Earnings per ADS (USD)	0.53	0.03		0.39	

EBITDA¹ of USD369.6 million in the fourth quarter 2011, down 18% sequentially mainly as a result of seasonally lower shipments and lower EBITDA per ton.

Earnings per American Depositary Share (ADS)² of USD0.53 in the fourth quarter 2011 compared to USD0.03 in the third quarter 2011. The fourth quarter 2011 result includes a USD0.25 after-tax non-cash foreign exchange loss per ADS mainly related to Ternium's Mexican subsidiary's US dollar denominated net debt, compared to an USD0.83 after-tax non-cash foreign exchange loss per ADS in the third quarter 2011.

¹ EBITDA in the fourth quarter 2011 equals operating income of USD273.6 million plus depreciation and amortization of USD96.0 million.

² Each American Depositary Share (ADS) represents 10 shares of Ternium's common stock. Results are based on a weighted average number of shares of common stock outstanding (net of treasury shares) of 1,963,076,776 in the third and fourth quarter 2011, and 2,004,743,442 in the fourth quarter 2010.

Ternium's operating income in the fourth quarter 2011 was USD273.6 million, USD78.4 million lower than operating income in the third quarter 2011 mainly as a result of seasonally lower shipments, which decreased by 172,000 tons, and a USD40 lower revenue per ton, partially offset by a USD19 lower flat and long steel products operating cost per ton³. Operating income in the fourth quarter 2011 was USD139.9 million higher than in the fourth quarter 2010. This was the result of a 47,000 ton increase in shipments and a USD104 higher revenue per ton, partially offset by a USD44 higher flat and long steel products operating cost per ton, which increased mainly due to higher raw material prices.

Ternium's net income in the fourth quarter 2011 was USD136.4 million, an increase of USD113.0 million compared to the third quarter 2011 mainly as a result of USD244.5 million lower net financial expenses, partially offset by the above mentioned USD78.4 million lower operating income and a USD54.8 million higher income tax expense. The sequential change in net financial expenses included a USD185.5 million lower non-cash net foreign exchange loss primarily due to the impact of the Mexican Peso's 4.1% depreciation on Ternium's Mexican subsidiary's US dollar denominated debt in the fourth quarter 2011, compared with a 13.4% Mexican Peso depreciation in the third quarter 2011, and a USD47.1 million higher result from changes in fair value of derivatives.

EBITDA⁴ of USD1.7 billion in 2011, up 16% compared to EBITDA in 2010 mainly as a result of higher shipments and EBITDA per ton.

Earnings per ADS⁵ of USD2.61 in 2011 after an USD0.81 after-tax non-cash foreign exchange loss per ADS mainly related to the Mexican Peso depreciation to the US dollar during the year on Ternium's Mexican subsidiary's US dollar denominated net debt. This non-cash foreign exchange loss compares to a USD0.36 after-tax non-cash foreign exchange gain per ADS in 2010.

³ Flat and long steel products operating cost per ton is equal to flat and long steel products cost of sales plus flat and long steel products SG&A, divided by shipments.

⁴ EBITDA in 2011 equals operating income of USD1.3 billion plus depreciation and amortization of USD405.8 million.

⁵ Results are based on a weighted average number of shares of common stock outstanding of 1,968,327,917 in 2011 and 2,004,743,442 in 2010.

Ternium's operating income in 2011 was USD211.3 million higher than operating income in 2010 mainly as a result of a 769,000 ton increase in shipments and a USD126 higher revenue per ton, partially offset by a USD109 higher flat and long steel operating cost per ton, which increased mainly due to higher raw material costs.

Ternium's net income in 2011 was USD649.9 million, a decrease of USD129.6 million year-over-year mainly due to a USD431.1 million lower net financial result, partially offset by the above mentioned USD211.3 million higher operating income and a USD90.7 million lower income tax expense. The year-over-year change in net financial results included a USD360.1 million lower net foreign exchange result primarily due to the impact of the Mexican Peso's 13.1% depreciation on Ternium's Mexican subsidiary's US dollar denominated debt in 2011, compared with a 5.4% Mexican Peso appreciation in 2010, and a USD49.6 million lower interest income on the Sidor financial asset.

Sidor Financial Asset

Following the rescheduling of a USD257.4 million remaining payment by CVG in connection with the compensation for the transfer of Sidor shares to the Venezuelan government on May 7, 2009, CVG paid USD7 million to Ternium in January 2011 and agreed to pay the remainder in five quarterly installments. In addition, Ternium received certain third-party payment guarantees. While the first three installments were paid, the final two installments were not satisfied when due, and, as of the date of this press release, a total principal amount of USD130.3 million remains outstanding. Based on its rights under contracts, investment treaties and Venezuelan and international law, Ternium is actively pursuing payment of the outstanding amounts.

Annual Dividend Proposal

Ternium's board of directors proposed that an annual dividend of USD0.075 per share (USD0.75 per ADS), or approximately USD150.4 million in the aggregate, be approved at the company's annual general shareholders' meeting, which is scheduled to be held on May 2, 2012. If the annual dividend is approved at the shareholders' meeting, it will be paid on May 10, 2012.

Outlook

Ternium expects a lower operating income in the first quarter 2012 compared to the fourth quarter 2011, mainly as a result of lower EBITDA per ton, primarily due to an increase in cost per ton, and relatively stable shipments. The company anticipates stronger shipments in Mexico in the first quarter 2012, as demand in the North America Region is improving, and seasonally weaker shipments in Argentina.

Analysis of Fourth Quarter 2011 Results

Net income attributable to Ternium's equity holders in the fourth quarter 2011 was USD104.7 million, compared to USD77.5 million in the fourth quarter 2010. Including non-controlling interest, net income for the fourth quarter 2011 was USD136.4 million, compared to USD102.8 million in the fourth quarter 2010. Earnings per ADS in the fourth quarter 2011 were USD0.53, compared to USD0.39 in the fourth quarter 2010.

Net sales in the fourth quarter 2011 were USD2.2 billion, 14% higher than net sales in the fourth quarter 2010. Revenue per ton shipped was USD1,005 in the fourth quarter 2011, a 12% increase compared to the fourth quarter 2010, mainly as a result of higher prices.

Cost of sales was USD1.7 billion in the fourth quarter 2011, an increase of USD135.1 million or 8% compared to the fourth quarter 2010 due to a USD123.9 million, or 10%, increase in raw material costs and consumables used reflecting a 2% increase in sales volumes and a net increase in raw material costs, and an USD11.2 million, or 3%, increase in other costs, including a USD16.8 million increase in labor costs, reflecting higher activity levels.

EBITDA in the fourth quarter 2011 was USD369.6 million, or 16.8% of net sales, compared with USD237.0 million, or 12.3% of net sales, in the fourth quarter 2010.

Net financial results were a USD68.2 million loss in the fourth quarter 2011, compared with a USD19.3 million gain in the fourth quarter 2010.

During the fourth quarter 2011, Ternium's net interest results totaled a loss of USD28.0 million, compared to a loss of USD8.6 million in the fourth quarter 2010, mainly reflecting higher average interest rates.

Net foreign exchange result was a loss of USD72.0 million in the fourth quarter 2011 compared to a gain of USD23.5 million in the fourth quarter 2010. The fourth quarter 2011 loss was primarily due to the impact of the Mexican Peso's 4.1% depreciation on Ternium's Mexican subsidiary's US dollar denominated debt. This result is non-cash when measured in US dollars and is offset by changes in Ternium's net equity position in the currency translation adjustments line, as the value of Ternium Mexico's US dollar denominated debt is not altered by the Mexican Peso's fluctuation when stated in US dollars in Ternium's consolidated financial statements. Ternium Mexico prepares its financial statements in Mexican Pesos and registers foreign exchange results on its net non-Mexican Peso positions when the Mexican Peso revaluates or devaluates relative to other currencies.

The change in fair value of derivative instruments included in net financial results in the fourth quarter 2011 was a USD23.9 million gain, compared with a USD2.3 million gain in the fourth quarter 2010. The gain in the fourth quarter 2011 was mainly related to certain derivative instruments entered into by Ternium's Argentine subsidiary Siderar to compensate the interest rate charges derived from its Argentine Peso denominated financial debt.

Income tax expense in the fourth quarter 2011 was USD70.2 million, or 34% of income before income tax and non-controlling interest, compared with an income tax expense of USD52.6 million in the same period in 2010, or 34% of income before income tax and non-controlling interest.

Net income attributable to non-controlling interest in the fourth quarter 2011 was USD31.7 million compared to USD25.3 million in the same period in 2010, mainly due to a higher result attributable to non-controlling interest in Ternium Mexico and Ferrasa.

Analysis of Full Year 2011 Results

Net income attributable to the Company's equity holders in 2011 was USD513.5 million, compared to USD622.1 million in 2010. Including non-controlling interest, net income in 2011 was USD649.9 million, compared to USD779.5 million in 2010. Earnings per ADS were USD2.61 in 2011, compared to USD3.10 in 2010.

Net sales were USD9.2 billion in 2011, 24% higher than net sales in 2010. Shipments of flat and long products were 8.8 million tons in 2011, up 10% compared to shipments in 2010 reflecting higher demand for steel products and Ternium's increased participation in the Colombian steel market. Revenue per ton shipped was USD1,021 in 2011, a 14% increase compared to 2010, mainly as a result of higher prices.

The following table shows Ternium's total consolidated net sales, shipments and revenue per ton for 2011 and 2010:

(1) Primarily includes iron ore, pig iron and pre-engineered metal buildings.

Sales of flat and long products in the North America Region were USD5.0 billion in 2011, an increase of 22% versus 2010 mainly due to higher revenue per ton. Shipments in the region totaled 5.1 million tons in 2011, a 6% increase compared to 2010 reflecting increased demand for steel products and a wider product range. Revenue per ton shipped in the region increased 15% to USD975 in 2011 over 2010, mainly due to higher prices.

Flat and long product sales in the South & Central America Region were USD4.0 billion in 2011, an increase of 31% versus 2010, due to higher shipments and revenue per ton. Shipments in the region totaled 3.7 million tons in 2011, or 17% higher than 2010, mainly due to higher demand for steel products and Ternium's increased participation in the Colombian steel market. Revenue per ton shipped was USD1,089 in 2011, an increase of 12% compared to 2010, mainly due to higher prices.

Sales of other products totaled USD147.3 million in 2011, compared to USD172.5 million in 2010. Shipments of iron ore were lower in 2011 versus 2010 while pig iron shipments increased.

Cost of sales was USD7.1 billion in 2011, an increase of USD1.4 billion, or 25%, compared to 2010. This was due to a USD1.2 billion, or 29%, increase in raw material costs and consumables used, reflecting a 10% increase in sales volumes and higher raw material and purchased slab costs, and a USD179.5 million, or 13%, increase in other costs, including an USD80.1 million increase in labor and a USD48.5 million increase in services expenses (reflecting higher activity levels and labor costs) and a USD27.7 million increase in depreciation of property, plant and equipment.

Selling, General & Administrative (SG&A) expenses in 2011 were USD786.2 million, or 9% of net sales, compared with USD665.3 million, or 9% of net sales, in 2010. The USD120.9 million increase in SG&A was mainly due to a USD21.5 million increase in freight expenses and a USD23.2 million increase in taxes related to increased activity levels and a USD12.9 million increase in labor costs. In addition, SG&A increased USD52.0 million year-over-year as a result of the consolidation of Ferrasa from August 25, 2010.

Operating income in 2011 was USD1.3 billion, or 14% of net sales, compared to operating income of USD1.1 billion, or 14% of net sales, in 2010. The USD211.3 million year-over-year increase reflects improvements mainly in the flat and long steel product segments.

Flat steel products segment

The flat steel products segment operating income was USD965.1 million in 2011, an increase of USD104.1 million compared to 2010, reflecting higher sales partially offset by higher operating cost. Sales of flat products in 2011 increased 22% compared to 2010, reflecting an 8% increase in shipments, mainly due to higher demand for steel products and Ternium's increased participation in the Colombian steel market, and a 13% increase in revenue per ton shipped, mainly due to higher steel prices in Ternium's main steel markets.

	Net Sales (million USD)			Shipments (thousand tons)			Revenue / ton (USD/ton)		
	2011	2010	Dif.	2011	2010	Dif.	2011	2010	Dif.

Total flat products	7,792.0	6,376.4	22%	7,335.3	6,771.7	8%	1,062	942	13%

Operating cost increased 23%, reflecting an 8% increase in shipments and a 14% increase in operating cost per ton mainly from higher raw material and purchased slab costs, as well as higher labor costs, services expenses and depreciation of property, plant and equipment.

Long steel products segment

The long steel products segment operating income was USD259.8 million in 2011, an increase of USD123.5 million compared to 2010, reflecting higher sales and operating costs. Sales of long products in 2011 increased 46% compared to 2010, reflecting a 16% increase in shipments mainly due to the consolidation of Ferrasa from August 25, 2010 and a wider product range, and a 26% increase in revenue per ton shipped, mainly as a result of higher prices.

	Net Sales (million USD)			Shipments (thousand tons)			Revenue / ton (USD/ton)

Operating cost increased 38%, reflecting a 16% increase in shipments and a 19% increase in operating cost per ton mainly from higher raw material costs, as well as higher labor costs, services expenses and depreciation of property, plant and equipment.

EBITDA in 2011 was USD1.7 billion, or 18.2% of net sales, compared to USD1.4 billion, or 19.5% of net sales, in 2010.

Net financial results were a USD300.6 million loss in 2011, compared with a USD130.5 million gain in 2010.

In 2011, Ternium's net interest results totaled a USD72.0 million loss, higher than the USD45.6 million loss in 2010, mainly reflecting higher net indebtedness and average interest rates.

Net foreign exchange result was a loss of USD236.4 million in 2011 compared to a gain of USD123.7 million in 2010. The loss in 2011 was primarily due to the impact of the Mexican Peso's 13.1% depreciation on Ternium's Mexican subsidiary's US dollar denominated debt. This result is non-cash when measured in US dollars and is offset by changes in Ternium's net equity position in the currency translation adjustments line, as the value of Ternium Mexico's US dollar denominated debt is not altered by the Mexican Peso's fluctuation when stated in US dollars in Ternium's consolidated financial statements. Ternium Mexico prepares its financial statements in Mexican Pesos and registers foreign exchange results on its net non-Mexican Pesos positions when the Mexican Peso revaluates or devaluates relative to other currencies.

Interest income on the Sidor financial asset was USD11.4 million in 2011, compared to USD61.0 million in 2010. These results are attributable to the Sidor financial asset in connection with the transfer of Sidor shares on May 7, 2009. The decrease reflects the reduction in the notional amount of the Sidor financial asset over time.

Income tax expense in 2011 was USD316.0 million, or 33% of income before income tax and non-controlling interest, compared with an income tax expense of USD406.7 million in 2010, or 34% of income before income tax and non-controlling interest.

Net income attributable to non-controlling interest in 2011 was USD136.4 million, compared to USD157.4 million in 2010, mainly due to a lower result attributable to non-controlling interest in Siderar and Ternium Mexico.

Cash Flow and Liquidity

Net cash provided by operating activities in the year 2011 was USD647.1 million. Working capital increased USD397.8 million in the year 2011 as a result of a USD413.3 million increase in inventory and an aggregate USD129.0 million increase in trade and other receivables, partially offset by an aggregate USD113.5 million increase in accounts payable and other liabilities and a USD31.0 million increase in tax liabilities. Inventories increased in the year 2011, reflecting higher costs of finished goods, goods in process and raw materials and a slightly higher volume.

Capital expenditures in the year 2011 were USD601.3 million. Ternium's ongoing projects included, among others, in Mexico the construction of a greenfield facility for the manufacture of cold rolled and galvanized steel products, the expansion and enhancement of the service and distribution center network, the enhancement of defuse emission control equipment at a steel shop and the development of mining activities, and, in Argentina, repairs and enhancements at the coking area, new equipment and enhancements in the steel shop, the expansion and enhancements of the hot strip mill, and the expansion of a galvanizing line and a service center. In addition, Ternium carried out the revamping and expansion of a galvanizing mill in Guatemala and the installation of defuse emission control equipment at Ferrasa's steel shop in Colombia.

In 2011, Ternium had free cash flow of USD45.8 million⁶. Ternium's net proceeds from borrowings in the year 2011 were USD34.0 million, related to net proceeds from short-term debt partially offset by the scheduled repayments of Ternium Mexico's outstanding debt. Proceeds from the Sidor financial asset were USD133.1 million. Repurchases of Ternium's own shares totaled USD150.0 million, related to the repurchase from Usiminas of 41,666,666 shares at a price per share of USD3.60 (equivalent to USD36 per ADS). In addition, net dividends paid to shareholders were USD147.2 million and net dividends paid to minority shareholders were USD140.6 million. As of December 31, 2011, Ternium's net cash position was USD0.5⁷ billion. On January 16, 2012, Ternium Investments and Siderar paid BRL3.1 billion (approximately USD1.6 billion) and BRL1.1 billion (approximately USD0.6 billion), respectively, upon closing of certain share purchase agreements to acquire 114.7 million ordinary shares of Usiminas. The payments were financed with cash on hand and, in the case of Ternium Investments, a USD700 million syndicated term loan.

⁶ Free cash flow in the year 2011 equals net cash provided by operating activities of USD647.1 million less capital expenditures of USD601.3 million.

⁷ Net cash position at December 31, 2011 equals cash and equivalents plus other investments of USD2.5 billion less borrowings of USD2.0 billion.

Net cash provided by operating activities in the fourth quarter 2011 was USD444.9 million. Working capital decreased USD174.5 million in the fourth quarter 2011 as a result of a USD107.7 million decrease in inventory, an aggregate USD107.1 million decrease in trade and other receivables, partially offset by an aggregate USD44.2 million decrease in accounts payable and other liabilities. Inventories decreased in the fourth quarter 2011 mainly reflecting lower volume. Capital expenditures in the fourth quarter 2011 were USD156.4 million. Ternium had free cash flow of USD288.6 million⁸ in the period.
