Item 2.02 Results of Operations and Financial Condition.

On October 16, 2012, Manhattan Associates, Inc. (the Company) issued a press release providing the results for its financial performance for the third quarter and nine months ended September 30, 2012. A copy of this press release is attached as Exhibit 99.1. Pursuant to General Instruction B.2 of Form 8-K, this exhibit is furnished and not filed for purposes of Section 18 of the Securities Exchange Act of 1934.

Non-GAAP Financial Measures in the Press Release

The press release includes, as additional information regarding our operating results, our adjusted operating income, adjusted net income and adjusted earnings per share, which excludes the impact of acquisition-related costs and the amortization thereof; equity-based compensation; and asset impairment charges and related reversals all net of income tax effects and unusual tax adjustments.

These various measures are not in accordance with, or an alternative for, financial measures calculated in accordance with generally accepted accounting principles in the United States (GAAP) and may be different from similarly titled non-GAAP financial measures used by other companies. Non-GAAP financial measures should not be used as a substitute for, or considered superior to, measures of financial performance prepared in accordance with GAAP.

We believe that these adjusted (non-GAAP) results provide more meaningful information regarding those aspects of our current operating performance that can be effectively managed, and consequently have developed our internal reporting, compensation and planning systems using these measures. Non-GAAP measures used in the press release exclude the impact of the items described above for the following reasons:

Because we sporadically engage in acquisitions, we incur acquisition-related costs that consist primarily of expenses from accounting and legal due diligence, whether or not we ultimately proceed with the transaction. Additionally, we might assume and incur certain unusual costs, such as employee retention benefits, that result from arrangements made prior to the acquisition. These acquisition costs are difficult to predict and do not correlate to the expenses of our core operations. We believe our competitors and peers typically present as a non-GAAP measure adjusted net income and adjusted earnings per share that exclude the amortization of acquisition-related intangible assets, and thus we exclude these amortization costs when calculating adjusted net income and adjusted earnings per share to facilitate more relevant and meaningful comparisons of our operating results with that of our competitors.

Because equity-based compensation expense is not an expense that typically requires or will require cash settlement by the Company, and because we believe our competitors and peers typically present non-GAAP results excluding all equity-based compensation expense, we have not included equity-based compensation expense and the related tax benefit generated upon the disposition of equity-based compensation in the assessment of our operating performance.

We believe the reporting of adjusted operating income, adjusted net income and adjusted earnings per share facilitates investors' understanding of our historical operating trends, because it provides important supplemental measurement information in evaluating the operating results of our business. We also believe that adjusted operating income, adjusted net income and adjusted earnings per share provide a basis for more relevant comparisons to other companies in the industry, enable investors to evaluate our operating performance in a manner consistent with our internal basis of measurement and also present our investors our operating results on the same basis as that used by our management. Management refers to adjusted operating income, adjusted net income and adjusted earnings per share in making operating decisions because we believe they provide meaningful supplemental information regarding our operational performance and our ability to invest in research and development and fund acquisitions and capital expenditures. In addition, adjusted operating income, adjusted net income and adjusted earnings per share facilitate management's internal comparisons to our historical operating results and comparisons to competitors' operating results.

Further, we rely on adjusted operating income, adjusted net income and adjusted net income per share information as primary measures to review and assess the operating performance of our company and our management team in connection with our executive compensation and bonus plans. Since most of our employees are not directly involved with decisions surrounding acquisitions and other items that are not central to our core operations, we do not believe it is appropriate or fair to have their incentive compensation affected by these items.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.
