SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2012

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number: 000-08185

CHEMICAL FINANCIAL CORPORATION

(Exact Name of Registrant as Specified in Its Charter)

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Michigan (State or Other Jurisdiction)	38-2022454 (I.R.S. Employer
of Incorporation or Organization)	Identification No.)
235 E. Main Street	
Midland, Michigan (Address of Principal Executive Offices)	48640 (Zip Code)
(989) 839-5350	
(Registrant's Telephone Number, Including Area Code)	

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's Common Stock, \$1 par value, as of April 27, 2012, was 27,491,026 shares.

Forward-Looking Statements

This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy and Chemical Financial Corporation (Corporation). Words such as anticipates, believes, estimates, expects, forecasts, intends, is likely, judgment, plans, predicts, projects, should, trend, will, and similar expressions are intended to identify such forward-looking statements. Such statements are based upon current beliefs and expectations and involve substantial risks and uncertainties which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These statements include, among others, statements related to future levels of loan charge-offs, future levels of provisions for loan losses, real estate valuation, future levels of nonperforming assets, the rate of asset dispositions, future capital levels, future dividends, future growth and funding sources, future liquidity levels, future profitability levels, future deposit insurance premiums, the effects on earnings of future changes in interest rates, the future level of other revenue sources, future economic trends and conditions, future initiatives to expand the Corporation's market share, expected cash flows from acquired loans, future effects of new or changed accounting standards and future opportunities for acquisitions. All statements referencing future time periods are forward-looking. Management's determination of the provision and allowance for loan losses; the carrying value of acquired loans, goodwill and mortgage servicing rights; the fair value of investment securities (including whether any impairment on any investment security is temporary or other-than-temporary and the amount of any impairment); and management's assumptions concerning pension and other postretirement benefit plans involve judgments that are inherently forward-looking. There can be no assurance that future loan losses will be limited to the amounts estimated. All of the information concerning interest rate sensitivity is forward-looking. The future effect of changes in the financial and credit markets and the national and regional economies on the banking industry, generally, and on the Corporation, specifically, are also inherently uncertain. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions (risk factors) that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements. The Corporation undertakes no obligation to update, amend or clarify forward-looking statements, whether as a result of new information, future events or otherwise.

Risk factors include, but are not limited to, the risk factors described in Item 1A of the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011. These and other factors are representative of the risk factors that may emerge and could cause a difference between an ultimate actual outcome and a preceding forward-looking statement.

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

Note 1: Significant Accounting Policies

Nature of Operations

Chemical Financial Corporation (Corporation) operates in a single operating segment – commercial banking. The Corporation is a financial holding company, headquartered in Midland, Michigan, that operates through one commercial bank, Chemical Bank. Chemical Bank operates within the State of Michigan as a state-chartered commercial bank. Chemical Bank operates through an internal organizational structure of four regional banking units and offers a full range of traditional banking and fiduciary products and services to the residents and business customers in the bank's geographical market areas. The products and services offered by the regional banking units, through branch banking offices, are generally consistent throughout the Corporation, as is the pricing of those products and services. The marketing of products and services throughout the Corporation's regional banking units is generally uniform, as many of the markets served by the regional banking units overlap. The distribution of products and services is uniform throughout the Corporation's regional banking units and is achieved primarily through retail branch banking offices, automated teller machines and electronically accessed banking products.

The Corporation's primary sources of revenue are interest from its loan products and investment securities, service charges from customer deposit accounts and wealth management revenue.

Basis of Presentation

The accompanying unaudited consolidated financial statements of the Corporation and its subsidiaries have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the consolidated financial statements do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the Corporation's consolidated financial statements and footnotes thereto included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments believed necessary to present fairly the financial condition and results of operations of the Corporation for the periods presented. Operating results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

Use of Estimates

Management makes estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying footnotes. Estimates that are particularly susceptible to significant change include the determination of the allowance for loan losses, expected cash flows from acquired loans, fair value amounts related to business combinations, pension expense, income taxes, goodwill impairment and those assets that require fair value measurement. Actual results could differ from these estimates.

Originated Loans

Originated loans include all of the Corporation's portfolio loans, excluding loans acquired in the acquisition of O.A.K. Financial Corporation (OAK) on April 30, 2010.

Originated loans are stated at their principal amount outstanding, net of unearned income, charge-offs and unamortized deferred fees and costs. Loan interest income is recognized on the accrual basis. Deferred loan fees and costs are amortized over the loan term on the level-yield method. Net loan commitment fees are deferred and amortized into fee income on a straight-line basis over the commitment period.

The past due status of a loan is based on the loan's contractual terms. A loan is placed in nonaccrual when principal or interest is past due 90 days or more (except for real estate residential loans that are transferred at 120 days past due), unless the loan is both well-secured and in the process of collection, or earlier when, in the opinion of management, there is sufficient reason to doubt the collectibility of principal or interest. Interest previously accrued, but not collected, is reversed and charged against interest income at the time the loan is placed in nonaccrual status. Subsequent receipts of interest while a loan is in nonaccrual are recorded as a reduction of principal. Loans are returned to accrual status when

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

principal and interest payments are brought current, payments have been received consistently for a period of time (generally six months) and collectibility is no longer in doubt.

Table of Contents

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

Loans Acquired in a Business Combination

Loans acquired in a business combination (acquired loans) consist of loans acquired in the acquisition of OAK. Acquired loans were recorded at fair value, without a carryover of the associated allowance for loan losses related to these loans, through a fair value discount that was, in part, attributable to deterioration in credit quality. The estimate of expected credit losses was determined based on due diligence performed by executive and senior officers of the Corporation, with assistance from third-party consultants. The fair value discount was recorded as a reduction of the acquired loans' outstanding principal balances in the consolidated statement of financial position at the acquisition date.

Those loans that qualify under ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310-30), are recorded at fair value at acquisition. The calculation of the fair value of the acquired loans entails estimating the amount and timing of both principal and interest cash flows expected to be collected on such loans and then discounting those cash flows at market interest rates. The excess of a loan's expected cash flows at the acquisition date over its estimated fair value is referred to as the accretable yield, which is recognized into interest income over the remaining life of the loan on a level-yield basis. The difference between a loan's contractually required principal and interest payments at the acquisition date and the cash flows expected to be collected at the acquisition date is referred to as the nonaccretable difference, which includes an estimate of future credit losses expected to be incurred over the life of the loan and interest payments that are not expected to be collected. Decreases to the expected cash flows in subsequent periods will require the Corporation to record a provision for loan losses. Improvements in expected cash flows in subsequent periods will result in reversing a portion of the nonaccretable difference, which is then classified as part of the accretable yield and subsequently recognized into interest income over the remaining life of the loan.

The Corporation must make numerous assumptions, interpretations and judgments using internal and third-party credit quality information to determine whether it is probable that the Corporation will be able to collect all contractually required payments. This is a point in time assessment and inherently subjective due to the nature of the available information and judgment involved. Evidence of credit quality deterioration as of the purchase date may include credit metrics such as past due and nonaccrual status, deterioration in borrower credit scores and negative changes in loan-to-value percentages.

ASC 310-30 allows investors to aggregate loans acquired into loan pools that have common risk characteristics and thereby use a composite interest rate and expectation of cash flows expected to be collected for the loan pools. Under the provisions of ASC 310-30, the Corporation aggregated acquired loans into 14 pools based upon common risk characteristics, including types of loans, commercial type loans with similar risk grades and whether loans were performing or nonperforming. A pool is considered a single unit of accounting for the purposes of applying the guidance as described above. A loan will be removed from a pool of acquired loans only if the loan is sold, foreclosed, paid off or written off, and will be removed from the pool at the carrying value. If an individual loan is removed from a pool of loans, the difference between its relative carrying amount and the cash, fair value of the collateral, or other assets received would not affect the effective yield used to recognize the accretable difference on the remaining pool. The Corporation estimated the cash flows expected to be collected over the life of the pools of loans at acquisition, and estimates expected cash flows quarterly thereafter, based on a set of assumptions including expectations as to default rates, prepayment rates and loss severities. In the event that the updated expected cash flows increase in a pool from those originally projected at acquisition date, the Corporation will adjust the accretable yield amount with a resulting change in the amount recognized in interest income in subsequent periods. In the event that the updated expected cash flows in a pool decrease from those originally projected at the acquisition date, the Corporation will consider that loan pool impaired, which results in the Corporation recording a charge to the provision for loan losses.

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

Loans Modified Under Troubled Debt Restructurings

Loans modified under troubled debt restructurings (TDRs) involve granting a concession to a borrower who is experiencing financial difficulty. Concessions generally include modifications to original loan terms, including changes to a loan's payment schedule or interest rate, which generally would not otherwise be considered. The Corporation's loans reported as TDRs consist of originated loans that continue to accrue interest at the loan's original effective interest rate as the Corporation expects to collect the remaining principal and interest on the loan. The interest income recognized on TDRs may include accretion of an identified impairment at the time of modification which is attributable to a temporary reduction in the borrower's interest rate. At the time of modification, a TDR is reported as a nonperforming loan (nonperforming TDR) until a six-month payment history of principal and interest payments, in accordance with the terms of the loan modification, is sustained, at which time the Corporation moves the loan to a performing status (performing TDR). All TDRs are accounted for as impaired loans and are included in the Corporation's analysis of the allowance for loan losses. The Corporation's loans reported as TDRs do not include loans that are in a nonaccrual status that have been modified by the Corporation due to the borrower experiencing financial difficulty and for which a concession has been granted, as the Corporation does not expect to collect the full amount of principal and interest owed from the borrower on these modified loans.

Loans in the Corporation's commercial loan portfolio (comprised of commercial, real estate commercial, real estate construction and land development loans) that meet the definition of a TDR generally consist of loans where the Corporation has allowed borrowers to defer scheduled principal payments and make interest-only payments for a specified period of time at the stated interest rate of the original loan agreement or reduce payments due to an extension of the loan's contractual term. The Corporation does not expect to incur a loss on these loans based on its assessment of the borrowers' expected cash flows, and accordingly, no additional provision for loan losses has been recognized related to these loans. Since no loss is expected to be incurred on these loans, the loans accrue interest at the loan's contractual interest rate. These loans are individually evaluated for impairment and transferred to nonaccrual status if it is probable that any remaining principal and interest payments due on the loans will not be collected in accordance with the modified terms of the loans.

Loans in the Corporation's consumer loan portfolio (comprised of real estate residential, consumer installment and home equity loans) that meet the definition of a TDR generally consist of loans where the Corporation has reduced a borrower's monthly payments by decreasing the interest rate charged on the loan for a specified period of time (generally 24 months). The Corporation recognizes an additional provision for loan losses related to impairment on these loans on an individual basis based on the present value of expected future cash flows discounted at the loan's original effective interest rate. These loans accrue interest at the loan's effective interest rate, which consists of contractual interest in addition to an adjustment for the accretion of computed impairment. These loans are moved to nonaccrual status if they become 90 days past due as to principal or interest, or sooner if conditions warrant.

Impaired Loans

A loan is defined to be impaired when it is probable that payment of principal and interest will not be made in accordance with the original contractual terms of the loan agreement. Impaired loans include all classes of nonaccrual loans, all TDRs (nonperforming and performing) and acquired loans that were not performing in accordance with original contractual terms. Impaired loans are accounted for at the lower of the present value of expected cash flows discounted at the loan's effective interest rate or the estimated fair value of the collateral if the loan is collateral dependent. When the present value of expected cash flows or the fair value of collateral of an impaired loan is less than the amount of unpaid principal outstanding on the loan, the principal balance of the loan is reduced to its carrying value through either an allocation of the allowance for loan losses or a partial charge-off of the loan balance.

Nonperforming Loans

Nonperforming loans are comprised of loans for which the accrual of interest has been discontinued (nonaccrual loans), accruing originated loans contractually past due 90 days or more as to interest or principal payments and nonperforming TDRs.

Allowance for Loan Losses

The allowance for loan losses (allowance) is presented as a reserve against loans. The allowance represents management's assessment of probable loan losses inherent in the Corporation's loan portfolio.

Management's evaluation of the adequacy of the allowance is based on a continuing review of the loan portfolio, actual loan loss experience, the underlying value of the collateral, risk characteristics of the loan portfolio, the level and composition of nonperforming loans, the financial condition of the borrowers, the balance of the loan portfolio, loan growth, economic conditions, employment levels in the Corporation's local markets, and special factors affecting specific business sectors. The Corporation maintains formal policies and procedures to monitor and control credit risk. Management evaluates the allowance on a quarterly basis in an effort to ensure the level is adequate to absorb probable losses inherent in the loan portfolio.

The allowance provides for probable losses that have been identified with specific customer relationships and for probable losses believed to be incurred in the remainder of the originated loan portfolio, but that have not been specifically identified. The Corporation utilizes its own loss experience to estimate inherent losses on loans. Internal risk ratings are assigned to each loan in the commercial loan portfolio (commercial, real estate commercial, real estate construction and land development loans) at the time of approval and are subject to subsequent periodic reviews by senior management. The Corporation performs a detailed credit quality review quarterly on all loans greater than \$0.25 million that have deteriorated below certain levels of credit risk and may allocate a specific portion of the allowance to such loans based upon this review. A portion of the allowance is allocated to the remaining loans by applying projected loss ratios, based on numerous factors. Projected loss ratios incorporate factors such as recent charge-off experience, trends with respect to adversely risk-rated loans in the commercial loan portfolio, trends with respect to past due and nonaccrual loans, changes in economic conditions and trends, changes in the value of underlying collateral and other credit risk factors. This evaluation involves a high degree of uncertainty.

In determining the allowance and the related provision for loan losses, the Corporation considers four principal elements: (i) valuation allowances based upon probable losses identified during the review of impaired loans in the commercial loan portfolio, (ii) allocations established for adversely-rated loans in the commercial loan portfolio and nonaccrual real estate residential, consumer installment and home equity loans, (iii) allocations, by loan classes, on all other loans based principally on a five-year historical loan loss experience and loan loss trends and (iv) an unallocated allowance based on the imprecision in the overall allowance methodology for loans collectively evaluated for impairment.

Although the Corporation allocates portions of the allowance to specific loans and loan types, the entire allowance attributable to originated loans is available for any loan losses that occur in the originated portfolio. Loans that are deemed not collectible are charged off and reduce the allowance. The provision for loan losses and recoveries on loans previously charged off increase the allowance. Collection efforts may continue and recoveries may occur after a loan is charged off.

Acquired loans are aggregated into pools based upon common risk characteristics. An allowance may be recorded related to acquired loans if an acquired loan pool experiences a decrease in expected cash flows, as compared to those projected at the acquisition date. On a quarterly basis, the expected future cash flow of each pool is estimated based on various factors including changes in property values of collateral dependent loans, default rates, loss severities and prepayment speeds. Decreases in estimates of expected cash flows within a pool generally result in a charge to the provision for loan losses and a corresponding increase in the allowance allocated to acquired loans for the particular pool. Increases in estimates of expected cash flows within a pool generally result in a reduction in the allowance allocated to acquired loans for the particular pool, if applicable, and then an adjustment to the accretable yield for the pool, which will increase amounts recognized in interest income in subsequent periods.

Various regulatory agencies, as an integral part of their examination process, periodically review the allowance. Such agencies may require additions to the allowance, based on their judgment, reflecting information available to them at the time of their examinations.

Fair Value Measurements

Fair value for assets and liabilities measured at fair value on a recurring or nonrecurring basis refers to the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants in the market in which the reporting entity transacts such sales or transfers based on the assumptions market participants would use when pricing an asset or liability. Assumptions are developed based on prioritizing information within a fair value hierarchy that gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, such as the reporting entity's own data.

The Corporation may choose to measure eligible items at fair value at specified election dates. Unrealized gains and losses on items for which the fair value measurement option has been elected are reported in earnings at each subsequent reporting date. The fair value option (i) may be applied instrument by instrument, with certain exceptions, allowing the Corporation to record identical financial assets and liabilities at fair value or by another measurement basis permitted under GAAP, (ii) is irrevocable (unless a new election date occurs) and (iii) is applied only to entire instruments and not to portions of instruments. At March 31, 2012, December 31, 2011 and March 31, 2011, the Corporation had not elected the fair value option for any financial assets or liabilities.

Share-Based Compensation

The Corporation grants stock options, stock awards, restricted stock performance units and time restricted stock units to certain executive and senior management employees. The Corporation accounts for share-based compensation expense using the modified-prospective transition method. Under that method, compensation expense is recognized for stock options based on the estimated grant date fair value as computed using the Black-Scholes option pricing model and the probability of issuance. The Corporation accounts for stock awards based on the closing stock price of the Corporation's common stock on the date of the award. The fair value of stock options and stock awards are recognized as compensation expense on a straight-line basis over the requisite service period. The Corporation accounts for restricted stock performance units based on the closing stock price of the Corporation's common stock on the date of grant, discounted by the present value of estimated future dividends to be declared over the requisite performance or service period. The fair value of restricted stock performance units is recognized as compensation expense over the expected requisite performance period, or requisite service period for awards with multiple performance and service conditions. The Corporation accounts for time restricted stock units based on the closing stock price of the Corporation's common stock on the date of grant, as these awards accrue dividend equivalents equal to the amount of any cash dividend that would have been payable to a shareholder owning the number of shares of the Corporation's common stock represented by the time restricted stock units. The fair value of the time restricted stock units is recognized as compensation expense over the requisite service period.

Cash flows realized from the tax benefits of exercised stock option awards that result from actual tax deductions that are in excess of the recorded tax benefits related to the compensation expense recognized for those options (excess tax benefits) are classified as financing activities on the consolidated statements of cash flows.

Income and Other Taxes

The Corporation is subject to the income and other tax laws of the United States, the State of Michigan and other states where nexus has been created. These laws are complex and are subject to different interpretations by the taxpayer and the various taxing authorities. In determining the provision for income and other taxes, management must make judgments and estimates about the application of these inherently complex laws, related regulations and case law. In the process of preparing the Corporation's tax returns, management attempts to make reasonable interpretations of enacted tax laws. These interpretations are subject to challenge by the tax authorities upon audit or to reinterpretation based on management's ongoing assessment of facts and evolving case law.

On a quarterly basis, management assesses the reasonableness of its effective federal tax rate based upon its current best estimate of taxable income and the applicable taxes expected for the full year. Deferred tax assets and liabilities are reassessed on an annual basis, or sooner, if business events or circumstances warrant. Management also assesses the need for a valuation allowance for deferred tax assets on a quarterly basis using information about the Corporation's current and historical financial position and results of operations.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Uncertain income tax positions are evaluated to determine whether it is more-likely-than-not that a tax position will be sustained upon examination based on the technical merits of the tax position. If a tax position is more-likely-than-not to be sustained, a tax benefit is recognized for the amount that is greater than 50% likely to be realized. Reserves for contingent tax liabilities attributable to unrecognized tax benefits associated with uncertain tax positions are reviewed quarterly for adequacy based upon developments in tax law and the status of audits or examinations. The Corporation had no contingent income tax liabilities recorded at March 31, 2012, December 31, 2011 or March 31, 2011. The tax periods open to examination by the Internal Revenue Service include the calendar years ended December 31, 2011, 2010, 2009 and 2008.

Shareholders' Equity

Common Stock Repurchase Programs

From time to time, the board of directors approves common stock repurchase programs allowing management to repurchase shares of the Corporation's common stock in the open market. The repurchased shares are available for later reissuance in connection with potential future stock dividends, the Corporation's dividend reinvestment plan, employee benefit plans and other general corporate purposes. Under these programs, the timing and actual number of shares subject to repurchase are at the discretion of management and are contingent on a number of factors, including the projected parent company cash flow requirements and the Corporation's market price per share.

In January 2008, the board of directors of the Corporation authorized the repurchase up to 500,000 shares of the Corporation's common stock under a stock repurchase program. In November 2011, the board of directors of the Corporation reaffirmed the stock buy-back authorization with the qualification that the shares may only be repurchased if the share price is below the tangible book value per share of the Corporation's common stock at the time of the repurchase. Since the January 2008 authorization, no shares have been repurchased. At March 31, 2012, there were 500,000 remaining shares available for repurchase under the Corporation's stock repurchase programs.

Preferred Stock

On April 20, 2009, the shareholders of the Corporation authorized the board of directors of the Corporation to issue up to 200,000 shares of preferred stock in connection with either an acquisition by the Corporation of an entity that has shares of preferred stock issued and outstanding pursuant to any program established by the United States government or participation by the Corporation in any program established by the United States government. At March 31, 2012, no shares of preferred stock were issued and outstanding.

Common Stock

On April 18, 2011, the shareholders of the Corporation approved an amendment to the restated articles of incorporation to increase the number of authorized shares of common stock from 30,000,000 to 45,000,000.

Legal Matters

The Corporation and Chemical Bank are subject to certain legal actions arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material adverse effect on the consolidated financial condition or results of operations of the Corporation.

Adopted Accounting Pronouncements

Transfers and Servicing of Financial Assets: In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03, Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements (ASU 2011-03). ASU 2011-03 modifies current guidance by eliminating (i) from the assessment of effective control over transferred financial assets in connection with a repurchase agreement the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of the transferee's default, and (ii) the condition requiring the transferor to have obtained sufficient collateral to demonstrate that ability. ASU 2011-03 is effective for interim and annual periods beginning on or after December 15, 2011, with early adoption prohibited. The adoption of ASU 2011-03 as of January 1, 2012 did not have a material impact on the Corporation's consolidated financial condition or results of operations.

Fair Value Measurement and Disclosure Requirements: In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04). The

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

amended guidance of ASU 2011-04 (i) clarifies how a principal market is determined, (ii) establishes the valuation premise for the highest and best use of nonfinancial assets, (iii) addresses the fair value measurement of instruments with

Table of Contents

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

offsetting market or counterparty credit risks, (iv) extends the prohibition on blockage factors to all three levels of the fair value hierarchy, and (v) requires additional disclosures including transfers between Level 1 and Level 2 of the fair value hierarchy, quantitative and qualitative information and a description of an entity's valuation process for Level 3 fair value measurements, and fair value hierarchy disclosures for financial instruments not measured at fair value. ASU 2011-04 is effective for interim and annual periods beginning on or after December 15, 2011, with early adoption prohibited. The adoption of ASU 2011-04 as of January 1, 2012 did not have a material impact on the Corporation's consolidated financial condition or results of operations.

Presentation of Comprehensive Income: In June 2011, the FASB issued ASU No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income (ASU 2011-05). ASU 2011-05 amends current guidance by (i) eliminating the option to present components of other comprehensive income (OCI) as part of the statement of changes in shareholders' equity, (ii) requiring the presentation of each component of net income and each component of OCI either in a single continuous statement or in two separate but consecutive statements, and (iii) requiring the presentation of reclassification adjustments on the face of the statement. The amendments of ASU 2011-05 do not change the option to present components of OCI either before or after related income tax effects, the items that must be reported in OCI, when an item of OCI should be reclassified to net income, or the computation of earnings per share (which continues to be based on net income). In December 2011, the FASB issued ASU No. 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU No. 2011-05 (ASU 2011-12). ASU 2011-12 defers the effective date for some pending changes resulting from ASU 2011-05, including the requirement to present items that are reclassified from accumulated OCI to net income with the components of net income and OCI. All other requirements of ASU 2011-05 are not affected by ASU 2011-12. The requirements of ASU 2011-05 not affected by ASU 2011-12 are effective for interim and annual periods beginning on or after December 15, 2011 for public companies, with early adoption permitted and retrospective application required. The adoption of ASU 2011-05 as of January 1, 2012 did not have a material impact on the Corporation's consolidated financial condition or results of operations.

As a result of adopting ASU 2011-05, the Corporation added a new financial statement titled Consolidated Statement of Comprehensive Income to report the components of OCI that were previously reported in the Corporation's Consolidated Statement of Changes in Shareholders' Equity for all periods presented.

Note 2: Acquisition

On April 30, 2010, the Corporation acquired OAK for total consideration of \$83.7 million. OAK, a bank holding company, owned Byron Bank, which provided traditional banking services and products through 14 banking offices serving communities in Ottawa, Allegan and Kent counties in west Michigan. Byron Bank was consolidated with and into Chemical Bank on July 23, 2010. At the acquisition date, OAK had total assets of \$820 million, including total loans of \$627 million, and total deposits of \$693 million, including brokered deposits of \$193 million.

Upon acquisition, the OAK loan portfolio had contractually required principal and interest payments receivable of \$683 million and \$97 million, respectively, expected principal and interest cash flows of \$636 million and \$88 million, respectively, and a fair value of \$627 million. The difference between the contractually required payments receivable and the expected cash flows represents the nonaccretable difference, which totaled \$56 million at the acquisition date, with \$47 million attributable to expected credit losses. The difference between the expected cash flows and fair value represents the accretable yield, which totaled \$97 million at the acquisition date. The outstanding contractual principal balance and the carrying amount of the acquired loan portfolio were \$508 million and \$473 million, respectively, at March 31, 2012, compared to \$530 million and \$493 million, respectively, at December 31, 2011 and \$583 million and \$539 million, respectively, at March 31, 2011.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

Activity for the accretable yield, which includes contractually due interest, of acquired loans follows:

Total	\$ 163,890	\$ 2,407	\$ 7,985	\$ 158,312

The majority of the Corporation's residential mortgage-backed securities and collateralized mortgage obligations are backed by a U.S. government agency (Government National Mortgage Association) or a government sponsored enterprise (Federal Home Loan Mortgage Corporation or Federal National Mortgage Association).

At March 31, 2012, the Corporation held \$10.5 million of trust preferred investment securities that were recorded as held-to-maturity, with \$10.0 million of these securities representing a 100% interest in a trust preferred investment security of a non-public bank holding company in Michigan that has been assessed by the Corporation as financially strong. The remaining \$0.5 million represents a 10% interest in another trust preferred investment security of a non-public bank holding company located in Michigan that reported a small amount of net income in 2011, while remaining well-capitalized under regulatory guidelines during that time.

At March 31, 2012, it was the Corporation's opinion that the market for trust preferred investment securities was not active, and thus, in accordance with GAAP, when there is a significant decrease in the volume and activity for an asset or liability in relation to normal market activity, adjustments to transaction or quoted prices may be necessary or a change in valuation technique or multiple valuation techniques may be appropriate. The fair values of the trust preferred investment securities were based upon a calculation of discounted cash flows. The cash flows were discounted based upon both observable inputs and appropriate risk adjustments that market participants would make for nonperformance, illiquidity and issuer specifics. An independent third party provided the Corporation with observable inputs based on the existing market and insight into appropriate rate of return adjustments that market participants would require for the additional risk associated with a single issue investment security of this nature. Using a model that incorporated the average current yield of publicly traded performing trust preferred securities of large financial institutions with no known material financial difficulties at March 31, 2012, and adjusted for both illiquidity and the specific characteristics of the issuer, such as size, leverage position and location, the Corporation calculated an implied yield of 45% on its \$10.0 million trust preferred investment security and 35% for its \$0.5 million trust preferred investment security. Based upon these implied yields, the fair values of the trust preferred investment securities at March 31, 2012 were calculated by the Corporation at \$4.5 million and \$0.2 million, respectively, resulting in a combined unrealized loss of \$5.8 million at that date. At March 31, 2012, the Corporation concluded that the \$5.8 million of combined unrealized loss on the trust preferred investment securities was temporary in nature.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The following is a summary of the amortized cost and fair value of investment securities at March 31, 2012, by maturity, for both available-for-sale and held-to-maturity investment securities. The maturities of residential mortgage-backed securities and collateralized mortgage obligations are based on scheduled principal payments. The maturities of all other debt securities are based on final contractual maturity.

	March 31, 2012

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

An assessment is performed quarterly by the Corporation to determine whether unrealized losses in its investment securities portfolio are temporary or other-than-temporary by carefully considering all available information. The Corporation reviews factors such as financial statements, credit ratings, news releases and other pertinent information of the underlying issuer or company to make its determination. Management did not believe any individual unrealized loss on any investment security, as of March 31, 2012, represented an other-than-temporary impairment (OTTI). Management believed that the unrealized losses on investment securities at March 31, 2012 were temporary in nature and due primarily to changes in interest rates, increased credit spreads and reduced market liquidity and not as a result of credit-related issues. Unrealized losses of \$5.8 million in the trust preferred securities portfolio, related to trust preferred securities of two well-capitalized bank holding companies in Michigan, were attributable to illiquidity in certain financial markets. The Corporation performed an analysis of the creditworthiness of these issuers and concluded that, at March 31, 2012, the Corporation expected to recover the entire amortized cost basis of these investment securities.

At March 31, 2012, the Corporation did not have the intent to sell any of its impaired investment securities and believed that it was more-likely-than-not that the Corporation will not have to sell any such investment securities before a full recovery of amortized cost. Accordingly, at March 31, 2012, the Corporation believed the impairments in its investment securities portfolio were temporary in nature. However, there is no assurance that OTTI may not occur in the future.

Note 4: Loans

Loan portfolio segments are defined as the level at which an entity develops and documents a systematic methodology to determine its allowance. The Corporation has two loan portfolio segments (commercial loans and consumer loans) which it uses in determining the allowance. Both quantitative and qualitative factors are used by management at the loan portfolio segment level in determining the adequacy of the allowance for the Corporation. Classes of loans are a disaggregation of an entity's loan portfolio segments. Classes of loans are defined as a group of loans which share similar initial measurement attributes, risk characteristics, and methods for monitoring and assessing credit risk. The Corporation has seven classes of loans, which are set forth below.

Commercial Loans and lines of credit to varying types of businesses, including municipalities, school districts and nonprofit organizations, for the purpose of supporting working capital, operational needs and term financing of equipment. Repayment of such loans is generally provided through operating cash flows of the business. Commercial loans are predominately secured by equipment, inventory, accounts receivable, personal guarantees of the owner and other sources of repayment, although the Corporation may also secure commercial loans with real estate.

Real estate commercial Loans secured by real estate occupied by the borrower for ongoing operations, non-owner occupied real estate leased to one or more tenants and vacant land that has been acquired for investment or future land development.

Real estate construction Secured loans for the construction of business properties. Real estate construction loans often convert to a real estate commercial loan at the completion of the construction period.

Land development Secured development loans made to borrowers for the purpose of infrastructure improvements to vacant land to create finished marketable residential and commercial lots/land. Most land development loans are originated with the intention that the loans will be paid through the sale of developed lots/land by the developers within twelve months of the completion date. Land development loans at March 31, 2012 were primarily comprised of loans to develop residential properties.

Real estate residential Loans secured by one- to four-family residential properties generally with fixed interest rates of fifteen years or less. The loan-to-value ratio at the time of origination is generally 80% or less. Real estate residential loans with a loan-to-value ratio of more than 80% generally require private mortgage insurance.

Consumer installment Loans to consumers primarily for the purpose of acquiring automobiles, recreational vehicles and boats. These loans consist of relatively small amounts that are spread across many individual borrowers.

Home equity Loans and lines of credit whereby consumers utilize equity in their personal residence, generally through a second mortgage, as collateral to secure the loan.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

Commercial, real estate commercial, real estate construction and land development loans are referred to as the Corporation's commercial loan portfolio, while real estate residential, consumer installment and home equity loans are referred to as the Corporation's consumer loan portfolio. A summary of loans follows:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Commercial loan portfolio:			
Commercial	\$ 903,935	\$ 895,150	\$ 821,115
Real estate commercial	1,095,793	1,071,999	1,074,842

Real estate residential	861,301	861,716	809,085
Consumer installment	480,622	484,058	495,837
Home equity	400,290	400,186	342,198
Subtotal	1,742,213	1,745,960	1,647,120
Total loans	\$ 3,843,098	\$ 3,831,285	\$ 3,682,516

Credit Quality Monitoring

The Corporation maintains loan policies and credit underwriting standards as part of the process of managing credit risk. These standards include making loans generally only within the Corporation's market areas. The Corporation's lending markets generally consist of communities across the middle to southern and western sections of the lower peninsula of Michigan. The Corporation's lending market areas do not include the southeastern portion of Michigan. The Corporation has no foreign loans.

The Corporation has a commercial loan portfolio approval process involving underwriting and individual and group loan approval authorities to consider credit quality and loss exposure at loan origination. The loans in the Corporation's commercial loan portfolio are risk rated at origination based on the grading system set forth below. The approval authority of relationship managers is established based on experience levels, with credit decisions greater than \$1.0 million requiring group loan authority approval, except for four executive and senior officers who have varying limits exceeding \$1.5 million and up to \$3.5 million. With respect to the group loan authorities, the Corporation has a loan committee, consisting of certain executive and senior officers, that meets weekly to consider loans ranging in amounts from \$1.0 million to \$5.0 million, depending on risk rating and credit action required. A directors' loan committee, consisting of ten members of the board of directors, including the chief executive officer, and the senior credit officer, meets bi-weekly to consider loans ranging in amounts from \$5.0 million to \$10.0 million, and certain loans under \$5.0 million depending on a loan's risk rating and credit action required. Loans over \$10.0 million require the approval of the board of directors.

The majority of the Corporation's consumer loan portfolio is comprised of secured loans that are relatively small. The Corporation's consumer loan portfolio has a centralized approval process which utilizes standardized underwriting criteria. The ongoing measurement of credit quality of the consumer loan portfolio is largely done on an exception basis. If payments are made on schedule, as agreed, then no further monitoring is

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

performed. However, if delinquency occurs, the delinquent loans are turned over to the Corporation's collection department for resolution; resulting in repossession or foreclosure if payments are not brought current. Credit quality for the entire consumer loan portfolio is measured by the periodic delinquency rate, nonaccrual amounts and actual losses incurred.

Loans in the commercial loan portfolio tend to be larger and more complex than those in the consumer loan portfolio, and therefore, are subject to more intensive monitoring. All loans in the commercial loan portfolio have an assigned relationship manager, and most borrowers provide periodic financial and operating information that allows the relationship managers to stay abreast of credit quality during the life of the loans. The risk ratings of loans in the commercial loan portfolio are reassessed at least annually, with loans below an acceptable risk rating reassessed more frequently and reviewed by various loan committees within the Corporation at least quarterly.

The Corporation maintains a centralized independent loan review function that monitors the approval process and ongoing asset quality of the loan portfolio, including the accuracy of loan grades. The Corporation also maintains an independent appraisal review function that participates in the review of all appraisals obtained by the Corporation for loans in the commercial loan portfolio.

Credit Quality Indicators

The Corporation uses a nine grade risk rating system to monitor the ongoing credit quality of its commercial loan portfolio. These loan grades rank the credit quality of a borrower by measuring liquidity, debt capacity, coverage and payment behavior as shown in the borrower's financial statements. The loan grades also measure the quality of the borrower's management and the repayment support offered by any guarantors. A summary of the Corporation's loan grades (or, characteristics of the loans within each grade) follows:

Risk Grades 1-5 (Acceptable Credit Quality) All loans in risk grades 1 through 5 are considered to be acceptable credit risks by the Corporation and are grouped for purposes of allowance for loan loss considerations and financial reporting. The five grades essentially represent a ranking of loans that are all viewed to be of acceptable credit quality, taking into consideration the various factors mentioned above, but with varying degrees of financial strength, debt coverage, management and factors that could impact credit quality. Business credits within risk grades 1 through 5 range from Risk Grade 1: Prime Quality (factors include: excellent business credit; excellent debt capacity and coverage; outstanding management; strong guarantors; superior liquidity and net worth; favorable loan-to-value ratios; debt secured by cash or equivalents, or backed by the full faith and credit of the U.S. Government) to Risk Grade 5: Acceptable Quality With Care (factors include: acceptable business credit, but with added risk due to specific industry or internal situations).

Risk Grade 6 (Watch) A business credit that is not acceptable within the Corporation's loan origination criteria; cash flow may not be adequate or is continually inconsistent to service current debt; financial condition has deteriorated as company trends/management have become inconsistent; the company is slow in furnishing quality financial information; working capital needs of the company are reliant on short-term borrowings; personal guarantees are weak and/or with little or no liquidity; the net worth of the company has deteriorated after recent or continued losses; the loan requires constant monitoring and attention from the Corporation; payment delinquencies becoming more serious; if left uncorrected, these potential weaknesses may, at some future date, result in deterioration of repayment prospects.

Risk Grade 7 (Substandard Accrual) A business credit that is inadequately protected by the current financial net worth and paying capacity of the obligor or of the collateral pledged, if any; management has deteriorated or has become non-existent; quality financial information is not available; a high level of maintenance is required by the Corporation; cash flow can no longer support debt requirements; loan payments are continually and/or severely delinquent; negative net worth; personal guaranty has become insignificant; a credit that has a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. The Corporation still expects a full recovery of all contractual principal and interest payments; however, a possibility exists that the Corporation will sustain some loss if deficiencies are not corrected.

Risk Grade 8 (Substandard Nonaccrual) A business credit accounted for on a nonaccrual basis that has all the weaknesses inherent in a loan classified as risk grade 7 with the added characteristic that the weaknesses are so pronounced that, on the basis of current financial information, conditions, and values, collection in full is highly questionable; a partial loss is possible and interest is no longer being accrued. This loan meets the definition of an impaired loan. The risk of loss requires analysis to determine whether a valuation allowance needs to be established.

Risk Grade 9 (Substandard Doubtful) A business credit that has all the weaknesses inherent in a loan classified as risk grade 8 and interest is no longer being accrued, but additional deficiencies make it highly probable that liquidation will not satisfy the majority of the obligation; the primary source of repayment is nonexistent and there is doubt as to the value of the secondary source of repayment; the possibility of loss is likely, but current pending factors could strengthen the credit. This loan meets the definition of an impaired loan. A loan charge-off is recorded when management deems an amount uncollectible; however, the Corporation will establish a valuation allowance for probable losses, if required.

The Corporation considers all loans graded 1 through 5 as acceptable credit risks and structures and manages such relationships accordingly. Periodic financial and operating data combined with regular loan officer interactions are deemed adequate to monitor borrower performance. Loans with risk grades of 6 and 7 are considered higher-risk credits than loans graded 1 through 5 and the frequency of loan officer contact and receipt of financial data is increased to stay abreast of borrower performance. Loans with risk grades of 8 and 9 are considered problematic and require special care. Further, loans with risk grades of 6 through 9 are managed and monitored regularly through a number of processes, procedures and committees, including oversight by a loan administration committee comprised of executive and senior management of the

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Corporation, which includes highly structured reporting of financial and operating data, intensive loan officer intervention and strategies to exit, as well as potential management by the Corporation's special assets group.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The Corporation evaluates the credit quality of loans in the consumer loan portfolio based on the performing or nonperforming status of the loan. Loans in the consumer loan portfolio that are performing in accordance with original contractual terms and are less than 90 days past due and accruing interest are considered to be in a performing status, while those that are not performing in accordance with original contractual terms and are more than 90 days past due are considered to be in a nonperforming status. Loans in the consumer loan portfolio that are reported as TDRs are considered in a nonperforming status until they meet the Corporation's definition of a performing TDR, at which time they are considered in a performing status. The following schedule presents the recorded investment of loans in the consumer loan portfolio based on loans in a performing status and loans in a nonperforming status at March 31, 2012, December 31, 2011 and March 31, 2011:

Total	\$ 161,411	\$ 196,631	\$ 11,946

The difference between an impaired loan's recorded investment and the unpaid principal balance represents either (i) for originated loans, a partial charge-off resulting from a confirmed loss due to the value of the collateral securing the loan being below the loan balance and management's assessment that full collection of the loan balance is not likely or (ii) for acquired loans that meet the definition of an impaired loan, fair value adjustments recognized at the acquisition date attributable to expected credit losses and the discounting of expected cash flows at market interest rates. The difference between the recorded investment and the unpaid principal balance of \$28.7 million, \$32.1 million and \$35.2 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively, includes confirmed losses (partial charge-offs) of \$19.9 million, \$21.7 million and \$23.3 million, respectively, and fair value discount adjustments of \$8.8 million, \$10.4 million and \$11.9 million, respectively.

The following schedule presents information related to impaired loans for the three months ended March 31, 2012 and 2011:

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Total	\$ 137,893	\$ 867	\$ 163,082	\$ 910

Impaired loans included \$15.5 million, \$17.4 million and \$17.7 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively, of acquired loans that were not performing in accordance with original contractual terms. These loans are not reported as nonperforming loans, as a market yield adjustment was recognized on these loans at acquisition that is being amortized into interest income. Impaired loans also include \$27.2 million and \$20.4 million at March 31, 2012 and December 31, 2011, respectively, of performing TDRs.

Total	\$	\$ 37,367	\$ 37,367

The following schedule provides information on loans reported as performing and nonperforming TDRs that were modified during the three months ended March 31, 2012 and 2011:

	Three Months Ended March 31, 2012			Three Months Ended March 31, 2011		
	Number of Loans	Pre- Modification Recorded Investment	Post- Modification Recorded Investment	Number of Loans	Pre- Modification Recorded Investment	Post- Modification Recorded Investment
(Dollars in thousands)						
Commercial loan portfolio:						
Commercial	5	\$ 1,262	\$ 1,262	7	\$ 1,572	\$ 1,572
Real estate commercial	5	1,529	1,529	4	1,058	1,058
Land development	1	1,638	1,638			
Subtotal commercial loan portfolio	11	4,429	4,429	11	2,630	2,630
Consumer loan portfolio (real estate residential)	20	3,154	3,061	27	2,154	2,095
Total	31	\$ 7,583	\$ 7,490	38	\$ 4,784	\$ 4,725

The pre-modification and post-modification recorded investment represents amounts as of the date of loan modification. The difference between the pre-modification and post-modification recorded investment of real estate residential TDRs represents impairment recognized by the Corporation through the provision for loan losses computed based on a loan's post-modification present value of expected future cash flows discounted at the loan's original effective interest rate. No provision for loan losses was recognized related to TDRs in the commercial loan portfolio as the Corporation does not expect to incur a loss on these loans based on its assessment of the borrower's expected cash flows.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The following schedule includes performing and nonperforming TDRs at March 31, 2012, and TDRs that were transferred to nonaccrual status during the three months ended March 31, 2012, for which there was a payment default during the three months ended March 31, 2012, whereby the borrower was past due with respect to principal and/or interest for 90 days or more, and the loan became a TDR during the twelve-month period prior to the default:

	Number of Loans	Principal Balance at March 31, 2012 (Dollars in thousands)
Commercial loan portfolio:		
Commercial	1	\$ 60
Real estate commercial	1	768

Total	\$ 2,085,325	\$ 1,745,960	\$	\$ 3,831,285

The following schedule presents, by loan portfolio segment, the changes in the allowance for the three months ended March 31, 2011 and details regarding the balance in the allowance and the recorded investment in loans at March 31, 2011 by impairment evaluation method.

	Commercial Loan Portfolio	Consumer Loan Portfolio	Unallocated	Total
	(In thousands)			
Changes in allowance for loan losses for the three months ended March 31, 2011:				
Beginning balance	\$ 59,443	\$ 27,338	\$ 2,749	\$ 89,530
Provision for loan losses	3,695	1,823	1,982	7,500
Charge-offs	(5,914)	(2,728)		(8,642)
Recoveries	302	984		1,286
Ending balance	\$ 57,526	\$ 27,417	\$ 4,731	\$ 89,674
Allowance for loan losses balance at March 31, 2011 attributable to:				
Loans individually evaluated for impairment	\$ 11,176	\$ 770	\$	\$ 11,946
Loans collectively evaluated for impairment	46,350	26,647	4,731	77,728
Loans acquired with deteriorated credit quality				

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Total	\$ 57,526	\$ 27,417	\$ 4,731	\$ 89,674
Recorded investment (loan balance) at March 31, 2011:				
Loans individually evaluated for impairment	\$ 100,218	\$ 22,166	\$	\$ 122,384
Loans collectively evaluated for impairment	1,476,813	1,544,292		3,021,105
Loans acquired with deteriorated credit quality	458,365	80,662		539,027
Total	\$ 2,035,396	\$ 1,647,120	\$	\$ 3,682,516

At March 31, 2012 and December 31, 2011, the \$2.2 million and \$1.6 million, respectively, allowance attributable to acquired loans was primarily attributable to one of the acquired loan pools experiencing a decline in expected cash flows. There were no material changes in expected cash flows for the remaining acquired loan pools at March 31, 2012 or December 31, 2011. An allowance related to acquired loans was not required at March 31, 2011 due to no material changes in expected cash flows since the date of acquisition as of that date.

Note 5: Intangible Assets

The Corporation has the following types of intangible assets: goodwill, core deposit intangible assets, mortgage servicing rights (MSRs) and non-compete agreements. Goodwill, core deposit intangible assets and non-compete agreements arose as the result of business combinations or other acquisitions. MSRs arose as a result of selling residential real estate mortgage loans in the secondary market while retaining the right to service these loans and receive servicing income over the life of the loan, as well as a result of the OAK acquisition. Amortization is recorded on the core deposit intangible assets, MSRs and non-compete agreements. Goodwill is not amortized but is evaluated at least annually for impairment. The Corporation's most recent annual goodwill impairment test was performed as of October 31, 2011, and no impairment existed for the Corporation's goodwill at that date. No triggering events have occurred since the most recent annual goodwill impairment review that would require an interim valuation.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The following table shows the net carrying value of the Corporation's intangible assets:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Goodwill	\$ 113,414	\$ 113,414	\$ 113,414
Other intangible assets:			
Core deposit intangible assets	\$ 7,512	\$ 7,879	\$ 9,024
Mortgage servicing rights	3,427	3,593	3,832
Non-compete agreements			204
Total other intangible assets	\$ 10,939	\$ 11,472	\$ 13,060

The following table sets forth the carrying amount, accumulated amortization and amortization expense of core deposit intangible assets that are amortizable and arose from business combinations or other acquisitions:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Gross original amount	\$ 26,468	\$ 26,468	\$ 26,468
Accumulated amortization	18,956	18,589	17,444
Carrying amount	\$ 7,512	\$ 7,879	\$ 9,024
Amortization expense for the three months ended March 31	\$ 367		\$ 382

At March 31, 2012, the remaining amortization expense on core deposit intangible assets that existed as of that date was estimated as follows: 2012 \$1.1 million; 2013 \$1.3 million; 2014 \$1.1 million; 2015 \$1.1 million; 2016 \$0.9 million; 2017 and thereafter \$2.0 million.

The following shows the net carrying value and fair value of MSR's and the total loans that the Corporation is servicing for others:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Net carrying value of MSR's	\$ 3,427	\$ 3,593	\$ 3,832
Fair value of MSR's	\$ 5,158	\$ 4,757	\$ 6,088

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Loans serviced for others that have servicing rights capitalized	\$ 904,191	\$ 902,812	\$ 914,096
--	-------------------	------------	------------

The following table shows the activity for capitalized MSR:

	Three Months Ended March 31,	
	2012	2011
	(In thousands)	
Balance at beginning of period	\$ 3,593	\$ 3,782
Additions	534	508
Amortization	(700)	(458)
Balance at end of period	\$ 3,427	\$ 3,832

There was no impairment valuation allowance recorded on MSRs as of March 31, 2012, December 31, 2011 or March 31, 2011.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012****Note 6: Accumulated Other Comprehensive Loss**

The components of accumulated other comprehensive loss, net of related tax benefit/expense, were as follows:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Net unrealized gains on investment securities available-for-sale, net of related tax expense of \$2,265 at March 31, 2012, \$1,796 at December 31, 2011 and \$1,439 at March 31, 2011	\$ 4,208	\$ 3,336	\$ 2,674
Pension and other postretirement benefits adjustment, net of related tax benefit of \$15,249 at March 31, 2012, \$15,435 at December 31, 2011 and \$9,321 at March 31, 2011	(28,319)	(28,665)	(17,311)
Accumulated other comprehensive loss	\$ (24,111)	\$ (25,329)	\$ (14,637)

Note 7: Regulatory Capital

The Corporation and Chemical Bank are subject to various regulatory capital requirements administered by federal banking agencies. Under these capital requirements, Chemical Bank must meet specific capital guidelines that involve quantitative measures of assets and certain off-balance sheet items as calculated under regulatory accounting practices. In addition, capital amounts and classifications are subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Corporation's consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require minimum ratios of Tier 1 capital to average assets (Leverage Ratio) and Tier 1 and Total capital to risk-weighted assets. These capital guidelines assign risk weights to on- and off-balance sheet items in arriving at total risk-weighted assets. Minimum capital levels are based upon the perceived risk of various asset categories and certain off-balance sheet instruments. Risk weighted assets totaled \$3.87 billion, \$3.88 billion and \$3.69 billion at March 31, 2012, December 31, 2011 and March 31, 2011, respectively.

At March 31, 2012, December 31, 2011 and March 31, 2011, Chemical Bank's capital ratios exceeded the quantitative capital ratios required for an institution to be considered well-capitalized. Significant factors that may affect capital adequacy include, but are not limited to, a disproportionate growth in assets versus capital and a change in mix or credit quality of assets.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The summary below compares the Corporation's and Chemical Bank's actual capital amounts and ratios with the quantitative measures established by regulation to ensure capital adequacy:

	Actual		Minimum Required for Capital Adequacy Purposes		Required to be Well Capitalized Under Prompt Corrective Action Regulations	
	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio

Note 8: Fair Value Measurements

Fair value, as defined by GAAP, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for market activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

The Corporation utilizes fair value measurements to record fair value adjustments to certain assets and to determine fair value disclosures. Investment securities available-for-sale are recorded at fair value on a recurring basis. Additionally, the Corporation may be required to record other assets at fair value on a nonrecurring basis, such as impaired loans, goodwill, other intangible assets and other real estate and repossessed assets. These nonrecurring fair value adjustments typically involve the application of lower of cost or market accounting or write-downs of individual assets.

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

The Corporation determines the fair value of its financial instruments based on a three-level hierarchy established by GAAP. The classification and disclosure of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources, while unobservable inputs reflect management's estimates about market data. The three levels of inputs that may be used to measure fair value within the GAAP hierarchy are as follows:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets. Level 1 valuations for the Corporation include U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Valuations are obtained from a third party pricing service for these investment securities.
- Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Level 2 valuations for the Corporation include government sponsored agency securities, including securities issued by the Federal Home Loan Bank, Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, Federal Farm Credit Bank, Student Loan Marketing Corporation and the Small Business Administration, securities issued by certain state and political subdivisions, residential mortgage-backed securities, collateralized mortgage obligations, corporate bonds and preferred stock. Valuations are obtained from a third-party pricing service for these investment securities.
- Level 3 Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models, yield curves and similar techniques. The determination of fair value requires management judgment or estimation and generally is corroborated by external data, which includes third-party pricing services. Level 3 valuations for the Corporation include securities issued by certain state and political subdivisions, trust preferred securities, impaired loans, goodwill, core deposit intangible assets, MSR's and other real estate and repossessed assets.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Corporation's financial assets and financial liabilities carried at fair value and all financial instruments disclosed at fair value. In general, fair value is based upon quoted market prices, where available. If quoted market prices are not available, fair value is based upon third-party pricing services when available. Fair value may also be based on internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be required to record financial instruments at fair value. Any such valuation adjustments are applied consistently over time. The Corporation's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values.

While management believes the Corporation's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts may change significantly after the date of the statement of financial position from the amounts presented herein.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012****Assets and Liabilities Recorded at Fair Value on a Recurring Basis**

Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are generally measured using independent pricing models or other model-based valuation techniques that include market inputs, such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data and industry and economic events. Level 1 securities include U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Level 2 securities include securities issued by government sponsored agencies, securities issued by certain state and political subdivisions, residential mortgage-backed securities, collateralized mortgage obligations, corporate bonds and preferred stock.

Disclosure of Recurring Basis Fair Value Measurements

For assets measured at fair value on a recurring basis, quantitative disclosures about the fair value measurements for each major category of assets were as follows:

Table of Contents

Chemical Financial Corporation

Notes to Consolidated Financial Statements (Unaudited)

March 31, 2012

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Corporation does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allocation of the allowance (valuation allowance) may be established or a portion of the loan is charged off. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. The fair value of impaired loans is estimated using one of several methods, including the loan's observable market price, the fair value of the collateral or the present value of the expected future cash flows discounted at the loan's effective interest rate. Those impaired loans not requiring a valuation allowance represent loans for which the fair value of the expected repayments or collateral exceed the remaining carrying amount of such loans. At March 31, 2012, December 31, 2011 and March 31, 2011, substantially all of the impaired loans were evaluated based on the fair value of the collateral. Impaired loans, where a valuation allowance is established or a portion of the loan is charged off based on the fair value of collateral, are subject to nonrecurring fair value measurement and require classification in the fair value hierarchy. The Corporation records impaired loans as Level 3 valuations as there is generally no observable market price or independent appraised value, or management determines the fair value of the collateral is further impaired below the appraised value. When management determines the fair value of the collateral is further impaired below appraised value, discount factors ranging between 70% and 80% of the appraised value are used depending on the nature of the collateral and the age of the most recent appraisal.

Goodwill is subject to impairment testing on an annual basis. The assessment of goodwill for impairment requires a significant degree of judgment. In the event the assessment indicates that it is more-likely-than-not that the fair value is less than the carrying value, the asset is considered impaired and recorded at fair value. Goodwill that is impaired and subject to nonrecurring fair value measurements is a Level 3 valuation. At March 31, 2012, December 31, 2011 and March 31, 2011, no goodwill was impaired, and therefore, goodwill was not recorded at fair value on a nonrecurring basis.

Other intangible assets consist of core deposit intangible assets and MSRs. These items are both recorded at fair value when initially recorded. Subsequently, core deposit intangible assets are amortized primarily on an accelerated basis over periods ranging from ten to fifteen years and are subject to impairment testing whenever events or changes in circumstances indicate that the carrying amount exceeds the fair value of the asset. If core deposit intangible asset impairment is identified, the Corporation classifies impaired core deposit intangible assets subject to nonrecurring fair value measurements as Level 3 valuations. The fair value of MSRs is initially estimated using a model that calculates the net present value of estimated future cash flows using various assumptions, including prepayment speeds, the discount rate and servicing costs. If the valuation model reflects a value less than the carrying value, MSRs are adjusted to fair value, as determined by the model, through a valuation allowance. The Corporation classifies MSRs subject to nonrecurring fair value measurements as Level 3 valuations. At March 31, 2012, December 31, 2011 and March 31, 2011, there was no impairment identified for core deposit intangible assets or MSRs and, therefore, no other intangible assets were recorded at fair value on a nonrecurring basis.

The carrying amounts for other real estate (ORE) and repossessed assets (RA) are reported in the consolidated statements of financial position under Interest receivable and other assets. ORE and RA include real estate and other types of assets repossessed by the Corporation. ORE and RA are recorded at the lower of cost or fair value upon the transfer of a loan to ORE or RA and, subsequently, ORE and RA continue to be measured and carried at the lower of cost or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. The Corporation records ORE and RA as Level 3 valuations as there is generally no observable market price or available appraised value, or management determines the fair value of the collateral is further impaired below the appraised value. When management determines the fair value of the collateral is further impaired below appraised value, discount factors ranging between 70% and 75% of the appraised value are used depending on the nature of the collateral and the age of the most recent appraisal.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012****Disclosure of Nonrecurring Basis Fair Value Measurements**

For assets measured at fair value on a nonrecurring basis, quantitative disclosures about fair value measurements for each major category of assets were as follows:

	Fair Value Measurements - Nonrecurring Basis			Total
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
(In thousands)				
<u>March 31, 2012</u>				
Impaired originated loans	\$	\$	\$ 58,202	\$ 58,202
Other real estate/repossessed assets			25,944	25,944
Total	\$	\$	\$ 84,146	\$ 84,146
<u>December 31, 2011</u>				
Impaired originated loans	\$	\$	\$ 52,721	\$ 52,721
Other real estate/repossessed assets			25,484	25,484
Total	\$	\$	\$ 78,205	\$ 78,205
<u>March 31, 2011</u>				
Impaired originated loans	\$	\$	\$ 64,415	\$ 64,415
Other real estate/repossessed assets			26,355	26,355
Total	\$	\$	\$ 90,770	\$ 90,770

There were no liabilities recorded at fair value on a nonrecurring basis at March 31, 2012, December 31, 2011 and March 31, 2011.

Disclosures about Fair Value of Financial Instruments

GAAP requires disclosures about the estimated fair value of the Corporation's financial instruments, including those financial assets and liabilities that are not measured and reported at fair value on a recurring or nonrecurring basis. However, the method of estimating fair value for financial instruments, such as loans, that are not required to be measured on a recurring or nonrecurring basis, as prescribed by ASC Topic 820, Fair Value Measurements and Disclosures (ASC 820) does not incorporate the exit-price concept of fair value. The Corporation utilized the fair value hierarchy in computing the fair values of its financial instruments. In cases where quoted market prices were not available, the Corporation employed present value methods using unobservable inputs requiring management's judgment to estimate the fair values of its financial instruments, which are considered Level 3 valuations. These Level 3 valuations are affected by the assumptions made and, accordingly, do not

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

necessarily indicate amounts that could be realized in a current market exchange. It is also the Corporation's general practice and intent to hold the majority of its financial instruments until maturity and, therefore, the Corporation does not expect to realize the estimated amounts disclosed.

The methodologies for estimating the fair value of financial assets and financial liabilities on a recurring or nonrecurring basis are discussed above. At March 31, 2012, December 31, 2011 and March 31, 2011, the estimated fair values of cash and cash equivalents, interest receivable and interest payable approximated their carrying values at those dates. The methodologies for other financial assets and financial liabilities follow.

Fair value measurement for investment securities held-to-maturity is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques that include market inputs such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data and industry and economic events. Fair value measurements using Level 2 valuations of investment securities held-to-maturity include certain securities issued by state and political subdivisions. Level 3 valuations include a security issued by a state and political subdivision and trust preferred securities.

Fair value measurements of nonmarketable equity securities, which consisted of FHLB and Federal Reserve Bank (FRB) stock, are based on their redeemable value, which is cost. The market for these securities is restricted to the issuer of the stock and subject to impairment evaluation. It is not practicable to determine the fair value of these securities within the fair value hierarchy due to the restrictions placed on their transferability.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

The carrying amounts reported in the consolidated statements of financial position for loans held-for-sale are at the lower of cost or fair value. The fair values of loans held-for-sale are based on the market price for similar loans in the secondary market. The fair value measurements for loans held-for-sale are Level 2 valuations.

The fair value of variable interest rate loans that reprice regularly with changes in market interest rates are based on carrying values. The fair values for fixed interest rate loans are estimated using discounted cash flow analyses, using the Corporation's interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The resulting fair value amounts are adjusted to estimate the impact of changes in the credit quality of borrowers after the loans were originated. The fair value measurements for loans are Level 3 valuations.

The fair values of deposit accounts without defined maturities, such as interest- and noninterest-bearing checking, savings and money market accounts, are equal to the amounts payable on demand. Fair value measurements for fixed-interest rate time deposits with defined maturities are based on the discounted value of contractual cash flows, using the Corporation's interest rates currently being offered for deposits of similar maturities and are Level 3 valuations. The fair values for variable-interest rate time deposits with defined maturities approximate their carrying amounts.

Short-term borrowings consist of securities sold under agreements to repurchase. Fair value measurements for short-term borrowings are based on the present value of future estimated cash flows using current interest rates offered to the Corporation for debt with similar terms and are Level 2 valuations.

Fair value measurements for FHLB advances are estimated based on the present value of future estimated cash flows using current interest rates offered to the Corporation for debt with similar terms and are Level 2 valuations.

The Corporation's unused commitments to extend credit, standby letters of credit and loan commitments have no carrying amount and have been estimated to have no realizable fair value. Historically, a majority of the unused commitments to extend credit have not been drawn upon and, generally, the Corporation does not receive fees in connection with these commitments other than standby letter of credit fees, which are not significant.

Fair value measurements have not been made for items that are not defined by GAAP as financial instruments, including such items as the value of the Corporation's Wealth Management department and the value of the Corporation's core deposit base. The Corporation believes it is impractical to estimate a representative fair value for these types of assets, even though management believes they add significant value to the Corporation.

A summary of carrying amounts and estimated fair values of the Corporation's financial instruments included in the consolidated statements of financial position are as follows:

	Level in Fair Value Measurement Hierarchy	March 31, 2012		December 31, 2011		March 31, 2011	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012****Note 9: Earnings Per Common Share**

Basic earnings per common share for the Corporation is computed by dividing net income by the weighted average number of common shares outstanding during the period. Basic earnings per common share excludes any dilutive effect of common stock equivalents.

Diluted earnings per common share for the Corporation is computed by dividing net income by the sum of the weighted average number of common shares outstanding and the dilutive effect of common stock equivalents using the treasury stock method. Average shares of common stock for diluted net income per common share include shares to be issued upon the exercise of stock options granted under the Corporation's stock option plans, restricted stock units that may be converted to stock, stock to be issued under the deferred stock compensation plan for non-employee directors and stock to be issued under the stock purchase plan for non-employee advisory directors. For any period in which a loss is recorded, the assumed exercise of stock options, restricted stock units that may be converted to stock and stock to be issued under the deferred stock compensation plan and the stock purchase plan would have an anti-dilutive impact on the loss per common share and thus are excluded in the diluted earnings per common share calculation.

The following summarizes the numerator and denominator of the basic and diluted earnings per common share computations:

	Three Months Ended March 31,	
	2012	2011
	(In thousands, except per share data)	
Numerator for both basic and diluted earnings per common share, net income	\$ 12,374	\$ 9,188
Denominator for basic earnings per common share, weighted average common shares outstanding	27,478	27,451
Weighted average common stock equivalents	61	31
Denominator for diluted earnings per common share	27,539	27,482
Basic earnings per common share	\$ 0.45	\$ 0.33
Diluted earnings per common share	0.45	0.33

The average number of exercisable employee stock option awards outstanding that were out-of-the-money, whereby the option exercise price per share exceeded the market price per share and, therefore, were not included in the computation of diluted earnings per common share because they would have been anti-dilutive, totaled 604,843 and 637,288 for the three months ended March 31, 2012 and 2011, respectively.

Note 10: Share-Based Compensation Plans

The Corporation maintains a share-based compensation plan, under which it periodically grants share-based awards, which consists of stock options and restricted stock units, for a fixed number of shares to certain officers of the Corporation. The fair value of share-based awards is recognized as compensation expense over the requisite service or performance period. During the three-month periods ended March 31, 2012 and 2011, share-based compensation expense related to stock options and restricted stock units totaled \$0.3 million and \$0.2 million, respectively.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

During the three-month period ended March 31, 2012, the Corporation granted options to purchase 229,763 shares of common stock and 68,427 restricted stock units to certain officers. At March 31, 2012, there were 987,440 shares of common stock available for future grants under share-based compensation plans.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012****Stock Options**

A summary of activity for the Corporation's stock options as of and for the three months ended March 31, 2012 is presented below:

	Non-Vested Stock Options Outstanding			Stock Options Outstanding	
	Number of Options	Weighted-Average Exercise Price Per Share	Weighted-Average Grant Date Fair Value Per Share	Number of Options	Weighted-Average Exercise Price Per Share
Outstanding at January 1, 2012	162,883	\$ 21.27	\$ 6.55	815,119	\$ 28.29
Granted	229,763	23.78	7.08	229,763	23.78
Exercised					
Vested	(19,754)	24.56	7.65		
Forfeited/expired	(1,522)	20.97	6.44	(11,238)	31.20
Outstanding at March 31, 2012	371,370	\$ 22.65	\$ 6.82	1,033,644	\$ 27.26
Exercisable/vested at March 31, 2012				662,274	\$ 29.84

The weighted-average remaining contractual terms were 6.2 years for all outstanding stock options and 4.3 years for exercisable stock options at March 31, 2012. The intrinsic value of all outstanding in-the-money stock options and exercisable in-the-money stock options was \$0.5 million and \$0.1 million, respectively, at March 31, 2012. The aggregate intrinsic values of outstanding and exercisable options at March 31, 2012 were calculated based on the closing market price of the Corporation's common stock on March 31, 2012 of \$23.44 per share less the exercise price. Options with intrinsic values less than zero, or out-of-the-money options, were not included in the aggregate intrinsic value reported.

At March 31, 2012, unrecognized compensation expense related to stock options totaled \$2.1 million and is expected to be recognized over a remaining weighted average period of 2.6 years.

The fair value of the stock options granted during the three months ended March 31, 2012 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions.

Expected dividend yield	3.60%
Risk-free interest rate	1.18%
Expected stock price volatility	44.4%
Expected life of options in years	6.11
Weighted average per share fair value	\$ 7.08

Restricted Stock Units

In addition to stock options, during the three months ended March 31, 2012, the Corporation granted restricted stock performance units and time restricted stock units (collectively referred to as restricted stock units) to certain officers. The restricted stock performance units vest based on

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

the Corporation achieving certain performance target levels. The restricted stock performance units are eligible to vest from 0.5x to 1.5x the number of units originally granted depending on which, if any, of the performance target levels are met. However, if the minimum performance target level is not achieved, no shares will become vested or be issued for that respective year's restricted stock performance units. The time restricted stock units vest upon satisfaction of a service condition. Upon achievement of the performance target level and/or satisfaction of a service condition, the restricted stock units are converted into shares of the Corporation's common stock on a one-to-one basis. Compensation expense related to restricted stock units is recognized over the expected requisite performance or service period, as applicable.

Table of Contents**Chemical Financial Corporation****Notes to Consolidated Financial Statements (Unaudited)****March 31, 2012**

A summary of the activity for restricted stock units as of and for the three months ended March 31, 2012 is presented below:

	Number of Shares	Weighted- Average Grant Date Fair Value
Outstanding at January 1, 2012	130,512	\$ 20.90
Granted	68,427	22.24
Converted into shares of common stock	(32,677)	23.25
Forfeited/expired	(8,428)	23.05
Outstanding at March 31, 2012	157,834	\$ 20.88

At March 31, 2012, unrecognized compensation expense related to restricted stock unit awards totaled \$2.5 million and is expected to be recognized over approximately three years.

Note 11: Pension and Other Postretirement Benefit Plans

The components of net periodic benefit cost (income) for the Corporation's qualified and nonqualified pension plans and nonqualified postretirement benefits plan are as follows:

	Defined Benefit Pension Plans		Postretirement Benefits Plan	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2012	2011	2012	2011
	(In thousands)			
Service cost	\$ 303	\$ 291	\$	\$
Interest cost	1,215	1,207	37	42
Expected return on plan assets	(1,731)	(1,582)		
Amortization of prior service credit		(1)	(75)	(81)
Amortization of unrecognized net loss (gain)	614	270	(7)	(8)
Net periodic benefit cost (income)	\$ 401	\$ 185	\$ (45)	\$ (47)

There is no minimum required contribution to the Corporation's Pension Plan during 2012; however, the Corporation made a \$12.0 million contribution to the Pension Plan during the first quarter of 2012 related to the 2011 plan year.

401(k) Savings Plan expense for the Corporation's match of participants' base compensation contributions and a 4% of eligible pay contribution to certain employees who are not grandfathered under the Pension Plan was \$0.8 million and \$0.7 million for the three months ended March 31, 2012 and 2011, respectively.

Note 12: Financial Guarantees

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

In the normal course of business, the Corporation is a party to financial instruments containing credit risk that are not required to be reflected in the consolidated statements of financial position. For the Corporation, these financial instruments are financial and performance standby letters of credit. The Corporation has risk management policies to identify, monitor and limit exposure to credit risk. To mitigate credit risk for these financial guarantees, the Corporation generally determines the need for specific covenant, guarantee and collateral requirements on a case-by-case basis, depending on the nature of the financial instrument and the customer's creditworthiness. At March 31, 2012, December 31, 2011 and March 31, 2011, the Corporation had \$46 million, \$46 million and \$48 million, respectively, of outstanding financial and performance standby letters of credit which expire in five years or less. The majority of these standby letters of credit are collateralized. At December 31, 2011 and March 31, 2011, the Corporation had a reserve of \$0.3 million related to potential losses from standby letters of credit. At March 31, 2012, the Corporation determined that there were no potential losses from standby letters of credit, and therefore, no reserve was needed at that date.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of certain significant factors that have affected the financial condition and results of operations of Chemical Financial Corporation (Corporation) during the periods included in the consolidated financial statements included in this filing.

Critical Accounting Policies

The Corporation's consolidated financial statements are prepared in accordance with generally accepted accounting principles (GAAP), Securities and Exchange Commission (SEC) rules and interpretive releases and general practices within the industry in which the Corporation operates. Application of these principles requires management to make estimates, assumptions and complex judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Actual results could differ significantly from those estimates. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. Management has identified the determination of the allowance for loan losses, accounting for loans acquired in business combinations, pension plan accounting, income and other taxes, fair value measurements and the evaluation of goodwill impairment to be the accounting areas that require the most subjective or complex judgments, and as such, could be most subject to revision as new or additional information becomes available or circumstances change, including overall changes in the economic climate and/or market interest rates. Therefore, management considers them to be critical accounting policies and discusses them directly with the Audit Committee of the board of directors. The Corporation's significant accounting policies are more fully described in Note 1 to the audited consolidated financial statements contained in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011 and the more significant assumptions and estimates made by management are more fully described in Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011. There were no material changes to the Corporation's significant accounting policies or the estimates made pursuant to those policies during the most recent quarter.

Acquisition of O.A.K. Financial Corporation

On April 30, 2010, the Corporation acquired O.A.K. Financial Corporation (OAK) for total consideration of \$83.7 million. OAK, a bank holding company, owned Byron Bank, which provided traditional banking services and products through 14 banking offices serving communities in Ottawa, Allegan and Kent counties in west Michigan. At April 30, 2010, OAK had total assets of \$820 million, including total loans of \$627 million, and total deposits of \$693 million, including brokered deposits of \$193 million. The Corporation operated Byron Bank as a separate subsidiary from the acquisition date until July 23, 2010, the date Byron Bank was consolidated with and into Chemical Bank.

Summary

The Corporation's net income was \$12.4 million, or \$0.45 per diluted share, in the first quarter of 2012, compared to net income of \$11.2 million, or \$0.41 per diluted share, in the fourth quarter of 2011 and net income of \$9.2 million, or \$0.33 per diluted share, in the first quarter of 2011. The increase in net income and earnings per share in the first quarter of 2012, compared to the fourth quarter of 2011, was attributable to higher noninterest income and lower operating expenses that was partially offset by lower net interest income. The increase in net income and earnings per share in the first quarter of 2012, compared to the first quarter of 2011, was attributable to a lower provision for loan losses and higher net interest income and noninterest income that was partially offset by higher operating expenses.

Return on average assets, on an annualized basis, was 0.92% in the first quarter of 2012, compared to 0.83% in the fourth quarter of 2011 and 0.70% in the first quarter of 2011. Return on average equity, on an annualized basis, was 8.7% in the first quarter of 2012, compared to 7.7% in the fourth quarter of 2011 and 6.6% in the first quarter of 2011.

Table of Contents**Financial Condition*****Total Assets***

Total assets were \$5.45 billion at March 31, 2012, an increase of \$112 million, or 2.1%, from total assets of \$5.34 billion at December 31, 2011 and an increase of \$116 million, or 2.2%, from total assets of \$5.34 billion at March 31, 2011.

Interest-earning assets were \$5.11 billion at March 31, 2012, an increase of \$127 million, or 2.6%, from interest-earning assets of \$4.99 billion at December 31, 2011 and an increase of \$126 million, or 2.5%, from interest-earning assets of \$4.99 billion at March 31, 2011.

The increases in total assets and interest-earning assets during the three months ended March 31, 2012 were primarily attributable to an increase in interest-bearing balances at the Federal Reserve Bank (FRB) resulting from an increase in customer deposits. The increases in total assets and interest-earning assets during the twelve months ended March 31, 2012 were primarily attributable to loan growth.

Investment Securities

The carrying value of investment securities totaled \$867.3 million at March 31, 2012, an increase of \$16.7 million, or 2.0%, from investment securities of \$850.6 million at December 31, 2011 and an increase of \$117.4 million, or 15.7%, from investment securities of \$749.9 million at March 31, 2011. At March 31, 2012, the Corporation's investment securities portfolio consisted of \$77.5 million in government sponsored agency (GSA) debt obligations comprised primarily of fixed-rate senior bonds issued by the twelve regional Federal Home Loan Banks that make up the Federal Home Loan Bank System (FHLBanks) and variable-rate instruments backed by the Federal Farm Credit Bank, Small Business Administration and Student Loan Marketing Corporation; \$224.9 million in state and political subdivisions debt obligations comprised primarily of general debt obligations of issuers primarily located in the State of Michigan; \$110.9 million in residential mortgage-backed securities (MBSs) comprised primarily of fixed rate instruments backed by a U.S. government agency (Government National Mortgage Association) or government sponsored enterprises (Federal Home Loan Mortgage Corporation and Federal National Mortgage Association); \$355.9 million of collateralized mortgage obligations (CMOs) comprised primarily of variable-rate instruments backed by the same U.S. government agency and government sponsored enterprises as the residential MBSs with average maturities of less than three years; \$86.1 million in corporate bonds comprised primarily of debt obligations of large national financial organizations; \$1.5 million of preferred stock securities of two large banks; and \$10.5 million of trust preferred securities (TRUPs) comprised primarily of a 100% interest in a TRUP of a non-public bank holding company in Michigan.

The Corporation's investment securities portfolio with a carrying value of \$867.3 million at March 31, 2012, had gross impairment of \$8.0 million at that date. Management believed that the unrealized losses on investment securities were temporary in nature and due primarily to changes in interest rates on the investment securities and market illiquidity and not as a result of credit-related issues. Accordingly, at March 31, 2012, the Corporation believed the impairment in its investment securities portfolio was temporary in nature and, therefore, no impairment loss was realized in the Corporation's consolidated statement of income for the three months ended March 31, 2012. However, other-than-temporary impairment (OTTI) may occur in the future as a result of material declines in the fair value of investment securities resulting from market, credit, economic or other conditions. A further discussion of the assessment of potential impairment and the Corporation's process that resulted in the conclusion that the impairment was temporary in nature follows.

At March 31, 2012, the Corporation's investment securities portfolio's gross impairment of \$8.0 million consisted of GSA securities, residential MBSs and CMOs, combined, with gross impairment of \$1.0 million, state and political subdivisions securities with gross impairment of \$0.5 million, corporate bonds with gross impairment of \$0.7 million and TRUPs with gross impairment of \$5.8 million. The amortized costs and fair values of investment securities are disclosed in Note 3 to the consolidated financial statements.

GSA securities, residential MBSs and CMOs, included in the available-for-sale investment securities portfolio, with a combined amortized cost of \$539.8 million had gross impairment of \$1.0 million at March 31, 2012. Virtually all of the impaired investment securities in these categories are backed by the full faith and credit of the U.S. government or a guarantee of a U.S. government agency or government sponsored enterprise. The Corporation determined that the impairment on these investment securities was attributable to the low level of market interest rates. The Corporation concluded that the impairment of its GSA securities, residential MBSs and CMOs was temporary in nature at March 31, 2012.

Table of Contents

State and political subdivisions securities, included in the available-for-sale and the held-to-maturity investment securities portfolios, with an amortized cost of \$222.6 million had gross impairment of \$0.5 million at March 31, 2012. The majority of these investment securities are from issuers primarily located in the State of Michigan and are general obligations of the issuer, meaning that repayment of these obligations is funded by general tax collections of the issuer. The gross impairment was attributable to impaired state and political subdivisions securities with an amortized cost of \$31 million that generally mature beyond 2012. It was the Corporation's assessment that the impairment on these investment securities was attributable to higher market interest rates and illiquidity in the market for these investment securities caused by the market's perception of the Michigan economy. The Corporation concluded that the impairment of its state and political subdivisions securities was temporary in nature at March 31, 2012.

Corporate bonds, included in the available-for-sale investment securities portfolio, with an amortized cost of \$86.5 million had gross impairment of \$0.7 million at March 31, 2012. All of the corporate bonds held at March 31, 2012 were of an investment grade. The investment grade ratings of all of the corporate bonds indicated that the obligors' capacities to meet their financial commitments was strong. It was the Corporation's assessment that the impairment on the corporate bonds was attributable to the current level of market interest rates and the recent negative market perception of the financial industry and not due to credit-related issues. The Corporation concluded that the impairment of its corporate bonds was temporary in nature at March 31, 2012.

At March 31, 2012, the Corporation held two TRUPs in the held-to-maturity investment securities portfolio, with a combined amortized cost of \$10.5 million that had gross impairment of \$5.8 million. One TRUP, with an amortized cost of \$10.0 million, represents a 100% interest in a TRUP of a non-public bank holding company in Michigan that was purchased in the second quarter of 2008. At March 31, 2012, the Corporation determined that the fair value of this TRUP was \$4.5 million. The second TRUP, with an amortized cost of \$0.5 million, represents a 10% interest in the TRUP of another non-public bank holding company in Michigan. At March 31, 2012, the Corporation determined the fair value of this TRUP was \$0.2 million. The fair value measurements of the two TRUP investments were developed based upon market pricing observations of much larger banking institutions in an illiquid market, adjusted by risk measurements. The fair values of the Corporation's TRUPs were based on calculations of discounted cash flows, and further based upon both observable inputs and appropriate risk adjustments that market participants would make for performance, liquidity and issuer specifics. See the additional discussion of the development of the fair values of the TRUPs in Note 3 to the consolidated financial statements. Management reviewed financial information of the issuers of the TRUPs at March 31, 2012.

The issuer of the \$10.0 million TRUP reported net income in the first quarter of 2012 and in each of the three years ended December 31, 2011 and was categorized as well-capitalized under applicable regulatory requirements during that time. Based on an analysis of financial information provided by the issuer, it was the Corporation's opinion that, as of March 31, 2012, this issuer appeared to be a financially sound financial institution with sufficient liquidity to meet its financial obligations in 2012. There have been no material adverse changes in the issuer's financial performance since the TRUP was issued and purchased by the Corporation and no indication that any material adverse trends were developing that would suggest that the issuer would be unable to make all future principal and interest payments under the TRUP. Common stock cash dividends were paid quarterly throughout 2011, 2010 and 2009 by the issuer and the Corporation understands that the issuer's management anticipates cash dividends to continue to be paid in the future. All scheduled interest payments on this TRUP have been made on a timely basis. The principal of \$10.0 million of this TRUP matures in 2038, with interest payments due quarterly. At March 31, 2012, the Corporation was not aware of any regulatory issues, memorandums of understanding or cease and desist orders that had been issued to the issuer or its subsidiaries. In reviewing all reasonably available information regarding the issuer, including past performance and its financial and liquidity position, it was the Corporation's opinion that the future cash flows of the issuer supported the carrying value of the TRUP at its original cost of \$10.0 million at March 31, 2012. While the total fair value of the TRUP was \$5.5 million below the Corporation's amortized cost at March 31, 2012, the Corporation concluded that, based on the overall financial condition of the issuer, the impairment was temporary in nature at March 31, 2012.

The issuer of the \$0.5 million TRUP reported a small amount of net income in 2011, compared to net losses reported in both 2010 and 2009. At March 31, 2012, the issuer was categorized as well-capitalized under applicable regulatory requirements. All scheduled interest payments on this TRUP have been made on a timely basis. The principal of \$0.5 million of this TRUP matures in 2033, with interest payments due quarterly. At March 31, 2012, the Corporation was not aware of any regulatory issues, memorandums of understanding or cease and desist orders that had been issued to the issuer of this TRUP or any subsidiary. In reviewing all financial information regarding the \$0.5 million TRUP, it was the Corporation's opinion that the carrying value of this TRUP at its original cost of \$0.5 million was supported by the issuer's financial position at March 31, 2012. While the fair value of the TRUP was \$0.3 million below the Corporation's amortized cost at March 31, 2012, the Corporation concluded that the impairment was temporary in nature at March 31, 2012.

Table of Contents

At March 31, 2012, the Corporation expected to fully recover the entire amortized cost basis of each impaired investment security in its investment securities portfolio at that date. Furthermore, at March 31, 2012, the Corporation did not have the intent to sell any of its impaired investment securities and believed that it was more-likely-than-not that the Corporation would not have to sell any of its impaired investment securities before a full recovery of amortized cost. However, there can be no assurance that OTTI losses will not be recognized on the TRUPs or on any other investment security in the future.

Loans

The Corporation's loan portfolio is comprised of commercial, real estate commercial, real estate construction and land development loans, referred to as the Corporation's commercial loan portfolio, and real estate residential, consumer installment and home equity loans, referred to as the Corporation's consumer loan portfolio. At March 31, 2012, the Corporation's loan portfolio was \$3.84 billion and consisted of loans in the commercial loan portfolio totaling \$2.10 billion, or 55% of total loans, and loans in the consumer loan portfolio totaling \$1.74 billion, or 45% of total loans. Loans at fixed interest rates comprised 71% of the Corporation's total loan portfolio at March 31, 2012 and December 31, 2011, compared to 72% at March 31, 2011.

Chemical Bank is a full-service commercial bank and, therefore, the acceptance and management of credit risk is an integral part of the Corporation's business. The Corporation maintains loan policies and credit underwriting standards as part of the process of managing credit risk. These standards include making loans generally only within the Corporation's market areas. The Corporation's lending markets generally consist of communities across the middle to southern and western sections of the lower peninsula of Michigan. The Corporation's lending market areas do not include the southeastern portion of Michigan. The Corporation has no foreign loans or any loans to finance highly leveraged transactions. The Corporation's lending philosophy is implemented through strong administrative and reporting controls. The Corporation maintains a centralized independent loan review function that monitors the approval process and ongoing asset quality of the loan portfolio.

Total loans were \$3.84 billion at March 31, 2012, an increase of \$12 million, or an annualized growth rate of 1.2%, from total loans of \$3.83 billion at December 31, 2011 and an increase of \$161 million, or 4.4%, from total loans of \$3.68 billion at March 31, 2011. While loan demand eased in the first quarter of 2012, the increase in total loans during the twelve months ended March 31, 2012 was attributable to a combination of improving economic conditions and higher loan demand, as well as the Corporation increasing its market share.

A summary of the composition of the Corporation's loan portfolio, by major loan category, follows:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Commercial loan portfolio:			
Commercial	\$ 903,935	\$ 895,150	\$ 821,115
Real estate commercial	1,095,793	1,071,999	1,074,842
Real estate construction and land development	101,157	118,176	139,439
Subtotal	2,100,885	2,085,325	2,035,396
Consumer loan portfolio:			
Real estate residential	861,301	861,716	809,085
Consumer installment and home equity	880,912	884,244	838,035
Subtotal	1,742,213	1,745,960	1,647,120
Total loans	\$ 3,843,098	\$ 3,831,285	\$ 3,682,516

A discussion of the Corporation's loan portfolio by category follows.

Table of Contents

Commercial Loan Portfolio

The Corporation's commercial loan portfolio is comprised of commercial loans, real estate commercial loans, real estate construction loans and land development loans. The Corporation's commercial loan portfolio is well diversified across business lines and has no concentration in any one industry. The commercial loan portfolio of \$2.10 billion at March 31, 2012 included 57 loan relationships of \$5.0 million or greater. These 57 loan relationships totaled \$477 million and represented 23% of the commercial loan portfolio at March 31, 2012 and included 11 loan relationships that had outstanding balances of \$10 million or higher, totaling \$147 million, or 7%, of the commercial loan portfolio at that date. Further, the Corporation had 13 loan relationships at March 31, 2012 with loan balances greater than \$5.0 million and less than \$10 million, totaling \$102 million, that had unfunded credit amounts that, if advanced, could result in a loan relationship of \$10 million or more.

Commercial loans consist of loans and lines of credit to varying types of businesses, including municipalities, school districts and nonprofit organizations, for the purpose of supporting working capital and operational needs and term financing of equipment. Repayment of such loans is generally provided through operating cash flows of the customer. Commercial loans are generally secured with inventory, accounts receivable, equipment, personal guarantees of the owner or other sources of repayment, although the Corporation may also obtain real estate as collateral.

Commercial loans were \$903.9 million at March 31, 2012, an increase of \$8.7 million, or 1.0%, from commercial loans of \$895.2 million at December 31, 2011 and an increase of \$82.8 million, or 10.1%, from commercial loans of \$821.1 million at March 31, 2011. Commercial loans represented 23.5% of the Corporation's loan portfolio at March 31, 2012, compared to 23.3% and 22.3% at December 31, 2011 and March 31, 2011, respectively.

Real estate commercial loans include loans that are secured by real estate occupied by the borrower for ongoing operations, non-owner occupied real estate leased to one or more tenants and vacant land that has been acquired for investment or future land development. Real estate commercial loans were \$1.09 billion at March 31, 2012, an increase of \$23.8 million, or 2.2%, from real estate commercial loans of \$1.07 billion at December 31, 2011 and an increase of \$21.0 million, or 1.9%, from real estate commercial loans of \$1.07 billion at March 31, 2011. Loans secured by owner occupied properties, non-owner occupied properties and vacant land comprised 63%, 34% and 3%, respectively, of the Corporation's real estate commercial loans outstanding at March 31, 2012. Real estate commercial loans represented 28.5% of the Corporation's loan portfolio at March 31, 2012, compared to 28.0% and 29.2% at December 31, 2011 and March 31, 2011, respectively.

Real estate commercial lending is generally considered to involve a higher degree of risk than real estate residential, consumer installment and home equity lending, and typically involves larger loan balances concentrated in a single borrower. In addition, the payment experience on loans secured by income-producing properties and vacant land loans are typically dependent on the success of the operation of the related project and is typically affected by adverse conditions in the real estate market and in the economy.

The Corporation generally attempts to mitigate the risks associated with commercial and real estate commercial lending by, among other things, lending primarily in its market areas, lending across industry lines, not developing a concentration in any one line of business and using prudent loan-to-value ratios in the underwriting process. Michigan's economy showed signs of improvement during 2011 and the first three months of 2012, resulting in lower loan delinquencies compared to the previous three years. However, the market values of real estate in the State of Michigan continued to decline in many areas, resulting in commercial and residential real estate foreclosures continuing to remain higher than historical averages, in particular for those loans where the primary source of repayment is through the sale of the underlying collateral. Accordingly, management expects real estate foreclosures to remain elevated despite improvements in Michigan's economy. It is management's belief that the loan portfolio is generally well-secured, despite declining market values for all types of real estate in the State of Michigan and nationwide over the past three years.

Table of Contents

Real estate construction and land development loans are primarily originated for construction of commercial properties and land development. Land development loans include loans made to developers for the purpose of infrastructure improvements to vacant land to create finished marketable residential and commercial lots/land. Real estate construction loans often convert to a real estate commercial loan at the completion of the construction period; however, most land development loans are originated with the intention that the loans will be repaid through the sale of finished properties by the developers within twelve months of the completion date. Real estate construction and land development loans were \$101.2 million at March 31, 2012, a decrease of \$17.0 million, or 14%, from real estate construction and land development loans of \$118.2 million at December 31, 2011 and a decrease of \$38.2 million, or 27%, from real estate construction and land development loans of \$139.4 million at March 31, 2011. The Corporation's land development loans totaled \$44.3 million, \$44.8 million and \$50.5 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively, and consisted primarily of loans to develop residential real estate. Real estate construction and land development loans represented 2.7% of the Corporation's loan portfolio at March 31, 2012, compared to 3.1% and 3.8% at December 31, 2011 and March 31, 2011, respectively.

Real estate construction lending involves a higher degree of risk than real estate commercial lending and real estate residential lending because of the uncertainties of construction, including the possibility of costs exceeding the initial estimates, the need to obtain a tenant or purchaser of the property if it will not be owner-occupied or the need to sell developed properties. The Corporation generally attempts to mitigate the risks associated with real estate construction lending by, among other things, lending primarily in its market areas, using prudent underwriting guidelines and closely monitoring the construction process. The Corporation's risk in this area has increased since early 2008 due to the weak economic environment within the State of Michigan. While the economy in Michigan began improving in 2011, the sale of lots and units in both residential and commercial development projects remains weak, as customer demand also remains low, resulting in the inventory of unsold lots and housing units remaining high across the State of Michigan and resulting in the inability of most developers to sell their finished developed lots and units within their original expected time frames. Accordingly, the Corporation's land development borrowers have sold a small percentage of their developed lots or units since early 2008 due to the unfavorable economic environment. At March 31, 2012, \$8.9 million, or 20%, of the Corporation's \$44.3 million of land development loans were impaired, whereby the Corporation determined it was probable that the full amount of principal and interest would not be collected on these loans in accordance with their original contractual terms.

Consumer Loan Portfolio

The Corporation's consumer loan portfolio is comprised of real estate residential loans, consumer installment loans and home equity loans and lines of credit.

Real estate residential loans consist primarily of one- to four-family residential loans with fixed interest rates of fifteen years or less. The loan-to-value ratio at the time of origination is generally 80% or less. Loans with more than an 80% loan-to-value ratio generally require private mortgage insurance.

Real estate residential loans were \$861.3 million at March 31, 2012, a decrease of \$0.4 million from real estate residential loans of \$861.7 million at December 31, 2011 and an increase of \$52.2 million, or 6.5%, from real estate residential loans of \$809.1 million at March 31, 2011. Real estate residential loans have historically involved the least amount of credit risk in the Corporation's loan portfolio, although the risk on these loans has increased with the increase in the unemployment rate in the State of Michigan and the decrease in real estate property values in the State of Michigan. Real estate residential loans also include loans to consumers for the construction of single family residences that are secured by these properties. Real estate residential construction loans to consumers were \$27.0 million at March 31, 2012, compared to \$21.6 million at December 31, 2011 and \$16.1 million at March 31, 2011. Real estate residential loans represented 22.4% of the Corporation's loan portfolio at March 31, 2012, compared to 22.5% and 22.0% at December 31, 2011 and March 31, 2011, respectively.

During the first quarter of 2012, the Corporation originated \$118 million of real estate residential loans, of which it retained \$40 million in its loan portfolio, with the majority of the real estate residential loan originations in the first quarter of 2012 attributable to refinances of existing loans. The demand for longer term fixed interest rate real estate residential loans was high in 2011 and the first quarter of 2012 due to the historical low level of long-term interest rates. The Corporation has historically sold fixed interest rate real estate residential loans originated with maturities of fifteen years and over in the secondary market. However, due to a general low level of loan demand across its market areas, the Corporation retained \$15 million of fixed interest rate real estate residential loans with terms of fifteen years in its loan portfolio during the first quarter of 2012, compared to \$99 million for all of 2011. At March 31, 2012, \$273 million, or 32%, of the Corporation's real estate residential loans were at fixed interest rates with maturities beyond 2016.

Table of Contents

The Corporation's consumer installment and home equity loans and lines of credit (collectively referred to as consumer loans) consist of relatively small loan amounts to consumers to finance personal items, primarily automobiles, recreational vehicles, boats and home improvements. Consumer loans are spread across many individual borrowers, which minimizes the risk per loan transaction. Consumer installment loans include indirect loans for automobiles, recreational vehicles and marine vehicles purchased from dealerships. Home equity loans and lines of credit are comprised of loans to consumers who utilize equity in their personal residence, generally through a second mortgage, as collateral to secure the loan or line of credit. Collateral values on properties securing consumer loans are negatively impacted by many factors, including the physical condition of the collateral and property values, although losses on consumer loans are often more significantly impacted by the unemployment rate and other economic conditions.

Consumer loans were \$880.9 million at March 31, 2012, a decrease of \$3.3 million from consumer loans of \$884.2 million at December 31, 2011 and an increase of \$42.9 million, or 5.1%, from consumer loans of \$838.0 million at March 31, 2011. At March 31, 2012, approximately 47% of consumer loans were secured by the borrowers' personal residences (primarily second mortgages), 23% by automobiles, 20% by recreational vehicles, 8% by marine vehicles and the remaining 2% was mostly unsecured. Consumer loans represented 22.9% of the Corporation's loan portfolio at March 31, 2012, compared to 23.1% and 22.7% at December 31, 2011 and March 31, 2011, respectively.

Consumer loans generally have shorter terms than residential mortgage loans, but generally involve more credit risk than real estate residential lending because of the type and nature of the collateral. The Corporation originates consumer loans utilizing a computer-based credit scoring analysis to supplement the underwriting process. Consumer lending collections are dependent on the borrowers' continuing financial stability and are more likely to be affected by adverse personal situations. The unemployment rate in the State of Michigan was 8.5% at March 31, 2012, down from 9.3% at December 31, 2011 and 10.5% at March 31, 2011, although still higher than the national average of 8.2% at March 31, 2012. With improvement in the unemployment rate, the Corporation experienced decreases in losses on consumer loans, with net loan losses totaling 44 basis points (annualized) of average consumer loans during the first three months of 2012, compared to 60 basis points of average consumer loans in 2011. The credit risk on home equity loans and lines of credit has historically been low as property values of residential real estate had historically increased year over year. However, this credit risk has increased since the beginning of 2008 as property values have declined throughout the State of Michigan, thus increasing the risk of insufficient collateral on some home equity loans and lines of credit, and in some instances no collateral on home equity loans and lines of credit, as the majority of these loans are secured by a second mortgage on the borrowers' residences. While Michigan's economy has shown signs of improvement, an increase in property values in Michigan has yet to follow. The majority of the Corporation's home equity lines of credit are comprised of loans with payments of interest only until their maturity. Home equity lines of credit have original maturities up to ten years. Home equity lines of credit comprised 21% of the Corporation's consumer loans at both March 31, 2012 and December 31, 2011, compared to 22% at March 31, 2011.

Nonperforming Assets

Nonperforming assets include nonperforming loans, which consist of originated loans for which the accrual of interest has been discontinued (nonaccrual loans), originated loans that are past due as to principal or interest by 90 days or more and still accruing interest and originated loans that have been modified under troubled debt restructurings (TDRs) where a concession has been granted to the borrower due to a decline in credit quality of the loan and the borrower has not satisfied the Corporation's payment policy (as described below) to be considered performing. Nonperforming assets also include assets obtained through foreclosures and repossessions, including foreclosed and repossessed assets acquired as a result of the OAK acquisition. The Corporation transfers an originated loan that is 90 days or more past due to nonaccrual status (except for real estate residential loans that are transferred at 120 days past due), unless it believes the loan is both well-secured and in the process of collection. TDRs continue to be reported as nonperforming loans until a six-month payment history of principal and interest payments is sustained in accordance with the terms of the loan modification, at which time the loan is no longer considered a nonperforming asset and the Corporation moves the loan to a performing TDR status.

Nonperforming assets were \$124.5 million at March 31, 2012, compared to \$131.8 million at December 31, 2011 and \$172.2 million at March 31, 2011, and represented 2.3%, 2.5% and 3.2%, respectively, of total assets. The decrease in nonperforming assets since March 31, 2011 is a sign of improvement in the credit quality of the Corporation's loan portfolio and the improving economic climate in Michigan that began in 2011. However, the Corporation's levels of nonperforming assets have remained elevated, compared to historical levels, due to the unfavorable economic climate within the State of Michigan that has existed for more than four years, which resulted in cash flow difficulties being encountered by many business and consumer loan customers. The Corporation's nonperforming assets are not concentrated in any one industry or any one geographical area within Michigan, other than \$5.4 million in nonperforming land development loans. At March 31, 2012, there were three commercial loan relationships exceeding \$2.5 million, totaling \$11.9 million, that were in nonperforming status. Based on declines in both residential and commercial real estate appraised

Table of Contents

values due to the weakness in the Michigan economy over the past several years, management continues to evaluate and, when appropriate, obtain new appraisals or discount appraised values to compute net realizable values of nonperforming real estate secured loans and other real estate properties. While the economic climate within Michigan has shown signs of improvement, it is management's belief that nonperforming assets will remain at elevated levels through the remainder of 2012 and beyond.

The following schedule provides a summary of nonperforming assets, including the composition of nonperforming loans by major loan category.

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Nonaccrual loans:			
Commercial	\$ 11,443	\$ 10,726	\$ 15,672
Real estate commercial	46,870	44,438	59,931
Real estate construction and land development	3,809	6,190	9,414
Real estate residential	12,687	12,573	15,505
Consumer installment and home equity	4,344	4,467	5,774
Total nonaccrual loans	79,153	78,394	106,296
Accruing loans contractually past due 90 days or more as to interest or principal payments:			
Commercial	1,005	1,381	455
Real estate commercial	75	374	459
Real estate construction and land development		287	
Real estate residential	333	752	191
Consumer installment and home equity	1,233	1,023	1,091
Total accruing loans contractually past due 90 days or more as to interest or principal payments	2,646	3,817	2,196
Nonperforming TDRs:			
Commercial loan portfolio	11,258	14,675	15,201
Consumer loan portfolio	5,491	9,383	22,166
Total nonperforming TDRs	16,749	24,058	37,367
Total nonperforming loans	98,548	106,269	145,859
Other real estate and repossessed assets(1)	25,944	25,484	26,355
Total nonperforming assets	\$ 124,492	\$ 131,753	\$ 172,214
Nonperforming loans as a percent of total loans	2.56%	2.77%	3.96%
Nonperforming assets as a percent of total assets	2.28%	2.47%	3.23%

(1) Includes property acquired through foreclosure and by acceptance of a deed in lieu of foreclosure and other property held for sale, including properties acquired as a result of the OAK acquisition.

The following schedule summarizes changes in nonaccrual loans during the three months ended March 31, 2012 and 2011.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Table of Contents

The following schedule provides the composition of nonperforming loans by major loan category.

	March 31, 2012		December 31, 2011		March 31, 2011	
	Amount	Percent of Total	Amount	Percent of Total	Amount	Percent of Total
(In thousands)						
Commercial loan portfolio:						
Commercial	\$ 16,664	17%	\$ 15,684	15%	\$ 21,946	15%
Real estate commercial	52,349	53	55,791	53	69,772	48
Real estate construction and land development	5,447	6	6,596	6	9,414	6
Subtotal-commercial loan portfolio	74,460	76	78,071	74	101,132	69
Consumer loan portfolio:						
Real estate residential	18,511	18	22,708	21	37,862	26
Consumer installment and home equity	5,577	6	5,490	5	6,865	5
Subtotal-consumer loan portfolio	24,088	24	28,198	26	44,727	31
Total nonperforming loans	\$ 98,548	100%	\$ 106,269	100%	\$ 145,859	100%

Total nonperforming loans were \$98.5 million at March 31, 2012, a decrease of \$7.8 million, or 7.3%, compared to \$106.3 million at December 31, 2011 and a decrease of \$47.4 million, or 32%, compared to \$145.9 million at March 31, 2011. The Corporation's nonperforming loans in the commercial loan portfolio were \$74.5 million at March 31, 2012, a decrease of \$3.6 million, or 4.6%, from \$78.1 million at December 31, 2011 and a decrease of \$26.6 million, or 26%, from \$101.1 million at March 31, 2011. Nonperforming loans in the commercial loan portfolio comprised 76%, 74% and 69% of total nonperforming loans at March 31, 2012, December 31, 2011 and March 31, 2011, respectively. The Corporation's nonperforming loans in the consumer loan portfolio were \$24.0 million at March 31, 2012, a decrease of \$4.2 million, or 15%, from \$28.2 million at December 31, 2011 and a decrease of \$20.8 million, or 46%, from \$44.8 million at March 31, 2011.

Nonperforming Loans - Commercial Loan Portfolio

The following schedule presents data related to nonperforming loans in the commercial loan portfolio by dollar amount at March 31, 2012, December 31, 2011 and March 31, 2011.

	March 31, 2012		December 31, 2011		March 31, 2011	
	Number of Borrowers	Amount	Number of Borrowers	Amount	Number of Borrowers	Amount
(Dollars in thousands)						
\$5,000,000 or more	1	\$ 6,777	1	\$ 6,906	1	\$ 7,277
\$2,500,000 - \$4,999,999	2	5,140	2	5,192	4	11,577
\$1,000,000 - \$2,499,999	13	21,104	14	23,516	17	28,684
\$500,000 - \$999,999	21	15,051	19	13,565	23	15,827
\$250,000 - \$499,999	38	13,011	39	13,738	54	19,999
Under \$250,000	158	13,377	177	15,154	187	17,768
Total	233	\$ 74,460	252	\$ 78,071	286	\$ 101,132

Nonperforming commercial loans were \$16.7 million at March 31, 2012, an increase of \$1.0 million, or 6.2%, from \$15.7 million at December 31, 2011 and a decrease of \$5.2 million, or 24%, from \$21.9 million at March 31, 2011. The nonperforming commercial loans at March 31, 2012 were not concentrated in any single industry.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

Nonperforming real estate commercial loans were \$52.4 million at March 31, 2012, a decrease of \$3.4 million, or 6.2%, from \$55.8 million at December 31, 2011 and a decrease of \$17.4 million, or 25% from \$69.8 million at March 31, 2011. Nonperforming real estate commercial loans secured by owner occupied real estate, non-owner occupied real estate and vacant land totaled \$25.9 million, \$18.8 million and \$7.7 million, respectively, at March 31, 2012, and comprised 4.5%, 7.6% and 27.4%, respectively, of total owner occupied real estate, non-owner occupied real estate and vacant land loans included in the Corporation's originated real estate commercial loans at March 31, 2012. At March 31, 2012, the Corporation's nonperforming real estate commercial loans were comprised of a diverse mix of commercial lines of business and were also geographically disbursed throughout the Corporation's market areas. The largest concentration of the \$52.4 million in nonperforming real estate commercial loans at March 31, 2012 was one

Table of Contents

customer relationship totaling \$6.6 million that was secured by a combination of vacant land and non-owner occupied commercial real estate. This same customer relationship had another \$0.2 million included in nonperforming real estate construction and land development loans and \$0.4 million included in nonperforming real estate residential loans. At March 31, 2012, \$8.3 million of the nonperforming real estate commercial loans were in various stages of foreclosure with 34 borrowers. Challenges remain in the Michigan economy, despite some signs of improvement, thus creating a difficult business environment for many lines of business across the state.

Nonperforming real estate construction and land development loans were \$5.4 million at March 31, 2012, a decrease of \$1.2 million, or 18%, from \$6.6 million at December 31, 2011 and a decrease of \$4.0 million, or 43%, from \$9.4 million at March 31, 2011. At March 31, 2012, all of the nonperforming real estate construction and land development loans were land development loans secured primarily by residential real estate improved lots and housing units. The \$5.4 million of nonperforming loans secured by land development projects represented 17% of total originated land development loans outstanding of \$31.4 million at March 31, 2012. The economy in Michigan has adversely impacted housing demand throughout the state since 2008 and, accordingly, a significant percentage of the Corporation's residential real estate development borrowers have experienced cash flow difficulties associated with a significant decline in sales of both lots and residential real estate.

Nonperforming Loans - Consumer Loan Portfolio

Nonperforming real estate residential loans were \$18.5 million at March 31, 2012, a decrease of \$4.2 million, or 19%, from \$22.7 million at December 31, 2011 and a decrease of \$19.4 million, or 51%, from \$37.9 million at March 31, 2011. The decrease in nonperforming real estate residential loans during the first quarter of 2012 was attributable to a decline in nonperforming TDRs. At March 31, 2012, a total of \$5.9 million of nonperforming real estate residential loans were in various stages of foreclosure.

Nonperforming consumer installment and home equity loans were \$5.6 million at March 31, 2012, an increase of \$0.1 million from \$5.5 million at December 31, 2011 and a decrease of \$1.3 million, or 19%, from \$6.9 million at March 31, 2011.

Troubled Debt Restructurings (TDRs)

The unfavorable economic climate in Michigan has resulted in a large number of both business and consumer customers with cash flow difficulties and thus the inability to maintain their loan balances in a performing status. The Corporation determined that it was probable that certain customers who were past due on their loans, if provided a modification of their loan by reducing their monthly payment for a limited time period, would be able to bring their loan relationship to a performing status. The Corporation believed these modifications would potentially result in a lower level of loan losses and loan collection costs than if the Corporation currently proceeded through the foreclosure process with these borrowers. These modifications involve granting concessions to borrowers who are experiencing financial difficulty and, therefore, meet the criteria to be considered TDRs.

The Corporation's loans reported as TDRs continue to accrue interest at the loan's effective interest rate as the Corporation expects to collect the remaining principal balance of the loan. The Corporation recognizes interest income on TDRs at the loan's original contractual rate at the time of modification. TDRs are reported as a nonperforming loan (nonperforming TDR) until a six-month payment history of principal and interest payments, in accordance with the loan modification, is sustained, at which time the Corporation moves the loans to a performing status (performing TDR). The Corporation's loans reported as TDRs do not include modified loans that are already reported in a nonaccrual status. The Corporation's nonaccrual loans at March 31, 2012, December 31, 2011 and March 31, 2011 included \$38.6 million, \$41.8 million and \$58.7 million, respectively, of these modified loans.

The following summarizes the Corporation's TDRs at March 31, 2012:

	Performing Status	Nonperforming Status			Total
		Current	Past Due 31-90 Days (In thousands)	Sub-Total	
Commercial loan portfolio	\$ 8,521	\$ 11,054	\$ 204	\$ 11,258	\$ 19,779
Consumer loan portfolio	18,656	4,891	600	5,491	24,147
Total TDRs	\$ 27,177	\$ 15,945	\$ 804	\$ 16,749	\$ 43,926

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

The Corporation's TDRs in the commercial loan portfolio generally consist of loans where the Corporation has allowed borrowers to temporarily defer scheduled principal payments and make interest only payments for a short period of time (generally six months to

Table of Contents

one year) at the stated interest rate of the original loan agreement or lower payments due to a modification of the loan's contractual terms. The Corporation does not expect to incur a loss on these loans based on its assessment of the borrowers' expected cash flows, and accordingly, no additional provision for loan losses has been recognized related to these loans. These TDRs are individually evaluated for impairment and transferred to nonaccrual status if conditions change and it is probable that any remaining principal and interest payments due on the loans will not be collected in accordance with the modified contractual terms of the loans. Once the borrowers under these TDRs have made at least six consecutive months of principal and interest payments under a formal modification agreement that follows the temporary deferral period, the loans are classified by the Corporation as performing TDRs. The outstanding balance of nonperforming TDRs in the commercial loan portfolio was \$11.3 million, \$14.7 million and \$15.2 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively. At March 31, 2012 and December 31, 2011, the Corporation had \$8.5 million and \$4.8 million of performing TDRs in the commercial loan portfolio due to the borrowers' sustained repayment histories.

A rollforward of the Corporation's TDRs in the commercial loan portfolio for the three months ended March 31, 2012 follows:

	Performing	Nonperforming (In thousands)	Total
Balance at January 1, 2012	\$ 4,765	\$ 14,675	\$ 19,440
Additions for modifications		4,429	4,429
Transfers to performing TDR status	3,483	(3,483)	
Transfers to nonperforming TDR status	(312)	312	
Principal payments and pay-offs	(78)	(128)	(206)
Transfers from (to) nonaccrual status	663	(4,547)	(3,884)
Balance at March 31, 2012	\$ 8,521	\$ 11,258	\$ 19,779

The Corporation's TDRs in the consumer loan portfolio generally consist of loans where the Corporation has reduced a borrower's monthly payments by decreasing the interest rate charged on the loan to 3%-5% for a specified period of time (generally 24 months). These loans are moved to nonaccrual status if the loan becomes 90 days past due as to principal or interest, or sooner if conditions warrant. Once the borrowers under these TDRs have made at least six consecutive months of principal and interest payments, they are classified as performing TDRs. The outstanding balance of nonperforming TDRs in the consumer loan portfolio was \$5.5 million, \$9.4 million and \$22.2 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively. At March 31, 2012 and December 31, 2011, the Corporation had \$18.7 million and \$15.6 million, respectively, of performing TDRs in the consumer loan portfolio due to the borrowers' sustained repayment histories. The Corporation recognized \$0.1 million of additional provision for loan losses during the three months ended March 31, 2012 related to impairment on its TDRs (as a result of the temporary reduction in the borrowers' interest rates) at the time the loans were modified based on the present value of expected future cash flows discounted at the loan's original effective interest rate.

The Corporation's cumulative redefault rate as of March 31, 2012 on its TDRs, which represents the percentage of TDRs that transferred to nonaccrual status since the Corporation began such modifications in 2009, was 22% for TDRs in the commercial loan portfolio and 16% for TDRs in the consumer loan portfolio.

Other Real Estate and Repossessed Assets

Other real estate and repossessed assets are components of nonperforming assets that include other real estate (ORE), comprised of residential and commercial real estate and land development properties acquired through foreclosure or by acceptance of a deed in lieu of foreclosure, and repossessed assets, comprised of other personal and commercial assets. ORE totaled \$25.5 million at March 31, 2012, an increase of \$0.6 million, or 2.4%, from \$24.9 million at December 31, 2011 and a decrease of \$0.3 million, or 1.2%, from \$25.8 million at March 31, 2011. Repossessed assets totaled \$0.5 million, \$0.6 million and \$0.6 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively.

Table of Contents

The following schedule provides the composition of ORE:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Composition of ORE:			
Vacant land	\$ 7,036	\$ 7,565	\$ 8,501
Commercial properties	10,453	9,565	9,102
Residential real estate properties	6,598	6,171	5,088
Residential development properties	1,397	1,587	3,106
Total ORE	\$ 25,484	\$ 24,888	\$ 25,797

The following schedule summarizes ORE activity during the three months ended March 31, 2012 and 2011.

	Three Months Ended March 31, 2012 2011 (In thousands)	
Balance at beginning of period	\$ 24,888	\$ 26,977
Additions	3,646	2,042
Write-downs to fair value	(206)	(493)
Dispositions	(2,844)	(2,729)
Balance at end of period	\$ 25,484	\$ 25,797

The Corporation's ORE is carried at the lower of cost or fair value less estimated cost to sell. The Corporation's \$25.5 million of ORE at March 31, 2012 included ten ORE properties with a carrying value of \$0.5 million or more totaling \$9.5 million. The historically large inventory of real estate properties for sale across the State of Michigan has resulted in an increase in the Corporation's carrying time and cost of holding ORE. Consequently, the Corporation had \$13.6 million in ORE at March 31, 2012 that had been held in excess of one year, of which \$3.2 million had been held in excess of three years. Because the redemption period on foreclosures is relatively long in Michigan (six months to one year) and the Corporation had \$14.2 million of nonperforming loans that were in the process of foreclosure at March 31, 2012, it is anticipated that the level of the Corporation's ORE will remain at elevated levels.

All of the Corporation's ORE properties have been written down to fair value through a charge-off against the allowance for loan losses at the time the loan was transferred to ORE or through a subsequent write-down, recorded as an operating expense, to recognize a further market value decline of the property after the initial transfer date. In addition, ORE properties acquired in the acquisition of OAK were recorded at fair value at the date of acquisition. Accordingly, at March 31, 2012, the carrying value of ORE of \$25.5 million was reflective of \$40.9 million in charge-offs, write-downs or fair value adjustments, and represented 38% of the contractual loan balance remaining at the time the property was transferred to ORE.

During the three months ended March 31, 2012, the Corporation sold 45 ORE properties for net proceeds of \$3.0 million. On an average basis, the net proceeds from these sales represented 117% of the carrying value of the property at the time of sale, although the net proceeds represented 60% of the remaining loan balance at the time the Corporation received title to the properties.

Nonperforming assets at March 31, 2012, December 31, 2011 and March 31, 2011 did not include acquired loans totaling \$15.5 million, \$17.4 million and \$17.7 million, respectively, that were not performing in accordance with the loans' original contractual terms due to a market interest yield being recognized on these loans into interest income. The risk of credit loss on these loans was recognized as part of the fair value adjustment recorded at the acquisition date. Acquired loans not performing in accordance with the loans' original contractual terms are included in the Corporation's impaired loan schedule in Note 4 to the consolidated financial statements.

Table of Contents**Impaired Loans**

A loan is considered impaired when management determines it is probable that all of the principal and interest due will not be collected according to the original contractual terms of the loan agreement. In most instances, impairment is measured based on the fair market value of the underlying collateral, as such impaired loans are deemed collateral dependent. Impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate. A portion of the allowance for loan losses is specifically allocated to impaired loans. The process of measuring impaired loans and the allocation of the allowance for loan losses requires judgment and estimation. The eventual outcome may differ from amounts estimated.

Impaired loans totaled \$138.6 million at March 31, 2012, a decrease of \$1.6 million, or 1.2%, compared to \$140.2 million at December 31, 2011 and a decrease of \$22.8 million, or 14%, compared to \$161.4 million at March 31, 2011. A summary of impaired loans at March 31, 2012, December 31, 2011 and March 31, 2011 follows:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Originated impaired loans:			
Commercial loan portfolio:			
Nonaccrual loans	\$ 62,122	\$ 61,354	\$ 85,018
Nonperforming TDRs	11,258	14,675	15,201
Performing TDRs	8,521	4,765	
Subtotal	81,901	80,794	100,219
Consumer loan portfolio:			
Nonaccrual loans	17,031	17,040	21,279
Nonperforming TDRs	5,491	9,383	22,166
Performing TDRs	18,656	15,629	
Subtotal	41,178	42,052	43,445
Total originated impaired loans	123,079	122,846	143,664
Acquired loans not performing in accordance with original contractual terms	15,495	17,375	17,747
Total impaired loans	\$ 138,574	\$ 140,221	\$ 161,411

After analyzing the various components of the customer relationships and evaluating the underlying collateral of impaired loans, it was determined that impaired nonaccrual loans of the commercial loan portfolio totaling \$30.9 million at March 31, 2012 required a specific allocation of the allowance for loan losses (valuation allowance), compared to \$27.3 million at December 31, 2011 and \$37.9 million at March 31, 2011. The Corporation's nonperforming and performing TDRs in the commercial loan portfolio did not require a valuation allowance as the Corporation expects to collect the full principal and interest owed on each of the loans.

Table of Contents

The following schedule summarizes impaired loans in the commercial loan portfolio and the related valuation allowance at March 31, 2012, December 31, 2011 and March 31, 2011 and partial loan charge-offs (confirmed losses) taken on these impaired loans:

	Amount	Valuation Allowance (In thousands)	Confirmed Losses	Cumulative Inherent Loss Percentage
March 31, 2012				
Impaired loans originated commercial loan portfolio:				
With valuation allowance and no charge-offs	\$ 18,689	\$ 5,437	\$	29%
With valuation allowance and charge-offs	12,222	3,740	1,683	39
With charge-offs and no valuation allowance	27,291		18,168	40
Without valuation allowance or charge-offs	23,699			
Total	81,901	\$ 9,177	\$ 19,851	29%
Impaired acquired loans	15,495			
Total impaired loans in the commercial loan portfolio	\$ 97,396			
December 31, 2011				
Impaired loans originated commercial loan portfolio:				
With valuation allowance and no charge-offs	\$ 12,658	\$ 3,717	\$	29%
With valuation allowance and charge-offs	14,656	4,865	2,640	43
With charge-offs and no valuation allowance	25,407		19,015	43
Without valuation allowance or charge-offs	28,073			
Total	80,794	\$ 8,582	\$ 21,655	30%
Impaired acquired loans	17,375			
Total impaired loans in the commercial loan portfolio	\$ 98,169			
March 31, 2011				
Impaired loans originated commercial loan portfolio:				
With valuation allowance and no charge-offs	\$ 23,697	\$ 7,595	\$	32%
With valuation allowance and charge-offs	14,226	3,581	3,157	39
With charge-offs and no valuation allowance	26,492		20,120	43
Without valuation allowance or charge-offs	35,804			
Total	100,219	\$ 11,176	\$ 23,277	28%
Impaired acquired loans	17,747			
Total impaired loans in the commercial loan portfolio	\$ 117,966			

The Corporation's valuation allowance for impaired loans of the commercial loan portfolio was \$9.2 million at March 31, 2012, an increase of \$0.6 million from \$8.6 million at December 31, 2011 and a decrease of \$2.0 million from \$11.2 million at March 31, 2011. Confirmed losses represent partial loan charge-offs on impaired loans due primarily to the receipt of a recent third-party property appraisal indicating the value of the collateral securing the loan is below the loan balance and management believes full collection of the loan balance is not likely.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

The Corporation generally does not recognize a valuation allowance for impaired loans in the consumer loan portfolio as these loans are comprised of smaller-balance homogeneous loans that are collectively evaluated for impairment. However, the Corporation had a valuation allowance attributable to TDRs in the consumer loan portfolio of \$0.7 million at both March 31, 2012 and December 31, 2011, compared to \$0.8 million at March 31, 2011, related to the reduction in the present value of expected future cash flows for these loans discounted at their original effective interest rate.

Impaired loans included acquired loans totaling \$15.5 million, \$17.4 million and \$17.7 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively, that were not performing in accordance with the original contractual terms of the loans. These individual loans did not require a valuation allowance as they were initially recorded at fair value, which included an estimate for credit losses, and are subsequently evaluated for further credit deterioration in loan pools. At March 31, 2012 and December 31, 2011, \$2.2 million and \$1.6 million, respectively, of the allowance for loan losses was allocated to acquired loans due primarily to one of the fourteen acquired loan pools experiencing a decline in expected cash flows. There were no material changes in expected cash flows for the remaining acquired loan pools.

Table of Contents**Allowance for Loan Losses**

The allowance for loan losses (allowance) provides for probable losses in the originated loan portfolio that have been identified with specific customer relationships and for probable losses believed to be inherent in the remainder of the originated loan portfolio but that have not been specifically identified. The allowance is comprised of specific valuation allowances (assessed for originated loans that have known credit weaknesses), pooled allowances based on assigned risk ratings and historical loan loss experience for each loan type, and an unallocated allowance for imprecision in the subjective nature of the specific and pooled allowance methodology. Management evaluates the allowance on a quarterly basis in an effort to ensure the level is adequate to absorb probable losses inherent in the loan portfolio. This evaluation process is inherently subjective as it requires estimates that may be susceptible to significant change and has the potential to affect net income materially. The Corporation's methodology for measuring the adequacy of the allowance includes several key elements, which includes a review of the loan portfolio, both individually and by category, and includes consideration of changes in the mix and volume of the loan portfolio, actual loan loss experience, review of collateral values, the financial condition of the borrowers, industry and geographical exposures within the portfolio, economic conditions and employment levels of the Corporation's local markets and other factors affecting business sectors. Management believes that the allowance is currently maintained at an appropriate level, considering the inherent risk in the loan portfolio. Future significant adjustments to the allowance may be necessary due to changes in economic conditions, delinquencies or the level of loan losses incurred.

The allowance of the acquired loan portfolio was not carried over on the date of acquisition. The acquired loans were recorded at their estimated fair value at the date of acquisition, with the estimated fair value including a component for expected credit losses. Acquired loans are subsequently evaluated for further credit deterioration in loan pools, which consist of loans with similar credit risk characteristics. If an acquired loan pool experiences a decrease in expected cash flows, as compared to those expected at the acquisition date, a portion of the allowance is allocated to acquired loans. At March 31, 2012 and December 31, 2011, \$2.2 million and \$1.6 million, respectively, of the allowance was allocated to acquired loans due primarily to one of the fourteen acquired loan pools experiencing a decline in expected cash flows. There were no material changes in expected cash flows for the remaining acquired loan pools.

Economic conditions in the Corporation's markets, all within Michigan, were generally less favorable than those nationwide during 2011 and the first three months of 2012. The economy in Michigan has showed signs of improvement, although economic challenges remain and are expected to continue in 2012. Accordingly, management believes net loan losses, delinquencies and nonperforming loans will remain at elevated levels.

The following schedule summarizes information related to the Corporation's allowance for originated loans:

	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Allowance for loan losses - originated loans	\$ 85,585	\$ 86,733	\$ 89,674
Nonperforming loans	98,548	106,269	145,859
Allowance for originated loans as a percent of:			
Total originated loans	2.54%	2.60%	2.85%
Nonperforming loans	87%	82%	61%
Nonperforming loans, net of impaired originated loans for which the expected loss has been charged-off	120%	107%	75%

Table of Contents**Deposits**

Total deposits were \$4.46 billion at March 31, 2012, an increase of \$95 million, or 2.2%, from total deposits of \$4.37 billion at December 31, 2011, and an increase of \$79 million, or 1.8%, from total deposits of \$4.38 billion at March 31, 2011. The increase in total deposits from year end 2011 was primarily attributable to a seasonal increase in municipal customer deposits and an increase in noninterest bearing demand deposits that were partially offset by a decrease in certificate of deposit accounts. The increase in total deposits for the twelve-month period ended March 31, 2012 was primarily attributable to a \$148 million, or 19%, increase in noninterest bearing demand deposits that was partially offset by a decline in certificate of deposit accounts and the Corporation paying off maturing brokered deposits. At March 31, 2012, the Corporation had \$94 million in remaining brokered deposits that were acquired in the OAK acquisition. The Corporation intends to continue to use its liquidity to pay off brokered deposits as they mature, with \$49 million maturing during the remainder of 2012, \$37 million maturing in 2013 and the remainder thereafter.

It is the Corporation's strategy to develop customer relationships that will drive core deposit growth and stability. The Corporation's competitive position within many of its market areas has historically limited its ability to materially increase core deposits without adversely impacting the weighted average cost of the deposit portfolio. While competition for core deposits remained strong throughout the Corporation's markets during 2011 and the first three months of 2012, the Corporation's efforts to expand its deposit relationships with existing customers, the Corporation's financial strength and a general trend in customers holding more liquid assets have resulted in the Corporation continuing to experience increases in customer deposits. Total deposits increased \$136 million, excluding the reduction in maturing brokered deposits, during the twelve months ended March 31, 2012, while during the same time frame, the Corporation experienced a decrease in the average cost of its deposits.

At March 31, 2012, the Corporation's time deposits, which consist of certificates of deposit, totaled \$1.48 billion, of which \$759 million have stated maturities during the remainder of 2012. The Corporation expects the majority of these maturing time deposits to be renewed by customers. The following schedule summarizes the quarterly maturities for the remainder of 2012 of the Corporation's time deposits:

	Amount	Weighted Average Interest Rate
	(Dollars in thousands)	
Maturity schedule:		
April 1 – June 30, 2012	\$ 359,158	0.85%
July 1 – September 30, 2012	211,155	1.26
October 1 – December 31, 2012	188,851	1.28
Total 2012 maturities	\$ 759,164	1.07%

Borrowed Funds

Borrowed funds include short-term borrowings and Federal Home Loan Bank (FHLB) advances. Short-term borrowings were \$335.1 million, \$303.8 million and \$286.2 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively, and were comprised solely of securities sold under agreements to repurchase with customers. Securities sold under agreements to repurchase represent funds deposited by customers that are secured by investment securities that are owned by Chemical Bank, as these deposits are not covered by FDIC insurance. These funds have been a stable source of liquidity for Chemical Bank, much like its core deposit base. As part of the Corporation's focus on relationship banking, it generally accepts these deposits from customers that have an established banking relationship with Chemical Bank. The Corporation's securities sold under agreements to repurchase do not qualify as sales for accounting purposes.

FHLB advances are borrowings from the Federal Home Loan Bank of Indianapolis that are secured by both a blanket security agreement of real estate residential first lien loans with an aggregate book value equal to at least 155% of the advances and FHLB capital stock owned by Chemical Bank. FHLB advances totaled \$42.1 million at March 31, 2012, compared to \$43.1 million at December 31, 2011 and \$72.9 million at March 31, 2011. At March 31, 2012, the carrying value of real estate residential first lien loans eligible for collateral under the blanket security agreement was \$810 million.

The scheduled maturities of FHLB advances outstanding at March 31, 2012 were as follows: 2012 – \$7.8 million; 2013 – \$28.1 million; 2014 – \$5.7 million; 2015 – \$0.5 million.

Table of Contents

At March 31, 2012, the Corporation's additional borrowing availability through the FHLB, based on the amount of FHLB stock owned by the Corporation and subject to the FHLB's credit requirements and policies, was \$299 million. At March 31, 2012, the Corporation had agreements in place to obtain up to \$30 million in additional liquidity through borrowings from the Federal Reserve Bank's discount window at the Corporation's discretion.

Credit-Related Commitments

The Corporation has credit-related commitments that may impact its liquidity. The following schedule summarizes the Corporation's credit-related commitments and expected expiration dates by period as of March 31, 2012. Because many of these commitments historically have expired without being drawn upon, the total amount of these commitments does not necessarily represent future cash requirements of the Corporation.

	Less than 1 year	1-3 years	3-5 years	More than 5 years	Total
	(In thousands)				
Unused commitments to extend credit	\$ 454,906	\$ 108,074	\$ 59,635	\$ 52,395	\$ 675,010
Loan commitments	193,793				193,793
Standby letters of credit	28,131	13,357	3,840	225	45,553
Total credit-related commitments	\$ 676,830	\$ 121,431	\$ 63,475	\$ 52,620	\$ 914,356

Capital

Total shareholders' equity was \$580.1 million at March 31, 2012, compared to \$571.7 million at December 31, 2011 and \$563.7 million at March 31, 2011. Total shareholders' equity as a percentage of total assets was 10.6% as of March 31, 2012, compared to 10.7% at December 31, 2011 and 10.6% at March 31, 2011. The Corporation's tangible equity, which is defined as total shareholders' equity less goodwill and other acquired intangible assets, totaled \$463.0 million, \$454.2 million and \$444.5 million at March 31, 2012, December 31, 2011 and March 31, 2011, respectively. The Corporation's tangible equity to assets ratio was 8.7% at both March 31, 2012 and December 31, 2011, compared to 8.5% at March 31, 2011.

The Corporation and Chemical Bank continue to maintain strong capital positions, which significantly exceeded the minimum levels prescribed by the Federal Reserve at March 31, 2012, as shown in the following schedule:

	Leverage	Tier 1 Risk-Based Capital	Total Risk-Based Capital
Actual Capital Ratios:			
Chemical Financial Corporation	9.1%	12.4%	13.7%
Chemical Bank	9.0	12.3	13.5
Minimum required for capital adequacy purposes	4.0	4.0	8.0
Minimum required for well-capitalized capital adequacy purposes	5.0	6.0	10.0

Table of Contents**Results of Operations*****Net Interest Income***

Net interest income is the difference between interest income on earning assets, such as loans, investment and nonmarketable equity securities, federal funds sold and interest-bearing deposits with unaffiliated banks and others, and interest expense on liabilities, such as deposits and borrowings. Net interest income, on a fully taxable equivalent (FTE) basis, is the difference between interest income and interest expense adjusted for the tax benefit on tax-exempt commercial loans and investment securities. Net interest margin is calculated by dividing net interest income (FTE) by average interest-earning assets, annualized as applicable. Net interest spread is the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Because noninterest-bearing sources of funds, or free funds (principally demand deposits and shareholders' equity), also support earning assets, the net interest margin exceeds the net interest spread.

Net interest income (FTE) was \$47.5 million in the first quarter of 2012, compared to \$48.4 million in the fourth quarter of 2011 and \$46.5 million in the first quarter of 2011. The presentation of net interest income on an FTE basis is not in accordance with GAAP but is customary in the banking industry. This non-GAAP measure ensures comparability of net interest income arising from both taxable and tax-exempt loans and investment securities. The adjustments to determine net interest income (FTE) were \$1.3 million for each of the three months ended March 31, 2012, December 31, 2011 and March 31, 2011. These adjustments were computed using a 35% federal income tax rate.

Changes in the Corporation's net interest income are influenced by a variety of factors, including changes in the level and mix of interest-earning assets and interest-bearing liabilities, the level and direction of interest rates, the difference between short-term and long-term interest rates (the steepness of the yield curve) and the general strength of the economies in the Corporation's markets. Risk management plays an important role in the Corporation's level of net interest income. The ineffective management of credit risk, and more significantly interest rate risk, can adversely impact the Corporation's net interest income. Management monitors the Corporation's consolidated statement of financial position to reduce the potential adverse impact on net interest income caused by significant changes in interest rates. The Corporation's policies in this regard are further discussed under the subheading *Market Risk*.

The Federal Reserve Board influences the general market rates of interest, including the deposit and loan rates offered by many financial institutions. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, was 3.25% at the end of 2008 and has remained at this historically low rate through March 31, 2012. The prime interest rate has historically been 300 basis points higher than the federal funds rate. The Federal Reserve's Open Market Committee (FOMC) has indicated that it will potentially keep the federal funds rate between zero and 0.25% through the end of 2014, and therefore, the prime interest rate is expected to remain at or near its current historical low level of 3.25% during 2012. The majority of the Corporation's variable interest rate loans in the commercial loan portfolio are tied to the prime rate.

Net interest income (FTE) of \$47.5 million in the first quarter of 2012 was \$0.9 million, or 1.9%, lower than net interest income (FTE) of \$48.4 million in the fourth quarter of 2011, with the decrease primarily attributable to one less day in the first quarter of 2012 and the receipt of certain sources of interest income in the fourth quarter of 2011 consistent with historical experience. The net interest margin in the first quarter of 2012 was 3.76%, compared to 3.84% in the fourth quarter of 2011. The average yield on interest-earning assets decreased 12 basis points to 4.28% in the first quarter of 2012, from 4.40% in the fourth quarter of 2011. The decrease in yield on interest-earning assets was offset by an increase in the average volume of interest-earning assets outstanding during the first quarter of 2012, as compared to the fourth quarter of 2011. The average cost of interest-bearing liabilities decreased 6 basis points to 0.67% in the first quarter of 2012, from 0.73% in the fourth quarter of 2011. The decreases in the yield on interest-earning assets and the cost of interest-bearing liabilities were primarily attributable to the continued historical low interest rate environment and the repricing of loans and deposits to current market rates upon maturity or renewal.

Net interest income (FTE) of \$47.5 million in the first quarter of 2012 was \$1.0 million, or 2.0%, higher than net interest income (FTE) of \$46.5 million in the first quarter of 2011, with the increase primarily attributable to an increase in average loans of \$155 million, or 4.2%, between the two quarters that was partially offset by the net impact of interest-earning assets and interest-bearing liabilities repricing during the twelve months ended March 31, 2012. The average volume of interest-earning assets in the first quarter of 2012 increased \$98 million, or 2.0%, compared to the first quarter of 2011, with the increase attributable to loan growth. Net interest margin was 3.76% in the first quarter of 2012, compared to 3.78% in the first quarter of 2011. The average yield on interest-earning assets decreased 20 basis points to 4.28% in the first quarter of 2012, from 4.48% in the first quarter of 2011. The average cost of interest-bearing liabilities decreased 20 basis points to 0.67% in the first quarter of 2012, from 0.87% in the first quarter of 2011.

Table of Contents

The decreases in the yield on interest-earning assets and the cost of interest-bearing liabilities were attributable primarily to the continued historical low interest rate environment and the repricing of loans and deposits to current market rates upon maturity or renewal.

The Corporation is primarily funded by core deposits, which is a lower-cost funding base than wholesale funding and historically has had a positive impact on the Corporation's net interest income and net interest margin. Based on the current historically low level of market interest rates and the Corporation's current low levels of interest rates on its core deposit transaction accounts, further market interest rate reductions would likely not result in a significant decrease in interest expense.

The following schedule presents the average daily balances of the Corporation's major categories of assets and liabilities, interest income and expense on an FTE basis, average interest rates earned and paid on the assets and liabilities, net interest income (FTE), net interest spread and net interest margin for the three months ended March 31, 2012, December 31, 2011 and March 31, 2011.

Total change in interest expense on interest-bearing liabilities	(110)	(466)	(576)	(506)	(1,495)	(2,001)
Total Change in Net Interest Income (FTE)	\$ 883	\$ (1,814)	\$ (931)	\$ 3,002	\$ (2,061)	\$ 941

* Taxable equivalent basis using a federal income tax rate of 35%.

** The change in interest income and interest expense due to both volume and rate has been allocated to the volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Provision for Loan Losses

The provision for loan losses (provision) is an increase to the allowance, as determined by management, to provide for probable losses inherent in the originated loan portfolio and for impairment of pools of acquired loans that results from the Corporation experiencing a decrease in cash flows of acquired loans during each reporting period.

The provision was \$5.0 million in the first quarter of 2012, compared to \$5.1 million in the fourth quarter of 2011 and \$7.5 million in the first quarter of 2011. The Corporation recognized a \$0.6 million provision related to the acquired portfolio during the first quarter of 2012 that was primarily attributable to one acquired loan pool experiencing a decline in expected cash flows. There were no material changes in expected cash flows for the remaining acquired loan pools since the date of acquisition.

Edgar Filing: CHEMICAL FINANCIAL CORP - Form 10-Q

The Corporation experienced net loan charge-offs of \$5.5 million in both the first quarter of 2012 and the fourth quarter of 2011, compared to \$7.4 million in the first quarter of 2011. Net loan charge-offs as a percentage of average loans (annualized) were 0.58% in both the first quarter of 2012 and the fourth quarter of 2011, compared to 0.80% in the first quarter of 2011. Net loan charge-offs of loans in the commercial loan portfolio totaled \$2.7 million in the first quarter of 2012, compared to \$3.5 million in the fourth quarter of 2011 and \$5.6 million in the first quarter of 2011 and represented 50% of total net loan charge-offs during the first quarter of 2012, compared to 64% during the fourth quarter of 2011 and 76% during the first quarter of 2011. The commercial loan portfolio's net loan charge-offs in the first three months of 2012 and in 2011 were not concentrated in any one industry or borrower. Net loan charge-offs of loans in the consumer loan portfolio totaled \$2.8 million in the first quarter of 2012, compared to \$2.0 million in the fourth quarter of 2011 and \$1.7 million in the first quarter of 2011.

Table of Contents

The Corporation's provision of \$5.0 million in the first quarter of 2012 was \$0.5 million lower than net loan charge-offs for the quarter, and was \$0.1 million lower than the provision in the fourth quarter of 2011 of \$5.1 million. The level of the provision in the first quarter of 2012 was reflective of continued improvement in the credit quality of the loan portfolio that included decreases in nonperforming loans and no significant changes in risk grade categories of the commercial loan portfolio. It is management's belief that the overall credit quality of the Corporation's loan portfolio during the three months ended March 31, 2012 was positively impacted by an improvement in the economic environment in the State of Michigan, with the state unemployment rate declining to 8.5% at March 31, 2012, compared to 9.3% at December 31, 2011 and 10.5% at March 31, 2011.

Noninterest Income

Noninterest income was \$12.6 million, \$11.5 million and \$10.8 million for the three months ended March 31, 2012, December 31, 2011 and March 31, 2011, respectively. The following summarizes the major components of noninterest income:

	Three Months Ended		
	March 31, 2012	December 31, 2011 (In thousands)	March 31, 2011
Service charges on deposit accounts	\$ 4,505	\$ 4,948	\$ 4,096
Wealth management revenue	2,921	2,674	2,766
Electronic banking fees	1,781	1,638	1,718
Gain on sale of merchant card services	1,280		
Mortgage banking revenue	1,185	1,145	1,064
Other fees for customer services	533	507	658
Insurance commissions	375	389	282
Other	69	200	188
Total noninterest income	\$ 12,649	\$ 11,501	\$ 10,772

Noninterest income of \$12.6 million in the first quarter of 2012 increased \$1.1 million, or 10.0%, compared to \$11.5 million in the fourth quarter of 2011, with the increase attributable to the Corporation recognizing a one-time gain of \$1.3 million related to the sale of its merchant card processing services and higher wealth management revenue that was partially offset by a decline in service charges on deposit accounts.

Service charges on deposit accounts are comprised of overdraft/non-sufficient funds fees, checking account fees and other deposit account charges. Service charges on deposit accounts of \$4.5 million in the first quarter of 2012 decreased \$0.4 million, or 9.0%, compared to \$4.9 million in the fourth quarter of 2011, with the decrease due primarily to lower overdraft/non-sufficient fund fees. The Corporation's overdraft/non-sufficient fund fees are somewhat seasonal and historically the lowest in the first quarter of the year. Overdraft/non-sufficient funds fees included in service charges on deposit accounts were \$3.7 million in the first quarter of 2012 compared to \$4.1 million in the fourth quarter of 2011 and \$3.2 million in the first quarter of 2011.

Wealth management revenue is comprised of investment and other custodial account fees that are generally based on the market value of assets within a trust account, in addition to fees from the sale of investment products through the Chemical Financial Advisors program. Wealth management revenue of \$2.9 million in the first quarter of 2012 increased \$0.2 million, or 9.2%, compared to \$2.7 million in the fourth quarter of 2011, with the increase due primarily to increased fees from the sale of investment products. Fees from the sale of investment products totaled \$0.8 million in the first quarter of 2012 compared to \$0.6 million in the fourth quarter of 2011. Wealth management revenue of \$2.9 million in the first quarter of 2012 increased \$0.1 million, or 5.6%, compared to \$2.8 million in the first quarter of 2011.

Noninterest income of \$12.6 million in the first quarter of 2012 increased \$1.9 million, or 17.4%, compared to \$10.8 million in the first quarter of 2011. In addition to the \$1.3 million gain on sale of the Corporation's merchant card processing services in the first quarter of 2012, overdraft/non-sufficient funds fees included in service charges on deposit accounts were \$0.5 million higher in the first quarter of 2012, as compared to the first quarter of 2011.

Table of Contents**Operating Expenses**

Total operating expenses were \$36.3 million, \$37.8 million and \$35.4 million for the three months ended March 31, 2012, December 31, 2011 and March 31, 2011, respectively. The following summarizes the major categories of operating expenses:

	Three Months Ended		
	March 31, 2012	December 31, 2011	March 31, 2011
	(In thousands)		
Salaries and wages	\$ 16,448	\$ 15,770	\$ 14,949
Employee benefits	4,121	3,101	3,376
Occupancy	3,154	3,444	3,338
Equipment and software	3,118	2,941	2,722
Outside processing / service fees	1,329	1,444	1,668
FDIC insurance premiums	1,110	1,205	1,769
Professional fees	953	931	1,259
Postage and courier	824	763	822
Loan collection costs	688	796	1,128
Other real estate expenses	679	2,979	964
Advertising and marketing	522	816	514
Donations	469	600	342
Telephone	410	440	441
Intangible asset amortization	367	408	511
Supplies	344	423	406
Other	1,759	1,746	1,180
Total Operating Expenses	\$ 36,295	\$ 37,807	\$ 35,389

Total operating expenses of \$36.3 million in the first quarter of 2012 decreased \$1.5 million, or 4.0%, compared to \$37.8 million in the fourth quarter of 2011, with the decrease attributable to lower other real estate expenses, occupancy and advertising and marketing expenses, that were partially offset by higher salaries and wages and employee benefits.

Salaries and wages of \$16.4 million in the first quarter of 2012 increased \$0.6 million, or 4.3%, compared to \$15.8 million in the fourth quarter of 2011, with the increase primarily attributable to new positions and merit increases that took effect at the beginning of 2012.

Employee benefit costs of \$4.1 million in the first quarter of 2012 increased \$1.0 million, or 33%, compared to \$3.1 million in the fourth quarter of 2011, with the increase primarily attributable to higher payroll taxes, in part due to higher salaries and wages and in part due to higher unemployment taxes, which are generally higher in the first quarter of the year, and higher costs associated with the Corporation's defined benefit pension plan resulting from a decrease in the discount rate used to determine the Corporation's 2012 pension expense.

Occupancy expenses of \$3.2 million in the first quarter of 2012 decreased \$0.2 million, or 8.4%, compared to \$3.4 million in the fourth quarter of 2011, with the decrease primarily attributable to the Corporation recognizing \$0.3 million of expense during the fourth quarter of 2011 related to the reduction in carrying value of a building facility that is no longer being used.

Other real estate (ORE) expenses of \$0.7 million in the first quarter of 2012 decreased \$2.3 million, or 77%, compared to \$3.0 million in the fourth quarter of 2011, with the decrease primarily attributable to a decrease in writedowns to estimated net realizable value of ORE properties. During the first quarter of 2012, the Corporation recognized \$2.1 million less expense applicable to ORE writedowns and net realized gains/losses on ORE sales, compared to the fourth quarter of 2011.

Advertising and marketing expenses of \$0.5 million in the first quarter of 2012 decreased \$0.3 million, or 36%, compared to \$0.8 million in the fourth quarter of 2011, with the decrease primarily attributable the timing of promotional campaigns for the Corporation.

Total operating expenses of \$36.3 million in the first quarter of 2012 increased \$0.9 million, or 2.6%, compared to \$35.4 million in the first quarter of 2011, with the increase attributable to higher salaries and wages and employee benefits offset partially by lower FDIC insurance

premiums, loan collection costs and outside processing/service fees.

Table of Contents***Income Tax Expense***

The Corporation's effective federal income tax rate was 29.5% for the three months ended March 31, 2012, compared to 28.5% and 29.8% for the three months ended December 31, 2011 and March 31, 2011, respectively. The difference between the federal statutory income tax rate and the Corporation's effective federal income tax rate is primarily a function of the proportion of the Corporation's interest income exempt from federal taxation and other nondeductible expenses relative to pre-tax net income and tax credits.

The Corporation records income tax expense for interim periods based on its best estimate of the effective income tax rate expected to be applicable for the full year. However, when a reliable estimate for the full year cannot be made, the Corporation utilizes the actual effective income tax rate on a year-to-date basis. The Corporation recorded income tax expense for the three-month periods ended March 31, 2012 and 2011 using its best estimate of the effective income tax rate expected for the full year and applied that rate on a year-to-date basis.

Liquidity

Liquidity measures the ability of the Corporation to meet current and future cash flow needs in a timely manner. Liquidity risk is the adverse impact on net interest income if the Corporation was unable to meet its cash flow needs at a reasonable cost.

Liquidity is managed to ensure stable, reliable and cost-effective sources of funds are available to satisfy deposit withdrawals and lending and investment opportunities. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets and its access to alternative sources of funds. The Corporation manages its funding needs by maintaining a level of liquid funds through its asset/liability management process. The Corporation's largest sources of liquidity on a consolidated basis are the deposit base that comes from consumer, business and municipal customers within the Corporation's local markets, principal payments on loans, cash held at the FRB, unpledged investment securities available-for-sale and federal funds sold. Excluding brokered deposits, total deposits increased \$95 million and \$136 million during the three and twelve months ended March 31, 2012, respectively. The Corporation's loan-to-deposit ratio decreased slightly to 86% at March 31, 2012 from 88% at December 31, 2011. At March 31, 2012, the Corporation had \$348 million of cash deposits held at the FRB that were not invested in federal funds sold due to the low interest rate environment, compared to \$256 million at December 31, 2011. In addition, at March 31, 2012, the Corporation had unpledged investment securities available-for-sale with an amortized cost of \$124 million. The Corporation also has available unused wholesale sources of liquidity, including FHLB advances and borrowings from the discount window of the FRB.

Chemical Bank is a member of the FHLB and as such has access to short-term and long-term advances from the FHLB that are generally secured by real estate residential first lien loans. The Corporation considers advances from the FHLB as its primary wholesale source of liquidity. FHLB advances decreased \$1 million during the three months ended March 31, 2012 to \$42 million at that date. The Corporation's additional borrowing availability from the FHLB, based on its FHLB capital stock and subject to certain requirements, was \$299 million at March 31, 2012. Chemical Bank can also borrow from the FRB's discount window to meet short-term liquidity requirements. These borrowings are required to be secured by investment securities and/or certain loan types, with each category of assets carrying various borrowing capacity percentages. At March 31, 2012, Chemical Bank maintained an unused borrowing capacity of \$30 million with the FRB's discount window based upon pledged collateral as of that date. It is management's opinion that the Corporation's borrowing capacity could be expanded, if deemed necessary, as Chemical Bank has additional borrowing capacity available at the FHLB that could be used if it increased its investment in FHLB capital stock, and Chemical Bank has a significant amount of additional assets that could be used as collateral at the FRB's discount window.

The Corporation manages its liquidity position to provide the cash necessary to pay dividends to shareholders, invest in new subsidiaries, enter new banking markets, pursue investment opportunities and satisfy other operating requirements. The Corporation's primary source of liquidity is dividends from Chemical Bank.

Federal and state banking laws place certain restrictions on the amount of dividends that a bank may pay to its parent company. During the three months ended March 31, 2012, Chemical Bank paid \$5.5 million in cash dividends to the Corporation, and the Corporation paid cash dividends to shareholders of \$5.5 million. During 2011, Chemical Bank paid \$22.0 million in dividends to the Corporation and the Corporation paid cash dividends to shareholders of \$22.0 million. The earnings of Chemical Bank have been the principal source of funds to pay cash dividends to the Corporation's shareholders. Over the long term, cash dividends to shareholders are dependent upon earnings, as well as capital requirements, regulatory restraints and other factors affecting Chemical Bank.

Table of Contents**Market Risk**

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due primarily to changes in interest rates. Interest rate risk is the Corporation's primary market risk and results from timing differences in the repricing of interest rate sensitive assets and liabilities and changes in relationships between rate indices due to changes in interest rates. The Corporation's net interest income is largely dependent upon the effective management of interest rate risk. The Corporation's goal is to avoid a significant decrease in net interest income, and thus an adverse impact on the profitability of the Corporation, in periods of changing interest rates. Sensitivity of earnings to interest rate changes arises when yields on assets change differently from the interest costs on liabilities. Interest rate sensitivity is determined by the amount of interest-earning assets and interest-bearing liabilities repricing within a specific time period and the magnitude by which interest rates change on the various types of interest-earning assets and interest-bearing liabilities. The management of interest rate sensitivity includes monitoring the maturities and repricing opportunities of interest-earning assets and interest-bearing liabilities. The Corporation's interest rate risk is managed through policies and risk limits approved by the boards of directors of the Corporation and Chemical Bank and an Asset and Liability Committee (ALCO). The ALCO, which is comprised of executive and senior management from various areas of the Corporation and Chemical Bank, including finance, lending, investments and deposit gathering, meets regularly to execute asset and liability management strategies. The ALCO establishes guidelines and monitors the sensitivity of earnings to changes in interest rates. The goal of the ALCO process is to manage the impact on net interest income and the net present value of future cash flows of probable changes in interest rates within authorized risk limits.

The primary technique utilized by the Corporation to measure its interest rate risk is simulation analysis. Simulation analysis forecasts the effects on the balance sheet structure and net interest income under a variety of scenarios that incorporate changes in interest rates, the shape of the Treasury yield curve, interest rate relationships and the mix of assets and liabilities and loan prepayments. These forecasts are compared against net interest income projected in a stable interest rate environment. While many assets and liabilities reprice either at maturity or in accordance with their contractual terms, several balance sheet components demonstrate characteristics that require an evaluation to more accurately reflect their repricing behavior. Key assumptions in the simulation analysis include prepayments on loans, probable calls of investment securities, changes in market conditions, loan volumes and loan pricing, deposit sensitivity and customer preferences. These assumptions are inherently uncertain as they are subject to fluctuation and revision in a dynamic environment. As a result, the simulation analysis cannot precisely forecast the impact of rising and falling interest rates on net interest income. Actual results will differ from simulated results due to many other factors, including changes in balance sheet components, interest rate changes, changes in market conditions and management strategies.

The Corporation's interest rate sensitivity is estimated by first forecasting the next twelve months of net interest income under an assumed environment of constant market interest rates. The Corporation then compares the results of various simulation analyses to the constant interest rate forecast (base case). At March 31, 2012, the Corporation projected the change in net interest income during the next twelve months assuming short-term market interest rates were to uniformly and gradually increase or decrease by up to 200 basis points in a parallel fashion over the entire yield curve during the same time period. Additionally, at March 31, 2012, the Corporation projected the change in net interest income of an immediate 400 basis point increase in market interest rates. The Corporation did not project a 400 basis point decrease in interest rates at March 31, 2012 as the likelihood of a decrease in interest rates beyond 200 basis points was considered unlikely given prevailing interest rate levels. These projections were based on the Corporation's assets and liabilities remaining static over the next twelve months, while factoring in probable calls and prepayments of certain investment securities and real estate residential and consumer loans. The ALCO regularly monitors the Corporation's forecasted net interest income sensitivity to ensure that it remains within established limits.

A summary of the Corporation's interest rate sensitivity at March 31, 2012 follows:

<i>Twelve month interest rate change projection (in basis points)</i>	Gradual Change					Immediate Change
	-200	-100	0	+100	+200	+400
<i>Percent change in net interest income vs. constant rates</i>	(7.9)%	(4.6)%		1.4%	1.9%	3.4%

At March 31, 2012, the Corporation's model simulations projected that 100, 200 and 400 basis point increases in interest rates as previously discussed would result in positive variances in net interest income of 1.4%, 1.9% and 3.4%, respectively, relative to the base case over the next 12-month period, while decreases in interest rates of 100 and 200 basis points would result in negative variances in net interest income of 4.6% and 7.9%, respectively, relative to the base case over the next 12-month period. The likelihood of a decrease in interest rates beyond 100 basis points at March 31, 2012 was considered to be unlikely given prevailing interest rate levels.

Table of Contents

The Corporation's mix of interest-earning assets and interest-bearing liabilities has historically resulted in its interest rate position being liability sensitive. To reduce the risk of rising interest rates adversely impacting net interest income, during 2009 and 2010, the Corporation adjusted its liability sensitive position by increasing the amount of variable rate instruments in its investment securities and loan portfolios. Variable rate investment securities at March 31, 2012 of \$294 million comprised 34% of total investment securities at that date, compared to \$308 million, or 36% of total investment securities, at December 31, 2011 and \$315 million, or 42% of total investment securities, at March 31, 2011. Variable rate loans comprised 29% of the total loan portfolio at March 31, 2012 and December 31, 2011, compared to 28% at March 31, 2011. Approximately two-thirds of the Corporation's variable interest rate loans were at an interest rate floor and are expected to remain at their floor until they mature or market interest rates rise more than 75 basis points. Therefore, future increases in market interest rates are not expected to have a significant immediate favorable impact on the Corporation's net interest income at the time of such increases because of the levels of variable interest rate loans at interest rate floors and fixed interest rate loans in the Corporation's loan portfolio. The FOMC has indicated that it will keep the federal funds rate at between zero and 0.25% through the end of 2014, and therefore, corresponding increases in other market interest rates that are generally tied to the federal funds rate, such as the prime interest rate, are not expected during 2012.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information concerning quantitative and qualitative disclosures about market risk is contained in the discussion regarding interest rate risk and sensitivity under the captions "Liquidity Risk" and "Market Risk" herein and in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011.

The Corporation does not believe that there has been a material change in the nature or categories of the Corporation's primary market risk exposure, or the particular markets that present the primary risk of loss to the Corporation. As of the date of this report, the Corporation does not know of or expect there to be any material change in the general nature of its primary market risk exposure in the near term. The methods by which the Corporation manages its primary market risk exposure, as described in its Annual Report on Form 10-K for the year ended December 31, 2011, have not changed materially during the current year. As of the date of this report, the Corporation does not expect to make material changes in those methods in the near term. The Corporation may change those methods in the future to adapt to changes in circumstances or to implement new techniques.

The Corporation's market risk exposure is mainly comprised of its vulnerability to interest rate risk. Prevailing interest rates and interest rate relationships are largely determined by market factors that are beyond the Corporation's control. All information provided in response to this item consists of forward-looking statements. Reference is made to the section captioned "Forward-Looking Statements" in this report for a discussion of the limitations on the Corporation's responsibility for such statements. In this discussion, "near term" means a period of one year following the date of the most recent consolidated statement of financial position contained in this report.

Item 4. Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Corporation's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures. Based on and as of the time of that evaluation, the Corporation's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Corporation's disclosure controls and procedures were effective as of the end of the period covered by this report. There was no change in the Corporation's internal control over financial reporting that occurred during the three months ended March 31, 2012 that has materially affected, or that is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Table of Contents**Part II. Other Information****Item 1A. Risk Factors**

Information concerning risk factors is contained in the discussion in Item 1A, Risk Factors, in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011. As of the date of this report, the Corporation does not believe that there has been a material change in the nature or categories of the Corporation's risk factors, as compared to the information disclosed in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the purchases of equity securities by the Corporation during the periods indicated:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1-31, 2012				
Common Stock Repurchase Program		\$		500,000
Employee Transactions			N/A	N/A
February 1-29, 2012				
Common Stock Repurchase Program				500,000
Employee Transactions	10,570	23.45	N/A	N/A
March 1-31, 2012				
Common Stock Repurchase Program				500,000
Employee Transactions			N/A	N/A
Total	10,570	\$ 23.45		500,000

In January 2008, the board of directors of the Corporation authorized the repurchase of up to 500,000 shares of the Corporation's common stock in the open market. The repurchased shares are available for later reissuance in connection with potential future stock dividends, the Corporation's dividend reinvestment plan, employee benefit plans and other general corporate purposes.

Employee transactions include shares delivered in satisfaction of tax withholding obligations by employees who received shares of the Corporation's common stock upon the conversion of vested restricted stock performance units during the applicable period. The Corporation's stock compensation plans permit employees to use shares of the Corporation's common stock to satisfy such obligations based on the market value of the stock on the date of vesting.
