of the Fair Trade Act and was imposed a fine of Won 9,579 million with respect to providing Non-DRM on-line music content services. Loen Entertainment plans to publicly disclose details of its response after receiving the official order.

Independent Accountants' Review Report

English Translation of a Report Originally Issued in Korean

To the Shareholders and Board of Directors of

SK Telecom Co., Ltd

Report on the consolidated financial statements

We have reviewed the accompanying consolidated financial statements of SK Telecom Co., Ltd. and subsidiaries (the Company). The financial statements consist of the consolidated statements of financial position as of March 31, 2011 and December 31, 2010, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the three months ended March 31, 2011 and 2010, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

The Company's management is responsible for the preparation and fair presentation of the accompanying consolidated financial statements and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Independent accountants' responsibility

Our responsibility is to express a conclusion on the accompanying consolidated financial statements based on our reviews.

We conducted our reviews in accordance with standards for review of interim financial statements in the Republic of Korea. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Review conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements of the Company are not presently fairly, in all material respects, in accordance with K-IFRS 1034 Interim Financial Reporting, and the requirements of K-IFRS 1101, First-time Adoption of Korean International Financial Reporting Standards, relevant to interim financial reporting.

Deloitte refers to one or more of Deloitte Touche Tohmatsu, a Swiss Verein, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/kr/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu and its member firms.

Our reviews also comprehended the translation of the Korean won amounts into U.S. dollar amounts and nothing has come to our attention that causes us to believe that such translation has not been made in conformity with the basis stated in Note 2. Such U.S. dollar amounts are presented solely for the convenience of readers of financial statements.

Accounting principles and review standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations, changes in shareholders' equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and review standards and their application in practice.

K TELECOM CO., LTD. AND SUBSIDIARIES**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE THREE MONTHS ENDED MARCH 31, 2011 AND 2010****1. GENERAL**

SK Telecom Co., Ltd. (SK Telecom) was incorporated in March 1984 under the laws of Korea to engage in providing cellular telephone communication services in the Republic of Korea. SK Telecom Co., Ltd. and its subsidiaries (the Company) mainly provide wireless telecommunications in the Republic of Korea. The Company's common shares and depositary receipts (DRs) are listed on the Stock Market of Korea Exchange, the New York Stock Exchange and London Stock Exchange. As of March 31, 2011, the Company's total issued shares are held by the following:

	Number of shares	Percentage of total shares issued (%)
SK Holdings, Co., Ltd.	18,748,452	23.22
Tradewinds Global Investors, LLC	4,050,518	5.02
POSCO Corp.	2,341,569	2.90
Institutional investors and other minority stockholders	45,954,460	56.91
Treasury stock	9,650,712	11.95
	80,745,711	100.00

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company maintains its official accounting records in Republic of Korean won (Won) and prepares consolidated financial statements in conformity with Korean statutory requirements and Korean International Reporting Standards (K-IFRS), in the Korean language (Hangul). Accordingly, these consolidated financial statements are intended for use by those who are informed about K-IFRS and Korean practices. The accompanying consolidated financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, income, comprehensive income, changes in shareholders' equity or cash flows, is not presented in the accompanying consolidated financial statements.

The accompanying consolidated financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers of financial statements and has been made at the rate of (Won)1,097.25 to US\$1.00, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the three months ended March 31, 2011. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

a. Basis of Presentation

The Company has adopted the Korean International Financial Reporting Standards (K-IFRS) for the annual period beginning on January 1, 2011. In accordance with K-IFRS 1101 First-time adoption of International Financial Reporting Standards , the transition date to K-IFRS is January 1, 2010. The transition adjustments to K-IFRS are summarized in Note 3.

The Company's interim consolidated financial statements for the three months ended March 31, 2011 and 2010 are prepared in accordance with K-IFRS 1034 Interim Financial Reporting .

Edgar Filing: SK TELECOM CO LTD - Form 6-K

There may be newly or amended K-IFRS and interpretations that are effective subsequent to the current period-end during 2011 or during 2012 which early-adoption is permitted during 2011. Accordingly, accounting policies that are used for the preparation of the interim consolidated financial statements may be different from the policies that are used for the preparation of the first annual consolidated financial statements in accordance with K-IFRS as of and for the period ending December 31, 2011. Currently, enactments and amendments of the K-IFRSs are in progress, and the financial information presented in the interim financial statements may change accordingly in the future.

Major accounting policies used for the preparation of the interim consolidated financial statements are stated below. Unless stated otherwise, these accounting policies have been applied consistently to the financial statements for the current period and accompanying comparative period.

The interim consolidated financial statements have been prepared on the historical cost basis except for certain non-current assets and financial instruments that are measured at revalued amounts or fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

b. Basis of Consolidation

The consolidated financial statements include the accounts of SK Telecom and the following controlled subsidiaries as of March 31, 2011 (in millions of Korea won, except for share data).

The consolidated financial statements incorporate the financial statements of the Company and entities (including special purpose entities) controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Income and expenses of subsidiaries acquired or disposed of during the current period are included in the consolidated statement of income and comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used the Company.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company.

When the Company loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. When assets of the subsidiary are carried at revalued amounts or fair values and the related cumulative gain or loss has been recognized in other comprehensive income and accumulated in equity, the amounts previously recognized in other comprehensive income and accumulated in equity are accounted for as if the Company had directly disposed of the relevant assets (i.e. reclassified to profit or loss or transferred directly to retained earnings).

c. Business Combination

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Company, liabilities incurred by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange for control of the acquiree. Acquisition-related costs are generally recognized in profit or loss as incurred.

Goodwill is measured as the excess of the sum of: a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree, and c) the fair value of the acquirer's previously held equity interest in the acquiree (if any); over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net fair value of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of: a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree, and c) the fair value of the acquirer's previously held interest in the acquiree (if any); the excess is recognized immediately in profit or loss as a bargain purchase gain.

d. Foreign Currency Exchange

The individual financial statements of each Company entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each Company entity are expressed in Korean Won, which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the period in which they arise except for:

exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

exchange differences on transactions entered into in order to hedge certain foreign currency risks below for hedging accounting policies); and

exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations are expressed in Korean won using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity. On the disposal of a foreign operation, all of the accumulated exchange differences in respect of that operation attributable to the Company are reclassified to profit or loss.

e. Cash Equivalents

Cash and cash equivalents include cash, bank balances and short-term highly liquid investments with an original maturity of three months or less.

f. Financial Assets

All financial assets are recognized and derecognized on trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into the following specified categories: financial assets at fair value through profit or loss (FVTPL), held-to-maturity investments, available-for-sale financial assets and loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

1) *Classification of financial assets*

1-1) *Financial assets at fair value through profit or loss (FVTPL)*

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL. A financial asset is classified as held for trading if it has been acquired principally for the purpose of selling it in the near term or it is a derivative or embedded derivative separated from contracts that is not designated and effective as a hedging instrument. Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. Transaction costs directly attributable to the acquisition of financial assets at FVTPL are recognized immediately in profit or loss.

1-2) *Held-to-maturity financial assets*

Non-derivatives financial assets with fixed or determinable payments and fixed maturity dates that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortized cost using the effective interest method less any impairment, with revenue amortized on an effective yield basis.

1-3) *Available-for-sale financial assets*

Non-derivatives financial assets that are not classified as at held-to-maturity, held-for-trading; designated as at fair value through profit or loss; or loans and receivables are classified as at available-for-sale financial assets. Available-for-sale financial assets are initially recognized and measured at fair value. Unquoted equity investments whose fair value cannot be measured reliably are carried at cost. Gains and losses arising from changes in fair value are recognized in other comprehensive income and accumulated in the investments revaluation reserve, with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. Dividends on available-for-sale financial assets are recognized in profit or loss when the Company's right to receive the dividends is established.

1-4) *Loans and receivables*

Non-derivatives financial assets like trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

2) *Impairment of financial assets*

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For listed and unlisted equity investments classified as available-for-sale financial asset, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in the period.

With the exception of available-for-sale equity securities, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect of available-for-sale equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

3) *Derecognition of financial assets*

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

g. *Inventories*

Inventories are stated at the acquisition cost using the average method. During the period, a perpetual inventory systems is used to value inventories, which is adjusted to the physical inventory counts performed at the period end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses.

h. *Investments in Associates*

Associates are those entities over which the Company has significant influence but doesn't control or has joint control, over the financial and operating policies. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with K-IFRS 1105

Non-current Assets Held for Sale and Discontinued Operations . Under the equity method, an investment in an associate is initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the associate. When the Company's share of losses of an associate exceeds the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate), the Company discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and assessed for impairment. Any excess of the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss. When the Company or its subsidiary transacts with its associate, unrealized gains from the transactions are eliminated to the extent of interests in the associate and unrealized losses are eliminated too, so far as the transactions provide a basis of impairment for the assets transferred.

When necessary, the Company may revise an associate's financial statements, to apply consistent accounting policies as the Company, prior to applying the equity method of accounting for its investment in the associate.

i. **Property and Equipment**

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. The cost of an item of property and equipment is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in carrying amount of an asset or as an asset if it is probable that future economic benefits associated with the assets will flow into the Company and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

Depreciation is computed using the straight-line method over the estimated useful lives of the related assets as follows:

Assets	Useful lives (years)
Buildings and structures	15 ~ 50
Machinery	3 ~ 15
Other	4 ~ 10

The Company reviews the depreciation method, the estimated useful lives and residual values of property and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

j. **Investment Property**

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.

While land is not depreciated, all other investment property is depreciated based on the respective assets estimated useful lives ranging from 15 ~ 50 years using the straight-line method.

k. Goodwill

Goodwill is measured as the excess of the sum of: a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree, and c) the fair value of the acquirer's previously held equity interest in the acquiree (if any); over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. Goodwill is not depreciated, but tested for impairment at the end of each annual reporting period. Goodwill is carried at cost less accumulated impairment losses and the impairment losses are not reversed.

l. Intangible Assets

Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives ranging from 3 ~ 20 years. The Company reviews the amortization method, the estimated useful lives and residual values of intangible assets at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

Intangible assets with indefinite useful lives are not amortized, but tested for impairment at the end of each annual reporting period. At the case of amortizable intangible assets, the Company reviews impairment at each time whether the carrying amount is not recoverable.

m. Government Grants

Government grants are not recognized until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grants whose primary condition is that the Company should purchase, construct or otherwise acquire non-current assets are recognized as less at the book value in the consolidated statement of financial position and transferred to profit or loss on a systematic basis to decrease depreciation expenses over the useful lives of the related assets.

Government grants related to revenue are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes as expenses the related costs for which the grants are intended to compensate. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Company with no future related costs are recognized in profit or loss in the period in which they become receivable.

n. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

o. Financial Liabilities and Equity Instruments issued by the Company

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement. And the financial liabilities are classified as either financial liabilities at fair value through profit or loss (FVTPL) or other financial liabilities .

1) *Equity instruments*

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

2) *Financial liabilities at FVTPL*

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as FVTPL. A financial liability is classified as held for trading if it has been acquired principally for the purpose of repurchasing it in the near term or it is a derivative, including embedded derivative separated from contracts, which is not designated and effective as a hedging instrument.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability.

3) *Other financial liabilities*

Other financial liabilities are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

4) *Derecognition of financial liabilities*

The Company derecognizes financial liabilities when the Company's obligations are discharged, cancelled or they expire. An exchange between an existing borrower and lender of debt instruments with substantially different terms, or a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liabilities derecognized and the consideration paid is recognized in profit or loss.

p. *Lease*

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are initially recognized as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on borrowing costs. Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

q. Derivative Financial Instruments

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument. For derivative instruments designated as hedges, the effective portions of the gains or losses on the hedging instruments are recorded as part of other comprehensive income (loss)

r. Retirement Benefit Obligation

The retirement benefit obligation recognized in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, and as reduced by the fair value of plan assets.

For defined retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each reporting period. The present value of the defined benefit obligation is denominated in the same currency in which the benefits are expected to be paid, and calculated at the discount rate which is the yield at the reporting date on high quality corporate bonds that have maturity dates approximating the terms of the Company's obligation. The Company recognizes all actuarial gains and losses arising from defined benefit plans as other comprehensive income (loss) and records at retained earnings immediately, which is not reclassified to current operation thereafter.

s. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When the effect of the time value of money is material, the provision is measured using the cash flows estimated to settle the present obligation. Discount rate is pre-tax interest rate reflecting inherent risk of liabilities and market's valuation on the present value of monetary. Changes in provisions caused by elapse of time are the financial cost as incurred and recognized in profit or loss.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during the period.

t. Revenue Recognition

Revenue from the sale of goods and rendering of services in the course of ordinary operating activities is measured at the fair value of the consideration received or receivable. Revenues are realized or realizable and earned when the Company has persuasive evidence of an arrangement, the goods have been delivered or the services have been rendered to the customer, sales price is fixed or determinable and collectability is reasonably assured.

The Company's revenue is principally derived from telecommunication service including data service, broadband internet and fixed-line telephone service. Telecommunication service consists of fixed monthly charges, usage-related charges and non-refundable activation fees. Fixed monthly charges are recognized in the period earned. Usage-related charges are recognized at the time services are rendered. Non-refundable activation fees are deferred and recognized over the expected term of the customer relationship.

The Company also sells products and merchandises to customers and these sales are recognized at the time products and merchandises are delivered.

u. Income Tax and Deferred Tax

Income tax consists of current tax and deferred tax.

1) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of income and comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The Company offsets deferred tax assets and liabilities if, and only if the Company has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously.

3) Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

v. Handset Subsidies to Long-term Mobile Subscribers

The Company provides lump-sum handset subsidies to customers who agree to use the Company's service for the predetermined service period and the subsidies are charged to commission paid as the related payments are made. In case where the customers agree to use the Company's service for the predetermined service period and purchase handsets on installment basis, the subsidies are paid every month over the installment period and the Company provides provision for handset subsidies estimated to be period, which are charged to commission expense at the time telecommunication service contracts are made.

w. Critical accounting judgments and key sources of estimation uncertainty

In the application of the Company accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are critical assumptions and key sources of estimation uncertainty at the end of reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

1) Fair value measurement of financial instruments

Subsequent to initial recognition, available-for-sale financial assets and derivative financial assets are stated at fair value with any gains or losses arising on remeasurement recognized in profit or loss or other comprehensive income. When measuring fair value, if there is quoted price in active market, the Company uses it. But, if quoted price does not exist, the Company uses valuation techniques that require the management's judgments on the expected future cash flows and discount rates.

2) Allowance for doubtful accounts of trade/other receivables and loans

In order to calculate allowances for doubtful accounts of the trade receivables, loans and other receivables, the management of the Company estimates an expected bad debt considering the aging of accounts receivables, past experience of bad debt, economic and industrial factors.

3) Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value.

4) Measurement of property and equipment, intangible assets

If the Company acquires property and equipment or intangible assets from business combination, it is required to estimate the fair value of these assets at the acquisition date. And it is required to estimate useful lives for depreciation and amortization. For these estimation processes, the management's judgments shall take important role.

5) Retirement benefit plans

For defined retirement benefit plans, the cost of providing benefits is determined using actuarial valuation method that is required to make assumptions about discount rates, expected rate of return on plan assets and expected rate of salary increase. The assumptions involve critical uncertainties because the retirement benefit plans are in long-term base.

6) Deferred tax

Recognizing and measuring of the deferred tax assets and liabilities requires the management's judgments and specially, whether and how deferred tax assets is recognized shall be affected from an assumption and management's judgment of the future situation.

3. TRANSITION TO K-IFRS

As stated in Note 2, these are the Company's first consolidated financial statements prepared in accordance with K-IFRS as the Company adopts K-IFRS in 2011. Therefore, prior periods' consolidated financial statements, comparatively presented herein, were restated in accordance with K-IFRS 1101 First-time adoption of International Financial Reporting Standards with a transition date of January 1, 2010.

a. First-time adoption of K-IFRS

K-IFRS 1101 provides for a number of optional exemptions from the general principle of full retrospective applications. The optional exemptions for first-time adoption of K-IFRS of the Company are as follows.

1) *Business combination*

Business combinations that occurred before the date of transition to K-IFRS, are not be retrospectively restated.

2) *Fair value or revaluation as deemed cost*

Certain property and equipment has been revaluated at the date of transition to K-IFRS and that revaluation is used as the asset's deemed cost.

b. Explanation of transition to K-IFRS

Transition adjustments from previous GAAP (Korean GAAP) to K-IFRSs that affected the Company's financial position, financial performance and cash flows are as follows.

1) *Scope of consolidation*

As at the date of transition to K-IFRS the Company's change in scope of consolidation is as follows:

Changes	Name of entities
Newly added	Broadband D&M Co., Ltd., Broadband CS Co., Ltd.
Excluded	F&U Credit information Co., Ltd., IHQ, Inc., BMC Movie Expert Fund, BMC Digital Culture and Contents Fund

2) *Employee benefits and retirement benefit obligation*

Under Korean GAAP, at the end of a reporting period a benefit obligation is calculated and recognized, based on an assumption that all employees who have worked over a year were to retire as of the reporting period end. While, under K-IFRS, the retirement benefit amount is appropriated as a defined benefit obligation by actuarial assessment using the projected unit credit method.

Also, the Company recognizes its long-term employee benefits obligation by actuarial assessment using the projected unit credit method.

3) *Change in depreciation method*

The Company changed the depreciation method of equipment from declining balance method to straight-line method.

4) *Goodwill acquired by business combinations*

Under Korean GAAP, the Company amortized goodwill acquired as a result of business combinations on a straight-line method from 5 ~ 20 years from the year of acquisition. Under K-IFRS, goodwill is not amortized but reviewed for impairment annually.

5) *Transfer of financial assets*

Under Korean GAAP, when the Company transferred a financial asset to financial institutions and it was determined that control over the asset has been transferred the Company derecognized the financial asset. Under K-IFRS, if the Company retains substantially all the risks and rewards of ownership of the asset, the asset is not derecognized but instead the related cash proceeds are recognized as financial liabilities.

6) *Deferment of non-refundable activation fees*

Under Korean GAAP, the Company recognizes non-refundable activation revenues when the activation service is performed. Under K-IFRS, the Company defers such revenues and amortizes it over the expected term of the customer relationship.

7) *Income tax*

Under Korean GAAP, deferred tax assets and liabilities were classified as either current or non-current based on the classification of their underlying assets and liabilities assuming that all differences from one entity are recovered or settled together. If there are no corresponding assets or liabilities, deferred tax assets and liabilities were classified based on the periods the temporary differences were expected to reverse. Under K-IFRS, deferred tax assets and liabilities are all classified as non-current on the statement of financial position.

Under Korean GAAP, difference between the carrying value and the tax base of the investments in subsidiaries, branches and associates and interest in joint ventures were considered as temporary differences and recognized as deferred tax assets and liabilities. Under K-IFRS, the temporary differences associated with investments in subsidiaries, branches and associates and interest in joint ventures is recognized as deferred assets and liabilities reflecting the manner in which Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

8) *Other reclassifications*

8-1) Memberships

Under Korean GAAP, memberships and guarantee deposits were classified as other non-current assets. Under K-IFRS, facility-use memberships are recognized as intangible assets with an indefinite useful life and guarantee deposits that satisfy the definition of financial assets are classified as loans and receivables at amortized costs.

8-2) Investment property

Under Korean GAAP, properties acquired for earning rental income and/or for capital appreciation were classified as property and equipment. Under K-IFRS, such properties are reclassified separately as investment properties.

c. Explanation of effect of transition to K-IFRS

Effects on financial position at January 1, 2010 (date of transition) are as follows (in millions of Korean won):

	Total assets	Total liabilities	Net equity
Based on Korean GAAP	(Won) 23,206,256	(Won) 10,861,631	(Won) 12,344,625
Adjustments:			
1. Changes in scope of consolidation	(62,440)	3,735	(66,175)
2. Property and equipment	69,538		69,538
3. Employee benefits and retirement benefit obligation	15	25,048	(25,033)
4. Transfer of financial assets	416,242	400,753	15,489
5. Non-refundable activation fees		593,981	(593,981)
6. Other adjustments	(107,730)	(73,521)	(34,209)
7. Deferred tax and tax effect of adjustments	(185,157)	(322,948)	137,791
Total adjustment	130,468	627,048	(496,580)
Based on K-IFRS	(Won) 23,336,724	(Won) 11,488,679	(Won) 11,848,045

Effects on financial position at December 31, 2010 and total comprehensive income for the year ended December 31, 2010 are as follows (in millions of Korean won):

	Total assets	Total liabilities	Net equity	Total comprehensive income
Based on Korean GAAP	(Won) 22,651,704	(Won) 10,173,055	(Won) 12,478,649	(Won) 1,021,501
Adjustments:				
1. Changes in scope of consolidation	(103,743)	(13,053)	(90,690)	1,247
2. Property and equipment	477,044		477,044	407,811
3. Amortization of goodwill	151,900	(9,444)	161,344	151,620
4. Employee benefits and retirement benefit obligation	17	38,799	(38,782)	(5,514)
5. Transfer of financial assets				(15,489)
6. Effect on equity method in associates	18,430		18,430	7,717
7. Nonrefundable activation fees		533,783	(533,783)	60,199
8. Other adjustments	44,507	94,943	(50,436)	598
9. Deferred tax and tax effect of adjustments	(107,470)	(93,693)	(13,777)	(150,139)
Total adjustment	480,685	551,335	(70,650)	458,050
Based on K-IFRS	(Won) 23,132,389	(Won) 10,724,390	(Won) 12,407,999	(Won) 1,479,551

Under K-IFRS, dividends received, interest received, interest paid, and income tax paid which were not presented separately in the consolidated statement of cash flows under Korean GAAP, are now separately presented and the related income (expense) and assets (liabilities) have been adjusted for accordingly. Also, under K-IFRS, foreign currency translation amounts are presented gross as part of the related transactions and deducted against the effects of foreign exchange rate changes on the balance of cash held in foreign currencies. No others significant differences between the consolidated statements of cash flows prepared under Korean GAAP compared to K-IFRS have been noted.
