Sonic Foundry, Inc.

Notes to Condensed Consolidated Financial Statements

December 31, 2011

(Unaudited)

1. Basis of Presentation and Significant Accounting Policies

Sonic Foundry, Inc. (the Company) is in the business of providing enterprise solutions and services for the web communications market.

Interim Financial Data

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting only of adjustments of a normal and recurring nature) considered necessary for fair presentation of the results of operations have been included. Operating results for the three month period ended December 31, 2011 are not necessarily indicative of the results that might be expected for the year ending September 30, 2012.

The condensed consolidated balance sheet at September 30, 2011 has been derived from audited financial statements at that date, but do not include all of the information and disclosures required by GAAP. For a more complete discussion of accounting policies and certain other information, refer to the Company s annual report filed on Form 10-K for the fiscal year ended September 30, 2011.

Revenue Recognition

General

Revenue is recognized when persuasive evidence of an arrangement exists, delivery occurs or services are rendered, the sales price is fixed and determinable and collectability is reasonably assured. Revenue is deferred when undelivered products or services are essential to the functionality of delivered products, customer acceptance is uncertain, significant obligations remain, or the fair value of undelivered elements is unknown. The Company does not offer customers the right to return product, other than for exchange or repair pursuant to a warranty or stock rotation. The Company s policy is to reduce revenue when it incurs an obligation for price rebates or other such programs during the period the obligation and sale occurs. The following policies apply to the Company s major categories of revenue transactions.

Products

Products are considered delivered, and revenue is recognized, when title and risk of loss have been transferred to the customer. Under the terms and conditions of the sale, this occurs at the time of shipment to the customer. Product revenue currently represents sales of our Mediasite recorder and Mediasite related products such as our server software.

Services

The Company sells support and content hosting contracts to their customers, typically one year in length and records the related revenue ratably over the contractual period. Support contracts cover phone and electronic technical support availability over and above the level provided by our distributors, software upgrades on a when and if available basis, advance hardware replacement and an extension of the standard hardware warranty from 90 days to one year. The manufacturer the Company contracts with to build the units provide a limited one-year warranty on the hardware. The Company also sells installation, training, event webcasting, and customer content hosting services. Revenue for those services is recognized when performed in the case of installation, training and event webcasting services and is recognized ratably over the contract period when these additional elements are sold with hosting. Service amounts invoiced to customers in excess of revenue recognized are recorded as deferred revenue until the revenue recognition criteria are met.

Table of Contents

Revenue Arrangements that Include Multiple Elements

The Company has historically applied the software revenue recognition rules as prescribed by Accounting Standards Codification (ASC) Subtopic 985-605. In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) Number 2009-14, *Certain Revenue Arrangements That Include Software Elements*, which amended ASC Subtopic 985-605. This ASU removes tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of the software revenue recognition rules. In the case of the Company's hardware products with embedded software, the Company has determined that the hardware and software components function together to deliver the product's essential functionality, and therefore, the revenue from the sale of these products no longer falls within the scope of the software revenue recognition rules. Revenue from the sale of software-only products remains within the scope of the software revenue recognition rules. Installation, training, and post customer support no longer fall within the scope of the software revenue recognition rules, except when they are sold with and relate to a software-only product. Revenue recognition for products that no longer fall under the scope of the software revenue recognition rules is similar to that for other tangible products. ASU Number 2009-13, *Multiple-Deliverable Revenue Arrangements*, which amended ASC Topic 605 and was also issued in October 2009, is applicable for multiple-deliverable revenue arrangements. ASU 2009-13 allows companies to allocate revenue in a multiple-deliverable arrangement in a manner that better reflects the transaction's economics. ASU 2009-13 and 2009-14 were adopted and are effective for revenue arrangements entered into or materially modified beginning in the Company's fiscal year 2011.

Under the software revenue recognition rules, the fee from a multiple-deliverable arrangement is allocated to each of the undelivered elements based upon vendor-specific objective evidence (VSOE), which is limited to the price charged when the same deliverable is sold separately, with the residual value from the arrangement allocated to the delivered element. The portion of the fee that is allocated to each deliverable is then recognized as revenue when the criteria for revenue recognition are met with respect to that deliverable. If VSOE does not exist for all of the undelivered elements, then all revenue from the arrangement is typically deferred until all elements have been delivered to the customer. All revenue arrangements, with the exception of hosting contracts, entered into prior to October 1, 2010 and the sale of all software-only products and associated services have been accounted for under this guidance.

Under the revenue recognition rules for tangible products as amended by ASU 2009-13, the fee from a multiple-deliverable arrangement is allocated to each of the deliverables based upon their relative selling prices as determined by a selling-price hierarchy. A deliverable in an arrangement qualifies as a separate unit of accounting if the delivered item has value to the customer on a stand-alone basis. A delivered item that does not qualify as a separate unit of accounting is combined with the other undelivered items in the arrangement and revenue is recognized for those combined deliverables as a single unit of accounting. The selling price used for each deliverable is based upon VSOE if available, third-party evidence (TPE) if VSOE is not available, and best estimate of selling price (ESP) if neither VSOE nor TPE are available. TPE is the price of the Company's or any competitor's largely interchangeable products or services in stand-alone sales to similarly situated customers. ESP is the price at which the Company would sell the deliverable if it were sold regularly on a stand-alone basis, considering market conditions and entity-specific factors. All revenue arrangements negotiated after September 30, 2010, excluding the sale of all software-only products and associated services, have been accounted for under this guidance.

The selling prices used in the relative selling price allocation method are as follows: (1) for the Company's products and services are based upon VSOE, (2) for hardware products with embedded software for which VSOE does not exist are based upon ESP. The Company does not believe TPE exists for any of these products and services because they are differentiated from competing products and services in terms of functionality and performance and there are no competing products or services that are largely interchangeable. Management establishes ESP for hardware products with embedded software using a cost plus margin approach with consideration for market conditions, such as the impact of competition and geographic considerations, and entity-specific factors, such as the cost of the product and the Company's profit objectives. Management believes that ESP is reflective of reasonable pricing of that deliverable as if priced on a stand-alone basis. When a sales transaction includes deliverables that are divided

Table of Contents

between ASC Topic 605 and ASC Subtopic 985-605, the Company allocates the selling price using the relative selling price method whereas value is allocated using an ESP for software developed using a percent of list price approach. The other deliverables are valued using ESP or VSOE as previously discussed.

While the pricing model, currently in use, captures all critical variables, unforeseen changes due to external market forces may result in a revision of the inputs. These modifications may result in the consideration allocation differing from the one presently in use. Absent a significant change in the pricing inputs or the way in which the industry structures its deals, future changes in the pricing model are not expected to materially affect our allocation of arrangement consideration.

Management has established VSOE for hosting services. Billings for hosting are spread ratably over the term of the hosting agreement, with the typical hosting agreement having a term of 12 months, with renewal on an annual basis. The Company sells most hosting contracts without the inclusion of products, and occasionally some hosting contracts in conjunction with the sale of product. When the hosting arrangement is sold in conjunction with product, the product revenue is recognized immediately while the remaining hosting revenue is spread ratably over the term of the hosting agreement. The selling price is allocated between these elements using the relative selling price method. The Company uses the estimated selling price method for development of the selling price for hardware products with embedded software.

Reserves

The Company records reserves for stock rotations, price adjustments, rebates, and sales incentives to reduce revenue and accounts receivable for these and other credits granted to customers. Such reserves are recorded at the time of sale and are calculated based on historical information (such as rates of product stock rotations) and the specific terms of sales programs, taking into account any other known information about likely customer behavior. If actual customer behavior differs from our expectations, additional reserves may be required. Also, if the Company determines that it can no longer accurately estimate amounts for stock rotations and sales incentives, the Company would not be able to recognize revenue until resellers sell the inventory to the final end user.

Shipping and Handling

The Company's shipping and handling costs billed to customers are included in other revenue. Costs related to shipping and handling are included in cost of revenue and are recorded at the time of shipment to the customer.

Concentration of Credit Risk and Other Risks and Uncertainties

The Company's cash and cash equivalents are deposited with two major financial institutions. At times, deposits in these institutions exceed the amount of insurance provided on such deposits. The Company has not experienced any losses on such amounts and believes that it is not exposed to any significant credit risk on these balances.

We assess the realization of our receivables by performing ongoing credit evaluations of our customers' financial condition. Through these evaluations, we may become aware of a situation where a customer may not be able to meet its financial obligations due to deterioration of its financial viability, credit ratings or bankruptcy. Our reserve requirements are based on the best facts available to us and are reevaluated and adjusted as additional information is received. Our reserves are also based on amounts determined by using percentages applied to certain aged receivable categories. These percentages are determined by a variety of factors including, but not limited to, current economic trends, historical payment and bad debt write-off experience. Allowance for doubtful accounts for accounts receivable was \$150,000 as of December 31, 2011 and \$90,000 at September 30, 2011.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Table of Contents**Inventory Valuation**

Inventory consists of raw materials and supplies used in the assembly of Mediasite recorders and finished units. Inventory of completed units and spare parts are carried at the lower of cost or market, with cost determined on a first-in, first-out basis. Inventory consists of the following (in thousands):

	December 31, 2011	September 30, 2011
Raw materials and supplies	\$ 10	\$ 10
Finished goods	1,038	526
	\$ 1,048	\$ 536

Stock Based Compensation

The Company uses a lattice valuation model to account for all employee stock options granted. The lattice valuation model is a more flexible analysis to value options because of its ability to incorporate inputs that change over time, such as actual exercise behavior of option holders. The Company uses historical data to estimate the option exercise and employee departure behavior in the lattice valuation model. Expected volatility is based on historical volatility of the Company's stock. The Company considers all employees to have similar exercise behavior and therefore has not identified separate homogenous groups for valuation. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods the options are expected to be outstanding is based on the U.S. Treasury yields in effect at the time of grant. Forfeitures are based on actual behavior patterns.

The fair value of each option grant is estimated using the assumptions in the following table:

	Three months ended December 31,	
	2011	2010
Expected life	4.8 years	4.4 years
Risk-free interest rate	0.38%	0.65%
Expected volatility	64.01%	82.99%
Expected forfeiture rate	12.16%	17.70%
Expected exercise factor	1.34	1.15
Expected dividend yield	0%	0%

A summary of option activity as of December 31, 2011 and changes during the three months then ended is presented below:

	Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Period
Outstanding at October 1, 2011	785,547	\$ 11.52	6.5
Granted	147,800	9.50	9.9
Exercised	(9,833)	5.22	6.9
Forfeited	(46,300)	11.34	0.5
Outstanding at December 31, 2011	877,214	11.26	5.7
Exercisable at December 31, 2011	520,071	11.84	5.7

Table of Contents

A summary of the status of the Company's non-vested shares and changes during the three month period ended December 31, 2011 is presented below:

Non-vested Shares	Shares	2011	
			Weighted-Average Grant Date Fair Value
Non-vested at October 1,	249,879	\$	5.05
Granted	147,800		3.75
Vested	(45,686)		4.20
Forfeited	(700)		4.77
Non-vested at December 31,	351,293	\$	4.61

The weighted average grant date fair value of options granted during the three months ended December 31, 2011 was \$3.75. As of December 31, 2011, there was \$1.2 million of total unrecognized compensation cost related to non-vested share-based compensation, including \$208 thousand of estimated forfeitures. The cost is expected to be recognized over a weighted-average remaining life of 2.3 years.

Stock-based compensation recorded in the three month period ended December 31, 2011 of \$232 thousand was allocated \$157 thousand to selling and marketing expenses, \$14 thousand to general and administrative expenses, and \$61 thousand to product development expenses. Cash received from exercises under all stock option plans and warrants for the three month periods ended December 31, 2011 and 2010 was \$52 thousand and \$372 thousand, respectively. There were no tax benefits realized for tax deductions from option exercises in either of the three month periods ended December 31, 2011 or 2010. The Company currently expects to satisfy share-based awards with registered shares available to be issued.

The Company also has an Employee Stock Purchase Plan (Purchase Plan) under which an aggregate of 100,000 common shares may be issued. The Shareholders approved an amendment to increase the number of shares of common stock subject to the plan from 50,000 to 100,000 at the Company's annual meeting in March 2011. All employees who have completed 90 days of employment with the Company on the first day of each offering period and customarily work twenty hours per week or more are eligible to participate in the Purchase Plan. An employee who, after the grant of an option to purchase, would hold common stock and/or hold outstanding options to purchase stock possessing 5% or more of the total combined voting power or value of the Company will not be eligible to participate. Eligible employees may make contributions through payroll deductions of up to 10% of their compensation. No participant in the Purchase Plan is permitted to purchase common stock under the Purchase Plan if such option would permit his or her rights to purchase stock under the Purchase Plan to accrue at a rate that exceeds \$25,000 of the fair market value of such shares, or that exceeds 1,000 shares, for each calendar year. The Company makes a bi-annual offering to eligible employees of options to purchase shares of common stock under the Purchase Plan on the first trading day of January and July. Each offering period is for a period of six months from the date of the offering, and each eligible employee as of the date of offering is entitled to purchase shares of common stock at a purchase price equal to the lower of 85% of the fair market value of common stock on the first or last trading day of the offering period. A total of 40,586 shares are available to be issued under the plan. There were 9,832 shares purchased by employees for the six month offering ended December 31, 2011 which were issued in January 2012. The Company recorded stock compensation expense under this plan of \$5 and \$4 thousand during the three month periods ended December 31, 2011 and 2010, respectively.

Per share computation

Basic and diluted net income (loss) per share information for all periods is presented under the requirements of FASB ASC-260-10. Basic earnings (loss) per share has been computed using the weighted-average number of shares of common stock outstanding during the period, less shares that may be repurchased, and excludes any dilutive effects of options and warrants. In periods where the Company reports net income, diluted net income per share is computed using common equivalent shares related to outstanding options and warrants to purchase common stock. The numerator for the calculation of basic and diluted earnings per share is net income (loss). The following table sets forth the computation of basic and diluted weighted average shares used in the earnings per share calculations:

Table of Contents

	Three Months Ended December 31,	
	2011	2010
Denominator for basic earnings per share - weighted average common shares	3,839,907	3,654,751
Effect of dilutive options and warrants (treasury method)		220,732
Denominator for diluted earnings per share - adjusted weighted average common shares	3,839,907	3,875,483
Options and warrants outstanding during each period, but not included in the computation of diluted earnings (loss) per share because they are antidilutive	878,814	

New Accounting Pronouncements

In December 2010 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-28, Intangibles Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts . ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts by requiring an entity to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. This update will be effective for fiscal years beginning after December 15, 2010. The Company s adoption of ASU 2010-28 did not have a material impact on its consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and IFRSs , (ASU 2011-04), which amends ASC 820. This update clarifies the existing guidance and amends the wording used to describe many of the requirements in US GAAP for measuring fair value and for disclosing information about fair value measurements. This update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with prospective application required. The adoption of this guidance is not expected to have an impact on the Company s consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08, Intangible Goodwill and Other (Topic 350) Testing Goodwill for Impairment. The amendments in this ASU permit an entity to first assess qualitative factors related to goodwill to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The amendments in this ASU are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity s financial statements for the most recent annual or interim period have not yet been issued. The adoption of this guidance is not expected to have an impact on the Company s consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company s financial statements upon adoption.

Table of Contents

2. Related Party Transactions

During the three month periods ended December 31, 2011 and 2010, the Company incurred fees of \$55 thousand and \$48 thousand, respectively, to a law firm, a partner of which is a director and stockholder of the Company. The Company had accrued liabilities for unbilled services of \$60 thousand at December 31, 2011 and \$50 thousand at September 30, 2011, respectively, to the same law firm.

During the three month periods ended December 31, 2011 and 2010, the Company recorded Mediasite product and customer support billings of \$331 thousand and \$210 thousand, respectively, to Mediasite KK, a Japanese reseller in which the Company has an equity interest. Mediasite KK owed the Company \$128 thousand at December 31, 2011 and \$241 thousand at September 30, 2011. The Company accounts for its investment in Mediasite KK under the equity method. The recorded value of this investment as of December 31, 2011 and September 30, 2011 is zero.

As of December 31, 2011 and September 30, 2011, the Company had a loan outstanding to an executive totaling \$26 thousand. This loan is collateralized by Company stock.

3. Commitments

Inventory Purchase Commitments

The Company enters into unconditional purchase commitments on a regular basis for the supply of Mediasite product. At December 31, 2011, the Company has an obligation to purchase \$800 thousand of Mediasite product, which is not recorded on the Company's Condensed Consolidated Balance Sheet.

Operating Leases

In November 2011, the Company occupied office space related to a lease agreement entered into on June 28, 2011. The lease term is from November 2011 through October 2018. The lease includes a tenant improvement allowance of \$613 thousand that was initially recorded as a liability and is being amortized as a credit to rent expense on a straight-line basis over the lease term. At December 31, 2011, the unamortized balance is \$598 thousand.

4. Borrowing Arrangements

Silicon Valley Bank

On June 16, 2008, the Company and its wholly-owned subsidiary, Sonic Foundry Media Systems, Inc. (collectively, the Companies) entered into an Amended and Restated Loan and Security Agreement (the Amended Loan Agreement) with Silicon Valley Bank (Silicon Valley Bank) providing for a credit facility in the form of a \$3,000,000 secured revolving line of credit and a \$1,000,000 term loan. The ability to borrow up to the maximum \$3,000,000 amount of the revolving line of credit is determined by applying an applicable percentage to eligible accounts receivable, which is reduced by, among other things, a reserve. Prior to the First Amendment, discussed below, the reserve was equal to the balance of the term loan when EBITDA, as defined, would have been less than \$200,000 during the preceding six month period. Prior to the Second Amended Agreement, discussed below, the revolving line of credit accrued interest at a per annum rate equal to the following: (i) during such period that Sonic Foundry maintained an Adjusted Quick Ratio (as defined) of greater than 2.00 to 1.00, the greater of one percentage point (1.0%) above Silicon Valley Bank's prime rate, or seven percent (7.0%); or (ii) during such period that Sonic Foundry maintained an Adjusted Quick Ratio equal to or less than 2.00 to 1.00, the greater of one and one-half percent (1.5%) above Silicon Valley Bank's prime rate, or seven and one-half percent (7.5%). Under the Amended Loan Agreement and the Second Amended Agreement, the outstanding term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley's prime rate; or (ii) eight and three quarters percent (8.75%). Prior to the First Amendment, the maturity of both the term loan and the revolving line of credit was June 1, 2010. At the maturity date all outstanding borrowings and any unpaid interest thereon must be repaid, and all outstanding letters of credit must be cash collateralized. Principal on the term loan is to be repaid in thirty-six (36) monthly installments, and prior to the First Amendment as defined below, was to be repaid in full on May 1, 2010.

Table of Contents

On April 14, 2009, the Companies executed the First Amendment to the Amended Loan Agreement with Silicon Valley Bank (the First Amendment). The First Amendment, among other things, a) refinanced the \$361,111 outstanding balance of the Term Loan with a new Term Loan 2 in the amount of \$1,000,000, due in 36 equal monthly installments of principal and interest; b) continued to require a reserve under the Revolving Line for the balance of the term loan unless, for three (3) consecutive monthly periods, the ratio of EBITDA to Debt Service, in each case for the three (3) month period then ending is greater than or equal to 1.25 to 1.00; c) modified the minimum requirements under the EBITDA covenant, but maintained a provision to override such covenant if the Company maintains a minimum Adjusted Quick Ratio of 1.75 to 1.00; and d) extended the maturity date of the Revolving Line to October 1, 2011 and the Term Loan 2 to April 1, 2012. The First Amendment also required the Company to continue to maintain certain of their depository, operating and securities accounts with Silicon Valley Bank, and to continue to comply with certain other restrictive loan covenants, including covenants limiting the Companies' ability to dispose of assets, make acquisitions, be acquired, incur indebtedness, grant liens, make investments, pay dividends, and repurchase stock.

On June 27, 2011, the Companies executed the Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank (the Second Amended Agreement). Under the Second Amended Agreement, the revolving line of credit will continue to have a maximum principal amount of \$3,000,000. Interest will accrue on the revolving line of credit at the per annum rate of one percent (1.0%) above the Prime Rate (as defined), provided that Sonic Foundry maintains an Adjusted Quick Ratio (as defined) of greater than 2.0 to 1.0, or one-and-one half percent (1.5%) above the Prime Rate, if Sonic Foundry does not maintain an Adjusted Quick Ratio of greater than 2.0 to 1.0. The Second Amended Agreement does not provide for a minimum interest rate on the revolving loan. The Second Amended Agreement also provides for an increase in the advance rate on domestic receivables from 75% to 80%, and extends the facility maturity date to October 1, 2013. Under the Second Amended Agreement, the existing term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley Bank's prime rate; or (ii) eight and three quarters percent (8.75%). In addition, a new term loan can be issued in multiple draws provided that the total term loan from Silicon Valley Bank shall not exceed \$2,000,000 and provided further that total term debt shall not exceed \$2,400,000. Under the Second Amended Agreement, any new draws on the term loan will accrue interest at a per annum rate equal to the Prime Rate plus three and three quarters percent (3.75%). The Second Amended Agreement does not provide for a minimum interest rate on the new term loan. Each draw on the new term loan will be amortized over a 36-month period. All draws on the term loan must be made within ten (10) months of June 27, 2011. The Second Amended Agreement also requires Sonic Foundry to continue to comply with certain financial covenants, including covenants to maintain an Adjusted Quick Ratio (as defined) of at least 1.75 to 1.00 and Debt Service Coverage Ratio of at least 1.25 to 1.00, the latter of which will be waived if certain funds are reserved.

At December 31, 2011, a balance of \$1.6 million was outstanding on the term loans with Silicon Valley Bank and no balance was outstanding on the revolving line of credit. At December 31, 2011, there was \$830 thousand available under this credit facility for advances. At December 31, 2011 the Company was in compliance with all covenants in the Second Amended Agreement.

The Second Amended Agreement contains events of default that include, among others, non-payment of principal or interest, inaccuracy of any representation or warranty, violation of covenants, bankruptcy and insolvency events, material judgments, cross defaults to certain other indebtedness, and material adverse changes. The occurrence of an event of default could result in the acceleration of the Companies' obligations under the Second Amended Agreement.

Pursuant to the Second Amended Agreement, the Companies pledged as collateral to Silicon Valley Bank substantially all non-intellectual property business assets. The Companies also entered into an Intellectual Property Security Agreement with respect to intellectual property assets.

Partners for Growth

On March 5, 2010, the Companies executed a \$1,250,000 Loan and Security Agreement (the Term Loan) and a \$750,000 Revolving Loan and Security Agreement (the Revolving Loan) with Partners for Growth II, L.P. (PFG), (collectively the Agreements).

Table of Contents

On June 28, 2011, the Companies entered into a Consent and Modification No. 1 to Loan and Security Agreement (Consent and Modification Agreement) with PFG. Under the Consent and Modification Agreement, PFG consented to the Companies incurring additional indebtedness to Silicon Valley Bank, provided that total outstanding term indebtedness owed to PFG and Silicon Valley Bank does not exceed \$1,900,000.

The Term Loan bears interest at 11.75% per annum with principal due in 36 equal monthly payments of \$34,722 beginning April 1, 2011 and continuing through March 1, 2014. In October 2011, the Company paid the remaining balance of the Term Loan in full.

5. Income Taxes

The Company is subject to taxation in the U.S. and various state jurisdictions. All of the Company's tax years are subject to examination by the U.S. and state tax authorities due to the carryforward of unutilized net operating losses.

Deferred income taxes are provided for temporary differences between financial reporting and income tax basis of assets and liabilities, and are measured using currently enacted tax rates and laws. Deferred income taxes also arise from the future benefits of net operating loss carryforwards. A valuation allowance equal to 100% of the net deferred tax assets has been recognized due to uncertainty regarding future realization.

Beginning with an acquisition in fiscal year 2002, the Company has amortized Goodwill for tax purposes over a 15 year life. Goodwill is not amortized for book purposes.

The difference between the book and tax balance of Goodwill creates a Deferred Tax Liability and an annual tax expense. Because of the long term nature of the goodwill timing difference, tax planning strategies cannot be applied related to the Deferred Tax Liability. The balance of the Deferred Tax Liability at December 31, 2011 was \$1.79 million and at September 30, 2011 was \$1.73 million.

The Company's practice is to recognize interest and/or penalties related to income tax matters in income tax expense. The Company had no accruals for interest and penalties on the Company's Condensed Consolidated Balance Sheets at September 30, 2011 or December 31, 2011, and has not recognized any interest or penalties in the Condensed Consolidated Statements of Operations for either the three month periods ended December 31, 2011 or 2010. The Company's tax rate differs from the expected tax rate each reporting period as a result of the aforementioned items.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Risks and Uncertainties

The following discussion of the consolidated financial position and results of operations of the Company should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this form 10-Q and the Company's annual report filed on form 10-K for the fiscal year ended September 30, 2011. In addition to historical information, this discussion contains forward-looking statements such as statements of the Company's expectations, plans, objectives and beliefs. These statements use such words as may, will, expect, anticipate, believe, plan, and other similar terminology.

Actual results could differ materially from expectations due to changes in the market acceptance of our products, competition, market introduction or product development delays; all of which would impact our strategy to develop a network of inside regional sales managers and distribution partners that target customer opportunities for multi-unit and repeat purchases. If the Company does not achieve multi-unit and repeat purchases, our business will be harmed.

Our future success will continue to depend upon our ability to develop new products, product enhancements or service offerings that address future needs of our target markets and to respond to these changing standards and practices. The success of new products, product enhancements or service offerings depends on several factors, including the timely completion, quality and market acceptance of the product, enhancement or service. Our revenue could be reduced if we do not timely develop innovative new products, product enhancements or service offerings which address the needs of our customers or prospective customers or if our current or future competitors develop such new products, product enhancements or service offerings more timely or do so in a way that causes our customers or prospective customers to buy our competitors products instead of our products.

Uncertainty about current global economic conditions poses a risk as businesses, educational institutions and state governments are likely to postpone spending in response to tighter credit, negative financial news and/or declines in income or asset values. Most of our customers and potential customers are public colleges, universities, schools and other education providers who depend substantially on government funding in order to purchase products and services such as the Company provides. Many state governments are under substantial budget constraints and will likely reduce spending for education providers, without Federal government support. Proposed federal government support for education may not be approved or, if approved, may not succeed in eliminating reductions in spending for our products and services.

In response to global economic conditions, many manufacturers and distributors have reduced the level of inventory they maintain as well as their staff levels. As a result, many components, including some of which the Company requires to build its products, are in short supply and have lengthening lead times for delivery. While we believe there are multiple sources of supply for our products and the component parts required to build them, even a short term disruption of supply of component parts or completed products near the end of a quarter would have a negative impact on our revenues. As a result of the foregoing, we may not be able to meet demand for our products, which could negatively affect revenues in the quarter of the disruption or longer depending upon the magnitude of the event, and could harm our reputation.

Other factors that may impact actual results include: our ability to effectively integrate acquired businesses, length of time necessary to close on sales leads to multi-unit purchasers, our ability to service existing accounts, global and local business conditions, legislation and governmental regulations, competition, our ability to effectively maintain and update our product portfolio, shifts in technology, political or economic instability in local markets, and currency and exchange rate fluctuations, as well as other issues which may be identified from time to time in Sonic Foundry's Securities and Exchange Commission filings and other public announcements.

Table of Contents

Overview

Sonic Foundry, Inc. is a technology leader in the emerging web communications marketplace, providing enterprise solutions and services that link an information-driven world. The company's principal product line, Mediasite® is a web communication and content management system that automatically and cost-effectively webcasts lectures and presentations. Trusted by Fortune 500 companies, top education institutions and Federal, state and local government agencies for a variety of critical communication needs, Mediasite is the leading one-to-many multimedia communication solution for capturing knowledge and sharing it online.

New Accounting Pronouncements

In December 2010 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-28, Intangibles Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts . ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts by requiring an entity to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. This update will be effective for fiscal years beginning after December 15, 2010. The Company's adoption of ASU 2010-28 did not have a material impact on its consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and IFRSs , (ASU 2011-04), which amends ASC 820. This update clarifies the existing guidance and amends the wording used to describe many of the requirements in US GAAP for measuring fair value and for disclosing information about fair value measurements. This update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with prospective application required. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08, Intangible Goodwill and Other (Topic 350) Testing Goodwill for Impairment. The amendments in this ASU permit an entity to first assess qualitative factors related to goodwill to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The amendments in this ASU are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company's financial statements upon adoption.

Critical Accounting Policies

We have identified the following as critical accounting policies to our Company and have discussed the development, selection of estimates and the disclosure regarding them with the audit committee of the board of directors:

Revenue recognition, allowance for doubtful accounts and reserves;

Impairment of long-lived assets;

Valuation allowance for net deferred tax assets; and

Accounting for stock-based compensation.

Revenue Recognition, Allowance for Doubtful Accounts and Reserves

General

Table of Contents

Revenue is recognized when persuasive evidence of an arrangement exists, delivery occurs or services are rendered, the sales price is fixed or determinable and collectability is reasonably assured. Revenue is deferred when undelivered products or services are essential to the functionality of delivered products, customer acceptance is uncertain, significant obligations remain, or the fair value of undelivered elements is unknown. The Company does not offer customers the right to return product, other than for exchange or repair pursuant to a warranty or stock rotation. The Company's policy is to reduce revenue if it incurs an obligation for price rebates or other such programs during the period the obligation is reasonably estimated to occur. The following policies apply to the Company's major categories of revenue transactions.

Products

Products are considered delivered, and revenue is recognized, when title and risk of loss have been transferred to the customer. Under the terms and conditions of the sale, this occurs at the time of shipment to the customer. Product revenue currently represents sales of our Mediasite recorders and Mediasite related products such as server software revenue.

Services

The Company sells support and content hosting contracts to our customers, typically one year in length, and records the related revenue ratably over the contractual period. Our support contracts cover phone and electronic technical support availability over and above the level provided by our distribution partners, software upgrades on a when and if available basis, advance hardware replacement and an extension of the standard hardware warranty from 90 days to one year. The manufacturers we contract with to build the units provide a limited one-year warranty on the hardware. We also sell installation, training, event webcasting, and customer content hosting services. Revenue for those services is recognized when performed in the case of installation, training and event webcasting services and is recognized ratably over the contract period when these additional elements are sold with hosting. Service amounts invoiced to customers in excess of revenue recognized are recorded as deferred revenue until the revenue recognition criteria are met.

Revenue Arrangements that Include Multiple Elements

The Company has historically applied the software revenue recognition rules as prescribed by Accounting Standards Codification (ASC) Subtopic 985-605. In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) Number 2009-14, *Certain Revenue Arrangements That Include Software Elements*, which amended ASC Subtopic 985-605. This ASU removes tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of the software revenue recognition rules. In the case of the Company's hardware products with embedded software, the Company has determined that the hardware and software components function together to deliver the product's essential functionality, and therefore, the revenue from the sale of these products no longer falls within the scope of the software revenue recognition rules. Revenue from the sale of software-only products remains within the scope of the software revenue recognition rules. Installation, training, and post customer support no longer fall within the scope of the software revenue recognition rules, except when they are sold with and relate to a software-only product. Revenue recognition for products that no longer fall under the scope of the software revenue recognition rules is similar to that for other tangible products. ASU Number 2009-13, *Multiple-Deliverable Revenue Arrangements*, which amended ASC Topic 605 and was also issued in October 2009, is applicable for multiple-deliverable revenue arrangements. ASU 2009-13 allows companies to allocate revenue in a multiple-deliverable arrangement in a manner that better reflects the transaction's economics. ASU 2009-13 and 2009-14 were adopted and are effective for revenue arrangements entered into or materially modified beginning in the Company's fiscal year 2011.

Under the software revenue recognition rules, the fee from a multiple-deliverable arrangement is allocated to each of the undelivered elements based upon vendor-specific objective evidence (VSOE), which is limited to the price charged when the same deliverable is sold separately, with the residual value from the arrangement allocated to the delivered element. The portion of the fee that is allocated to each deliverable is then recognized as revenue when the criteria for revenue recognition are met with respect to that deliverable. If VSOE does not exist for all of the undelivered elements, then all revenue from the arrangement is typically deferred until all elements have been delivered to the customer. All revenue arrangements, with the exception of hosting contracts, entered into prior to October 1, 2010 and the sale of all software-only products and associated services have been accounted for under this guidance.

Table of Contents

Under the revenue recognition rules for tangible products as amended by ASU 2009-13, the fee from a multiple-deliverable arrangement is allocated to each of the deliverables based upon their relative selling prices as determined by a selling-price hierarchy. A deliverable in an arrangement qualifies as a separate unit of accounting if the delivered item has value to the customer on a stand-alone basis. A delivered item that does not qualify as a separate unit of accounting is combined with the other undelivered items in the arrangement and revenue is recognized for those combined deliverables as a single unit of accounting. The selling price used for each deliverable is based upon VSOE if available, third-party evidence (TPE) if VSOE is not available, and best estimate of selling price (ESP) if neither VSOE nor TPE are available. TPE is the price of the Company's or any competitor's largely interchangeable products or services in stand-alone sales to similarly situated customers. ESP is the price at which the Company would sell the deliverable if it were sold regularly on a stand-alone basis, considering market conditions and entity-specific factors. All revenue arrangements negotiated after September 30, 2010, excluding the sale of all software-only products and associated services, have been accounted for under this guidance.

The selling prices used in the relative selling price allocation method are as follows: (1) for the Company's products and services are based upon VSOE, (2) for hardware products with embedded software for which VSOE does not exist are based upon ESP. The Company does not believe TPE exists for any of these products and services because they are differentiated from competing products and services in terms of functionality and performance and there are no competing products or services that are largely interchangeable. Management establishes ESP for hardware products with embedded software using a cost plus margin approach with consideration for market conditions, such as the impact of competition and geographic considerations, and entity-specific factors, such as the cost of the product and the Company's profit objectives. Management believes that ESP is reflective of reasonable pricing of that deliverable as if priced on a stand-alone basis. When a sales transaction includes deliverables that are divided between ASC Topic 605 and ASC Subtopic 985-605, the Company allocates the selling price using the relative selling price method whereas value is allocated using an ESP for software developed using a percent of list price approach. The other deliverables are valued using ESP or VSOE as previously discussed.

While the pricing model, currently in use, captures all critical variables, unforeseen changes due to external market forces may result in a revision of the inputs. These modifications may result in the consideration allocation differing from the one presently in use. Absent a significant change in the pricing inputs or the way in which the industry structures its deals, future changes in the pricing model are not expected to materially affect our allocation of arrangement consideration.

Management has established VSOE for hosting services. Billings for hosting are spread ratably over the term of the hosting agreement, with the typical hosting agreement having a term of 12 months, with renewal on an annual basis. The Company sells most hosting contracts without the inclusion of products, and occasionally some hosting contracts in conjunction with the sale of product. When the hosting arrangement is sold in conjunction with product, the product revenue is recognized immediately while the remaining hosting revenue is spread ratably over the term of the hosting agreement. The selling price is allocated between these elements using the relative selling price method. The Company uses the estimated selling price method for development of the selling price for hardware products with embedded software.

Reserves

We record reserves for stock rotations, price adjustments, rebates, and sales incentives to reduce revenue and accounts receivable for these and other credits we may grant to customers. Such reserves are recorded at the time of sale and are calculated based on historical information (such as rates of product stock rotations) and the specific terms of sales programs, taking into account any other known information about likely customer behavior. If actual customer behavior differs from our expectations, additional reserves may be required. Also, if we determine that we can no longer accurately estimate amounts for stock rotations and sales incentives, we would not be able to recognize revenue until the customers exercise their rights, or such rights lapse, whichever is later.

Table of Contents

Credit Evaluation and Allowance for Doubtful Accounts

We assess the realization of our receivables by performing ongoing credit evaluations of our customers' financial condition. Through these evaluations, we may become aware of a situation where a customer may not be able to meet its financial obligations due to deterioration of its financial viability, credit ratings or bankruptcy. Our reserve requirements are based on the best facts available to us and are reevaluated and adjusted as additional information is received. Our reserves are also based on amounts determined by using percentages applied to certain aged receivable categories. These percentages are determined by a variety of factors including, but not limited to, current economic trends, historical payment and bad debt write-off experience. Allowance for doubtful accounts for accounts receivable was \$150,000 at December 31, 2011 and \$90,000 at September 30, 2011.

Impairment of long-lived assets

We assess the impairment of goodwill on an annual basis or whenever events or changes in circumstances indicate that the fair value of these assets is less than the carrying value.

If we determine that the fair value of goodwill is less than its carrying value, based upon the annual test or the existence of one or more indicators of impairment, we would then measure impairment based on a comparison of the implied fair value of goodwill with the carrying amount of goodwill. To the extent the carrying amount of goodwill is greater than the implied fair value of goodwill, we would record an impairment charge for the difference.

We evaluate all of our long-lived assets, including intangible assets other than goodwill, for impairment in accordance with the provisions of FASB ASC-360-10. Long-lived assets and intangible assets other than goodwill are evaluated for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable based on expected undiscounted cash flows attributable to that asset.

Valuation allowance for net deferred tax assets

Deferred income taxes are provided for temporary differences between financial reporting and income tax basis of assets and liabilities, and are measured using currently enacted tax rates and laws. Deferred income taxes also arise from the future benefits of net operating loss carryforwards. A valuation allowance equal to 100% of the net deferred tax assets has been recognized due to uncertainty regarding future realization.

Accounting for stock-based compensation

The Company uses a lattice valuation model to account for all stock options granted. The lattice valuation model provides a flexible analysis to value options because of its ability to incorporate inputs that change over time, such as actual exercise behavior of option holders. The Company uses historical data to estimate the option exercise and employee departure behavior in the lattice valuation model. Expected volatility is based on historical volatility of the Company's stock. The Company considers all employees to have similar exercise behavior and therefore has not identified separate homogenous groups for valuation. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods the options are expected to be outstanding is based on the U.S. Treasury yields in effect at the time of grant. Forfeitures are based on actual behavior patterns.

Results of Continuing Operations

Revenue

Revenue from our business include the sale of Mediasite recorders and server software products and related services contracts, such as customer support, installation, training, content hosting and event services. We market our products to educational institutions, corporations and government agencies that need to deploy, manage, index and distribute video content on Internet-based networks. We reach both our domestic and international markets through reseller networks, a direct sales effort and partnerships with system integrators.

Table of Contents***Q1-2012 compared to Q1-2011***

Revenue in Q1-2012 increased \$255 thousand, or 4% from Q1-2011 revenue of \$5.9 million to \$6.2 million. Revenue consisted of the following:

Product revenue from sale of Mediasite recorder units and server software decreased from \$2.8 million in Q1-2011 to \$2.6 million in Q1-2012. Product revenue decreased mainly due to a decrease in recorders sold. Revenue in Q1-2011 included one large transaction to an international higher education customer.

	Q1-2012	Q1-2011
Recorders sold	242	289
Rack to mobile ratio	2.0 to 1	2.5 to 1
Average sales price, excluding service (000 \$)	\$ 9.7	\$ 9.4

Services revenue represents the portion of fees charged for Mediasite customer support contracts amortized over the length of the contract, typically 12 months, as well as training, installation, event and content hosting services. Services revenue increased from \$3.0 million in Q1-2011 to \$3.5 million in Q1-2012 primarily due to an increase in event services as well as an increase in customer support contracts on Mediasite recorder units. At December 31, 2011 \$5.5 million of revenue was deferred, of which we expect to recognize approximately \$2.2 million in the quarter ending March 31, 2012.

Other revenue relates to freight charges billed separately to our customers.

Gross Margin

Gross margin for Q1-2012 was \$4.5 million or 73% of revenue compared to Q1-2011 of \$4.3 million or 72%. The significant components of cost of revenue include:

Material and freight costs for the Mediasite recorders. Costs for Q1-2012 Mediasite recorder hardware and other costs totaled \$912 thousand, along with \$108 thousand of freight costs, and \$241 thousand of labor and allocated costs compared to Q1-2011 Mediasite recorder costs of \$1.1 million for hardware, \$78 thousand for freight and \$203 thousand of labor and allocated costs.

Services costs. Staff wages and other costs allocated to cost of service revenue were \$417 thousand in Q1-2012 and \$319 thousand in Q1-2011, resulting in gross margin on services of 88% in Q1-2012 and 89% in Q1-2011.

Operating Expenses**Selling and Marketing Expenses**

Selling and marketing expenses include wages and commissions for sales, marketing and business development personnel, print advertising and various promotional expenses for our products. Timing of these costs may vary greatly depending on introduction of new products and services or entrance into new markets, or participation in major tradeshows.

Q1-2012 compared to Q1-2011

Selling and marketing expenses increased \$310 thousand or 13% from \$2.5 million in Q1-2011 to \$2.8 million in Q1-2012. Differences in the major categories include:

Increased salary, incentive compensation and benefits of \$51 thousand

Edgar Filing: SONIC FOUNDRY INC - Form 10-Q

Tradeshows and travel increased by \$178 thousand

Costs allocated from General and Administrative increased by \$97 thousand primarily as a result of higher stock compensation expense, bonus and depreciation expense.

Table of Contents

We anticipate selling and marketing headcount to increase slightly throughout the remainder of the fiscal year.

General and Administrative Expenses

General and administrative (G&A) expenses consist of personnel and related costs associated with the facilities, finance, legal, human resource and information technology departments, as well as other expenses not fully allocated to functional areas.

Q1-2012 compared to Q1-2011

G&A expenses increased \$206 thousand or 33% over the prior period from \$619 thousand in Q1-2011 to \$825 thousand in Q1-2012. Major components of the change included:

Increased compensation and benefits of \$40 thousand, primarily related to an increase in headcount

Professional services increase of \$62 thousand, partially due to timing of certain accounting and director fees as well as new investor relations services

Increase in the allowance for doubtful accounts of \$60 thousand due to an increase in the age of certain accounts

We anticipate general and administrative headcount to remain the same during the remainder of the fiscal year.

Product Development Expenses

Product development expenses include salaries and wages of the software research and development staff and an allocation of benefits, facility and administrative expenses.

Q1-2012 compared to Q1-2011

Product development expenses increased \$148 thousand, or 18% from \$834 thousand in Q1-2011 to \$982 thousand in Q1-2012 resulting primarily from an increase in compensation and benefits of \$104 thousand related to an increase in headcount and performance related incentive compensation.

We anticipate product development headcount to increase throughout the remainder of the fiscal year. We do not anticipate that any fiscal 2012 software development efforts will qualify for capitalization.

Other Expense, Net

Other expense primarily consists of interest costs related to outstanding debt and amortization of a debt discount. Other income is primarily interest income from overnight investment vehicles.

Liquidity and Capital Resources

Cash used by operating activities was \$(908) thousand in Q1-2012 compared to cash provided by operating activities in Q1-2011 of \$497 thousand, a decrease of \$1.4 million. Cash used in Q1-2012 decreased partly due to a \$(407) thousand change in net income, from a net income of \$223 thousand in Q1-2011 to a net loss of \$(184) thousand in Q1-2012. Working capital and other changes included the positive effects of a \$366 thousand decrease in accounts receivable, \$232 thousand of share based compensation, and \$184 thousand of depreciation expense. These were more than offset by the negative effects of decreases in accounts payable and accrued liabilities of \$699 thousand, a decrease in unearned revenue of \$473 thousand and an increase in inventory of \$512 thousand. In Q1-2011, working capital and other changes included the negative effects of a \$353 thousand increase in inventories and a \$347 thousand decrease in unearned revenue. These were more than offset by the positive effects of a decrease in accounts receivable of \$681 thousand, \$159 thousand of depreciation expense and \$179 thousand of share based compensation.

Table of Contents

Cash used in investing activities was \$528 thousand in Q1-2012 compared to a use of \$258 thousand in Q1-2011 for the purchase of property and equipment.

Cash provided by financing activities was \$31 thousand in Q1-2012 compared to \$288 thousand in Q1-2011. Cash provided in Q1-2012 was due primarily to \$800 thousand from proceeds from notes payable and \$52 thousand proceeds from exercise of common stock options. This was mostly offset by \$821 thousand of cash used for payments on notes payable and capital leases. The payments on notes payable during the quarter included an additional payment of \$607 thousand to pay the remaining balance of the note payable to PFG in full and before its maturity due to its relative high interest rate. Cash provided in Q1-2011 was primarily due to \$372 thousand of proceeds from exercise of common stock options.

The Company believes its cash position is adequate to accomplish its business plan through at least the next twelve months. We will likely evaluate operating or capital lease opportunities to finance equipment purchases in the future and anticipate utilizing the Company's revolving line of credit to support working capital needs. We may also seek additional equity financing, or issue additional shares previously registered in our available shelf registration, although we currently have no plans to do so.

On June 27, 2011, the Companies executed the Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank (the Second Amended Agreement). Under the Second Amended Agreement, the revolving line of credit will continue to have a maximum principal amount of \$3,000,000. Interest will accrue on the revolving line of credit at the per annum rate of one percent (1.0%) above the Prime Rate (as defined), provided that Sonic Foundry maintains an Adjusted Quick Ratio (as defined) of greater than 2.0 to 1.0, or one-and-one half percent (1.5%) above the Prime Rate, if Sonic Foundry does not maintain an Adjusted Quick Ratio of greater than 2.0 to 1.0. The Second Amended Agreement does not provide for a minimum interest rate on the revolving loan. The Second Amended Agreement also provides for an increase in the advance rate on domestic receivables from 75% to 80%, and extends the facility maturity date to October 1, 2013. Under the Second Amended Agreement, the existing term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley Bank's prime rate; or (ii) eight and three quarters percent (8.75%). In addition, a new term loan can be issued in multiple draws provided that the total term loan from Silicon Valley Bank shall not exceed \$2,000,000 and provided further that total term debt shall not exceed \$2,400,000. Under the Second Amended Agreement, any new draws on the term loan will accrue interest at a per annum rate equal to the Prime Rate plus three and three quarters percent (3.75%). The Second Amended Agreement does not provide for a minimum interest rate on the new term loan. Each draw on the new term loan will be amortized over a 36-month period. All draws on the term loan must be made within ten (10) months of June 27, 2011. The Second Amended Agreement also requires Sonic Foundry to continue to comply with certain financial covenants, including covenants to maintain an Adjusted Quick Ratio (as defined) of at least 1.75 to 1.00 and Debt Service Coverage Ratio of at least 1.25 to 1.00, the latter of which will be waived if certain funds are reserved.

At December 31, 2011, a balance of \$1.6 million was outstanding on the term loans with Silicon Valley Bank and no balance was outstanding on the revolving line of credit. At December 31, 2011, there was \$830 thousand available under this credit facility for advances. At December 31, 2011 the Company was in compliance with all covenants in the Second Amended Agreement.

The Company enters into unconditional purchase commitments on a regular basis for the supply of Mediasite product. At December 31, 2011, the Company has an obligation to purchase \$800 thousand of Mediasite product, which is not recorded on the Company's Condensed Consolidated Balance Sheet.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Derivative Financial Instruments

We are not party to any derivative financial instruments or other financial instruments for which the fair value disclosure would be required under FASB ASC-815-10. Our cash equivalents consist of overnight investments in money market funds that are carried at fair value. Accordingly, we believe that the market risk of such investments is minimal.

Interest Rate Risk

Our cash equivalents, which consist of overnight money market funds, are subject to interest rate fluctuations, however, we believe this risk is minimal due to the short-term nature of these investments.

At December 31, 2011, all of our \$1.6 million of debt outstanding is variable rate. We do not expect that an increase in the level of interest rates would have a material impact on our Consolidated Financial Statements. We monitor our positions with, and the credit quality of, the financial institutions that are party to any of our financial transactions.

Foreign Currency Exchange Rate Risk

All international sales of our products are denominated in US dollars.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based on evaluations at December 31, 2011, our principal executive officer and principal financial officer, with the participation of our management team, have concluded that our disclosure controls and procedures (as defined in Rules 13a-15 (e) and 15d-15 (e) under the Securities Exchange Act) are effective. Disclosure controls and procedures ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that material information relating to the Company is accumulated and communicated to management, including our principal executive officer and our principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Controls

During the period covered by this quarterly report on Form 10-Q, the Company has not made any changes to its internal control over financial reporting (as referred to in Paragraph 4(b) of the Certifications of the Company's principal executive officer and principal financial officer included as exhibits to this report) that have materially affected, or are reasonably likely to affect the Company's internal control over financial reporting.
