Royalty Pharma Presentation Regarding Elan Proposal
6 March 2013

*
*
*
*
*
*

RP Management, LLC, founded in 1996, is the investment manager to entities investing in royalty interests in marketed and late stage biopharmaceutical products (these entities, together with predecessor entities, Royalty Pharma)

Royalty Pharma has a 17 year track record of working with research institutions, companies, and inventors to monetize future royalties on leading biopharmaceutical drugs

Provides capital to pharma & biotech companies to fund late-stage clinical trials in exchange for royalty interests

Portfolio of royalty interests in 37 products

Royalty Pharma can act quickly to make a formal offer

2015 Price to Earnings (P/E) Multiples
 $\$11 \text{ share price} / \text{Valeant's } 2015 \text{ P/E of } 8.7x = \1.26
 $\$11 \text{ share price} / \text{Jazz's } 2015 \text{ P/E of } 6.8x = \1.62
2015 EPS Required to Trade at Comparable P/E Multiples With
\$11 Share Price
Analysts that cover Elan estimate that its existing
business (i.e. primarily Tysabri) will generate 2015
EPS of approx. \$0.36
Direct comparison to Jazz and Valeant suggests Elan
will need to acquire new businesses or products that
contribute an additional \$0.90 to \$1.26 in 2015 EPS
to fill the EPS gap and trade at comparable multiples
As illustrated, Elan would need to multiply its 2015

EPS by 3.5x to 4.5x over the next two years to fill its
EPS gap

Key question: can Elan turn ~\$3bn in cash into
~\$1.00 of incremental EPS by 2015? This would
require spending \$3bn to acquire ~\$600m of
incremental net income by 2015 from new businesses
(implying a purchase multiple of 5x 2015 net income).

The \$1bn share repurchase would leave only ~\$2bn
for acquisitions, implying that Elan would need to
acquire ~\$480m of incremental net income (implying
a purchase multiple of 4.2x 2015 net income) .

1

2

About the Tysabri Transaction

Announced to the market on 6 February 2013

Expected to close in 2Q 2013

On completion of the Tysabri Transaction, Elan will give up its 50% profit share in Tysabri in exchange for:

\$3.25bn in cash

A tiered royalty on Tysabri sales

12% on sales during first 12 months following closing of the Tysabri Transaction

After 12 months, 18% royalty on first \$2bn of annual sales and 25% royalty on annual sales over \$2bn

Tiered royalty structure allocates more of the lower risk cash flows (<\$2bn in annual sales) to

Biogen, and makes the value allocated to Elan more dependent on higher risk cash flows (>\$2bn in annual sales)

In addition, on completion of the Tysabri Transaction:

The collaboration agreement between Biogen and Elan will terminate (eliminating change of control provision)

Biogen will have full operational control of, and majority economic interest in, Tysabri
After the Tysabri Transaction, substantially all of Elan's value will consist of net cash of
approximately \$3.1bn and a royalty interest in Tysabri

8

On 6 February, Elan Revealed its True Colors*

9

* Denotes a Royalty Pharma opinion

1

Royalty

Pharma

has

underscored

certain

portions

of

the

passages

for

emphasis

Use of majority of cash for

acquisitions

Unclear and unfocused acquisition strategy*

Vague statements regarding returning cash to shareholders*

Little concern for shareholder views*

Stock fell 10%

Our Perspective

of Key Points Made*

Quote

As far as usage of this capital upon close, they include, but are not limited to, therapeutic opportunities across broad therapies. We are basically agnostic to therapeutic focus

. . . we are somewhat agnostic to different geographies

. . . they all hold some appeal, depending on what part of the geography you're interested in

. . . we are not particularly interested in

large markets, large indications of primary care, but large markets in smaller indications would be attractive and vice versa.

And we still do like some very specific, unique science things.

At the right time and in the right manner, we would intend to provide some portion of this capital back to shareholders over time.

We are not going to satisfy all investors on every category . . . So anyway, everyone can vote with their feet

. . .

But to emphasize, the \$3.25 billion is a lot of money. There is a lot of assets out there. Our goal as we sit here today is that the majority of that capital over time should be put into businesses, again, in a balanced way. But again, some portion of it, given that we brought forward the value, will be returned to shareholders at the right time and post-close and as we sequence it against other transactions

1

Following Royalty Pharma Offer, Elan Changed its Tune*

10

* Denotes a Royalty Pharma opinion

1

RBC and Deutsche Bank notes published on 4-Mar-2013

We greatly value our shareholder relationships and the access to equity

capital these relationships give us and we appreciate the time horizon of many of our long term holders. We will continue to work on ways to unlock incremental value to their direct benefit.

"The vast majority of our investor base simply don't view Royalty's indication as worthy of any discussion period."

We don't see Royalty Pharma as a credible counterparty to have any strategic discussions with. We're not looking for any price.

Elan Shareholders Should View This

Change of Heart with Skepticism*

Post-Offer Announcements

22 February:

\$1bn share repurchase program

Appreciation for long term shareholders

4 March:

Dividend of 20% Tysabri royalty, but

Statement of current intention only

no long-term binding commitment

Brokers calculate a 1-2% yield

No clarity on 80% retained

Interview remarks by CEO reject any

discussions with Royalty Pharma

We're not in any discussions with [Royalty Pharma] at all on any topic

and we don't see any need to have those discussions."

First comments, or lack thereof, are often more revealing*

Change of heart prompted by Royalty Pharma Proposal*

Management does not appear to be focused on maximizing shareholder value*

4 March CEO interview remarks: We're not looking for any price

1

Significant Execution Risk Associated with Elan's New Strategy*

12

Royalty Pharma believes that:

Attractive strategic assets in the pharmaceutical industry are in short supply

There is strong competition for such assets from many large buyers with real operating synergies . . .

. . . driving high prices that make the creation of value through acquisitions difficult

There is no certainty that Elan will be able to deploy capital in ways that create value

Current senior management of Elan has not made significant acquisitions or in-licenses of

late-stage products at Elan; does not have a proven acquisition / in-licensing track record*

Known instead for divestiture of bapineuzumab, Elan Drug Technologies, Prothena and Tysabri

A successful acquisition strategy would typically require Elan to build a costly operating infrastructure and sales force in order to allow it to realize synergies from acquisitions*

Investments

typically

required

in

connection

with

acquisitions

/

in-licenses

could

dilute

Elan's

net

income

and

cash

flow

for

some

period,

and

perhaps

even

cause

those

to

become

negative

Each new investment will likely be scrutinized by Elan shareholders and analysts for near term value creation potential, increasing volatility in Elan shares*

Proposal

allows

investors

to

redeploy

the

cash

themselves

rather

than

have

Elan

acquire

equivalent assets on their behalf and pay a control premium

Shareholders will have limited control over what Elan does with its cash

\$123m remaining commitment disclosed in Elan 20-F for year ended 31-Dec-2012; \$60-80m expected this year with \$30m already

Value

Comment

Hard Assets:

Net Cash¹

\$3.1bn (\$5.1/share)

Not sensible to pay a premium for cash*

Tysabri Royalty

\$3.25bn is mid-point of range,

excluding synergies, ignoring

increased risk of tiered royalty

(See slide 13) (\$5.4/share)*

Not sensible to pay a premium for a financial asset like a royalty: should be

valued on the basis of financial metrics (i.e. intrinsic value)*

Biogen

now

has

full

operating

control

little

or

no

strategic

value

at

Elan*

Substantial portion of cash flow and value derived post 2020 patent expiry*

Financial Attributes:

NOLs

Less than \$187.5m

(\$0.3/share)

Maximum value of \$187.5m (= \$1.5bn in putative NOLs times 12.5% Irish tax rate) provided Elan can use all NOLs upfront

If they are used over time, net present value of NOLs is less than \$187.5m

Irish Tax Domicile

Difficult to value; perhaps no

value if no suitor with need for

domicile comes forward

Does not differentiate Elan from many other pharma companies in low-tax jurisdictions (e.g Jazz, Valeant)*

Extremely difficult now to use Irish domicile to lower tax rate of non-Irish businesses as a result of change in law following Alkermes/EDT deal

Offsets:

Operating Expenses

incl. ELND005

\$170-190m in 2013

(-\$0.3/share) annually

These expenses would decrease cash available to Elan Shareholders;

ELND005 clinical trial costs not disclosed

Expenses assoc. with

bapineuzumab (bapi)

\$60-80m remaining in 2013 for

bapi

; no visible value in

excess of investment required*

\$123m commitment remains for bapi

Other Considerations:

Business Development

Value destruction a real

possibility*

Scarcity of assets, competition, lack of synergies and lack of management

track record imply significant execution risk*

2

2

Limited, Customary Pre-Conditions to a Firm Offer

Satisfactory completion of customary due diligence (including management meetings)

Completion of Tysabri Transaction

Other customary conditions as set out in Rule 2.4 announcement of 25 February 2013

15

Our Proposal has only limited and customary pre-conditions

All can be satisfied quickly; we expect to complete due diligence in 20 days

Reasons Why Royalty Pharma's Proposal is Compelling

16

1.

Allows

Elan

Shareholders

to

immediately

receive

full

value

for

their

Shares

in

cash*

2.

Proposal is at a premium to price paid by Biogen in Tysabri Transaction*

3.

Proposal

represents

a

cash

premium

of

12.5%

to

the

Current

Enterprise

Value,

and

EV

and

P/E multiples well above relevant sector multiples

4.

Significant execution risk associated with Elan's new strategy*

5.

Elan's senior management lacks a successful acquisition / in-licensing track record at Elan*

6.

Post-Tysabri Transaction, Elan has little or no strategic value; the field of likely acquirors has

narrowed sharply*

7.

Biogen Gained Full Strategic Control of Tysabri
Below
in Biogen's Own Words
are the Key Elements of the Transaction
Synergies from consolidating collaboration
Will range from \$20M to \$35M annually
Asset purchase
a very appealing structure
Known asset
Simple and seamless transaction
Allows for capturing tax-related benefits
Tax-related benefits specific to asset purchase
structure
Purchase price amortization benefit will range from
\$40M to \$50M annually. This will apply only on a
GAAP basis
Increase in Manufacturing Deduction benefit
Current plan to cost share a late-stage asset
Sales-based contingent payments also tax
deductible
Use of offshore cash
Majority of upfront funded from ex-U.S. cash
Immediately and sustainably accretive to
earnings
